

CONTENTS

Chapter	
1. How instruments are used in industry	1
2. Instrument standards and calibration	28
3. Pressure and vacuum	59
4. Thermometers	109
5. Pyrometry	151
6. Liquid and dry level instrumentation	207
7. Flow instrumentation and measurement	240
8. Automatic measurement and control concepts and systems	290
9. Analytical industrial instrumentation	323
10. Radiation measurement and instrumentation	404
11. Nondestructive testing equipment	457
12. Environmental and pollution measurements	502
Index	555
