

CONTENTS

1. Introduction : why solar energy	1
2. Solar radiation calculations	19
3. Solar collectors	43
4. Thermal energy storage	61
5. Solar energy economics	81
6. Solar water heating : design and operation	113
7. Passive solar space – heating systems	151
8. Mechanical solar space – heating systems	181
9. Solar cooling	235
10. Special topics	271
11. State approaches to solar legislation : a survey	307
Appendixes	345
Index	473
