

CONTENTS

<b>Part 1 The function of building materials</b>	<b>7</b>
1. An historical introduction	1
2. Strength and deformation	9
3. Dimensional stability and joints	21
4. Exclusion of water and water vapor	29
5. Transmission reflection and absorption of visible light and radiant heat	38
6. Thermal insulation and thermal inertia	41
7. Effect of fire on building materials	46
8. Durability	54
9. Acoustic properties of building materials	60
Part 2 The properties of building materials	67
10. Iron and steel	67
11. Nonferrous metals	83
12. Natural stone	98
13. Lime , gypsum , and cement	112
14. Concrete	120
15. Clay products	140
16. Wood	147
17. Glass	160
18. Plastics and carpets	171
19. Paints adhesives and sealants	182
20. Criteria for the choice of building materials	193
Glossary	199
Index	207
