

INDEX

- Beam
 - bending, 68
 - curved theory, 73
 - deflection, 58
 - shear, 69
 - torsion, 72
- Bearing stress, 173
- Buckling
 - column, 96
 - plate, 108
- Castiglano's theory, 120
- Circular holes stress, 22
- Composite analysis, 156
- Combined load buckling, 103
- Contact stress, 28
 - zone, 28
- Crack grow, 116
- Diagrams
 - shear, 52
 - moment, 53
- Distortion energy criterion, 45
- Eccentric loading of fasteners, 177
- Effective modulus, 171
- Energy methods, 118
- Elastic modulus, 1
- Elastic Stability, 96
- Factor of Safety, 47
- Failure criteria, 43
- Fastener
 - connection, 173
 - properties, 180
- Fatigue, 112
- Fiber, 156
- Finite Element Method, 132
- Goodman, 113
- Impact loading, 125
- Joint failure modes, 173
- Lamina, 156
- Laminate
 - analysis, 163
 - properties, 7
- Margin of safety, 47
- Material properties, 6
- Matrix epoxy, 156
- Mohr's circle, 11
- Normal stress criterion, 46
- Orthotropic lamina, 156
- Plates
 - circular, 83
 - rectangular, 92
- Ply stress, 157
- Pressure vessels
 - cylindrical, 35
 - spherical, 34
- Potential energy impact, 125
- Radial stress, 83
- Shear modulus, 2
- Shearing stress criterion, 44
- S-N curve, 112
- Stiffness matrix, 135
- Strain, 16
 - energy 118
 - mid-plane, 162
 - plane, 16
 - principal, 17
- Stress,
 - element, 8
 - concentration, 4
 - hoop, 34
 - inclined angle, 9
 - plane, 16
 - principal, 10
 - polar coordinates, 20
- Tangential stress, 85
- Thick-walled cylinder, 40
- Truss elements, 132
- Torsion, 72
- Uniformly loaded plates, 83
- Welded Connections, 178
