

## CONTENTS

1. TENERAL INFORMATION: LABORATORY REQUIREMENTS, TECHNIQUES, METHODS, INSTRUMENTS	11
1.1 Laboratory Requirements	11
1.2 Types of Analytical Techniques in Use	12
1.3 Sampling	39
II. RAW MATERIALS-GELATIN 1	43
2.1 Introduction	43
2.2 Sampling	43
2.3 Moisture Content	44
2.4 Ash Content	46
2.5 Calcium Content	46
2.6 Sulphur Dioxide	49
2.7 chloride	52
2.8 Nitrite	53
2.9 Trace Metals	54
2.10 Grease	57
2.11 Determination of the Iso-ionic Point	58
III. RAW MATERIALS-GELATIN 2: PHOTOGRAPHICALLY ACTIVE IMPURITIES	61
3.1 Introduction	61
3.2 Determination of Active Sulphur	61
3.3 Determination of Carbohydrates and Derivatives	69
3.4 Impurity or Muco-Proteins	74
3.5 Cystine	74
3.6 Nitrite	76
3.7 Hydrogen Peroxide	76
3.8 Restrainers	76
3.9 Physical Methods of Examining Gelatins	82
3.10 Detection of deliberate Addition of Restrainers to Gelstin	86
IV SILVER NITRATE AND HALIDES	89
4.1 Introduction	89
4.2 Silver Nitrate	89
4.3 Ammonium Chloride	94
4.4 ammonium Bromide	100
4.5 Ammonium Iodide	104
4.6 Potassium Chloride	107
4.7 Potassium Bromide	112
4.8 Potassium Iodide	116

V. AUXILIARIES AND ADDITIVES	123
5.1 Dyes	123
5.2 Stabilisers	125
5.3 Hardeners	126
5.4 Surface-active Agents	132
5.5 Metal Additives	142
5.6 Solvents	143
5.7 Humectants and Anti-static Additives	147
VI. FILM BASE AND PAPER	151
6.1 Introduction	151
6.2 Film Base	151
6.3 Paper	163
VII. ANALYSIS OF COATED PRODUCTS	177
7.1 Introduction	177
7.2 Determination of Silver Halide Quantity	177
7.3 Determination of Halide Ratios	184
7.4 Gelatin Coating weight	187
7.5 Metal Additives	188
7.6 Hardeners	189
7.7 Surface-active agents	191
7.8 Stabilisers	191
7.9 Thiosulphate, Developing Agents, etc.	192
7.10 Other Colloids	193
7.11 Non-silver Processes	201
VIII. ANALYSIS OF PROCESSING SOLUTIONS	205
8.1 Introduction	205
8.2 Identification of Developing Agents	205
8.3 Determination of Developing Agents	209
8.4 Determination of Inorganic Constituents, etc.	217
8.5 Analysis of Fix Baths	225
8.6 Stop Baths	227
8.7 Bleach Baths	228
IX. ANALYSIS OF WATER AND EFFLUENTS	231
9.1 Water Analysis	231
9.2 Analysis of effluents	234
X. TESTS ON PROCESSED MATERIALS	241
10.1 Introduction	241
10.2 Residual Silver compounds	241
10.3 Residual Thiosulphate, etc.	242
10.4 Exposure to Ultra-violet Light	244
