

Vol. 1213, issue 1, 5 December 2008

CONTENTS

abstracted/indexed in: Analytical Abstracts, Biochemical Abstracts, Biological Abstracts, Chemical Abstracts, Chemical Titles, Chromatography Abstracts, Elsevier EMBASE/Current Awareness in Biological Sciences, Current Contents/Life Sciences, Current Contents/Physical, Chemical & Earth Sciences, Deep-Sea Research/Part B: Oceanographic Literature Review, EMBASE/Excerpta Medica, Index Medicus, Mass Spectrometry Bulletin, PASCAL-CNRS, Referativnyi Zhurnal, Research Alert and Science Citation Index. Covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®.

TECHNIQUES FOR THE SEPARATION OF IONIC AND IONOGENIC SPECIES – IN RECOGNITION OF PAUL R. HADDAD

Editorial	1
High intensity light emitting diode array as an alternative exposure source for the fabrication of electrophoretic microfluidic devices	3
Effective preconcentration of chemical warfare agent degradation products using a zirconia preconcentration column	8
Interaction of lead ions by electromembrane isolation	14
Simultaneous sampling and analysis for vapor mercury in ambient air using needle trap coupled with gas chromatography–mass spectrometry	19
Standard systems for measurement of pKs and ionic mobilities. 1. Univalent weak acids	25
Separation of transition metals on a poly-iminodiacetic acid grafted polymeric resin column with post-column reaction detection utilising a paired emitter–detector diode system	31
New developments in the preparation of anion exchange media based on hyperbranched condensation polymers	37
Use of complexing reagents as additives to the eluent for optimization of separation selectivity in high-performance chelation ion chromatography	45
Chromatographic peak resolution using Microsoft Excel Solver. The merit of time shifting input arrays	50
Environic species analysis by ion chromatography–biamode electrochemical hydride generator–atomic fluorescence spectrometry	56
Simultaneous separation of inorganic anions and metal–citrate complexes on a zwitterionic stationary phase with on-column complexation	62
Chromatographic determination of seven common anions in electronic-grade, water-miscible solvents	70
Analysis of indandione anticoagulant rodenticides in animal liver by eluent generator reagent free ion chromatography coupled with electrospray mass spectrometry	77
Improved analysis of melamine–formaldehyde resins by capillary zone electrophoresis–mass spectrometry using ion-trap and quadrupole-time-of-flight mass spectrometers	83
Investigations on the migration behaviour of purines and pyrimidines in capillary electromigration techniques with UV detection and mass spectrometric detection	88
Investigation of folic acid stability in fortified instant noodles by use of capillary electrophoresis and reversed-phase high performance liquid chromatography	93
Determination of γ -hydroxybutyric acid in clinical samples using capillary electrophoresis with contactless conductivity detection	100
