	Page
Foreword.....	III
Preface.....	IV
Editor's note.....	V
<b>Expression of Uncertainties</b>	
Expression of the uncertainties of calibrations.....	3
A tabular guide to commonly used terms and expressions.....	3
<b>Temperature Scales</b>	
The <b>thermodynamic</b> temperature scale, its definition and realization..	7
The International Practical Temperature Scale of 1948, text revision of 1960.....	17
The realization and use of the International Practical Temperature Scale of 1948.....	26
Establishment of a temperature scale for the calibration of thermometers between 14° and 83° K.....	33
National Bureau of Standards provisional scale of 1955. Corrections for use in low-temperature platinum resistance thermometry.....	56
Acoustical thermometer and the National Bureau of Standards pro- visional temperature scale 2—20 (1965).....	57
The "1958 He <sup>4</sup> scale of temperatures".....	70
The 1962 He <sup>3</sup> scale of temperatures.....	89
Cerous magnesium nitrate: A magnetic temperature scale 0.002–2 OK..	99
<b>Resistance Thermometry</b>	
Precision resistance thermometry and fixed points.....	121
Notes to supplement resistance thermometer reports.....	149
Constants of the interpolation formula for platinum resistance thermom- eters.....	159
A study of stability of high temperature platinum resistance thermom- eters.....	163
Interpolation of platinum resistance thermometers, 10° to 273.15 °K..	169
Calibration of germanium resistors at low temperatures (2—20° Kelvin)-	178
Reproducibility of germanium resistance thermometers at 4.2 °K.....	188
Germanium resistance thermometry in the range 2.1° to 5.0 °K.....	198
<b>Thermoelectric Thermometry</b>	
Thermoelectric thermometry.....	213
Methods of testing thermocouples and thermocouple materials.....	233
Temperatures of thermocouple reference junctions in an ice bath.....	256
Stability of base-metal thermocouples in air from 800° to 2,200 °F.....	263
Reference tables for the Pt-30 percent Rh versus Pt-6 percent Rh thermo- couple.....	290
Reference tables for 40 percent iridium-60 percent rhodium versus irid- ium thermocouples.....	307
A furnace for thermocouple calibrations to 2,200 °C.....	313
Low temperature thermocouples—I. Gold-cobalt or constantan versus copper or 'normal' silver.....	319
<b>Liquid-in-Glass Thermometry</b>	
Calibration of liquid-in-glass thermometers.....	333

### Optical Pyrometry

	Page
Theory and methods of optical pyrometry-----	361
The NBS photoelectric pyrometer and its use in realizing the International Practical Temperature Scale above 1063 °C-----	391
Radiance temperature at 6550 Å of the graphite arc-----	404

### Spectroscopic Thermometry

Spectral absorption method for determining population "temperatures" in hot gases-----	407
Measurement of electron density and temperature in dense plasmas by application of line broadening theory-----	416
Arc source for high temperature gas studies-----	421
Arc measurement of some argon transition probabilities-----	424
The use of an analog computer in side-on arc spectroscopy-----	439

### Selected Bibliography January 1953 to December 1965

Bibliography of temperature measurement January 1953 to June 1960-----	447
Bibliography of temperature measurement July 1960 to December 1965-----	462
Subject index-----	511
Author index-----	513
SI physical units (inside back cover)
