

CONTENTS

Guest Lecture

| | |
|--|----|
| Challenges for N R Latex Products in Medical and Food-related Applications | 3 |
| Characterisation of Natural Rubber | 19 |
| Accelerated Tyre Wear Tests and Criteria for Laboratory Abrasion Testers | 37 |
| Natural Rubber Bearings for Earthquake Protection of Buildings | 57 |
| Applications of Natural Rubber Serum | 84 |

SESSION I: LATEX TECHNOLOGY

| | |
|---|-----|
| Properties of Deproteinised Natural Rubber Latex | 101 |
| Concentration of Epoxidised Natural Rubber Latex by Ultrafiltration | 111 |
| Potential Protein Allergens in Latex Films | 125 |
| Tear Behaviour of Natural Rubber Latex Film | 137 |
| Discussion | 157 |

SESSION II: PROCESSING

| | |
|---|-----|
| Influence of Mastication Conditions of Natural Rubber on Its Subsequent Extrusion | 163 |
| Liquid Natural Rubber as Co-vulcanisable Process Aids | 193 |
| Effect of Die Angle on Extrusion Swell of Rubber Compound | 206 |
| Comparison of Cure Parameters of Rubbers on Rotor and Rotorless Rheometers | 212 |
| Discussion | 229 |

SESSION III: TYRES

| | |
|--|-----|
| The Environmental Tyre | 233 |
| Effects of Carbon Black on Friction Properties of Tread Compound Using a Modified ASTM-E303 Pendulum Skid Tester | 250 |
| A Comparative Study of the Energy Consumption and Vulcanisate Properties of ISNR-20 and RMA-4 Truck Tyre Ply Skin and Tread Cap Compounds | 267 |
| Plunger Energy of Pneumatic Tyres | 276 |
| Discussion | 299 |

SESSION IV: PHYSICS AND ENGINEERING

| | |
|---|-----|
| Light Weight Natural Rubber Bearings | 303 |
| Characteristics of High Damping Natural Rubber Compounds for Seismic Isolation Bearings | 328 |
| Mechanical and Spectroscopic Characterisation of Rubber-metal Assemblies | 347 |
| Discussion | 358 |

SESSIONM V: CHEMISTRY AND TECHNOLOGY

| | |
|--|-----|
| A New Approach for Studying the Effect of Fillers on Dynamic Properties | 363 |
| Structural Characteristics of Natural Rubber | 386 |
| TPENR, a Thermoplastic Elastomer Combining Oil Resistance and Heat Stability | 395 |
| Synthesis and Effects of Anti-blooming Agent | 403 |
| Discussion | 425 |

POSTER PAPERS

| | |
|--|-----|
| Preparation and Characterisation of Soluble Cyclised Rubber from Natural Rubber Latex | 429 |
| Addition of Over-cured Latex to Compounded, Uncompounded and Pre-vulcanised HA Latex | 440 |
| Rubber Lining Compounds Based on NBR/PVC Blends for Chemical Storage Tanks | 448 |
| Effect of Styrene on Mechanical Stability Time of Natural Rubber Latex before Modification | 454 |
| Natural Rubber/Epoxidised natural Rubber/Polyvinyl Chloride Ternary Blends | 463 |
| A Review of Anit-degradants Used in the Rubber Industry | 478 |
| Some Aspects of Rheological Characteristics of Natural Rubber and Polypropylene Blends | 488 |
| Upgrading of Manually Operated Mooney Viscometer to Semi-automated System | 504 |
| Injection Moluding: Mould Design and Processing in the Manufacturing of Rubber Cap Seals for Automotive Engine Oil-filter | 512 |
| Finite Element Stress-strain analysis of a Bias Tyre under Inflation Pressure | 528 |
| Studies on the Behaviour and Characteristics of Latex Glove Proteins | 547 |

| | |
|---------------|-----|
| AUTHOR INDEX | 553 |
| SUBJECT INDEX | 557 |
