Subject Index

A
actuators 152
aeration 34, 104, 120, 122, 129, 320, 480
aerial mycelia 383
aflatoxin 315
agitation 34
agro-industrial residues 412
aleurioconidia 344
amylases 14, 192, 382
apical 93
apple essence 370
aroma compounds 356, 416, 427
aseptic operation 20
astaxanthin 340
artificial color 337
azaphilone pigments 342

B
bacterial spores 238
banana odor 363
beta carotene 340
binary interactions 92
biodegradation 5
biofuels 5
biogas 428
bioherbicides 5
biological
  delignification 266
  detoxification 5, 429
  factors 22
  sustainability 139
biomass determination 56
  DNA 57
  direct 56
  ergosterol 57
  glucosamine content 57
  indirect 56
  metabolic gas balance 58
  protein 57
biopulping 5
bioremediation 5
biosurfactants 5
biotransformation 417
blastospores 242
blue cheese 380
breakfast cereals 381
budding phenomena 85
button mushrooms 256
butyric fermentation 452

C
carotenoids 340
catabolite repression 5, 125
cellulases 187, 263, 395
champignons 256
cheese making 3
chemical
  energy 117
  water potential 77
chemotropism 92

citric acid 207, 392, 416, 427
citrinin 350
cleistotechia 344
clostridial spores 452
coconut flavor 363
cold junction 146
communication network 158
composting 13, 428, 469
conductive cooling 239
convective heat 105
curcuma 338

D

delignification 266
differential pressure 148
diffusion coefficient 77
dynamic parameters 77, 81

E

earthworms 470
  anecic species 472
  endogeic species 471
  epigeic species 471
  feeding behaviour 472
electronic spin resonance 103
energy balance 38
ensiling 13, 443
  losses 448
  process 446
enthalpy 39
entomopathogenic fungi 232
exopectinase 100
extremo-thermophiles 29

F

feed 379, 427
fermenter 6
  cement mixer 10
  column 10, 126
  deep trough 10
  design 6
  horizontal paddle 126
  packed bed 129, 239, 289
  protein production 10
  rocking drum 127
  rotating drum 10, 123
  Zymotis 130
fersol 173
fiberization 139
fieldbus 159
firewire 159
flavored foods 370
flavors
  banana 363, 364
  buttery flavors 364
  coconut 363
  floral 364
  fruity 365
  lemon 364
  strawberry 364
flow sensor 148
food 379, 413
forage
  crops 443
  preservation 444
fragrance 356, 417
fruit body 254
fruit pulps 435
fumaric acid 216
functional food 380
fungal aroma 101
  production 101
fungal spores 237
fuzzy logic 171

G

galactosidases 191
gamma decalactone 358
genetic algorithms 172
germination 96
gibberellic acid
  production 277
  properties 278
gibberellins 277
  biosynthesis pathway 279
  fermentation 280
glucoamylase 22
gluconic acid 222, 394
glutaminase 192
growth phase 50
  accelerated 51
  desacelerated 51
  exponential 51, 52
  logarithmic 51, 52
  negative 52

stationary 51

H
heat transfer 38
coefficient 39
hemicellulases 187, 395
hexoenzymes 138
hot junction 146
humidity sensor 150
humification 119
hydration 97
hydric stress 90
hydrophobic polymers 369
hydrostatic pressure 85
hyphal orientation 93

I
idiophase 302
immersion bioreactor 132
indigo 338
industrial
enzymes 183
processing 415, 423
sensors 145
inert substrate 3, 19, 309, 422
inter-particle space 13
integrated sensor 147
inulinase 194

K
kinetics 48
measurements 56
velocity 50
koji 3, 6, 129, 183, 371, 380

L
lactation energy 453
lactic acid 218, 391, 416, 444
lactones 359
lag phase 51
ligninases 188
ligninolysis 266
lipase 100, 190, 386

M
magnetic sensor 150
mass transfer
effects 21
mechanism 31
mathematical models 5, 294
empirical equations 5
mechanistic equations 5
mesophiles 30
metabolic heat 38
microbial growth
associated growth 68
non-associated 69
partially associated 68
microbial physiology 324
microbial respiration 120
miso 3
modeling 41
monascus pigments 337
mushroom 253, 416, 427, 432
biological efficiency 258, 381
bioremediation 267
detoxification 267
mycorrhizal 255
parasitic 255
saprophytic 256
mycopesticides 5
mycotoxins 4

N
negative growth rate 52
neural networks 171
nutrient diffusion 120

O
odoriferous compounds 356
oilcakes 430
orange aroma 370
organic acids 205, 417
optical density 56
orifice plate 149
osmoregulation 99
osmotic pressure 85, 90, 101, 366
oxygen
balance 62
uptake rate 63
oyster 256

P
pH sensor 151
particle size 35
milling 36

pectinases 191, 263, 384
peeling effect 138
penicillin 4
permselective membrane 370
pervaporation 370
phenolic antioxidants 381
photosynthesis 117
phycocianin 340
physical energy 21
physico-chemical factors 22
phytase 193, 395
pigments 334, 390
pilot plant 127
pineapple aroma 365
plafractor 135
polyketide 344
polygalacturonase 100
polymeric 27
prebiotic 380
primodia 258
probiotic 380
profibus 162
programming languages 168
proteolysis 447
protease 14, 189
protein enrichment 32
psychometric 42
psychrophiles 30
pulsed mixing 131

R

radial growth 90
  rate 93
ragi 380
redox enzymes 138
relative humidity 32
resistance thermometer detector 147
respiration 21
respirometry 5
respiratory quotient 67
riboflavin 340
rotational diffusivity 103

S

secondary
  fermentation 452
  metabolites 302
seebeck effect 146
sensors 145
serial communication 158
shiitake 256
silage 445
  additives 459
  harvest 455
  homolactic fermentation 450
  microbiology 449
  nutritional quality 465
  preservation 450
  quality 464
  sensory evaluation 464
  wilting 456
single-cell protein 4
sterility 20
solvent extraction 369
soy sauce 3
specific growth rate 40, 43, 48, 49, 70
  maximum 42
  maintenance coefficient 70
spores production 230
sporulation 96, 233
static beds 129
steric interactions 92, 95
steroids
  transformations 4
stirred beds 131
strain improvement 328
substrate bed 21
surface area 13, 17, 18, 120

T

tannases 387
tempeh 3, 380
temperature sensor 147
thermal dispersion 149
thermistor 147
thermocouple 146
thermodynamics 31, 75
  parameters 77
thermophiles 29
thermostable enzymes 385
transducer 148
transport phenomena 5, 22, 34
trophophase 304
turbine sensor 149
turgor pressure 85

V

vapour pressure 31
vermicomposting 468
  agricultural wastes 500
  animal wastes 490
  aquatic weed 495
  benefits 476
  earthworms 470
  industrial wastes 491
  municipal solid waste 493
  principle 470
  process 476
  sewage sludge 497
  types 483
vermiculture 469
vermistabilization 493
vinegar 4
viscosity 22
void fraction 35

X

xylanases 394

W

water
  activity 13, 17, 30, 32, 79, 90, 93, 151, 236, 318
  sensors 82
wilting 456
worldfip 163

Z

zigbee 163
zymotis 130

vapour pressure 31
vermicomposting 468
  agricultural wastes 500
  animal wastes 490
  aquatic weed 495
  benefits 476
  earthworms 470
  industrial wastes 491
