

CONTENTS

1. Introduction : why solar energy	1
2. Fundamentals of heat transfer	15
3. Methods of solar – energy collection and use	57
4. Solar heating of buildings	111
5. Solar cooling of buildings	145
Appendix	
1. Method of testing for rating solar collectors based on thermal performance	187
2. Example determination of spectral radiation properties	243
3. Reference tables and charts	247
4. Nomenclature	293
5. Conversion factors	299
6. Energy conservation and passive utilization of solar energy	301
7. Solar rights in Colorado	317
8. Typical solar – conditioned building	323
Bibliography	337
Index	339
