

CONTENTS

1. Residence time distributions	1
2. Thermal anemometry	33
3. Electrical sensing techniques	73
4. Light phenomena and optics	105
5. Light scattering and optical methods	135
6. Electromagnetic wave technique	195
7. Ultrasonic testing techniques	221
8. Signal processing and analysis	249
9. Laboratory automation	293
Index	355
