

# **I**ndex

34 Full factorial experimental design 19-20  
3-by-3 Neighbourhood block 76-77  
3-GHz Processor 109

## **A**

Adhesive 15  
Air filtration 121  
Angular  
  Density 48, 80, 84, 106  
  Orientation 130  
  Power spectrum 129  
  Power spectrum histogram 130  
Applied voltage 16, 18-20, 25, 33-39, 124, 127, 139, 144-145, 153, 156, 159-162,  
  167, 171, 173, 175-177  
Atomic force microscopy 69

## **B**

BAL-TEC SCD 005 sputter coater 147, 168  
Bead formation 140, 143, 150  
Bead-on-a-string structure 150-151, 170  
Beads 122-127, 141-142, 145, 150, 163, 174  
Berry number 18  
Biocompatibility 15  
Bridge formation 101  
Brookfield viscometer 168  
Bubble Point Method 100

## **C**

Carbon fibres 13  
Carbonisation 13  
Cellulose tubular membrane 167  
Centre point 75  
Chessboard-distance 71  
City block 72

- Distance transform 75
  - Metric 71
- Coded variables 25-26
- Coefficient of variation 14, 32
- Combing 133
- Contour plots 25
- Conventional fibres 134
- Cotton fibre 133
- Coulomb repulsion 145
- Coulomb's Law for the E field 4

## D

- Degree of hydrolysis 15
- Degummed silk 124
- Dilation operation 51, 81
- Dimethylformamide 154
- Direct tracking 46, 51-52, 58, 60, 63-64
  - Algorithms 52
- Distance from needle to collector 153
- Distance map 70, 72-74, 78
- Distance Transform Method 46, 49, 50, 52, 58, 60, 63-64, 70, 74-75, 91, 93
- Distance-transformed image 50, 70, 72, 74-75, 77
- Doping 165
- Drawing 133
- Drum collector 138
- Dry fibres 19
- Dry sieving 101

## E

- Electrohydrodynamic instability theory 4
- Electrospinning
  - Equipment 167
  - Jet 150
  - Parameters 14-15, 19, 25, 46, 106, 108, 125
  - Waste cotton 133
  - Window 123, 142
  - Fibre formation 150
  - Fibres 32, 134, 150, 163, 169, 171, 174, 177-178
  - Fibrewebs 79
  - Nanofibre 14, 16, 34, 104, 105, 118, 122, 123, 139, 140, 141, 142, 143, 144, 146, 166, 172, 173, 175

**Electrospun**

- Nanofibre mat 11, 17, 131
- Nanofibre webs 67, 82, 98
- Non-woven webs 45-46, 51, 63-64
- PANi/PAN fibres 168
- Poly (vinylidene fluoride) fibrous electrolyte 13
- Polyaniline/polyacrylonitrile NMP 147
- Polymer fibres 137
- PVA fibres 16
- Scaffolds 13
- Web 45-48, 61, 68, 72, 79, 82-83, 91, 97, 100, 103, 105, 109, 110, 118

**Electrospun-regenerated Bombyx mori silk 13****Electrostatic force 97****Electrostatic stretching force 32-33****Empirical Model 7, 12, 15, 31****Empirical modeling 24****Equivalent opening size 99-100****Erosion operation 51, 53, 81****Error term 24****Euclidean distance 71**

## Map 73

## Metric 71-72, 75

**F****Fabrication 97****Face-centred central composite design 14****Faraday cage 154****Fast Fourier Transform 125-127, 129****Feed rate 2, 124, 144, 158, 160-162****Fibre**

## Beaded 18, 38, 137, 140, 144, 155, 157

## Diameter measurement 48

## Formation 19, 153, 166, 168-169

## Identification 51

## Micro 134-135

## Morphology 3, 144-145, 150, 158, 166, 174, 178

## Bead-free 172

## Spinning 45, 133

## Spun 126

## Sub-micron 133, 137, 166

## Uniform 36, 39

**First-order (linear) models 24**

Flow porosimetry (Bubble Point Method) 100, 102, 108-109  
Flow rate 19-20, 25, 35, 37  
Four-probe Method 169  
Fracture points 155

## **G**

Glass transition temperature 97  
Glass-bead mixtures 101  
Global thresholding 52-53, 80-82, 104-105

## **H**

Half-a-pixel error 90  
High-voltage direct-current power supply 16  
Hydrodynamic sieving 101  
Hydrolysis 15  
Hypotheses 27  
Hypothesis-testing procedures 26

## **I**

Image analysis 67, 80, 91, 97-98, 103-104, 108-109, 111, 118, 125, 131, 169  
Image processing algorithms 125  
Image size 48, 80, 106  
ImageJ programme 126  
Intensity adjustment operation 52  
Internal randomness 47, 79, 105  
Intrinsic viscosity 18

## **J**

Jet stretching 172

## **L**

Least squares method 26  
Line density 84  
Line thickness 48, 80, 106  
Linear regression analysis 25  
Liquid filtration 121  
Local thresholding 53, 82, 104-105  
Low-order polynomials 24

## **M**

Manual Method 48-49, 60, 69, 90-91, 93  
Mark-Houwink-Sakurada Equation 18

MatLab programme 130  
 Mean fibre diameter 6-7, 13-14, 25-28, 28, 31-34, 35, 36, 38-39  
 Mean free path ( $\mu$ -randomness) 47-48, 54, 63, 79-80, 91, 105-106  
 Mechanical fibre-spinning technologies 1  
 Medial-axis transformation 70  
 Melting temperature 97  
 Melt-spinning 153  
 Mercury porosimetry 100-101, 108  
 Modeling 14  
 Momentum Equation 4  
 Morphological opening 81  
 Morphological opening operation 53  
 Morphology 11, 14, 16, 34, 122, 127-128, 137, 139, 144-145, 147, 150, 153,  
 168-169, 172, 174

## N

Nanocomposites 134  
 Nanofibre
 

- Beaded 157
- Diameter 56
- Orientation 130
- Polyaniline-based 166
- Webs 106, 108
- Electrospun 130

 Nanofibres PVA 38  
 Nanofibrous mats 125  
 Nanofibrous media 121-122, 124, 126  
 Nanotechnology 8, 133  
 Natural (uncoded) variables 29  
 Natural fibres 8, 133  
 New Distance Transform Method 74, 78-79, 93  
 N-methyl-2-pyrrolidone 145-147, 150, 166-167, 170, 174, 178  
 Non-uniform
 

- Fibres 36, 38-39
- Morphology 170
- Surface morphology 172

 Non-woven webs 105  
 Null hypothesis 27

## O

One-factor-at-a-time approach 19  
 One-pixel error 60

Online quality-control technique 109  
Opening and cleaning 133  
Operator-based method 69  
Optical microscope (Nikon Microphot-FXA) 147  
Orientation distribution function 122, 131  
Otsu's Method 53, 64, 81, 91, 104  
Oxidative polymerisation 167

## **P**

Polyacrylonitrile (PAN) 14, 124-125, 129, 147, 149, 150, 171-172  
  Fibres 154  
  Nanofibres 13, 128, 131, 153  
  Nanomats 126  
  Solution 146  
  Webs 158  
PAN/DMF 158  
Polyaniline 145-147, 149, 165-167, 170, 172, 175-178  
  Ratio 148  
  Solution 169, 171  
PANi/NMP solution 150  
PANi/PAN  
  Blend solutions 170, 173  
  Blends 172, 174, 178  
  Fibres 169, 177  
PANi/PEO nanofibres 174  
Paper-coating, fibres 15  
Parasitic components 70  
Percent open area 97, 99  
Philips (XL-30) environmental scanning electron microscope 54, 82, 106, 125  
Poly D, L-Lactide 13-14  
Polyacrylonitrile polymer 166  
Polyaniline/polyethylene oxide blend 166  
Polyaniline-based nanofibres 166  
Polymer  
  Aniline-based 165  
  Concentration 14, 18, 32, 34, 153  
  Conduction 165-166  
  Fibres 1, 121, 133  
  Morphology 147  
  Nanofibres 97, 137  
  Solution 11, 45, 67, 97, 137, 146, 150, 153, 157, 167-169, 172, 174  
Polymerisation 146

- Stabilisers 15
- Polynomials 24
- Polyvinyl alcohol 18, 54, 60, 82, 106, 108
  - Concentration 18
  - Fibre diameter 15
  - Hydrogels 15
  - Nanofibres 16, 38
  - Solution 16
- Pore-opening size distribution 97-98, 100-102, 104, 108-110, 113, 115-117
- Porosity 98-99, 103, 108, 114, 118, 131, 133
- Porosity analysis 126
- Pruning 49-50, 58, 71, 73-74, 77, 90

## Q

- Quadratic Model 24-26

## R

- Radial momentum balance 6
- Rayleigh instability 4
- Real responses 31
- Real Web 62-63, 82, 91-93, 104-105
  - Fibre bundling 90
  - Treatment 52
