

CONTENTS

1. Executive summary	1
2. The project passys	7
3. Development of a multi – tracer gas for measuring air flows in buildings	22
4. Thermal comfort in passive solar buildings	33
5. Field – based research on thermal comfort in passive solar buildings	47
6. Survey of the existing building stock to assess the passive solar potential	51
7. CAM.UR : A computer aided management system for urban passive renewal	55
8. Passive solar in computer aided urban design pascaud	68
9. Digital control of passive solar systems	73
10. European concerted action programme on delighting	82
11. European concerted action program on daylighting	96
12. Revision and edition of the European passive solar handbook	98
13. Project monitor	103
14. Technology transfer from the solar R&D community to the European building professions : solinfo	113
15. Architecture and solar energy : archisol	127
16. The European solar storage testing group	139
17. Opsys concerted action for solar system model development and validation	149
18. European solar microclimates	158
List of participants	171
