

CONTENTS

Introduction	1
Evolution of Steel Protection	5
Quantitative Evaluation of Blistering and Corrosion in Organic Coating Systems	13
Blast cleaning with Zinc-Coated Abrasives	21
Detrimental Materials at the Steel/Paint Interface	28
Effects of Rotary Peeling Surface-Conditioning Products on Structural Steel	44
Zinc-Plus-Paint System for Corrosion Protection of a Steel Bridge	53
Spray-Applied Fluoroelastomers for Protection of Carbon Steel Structures in Flue Gas Desulfurization Service	63
Perspectives on 100 % solid Spray-Applied Polyurethane Elastomers	71
Precision Reactivation of Antifouling Paints	79
Minimum Film Thickness for Protection of Hot-Rolled steel	95
Paint Research Institute Paint Corrosion Inhibitor Research	113
ASTM Safety System	118
Summary	127
Index	133
