

Subject Index

Note: page numbers in *italic* refer to figures and tables.

- Acetobacter* sp. 128
- acetol 46, 50
- acetylation 90–1
- acrolein
 - by dehydration of glycerol 71–7
 - industrial application 82–3
 - conversion to propanol and propane 77–80, *81*
 - uses and properties 70, 72, 73
- acrylic acid 71, 80–1, 83
- acylglycerols 90–1
 - preparation 102–6
 - uses 90, 102, 110–11
- Akemin Inc. 129
- alkanes *see* hydrocarbons
- alkyd resins 6, 7
- Alliant Techsystems 111
- Amberlyst catalyst 91–2, *93*
- Ambersep process 23–5
- anticorrosive lubricant 142, 143–7
- anticracking agent 139–40
- antifreeze 53–4
- aqueous phase reforming 29
 - hydrocarbon fuel production 36–40
 - hydrogen production 33–6
 - industrial applications/developments 40–2
- Arkema 82, 83
- biodiesel
 - EU directives 98, 157
 - production processes 10, 98, 99
 - Esterfif and Yellow diesel 15–18
 - traditional transesterification 12–14
 - subsidies 150
 - sustainability and economics 149–50, *151*
 - world output and demand 150, 151, 154–6, 160, 163
- bioethanol 30–2
 - evaluated against biodiesel 149–50, *151*
- BioForming process 41
- biofuels 29–33, 98
 - cells *see* fuel cells
 - EU directives 98, 157
 - production and demand 151, 152–3, *154, 155*
 - requirements for sustainability 149–50
 - subsidies 150, 153
 - via* aqueous phase reforming 36–40
 - see also* biodiesel; bioethanol
- Biofuel–Solution 77
- bioglycerol
 - production 10–14
 - glucose fermentation 31
 - novel processes 15–18
 - properties of glycerol 1–6
 - purification 13–14, 23–5, 155
 - usages 6–10
 - biorefineries 160–3
 - construction industry 135–47
 - new applications 18–20, *162*
 - world output and demand 10, 16, 18–19, 154–8
 - prices 158–60, 163
- biological oxidation 128–31
- biological reduction 51, 52, 53

- biomass 29–31
biorefineries 29, 160–3
biotechnology *see* microbial/enzymatic reactions
Bohm, D. 5–6
butylation of glycerol 87–90, 91–3
- Candida antarctica* 105
Candida tropicalis 97
cement
 additives and manufacture 135–9
 anticracking and waterproofing 139–40
 quality enhancement and grinding 140–2, 143
chlorination of glycerol 59–62
 epichlorhydrin production 62–3
 industrial applications 65–8
chlorohydrins 59–65
concrete *see* cement
conformers 2–5
construction industry
 bioglycerol as anticorrosive lubricant 142, 143–7
 cement and concrete 135–42, 143
copper/copper chromite catalysts 46–8
corn grain 149, 151, 152
cosmetics 2, 6, 94
CPS Biofuels 97–8
- D1–BP Fuel Crops 152
Davy process 48, 55
dehydration of glycerol 70
 acrolein production 71–7, 82–3
 conversion to propane 77–80
 acrylic acid by oxydehydration 80–1, 83–4
 enzymatic to 3-hydroxypropion-aldehyde 82
 industrial applications 82–4
 mechanisms 71, 73, 76, 77
dehydroxylation of glucose 50–1, 52
diacylglycerols *see* acyl glycerols
dichloropropanol 59–62
diethylene glycol 8–10
diglycerols 94
- 1,3-dihydroxyacetone 116, 117
 oxidation of glycerol to 119, 120, 124
 electrochemical 126, 127
 microbial 128–31
2,3-dihydroxypropanal 125
dimethyl carbonate 107
Dow process 67–8
DT Chemicals 40
DuPont 50
dynamite 10, 11
- Econa oil 111
electricity production 41
electrochemical oxidation 126–8
epichlorohydrin
 glycerol-based production 11, 62–5, 157
 Dow process 67–8
 Solvay process 65–7
 nitration 109
 synthetic glycerol from 11, 65
 traditional production 60–2
 uses 59
epoxidation 22–3
epoxidodecane 21–2
epoxy resins 59, 67, 109
Escherichia coli 50, 150, 152
Esterfif process 15
esterification of glycerol 102
 glycerol carbonate 107–9
 industrial applications 110–12
 mono- and diacylglycerols 102
 base-catalysed reactions 102–3
 lipase-catalysed reactions 103–6
 functionalized silica catalyzed 90–1
 nitroglycerine 109–10
ethanol *see* bioethanol
etherification of glycerol 87
 glycosylation to glucosyl glycerol 97
 industrial applications 97–9
 polymerization to polyglycerol 95–7
 and telomerization 93–5
 tert-butylation 87–90, 91–3, 98–9
- fatty acid methyl esters 98–9, 139
Fischer–Tropsch synthesis 29, 31–2
 integrated process for hydrocarbon fuels 36–40

- Food Grade glycerol 7
 foodstuffs 2, 6, 7, 102, 111–12
 impacts on food supply 152
 fuel additives 87, 97–8, 99
 fuel cells 115–16, 117, 127–8
 and membrane-immobilized enzymes
 129–31
 fuels *see* biofuels; hydrocarbons
- glassy state 4
Gluconobacter sp. 128–9
 glucose 50
 biological reduction 52, 53
 fermentation to glycerol 31
 glucosyl glycerol 97
 glyceraldehyde 116, 117, 124, 125–6, 127
 glyceric acid 115, 116, 118
 glycerol oxidation to
 electrochemical 127
 gold catalyzed 123–4
 microbial fermentation 128
 Pt/Pd catalyzed 119–20
 TEMPO/enzymatic 124
 importance as feedstock 129, 130
 glycerol *see* bioglycerol
 glycerol carbonate 105–9, 111–12
 glycerol dioleate 104–5
 glycerol *tert*-butyl ethers 98–9
 preparation 87–9, 91–3
 glycerolysis 102–6
 glycerose 125
 glycidol 96, 108–9
 glycidyl nitrate 109–10, 111
 glycosylation 97
 Graz 16, 18
 green fuels *see* biofuels
 grinding agent 140–2, 143
 guanidine catalyst 103
- humectant properties 1, 7
 hydrocarbons
 fuels 29, 30, 36–40
 propane from acrolein 77–80, 81
 hydrogen
 demand for 29–30
 plasma process 32, 33
 via aqueous phase reforming 29, 33–6, 41
 hydrogen bonding 3–4
 hydrogenolysis of glycerol 45–51, 52
 copper chromite catalyst 45–8
 heterogeneous copper catalyst 48–9
 silica catalyst 48–9
 4-hydroxymethyl-1,3-dioxolan-2-one
 107–9
 3-hydroxypropionaldehyde
 from glycerol 82
 non glycerol-based 84
 uses 83–4
 β -hydroxypyruvic acid 116, 118, 120–1,
 126–7
- implicate order theory 6
 integrated reactors 37, 99
 ion-exchange techniques 23–5
 iron catalyst 125–6
 isobutene 87–9, 91–3
- Jatropha curcas* 152, 153
- Kao 111
 β -ketomalonic acid 115, 116, 120–1, 124
- lipases 104–7
 lubricants 7, 8
 anticorrosive 142, 143–7
- mesoxalic acid 115, 116, 120–1, 124
 methane 41
 methanol
 contaminant in bioglycerol 13–14
 glycerol-based production 40–1
 and transesterification 12–14
 methyl *tert*-butyl ether 87
 micellar catalysts 21–2
 Michael reactions 20, 21
 microbial/enzymatic reactions
 bioalcohol production 30, 31
 glycerol from glucose 31
 glycerol to
 1,3-propanediol 51, 52, 53
 dihydroxyacetone 128–31
 glucosyl glycerol 97
 3-hydroxypropionaldehyde 82
 lipase catalysed transesterification 104–6

- monoacylglycerols *see* acyl glycerols
MTBE 87
- nanocapsules 97
nitroglycerine 10–11, 109–10
Nobel, A. 10
Nozyme lipases 104–5
- O-alkylation *see* etherification
organic synthesis 20–3
oxidation of glycerol 115–18
 biological oxidation 128–31
 electrochemical oxidation 126–8
 gold catalysts 122–5
 iron catalyst 125–6
 platinum and palladium catalysts 119–22
 summary of derivatives 116, 130
 TEMPO organocatalysis 124–5
 thermodynamics and kinetics 118–19
oxydehydration of glycerol 80–1
oxygen 118–19
- palladium catalysts 119–22
palm oil 150, 157
personal care products 2, 6, 8, 94
Petrosil Group 159
pharmaceutical applications 6, 8, 59, 94
physicochemical properties 2
plasticizer 7
platinum catalysts 119–22
polyester fibers 45, 50
polyglycerol 95–7, 109
poly(glycidyl) nitrate 109
polyketomalonates 118, 121
polymerization 93–7, 109
polyols 6, 7, 8, 33, 34
 as cement additives 135–9
 demand for 55
 polyglycerol 95–7, 109
 price relationships 54
polyurethane foams 6, 7
pressure-swing adsorption 35
Procede Twente 98
production of glycerol *see* bioglycerol
propane production 77–80, 81
1,2-propanediol *see* propylene glycol
1,3-propanediol 45, 46
 by biological reduction of glycerol 51–3
 by dehydroxylation of glycerol 50–1
propanol 77–80, 81
properties of glycerol 1–6
propylene glycol 45–50
 demand and usage 54–5
 hydrogenolysis
 of glycerol 45–9, 50
 of sugars/sugar alcohols 49
propylene oxide 48–9
purification technologies 13, 23–5
- reactive distillation 46, 47, 54
reduction of glycerol 45
 biological reduction to 1,3-propanediol 51–3
 dehydroxylation to 1,3-propanediol 50–1
 hydrogenolysis to propylene glycol 45–50
 industrial/commercial developments 53–6
reforming *see* aqueous phase reforming
Repsol 98
Rhizomucor miehei 105
- salt removal 23–5
Scheele, C. 1
selective oxidation *see* oxidation
selective reduction *see* reduction
soap
 anticorrosive 143–7
 glycerol as additive 8, 9
 manufacture 10, 11, 15
solvation 3
Solvay process 65, 67–8
solvents
 glycerol-derived 22–3
 value of glycerol as 20–2
sol-gel bioceramics 5
sorbitol 8
soybeans 149, 150, 151, 152, 155
steam reforming 31
structure of glycerol 2, 3

- subsidies 150, 153
- sulfonic-functionalized silica 88–91
- supercooled glycerol 4, 5
- surfactant combined catalysts 21–2
- synthesis gas 29, 30, 31–3, 157
 - and hydrogenolysis of glycerol 50
 - see also* aqueous phase reforming
- tanning, artificial 128
- tartronic acid 115, 116, 118
 - Pt–Bi catalysed oxidation 120, 121
- telomerization 93–5
- TEMPO oxidation
 - electrochemical 126–7
 - organocatalytic 124–5
- tert*-butyl glycerols *see* glycerol *tert*-butyl ethers
- toiletries *see* personal care
- tosylation 51
- transesterification 10, 12, 104–6
- triacylglycerol 90–1
- triglycerols 94
- Tsang, E. 40
- urea 107
- uses of glycerol 1, 6–10
 - construction industry 135–47
 - new developments 16, 18–20, 162
- Virent Energy Systems Inc 41
- waterproofing agent 139–40
- Yellow Diesel 15–16, 17, 18
