

CONTENTS

| | |
|--|-----|
| Contributors | v |
| Foreword | vii |
| The Science committee of the royal photographic Society | x |
| The Gelatin Gel Deuterium-Hydrogen Exchange in Gelatin Films | 3 |
| Velocity and Equilibrium Aspects of the Sedimentation of Agar Gels | 13 |
| Kinetics and Equilibria of Swelling of Gelatin Layers in water | 29 |
| Reticulation in Gelatin layers | 49 |
| The Gelation and Rupture properties of Gelatin Gels | 63 |
| Determination of Gelatin Molecular Weights and Shape by Scattered Light Measurements | 83 |
| A critique of Gel Filtration chromatography as a Method of Characterizing the Structure of Photographic Gelatin | 85 |
| Extended Molecule Characterization of Photographic Gelatin by Analytical and Preparative Gel Chromatography, Acrylamide Gel Electrophoresis and Light Scattering | 87 |
| Column Chromatographic Separation of Gelatin Hydrolysates and their Interactions on silver halide crystals | 89 |
| On the Interactions Between Gelatin and glycerol | 91 |
| Contributions of Chemical Crosslinks and Ordered Structure to the Physical Properties of Swollen Gelatin Films | 99 |
| Effect of Chemical Crosslinks on the thermal stability of Conformation in swollen Gelatin Films | 113 |
| Cross-linking of Gelatin by 2,4-dichloro-6-hydroxy-s-triazine | 121 |
| Hardening Gelatin by Direct Oxidation | 127 |
| Viscometric Study of Interaction of Substantive Colour Couples with Gelatin | 135 |
| Colorimetric Method for Quantitative Determination of Thiosulphate sulphur in Gelatin | 159 |
| Tetrathionate in Gelatin | 167 |
| Reactions of Gold with Gelatins | 175 |
| The Glod (I)-Ion binding of Photographic Gelatin | 183 |
| The Production and Photographic Properties of Gelatin Derived from Soluble Collagen | 193 |
| The Influence of Gelatin on the Growth of Silver Halide Macrocrystals | 197 |
| The Influence of Different Gelatins on Crystal Habit and Grain Size of Silver Halide | 207 |
| An Investigation of the role of the Functional Groups of Gelatin on Silver Halide Crystal Growth | 219 |
| A Technique for studying the Growth of Silver Halide Crystals the Effect of gelatin | 231 |
| Physical Ripening of Photographic Emulsions with Hardend Gelatin | 239 |
| Restraining Properties and their Determination in Photographic gelatins | 251 |
| Determination of the Physical Ripening Restraining Properties of Gelatins and Artificial | 269 |

| | |
|--|-----|
| Increase of the Density of the Silver Image During Storage after Processing | 289 |
| On the pH Dependence of the Emulsion Turbidity Test of Photographic Gelatins | 293 |
| The Influence of the Protective colloid on the Course of Surface Reactions at Silver Bromide crystal Faces | 301 |
| Effect of Molecular Size on the Photographic Action of Gelatin | 311 |
