SPECIALreport: Plant Safety and Environment

[Noise pollution in refineries](#)

This often overlooked problem is manageable
B. K. Bhaskararao

[Consider piping models for safety evaluations](#)

New simulation tools allow engineers to fully investigate processing conditions in piping systems
R. Hardee

[Designing for pressure releases during fires—Part 1](#)

How to determine if equipment should be considered wetted or unwetted when calculating fire relief load
S. Rahimi Mofrad and S. Norouzi

[Thermal oxidizers aid in pollution control](#)

Choosing the correct media bed can help lower emissions and operating costs
P. Sims

[Updates on process safety systems](#)

Safety programs involve both protection systems and organization culture

M. P. Sukumaran Nair

How companies are complying with the Baker Report

Consider these successful approaches that progressive businesses are implementing to ensure peak process safety performance

R. Whitt and T. Ayril

BONUSreport: water management

Consider membrane technologies to treat oily wastewater

Advanced methods enable recycling process water for plant applications

J. G. Peeters and S. L. Theodoulou

Troubleshoot reverse osmosis units online

Identifying the root causes for poor performance saves operating costs and improves water quality

J. Kucera

Prevent hydrocarbon leaks in cooling water

Microbes cause problems in plant condensers and coolers

S. Ghoshal

Improve waterside operation for waste-heat boiler

Better water chemistry practices can increase reliability of sulfur recovery units

L. A. Huchler

maintenance/reliability

Plan to improve plant reliability

Here's how to attain world-class operation that will result in large economic benefits

T. Ayril and C. DeFalco

engineering case histories

Case 41: Cracking of a rotary dryer

An analysis can help provide a plan forward

T. Sofronas

hp impact

[EIA projects higher product costs for US winter season](#)
['Food vs fuel' debate impacts biofuels outlook regionally](#)
[Talent squeeze forecast to delay upstream project work to 2010](#)
[Air pollution control industry benefits from global initiatives](#)
[BP exec discusses success in the 'new energy era'](#)

editorials

[HPI](#)In Reliability

Lubricating slow-speed rolling element bearings

[HPI](#)In Europe

Refining industry on a high roll

[HPI](#)In LNG

Financing LNG tankers

[HPI](#)Integration Strategies

Field device life cycle information improves plant design, operation and maintenance

[HPI](#)In Control

Restoring single-loop integrity to process control

[HPI](#)In Associations

HP interviews Rich Timoney, president and CEO of the Fieldbus Foundation_

[HPI](#)In Water Management

Strategies to manage reliability of utility water systems—Part 4: Troubleshooting

news/products
