

CONTENTS

<i>Contributors to Volume 51</i>	<i>xiii</i>
<i>Volumes in the Series</i>	<i>xix</i>
<i>Preface</i>	<i>xxiii</i>
<i>Series Editor's Preface</i>	<i>xxv</i>
1. Challenges in Chemical Food Contaminants and Residue Analysis	1
Michel W.F. Nielen and Hans J.P. Marvin	
1. Introduction	2
2. Emerging Contaminants	7
3. Masked Contaminants	14
4. Unknown Bioactive Contaminants	15
5. Emerging Technologies	18
6. Validation and QA/QC Challenges	22
7. Conclusions and Future Trends	24
Acknowledgements	25
References	25
2. International Regulations on Food Contaminants and Residues	29
Ioannis S. Arvanitoyannis	
1. Introduction to EU and USA Legislation	29
2. Topics/Categories Covered under EU Legislation	31
3. Topics/Categories Covered under USA Legislation	63
References	73
3. Guidelines on Quality Implementation for Analytical Methods	77
Sergio Caroli	
1. Introduction	77
2. The Role of Quality	78
3. Conclusions	86
References	87

4. Immunochemical and Receptor Technologies: The Role of Immunoassay, Immunoaffinity Chromatography, Immunosensors and Molecularly Imprinted Polymeric Sensors	91
Marinel · la Farré, Elena Martínez and Damià Barceló	
1. Introduction	92
2. Definitions and Concepts	93
3. Immunoassay Formats	95
4. Immunoassay Development	96
5. Immunochemical Technologies	101
6. Biomimics: Molecularly Imprinted Polymers (MIPs)	113
7. Commercial Instrumentation and Future Perspectives	122
References	125
5. Advanced Sample Preparation Techniques for the Analysis of Food Contaminants and Residues	131
Pat Sandra, Frank David and Gerd Vanhoenacker	
1. Introduction	131
2. Sample Preparation Methods for VOCs	133
3. Sample Preparation Methods for SVOCs and NVOCs	138
4. Fractionation and Clean-Up	162
5. Evaporation	170
6. Derivatization	170
7. Conclusion	171
References	172
6. Recent Developments in Chromatographic Techniques	175
Katerina Mastovska	
1. Introduction	175
2. Fast Chromatographic Separation	176
3. Two-Dimensional Chromatographic Separation	188
4. Overcoming Adverse Matrix Effects	191
5. Future Trends	196
References	197
7. New Approaches in Mass Spectrometry	201
Yolanda Picó	
1. Introduction	201
2. High Resolution and Accurate Mass Analysers	204
3. Tandem Mass Spectrometry	211
4. High Resolution Mass Spectrometers in Tandem	219
5. Conclusions and Future Trends	227
References	228

8. Capillary-Based Separation Techniques	231
Peter Viberg	
1. Introduction	231
2. Miniaturization and the Capillary Format	232
3. Capillary Liquid Chromatography	233
4. Capillary Electro-separations	235
5. Detection Techniques in Capillary-Based Separations	250
6. Automation and On-Line/In-Capillary Coupled Solid-Phase Extraction in Capillary Electrophoresis	251
7. Applications in Determination of Food Contaminants Using Capillary Electrophoresis	252
References	253
9. Pesticide Residues	257
Anna Sannino	
1. Introduction	257
2. Physical and Chemical Properties	258
3. Health Effects	259
4. Analytical Methods	272
5. Instrumental Determination	278
6. LC-MS-MS Applications	295
7. Conclusions and Future Trends	301
References	302
10. Veterinary Drug Residues	307
Sherri B. Turnipseed and Wendy C. Andersen	
1. Introduction	307
2. Physical and Chemical Properties Affecting Analytical Methodology	313
3. Human Health Effects from Veterinary Drug Residues	315
4. Analytical Methods	317
5. Occurrence in Food	328
6. Future Trends	329
References	332
11. Analytical Strategies to Control the Illegal Use of Banned Growth Promoters in Meat Producing Animals	339
Bruno Le Bizec, Jean-Philippe Antignac and Gaud Pinel	
1. Introduction	339
2. Chemical Properties, Health effects	340
3. Analytical Methods	342
4. Occurrence in Foods	357
5. Future Trends	358
References	358

12. Mycotoxins	363
Carlo Brera, Barbara De Santis, Francesca Debegnach and Marina Miraglia	
1. Introduction	364
2. Classes of Mycotoxins	366
3. Health Effects	376
4. Sampling	383
5. Analytical Methods	385
6. Occurrence in Food and Feed	402
7. Decontamination Procedures	416
8. Future Needs	418
Acknowledgement	419
References	419
13. Phycotoxins	429
Kevin J. James, Daniel O'Driscoll, Javier García Fernández and Ambrose Furey	
1. Introduction	429
2. Seafood-Poisoning Toxins	430
3. Paralytic Shellfish Poisoning (PSP) Toxins	430
4. Diarrhetic Shellfish Poisoning (DSP) Toxins	432
5. Azaspiracid Poisoning (AZP) Toxins	439
6. Amnesic Shellfish Poisoning (ASP) Toxins	442
7. Yessotoxins (YTXs)	445
8. Neurotoxin Shellfish Poisoning (NSP) Toxins	448
References	452
14. Persistent Organochlorine Pollutants, Dioxins and Polychlorinated Biphenyls	457
Marie-Louise Scippo, Gauthier Eppe, Claude Saegerman, Georges Scholl, Edwin De Pauw, Guy Maghuin-Rogister and Jean-François Focant	
1. Introduction	457
2. Physical and Chemical Properties and Use of POPs	460
3. Health Effects	462
4. Analytical Methods	467
5. Occurrence in Food	495
6. Future Trends	496
References	498
15. Brominated Flame Retardants as Food Contaminants	507
Adrian Covaci, Stefan Voorspoels, Kyle D'Silva, Janice Huwe and Stuart Harrad	
1. Introduction	507
2. Analytical Methods	512
3. Occurrence in Food	542
4. Regulatory/Safety Aspects and On-Going Monitoring Programmes	560

5. Future Trends in the BFR Research in Food	562
Acknowledgement	563
References	563
16. Metals	571
Clinio Locatelli	
1. Introduction	571
2. Analytical Procedure for Metal Determination	573
3. Metals of Interest	585
4. Directive for Trace Metals in Food	589
5. Conclusions and Future Trends	589
References	590
17. Polycyclic Aromatic Hydrocarbons	599
Katsumi Tamakawa	
1. Introduction	599
2. Physical and Chemical Properties	601
3. Health Effects	602
4. Analytical Methods	611
5. Occurrences of PAHs in Food	632
6. Future Trend	642
Acknowledgements	644
References	644
18. Methods for the Determination of N-Nitroso Compounds in Food and Biological Fluids	653
Sidney S. Mirvish	
1. Introduction	654
2. Physical and Chemical Properties of NOC	656
3. Health Effects	657
4. Analytical Methods	659
5. Occurrence of NOC in Foods	676
6. Conclusions and Future Trends	679
Acknowledgements	680
References	680
19. Heterocyclic Amines	685
Mark G. Knize and James S. Felton	
1. Introduction	685
2. Physical and Chemical Properties	686
3. Health Effects	687
4. Formation of Heterocyclic Amines	688
5. Food Sample Analysis	689
6. Occurrence in Food	697
7. Exposure Assessment	700

8. Regulations and Future Trends	701
Acknowledgements	701
References	701
20. Acrylamide, Chloropropanols and Chloropropanol Esters, Furan	705
Richard H. Stadler and Till Goldmann	
1. Acrylamide	705
2. Chloropropanols and Chloroesters	714
3. Furan	722
4. Conclusion and Future Trends	728
References	728
21. Food Contact Materials	733
Catherine Simoneau	
1. Introduction	733
2. Physical and Chemical Properties	736
3. Analytical Methods	741
4. Health Effects	765
5. Occurrence in Foods	768
6. Future Trends	768
References	771
22. Non-Target Multi-Component Analytical Surveillance of Food Contact Materials	775
Leon Coulier, Sander Koster, Bas Muilwijk, Leo van Stee, Ruud Peters, Esther Zondervan-van den Beuken, Rinus Rijk, Monique Rennen, Winfried Leeman, Geert Houben and William D. van Dongen	
1. Introduction	776
2. Legislation on Food Contact Materials	776
3. Non-Target Analysis	778
4. Examples of Non-Target Analysis from the Recent Literature	782
5. Safety Assessment of Migrants from FCM	785
6. Conclusions and Future Trends	791
References	792
List of Abbreviations	795
Subject Index	807
