Index

Amplitude, 159 Analytic function, 200 Applications to electric circuit problems, 188, 261 to geometric problems, 67 to mechanics problems, 73, 155, 257 to rate problems, 84 Approximate methods, first-order equations graphical, 338 numerical, 355, 356, 361, 365, 369 power series, 345 successive approximations, 351 Auxiliary equation, 111

Beats, 182 (Exercise 9)
Bernoulli differential equation, 50
Bessel functions

of first kind, order one, 238
of first kind, order p, 238
of first kind, order p, 238
of second kind, order p, 240
of second kind, order zero, 232

Bessel's differential equation

of order p, 231, 234
of order zero, 231

Boundary value problem, 14

Cauchy-Euler differential equation, 141 Characteristic equation, 276, 301, 327 Characteristic roots, 276 Characteristic values, 299, 301, 327 Characteristic vectors, 299, 301, 303 Clairaut's equation, 64 (Exercise 20) Complementary function, 105 Continuing methods, 355, 369 Convolution, 388, 399 Convolution theorem, 388 Critical damping, 167

Damped oscillatory motion, 166 Damping, 165 Damping constant, 157 Damping factor, 166 Damping force, 157 Differential equation analytic significance of, 8 definition of, 1 geometric significance of, 9 Differential operator, 247 Direction field, 339

Equidimensional differential equation, 141 Euler method, 356 Exact differential, 24 Exact differential equation, 24 Existence of solutions, 17, 93, 147 Existence theorems for first-order initial-value problems, 18 for Laplace transforms, 377 for linearly independent solutions, linear systems, 271, 318, 328 for linearly independent solutions, nthorder linear equation, 97, 148, 201, 217 for linear systems, initial-value problems, 268, 310 for nth-order linear equations, initialvalue problems, 93

÷

Exponents of differential equation, 214
Forced motion, 176
Free damped motion, 165
Free undamped motion, 158
Frequency, natural, 160
Frobenius, method of, 214
Gamma function, 236
Graphical methods, 338
Homogeneous differential equation first order, 39
linear, higher order, 92, 95, 110
linear, second order, theory, 146
linear systems, 266, 268, 306, 311
Homogeneous function of degree n, 40
Hooke's law, 156

Exponential order, functions of, 376

Improper integrals, 377 Indicial equation, 214 Initial-value problem for first-order differential equations, 15 for nth-order linear differential equations, 93 for systems of linear differential equations, 268, 310 Integral curve, 9, 338 Integrating factor definition of, 33 for first-order linear differential equations, 47 methods of finding, 57 special types of, 59 Inverse transform, 386 Irregular singular point, 211 Isocline, 342

Kirchhoff's laws, 189, 262

Laplace transform convolution, 388, 399 definition of, 373 of derivatives, 380, 381

existence of, 377 inverse transform, 386 linear property, 379 properties of, 379 translation property, 382 solution of linear differential equations by, 393 solution of systems of linear differential equations by, 405 table of, 392 Legendre's differential equation, 211 (Exercise 18) Linear algebraic systems, theorems on, 147, 295 Linear combination, 95, 147, 269, 290, 312 Linear dependence of constant vectors, 295 of functions, 96 of solutions, 149, 269, 313 of vector functions, 296, 313 Linear differential equations, first-order, 46 Linear differential equations, higher-order applications of, 155 constant coefficients, 110, 393 definition of, 3, 92 existence theorems for, 93, 146 general solution of, 97, 105 homogeneous, 92, 95, 110 Laplace transform solution of, 393 nonhomogeneous, 104, 121, 132 reduction of order, 99 relation to linear system, 246 theory of, 92, 146 Linear independence of constant vectors, 295 of functions, 96 of solutions, 97, 148, 270, 317, 328 of vector functions, 297 Line element, 339 Logarithmic decrement, 166

Matrix

characteristic equation of, 301, 327 characteristic values of, 299, 301, 327 characteristic vectors of, 299, 301, 303 coefficient matrix, 325 definitions, basic, 287–290 fundamental matrix, 318 product of, by vector, 291 symmetric matrix, 302 Method of Euler, 356 of Euler, modified, 361 of Frobenius, 214 of isoclines, 342 of Milne, 369 of Runge-Kutta, 365 of successive approximations, 351 of power series, 345 of Taylor series, 346 of undetermined coefficients, 121, 348 of variation of parameters, 132 Milne, method of, 369 Modified Euler method, 361

Newton's second law, 73, 158 Nonhomogeneous differential equation, higher-order linear, 104, 121, 132 Nonlinear differential equation, 3, 164 (Exercise 8) Numerical methods, 355, 356, 361, 365, 369

Oblique trajectories, 70 Operator method for linear systems, 236 Order, of a differential equation, 2 Ordinary point, 200 Orthogonal trajectory, 66 Overcritical damping, 169

Particular integral definition of, 105 methods of finding, 121, 132
Periodic motion, 159
Period of motion, 160, 166
Phase constant, 160
Picard method of successive approximations, 351
Piecewise continuous function, 375
Power series solutions, 199, 345

Recurrence formula, 205, 216 Reduction of order, 99 Regular singular point, 211 Resonance, 183 Restoring force, 157 Riccati equation, 56 (Exercise 38) Runge-Kutta method, 365 Separable differential equation, 36 Series solutions of first-order differential equations, 345 about ordinary point, 199, 201 about regular singular point, 211, 213, 217 of second-order linear differential equations, 199 Simple harmonic motion, 159 Singular point, 200 Solution definition. 5 explicit, 5 of first-order initial-value problem, 15 formal, 7 fundamental set of, 97, 317 general, nth-order linear differential equation, 97, 105 general, system of linear differential equations, 251, 271, 273, 320, 323 geometric significance of, 9 implicit, 5 one-parameter family of, 8 of system of linear differential equations, 251, 266, 308 Spring constant, 156 Starting methods, 355 Steady state term, 178 System of linear differential equations applications of, 257, 261 coefficient matrix of, 325 constant coefficients, 249, 275, 325, 327, 332 existence theorems for, 268, 271, 310, 318, 328 fundamental matrix of, 318 fundamental set of solutions of, 317 general solution of, 251, 271, 273, 320, 323 homogeneous, normal form, 266, 268, 306, 311 Laplace transform solution of, 405 nonhomogeneous, normal form, 266, 272, 306, 321 normal form, 245, 266, 306 operator methods for, 249, 253 relation to single higher-order linear equation, 246 scalar form of, 308 solution of, 251, 266, 308

theory, normal form, 266, 306 types of, 243 vector form, 307

Taylor series method, 346 Total differential, 24 Transient term, 178 Trivial solution, 94 Two-point boundary-value problem, 14

- UC function, 122
- UC set, 122 Undetermined coefficients, method of for first-order differential equations, 348

.

for nth-order linear differential equations, 121 Uniqueness of solutions, 17, 93, 147

Variables separable, equations with, 36 Variation of parameters, 132 Vector constant vector, 293 definitions, basic, 287–288 derivative of vector function, 293 product of matrix by, 291 vector function, 293 Vibrations of mass on spring, 155

Wronskian, 98, 149, 313
