

CONTENTS

**Part I General concepts**

|  |    |
|--|----|
| Chapter 1. Types of applications of measurement instrumentation                            | 2  |
| Chapter 2. Generalized configurations and functional descriptions of measuring instruments | 9  |
| Chapter 3. Generalized performance characteristics of instruments                          | 38 |

**Part II. Measuring devices**

|   |     |
|---|-----|
| Chapter 4. Motion measurement                           | 212 |
| Chapter 5. Force , torque , and shaft power measurement | 331 |
| Chapter 6. Pressure and sound measurement               | 366 |
| Chapter 7. Flow measurement                             | 435 |
| Chapter 8. Temperature and heat – flux measurement      | 502 |
| Chapter 9. Miscellaneous measurements                   | 587 |

**Part III. Manipulation , transmission ,and recording of data**

|   |     |
|---|-----|
| Chapter 10. Manipulating , computing , and compensating devices | 604 |
| Chapter 11. Data transmission                                   | 679 |
| Chapter 12. Voltage – indicating and – recording devices        | 692 |
| Chapter 13. Large – scale data systems                          | 719 |

|              |     |
