Index

2^2 factorial design, 208
2^3 factorial design, 6, 215
2^4 factorial design, 7
2^k factorial, 5, 20, 227
2^{k-1} fractional factorial design, 290
2^{k-2} fractional factorial design, 302
2^{k-p} fractional factorial design, 309
3^2 factorial, 167
3^k factorial, 360

A
Addition of axial runs to a 2^k factorial, 260
Additivity of the randomized complete block model, 132
Adequate precision, 97
Adjusted R^2 statistic, 97, 403
Alias matrix, 319
Aliases, 291, 318, 327
Alternate fraction, 292, 304
Alternative hypothesis, 35
Analysis of covariance, 15, 590, 599, 600, 602
Analysis of variance (ANOVA), 63, 66, 124
Analysis of variance method for estimating variance components, 507, 512
ANOVA computations, 67, 71
ANOVA for a blocked design, 124
ANOVA for a factorial, 170, 171, 186
Antagonistic blending, 469
A-optimal design, 452
Approximate *F*-tests, 525
Axial check blends, 471

B
Balanced incomplete block design (BIBD), 148
Balanced nested design, 543
Bartlett's test for equality of variance, 79
Basic design, 293, 303
Best-guess experiments, 4
Blocking, 12, 13, 121, 123, 138, 145, 148, 198, 200, 273, 281, 301, 313, 446, 590
Blocking and noise reduction, 52
Blocking in fractional factorials, 313
Blocking in response surface designs, 446
Blocks orthogonal to treatments, 134
Box plot, 25, 62
Box-Behnken design, 442
Box-Cox method, 578

C
Canonical analysis, 428, 432
Canonical form of the second-order model, 428
Cause-and-effect diagrams, 16
Center points in the 2^k factorial design, 257
Center points in the central composite design, 442
Center points in the face-centered cube, 443
Central composite design, 260, 361, 428, 440, 442, 443
Central limit theorem, 31
Characterizing a process, 9
Chi-square distribution, 31
Cochran's theorem, 69
Coded design variables, 212, 261
Coefficient of variation, 97
Combined array design, 490, 493
Comparative experiments, 23
Complete confounding, 285
Completely randomized design (CRD), 34, 61, 167, 208
Components of interaction, 362
Components of interaction in the 3^k factorial, 362, 364, 368
Computer experiments, 459
Computer generated designs, 450, 472, also see optimal designs
Conditional inference chart, 238
Confidence coefficient, 44, 73
Confidence interval, 34, 44, 88, 406, 531, 533, 537, 586
Confidence intervals on variance components, 531, 533, 537
Confirmation experiments, 19, 300, 302
Confounding, 275
Confounding in the 2^k factorial, 275, 282, 284
Confounding in the 3^k factorial, 368
Constraints on mixture components, 471
Contour plot, 215
Contrasts, 87, 90, 218
Control treatment, 96

Controllable factors, 15
Coordinate exchange algorithm, 453
Covariate, 590
Critical region for a test, 35
Crossed array design, 488, 490, 499
Crossed factors, 162, also see factorial experiments
Crossover designs, 146
Cuboidal region of interest, 443

D
Data snooping, 90
Defining contrast, 277, 369
Defining relation for a fractional factorial, 291, 303, 374
Degrees of freedom, 30
Design generator, 291, 303
Design projection, 233, 294, 312
Design resolution, 293, 309
Desirability function, 437
Desirable features of a design, 439
Dispersion effects, 107, 245, 307
D-optimal design, 254, 380, 452, 456, 472, 490, 500, 501
Dot diagram, 24
Dunnett's test, 96

E
Effects model, 64
Eigenvalues, 428, 434
Empirical models, 2, 18, 84
Equiradial designs, 444
Estimating missing data, 589
Estimation, 29
Evolutional operation (EVOP), 476
Expected mean squares, 511, 522
Expected value operator, 27
Experiment, 1
Experimental error, 25
Experimentation in engineering design, 8, 10
Experimenter, 3
Extra sum of squares method, 404

F
Face-centered cube, 443
Factorial experiment, 4, 162, 166, 185, 190, 198
Factorial split-plot designs, 562
F-distribution, 33
First-order model, 215, 418, 419, 424
Fisher LSD test, 94
Fitting response curves and surfaces in a factorial, 190
Fixed factor, 64
Fold over of a resolution IV design, 339
Fold over of resolution III designs, 322, 325
Follow-up testing, 19, 300, also see confirmation testing
Fraction of design space plots, 445
Fractional factorial design, 7, 289, 360
Fractional factorial split-plot designs, 563, 567
Fundamental ANOVA identity, 66

G
Gaussian process model, 461, 464
General factorial experiment, 185
Generalized interaction, 283, 372
Generalized linear models, 580
Geometric notation for the 2^k factorial, 216
G-optimal design, 254, 452
Graeco-Latin squares, 145
Graphical comparison of means, 86
Guidelines for designing experiments, 14

H
Half-normal probability plot of effects in the 2^k factorial, 236
Hat matrix, 409
Hierarchy principle, 192
Histogram, 25
Hybrid designs, 445
Hypothesis testing, 24, 34, 35

I
Immediacy and sequentiality in industrial experiments, 20
Incomplete block designs, 148
Independence assumption, 77
Inferences about variances, 53, 54
Influence diagnostics, 411
Influential observations, 410, 411
Inner array design, 488
Interaction plot, 163
Interaction, 4, 162, 209
Interblock analysis of a BIBD, 154
Interclass correlation coefficient, 510
Intrablock analysis of a BIBD, 154
I-optimal design, 255, 453, 458, 501

K
Kruskal-Wallis test, 112

L
Lack of fit tests, 412
Latin hypercube design, 461
Latin square design, 138, 200, 375
Least squares normal equations, 391
Lenth's method, 237
Likelihood function, 535
Linear blending, 469
Linear predictor, 581
Linear regression models, 389
Link function, 581
Location effects, 107, 245, 307

Log link, 581
Logistic regression, 582
Logit link, 581

M
Main effects, 5, 162, 209
Maximum entropy designs, 461
Maximum likelihood estimation of variance components, 535
Mean, 27
Mean squares, 67
Means model, 64
Measurement systems capability, 512, 517
Mechanistic models, 2
Metamodels, 459
Method of least squares, 109, 390
Method of moments, 508, 512
Method of steepest ascent, 215, 419
Method of unweighted means, 589
Minimal resolution IV designs, 335
Minimum aberration designs, 310
Minimum run resolution V designs, 346
Minimum variance estimator, 29
Missing values in a randomized block design, 134
Mixed level fractional factorials, 378, 382
Mixed model ANOVA, 515
Mixture component axes, 470
Mixture experiments, 466, 471
Mixture models, 468, 469
Model adequacy checking, 75, 128, 131, 177, 213
Modified large-sample method, 533
Modified Levene test for equality of variance, 80
Multiple comparisons after ANOVA, 85, 128, 173
Multiple response optimization, 435

N
Nested and factorial factors, 553
Nested factor, 542
No-interaction assumption in a factorial, 181
Nonconstant variance, 78
Nongeometric designs, 326
Nonlinear programming, 437
Nonparametric methods in ANOVA, 112
Nonregular designs, 328, 338
Normal distribution, 30
Normal probability plot, 39
Normal probability plot of effects in a 2^k factorial, 230
Normal probability plot of residuals, 75
Nuisance factors, 15, 121
Null hypothesis, 35

O
One-factor-at-a-time (OFAT) experiments, 4
One-half fraction, 7, 290
One-quarter fraction, 302
One-sample t-test, 47
One-sample Z-test, 46
Operating characteristic (OC) curves, 41, 101, 180, 520
Optimal designs, 252, 380, 450, 452, 456, 453, 472, 500
Optimizing a process, 9, 14, 417, 419, 425, 435
Orthogonal blocking, 446
Orthogonal contrasts, 90
Orthogonal design, 210, 212, 398, 440
Orthogonal first-order designs, 440
Orthogonal Latin squares, 145, 362
Outer array design, 488
Outliers in unreplicated designs, 241
Overparameterized model, 110

P
Paired comparison design, 48, 51
Paired t-test, 50
Partial aliasing, 327
Partial confounding, 279, 285
Partial fold over, 343
Path of steepest ascent, 419, 420, 422, 424
Phase in EVOP, 471
Placket-Burman designs, 326
Point exchange algorithm, 453
Pooling mean squares, 525
Power family of transformations, 578
Power of a test, 35
Prediction interval on a future observation, 302, 407
Pre-experimental planning, 17
Preplanned comparisons, 90
PRESS statistic, 97, 409, 411
Principal block, 277, 369
Principal fraction, 292
Probability distributions, 26
Process robustness studies, 486
Product formulation, 11
Projectivity of a design, 328
Proportional data, 587
Pseudocomponents, 471
P-value, 38

Q
Quadratic effects, 257
Qualitative factors, 84, 207, 261
Quantitative factors, 84, 164, 207, 257

R
R^2 statistic, 97
Random effects, 505
Random factor, 64
Random samples, 28, 64
Randomization, 12
Randomized block design, 51
Randomized complete block design (RCBD), 121

Rank transformation, 114
Regression models, 84, 190, 193, 212, 221, 388, 580
Regressor variables, 388
Regular designs, 328
Repeated measures, 607
Replication, 5, 12
Replication of Latin squares, 143
Replication versus repeat measurements, 13
Residual plots, 77, 83
Residuals, 75, 213, 392
Resolution III design, 293, 320, 322, 326
Resolution IV design, 293, 335, 339
Resolution V design, 293, 345
Response model, 493
Response surface methods, 417
Response surface plot, 164, 193, 214, 221
Response variables, 2
Restricted (residual) maximum likelihood (REML), 536
Restricted mixed model, 516
Restriction on randomization, 123, 125, 139
Rising ridge, 434
Robust parameter design, 20, 486, 493
Robust process, 1, 486
Robust product, 8, 487
Rotatability, 441
R-student, 411
Rules for expected mean squares, 522

S
Saddle point, 426
Sample, 26, 28
Sampling distributions, 28, 30
Saturated designs, 320
Scaled prediction variance, 445
Scatter diagram, 62
Scheffé's test for comparing all contrasts, 91
Scientific (engineering) method, 2
Screening experiment, 9, 14, 207
Second-order model, 257, 418, 425
Sequential experimentation, 14, 21, 300, 339, 361, 419, 440, 461
Setting data aside, 589
Significance level, 35
Simplex centroid designs, 468
Simplex lattice designs, 467
Single degree of freedom test for interaction, 185
Single replicate of a design, 182
Single replicate of a factorial design, 229
Small composite designs, 444
Space filling designs, 461
Sparsity of effects principle, 230
Sphere-packing design, 461, 464
Spherical central composite design, 442
Split-plot design, 557, 562
Split-split-plot designs, 567
Staggered nested designs, 550
Standard Latin square, 142
Standard normal distribution, 31
Standard order, 211, 227
Standardized residuals, 77
Stationary point on a response surface 425
Stationary ridge, 434
Statistic, 28
Strategy of experimentation, 3
Strip-split-plot designs, 570
Studentized residuals, 409
Subplot, 558
Subplot error, 558
Supersaturated designs, 347
Synergistic blending, 469

T
t-distribution, 33
Technology commercialization, 1
Test for quadratic curvature, 257
Test statistic, 35
Testing significance of regression, 401
Tests on contrasts, 87, 88
Three-factor factorial example, 185
Transformations, 78, 82, 114, 243, 578
Transmission of error, 493
Treatments, 23, 63
Tukey's test, 93
Two-sample *t*-test, 36, 45
Two-sample *Z*-test, 46
Two-stage nested design, 542, 543
Type I error, 35
Type II error, 35

U
Unbalanced data in ANOVA, 74
Unbalanced data, 587
Unbiased estimator, 29
Uncontrollable (noise) factors, 15
Uniform designs, 461
Unreplicated 2^k factorial designs, 229
Unrestricted mixed model, 518, 519

V
Variance, 27
Variance components, 506, 507, 511, 549
Variance dispersion graphs, 445
Variance of a contrast, 226
Variance of an effect, 226
Variance operator, 27
Variance stabilization by transformation, 78
V-optimal design, 452

W
Whole plot, 558
Whole-plot error, 558
