

CONTENTS

SESSION I. GENERAL SCENARIO

Keynote Address

- The World Elastomer Industry - the 'Unused Muscles' of the Natural Rubber Sector 3

Guest Lecture

- The Changing Economic Environment of Malaysia and the Competitiveness of Malaysian Rubber Producers 23

SESSION II. TRANSFER OF TECHNOLOGY

- Technology Transfer in the Context of Smallholders' Farming System 31
Current Methodology for Producing Quality Planting Materials 49
Promoting Young Budding and Speculative Clones to the Smallholder Sector 67
Centralised Processing Centre as a New Approach in Processing Smallholders' Rubber 95
Discussion 119

SESSION III. EXPLOITATION TECHNIQUES

- RRIMFLOW: A Novel Technique of Exploitation of Hevea Trees 123
Early Opening of Trees to Improve Productivity and Profitability 147
Early Exploitation with Puncture Tapping 169
Low Intensity Tapping Systems and Early Use of CUT on Commercial Scale: A Case Study 213
Tapping Systems Recommended in West Africa 235
Discussion 255

SESSION IV. PLANTING MATERIALS

- Performance of Some Promising Prang Besar Clones 259
Block Planting Trials-Early Results, Potentials and Future Direction 273
High-budding of PBIG Seedlings 303
Discussion 336

SESSION VA. CROP PROTECTION

- Control of White Root Disease of Rubber by Fungicide Drenching 343
Improved Fruit Set and Canopy in Hevea Through Oidium Control 359
Discussion 373

SESSION VB. ENHANCING PRODUCTIVITY

Enhancing Productivity Through Human Resource Management	379
FELDA's Approach Towards Enhancing Productivity of Rubber	391
Short-term Strategy to Improve Output: A Case Study of Smallholdings in Depressed Areas	411
Discussion	433

SESSION VI. PROCESSING

Treatment of Effluent by Rubberised Coir Carrier Reactor	441
New Preservation System for Natural Rubber Latex Concentrate	455
Borax for SMR Pallet Preservation	479
A New Process for Skin Rubber Production	511
Discussion	535

SESSION VII. PANEL DISCUSSION

Future Directions of the Natural Rubber Industry	541
