 Equipotential line 103
 Escape canal 157
 design procedure 159
 transport capacity 161
 Evapotranspiration 28
 Exit gradient 102, 104, 114
 Extraction ratio 148, 151

 Farmer's organization 6
 Filter material 123
 design criteria 123
 grain size distribution 123
 Financial analysis 217
 Fixed end moment 202, 203
 Flood
 design flood 30
 high flood 29
 low flood 29
 peak flood 31
 risk of occurrence 29
 Flow
 between piers 83
 flowlines 103
 flownets 103
 on sloping apron 69
 steady state flow 103
 subcritical flow 69
 subsurface flow 99
 supercritical flow 59, 69

 Foot bridge 7
 Force components 176
 horizontal forces on weirs 178
 vertical forces on weirs 178
 Foundation
 contact pressure 21, 182
 impervious foundation 99
 permeable foundation 99
 settlement 21, 22
 Frequency analysis 31
 plotting position 31
 theoretical distribution 33
 Friction loss 60, 70
 Froude number 62, 66

 Gate
 control gates 51
 flow through sluice gates 82, 83
 sluice gates 81
 Geotechnical investigation 8
 Gravitational flow 9
 Groundwater 22
 Gumbel distribution 34

 Hasen William's formula 146
 Head loss 60
 Hydraulic analysis 26
 Hydraulic gradient 104
 Hydraulic radius 75
 Hydraulic structures 40
 Hydrological data 9, 25
 Hydrometry 60

 Impact force of approached flow 176
 Implementation method 8
 Intakes
 box culverts 202, 206
 bridge type intakes 200
 structural design of intakes 200
