

## Index

- Acceptance criteria for precision, 143  
 Acceptance of the validation parameters, 127  
 Accuracy and recovery, 144  
 Active pharmaceutical ingredients (API), 166, 168  
 American Association of Pharmaceutical/American Society for Testing and Analysis of QC samples, 102  
 Analyte concentration vs. precision, 144  
 Analytical methods, 4, 125  
   steps for validating procedures, 135  
 AOAC. *See* Association of Official Analytical Chemists (AOAC)  
 Application software, 120  
 Applications of (certified) standards, 180  
 Approaches and tools for risk assessment and management, 41  
 Aspects of PQ, 99  
 Association of Official Analytical Chemists (AOAC), 2  
 Audits, 215  
   audit check list, 223  
   audit questions in analytical laboratories, 224–227  
   audit report, 223  
   horizontal, 221  
   planning and implementation of internal audits, 216  
   problems found during laboratory audits, 217–219  
   steps in preparing and conducting an audit, 222  
 Calibration, 28, 97  
 CAPA program, elements of, 176  
 Certified reference materials (CRMs), 180–184  
 Certified reference standards, 179  
   application of, 180  
   importance of, 4  
   requirements for, 184  
 CFR. *See* Code of Federal Regulations (CFR)  
 cGMP. *See* Current good manufacturing practices (cGMP)  
 Characteristics of reference standards, for chemical measurement, 184  
 Chromatographic parameters, 141  
 Chromatography, 141, 149  
 CITAC/ EURACHEM, 20, 136  
 Classroom training, 204  
 Code of Federal Regulations (CFR), 21, 16, 190, 203  
 Computer systems, 75, 109  
   examples for computer system identification, 75  
   qualification process of chromatographic computer systems, 116  
 Computer-based trainings and on-line tutorials, 205  
 Computerized analytical systems, 76  
 Co-operation on International Traceability in Analytical Chemistry (CITAC), 12, 20  
 Corporate master plan, 56  
 Critical system parameters, identification of, 173
