

**CONTENTS**

1. Introduction	1
2. Theoretical principles	11
3. Vapour compression heat pumps	22
4. System design considerations	64
5. Domestic heat pump applications	87
6. Applications in commerce and in public buildings	109
7. Industrial applications	130
8. Methods of economic analysis	140
Bibliography	149
Index	153
