

**CONTENTS**

**Chapter**

1. Introduction	1
2. Nature of particulates involved	19
3. Theory of fibrous filtration	67
4. Filter materials	100
5. Filter construction	13
6. Filter specification and testing	157
7. Ancillaries to high – efficiency filtration	177
8. Principles of design of filtration installations	210
9. Engineering of installations	247
10 Economics and future developments	291
Index	305
