

# Contents

The Contents is a cumulative listing of Parts I, II, and III of *Flow, Its Measurement and Control in Science and Industry*. Part I consists of pages 13 - 456; Part II, pages 457 - 1048; and Part III, pages 1049 - 1493.

## PLENARY ADDRESS

- The Influence of the Flow on Flowmeter Selection, *E.A. Spencer* 3

## SECTION I: FLOW CHARACTERISTICS

### LAMINAR FLOW CHARACTERISTICS

- Laminar Flow and Pressure Drop in Capillary Tube, *M. Kawata, K. Kurase, K. Yoshida, and H. Utsumi* 17
- Physical and Chemical Models of Fluid Flow through Porous Media, *R.A. Deju* 27
- Prediction of Gas Flow through Porous Plugs, *D.L. Martin* 33

### LAMINAR FLOW CHARACTERISTICS AND OPEN CHANNEL FLOW

- Similarity Rule for Design of Linear Fluid Resistors and Its Application for Flow Measuring Problems, *P.M. Lee, S. Lin, C.K. Kwok, and M.P. Du Plessis* 43
- Non-Darcian Flow in Clay Soils, *H.A. Elnagger, G.M. Karadi, and R.J. Krizek* 53
- Monte Carlo Methods Applied to Unsaturated Moisture Movement in Soil, *S. Shih* 63
- Results of Deep Ocean Current Measurements at Ocean Station "P" (50°N, 145°W), *C.A. Collins* 73
- A Computer Model of Flood Flows in the James River, *D.N. Contractor and J.M. Wiggert* 79

### OPEN CHANNEL FLOW

- An Optical Current Meter for Measurement of Surface Velocities in Debris-Laden Flows, *T.S. Chandler* 93
- A Nonlinear Channel Routing Model, *C. V. Ardis* 99
- Measuring Discharge of Flow through Sluice Channels with Horizontal Bottoms, *T.S. Won* 107
- The Feeler-Follower Measuring Device, LGR 6, *G.C. D'Eeckenbrugge and E. Persoons* 115
- Tailoring Critical-Depth Measuring Flumes, *J.A. Replogle* 123
- Shunt Meters for Measuring Flow in Large Open and Closed Conduits, *A. Peranio* 133
- Continuous Measurement of Discharge through Control Structures, *H. Wires* 141

## MULTIPHASE FLOW

- Determination of Local Values of Gas and Liquid Mass Flux in Highly Loaded Two-Phase Flow, *R.J. Burick, C.H. Scheuerman, and A.Y. Falk* 153
- Gravity Effect in Pipe Flow of Suspensions, *S.L. Soo and S.K. Tung* 161
- Effect of Slope on Friction of Air-Water Mixtures in Pipe Flow, *L.J. Mathers* 167
- Measurement of Solid-Liquid Flow: A Modified Venturimeter, *W.H. Graf, O. Yuçel, and M. Robinson* 175

## NON STEADY FLOWS

- Experimental Study of Pulsating Viscous Incompressible Flow in Rigid Pipes, *F.R. Goldschmied* 185
- The Measurement of Pulsating Flow Using Orifice Plate Meters, *R.C. Mottram* 197
- Flowmeter for Pulsating Flow, *W.H. Hoppmann and J.C. Liu* 209
- Response of Biased Manometers Subjected to Sinusoidal Pressure Variations, *H.J. Koloseus and D. Ahmad* 215

## CRITICAL FLOW CHARACTERISTICS

- Supercritical Flow through Convergent Conical Nozzles, *E.F. Brown and W.L. Chow* 231
- A Study of the Nozzle Flow in a Large Arc-Heated Hypersonic Wind Tunnel, *J.T. Van Kuren* 241
- Mass Flow Rate Measurement by Means of a Sonic Throat, *B. Masure, J.L. Solignac, and P. Laval* 247
- Experimental Correlation of Air, Nitrogen, Helium, and Argon Flowrates through Critical Flow Nozzles, *P.W. Godt* 263
- Real-Gas Effects in Flow Metering, *R.C. Johnson* 269
- Calibration of Gas Meters with Sonic Nozzles, *M.P. Castillon* 279
- The Critical Flow Venturi: A Useful Device for Flow Measurement and Control, *H.S. Hillbrath* 289

## FLUID DYNAMICS OF FLOWS

- Decay of Swirling Turbulent Flow of Incompressible Fluids in Long Pipes, *D.W. Baker and C.L. Sayre* 301
- Mean Velocity Measurements in Swirling Flow in a Pipe, *J.F. Lea and D.C. Price* 313
- Transition from Free-Molecule to Continuum Flow in an Annulus, *W.J. Maegley and A.S. Berman* 319
- The Flow Field of a Free Jet, *R.P. Benedict* 327

## ENVIRONMENTAL FLOW MEASUREMENT

- Sonic Anemometer-Thermometer for Atmospheric Turbulence Measurements, *Y. Mitsuta* 341

An Improved <b>Three-Component</b> Sonic Anemometer for Investigation of Atmospheric Turbulence, <i>J.C. Kaimal, J.T. Newman, A. Bisberg, and K. Cole</i>	349
Gas Flow Measurement by Plume Analysis with a Barringer Correlation Spectrometer, <i>A.F. Jepsen and L. Langan</i>	361
Aircraft Measurements of the Atmospheric Meso-Scales Using an Inertial Reference System, <i>D.K. Lilly and D.H. Lenshow</i>	369

#### CRYOGENIC FLOW MEASUREMENT

Cryogenic Flow Measurement – Positive Displacement Volumetric Flowmeters, <i>D.B. Mann, J.W. Dean, J.A. Brennan, and C.H. Kneebone</i>	381
Cryogenic Mass Flowmeter, <i>D.L. Close, R.M. Hayford, A.L. Carroll, and M. Rubin</i>	387

### SECTION II: JOINT TECHNICAL SESSIONS WITH THE ASME FLUIDS ENGINEERING CONFERENCE

#### VELOCITY AND PRESSURE MEASUREMENTS

Velocity Measurement in Vortex Flows, <i>N.A. Chigier</i>	399
Pressure, Velocity, and Turbulence Measurements in Flames, <i>N.A. Chigier</i>	409
Experimental Determination of the Separation Point of Flow around a Circular Cylinder, <i>D.W. Ballengee and C.F. Chen</i>	419

#### MEASUREMENTS IN FLUID MECHANICS

Measurement Techniques for Near Wake Flows, <i>F. Etzold</i>	431
A New Type Turbulence Gauge for Use in Liquids, <i>T.E. Siddon</i>	435
Highly Sensitive Material in Flow Birefringence and its Application to Flow Analysis, <i>N. Nakatani, T. Yamada, and Y. Soezima</i>	441
Optical Features of a Turbulent Free Shear <b>Lazer</b> , <i>R.H. Page and R.J. Dixon</i>	451

### SECTION III: FLOW MEASURING DEVICES

#### HEAD METERS I: BASICS

The Centerbody Flowmeter, <i>R.B. Keller</i>	461
Flow Measurement Utilizing Multiple, Parallel Capillaries, <i>E.E. Tompkins</i>	465
Characteristics of a Cylinder Nozzle, <i>K. Komiya and K. Nagashio</i>	473
Flow Rate Measurements in Unsaturated Soils, <i>C. Dirksen</i>	479
A Linear Fluid Jet Velocity Sensor, <i>J. W. Tanney</i>	487

#### HEAD METERS II: DEVELOPMENTS

Annular Averaging Applied to Flow Measurement, <i>K.O. Plache</i>	497
A New Development in Low Loss Flow Metering, <i>D.C.G. Lewis and J. Singer</i>	501

The Design of Small Multiple-Orifice Meters for One Percent Air Flow Measurements, L.R. <i>Voss</i>	507
The Conic Entrance Orifice Plate, an Investigation of its Performance Characteristics. <i>H.W. Stoll and D. Zientara</i>	517
HEAD METERS III: MAXIMIZING PERFORMANCE	
The Art of Orifice Flow Metering, R.L. <i>Spiller</i>	525
The Effect of Installation Conditions on the Discharge Coefficient of the Conical Entrance Orifice Plate at Low Reynolds Numbers, <i>J.C. McVeigh</i>	533
Precise Computerized In-Line Compressible Flow Metering, G.L. <i>Mustard</i>	539
THERMAL METHODS I: FUNDAMENTALS	
Survey of Thermal Devices for Measuring Flow, <i>J.M. Benson</i>	549
The Performance of Hot-Wire and Hot-Film Anemometers Used in Water, <i>T.B. Morrow and S.J. Kline</i>	555
The Dynamic Behavior of Hot-Film Anemometers in Liquid Metals, <i>G. Lim and C.A. Sleicher</i>	563
Velocity Measurements in Fluids with a Constant Temperature Anemometer, <i>S. Zakanycz, H.E. Wright, and W.C. Elrod</i>	571
THERMAL METHODS II: APPLICATION AND OPERATION	
Hot Film Anemometry in a Liquid Mercury Magnets-Fluid-Mechanic Pipe Flow, R.A. <i>Gardner</i>	581
Calibration of a Hot Film Anemometer in Water over the Velocity Range 0.5 to 200 cm/s, <i>C.H. Goodman and H.H. Sogin</i>	589
The Effect of a Liquid Droplet on a Hot Wire Anemometer Probe, <i>G.M. Bragg and J. Tevaarwerk</i>	599
Measurement of Flow Magnitude and Direction by Hot Wire Anemometer, G.L. <i>Minner and R.W. Fox</i>	605
The Measurement of Time-Dependent Fluid Temperature and Flow Speed Fields: Techniques, Apparatus and Results, <i>W.W. Fowllis, R.L. Pfeffer, G. Buzyna, J.C. Buckley, and J. Ruppert</i>	613
Some Operational Characteristics of Hot Film Water Velocity Sensors, <i>K.M. Foreman</i>	623
THERMAL METHODS III: APPLICATIONS	
Anemometers for Mars, R.M. <i>Henry and G.C. Greene</i>	633
Engine Cylinder Gas Flow Measurements by Hot-Wire Anemometers, <i>A.H.A. El-Khafaji, H.J. Tindal, and T.J. Williams</i>	639
A Thermal Flowmeter for Estimating the Rate of Xylem Sap Ascent in Trees, R.H. <i>Swanson</i>	647
Applied Anemometry in Research and Industry, <i>R.L. Humphrey</i>	653
VOLUMETRIC METHODS	
A Versatile Volumetric System for Measuring Gas Flows, D.E. <i>Fain and W.H. Harber</i>	661

- Improved Flowmeter Accuracy with Electro-Mechanical Feedback, *L. Katz* **669**
- Performance Characteristics of a Time Volume Flow Calibrator, *L.R. McIrvin, C. Gibbs, and F.L. Jones* **679**

#### TURBINE TYPE FLOWMETERS

- Turbine Flowmeters, Past, Present, and Future, *W.O. Strohmeier* **687**
- An Advanced Turbine Flowmeter System with Density Compensation, *D.E. Stuart* **695**
- Cup Anemometer Dynamics, *J.C. Wyngaard, J.T. Bauman, and R.A. Lynch* **701**
- Small Turbine Type Flowmeters for Liquid Hydrogen, *I. Warshawsky, H.F. Hobart, and H.L. Minkin* **709**

#### MAGNETIC FLOWMETERS

- Electromagnetic Flowmeter, *V. Cushing* **723**
- Sensitivity of the Electromagnetic Flowmeter to Fluid Velocity Profile, *A.C. Haacke* **735**
- A Review of Some Applications of Electromagnetic Flow Measurement, *R.C. Baker* **745**
- Electromagnetic Flowmeter Calibration Facilities, *B. Ketelsen* **755**

#### TAGGING METHODS I: TIME OF FLIGHT

- A New Instrument for Air Flow Measurements, *J.L. Kurz and J.G. Olin* **765**
- Quasicorrelation Circuit for Thermal Pulse, Time-of-Flight Flowmeter, *R.D. Hill and R.D. McGunigle* **773**

#### TAGGING METHODS II: DRAIN AND DILUTION

- Flow Measurement by Fluorescing Dye Dilution Techniques, *W.H. Lynch and A.E. Brown* **781**
- A Portable Direct-Reading Open-Channel Flow Measurement Device, *D.S. Woffinden and C.G. Clyde* **787**

#### TAGGING METHODS

- Fluid Velocity Measurement by Particle Tracking, *E.F.C. Somerscales* **795**
- Tracer Metering of Compressible Fluids, *A.E. Uhl* **809**
- Velocity Measurement of Particles in Sprays, *N.A. Chigier* **823**
- Further Contributions to Velocity Determination Using the Hydrogen Bubble Technique, *J. Hearney and W. Davis* **833**
- Flow Diagnostics with a Pulse Generator and Sampling Oscilloscope, *K.E. Lonngren, D.L. Landt, D.J. Tjørnehoj, and W.D. Wade* **843**

#### NUCLEAR MAGNETIC RESONANCE AND MASS FLOWMETERS

- The Nuclear Magnetic Resonance Flowmeter, Process Flow Measurement Experience, *W.K. Genthe* **849**

The Nuclear Magnetic Resonance Flowmeter, a New Simplified Design, <i>W.H. Vander Heyden and J.F. Toschik</i>	857
A Survey of Mass Flowmeters, <i>M.P. Wilson, Jr.</i>	865
Linear Momentum Mass Flowmeter Design and Performance, <i>J.J. Rusnak, E.R. Wuori, and M.R. Minell</i>	871
A Review of the Mass-Flux Probe, <i>L.N. Krause and G.E. Glawe</i>	885
<b>ACCOUSTIC METHODS</b>	
Ultrasonic Flowmeters, <i>J.L. McShane</i>	897
Nonintrusive Ultrasonic Measurement of Flow Velocity and Mass Flow Rate, <i>L.C. Lynnworth, N.E. Pedersen, E.P. Papadakis, and J.H. Bradshaw</i>	917
Flow Measurement with a New Ultrasonic Flowmeter, <i>W.H. Lynch and A.E. Brown</i>	925
Large Volume Flow Measurement by Sonic Techniques, <i>E. Marston Moffatt and K.I. Fetterhoff</i>	933
A New Ultrasonic Flowmeter for Flows in Large Conduits and Open Channels, <i>W.K. Genthe and M. Yamamoto</i>	947
A General Purpose Acoustic Flow Measurement System, <i>F.C. Lowell, Jr.</i>	957
<b>HYDRODYNAMIC OSCILLATORS</b>	
The System Approach to High Performance Gas Flow Measurement with the Swirlmeter, <i>P.J. Herzl</i>	963
The Vortex Shedding Flowmeter, <i>D.F. White, A.E. Rodely, and C.L. McMurtrie</i>	967
The Vortex Flowmeter, <i>H. Yamasaki and M. Rubin</i>	975
Fluidic Wind Sensors, <i>V.F. Neradka</i>	985
Development of a Wall-Attachment Fluidic Oscillator Applied to Volume Flow Metering, <i>R.B. Beale and M.T. Lawler</i>	989
<b>ELECTROMAGNETIC RADIATION</b>	
A Microwave-Doppler Flowmeter, <i>R.R. Parker and F.N. Huffman</i>	999
A Laser Doppler Velocimeter Offering High Spatial and Temporal Resolution, <i>P.D. Iten and J. Mastner</i>	1007
Laser Fluid Velocity Sensor, <i>W.B. Jones</i>	1015
Laser Doppler Velocimeters-Performance in Open and Confined Flows, <i>L.K. Mathews and J.H. Rust</i>	1025
A Laser Doppler Velocimeter to Measure "Instantaneous" Velocity Profiles, <i>P.J. Bendick</i>	1033
The Measurement of Turbulence using a Laser Doppler Velocimeter, <i>W.K. George and J.L. Lumley</i>	1037

## SECTION IV: FLOW MEASUREMENT AND CONTROL

### FLOW CONTROL I: CONTROL VALVE SIZING METHODS

History of Control Valve Sizing, <i>O.P. Lovett</i>	1053
The Energy Equation Used in Control Valve Sizing, <i>M.L. English</i>	1055
Pressure Recovery in Control Valves, <i>H.W. Boger</i>	1065

### FLOW CONTROL II: EFFECT OF FLUID PROPERTIES AND GEOMETRY ON CONTROL VALVE SIZING

An Empirical Formula for Air Flow in a Control Valve, <i>O. Kneisel</i>	1073
A Reynolds Number for Control Valves, <i>E.B. McCutcheon</i>	1087
Does Piping Geometry Affect Valve Flow Capacity, <i>H.D. Baumann</i>	1091
Sizing Control Valves for Choked Conditions Due to Cavitation or Flashing, <i>G.F. Stiles</i>	1097

### FLOW CONTROL III: SYSTEM DESIGN AND APPLICATION

A Method of Reducing Turbulence Noise Effects in Flow by Differential Pressure, <i>A.R. Catheron</i>	1113
Flow and Pressure Regulation in the Cardiovascular System, <i>A. Iberall</i>	1121
Dynamic Analysis and Simulation of a Gas Regulator, <i>W.F.Z. Lee, J.A. Bonner, and R.G. Leonard</i>	1135

### FLOW CONTROL IV: CONTROL VALVE NOISE

Valve Noise and Piping System Design, <i>J.G. Seebold</i>	1151
Valve and Downstream Accessories as a Low Noise Package, <i>H.W. Boger</i>	1161
Prediction and Abatement of Control Valve Noise, <i>E.E. Allen</i>	1167
Considerations in the Specification of Pipeline Noise, <i>J.H. Cooper and A.L. Aldridge</i>	1175

### FLUID POWER CONTROL I: SYSTEMS DESIGN

Philosophy of Analysis in Fluid Control Systems, <i>L.B. Taplin</i>	1183
Mathematical Modeling in the Design of Fluid Power Systems, <i>K.N. Reid and James E. Bose</i>	1191
The Tools of Analysis and Design, <i>L.B. Taplin</i>	1197
Computer-Aided Design of Fluid Systems, <i>H.R. Sebesta</i>	1213

### FLUID POWER CONTROL II: VALVE CHARACTERISTICS

The Flow Coefficient of a Hydraulic Control Valve Under Dynamic Conditions, <i>S.A. Alpay</i>	1227
A Survey of the Studies of Dynamic Characteristics of Oil-Hydraulic Control Valves in Japan, T. <i>Takenaka</i>	1235
The Electroplastic Flow Modulator, <i>R.W. Phillips and D.M. Auslander</i>	1243

## FLOW BENCHMARKS I: PRINCIPLES

- The Reliability of Test Data from Flow Measurement Calibration  
Laboratories, *E.A. Spencer and L.C. Neale* 1255
- Practice and Procedures of Error Calculations, *B.T. Arnberg* 1267

## FLOW BENCHMARKS II: PRACTICE

- Gas Flow Measurement by Collection Time and Density in a Constant  
Volume, *L. Olsen and G.P. Baumgarten* 1287
- Dynamics of the Bell Prover, *F.W. Ruegg and D.P. Johnson* 1297
- Two Primary Methods of Proving Gas Flow Meters, *B.T. Arnberg and  
C.L. Britton* 1309
- High Pressure Gas Metering System Development in Great Britain,  
*J. Newcombe and J.W. Smith* 1315
- Gas Flow Measurement at Constant Density, *J. Bouchon, S. Janssen,  
R. Ducousset, and M. Sens* 1323

## SECTION V: BIOLOGICAL FLUID FLOWS

## BLOOD FLOW MEASUREMENT

- The Electromagnetic Flowmeter as Applied to the Measurement of Blood  
Flow in Living Systems, *G. Ross* 1337
- Blood Rheology: Instrumentation and Techniques, *H.J. Meiselman and  
C.R. Cokelet* 1347

## BLOOD FLOW MEASUREMENT AND BIORHEOLOGY

- Pulsed Doppler Ultrasonic Blood Flowmeter. Real-Time Instantaneous  
Velocity Profiles, *P.A. Peronneau, M.M. Pellet, M.C. Xhaard, and J.R. Hinglais* 1367
- Measurement of Velocity Profiles in Simulated Blood by the Laser-Doppler  
Technique, *D.K. Kreid and R.J. Goldstein* 1377
- The Characteristics of the Pulsed Ultrasonic Doppler Flowmeter, *D.W. Baker,  
J.E. Jorgensen, and D.N. Campau* 1389
- Measurement of Blood Flow by Nuclear Magnetic Resonance Techniques,  
*J.H. Battocletti, S.M. Evans, S.J. Larson, F.J. Antonich, R.L. Bowman,  
V. Kudravcev, A. Sances, Jr., J.H. Linehan, R.E. Halbach, and W.K. Genthe* 1401
- Fundamental Determinants of Blood Viscosity, *S. Chien, S. Usami, and  
K. Jan* 1411
- Measurement of Blood Viscosity in Couette Viscometer with Different  
Clearances, *S. Usami, A.M. Benis, and S. Chien* 1419
- Velocity Distribution Patterns in Ascending Xylem Sap During  
Transpiration, *R.H. Swanson* 1425

## BLOOD FLOW MEASUREMENTS AND BLOOD FLOW IN TISSUE

- In Vivo Methods for Measuring Regional Cerebral Blood Flow and Volume,  
*M.E. Phelps, J.O. Eichling, and M.M. Ter-Pogossian* 1433

## MICROCIRCULATORY FLOW OF BLOOD AND DRAG REDUCTION

Flow Measurement in Blood Vessels of the Microcirculation, <i>C.A. Wiederhielm and H. Wayland</i>	1441
Rheological Properties of RBC in the Microcirculation of Mammalian Skeletal Muscle, <i>M.H. Ehrenberg</i>	1451
Drag Reduction Phenomena in Pulsed Blood Flow, <i>H.L. Greene, R.F. Nokes, and L.C. Thomas</i>	1459

## AIR FLOW IN LUNGS AND BLOOD-GAS CONCENTRATION CONTROL

The Measurement of Gas Flow in the Human Bronchial Tree, <i>J.C. McVeigh</i>	1467
The Precise Control of Blood-Gas Concentrations and Blood Flow Rate as a Key to Oxygenator Evaluation, <i>C.E. Lanham, R.M. Grose, and F. Villarroel</i>	1471
Pulsatile Pressure and Flow Generation, <i>J.E. Jorgensen and J.P. Enz</i>	1479
Uro-Rheomanometry: Simultaneous Pressure and Flow Monitoring in the Ureter, <i>H. Melchior, K.K. Simhan, P. Rathert, and W. Lutzeyer</i>	1487

## APPENDIX

ISA-S39.1 Control Valve Sizing Equations for Incompressible Fluids	
ISA-S39.2 Control Valve Capacity Test Procedure for Incompressible Fluids	
ISA-S39.3 Control Valve Sizing Equations for Compressible Fluids	
ISA-S39.4 Control Valve Capacity Test Procedure for Compressible Fluids
