

# INDEX TO VOLUME XLII.

## INDEX OF NAMES.

- Abrams, D. A., and Harder, O. E.** Colorimetric test for the determination of organic impurities in sands, 217.
- Ackermann, E.** Analysis of milk, 328.
- Adams, J. R.** See Kelley, G. L., Adams, J. R., and Wiley, J. A.
- Adler, L.** Estimation of ammonia by the boric acid method, 51.
- Adler, L., and Lüers, H.** Interferometer in the Brewery Laboratory, 60.
- Aita, A.** Solubility of mineral phosphates and superphosphates in dilute mineral and organic acids, 312.
- Anderson, G. W.** Detection of hydrocyanic acid, 178.
- Anderson, H. S.** See Wilkie, J. M., and Anderson, H. S.
- Anderson, R. P.** Estimation of gasoline vapour in air, 215.
- Anderson, R. P.** Reagents for use in gas analysis. V.: Relative advantages of sodium and potassium hydroxides in preparation of alkaline pyrogallol, 27.
- Angeli, A.** Pyrrole Black, 88.
- Arpin, —.** Alkalinity of cocoa, 174.
- Arup, P. S., Huish, H. C., and Richmond, H. D.** The composition of milk, 118.
- Aschman, C., Jun.** Estimation of boron in boron-steel, 54.
- Atkins, W. R. G.** The analysis of honey and other substances containing lævulose, 12.
- Atkins, W. R. G.** See Wilson, E. G., and Atkins, W. R. G.
- Averitt, S. D.** Estimation of strontium and lithium in water, 345.
- Bach, A.** Reactions of peroxidase purified by ultrafiltration, 18.
- Bagshawe, C. R.** See Elsdon, G. D., and Bagshawe, C. R.
- Bailey, E. G.** Interpretation of coal analysis, 145.
- Baker, J. L., and Hulton, H. F. E.** Analytical examination of acorns and horse chestnuts, 351, 383.
- Baker, J. L., and Hulton, H. F. E.** Evidence of the existence in malt of an enzyme hydrolysing the furfuröids of barley, 143.
- Balcom, R. W.** Volatile reducing substance in cider vinegar, 142.
- Barab, J.** See Cope, W. C., and Barab, J.
- Barbieri, N. A.** Non-Existence of lecithin in egg-yolk, 204.
- Barker, J. F.** Estimation of carbonates, 367.
- Barker, M. F.** See Fox, J. J., and Barker, M. F.
- Barnebey, O. L.** Differential Iodimetry. II.: Titration of chromic acid in presence of ferric iron, and estimation of chromium in chromite, 250.
- Barnebey, O. L., and Bishop, G. M.** Analysis of pyrolusite and other oxidised manganese ores, 313.
- Barnebey, O. L., and Hawes, W. C.** Differential Iodimetry. III.: Estimation of available oxygen in soluble and precipitated oxidised forms of manganese, 251.
- Barnebey, O. L.** See Dales, B., and Barnebey, O. L.
- Barnes, J. H.** Mineral constituents of cotton lint, 50.
- Baumann, C., and Grossfeld, J.** Polarimetric estimation of starch in the presence of other optically active substances, 218 and 365.
- Baxter, G. P., and Kobayashi, M.** Estimation of potassium as perchlorate, 155.

- Baxter, G. P., and Starkweather, H. W.** Efficiency of calcium chloride, sodium hydroxide, and potassium hydroxide as drying agents, 26.
- Beal, G. D., and Okey, R.** Qualitative identification of the drugs containing Emodin, 203.
- Beals, G. L., and Lindsey, J. B.** Chemical composition, digestibility, and feeding value of vegetable ivory meal, 48.
- Beckett, E. G.** Laboratory gas meter, 157.
- Behrman, A. S.** Blacher Method for the estimation of hardness in water, 403.
- Benson, H. K., and Davis, L. L.** Free carbon of wood-tar pitches, 212.
- Berg, R.** Estimation of small quantities of iron and aluminium (in foods, etc.), 182.
- Biazzo, R., and Vigdorcik, S.** Detection of arachis oil in olive oil, 85.
- Biazzo, R., and Vigdorcik, S.** Detection of rape oil in olive oil, 86.
- Bichowsky, F. R. Von.** Electrometric titration of zinc, 346.
- Bigelow, W. D., and Dunbar, P. B.** Acid contents of fruits, 357.
- Bishop, G. M.** See Barnebey, O. L., and Bishop, G. M.
- Blumenthal, P. L., Peter, A. M., Healey, D. J., and Gott, E. J.** Method of incinerating organic materials for the estimation of potassium, 372.
- Boekhout, F. W. J., and Vries, J. J. O. de.** Duclaux's Method for the estimation of volatile fatty acids, 149.
- Bolton, E. R., and Hewer, D. G.** Brazilian oilseeds, 35.
- Bonis, A.** Detection and estimation of saccharin in alimentary substances, 303.
- Boswell, P. G. H., Harwood, H. F., and Eldridge, A. A.** British sands suitable for glass-making, 313.
- Boudet, J.** See Nicolardot, P., and Boudet, J.
- Bougault, J.** Estimation of antipyrine, 276.
- Bougault, J.** New method for the estimation of aldose sugars, 307.
- Brandt, R.** See Sieverts, A., and Brandt, R.
- Brauer, K.** Water-Content of margarines prepared from hydrogenated fats, 49.
- Brewer, G.** See Radford, N., and Brewer, G.
- Brill, H. C.** Fermentation of Philippine cacao, 389.
- Broderson, H. J.** See Lemp, J. F., and Broderson, H. J.
- Broeksmid, T. C. N.** Detection of citric acid and tartaric acid, 357.
- Browning, K. C.** Detection of traces of mercury salts for toxicological purposes, 210.
- Browning, K. C., and Parthasarathy, M.** Note on ghee, 141.
- Browning, K. C. and Symons, C. T.** Coconut toddy in Ceylon, 46.
- Browning, P. E.** Introduction to the Rarer Elements (Review), 322.
- Browning, P. E., and Porter, L. E.** Qualitative separation and detection of gallium, 402.
- Browning, P. E., and Spencer, S. R.** Separation of caesium and rubidium by fractional crystallisation of their alums, 55.
- Browning, P. E., Simpson, G. S., and Porter, L. E.** Qualitative separation and detection of iron, thallium, zirconium, and titanium, 54.
- Browning, P. E., Simpson, G. S., and Porter, L. E.** Qualitative separation and detection of tellurium and arsenic, 53.
- Bruce, J. M., and Dilling, W. J.** *Materia Medica and Therapeutics* (Review), 64.
- Bruckmiller, F. W.** Titration of magnesium, 251.
- Bury, A.** Volumetric analysis of hypochlorite solutions used for sterilising water, and a rapid method for the estimation of hydrogen peroxide, 181.
- Busvold, N.** Rapid method for the estimation of magnesium, 182.
- Carnot, A.** Cobaltic ammonium molybdate, tungstate, and vanadate. Estimation and separation of cobalt, 285.
- Cavazzi, A.** Estimation of phosphorus in cast iron, 371.

INDEX TO VOLUME XLII.

- Cavazzi, A.** Solubility of calcium carbonate in boiling water, 368.
- Chamot, E. M., and Sherwood, C. M.** Studies on the culture media employed in the bacteriological examination of water. IV.: Neutral red lactose peptone media, 331.
- Chapman, A. C.** Colouring matter of red *Torulæ*, 143.
- Chapman, A. C.** On the natural occurrence in certain fish-liver oils of high percentages of hydrocarbons, 161.
- Chapman, A. C.** Some main lines of advance in the domain of modern analytical chemistry, 229.
- Chapman, A. C.** Spinacene: A new hydrocarbon from certain fish-liver oils, 141.
- Christie, A. W.** See Gray, G. P., and Christie, A. W.
- Christman, R. E.** See Ware, E. E., and Christman, R. E.
- Clark, W. B.** Sampling Press, 374.
- Clark, W. M., and Lubs, H. A.** Substitute for litmus for use in milk cultures, 331.
- Clemente, A.** See Heise, G. W., and Clemente, A.
- Glennell, J. E.** Analysis of aluminium dust, 219.
- Clowes, F., and Coleman, J. B.** Elementary Practical Chemistry. Part II.: Analytical Chemistry, Qualitative and Quantitative (Review), 65.
- Coleman, J. B.** See Clowes, F., and Coleman, J. B.
- Collins, S. H.** Analysis of acetate of lime, 152.
- Colver, E. de W. S., and Prideaux, E. B. R.** Stannous chloride reduction method for estimating nitrotoluenes, 247.
- Conno, E. De.** Action of aromatic amines on fatty acids, 213.
- Cope, W. C., and Barab, J.** "Nitron" as a gravimetric reagent for analysis of substances used in explosives, 216.
- Coste, J. H.** Absorption of atmospheric gases by water, 341.
- Coste, J. H.** Note on the inflammability of petroleum spirit at low temperatures, 168.
- Coste, J. H.** Notes on jets for burettes, 385.
- Crawford, C. W.** See Francis, C. K., and Crawford, C. W.
- Crowther, C., and Raistrick, H.** Comparative study of the proteins of the colostrum and milk of the cow and their relations to serum proteins, 17.
- Cumming, A. C., and Kay, S. A.** Textbook of Quantitative Chemical Analysis (Review), 112.
- Curtman, L. J., and Harris, B. R.** Inadequacy of the basic ferric acetate test for acetates, 342.
- Curtman, L. J., and Harris, B. R.** Interference of thiocyanates, ferrocyanides, and ferricyanides in the detection of iodides with palladium, 156.
- Dales, B., and Barnebey, O. L.** Elementary Qualitative Analysis (Review), 30.
- David, —.** Estimation of ozone, 183.
- David, —.** Estimation of ozone (in air), 344.
- Davis, H. S.** See Richards, T. W., and Davis, H. S.
- Davis, L. L.** See Benson, H. K., and Davis, L. L.
- Day, F. W. F.** See Eaton, B. J., and Day, F. W. F.
- Dean, E. W.** Testing of motor gasoline, 333.
- Debourdeaux, L.** Estimation of theobromine, 244.
- Dehn, W. M.** Fallacies in Colorimetry, 348.
- Denigès, G.** Differentiation of the two naphthols by means of titanous acid dissolved in sulphuric acid, 26.
- Denigès, G.** Microchemical reaction of the perchloric ion, 311.
- Denigès, G.** Sensitive reaction for hydrogen peroxide, 403.
- Dilling, W. J.** See Bruce, J. M., and Dilling, W. J.
- Dinwiddie, J. G.** Estimation of fluorine in soluble fluorides, 93 and 181.

- Doisy, E. A.** See Folin, O., and Doisy, E. A.
- Donaldson, R.** Detection of protozoal cysts in faeces by means of wet stained preparations, 245.
- Dover, M. V., and Marden, J. W.** Comparison of the efficiency of some common desiccants, 348.
- Dover, M. V.** See Marden, J. W., and Dover, M. V.
- Downs, C. R.** See Weiss, J. M., and Downs, C. R.
- Dox, A. W., and Lamb, A. R.** Accurate aeration method for the estimation of alcohol in fermentation mixtures, 46.
- Dox, A. W., and Plaisance, G. P.** Estimation of vanillin in vanilla extract, 17.
- Dox, A. W., and Plaisance, G. P.** Occurrence and significance of mannitol in silage, 394.
- Dox, A. W., and Roark, G. W., Jun.** Determination of gelatinisation temperatures of starches by means of an electrically-heated chamber on the microscope stage, 221.
- Dreyer, G., and Gardner, A. D.** General method of estimating the relative turbidity or opacity of fluid suspensions including bacterial emulsions, 19.
- Drushel, W. A., and Elston, C. M.** Quantitative estimation of small quantities of sulphide sulphur, 58.
- Dubreuil, J.** See Tribondeau, L., and Dubreuil, J.
- Dubrisay, R.** Examination of lubricating oils, 363.
- Dunbar, P. B.** See Bigelow, W. D., and Dunbar, P. B.
- Durand, H.** Detection of added water in milk, 302.
- Duvall, D. H.** Determination of light oils in coal gas, and description of still for separating the light oils from the absorbing oil, 50.
- Dyer, D. C.** Method of steam distillation for the determination of volatile fatty acids, including a series of colorimetric qualitative reactions for their identification, 149.
- Eaton, B. J., and Day, F. W. F.** Estimation of free and combined sulphur in vulcanised rubber, and the rate of combination of sulphur with different types of plantation Para rubber, 91.
- Eckles, C. M., and Palmer, L. S.** Effects of feeding cottonseed products on the composition and properties of butter, 389.
- Eldridge, A. A.** See Boswell, P. G. H., Harwood, H. F., and Eldridge, A. A.
- Elsdon, G. D.** A combined Reichert-Polenske and modified Shrewsbury-Knapp Process, 295.
- Elsdon, G. D.** The differentiation of coconut oil and palm-kernel oil in mixtures, 298.
- Elsdon, G. D., and Bagshawe, C. R.** The Shrewsbury and Knapp Process for the estimation of coconut oil, 72.
- Elston, C. M.** See Drushel, W. A., and Elston, C. M.
- Embrey, G.** Some experiences in the use of copper sulphate in the destruction of Algæ, 264.
- Emslander, R.** Gasometric estimation of amino-nitrogen in worts, extracts, etc., 150.
- Ensollo, R., Spon, E., and Spon, F. N.** Bayley's Chemists' Pocket Book (Review), 319.
- Entat, M.** See Vulquin, E., and Entat, M.
- Ericson, E. J.** Separation of zinc from cadmium, and estimation of cadmium iodimetrically, 346.
- Estes, C.** Qualitative test and colorimetric method for the estimation of vanillin, 208.
- Evenson, O. L.** Correction required in applying the Babcock formula to the estimation of total solids in evaporated milk, 302.
- Ewins, A. J.** Estimation of arsenic in organic compounds, 50.

- Fahrenwald, F. A.** New alloys to replace platinum, 347.
- Falciola, P.** Estimation of free carbon in coal-tar, 246.
- Fegeley, W. H.** See Lee, R. E., Fegely, W. H., and Reichel, F. H.
- Fellenberg, T. Von.** Direct method for the estimation of starch, 279.
- Fellers, C. R.** Analyses, purification, and chemical properties of agar-agar, 49.
- Ferguson, A. A.** See Tingle, A., and Ferguson, A. A.
- Ferguson, J. B.** Iodimetric estimation of sulphur dioxide and sulphites, 220.
- Fielding, L. E.** See Peters, C. A., and Fielding, L. E.
- Folin, O., and Doisy, E. A.** Impure picric acid as a source of error in creatine and creatinine estimations, 149.
- Fonzes-Diacon, —.** Sublimed sulphur and its adulteration, 57.
- Forbes, E. B., Mangels, C. E., and Morgan, L. E.** Methods for the estimation of metabolic nitrogen, 397.
- Fox, J. J., and Barker, M. F.** Estimation of phenol in commercial cresylic acid, 329.
- Francis, C. K., and Crawford, C. W.** Detection and estimation of sulphur in petroleum, 283.
- Francis, C. K., and Morgan, D. G.** Estimation of fat in certain milk products, 391.
- François, M.** Analysis of acetylsalicylic acid (aspirin), 203.
- François, M.** Estimation of antipyrine, 178.
- Frerichs, G., and Mannheim, E.** Estimation of dextrose, 363.
- Fry, W. H.** See Shorey, E. C., and Fry, W. H.
- Gadamer, J., and Laske, K.** Biological examination of honey, 361.
- Gardner, A. D.** See Dreyer, G., and Gardner, A. D.
- Gattermann, L., and Schindheim, H.** Removal of phosphoric acid by stannic chloride, 95.
- Gericke, W. F.** Nitrate estimations in the presence of chlorides, 343.
- Gewecke, J.** Electro-Analysis using silvered glass basins in place of platinum cathodes, 255.
- Gill, A. H.** Crampton-Simons Colour Test for palm oil, 216.
- Gill, A. H.** Notes on oil testing, 215.
- Gillespie, L. J., and Walters, E. H.** Duclaux Method for the estimation of volatile acids, 399.
- Gnadinger, C. B.** Estimation of saccharin in foods, 304.
- Goss, B. C.** Adsorption of tin by proteins, and its relation to the solution of tin by canned foods, 208.
- Gott, E. J.** See Blumenthal, P. L., Peter, A. M., Healey, D. J., and Gott, E. J.
- Gottsche, F.** See Klein, O. H., Link, J., and Gottsche, F.
- Gray, G. P., and Christie, A. W.** Boiling method for estimation of water-soluble arsenic in lead arsenate, 53.
- Gregg, E. T.** Improved compensator for gas analysis, 316.
- Grey, E. C.** Estimation of succinic acid, 335.
- Grossfeld, J.** See Baumann, C., and Grossfeld, J.
- Guglielmelli, L.** Delicate test for dimethylaminophenyldimethylisopyrazolone (pyramidone), 47.
- Gyzander, C. R.** Determination of explosibility of pyrites and estimation of its available sulphur and sulphur in cinders, 368.
- Haar, A. W. Van Der.** Estimation of free and combined galactose, 23.
- Haff, R. C., and Schwartz, E. H.** Cobalti-Nitrite method for estimation of potash, 372.
- Haigh, F. L.** See Mixer, W. G., and Haigh, F. L.

- Hale, H.**, and **Hartley, W. L.** Method of extraction as affecting the estimation of phosphoric acid in soils, 27.
- Hall, F.** Vacuum-jacketed pycnometer for liquids, 350.
- Hall, —.** See Treadwell, —, and Hall, —.
- Hallett, R. L.** Volumetric estimation of tin, 28.
- Hamburger, H. J.** Quantitative estimation of small quantities of sulphate, 57.
- Hankin, E. H.** Tests for certain narcotic and anæsthetic drugs, 174.
- Harder, O. E.** See Abrams, D. A., and Harder, O. E.
- Harned, H. S.** Titration of some bivalent metal sulphates by the conductivity method, 155.
- Harris, B. R.** See Curtman, L. J., and Harris, B. R.
- Hart, E.** Preparation of sulphurous acid, 222.
- Hart, E. B.**, and **Sure, B.** Influence of carbohydrates on the accuracy of the hydrolysis of casein, 90.
- Hart, R.** Analysis of sulphonated oils, 401.
- Hartley, W. L.** See Hale, H., and Hartley, W. L.
- Harwood, H. F.** See Boswell, P. G. H., Harwood, H. F., and Eldridge, A. A.
- Hawes, W. C.** See Barnebey, O. L., and Hawes, W. C.
- Hawkins, L. A.** Utilisation of pentoses and pentosans by fungi, 210.
- Hawley, F. G.** Estimation of silica in commercial analysis, 315.
- Haynes, D.** See Schryver, S. B., and Haynes, D.
- Healey, D. J.** See Blumenthal, P. L., Peter, A. M., Healey, D. J., and Gott, E. J.
- Heise, G. W.**, and **Clemente, A.** Detinning and analysis of tin plate, 345.
- Heise, G. W.**, and **Clemente, A.** Stripping and analysis of galvanised iron, 342.
- Hembrough, E.** See Richmond, H. D., and Hembrough, E.
- Hendrickson, A. V.** The Gas Chemists' Summary, 1915 (Review), 67.
- Herwig, W.** Estimation of chromium in ferrochrome, 179.
- Hewer, D. G.** Note on orange-pip oil, 271.
- Hewer, D. G.** See Bolton, E. R., and Hewer, D. G.
- Hewett, J.** Combustion methods for use in the laboratory (estimation of sulphur), 94.
- Hibbard, P. L.** Estimation of potash by the Lindo-Gladding Method, 312.
- Higgins, H. L.**, and **Marriott, W. M.** Colorimetric method for the estimation of the carbon dioxide in air, 92.
- Hillebrand, W. F.** Analytical Chemistry and its Future (Chandler Lecture, Columbia University, U.S.A.), 184.
- Hitchman, F. G.** See Richmond, H. D., and Hitchman, F. G.
- Hollins, C.** Application of the Gutzeit Test to Works' estimations of arsenic, 309.
- Hubbard, P.** Laboratory Manual of Bituminous Materials for the Use of Students in Highway Engineering (Review), 320.
- Hubbard, W. S.** Identification of Emodin-containing drugs, 277.
- Huish, H. C.** See Arup, P. S., Huish, H. C., and Richmond, H. D.
- Hulton, H. F. E.** See Baker, J. L., and Hulton, H. F. E.
- Incze, G.** Yellow mercuric oxide as a standard in alkalimetry, 253.
- Issoglio, G.** Oxidisability values of medicinal fats, 301.
- Ivanov, V. N.** New method of precipitating platinum sulphide and analysis of platinised asbestos, 154.
- Izmailski, V. A.** Estimation of free alkali hydroxide in soap, 140.
- Jamieson, G. S.** Estimation of molybdenum by potassium iodate, 153.
- Jensen, H. R.** Estimation of strychnine in *Nur Vomica*, 16.
- Jones, F. B.** See Spielmann, P. E., and Jones, F. B.
- Jones, S. M.**, and **Spaans, W.** Rapid volumetric estimation of indigo, 23.

- Justin-Mueller, E.** Estimation of total nitrogen, 150.
- Justin-Mueller, E.** Phenolphthaleïn reagent for the detection of blood in urine, 280.
- Karaoglanow, Z.** Detection of calcium in the presence of barium and strontium, 249.
- Kay, S. A.** See Cumming, A. C., and Kay, S. A.
- Keister, J. T.** Cryoscopic method for estimating added water in milk, 392.
- Keller, —.** Estimation of fat in cacao powder, 47.
- Kelley, G. L., Adams, J. R., and Wiley, J. A.** Apparatus for electrometric titration depending on the change of oxidation potential, 373.
- Kemp, A. R.** See Lucas, H. J., and Kemp, A. R.
- Kinder, H.** Recovery of ammonium molybdate from the filtrates obtained in the estimation of phosphoric acid, 287.
- Kithil, K. L.** Estimation of thorium and mesothorium in monazite, 55.
- Klein, O. H., Link, J., and Gottsch, F.** Aniline method for the estimation of mineral fillers in rubber, 216.
- Kling, M.** New feeding-stuffs used in Germany during the war, 356.
- Knorr, E. S.** See Wesson, L. G., and Knorr, E. S.
- Kobayashi, M.** See Baxter, G. P., and Kobayashi, M.
- Kober, P. A.** Efficiency of the aeration method for distilling ammonia, 52.
- Kober, P. A.** Improvements in the copper method for estimating amino-acids, 281.
- Koch, P.** Estimation of chromium in ferro-chrome, steel, slags, etc., by the permanganate method, 180 and 284.
- Kohn-Abrest, —.** Cyanogenetic beans, 174.
- Krauskopf, F. C., and Ritter, G.** Detection of resorcinol, 15.
- Kuzirian, S. B.** Estimation of calcium in ash of forage plants and animal carcasses, 26.
- Lajoux, H., and Ronnet, L.** Tables for the analysis of food substances containing sugar. Syrups, sweets, honey, etc., 396.
- Lamb, A. R.** Note on the Duclaux Method for volatile fatty acids, 214.
- Lamb, A. R.** See Dox, A. W., and Lamb, A. R.
- Lapworth, A., and Wykes, F. H.** Pungent principles of ginger. Part II.: Synthetic preparations of zingerone, methylzingerone, and some related acids, 359.
- Lapworth, A., Pearson, L. K., and Royale, F. A.** Pungent principle of ginger. Part I.: The chemical characters and decomposition products of Thresh's "Gingerol," 358.
- Laske, K.** See Gadamer, J., and Laske, K.
- Lathrop, E. C.** Device for automatic and intermittent washing of precipitates, 317.
- Launoy, L.** Sensibility of the general method of extraction of alkaloids from water, 362.
- Lecocq, R.** Rapid method of testing the suitability of oils for soap making, 279.
- Ledoux, A.** New method for determining the refractive index of liquids, 185.
- Lee, R. E., Fegely, W. H., and Reichel, F. H.** Volumetric estimation of tin and phosphorus in phosphor-tin, 345.

## INDEX OF SUBJECTS.

- Absorbing Oil:** Still for separating the light oils from the —; Determination of light oils in coal gas, and description of. D. H. Duvall, 50.
- Abstracts of Papers Published in Other Journals—1917:** 13, 46, 84, 140, 173, 189, 243, 276, 301, 327, 356, 389.
- Acetanilide:** Phenacetin when mixed with —; Estimation of. R. Miller, 243.
- Acetanilide:** Salol and —, or of salol and phenacetin, in their mixtures; Estimation of. B. Salkover, 16.
- Acetate of Lime:** Analysis of —. S. H. Collins, 152.
- Acetates:** Basic ferric acetate test for —; Inadequacy of the. L. J. Curtman and B. R. Harris, 342.
- Acetic Anhydride:** Examination of —. L. G. Radcliffe and S. Medofski, 305.
- Acetylsalicylic Acid:** — (Aspirin); Analysis of. M. François, 203.
- Acid Content:** Fruits; — of. W. D. Bigelow and P. B. Dunbar, 357.
- Acid Sodium Phosphate:** Glass, porcelain, silica, platinum, and nickel vessels; New — and its action on. J. H. Smith, 254.
- Acid Values:** Boiled oils and varnishes; Errors in the estimation of the — of. E. E. Ware and R. E. Christman, 21.
- Acids:** Identification of —. E. E. Reid, 89.
- Acids:** Identification of —. II. J. A. Lyman and E. E. Reid, 215; III. 332.
- Acorns:** — and horse chestnuts; Analytical examination of. J. L. Baker and H. F. E. Hulton, 351, 381.
- Address:** President; Annual — of the. 115.
- Adrenaline Solutions:** Physiological and chemical valuation of —. J. S. White, 143.
- Aeration Method:** Alcohol in fermentation mixtures; Accurate — for the estimation of. A. W. Dox and A. R. Lamb, 46.
- Aeration Method:** Ammonia; Efficiency of the — for distilling. P. A. Kober, 52.
- Agar-Agar:** Analyses, purification, and chemical properties of —. C. R. Fellers, 49.
- Air:** Carbon dioxide in —; Colorimetric method for the estimation of the. H. L. Higgins and W. M. Marriott, 92.
- Air:** Desiccator for drying by means of a current of —. L. S. Pratt, 156.
- Air:** Gasoline vapour in —; Estimation of. R. P. Anderson, 215.
- Air:** Ozone (in air); Estimation of. David, 344.
- Alcohol:** Ether; Estimation of — and water in. R. L. Perkins, 281.
- Alcohol:** Fermentation mixtures; Accurate aeration method for the estimation of — in. A. W. Dox and A. R. Lamb, 46.
- Alcohols:** Identification of —. E. E. Reid, 306.
- Aldehydes:** Aromatic —; Colour reactions of. P. Pooth, 147.
- Aldose Sugars:** Estimation of —; New method for the. J. Bougault, 307.
- Algæ:** Copper sulphate in the destruction of —; Some experiences in the use of. G. Embrey, 264.
- Alimentary Substances:** Saccharin in —; Detection and estimation of. A. Bonis, 303.
- Alkali:** Cocoa; Detection and Estimation of added — in. X. Rocques, 173.
- Alkali Hydroxide:** Soap; Estimation of free — in. V. A. Izmailski, 140.
- Alkali Metals:** Lithium from the other —; Separation of. S. Palkin, 54.

- Alkalimetric Methods:** Phosphoric acid and (alkaline) phosphates by —; Estimation of. J. H. Smith, 253.
- Alkalimetry:** Standard in —; Yellow mercuric oxide as a. G. Ince, 253.
- Alkaline Materials:** Alkalinity of cacao and examination of added —; Estimation of the. M. X. Rocques, 391.
- Alkaline Pyrogallol:** Gas analysis; Reagents for use in. V.; Relative advantages of sodium and potassium hydroxides in preparation of —. R. P. Anderson, 27.
- Alkalinity:** Cacao; Estimation of the — of, and examination of added alkaline materials. M. X. Rocques, 391.
- Alkalinity:** Cocoa; — of. Arpin, 174.
- Alkaloids:** Extraction of — from water; Sensibility of the general method of. L. Launoy, 362.
- Alkaloids:** Several — in the same solution; Chemical and physiological detection of. E. Philippi, 177.
- Alloys:** Aluminium —; Analysis of some. J. H. Stansbie, 339.
- Alloys:** Nickel and cobalt in ores and —; A rapid method for estimating—Part I. W. R. Schoeller and A. R. Powell, 189.
- Alloys:** Platinum; New — to replace. F. A. Fahrenwald, 347.
- Aluminium Alloys:** Analysis of some —. J. H. Stansbie, 339.
- Aluminium Dust:** Analysis of —. J. E. Clennell, 219.
- Aluminium:** Iron and — (in foods, etc.); Estimation of small quantities of. R. Berg, 182.
- Alums:** Cæsium and rubidium by fractional crystallisation of their —; Separation of. P. E. Browning and S. R. Spencer, 55.
- Amines:** Aromatic — on fatty acids; Action of. E. de Conno, 213.
- Amino-Acids:** Copper method for estimating —; Improvements in the. P. A. Kober, 281.
- Amino Form:** Nitrogen in — as estimated by formol titration, in relation to some other factors measuring quality in wheat flour. C. O. Swanson and E. L. Tague, 175.
- Amino-Nitrogen:** Worts, extracts, etc.; Gasometric estimation of — in. R. Emslander, 150.
- Ammonia:** Aeration method for distilling —; Efficiency of the. P. A. Kober, 52.
- Ammonia:** Boric acid method; Estimation of — by the. L. Adler, 51.
- Ammonium Molybdate:** Cobaltic —, tungstate, and vanadate. Estimation and separation of cobalt. A. Carnot, 285.
- Ammonium Molybdate:** Filtrates obtained in the estimation of phosphoric acid; Recovery of — from the. H. Kinder, 287.
- Anæsthetic Drugs:** Narcotic and —; Tests for certain. E. H. Hankin, 174.
- Analysis:** Gas —; Improved compensator for. E. T. Gregg, 316.
- Analysis:** Precipitates in Gravimetric —; Contamination of. Solid solution and adsorption *v.* higher-order compounds. G. M. Smith, 318.
- Analysis:** Qualitative —; Elementary (Review). B. Dales and O. L. Barnebey, 30.
- Analysis:** Silica in Commercial —; Estimation of. F. G. Hawley, 315.
- Analytical Chemistry:** Advance in the domain of modern —; Some main lines of. A. C. Chapman, 229.
- Analytical Chemistry:** — and its future. (Chandler Lecture, Columbia University, U.S.A.) W. F. Hillebrand, 184.
- Aniline Method:** Mineral fillers in rubber; — for the estimation of. O. H. Klein, J. H. Link and F. Gottsch, 216.
- Animal Carcasses:** Calcium in ash of forage plants and —; Estimation of. S. B. Kuzirian, 26.
- Antimonial Lead:** Analysis of —. C. R. McCabe, 310.

- Antipyrine:** Estimation of ——. J. Bougault, 276.
- Antipyrine:** Estimation of ——. M. François, 178.
- Apomorphine:** Sensitive reaction for ——. L. P. J. Palet, 48.
- Apparatus, etc., Abstracts:** 29, 60, 156, 184, 254, 287, 316, 347, 373, 404.
- Apparatus:** Gas absorption —; Simple. H. D. Richmond and E. Hembrough, 254.
- Arachis Oil:** Olive oil; Detection of — in. R. Biazzo and S. Vigdorcik, 85.
- (Argon):** Rare gases —; Estimation of. A. Sieverts and R. Brandt, 52.
- Aromatic Aldehydes:** Colour reactions of ——. P. Pooth, 147.
- Aromatic Amines:** Fatty acids; Action of — on. E. de Conno, 213.
- Arsenic and Phosphoric Acids:** Vanadium from — and from uranium; Separation of. W. A. Turner, 60.
- Arsenic:** Lead arsenate; Boiling method for estimation of water-soluble — in. G. P. Gray and A. W. Christie, 52.
- Arsenic:** Lead arsenate; Rapid method for estimation of water-soluble — in. H. A. Scholz and P. J. Waldstein, 340.
- Arsenic:** Organic compounds; Estimation of — in. A. J. Ewins, 50.
- Arsenic:** Phosphorus by Dusart and Blondlot's method; Detection of, and its application to Toxicology. Preparation of pure zinc for the detection of phosphorus and ——. H. J. Lemkes, 183.
- Arsenic:** Tellurium and —; Qualitative separation and detection of. P. E. Browning, G. S. Simpson, and L. E. Porter, 53.
- Arsenic:** Works' estimation of —; Application of the Gutzeit Test to. C. Hollins, 307.
- Asbestos:** Platinum sulphide and analysis of platinised —; New method of precipitating. V. N. Ivanov, 154.
- Ash:** Forage plants and animal carcasses; Estimation of calcium in — of. S. B. Kuzirian, 26.
- Aspirin:** Acetylsalicylic acid (—); Analysis of. M. François, 203.
- Aspirin:** Novaspirin, alone or when mixed with —; Estimation of. R. Miller, 243.
- Atmosphere:** Ozone and oxides of nitrogen in the —; Determination of. F. L. Usher and B. S. Rao, 370.
- Atmospheric Gases:** Water; Absorption of — by. J. H. Coste, 341.
- Atomic Weights:** International —. 1917, 1.
- Australia:** Official Orders. Commonwealth of —. Importation of pepper, 255.
- Babcock Formula:** Total solids in evaporated milk; Correction required in applying the — to the estimation of. O. L. Evenson, 302.
- Bacteria:** Water; Direct microscopical counting of — in. B. E. Nelson, 209.
- Bacterial Emulsions:** Fluid suspensions including —; General method of estimating the relative turbidity or opacity of. G. Dreyer and A. D. Gardner, 19.
- Bacteriological Examination:** Water; Studies on the culture media employed in the — of. IV.: Neutral red lactose peptone media. E. M. Chamot and C. M. Sherwood, 331.
- Bacteriological, Physiological, etc., Abstracts—1917:** 17, 87, 143, 209, 245, 280, 304, 331, 361, 397.
- Barium:** Calcium in the presence of — and strontium; Detection of. Z. Karaoglanow, 249.
- Barley:** Enzyme hydrolysing the furfuroids of —; Evidence of the existence in malt of an. J. L. Baker and H. F. E. Hulton, 143.
- Basic Ferric Acetate Test:** Acetates; Inadequacy of the — for. L. J. Curtman and B. R. Harris, 342.
- Basins:** Silvered glass — in place of platinum cathodes; Electro-Analysis using. J. Gewecke, 255.

- Beans:** Cyanogenetic —. Kohn-Abrest, 174.
- Beer:** Nitrogen in —; Distribution of. J. S. Sharpe, 360.
- Biochemical Reactions:** Pyrocatechol, quinol, and resorcinol; — for distinguishing. J. Wolff, 280.
- Biological Examination.** Honey; — of. J. Gadamer and K. Laske, 361.
- Biological Products:** Butyric acid in —; Separation and estimation of. I. K. Phelps and H. E. Palmer, 245.
- Biological Products:** Lactic acid in —; The identification and estimation of— I. K. Phelps and H. E. Palmer, 87.
- Bitumens:** Natural —; Relations in composition of the different forms of. C. F. Mabery, 398.
- Bituminous and Tarry Substances:** Sulphur monochloride on — and hydrocarbon oils; Action of. J. V. Meigs, 332.
- Bivalent Metal Sulphates:** Conductivity method; Titration of some — by the. H. S. Harned, 155.
- Blacher Method:** Hardness in water; — for the estimation of. A. S. Behrman, 403.
- Black:** Pyrrole —. A. Angeli, 88.
- Blood:** Urine, faeces, and pathological fluids; Detection of — in. Thevenon and Rolland, 280.
- Blood:** Urine; Rhenolphthaleïn reagent for the detection of — in. E. Justin-Mueller, 280.
- Blue Pill:** Rose petals in —; The detection of. W. Partridge, 71.
- Boiled Oils and Varnishes:** Acid values of —; Errors in the estimation of. E. E. Ware and R. E. Christman, 21.
- Boiling Method:** Water-soluble arsenic in lead arsenate; — for estimation of. G. P. Gray and A. W. Christie, 53.
- Boric Acid Method:** Ammonia, by the —; Estimation of. L. Adler, 51.
- Boric Acid:** Special glasses; Estimation of — in. P. Nicolardot and J. Boudet, 284.
- Boron:** Boron-steel; Estimation of — in. C. Aschman, Jun., 54.
- Boron-Steel:** Boron in —; Estimation of. C. Aschman, Jun., 54.
- Bracken Fern:** Starch in —. A. E. Shipley, 144.
- Bran:** Flour and bread; Estimation of — in. R. Legendre, 356.
- Brazilian:** Oilseeds. E. R. Bolton and D. G. Hewer, 35.
- Bread:** Flour and —; Estimation of bran in. R. Legendre, 356.
- Brewery Laboratory:** Interferometer in the —. L. Adler and H. Lüers, 60.
- British Sands:** Glass-making; — suitable for. P. G. H. Boswell, H. F. Harwood, and A. A. Eldridge, 313.
- Bromine Content:** German potash salts; — of. L. W. Winkler, 373.
- Burettes:** Jets for —; Note on. J. H. Coste, 385.
- Butter:** Cottonseed products on the composition and properties of —; Effect of feeding. C. M. Eckles and L. S. Palmer, 389.
- Butter:** Vitamines and lipoids in — and margarine. J. de Ruiter, 13.
- Butyric Acid:** Biological products; Separation and estimation of. I. K. Phelps and H. E. Palmer, 245.
- Butyric, Valeric, and Caproic Acids:** Steam distillation; Studies in —; Part IV.: Propionic, —. H. D. Richmond, 125.
- By-Products:** Rice milling; — of. J. B. Reed and F. W. Liepsner, 393.
- Cacao:** Philippine —; Fermentation of. H. C. Brill, 389.
- Cacao Powder:** Fat in —; Estimation of. Keller, 47.
- Cacao Powder:** Shell in —; Detection of excess of. 14.
- Cacaos:** Alkalinity of —; Estimation of the, and examination of added alkaline materials. M. X. Roques, 391.

- Cadmium:** Zinc from —; Separation of, and estimation of — iodimetrically. E. J. Ericson, 346.
- Cæsium:** — and rubidium by fractional crystallisation of their alums; Separation of. P. E. Browning and S. R. Spencer, 55.
- Caffeine:** Theobromine and — in cocoa and chocolate; Estimation of. G. Savini, 84.
- Cake and Pastry:** — Order, 1917. Government Laboratory method for determination of amount of sugar present. 293.
- Calcite Inclusions:** Organic carbon in soils; Influence of — on the estimation of. E. C. Shorey and W. H. Fry, 332.
- Calcium:** Barium and strontium; Detection of — in the presence of. Z. Káraoglanow, 249.
- Calcium Carbonate:** Boiling water; Solubility of — in. A. Cavazzi, 368.
- Calcium Chloride:** Drying agent; Granular — as a. A. T. McPherson, 349.
- Calcium Chloride:** Drying agents; Efficiency of — sodium hydroxide, and potassium hydroxide as. G. P. Baxter and H. W. Starkweather, 26.
- Calcium:** Forage plants and animal carcasses; Estimation of — in ash of. S. B. Kuzirian, 26.
- Calcium Phosphates:** Citric acid; Solubility of — in. A. A. Ramsay, 311.
- Calorimetric Combustion:** Improvements in —; The heat of combustion of toluene. T. W. Richards and H. S. Davis, 220.
- Cane-Sugar:** Double polarisation; Simplified inversion process for the determination of — by. H. S. Walker, 276.
- Canned Foods:** Solution of tin by —; Adsorption of tin by proteins, and its relation to the. B. C. Goss, 208.
- Caproic, Propionic, Butyric, and Valeric Acids:** Steam distillation; Studies in. Part IV.: —. H. D. Richmond, 125.
- Carbohydrates:** Hydrolysis of casein; Influence of — on the accuracy of the Van Slyke method in the. E. B. Hart and B. Sure, 90.
- Carbohydrates:** Mixtures of four or more — involving oxidation with bromine; Methods for the estimation of. E. G. Wilson and W. R. G. Atkins, 190.
- Carbolic Acid:** Phenol in crude — and tar oils; Estimation of. J. M. Weiss and C. R. Downs, 330.
- Carbon:** Coal-tar; Estimation of free — in. P. Falciola, 246.
- Carbon Dioxide:** Air; Colorimetric method for the estimation of the — in. H. L. Higgins and W. M. Marriott, 92.
- Carbon:** Micro-combustion method for determination of — and hydrogen; Simplified. L. E. Wise, 404.
- Carbon:** Penfield Test for —. W. G. Mixer and F. J. Haigh, 220.
- Carbon:** Soils; Influence of calcite inclusions on the estimation of organic — in. E. C. Shorey and W. H. Fry, 332.
- Carbon:** Steel; Eggertz Test for combined — in. J. H. Whiteley, 366.
- Carbon:** Wood-tar pitches; Free — of. H. K. Benson and L. L. Davis, 212.
- Carbonates:** Estimation of —. J. F. Barker, 367.
- Casein:** Van Slyke Method in the hydrolysis of —; Influence of carbohydrates on the accuracy of the. E. B. Hart and B. Sure, 90.
- Cathodes:** Silvered glass basins in place of platinum —; Electro-Analysis using. J. Gewecke, 255.
- Ceylon:** Coconut toddy in —. K. C. Browning and C. T. Symons, 46.
- Chemical Analysis:** Methylene blue as a reagent in —; Use of. Application of the process to the detection and estimation of perchlorates in Chile saltpetre. A. Monnier, 51.
- Chemical and Physiological Detection:** Alkaloids in the same solution, — of several. E. Philippi, 177.

- Chemical Composition:** Vegetable ivory meal; —, digestibility, and feeding value of. C. L. Beals and J. B. Lindsey, 48.
- Chemical Valuation:** Adrenaline solutions; Physiological and — of. J. S. White, 143.
- Chemist:** Work of the Government Laboratory for the year ended March 31, 1916, with appendices; Report of the Government — upon the. 102.
- Chemistry:** Analytical — and its future. (Chandler Lecture, Columbia University, U.S.A.) W. F. Hillebrand, 184.
- Chemistry:** Modern Analytical —; Some lines of advance in the domain of. A. C. Chapman, 229.
- Chile Saltpetre:** Methylene blue as a reagent in chemical analysis; Use of. Application of the process to the detection and estimation of perchlorates in —. A. Monnier, 51.
- Chlorides:** Nitrate estimations in the presence of —. W. F. Gericke, 343.
- Chocolate:** Cocoa and —; Estimation of theobromine and caffeine in. G. Savini, 84.
- Chromic Acid:** Differential Iodimetry. II.: Titration of — in presence of ferric iron, and estimation of chromium in chromite. O. L. Barnebey, 250.
- Chromium:** Differential Iodimetry. II.: Titration of chromic acid in presence of ferric iron, and estimation of — in chromite. O. L. Barnebey, 250.
- Chromium:** Ferrochrome; Estimation of — in. W. Herwig, 179.
- Chromium:** Ferrochrome, steel, slags, etc., by the Permanganate Method; Estimation of — in. P. Koch, 180 and 284.
- Cider Vinegar:** Reducing substance in —; Volatile. R. W. Balcom, 142.
- Cinders:** Explosibility of pyrites; Determination of, and estimation of its available sulphur and sulphur in —. C. R. Gyzander, 368.
- Citrate Digestion:** Phosphorus pentoxide after —; Estimation of. O. C. Smith, 56.
- Citric Acid:** Calcium phosphates in —; Solubility of. A. A. Ramsay, 311.
- Citric Acid:** Pratt Method for estimation of —; Modification of the. J. J. Willaman, 20.
- Citric Acid:** Tartaric acid; Detection of — and. T. C. N. Broeksmit, 357.
- Coal Analysis:** Interpretation of —. E. G. Bailey, 145.
- Coal Gas:** Light oils in —; Determination of, and description of still for separating the light oils from the absorbing oil. D. H. Duvall, 50.
- Coal:** Solvents on —; Action of. A. Wahl, 282.
- Coal-Tar:** Free carbon in —; Estimation of. P. Falcicola, 246.
- Cobalt:** Cobaltic ammonium molybdate, tungstate, and vanadate. Estimation and separation of —. A. Carnot, 285.
- Cobalt:** Ores and alloys; A rapid method for estimating nickel and — in. Part I. W. R. Schoeller and A. R. Powell, 189.
- Cobalt:** Small quantities of —; Estimation of. A. D. Powell, 180.
- Cobaltic Ammonium Molybdate:** —, tungstate, and vanadate. Estimation and separation of cobalt. A. Carnot, 285.
- Cobalti-Nitrite Method:** Potash; — for estimation of. R. H. Haff and E. H. Schwartz, 372.
- Cocoa:** Added alkali in —; Detection and estimation of. X. Roques, 173.
- Cocoa:** Alkalinity of —. Arpin, 174.
- Cocca:** Theobromine and caffeine in — and chocolate; Estimation of. G. Savini, 84.
- Coconut Oil:** Mixtures; The differentiation of — and palm-kernel oil in. G. D. Elsdon, 298.
- Coconut Toddy:** Ceylon; — in. K. C. Browning and C. T. Symons, 46.

- Cod-Liver Oil Preparations:** Oil in malt and —; Rapid estimation of. H. D. Richmond and F. G. Hitchman, 175.
- Codeine:** Morphine from —; Microchemical distinction of. O. Tammann, 48.
- Colloidal Phenomenon:** Indicator in quantitative analysis; — as. J. F. Sacher, 250.
- Colorimetric Estimation:** Diphenylamine and diphenylbenzidine for —; Use of. L. Smith, 90.
- Colorimetric Method:** Carbon dioxide in air; — for the estimation of the. H. L. Higgins and F. M. Marriott, 92.
- Colorimetric Method:** Vanillin; Qualitative test and — for the estimation of. C. Estes, 208.
- Colorimetric Qualitative Reactions:** Volatile fatty acids; Method of steam distillation for the determination of, including a series of — for their identification. D. C. Dyer, 149.
- Colorimetric Test:** Organic impurities in sands; — for the determination of. D. A. Abrams and O. E. Harder, 217.
- Colorimetry:** Fallacies in —. W. M. Dehn, 348.
- Colostrum:** Proteins of the — and milk of the cow and their relations to serum proteins; Comparative study of the. C. Crowther and H. Raistrick, 17.
- Colour:** Reactions of aromatic aldehydes. P. Pooth, 147.
- Colour Test:** Palm oil; Crampton-Simons — for. A. H. Gill, 216.
- Colouring Matter:** Red torulæ; — of. A. C. Chapman, 143.
- Combined Galactose:** Free and —; Estimation of. A. W. Van der Haar, 23.
- Combined Sulphur:** Vulcanised rubber; Estimation of free and — in, and the rate of combination of sulphur with different types of plantation Para rubber. B. J. Eaton and F. W. F. Day, 91.
- Combustion:** Calorimetric —; Improvements in. The heat of — of toluene. T. W. Richards and H. S. Davis, 220.
- Combustion Engines:** Liquid fuels for internal —; Spontaneous ignition temperatures of. H. Moore, 148.
- Combustion Methods:** Laboratory (estimation of sulphur); — for use in the. J. Hewett, 94.
- Combustion:** Nitrosite — method for the direct estimation of rubber; Wet — in the. L. G. Wesson and E. S. Knorr, 217.
- Compensator:** Gas analysis; Improved — for. E. T. Gregg, 316.
- Condenser:** Movable —. Vigreux, 184.
- Conductivity Method:** Bivalent metal sulphates by the —; Titration of some. H. S. Harned, 155.
- Constants:** Cryoscopic — at elevated temperatures; Measurement of. J. H. Mathews, 317.
- Copper Method:** Amino-acids; Improvements in the — for estimating. P. A. Kober, 281.
- Copper Sulphate:** Algæ; Some experiences in the use of — in the destruction of. G. Embrey, 264.
- Copying-Ink Pencils:** Writing; — and the examination of their pigments in. C. A. Mitchell, 3.
- Corks:** Soxhlet and other extraction apparatus; Treatment of — used in. T. J. Ward, 326.
- Cotton Lint:** Mineral constituents of —. J. H. Barnes, 50.
- Cottonseed Products:** Butter; Effects of feeding — on the composition and properties of. C. M. Eckles and L. S. Palmer, 389.
- Counting:** Bacteria in water; Direct microscopical — of. B. E. Nelson, 209.
- Correction:** Total solids in evaporated milk; — required in applying the Babcock Formula to the estimation of. O. L. Evenson, 302.

- Cow:** Proteins of the colostrum and milk of the — and their relations to serum proteins; Comparative study of the. C. Crowther and H. Raistrick, 17.
- Crampton-Simons Colour Test:** Palm oil; — for. A. H. Gill, 216.
- Cream:** Milk and — Regulations: Amending Order (Government Orders). 109.
- Creatine and Creatinine Estimations:** Source of error in —; Impure picric acid as a. O. Folin and E. A. Doisy, 149.
- Creatinine Estimations:** Creatine and —; Impure picric acid as a source of error in. O. Folin and E. A. Doisy, 149.
- Cresylic Acid:** Phenol in commercial —; Estimation of. J. J. Fox and M. F. Barker, 329.
- Crucibles:** Platinum substitutes; Palladium-Gold — as. 288.
- Cryoscopic Constants:** Elevated temperatures; Measurement of — at. J. H. Mathews, 317.
- Cryoscopic Method:** Added water in milk; — for estimating. J. T. Keister, 392.
- Culture Media:** Bacteriological examination of water; Studies on the — employed in the. IV.: Neutral red lactose peptone media. E. M. Chamot and C. M. Sherwood, 331.
- Cyanogenetic:** Beans. Kohn-Abrest, 174.
- Cysts:** Wet stained preparations; Detection of protozoal — in fæces by means of. R. Donaldson, 245.
- Desiccants:** Efficiency of some common —; Comparison of the. M. V. Dover and J. W. Marden, 348.
- Desiccated Milk:** Analysis of —. C. Porcher, 244.
- Desiccator:** Drying by means of a current of air; — for. L. S. Pratt, 156.
- Detergent Action:** Soap; — of. S. U. Pickering, 141.
- Detinning:** Tin plate; — and analysis of. G. W. Heise and A. Clemente, 345.
- Dextrose:** Estimation of —. G. Frerichs and F. Mannheim, 363.
- Dextrose:** Lævulose in presence of —; Determination of. L. Loewe, 179.
- Digestibility:** Vegetable ivory meal; Chemical composition, —, and feeding value of. C. L. Beals and O. B. Lindsey, 48.
- Digestion:** Citrate —; Estimation of phosphorus pentoxide after —. O. C. Smith, 56.
- Dimethylaminophenyldimethylisopyrazolone:** — (pyramidone); Delicate test for. L. Guglielmelli, 47.
- Diphenylamine:** Colorimetric estimation; Use of — and diphenylbenzidine for. L. Smith, 90.
- Diphenylbenzidine:** Diphenylamine and — for Colorimetric estimation; Use of. L. Smith, 90.
- Drugs:** Emodin-containing —; Identification of. W. S. Hubbard, 277.
- Drugs:** Emodin; Qualitative identification of the — containing. G. D. Beal and R. Okey, 203.
- Drugs:** Narcotic and anæsthetic —; Tests for certain. E. H. Hankin, 174.
- Drying Agent:** Granular calcium chloride as a —. A. T. McPherson, 349.
- Drying Agents:** Calcium chloride, sodium hydroxide, and potassium hydroxide as —; Efficiency of. G. P. Baxter and H. W. Starkweather, 26.
- Drying:** Air; Desiccator for — by means of a current of. L. S. Pratt, 156.
- Duclaux Method:** Volatile acids; — for the estimation of. L. J. Gillespie and E. H. Walters, 399.
- Duclaux Method:** Volatile fatty acids; Note on the — for. A. R. Lamb, 214.
- Duclaux Method:** Volatile fatty acids; — for the estimation of the. F. W. Upton, H. M. Plum, and J. E. Schott, 214.

- Duclaux's Method:** Volatile fatty acids; — for the estimation of. F. W. J. Boekhout and J. J. O. de Vries, 149.
- Duclaux's Method.** Steam distillation; Studies in. Part V.: Some applications of —. H. D. Richmond, 133.
- Dusart and Blondlot's Method:** Phosphorus by —; Detection of, and its application to Toxicology. Preparation of pure zinc for the detection of phosphorus and arsenic. H. J. Lemkes, 183.
- Eggertz Test:** Combined carbon in steel; — for. J. H. Whiteley, 366.
- Electrically-Heated Chamber:** Gelatinisation temperatures of starches by means of an — on the microscope stage; Determination of. A. W. Dox and G. W. Roark, Jun., 221.
- Electro-Analysis:** Silvered glass basins in place of platinum cathodes; — using. J. Gewecke, 255.
- Electrometric Titration:** Change of oxidation potential; Apparatus for — depending on the. G. L. Kelley, J. R. Adams, and J. A. Wiley, 373.
- Electrometric Titration:** Zinc; — of. F. R. von Bichowsky, 346.
- Emodin-Containing Drugs:** —; Identification of. W. S. Hubbard, 277.
- Emodin:** Drugs containing —; Qualitative identification of the. G. D. Beal and R. Okey, 203.
- Emulsions:** Fluid suspensions, including bacterial —; General method of estimating the relative turbidity or opacity of. G. Dreyer and A. D. Gardner, 19.
- Engines:** Liquid fuels for internal combustion —; Spontaneous ignition temperatures of. H. Moore, 148.
- Enzyme:** Furfuroids of barley; Evidence of the existence in malt of an — hydrolysing the. J. L. Baker and H. F. E. Hulton, 143.
- Errata, 1917:** pp. 200, 202.
- Error:** Creatine and creatinine estimations; Impure picric acid as a source of — in. O. Folin and E. A. Doisy, 149.
- Errors:** Acid values of boiled oils and varnishes; — in the estimation of. E. E. Ware and R. E. Christman, 21.
- Essential Oils:** Pine; Optical activity of — from various species of. D. E. Tsakalotos, 308.
- Ether:** Water and alcohol in —; Estimation of. R. L. Perkins, 281.
- Explosibility:** Pyrites; Determination of — of, and estimation of its available sulphur and sulphur in cinders. C. R. Gyzander, 368.
- Explosives:** Gravimetric reagent for analysis of substances used in —; "Nitron" as. W. C. Cope and J. Barab, 216.
- Explosives:** Nitrogen in —; Estimation of. B. Oddo, 400.
- Extract:** Vanillin in vanilla —; Estimation of. A. W. Dox and G. P. Plaisance, 17.
- Extraction Apparatus:** Corks used in Soxhlet and other apparatus; Treatment of. T. J. Ward, 326.
- Extraction:** Lactic acid for its estimation; — of. E. Ohlsson, 25.
- Extraction:** Phosphoric acid in soils; Method of — as affecting the estimation of. H. Hale and W. L. Hartley, 27.
- Extractor:** Soxhlet —; Modified. D. F. Twiss and W. McCowan, 318.
- Extracts:** Amino-nitrogen in worts, —, etc.; Gasometric estimation of. R. Enslender, 150.
- Extracts:** Meat products, particularly —; Estimation of sugar in. W. B. Smith, 16.
- Fæces:** Blood in urine, —, and pathological fluids; Detection of. Thevenon and Rolland, 280.

- Faces:** Protozoal cysts in — by means of wet stained preparations; Detection of. R. Donaldson, 245.
- Fat:** Cacao powder; Estimation of — in. Keller, 47.
- Fat:** Milk products; Estimation of — in certain. C. K. Francis and D. G. Morgan, 391.
- Fats:** Margarine prepared from hydrogenated —; Water-Content of. K. Brauer, 49.
- Fats:** Medicinal —; Oxidisability values of. G. Issoglio, 301.
- Fats:** Melting-Point of —. 29.
- Fats:** Oils and —; Thermal Values of. II.: The Maumené Value. J. W. Marden and M. V. Dover, 401.
- Fats:** Oils, —, and waxes; The estimation of unsaponifiable matter in. J. M. Wilkie, 200.
- Fats:** Varrentrapp Reaction in — and oils; Importance of the. W. Schrauth, 91.
- Fats:** Varrentrapp Reaction in — and soaps; Importance of the. W. Schrauth, 179.
- Fatty Acids:** Aromatic amines on —; Action of. E. de Conno, 213.
- Fatty Acids:** Duclaux Method for volatile —; Note on the. A. R. Lamb, 214.
- Fatty Acids:** Menhaden Oil —; Composition of. E. Twitchell, 334.
- Fatty Acids:** Steam distillation for the determination of volatile —, including a series of colorimetric qualitative reactions for their identification; Method of. D. C. Dyer, 149.
- Fatty Acids:** Volatile —; Duclaux Method for the estimation of the. F. W. Upton, H. M. Plum, and J. E. Schott, 214.
- Fatty Acids:** Volatile —; Duclaux's Method for the estimation of. F. W. J. Boekhoet and J. J. O. de Vries, 149.
- Fatty Oils:** Some —. S. Uchida, 21.
- Feeding-Staffs:** Germany during the War; New — used in. M. Kling, 356.
- Feeding Value:** Vegetable ivory meal; Chemical composition, digestibility, and — of. C. L. Beals and J. B. Lindsey, 48.
- Fermentation Mixtures:** Alcohol in —; Accurate aeration method for the estimation of. A. W. Dox and A. R. Lamb, 46.
- Fermented Milk Products:** "Laban Raieb" of Egypt and the "Miciuratu" of Sardinia; —: The. A. Sanna, 15.
- Fern:** Bracken —; Starch in. A. E. Shipley, 144.
- Ferric Iron:** Differential Iodimetry. II.: Titration of chromic acid in presence of —, and estimation of chromium in chromite. O. L. Barnebey, 250.
- Ferricyanides:** Thiocyanates, ferrocyanides, and —, in the detection of iodides with palladium; Interference of. L. J. Curtman and B. R. Harris, 156.
- Ferrochrome:** Chromium in —; Estimation of. W. Herwig, 179.
- Ferrochrome:** Chromium in —, steel, slags, etc., by the Permanganate Method; Estimation of. P. Koch, 180 and 284.
- Ferrocyanides:** Thiocyanates, —, and ferricyanides in the detection of iodides with palladium; Interference of. L. J. Curtman and B. R. Harris, 156.
- Fillers:** Rubber; Aniline method for the estimation of mineral — in. O. H. Klein, J. H. Link, and F. Gottsch, 216.
- Filter:** Flask. J. A. Shaw, 374.
- Filter-Paper:** Reducing matter extractable from —. R. S. McBride and J. A. Scherrer, 309.
- Filtering Media:** Soluble filters and —. J. M. Wilkie and H. S. Anderson, 186.
- Filters:** Filtering media; Soluble — and. J. M. Wilkie and H. S. Anderson, 186.
- Fish-Liver Oils:** Hydrocarbons; On the natural occurrence in certain — of high percentages of. A. C. Chapman, 161.

- Fish-Liver Oils:** Spinacene: A new hydrocarbon from certain —. A. C. Chapman, 141.
- Flask:** Filter —. J. A. Shaw, 374.
- Flour:** Bran in — and bread; Estimation of. R. Legendre, 356.
- Flour:** Quality in wheat —; Nitrogen in amino form as estimated by formol titration, in relation to some other factors measuring. C. O. Swanson and E. L. Tague, 175.
- Fluid Suspensions:** Relative turbidity or opacity of — including bacterial emulsions; General method of estimating the. G. Dreyer and A. D. Gardner, 19.
- Fluorides:** Fluorine in soluble —; Estimation of. J. G. Dinwiddie, 93 and 181.
- Fluorine:** Soluble fluorides; Estimation of — in. J. G. Dinwiddie, 93 and 181.
- Food and Drugs Analysis, Abstracts:** 13, 46, 84, 140, 173, 203, 243, 276, 301, 327, 356, 389.
- Food:** Gelatin in —; Possibilities of Gulaman Dagat as a substitute for. A. H. Wells, 391.
- Food Substances:** Sugar; Tables for the analysis of — containing. Syrups, sweets, honey, etc. H. Lajoux and L. Ronnet, 396.
- Food-Supply:** United Kingdom; The — of the (Government Report), 96.
- Food Values:** New unit for the estimation of —. H. Suchting, 327.
- Foods:** Iron and aluminium (in —, etc.); Estimation of small quantities of. R. Berg, 182.
- Foods:** Saccharin in —; Estimation of. C. B. Gnadinger, 304.
- Foods:** Solution of tin by canned —; Adsorption of tin by proteins, and its relation to the. B. C. Goss, 208.
- Forage Plants:** Calcium in ash of — and animal carcasses; Estimation of. S. B. Kuzirian, 26.
- Formic Acid:** Report on Preservatives: —. A. F. Seeker, 302.
- Formol Titration:** Wheat flour; Nitrogen in amino form as estimated by —, in relation to some other factors measuring quality in. C. O. Swanson and E. L. Tague, 175.
- Fractional Crystallisation:** Cæsium and rubidium by — of their alums; Separation of. P. E. Browning and S. R. Spencer, 55.
- Free and Combined Galactose:** Estimation of —. A. W. Van der Haar, 23.
- Free and Combined Sulphur:** Vulcanised rubber; Estimation of — in, and the rate of combination of sulphur with different types of plantation Para rubber. B. J. Eaton and F. W. F. Day, 91.
- Free Sulphuric, Nitric, and Picric Acids:** Estimation of — in the presence of each other. F. W. Richardson, 95.
- Fruits:** Acid content of —. W. D. Bigelow and P. B. Dunbar, 357.
- Fuel Research Board:** Government Report. Report of the —. 405.
- Fuels:** Internal combustion engines; Spontaneous ignition temperatures of liquid — for. H. Moore, 148.
- Fuller's Earth:** Oil industry; —, and its valuation for the. T. D. Richert, 340.
- Fungi:** Pentoses and pentosans by —; Utilisation of. L. A. Hawkins, 210.
- Furfuroids:** Enzyme hydrolysing the — of barley; Evidence of the existence in malt of an. J. L. Baker and H. F. E. Hulton, 143.
- Galactose:** Free and combined —; Estimation of. A. W. Van der Haar, 23.
- Gallium:** Qualitative separation and detection of —. P. E. Browning and L. E. Porter, 402.
- Galvanised Iron:** Stripping and analysis of —. G. W. Heise and A. Clemente, 342.
- Galvanised Iron:** Testing —. J. C. Witt, 342.

- Gas Absorption Apparatus:** Simple — H. D. Richmond and E. Hembrough, 254.
- Gas Analysis:** Compensator for —; Improved. E. T. Gregg, 316.
- Gas Analysis:** Reagents for use in —. V.: Relative advantages of sodium and potassium hydroxides in preparation of alkaline pyrogallol. R. P. Anderson, 27.
- Gas:** Light oils in coal —; Determination of, and description of, still for separating the light oils from the absorbing oil. D. H. Duvall, 50.
- Gas Meter:** Laboratory —. E. G. Beckett, 157.
- Gases:** Power —; Composition of. W. A. Tookey, 246.
- Gases:** Rare — (Argon); Estimation of. A. Sieverts and R. Brandt, 52.
- Gases:** Water; Absorption of atmospheric — by. J. H. Coste, 341.
- Gasoline:** Motor —; Testing of. E. W. Dean, 333.
- Gasoline Vapour:** Air; Estimation of — in. R. P. Anderson, 215.
- Gasometric Estimation:** Amino-nitrogen in worts, extracts, etc.; — of. R. Emslander, 150.
- Gelatin:** Gulaman Dagat as a substitute for — in food; Possibilities of. A. H. Wells, 391.
- Gelatinisation Temperatures:** Starches by means of an electrically-heated chamber on the microscope stage; Determination of — of. A. W. Dox and G. W. Roark, Jun., 221.
- German Potash Salts:** Bromine content of —. L. W. Winkler, 373.
- Germany:** Feeding-stuffs used in — during the War; New. M. Kling, 356.
- Ghee:** Note on —. K. C. Browning and M. Parthasarathy, 140.
- Ginger:** Pungent principle of —. Part I.: The chemical characters and decomposition products of Thresh's "Gingerol." A. Lapworth, L. K. Pearson, and F. A. Royale, 358.
- Ginger:** Pungent principles of —. Part I.: A new ketone, Zingerone (4-hydroxy-3-methoxy-phenylethyl methyl ketone), occurring in —. H. Nomura, 357.
- Ginger:** Pungent principles of —. Part II.: Synthetic preparations of Zingerone, Methylzingerone, and some related acids. A. Lapworth and F. H. Wykes, 359.
- "Gingerol":** Ginger; Pungent principle of. Part I.: The chemical characters and decomposition products of Thresh's —. A. Lapworth, L. K. Pearson, and F. A. Royale, 358.
- Glass Basins:** Platinum cathodes; Electro-Analysis using silvered — in place of. J. Gewecke, 255.
- Glass:** British —-making sands: The substitution of some British sands for foreign sands in the manufacture of high-grade —. C. J. Peddle, 287.
- Glass-Making:** British sands suitable for —. P. G. H. Boswell, H. F. Harwood, and A. A. Eldridge, 313.
- Glass-Making Sands:** British —: The substitution of some British sands for foreign sands in the manufacture of high-grade glass. C. J. Peddle, 287.
- Glass:** New acid sodium phosphate and its action on —, porcelain, silica, platinum, and nickel vessels. J. H. Smith, 254.
- Glasses:** Boric acid in special —; Estimation of. J. Nicolardot and J. Boudet, 284.
- Glycyrrhizin:** Licorice root and *Succus Liquiritiæ*; Comparison of methods for the estimation of — in. A. Linz, 359.
- Government Laboratory:** Work of the — for the year ended March 31, 1916, with appendices; Report of the Government Chemist upon the. 102.
- Government Laboratory Order:** The Cake and Pastry Order, 1917. 293.
- Government Orders:** Milk and Cream Regulations: Amending Order. 109.
- Government Orders:** Public Health (Regulations as to Food) Act, 1907. 111.
- Government Report:** Fuel Research Board; Report of the, 405.

- Government Report:** Scientific and Industrial Research; Report of the Committee of Council for. 375.
- Gravimetric Analysis:** Precipitates in —; Contamination of. Solid Solution and adsorption *v.* higher-order compounds. G. M. Smith, 318.
- Gravimetric Reagent:** Substances used in explosives; "Nitron" as — for analysis of. W. C. Cope and J. Barab, 216.
- Gum:** Sugars in the presence of —; Estimation of. G. Savini, 86.
- Gulaman Dagat:** Gelatin in food; Possibilities of — as a substitute for. A. H. Wells, 391.
- Gutzeit Test:** Arsenic; Application of the — to Works' estimations of. C. Hollins, 307.
- Gymnosperms:** Mannan content of the —. A. W. Schorger, 362.
- Halogens:** Organic compounds; Estimation of — in. J. F. Lemp and H. J. Broderson, 399.
- Hardness:** Water; Blacher Method for the estimation of — in. A. S. Behrman, 403.
- Headache Powders:** Milk-sugar in —; Estimation of. R. Miller, 243.
- High-Speed Steels:** Manganese in —; Estimation of. C. T. Nesbitt, 152.
- Honey:** Biological examination of —. J. Gadamer and K. Laske, 361.
- Honey:** Substances containing levulose; The analysis of — and other. W. R. G. Atkins, 12.
- Honey:** Tables for the analysis of food substances containing sugar. Syrups, sweets, —, etc. H. Lajoux and L. Ronnet, 396.
- Horse Chestnuts:** Acorns and —; Analytical examination of. J. L. Baker and H. F. E. Hulton, 351, 383.
- Hydrocarbon:** Fish-liver oils; Spinacene: A new — from certain. A. C. Chapman, 141.
- Hydrocarbon Oils:** Sulphur monochloride on bituminous and tarry substances and —; Action of. J. V. Meigs, 332.
- Hydrocarbons:** High percentages of —; On the natural occurrence in certain fish-liver oils of. A. C. Chapman, 161.
- Hydrocyanic Acid:** Detection of —. G. W. Anderson, 178.
- Hydrogen:** Carbon and —; Simplified micro-combustion method for determination of. L. E. Wise, 404.
- Hydrogen Peroxide:** Hypochlorite solutions used for sterilising water; Volumetric analysis of, and a rapid method for the estimation of —. A. Bury, 181.
- Hydrogen Peroxide:** Sensitive reaction for —. G. Denigès, 403.
- Hydrogen Sulphide:** Water; Estimation of — in. L. W. Winkler, 26.
- Hydrogenated Fats:** Margarines prepared from —; Water-Content of. K. Brauer, 49.
- Hydrolysis:** Casein; Influence of carbohydrates on the accuracy of the Van Slyke Method in the — of. E. B. Hart and B. Sure, 90.
- Hypochlorite Solutions:** Water; Volumetric Analysis of — used for sterilising, and a rapid method for the estimation of hydrogen peroxide. A. Bury, 181.
- Ignition Temperatures:** Liquid fuels for internal combustion engines; Spontaneous — of. H. Moore, 148.
- Impurities:** Sands; Colorimetric test for the determination of organic — in. D. A. Abrams and O. E. Harder, 217.
- Incinerating:** Organic materials for the estimation of potassium, Method of —. P. L. Blumenthal, A. M. Peter, D. Q. Healey, and E. J. Gott, 372.
- Indigo:** Volumetric estimation of —; Rapid. S. M. Jones and W. Spaans, 23.

- Inflammability:** Petroleum spirit at low temperatures; Note on the — of. J. H. Coste, 168.
- Indicator:** Quantitative Analysis; Colloidal phenomenon as — in. J. F. Sacher, 250.
- Inorganic Analysis, Abstracts:** 26, 51, 92, 152, 179, 219, 246, 284, 309, 339, 366, 402.
- Institute of Chemistry:** 68, 158, 292.
- Interferometer:** Brewery laboratory; — in the. L. Adler and H. Lüers, 60.
- Inversion Process:** Cane-sugar by double polarisation; Simplified — for the determination of. H. S. Walker, 276.
- Iodic Acid:** Morphine with —; Titration and estimation of. J. N. Rakshit, 393.
- Iodides:** Thiocyanates, ferrocyanides, and ferricyanides in the detection of — with palladium; Interference of. L. J. Curtman and B. R. Harris, 156.
- Iodimetric Estimation:** Sulphur dioxide and sulphites; — of. J. B. Ferguson, 220.
- Iodimetry:** Differential. II.: Titration of chromic acid in presence of ferric iron, and estimation of chromium in chromite. O. L. Barnebey, 250.
- Iodimetry:** Differential —. III.: Estimation of available oxygen in soluble and precipitated oxidised forms of manganese. O. L. Barnebey and W. C. Hawes, 251.
- Ion:** Perchloric —; Microchemical reactions of the. G. Denigès, 311.
- Iron:** Differential Iodimetry. II.: Titration of chromic acid in presence of ferric —, and estimation of chromium in chromite. O. L. Barnebey, 250.
- Iron:** Galvanised —; Stripping and analysis of. G. W. Heise and A. Clemente, 342.
- Iron:** Galvanised —; Testing. J. C. Witt, 342.
- Iron:** —, thallium, zirconium, and titanium; Qualitative separation and detection of. P. E. Browning, G. S. Simpson, and L. E. Porter, 54.
- Iron:** Lead; Separation of — from. J. F. Sacher, 251.
- Iron:** Nickel in the presence of zinc and —; Estimation of. S. Rothschild, 182.
- Iron:** Phosphorus in cast —; Estimation of. A. Cavazzi, 371.
- Iron:** Small quantities of — and aluminium (in foods, etc.); Estimation of. R. Berg, 182.
- Iron:** Sulphur in — and steel; Estimation of. H. B. Pulsifer, 58.
- Italian Oil of Turpentine:** *Pinus pinaster*; — from. M. Palazzo, 177.
- Ivory Meal:** Vegetable —; Chemical composition, digestibility, and feeding value of. C. L. Beals and J. B. Lindsey, 48.
- Jets:** Burettes; Note on — for. J. H. Coste, 385.
- Ketone:** Ginger; Pungent principles of. Part I.: A new —, Zingerone (4-hydroxy-3-methoxy-phenylethyl methyl —), occurring in ginger. H. Nomura, 357.
- “Laben Raieb”:** Fermented milk products: The — of Egypt and the “Miciuratu” of Sardinia. A. Sanna, 15.
- Laboratory:** Brewery —; Interferometer in the. L. Adler and H. Lüers, 60.
- Laboratory:** Combustion methods for use in the — (estimation of sulphur) J. Hewett, 94.
- Laboratory:** Gas meter. E. G. Beckett, 157.
- Laboratory Porcelain:** Chemical —. H. Watkin, 349.
- Lactic Acid:** Biological products; The identification and estimation of — in. I. I. K. Phelps and H. E. Palmer, 87.
- Lactic Acid:** Extraction of — for its estimation. E. Ohlsson, 25.

- Lactose Peptone Media:** Studies on the culture media employed in the bacteriological examination of water. IV.: Neutral red ——. E. M. Chamot and C. M. Sherwood, 331.
- Lævulose:** Dextrose; Determination of — in presence of. L. Loewe, 179.
- Lævulose:** Honey and other substances containing —; The analysis of. W. R. G. Atkins, 12.
- Law Report:** Jones *v.* Robinson, 157.
- Law Report:** ——. The sale of milk: Need of a new Act. Grigg *v.* Smith, 323.
- Lead:** Antimonial —; Analysis of. C. R. McCabe, 310.
- Lead Arsenate:** Water-soluble arsenic in —; Boiling method for estimation of. G. P. Gray and A. W. Christie, 53.
- Lead Arsenate:** Water-soluble arsenic in —; Rapid method for estimation of. H. A. Scholz and P. J. Waldstein, 340.
- Lead:** Iron from —; Separation of. J. F. Sacher, 251.
- Lead:** Red —; Solution of. G. Torossian, 27.
- Leather:** Total sulphur in —; Estimation of. L. E. Levi and A. C. Orthmann, 151.
- Lecithin:** Egg-yolk; Non-Existence of — in. N. A. Barberi, 204.
- l-Leucine:** Sweet clover silage; Occurrence of — in. G. P. Plaisance, 395.
- Light Oils:** Coal gas, and description of still for separating the — from the absorbing oil; Determination of — in. D. H. Duvall, 50.
- Lime:** Acetate of —; Analysis of. S. H. Collins, 152.
- Lindo-Gladding Method:** Potash by the —; Estimation of. P. L. Hibbard, 312.
- Lint:** Cotton —; Mineral constituents of. J. H. Barnes, 50.
- Lipase:** Seeds of *Spartium junceum*; — in the. M. Raffo, 246.
- Lipoids:** Butter and margarine; Vitamines and — in. J. de Ruiter, 13.
- Liquid Fuels:** Internal combustion engines; Spontaneous ignition temperatures of — for. H. Moore, 148.
- Liquids:** Pycnometer for —; Vacuum-Jacketed. F. Hall, 350.
- Liquids:** Refractive index of —; New method for determining the. A. Ledoux, 185.
- Liquorice Root:** Glycyrrhizin in — and in *Succus Iiquiritiæ*; Comparison of methods for the estimation of. A. Linz, 359.
- Lithium:** Alkali metals; Separation of — from the other. S. Palkin, 54.
- Lithium:** Strontium and — in water; Estimation of. S. D. Averitt, 345.
- Litmus:** Milk cultures; Substitute for — for use in. W. M. Clark and H. A. Lubs, 331.
- Lubricating Oils:** Examination of —. R. Dubrisay, 363.
- Magnesium:** Estimation of —; Rapid method for the. N. Busvold, 182.
- Magnesium Salts:** Nitrates in waters containing much —; Note on the phenolsulphonic acid method for. M. S. Nichols, 344.
- Magnesium:** Titration of —. F. W. Bruckmiller, 251.
- Malt:** Enzyme hydrolysing the furfuroids of barley; Evidence of the existence in — of an. J. L. Baker and H. F. E. Hulton, 143.
- Malt Preparations:** Cod-liver oil and —; Rapid estimation of oil in. H. D. Richmond and F. G. Hitchman, 176.
- Manganese:** Differential Iodimetry. III.: Estimation of available oxygen in soluble and precipitated oxidised forms of —. O. L. Barnebey and W. C. Hawes, 251.
- Manganese:** Estimation of —. Travers, 343.
- Manganese:** High-speed steels; Estimation of — in. C. T. Nesbitt, 152.
- Manganese Ores:** Pyrolusite and other oxidised —; Analysis of. O. L. Barnebey and G. M. Bishop, 313.

- Mannan Content:** Gymnosperms; — of the. A. W. Schorger, 362.
- Mannitol:** Silage; Occurrence and significance of — in. A. W. Dox and G. P. Plaisance, 394.
- Margarine:** Butter and —; Vitamines and lipoids in. J. de Ruiter, 13.
- Margarines:** Hydrogenated fats; Water-Content of — prepared from. K. Brauer, 49.
- Maumené Value:** Oils and fats; Thermal Values of, II.: The —. J. W. Marden and M. V. Dover, 401.
- Meal:** Vegetable ivory —; Chemical composition, digestibility, and feeding value of. C. L. Beals and J. B. Lindsey, 48.
- Meat Products:** Sugar in —, particularly extracts; Estimation of. W. B. Smith, 16.
- Media:** Culture — employed in the bacteriological examination of water. IV.: Neutral red lactose peptone —. E. M. Chamot and C. M. Sherwood, 331.
- Media:** Filtering —; Soluble filters and. J. M. Wilkie and H. S. Anderson, 186.
- Media:** Very viscous —; Measurement of absolute viscosity of. S. E. Sheppard, 316.
- Medicinal Fats:** Oxidisability values of —. G. Issoglio, 301.
- Melting-Point:** Fats; — of. 29.
- Menhaden Oil Fatty Acids:** Composition of —. E. Twitchell, 334.
- Mercurial:** Viscosimeter. F. M. Lidstone, 187.
- Mercuric Oxide:** Standard in alkalimetry; Yellow — as a. G. Ineze, 253.
- Mercury:** Organic compounds; The quantitative estimation of — in. J. E. Marsh and O. G. Lye, 84.
- Mercury Salts:** Toxicological purposes; Detection of traces of — for. K. C. Browning, 210.
- Mercury:** Toxicological cases; Detection of — in. C. L. Spica, 397.
- Mesothorium:** Monazite; Estimation of thorium and — in. K. L. Kithil, 55.
- Metabolic Nitrogen:** Estimation of —; Methods for the. E. B. Forbes, C. E. Mangels, and L. E. Morgan, 397.
- Metal Sulphates:** Bivalent — by the conductivity method; Titration of some. H. S. Harned, 155.
- Metals:** Lithium from the other alkali —; Separation of. S. Palkin, 54.
- Meter:** Gas —; Laboratory. E. G. Beckett, 157.
- Methylene Blue:** Chemical analysis; Use of — as a reagent in. Application of the process to the detection and estimation of perchlorates in Chile saltpetre. A. Monnier, 51.
- Methylene Blue:** Microscopic stains derived from —; New. L. Tribondeau and J. Dubreuil, 211.
- Methylzingerone:** Ginger; Pungent principles of. Part II.: Synthetic preparations of Zingerone, —, and some related acids. A. Lapworth and F. H. Wykes, 359.
- “Miciuratu”:** Fermented milk products: the “Laben Raieb” of Egypt and the — of Sardinia. A. Sanna, 15.
- Microchemical Distinction:** Morphine from codeine; — of. O. Tunmann, 48.
- Microchemical Reactions:** Perchloric ion; — of the. G. Denigès, 311.
- Micro-Combustion Method:** Carbon and hydrogen; Simplified — for determination of. L. E. Wise, 404.
- Microscope Stage:** Electrically-heated chamber on the —; Determination of gelatinisation temperatures of starches by means of an. A. W. Dox and G. W. Roark, Jun., 221.
- Microscopic Stains:** Methylene blue; New — derived from. L. Tribondeau and J. Dubreuil, 211.
- Microscopical Counting:** Bacteria in water; Direct — of. B. E. Nelson, 209.

- Milk:** Added water in —; Cryoscopic method for estimating. J. T. Keister, 392.
- Milk:** Added water in —; Detection of. H. Durand, 302.
- Milk:** Analysis of —. E. Ackermann, 328.
- Milk:** Composition of —; The. P. S. Arup, H. C. Huish, and H. D. Richmond, 118.
- Milk Cultures:** Litmus for use in —; Substitute for. W. M. Clark and H. A. Lubs, 331.
- Milk:** Desiccated —; Analysis of. C. Porcher, 244.
- Milk:** Examination of —. G. Wilhelm, 328.
- Milk:** Law Report. The Sale of —: Need of a new Act. Grigg v Smith, 323.
- Milk:** Pasteurised — from raw —; Differentiation of. I.: Reductases. R. E. Lee and M. G. Mellon, 278.
- Milk Products:** Fat in certain —; Estimation of. C. K. Francis and D. G. Morgan, 391.
- Milk Products:** Fermented —: The "Laben Raieb" of Egypt and the "Miciuratu" of Sardinia. A. Sanna, 15.
- Milk:** Proteins of the colostrum and — of the cow and their relations to serum proteins; Comparative study of the. C. Crowther and H. Raistrick, 17.
- Milk:** Regulations; — and Cream. Amending Order (Government Orders). 109.
- Milk:** Sale of —; The. Andrews v. Luckin (Law Report). 739.
- Milk-Sugar:** Headache powders; Estimation of — in. R. Miller, 243.
- Milk:** Total solids in evaporated —; Correction required in applying the Babcock Formula to the estimation of. O. L. Evenson, 302.
- Mill Purposes:** Starch for —; Determination of the viscosity of. G. M. MacNider, 350.
- Mineral and Organic Acids:** Mineral phosphates and superphosphates in dilute —; Solubility of. A. Aita, 312.
- Mineral Constituents:** Cotton lint; — of. J. H. Barnes, 50.
- Mineral Fillers:** Rubber; Aniline method for the estimation of — in. O. H. Klein, J. H. Link, and F. Gottsch, 216.
- Mineral Matter:** Raw rubber; Percentage of resin (— and nitrogen) in. 364.
- Mineral Phosphates:** Dilute mineral and organic acids; Solubility of — and superphosphates in. A. Aita, 312.
- Modified Shrewsbury-Knapp Process:** Reichert-Polenske and —, A combined. G. D. Elsdon, 295.
- Molybdenum:** Potassium iodate; Estimation of — by. G. S. Jamieson, 153.
- Molybdenum Residues:** Recovery of —. V. Lenher and M. P. Schultz, 343.
- Molybdenum:** Steel; Volumetric estimation of — and vanadium in. Travers, 369.
- Monazite:** Thorium and mesothorium in —; Estimation of. K. L. Kithil, 55.
- Morphine:** Codeine; Microchemical distinction of — from. O. Tunmann, 48.
- Morphine:** Iodic acid; Titration and Estimation of — with. J. N. Rakshit, 393.
- Morphine:** Opium-Poisoning: Detection of — in acute and chronic cases. J. Webster, 226.
- Motor Gasoline:** Testing of —. E. W. Dean, 333.
- Naphtha:** Xylene in solvent —; Estimation of. P. E. Spielmann and F. B. Jones, 248.
- Naphtholphthaleïn:** Thymolphthaleïn and —; New applications of. J. Moir, 248.
- Naphthols:** Titanic acid dissolved in sulphuric acid; Differentiation of the two — by means of. G. Denigès, 26.
- Narcotic Drugs:** Anæsthetic and —; Tests for certain. E. H. Hankin, 174.
- Natural Bitumens:** Different forms of —; Relations in composition of the. C. F. Mabery, 398.

- Nichrome:** Cast —; Analysis of. E. W. Reid, 286.
- Nickel:** Ores and Alloys; A rapid method for estimating — and cobalt in. Part I. W. R. Schoeller and A. R. Powell, 189.
- Nickel Vessels:** Glass, porcelain, silica, platinum, and —; New acid sodium phosphate, and its action on. J. H. Smith, 254.
- Nickel:** Zinc and iron; Estimation of — in the presence of. S. Rothschild, 182.
- Nicotine:** Tobacco; Estimation of — in. A. Tingle and A. A. Ferguson, 177.
- Ninhydrin Reaction:** Mechanism of the —. J. M. Retinger, 308.
- Nitrate Estimations:** Chlorides; — in the presence of. W. F. Gericke, 343.
- Nitrate:** Sewage by means of o-tolidine; Estimation of — in. E. B. Phelps and H. L. Shoub, 369.
- Nitrates:** Waters containing much magnesium salts; Note on the phenolsulphonic acid method for. M. S. Nichols, 344.
- Nitric and Picric Acids:** Free sulphuric, — in the presence of each other; Estimation of. F. W. Richardson, 95.
- Nitro-Compounds:** Nitrogen in —; Estimation of. A. P. Sachs, 363.
- Nitrogen:** Beer; Distribution of — in. J. S. Sharpe, 360.
- Nitrogen:** Explosives; Estimation of — in. B. Oddo, 400.
- Nitrogen:** Metabolic —; Methods for the estimation of. E. B. Forbes, C. E. Mangels, and L. E. Morgan, 397.
- Nitrogen:** Nitro-compounds; Estimation of — in. A. P. Sachs, 363.
- Nitrogen:** Raw rubber; Percentage of resin (mineral matter and —) in. 364.
- Nitrogen:** Total —; Estimation of. E. Justin-Mueller, 150.
- Nitrogen:** Urine; Use of potassium persulphate in the determination of total — in. L. C. Scott and R. G. Myers, 304.
- Nitrogen:** Wheat flour; — in amino form as estimated by formol titration, in relation to some other factors measuring quality in. C. O. Swanson and E. L. Tague, 175.
- “Nitron”:** Substances used in explosives; — as gravimetric reagent for analysis of. W. C. Cope and J. Barab, 216.
- Nitrosite Combustion Method:** Rubber; Wet combustion in the — for the direct estimation of. L. G. Wesson and E. S. Knorr, 217.
- Nitrotoluenes:** Stannous chloride reduction method for estimating —. E. de W. S. Colver and E. B. R. Prideaux, 247.
- Novaspirin:** Aspirin; Estimation of —, alone or when mixed with. R. Miller, 234.
- “Nux Vomica”:** Strychnine in —; Estimation of. H. R. Jensen, 16.

**Obituary Notices:**

- Organic Compounds:** Mercury in —; The quantitative estimation of. J. E. Marsh and O. G. Lye, 84.
- Organic Compounds:** Silver in —; Estimation of. H. J. Lucas and A. R. Kemp, 400.
- Organic Impurities:** Sands; Colorimetric test for the determination of — in. D. A. Abrams and O. E. Harder, 217.
- Organic Materials:** Potassium; Method of incinerating — for the estimation of. P. L. Blumenthal, A. M. Peter, D. J. Healey, and E. J. Gott, 372.
- o-Tolidine:** Nitrate in sewage by means of —; Estimation of. E. B. Phelps and H. L. Shoub, 369.
- Oxalate-Iodine Method:** Paris-Green analysis; — for. C. A. Peters and L. E. Fielding, 56.
- Oxidation Potential:** Electrometric titration depending on the change of —; Apparatus for. G. L. Kelley, J. R. Adams, and J. A. Wiley, 373.
- Oxides of Nitrogen:** Ozone and — in the atmosphere; Determination of. F. L. Usher and B. S. Rao, 370.
- Oxidisability Values:** Medicinal fats; — of. G. Issoglio, 301.
- Oxygen:** Differential Iodimetry. III.: Estimation of available — in soluble and precipitated oxidised forms of manganese. O. L. Barnebey and W. C. Hawes, 251.
- Oxygen:** Rain-water; Dissolved — in. E. H. Richards, 310.
- Ozone:** Atmosphere; Determination of — and oxides of nitrogen in the. F. L. Usher and B. S. Rao, 370.

- Ozone:** Estimation of —. David, 183.
- Ozone:** — (in air); Estimation of. David, 344.
- Palladium-Gold Crucibles:** Platinum substitutes; — as. 288.
- Palladium:** Thiocyanates, ferrocyanides, and ferricyanides in the detection of iodides with —; Interference of. L. J. Curtman and B. R. Harris, 156.
- Palm-Kernel Oil:** Coconut oil and — in mixtures; The differentiation of. G. D. Elsdon, 298.
- Palm-Oil:** Crampton-Simons Colour Test for —. A. H. Gill, 216.
- Para Rubber:** Sulphur with different types of plantation —; Estimation of free and combined sulphur in vulcanised rubber, and the rate of combination of. B. J. Eaton and F. W. F. Day, 91.
- Paris-Green Analysis:** Oxalate-Iodide method for —. C. A. Peters and L. E. Fielding, 56.
- Pasteurised Milk:** Raw milk; Differentiation of — from. I.: Reductases. R. E. Lee and M. G. Mellon, 278.
- Pathological Fluids:** Blood in urine, fæces, and —; Detection of. Thevenon and Rolland, 280.
- Pectic Substances:** Plants; — of. S. B. Schryver and D. Haynes, 144.
- Pemberton Volumetric Method:** Phosphoric acid; — or estimating. P. M. Shuey, 287.
- Pencils:** Writing; Copying-Ink — and the examination of their pigments in. C. A. Mitchell, 3.
- Penfield Test:** Carbon; — for. W. G. Mixter and F. L. Haigh, 220.
- Pentosans:** Pentoses and — by fungi; Utilisation of. L. A. Hawkins, 210.
- Pentoses:** Fungi; Utilisation of — and pentosans by. L. A. Hawkins, 211.
- Pepper:** Official Orders. Commonwealth of Australia. Importation of —. 255.
- Perborates:** Perchlorates, periodates, persulphates, percarbonates, and —; Reactions for distinguishing between. A. Monnier, 93.
- Percarbonates:** Perchlorates, periodates, persulphates, —, and perborates; Reactions for distinguishing between. A. Monnier, 93.
- Perchlorate:** Potassium as —; Estimation of. G. P. Baxter and M. Kobayashi, 155.
- Perchlorates:** Methylene blue as a reagent in chemical analysis; Use of. Application of the process to the detection and estimation of — in Chile saltpetre. A. Monnier, 51.
- Perchlorates:** Periodates, persulphates, percarbonates, and perborates; Reactions for distinguishing between — and. A. Monnier, 93.
- Perchloric Ion:** Microchemical reactions of the —. G. Denigès, 311.
- Periodates:** Perchlorates, —, persulphates, percarbonates, and perborates; Reactions for distinguishing between. A. Monnier, 93.
- Permanganate Method:** Chromium in ferrochrome, steel, slags, etc., by the —; Estimation of. P. Koch, 180.
- Permanganate Method:** Chromium in ferrochromium, steel and slags, by the —; Estimation of. P. Koch, 284.
- Peroxidase:** Ultrafiltration; Reactions of — purified by. A. Bach, 18.
- Peroxide:** Hydrogen —; Sensitive reaction for. G. Denigès, 403.
- Peroxide:** Water; Volumetric analysis of hypochlorite solutions used for sterilising, and a rapid method for the estimation of hydrogen —. A. Bury, 181.
- Persulphates:** Perchlorates, periodates, —, percarbonates, and perborates; Reactions for distinguishing between. A. Monnier, 93.
- Petroleum Spirit:** Low temperatures, Note on the inflammability of — at. J. H. Coste, 168.

- Petroleum:** Sulphur in —; Detection and estimation of. C. K. Francis and C. W. Crawford, 283.
- Phenacetin:** Acetanilide; Estimation of — when mixed with. R. Miller, 243.
- Phenacetin:** Salol and acetanilide, or of salol and — in their mixtures; Estimation of. B. Salkover, 16.
- Phenol:** Commercial cresylic acid; Estimation of — in. J. J. Fox and M. F. Barker, 329.
- Phenol:** Crude carbolic acid and tar oils; Estimation of — in. J. M. Weiss and C. R. Downs, 330.
- Phenol:** Tar oil phenols; Estimation of — in. R. Masse and H. Leroux, 212.
- Phenolphthalein Reagent:** Blood in urine; — for the detection of. E. Justin-Mueller, 280.
- Phenols:** Identification of —. E. E. Reid, 151.
- Phenols:** Phenol in tar oil —; Estimation of. R. Masse and H. Leroux, 212.
- Phenolsulphonic Acid Method:** Nitrates in waters containing much magnesium salts; Note on the — for. M. S. Nichols, 344.
- Philippine Cacao:** Fermentation of —. H. C. Brill, 389.
- Phosphates:** Citric acid; Solubility of calcium — in. A. A. Ramsay, 311.
- Phosphates:** Mineral — and superphosphates in dilute mineral and organic acids; Solubility of. A. Aita, 312.
- Phosphates:** Phosphoric acid and (alkaline) — by alkalimetric methods; Estimation of. J. H. Smith, 253.
- Phosphor-Tin:** Tin and phosphorus in —; Volumetric estimation of. R. E. Lee, W. H. Fegely, and F. H. Reichel, 345.
- Phosphoric Acid:** Alkalimetric methods; Estimation of — and (alkaline) phosphates by. J. H. Smith, 253.
- Phosphoric Acid:** Ammonium molybdate from the filtrates obtained in the estimation of —; Recovery of. H. Kinder, 287.
- Phosphoric Acid:** Estimating —; Pemberton Volumetric Method for. P. M. Shuey, 287.
- Phosphoric Acid:** Soils; Method of extraction as affecting the estimation of — in. H. Hale and W. L. Hartley, 27.
- Phosphoric Acid:** Stannic chloride, Removal of — by. L. Gattermann and H. Schindhelm, 95.
- Phosphoric and Arsenic Acids:** Vanadium from — and from uranium; Separation of. W. A. Turner, 60.
- Phosphorus:** Cast iron; Estimation of — in. A. Cavazzi, 371.
- Phosphorus Pentoxide:** Citrate digestion; Estimation of — after. O. C. Smith, 56.
- Phosphorus:** Tin and — in phosphor-tin; Volumetric estimation of. R. E. Lee, W. H. Fegely, and F. H. Reichel, 345.
- Phosphorus:** Toxicology; Detection of — by Dusart and Blondlot's Method, and its application to. Preparation of pure zinc for the detection of — and arsenic. H. J. Lemkes, 183.
- Physiological and Chemical Valuation:** Adrenaline solutions; — of. J. S. White, 143.
- Physiological Detection:** Alkaloids in the same solution; Chemical and — of several. E. Philippi, 177.
- Picric Acid:** Creatine and creatinine estimations; Impure — as a source of error in. O. Folin and E. A. Doisy, 149.
- Picric and Nitric Acids:** Free sulphuric, — in the presence of each other; Estimation of. F. W. Richardson, 95.
- Pigments:** Copying-Ink pencils and the examination of their — in writing. C. A. Mitchell, 3.

- Pill:** Rose petals in blue —; The detection of. W. Partridge, 71.
- Pine:** Essential oils from various species of —; Optical activity of. D. E. Tsakalotos, 308.
- Pinus pinaster:*** Italian oil of turpentine from —. M. Palazzo, 177.
- Pitches:** Wood-tar —; Free carbon of. H. K. Benson and L. L. Davis, 212.
- Plantation Para Rubber:** Free and combined sulphur in vulcanised rubber, and the rate of combination of sulphur with different types of —; Estimation of. B. J. Eaton and F. W. F. Day, 91.
- Plants:** Forage — and animal carcasses; Estimation of calcium in ash of. S. B. Kuzirian, 26.
- Plants:** Pectic substances of —. S. B. Schryver and D. Haynes, 144.
- Platinised Asbestos:** Platinum sulphide; New method of precipitating, and analysis of —. V. N. Ivanov, 154.
- Platinum:** Alloys to replace —; New. F. A. Fahrenwald, 347.
- Platinum Cathodes:** Electro-Analysis using silvered glass basins in place of —. J. Gewecke, 255.
- Platinum:** Sodium phosphate and its action on glass, porcelain, silica, —, and nickel vessels; New acid. J. H. Smith, 254.
- Platinum Substitutes:** Palladium-Gold crucibles as —. 288.
- Platinum Sulphide:** Platinised asbestos; New method of precipitating — and analysis of. V. N. Ivanov, 154.
- Poisoning:** Morphine in acute and chronic cases; Opium- —: Detection of. J. Webster, 226.
- Polarimetric Estimation:** Starch in the presence of other optically active substances; — of. C. Baumann and J. Grossfeld, 218 and 365.
- Polarisation:** Cane-sugar by double —; Simplified inversion process for the determination of. H. S. Walker, 276.
- Porcelain:** Glass, —, silica, platinum, and nickel vessels; New acid sodium phosphate and its action on. J. H. Smith, 254.
- Porcelain:** Laboratory —; Chemical. H. Watkin, 349.
- Potash:** Cobalti-Nitrite Method for estimation of —. R. C. Haff and E. H. Schwartz, 372.
- Potash:** Lindo-Gladding Method; Estimation of — by the. P. L. Hibbard, 312.
- Potash Salts:** German —; Bromine content of. L. W. Winkler, 373.
- Potassium and Sodium Hydroxides:** Gas analysis; Reagents for use in. V.: Relative advantages of — in preparation of alkaline pyrogallol. R. P. Anderson, 27.
- Potassium Hydroxide:** Calcium chloride, sodium hydroxide, and — as drying agents; Efficiency of. G. P. Baxter and H. W. Starkweather, 26.
- Potassium:** Incinerating organic materials for the estimation of —; Method of. P. L. Blumenthal, A. M. Peter, D. J. Healey, and E. J. Gott, 372.
- Potassium Iodate:** Molybdenum by —; Estimation of. G. S. Jamieson, 153.
- Potassium:** Perchlorate, Estimation of — as. G. P. Baxter and M. Kobayashi, 155.
- Potassium Persulphate:** Urine; Use of — in the determination of total nitrogen in. L. C. Scott and R. G. Myers, 304.
- Powder:** Shell in cacao —; Detection of excess of. 14.
- Powder:** Fat in cacao —; Estimation of. Keller, 47.
- Powders:** Milk-sugar in headache —; Estimation of. R. Miller, 243.
- Power Gases:** Composition of —. W. A. Tookey, 246.
- Pratt Method:** Citric acid; Modification of the — for estimation of. J. J. Willaman, 20.
- Precipitates:** Gravimetric Analysis; Contamination of. Solid solution and adsorption *v.* higher-order compounds. G. M. Smith, 318.

- Precipitates:** Washing of —; Device for automatic and intermittent. E. C. Lathrop, 317.
- Preservatives:** Report on —: Formic Acid. A. F. Seeker, 302.
- President:** Address of the —; Annual. 115.
- Press:** Sampling —. W. B. Clark, 374.
- Propionic, Butyric, Valeric, and Caproic Acids:** Steam distillation; Studies in — Part IV.: —. H. D. Richmond, 125.
- Proteins:** Serum —; Comparative study of the — of the colostrum and milk of the cow and their relations to. C. Crowther and H. Raistrick, 17.
- Proteins:** Solution of tin by canned foods; Adsorption of tin by —, and its relation to the. B. C. Goss, 208.
- Proteolytic Action:** Certain methods for the study of —; Examination of. H. C. Sherman and D. E. Neun, 18.
- Protozoal Cysts:** Wet stained preparations; Detection of — in faeces by means of. R. Donaldson, 245.
- Pungent Principle:** Ginger; — of. Part I.: The chemical characters and decomposition products of Thresh's "Gingerol." A. Lapworth, L. K. Pearson, and F. A. Royale, 358.
- Pungent Principles:** Ginger; — of. Part I.: A new ketone, Zingerone (4-hydroxy-3-methoxy-phenylethyl methyl ketone) occurring in ginger. H. Nomura, 357.
- Pungent Principles:** Ginger; — of. Part II.: Synthetic preparations of Zingerone, Methylzingerone, and some related acids. A. Lapworth and F. H. Wykes, 359.
- Pycnometer:** Liquids; Vacuum-Jacketed — for. F. Hall, 350.
- Pyrites:** Explosibility of —; Determination of, and estimation of its available sulphur and sulphur in cinders. C. R. Gyzander, 368.
- (Pyramidone):** Dimethylaminophenyldimethylisopyrazolene —; Delicate test for. L. Guglielmelli, 47.
- Pyrocatechol:** —, quinol, and resorcinol; Biochemical reactions for distinguishing. J. Wolff, 280.
- Pyrogallol:** Gas analysis; Reagents for use in. V.: Relative advantages of sodium and potassium hydroxides in preparation of alkaline —. R. P. Anderson, 27.
- Pyrolusite:** Oxidised manganese ores; Analysis of — and other. O. L. Barnebey and G. M. Bishop, 313.
- Pyrrole:** Black. A. Angeli, 88.
- Qualitative Test:** Vanillin; — and colorimetric method for the estimation of. C. Estes, 208.
- Quantitative Analysis:** Indicator in —; Colloidal phenomenon as. J. F. Sacher, 250.
- Quinol:** Pyrocatechol, —, and resorcinol; Biochemical reactions for distinguishing. J. Wolff, 280.
- Rain-Water:** Oxygen in —; Dissolved. E. H. Richards, 310.
- Rape Oil:** Olive oil; Detection of — in. R. Biazzo and S. Vigdorcik, 85.
- Rare Gases:** — (Argon); Estimation of. A. Sieverts and R. Brandt, 52.
- Reagent:** Methylene blue as a — in chemical analysis; Use of. Application of the process to the detection and estimation of perchlorates in Chile saltpetre. A. Monnier, 51.
- Reagents:** Gas analysis; — for use in. V.: Relative advantages of sodium and potassium hydroxides in preparation of alkaline pyrogallol. R. P. Anderson, 27.
- Red Lead:** Solution of —. G. Torossian, 27.

- Red Torulæ:** Colouring matter of —. A. C. Chapman, 143.
- Reducing Matter:** Filter-paper; — extractable from. R. S. McBride and J. A. Scherrer, 309.
- Reducing Substance:** Cider vinegar; Volatile — in. R. W. Balcom, 142.
- Reductases:** Pasteurised milk from raw milk; Differentiation of. I.: —. R. E. Lee and M. G. Mellon, 278.
- Refractive Index:** Liquids; New Method for determining the — of. A. Ledoux, 185.
- Reichert-Polenske and Modified Shrewsbury-Knapp Process:** Combined —; A. G. D. Elsdon, 295.
- Report:** Food-Supply of the United Kingdom; The. 96.
- Report:** Fuel Research Board; — of the (Government Report). 405.
- Report:** Law —. Jones v. Robinson, 157.
- Report:** Law —. The Sale of Milk. Andrews v. Luckin. 379.
- Report:** Preservatives; — on: Formic Acids. A. F. Seeker, 302.
- Report:** Scientific and Industrial Research; — of the Committee of Council for (Government Report). 375.
- Residues:** Molybdenum —; Recovery of. V. Lenher and M. P. Schultz, 343.
- Resin (Mineral Matter and Nitrogen):** Raw rubber; Percentage of — in. 364.
- Resorcinol:** Detection of —. F. C. Krauskopf and G. Ritter, 15.
- Resorcinol:** Pyrocatechol, quinol, and —; Biochemical reactions for distinguishing. J. Wolff, 280.
- Reviews of Books:**
- Analytical Chemistry:** —. Vol. I.: Qualitative. Treadwell and Hall, 256.
- Applied Chemistry:** Progress of —; Annual Reports of the Society of Chemical Industry on the. 318.
- Artificial:** Dyestuffs. A. R. J. Ramsey and H. C. Weston, 378.
- Bacteriological Examination:** Food and Water; The — of. W. G. Savage, 159.
- Bituminous Materials:** Laboratory Manual of — for the Use of Students in Highway Engineering. P. Hubbard, 320.
- Cane-Sugar Manufacturers:** Chemists; A Handbook for — and their. G. L. Spencer, 66.
- Chemical Analysis:** Quantitative —; Textbook of. A. C. Cumming and S. A. Kay, 112.
- Chemical:** Discovery and Invention in the Twentieth Century. W. A. Tilden, 223.
- Chemistry:** Elementary Practical —. Part II.: Analytical —, Qualitative and Quantitative. F. Clowes and J. B. Coleman, 65.
- Chemists' Pocket Book:** Bayley's —. Eighth Edition edited by R. Ensollo, E. Spon, and F. N. Spon, 319.
- Chemist's Year-Book:** —; The. 1917. Edited by F. W. Atack, assisted by L. Whinyates, 406.
- Coal-Tar:** — and Ammonia. G. Lunge, 289.
- Diary:** Scientist's Reference-Book and —, 1917; The. 114.
- Elements:** Rarer —; Introduction to the. P. E. Browning, 322.
- Explosives:** —. A. Marshall, 259. Vol. II., 321.
- Food:** Water; The Bacteriological Examination of — and W. G. Savage, 159.
- Gas Chemists':** Summary, 1915: The —. A. V. Hendrickson, 67.
- Materia Medica:** Therapeutics; — and. J. Mitchell Bruce and W. J. Dilling, 64.
- Ontario Nickel Commission:** Report of the Royal —, with Appendix. 376.
- Public Health:** (Regulations as to Food) Act, 1907 (Government Orders). 111.

**Reviews of Books—continued.**

- Qualitative Analysis:** Elementary ——. B. Dales and O. L. Barnebey, 30.
- Quantitative Chemical Analysis:** Textbook of ——. A. C. Cumming and S. A. Kay, 112.
- Rice Milling:** By-Products of ——. J. B. Reed and F. W. Liepsner, 393.
- Rose Petals:** Blue pill; The detection of — in. W. Partridge, 71.
- Rubber:** Direct estimation of —; Wet combustion in the nitrosite combustion method for the. L. G. Wesson and E. S. Knorr, 217.
- Rubber:** Free and combined sulphur in vulcanised —; Estimation of, and the rate of combination of sulphur with different types of plantation Para —. B. J. Eaton and F. W. F. Day, 91.
- Rubber:** Mineral fillers in —; Aniline method for the estimation of. O. H. Klein, J. H. Link, and F. Gottsch, 216.
- Rubber:** Resin (mineral matter and nitrogen) in raw —; Percentage of. 364.
- Rubidium:** Cæsium and —, by fractional crystallisation of their alums; Separation of. P. E. Browning and S. R. Spencer, 55.
- Saccharin:** Alimentary substances; Detection and estimation of — in. A. Bonis, 303.
- Saccharin:** Foods; Estimation of — in. C. B. Gnadinger, 304.
- Salol:** — and acetanilide, or of — and phenacetin, in their mixtures; Estimation of. B. Salkover, 16.
- Saltpetre:** Methylene blue as a reagent in chemical analysis; Use of. Application of the process to the detection and estimation of perchlorates in Chile —. A. Monnier, 51.
- Salts:** Mercury — for toxicological purposes; Detection of traces of. K. C. Browning, 210.
- Salts:** Potash —; Bromine content of German. L. W. Winkler, 373.
- Sampling:** Press. W. B. Clark, 374.
- Sands:** British glass-making —: The substitution of some British — for foreign — in the manufacture of high-grade glass. C. J. Peddle, 287.
- Sands:** Glass-making; British — suitable for. P. G. H. Boswell, H. F. Harwood, and A. A. Eldridge, 313.
- Sands:** Organic impurities in —; Colorimetric test for the determination of. D. A. Abrams and O. E. Harder, 217.
- Seeds:** *Spartium junceum*; Lipase in the — of. M. Raffo, 246.
- Sensibility:** General method of extraction of alkaloids from water; — of the. L. Launoy, 362.
- Sensitive Reaction:** Apomorphine; — for. L. P. J. Palet, 48.
- Sensitive Reaction:** Hydrogen peroxide; — for. G. Denigès, 403.
- Serum Proteins:** Proteins of the colostrum and milk of the cow and their relations to —; Comparative study of the. \* C. Crowther and H. Raistrick, 17.
- Sewage:** Nitrate in — by means of *o*-tolidine; Estimation of. E. B. Phelps and H. L. Shoub, 369.
- Shell:** Cacao powder; Detection of excess of — in. 14.
- Shrewsbury and Knapp Process:** Coconut oil; The — for the estimation of. G. D. Elsdon and C. R. Bagshawe, 72.
- Silage:** *l*-Leucine in sweet clover —; Occurrence of. G. P. Plaisance, 395.
- Silage:** Mannitol in —; Occurrence and significance of. A. W. Dox and G. P. Plaisance, 394.
- Silica:** Commercial Analysis; Estimation of — in. F. G. Hawley, 315.
- Silica:** Glass, porcelain, —, platinum, and nickel vessels; New acid sodium phosphate and its action on. J. H. Smith, 254.

- Silver:** Organic compounds; Estimation of. — in. H. J. Lucas and A. R. Kemp, 400.
- Slags:** Chromium in ferrochrome, steel, —, etc., by the Permanganate Method, Estimation of. P. Koch, 180 and 284.
- Soap:** Alkali hydroxide in —; Estimation of free —. V. A. Izmailski, 140.
- Soap:** Detergent action of —. S. U. Pickering, 141.
- Soap Making:** Oils for —; Rapid method of testing the suitability of. R. Lecocq, 279.
- Soaps:** Fats and —; Importance of the Varrentrapp Reaction in. W. Schrauth, 179.
- Soaps:** Testing —; Specifications for and methods of. Dept. of Commerce, U.S.A. 205.
- Society of Public Analysts and Other Analytical Chemists, Proceedings of the:** 2, 35, 69, 115, 161, 189, 226, 264, 293, 326, 351, 382.
- Sodium and Potassium Hydroxides:** Gas analysis; Reagents for use in. V.: Relative advantages of — in preparation of alkaline pyrogallol. R. P. Anderson, 27.
- Sodium Hydroxide:** Calcium chloride, —, and potassium hydroxide as drying agents; Efficiency of. G. P. Baxter and H. W. Starkweather, 26.
- Sodium Phosphate:** Glass, porcelain, silica, platinum, and nickel vessels; New acid — and its action on. J. H. Smith, 254.
- Soils:** Calcite inclusions on the estimation of organic carbon in —; Influence of. E. C. Shorey and W. H. Fry, 332.
- Soils:** Phosphoric acid in —; Method of extraction as affecting the estimation of. H. Hale and W. L. Hartley, 27.
- Soluble Filters:** Filtering media; — and. J. M. Wilkie and H. S. Anderson, 186.
- Solution:** Alkaloids in the same —; Chemical and physiological detection of. E. Philippi, 177.
- Solvents:** Coal; Action of — on. A. Wahl, 282.
- Solvents:** Cryoscopic — at elevated temperatures; Measurement of. J. H. Mathews, 317.
- Soxhlet Apparatus:** Corks used in — and other extraction apparatus; Treatment of. T. J. Ward, 326.
- Soxhlet Extractor:** Modified —. D. F. Twiss and W. McCowan, 318.
- Spartium Junceum:** Seeds of —; Lipase in the. M. Raffo, 246.
- Specifications:** Soaps; — for and methods of testing. Dept. of Commerce, U.S.A. 205.
- Spinacene:** Fish-liver oils; —. A new hydrocarbon from certain. A. C. Chapman, 141.
- Spirit:** Petroleum — at low temperatures; Note on the inflammability of. J. H. Coste, 168.
- Spontaneous Ignition Temperatures:** Liquid fuels for internal combustion engines; — for. H. Moore, 148.
- Stained Preparations:** Protozoal cysts in faeces by means of wet —; Detection of. R. Donaldson, 245.
- Stains:** Methylene blue; New microscopic — derived from. L. Tribondeau and J. Dubreuil, 211.
- Standard:** Alkalimetry; Yellow mercuric oxide as a — in. G. Ince, 253.
- Stannic Chloride:** Phosphoric acid by —; Removal of. L. Gattermann and H. Schindhelm, 95.
- Stanniferous Wolfram:** Tin and tungsten in —; Separation of. Travers, 404.
- Stannous Chloride Reduction Method:** Nitrotoluenes; — for estimating. E. de W. S. Colver and E. B. R. Prideaux, 247.

- Starch:** Bracken fern; — in. A. E. Shipley, 144.
- Starch:** Estimation of —; Direct method for the. T. von Fellenberg, 279.
- Starch:** Mill purposes; Determination of the viscosity of — for. G. M. MacNider, 350.
- Starch:** Optically active substances; Polarimetric estimation of — in the presence of other. C. Baumann and J. Grossfeld, 218 and 365.
- Starches:** Electrically-heated chamber on the microscope stage; Determination of gelatinisation temperatures of — by means of an. A. W. Dox and G. W. Roark, Jun., 221.
- Steam Distillation:** Studies in —. Part IV.: Propionic, butyric, valeric, and caproic acids. H. D. Richmond, 125.
- Steam Distillation:** Studies in —. Part V.: Some applications of Duclaux's Method. H. D. Richmond, 133.
- Steam Distillation:** Volatile fatty acids; Method of — for the determination of, including a series of colorimetric qualitative reactions for their identification. D. C. Dyer, 149.
- Steel:** Chromium in ferrochrome, —, slags, etc., by the Permanganate Method; Estimation of. P. Koch, 180 and 284.
- Steel:** Combined carbon in —; Eggertz Test for. J. H. Whiteley, 366.
- Steel:** Molybdenum and vanadium in —; Volumetric estimation of. Travers, 369.
- Steel:** Sulphur in iron and —; Estimation of. H. B. Pulsifer, 58.
- Steels:** Manganese in high-speed —; Estimation of. C. T. Nesbitt, 152.
- Sterilising:** Hypochlorite solutions used for — water; Volumetric analysis of, and a rapid method for the estimation of hydrogen peroxide. A. Bury, 181.
- Still:** Light oils in coal gas, and description of — for separating the light oils from the absorbing oil; Determination of. D. H. Duvall, 50.
- Strontium:** Calcium in the presence of barium and —; Detection of. Z. Karaglanow, 249.
- Strontium:** Water; Estimation of — and lithium in. S. D. Averitt, 345.
- Strychnine:** "Nux Vomica"; Estimation of — in. H. R. Jensen, 16.
- Sublimed Sulphur:** Adulteration; — and its. Fonzes-Diacon, 57.
- Succinic Acid:** Estimation of —. E. C. Grey, 335.
- Succus Liquiritiæ:** Glycyrrhizin in liquorice root and in —; Comparison of methods for the estimation of. A. Linz, 359.
- Sugar:** Food substances containing —; Tables for the analysis of. Syrups, Sweets, Honey, etc. H. Lajoux and L. Ronnet, 396.
- Sugar:** Meat products, particularly extracts; Estimation of — in. W. B. Smith, 16.
- Sugars:** Aldose —; New method for the estimation of. J. Bougault, 307.
- Sugars:** Gum; Estimation of — in the presence of. G. Savini, 86.
- Sulphate:** Small quantities of —; Quantitative estimation of. H. J. Hamburger, 57.
- Sulphates:** Free sulphuric acid in the presence of —; Estimation of small quantities of. E. Vulquin and M. Entat, 221.
- Sulphide Sulphur:** Small quantities of —; Quantitative estimation of. W. A. Drushel and C. M. Elston, 58.
- Sulphites:** Sulphur dioxide and —; Iodimetric estimation of. J. B. Ferguson, 220.
- Sulphonated Oils:** Analysis of —. R. Hart, 401.
- Sulphur:** Adulteration; Sublimed — and its. Fonzes-Diacon, 57.
- Sulphur Dioxide:** Sulphites; Iodimetric estimation of — and. J. B. Ferguson, 220.
- Sulphur:** Iron and steel; Estimation of — in. H. B. Pulsifer, 58.

- Sulphur:** Leather; Estimation of total — in. L. E. Levi and A. C. Orthmann, 151.
- Sulphur Monochloride:** Bituminous and tarry substances and hydrocarbon oils; Action of — on. J. V. Meigs, 332.
- Sulphur:** Petroleum; Detection and estimation of — in. C. K. Francis and C. W. Crawford, 283.
- Sulphur:** Pyrites; Determination of explosibility of, and estimation of its available — and — in cinders. C. R. Gyzander, 368.
- Sulphur:** Sulphide —; Quantitative Estimation of small quantities of. W. A. Drushel and C. M. Elston, 58.
- Sulphur:** Use in the laboratory (estimation of —); Combustion methods for J. Hewett, 94.
- Sulphur:** Vulcanised rubber, Estimation of free and combined — in, and the rate of combination of — with different types of plantation Para rubber. B. J. Eaton and F. W. F. Day, 91.
- Sulphuric Acid:** Free — in the presence of sulphates; Estimation of small quantities of. E. Vulquin and M. Entat, 221.
- Sulphuric Acid:** Strength of —; The rapid estimation of the. H. D. Richmond and J. E. Merreywether, 273.
- Sulphuric Acid:** Two naphthols by means of titanio acid dissolved in —; Differentiation of the. G. Denigès, 26.
- Sulphuric, Nitric, and Picric Acids:** Free — in the presence of each other; Estimation of. F. W. Richardson, 95.
- Sulphurous Acid:** Preparation of —. E. Hart, 222.
- Superphosphates:** Mineral phosphates and — in dilute mineral and organic acids; Solubility of. A. Aita, 312.
- Suspensions:** Relative turbidity or opacity of fluid — including bacterial emulsions; General method of estimating the. G. Dreyer and A. D. Gardner, 19.
- Sweet Clover Silage:** *l*-Leucine in sweet —; Occurrence of. G. P. Plaisance, 395.
- Sweets:** Food substances containing sugar; Tables for the analysis of. Syrups, —, honey, etc. H. Lajoux and L. Ronnet, 396.
- Syrups:** Food substances containing sugar; Tables for the analysis of. —, sweets, honey, etc. H. Lajoux and L. Ronnet, 396.
- Tar Oil Phenols:** Phenol in —; Estimation of. R. Masse and H. Leroux, 212.
- Tar Oils:** Phenol in crude carbolic acid and —; Estimation of. J. M. Weiss and C. R. Downs, 330.
- Tarry Substances:** Bituminous and — and hydrocarbon oils; Action of sulphur monochloride on. J. V. Meigs, 332.
- Tartaric Acid:** Citric acid and —; Detection of. T. C. N. Broeksmit, 357.
- Tellurium:** Arsenic; Qualitative separation and detection of — and. P. E. Browning, G. S. Simpson, and L. E. Porter, 53.
- Temperatures:** Cryoscopic solvents at elevated —; Measurement of. J. H. Mathews, 317.
- Temperatures:** Liquid fuels for internal combustion engines; Spontaneous ignition temperatures of. H. Moore, 148.
- Temperatures:** Petroleum spirit at low —; Note on the inflammability of. J. H. Coste, 168.
- Thallium:** Iron, —, zirconium, and titanium; Qualitative separation and detection of. P. E. Browning, G. S. Simpson, and L. E. Porter, 54.
- Theobromine:** Cocoa and chocolate; Estimation of — and caffeine in. G. Savini, 84.
- Theobromine:** Estimation of —. L. Debourdeaux, 244.
- Theobromine:** Estimation of —; Note on the. N. Radford and G. Brewer, 274.

- Thermal Values:** Oils and fats; — of. II.: The Maumené Value. J. W. Marden and M. V. Dover, 401.
- "Thinners":** Oil Varnishes; Determination of volatile — in. A. de Waele and F. Smith, 170.
- Thiocyanates:** Iodides with palladium; Interference of —, ferrocyanides, and ferricyanides in the detection of. L. J. Curtman and B. R. Harris, 156.
- Thorium:** Monazite; Estimation of — and mesothorium in. K. L. Kithil, 55.
- Thymolphthaleïn:** Naphtholphthaleïn; New applications of — and. J. Moir, 248.
- Tin:** Phosphor-tin; Volumetric estimation of — and phosphorus in. R. E. Lee, W. H. Fegely, and F. H. Reichel, 345.
- Tin Plate:** Detinning and analysis of —. G. W. Heise and A. Clemente, 345.
- Tin:** Proteins; Adsorption of — by, and its relation to the solution of — by canned foods. B. C. Goss, 208.
- Tin:** Stanniferous wolfram; Separation of — tungsten in. Travers, 404.
- Tin:** Volumetric estimation of —. R. J. Hallett, 28.
- Titanic Acid:** Two naphthols by means of — dissolved in sulphuric acid; Differentiation of the. G. Denigès, 26.
- Titanium:** Iron, thallium, zirconium, and —; Qualitative separation and detection of. P. E. Browning, G. S. Simpson, and L. E. Porter, 54.
- Tobacco:** Nicotine in —; Estimation of. A. Tingle and A. A. Ferguson, 177.
- Toddy:** Coconut — in Ceylon. K. C. Browning and C. T. Symons, 46.
- Toluene:** Calorimetric combustion; Improvements in: The heat of combustion of —. T. W. Richards and H. S. Davis, 220.
- Torulæ:** Red —; Colouring matter of. A. C. Chapman, 143.
- Total Solids:** Evaporated milk; Correction required in applying the Babcock Formula to the estimation of — in. O. L. Evenson, 302.
- Toxicological Cases:** Mercury in —; Detection of. C. L. Spica, 397.
- Toxicological Purposes:** Mercury salts for —; Detection of traces of. K. C. Browning, 210.
- Toxicology:** Phosphorus by Dusart and Blondlot's Method, and its application to —; Detection of. Preparation of pure zinc for the detection of phosphorus and arsenic. H. J. Lemkes, 183.
- Trinitrotoluene:** Urinary test for — (T.N.T.): Illness and the early diagnosis of cases suffering from — absorption. B. Moore, 89.
- Tungstate:** Cobaltic ammonium molybdate, —, and vanadate. Estimation and separation of cobalt. A. Carnot, 285.
- Tungsten Derivatives:** Certain —; Analysis of. O. R. Sweeney, 59.
- Tungsten:** Tin and — in stanniferous wolfram; Separation of. Travers, 404.
- Turbidity:** Fluid suspensions including bacterial emulsions; General method of estimating the relative — or opacity of. G. Dreyer and A. D. Gardner, 19.
- Ultrafiltration:** Peroxidase purified by —; Reactions of. A. Bach, 18.
- Unsaponifiable Matter:** Oils, fats, and waxes; The estimation of — in. J. M. Wilkie, 200.
- Uranium:** Phosphoric and arsenic acids and from —; Separation of vanadium from. W. A. Turner, 60.
- Urinary Test:** Trinitrotoluene (T.N.T.); — for. Illness and the early diagnosis of cases suffering from trinitrotoluene absorption. B. Moore, 89.
- Urine:** Blood in —, fæces, and pathological fluids; Detection of. Thevenon and Rolland, 280.
- Urine:** Blood in —; Phenolphthaleïn reagent for the detection of. E. Justin-Mueller, 280.
- Urine:** Total nitrogen in —; Use of potassium persulphate in the determination of. L. C. Scott and R. G. Myers, 304.

- Vacuum-Jacketed Pycnometer:** Liquids; — for. F. Hall, 350.
- Valeric and Caproic Acids:** Steam distillation; Studies in —. Part IV.: Propionic, butyric, —. H. D. Richmond, 125.
- Van Slyke Method:** Casein; Influence of carbohydrates on the accuracy of the — in the hydrolysis of. E. B. Hart and B. Sure, 90.
- Vanadate:** Cobaltic ammonium molybdate, tungstate, and —. Estimation and separation of cobalt. A. Carnot, 285.
- Vanadium:** Molybdenum and — in steel; Volumetric estimation of. Travers, 369.
- Vanadium:** Phosphoric and arsenic acids and from uranium; Separation of — from. W. A. Turner, 60.
- Vanilla Extract:** Vanillin in —; Estimation of. A. W. Dox and G. P. Plaisance, 17.
- Vanillin:** Estimation of —; Qualitative test and colorimetric method for the. C. Estes, 208.
- Vanillin:** Vanilla extract; Estimation of — in. A. W. Dox and G. P. Plaisance, 17.
- Vapour:** Gasoline — in air; Estimation of. R. P. Anderson, 215.
- Varnish:** — Analysis and — Control. II.: Viscosity of varnishes. M. N. Seaton, E. J. Probeck, and G. B. Sawyer, 309.
- Varnishes:** Acid values of boiled oils and —; Errors in the estimation of. E. E. Ware and R. E. Christman, 21.
- Varnishes:** Varnish Analysis and Control. II.: Viscosity of —. M. N. Seaton, E. J. Probeck, and G. B. Sawyer, 309.
- Varnishes:** Volatile "thinners" in oil —; Determination of. A. de Waele and F. Smith, 170.
- Varrentrapp Reaction:** Fats and oils; Importance of the — in. W. Schrauth, 91 and 179.
- Vessels:** Glass, porcelain, silica, platinum, and nickel —; New acid sodium phosphate and its action on. J. H. Smith, 254.
- Vinegar:** Cider —; Volatile reducing substance in. R. W. Balcom, 142.
- Viscosimeter:** Mercurial —. F. M. Lidstone, 187.
- Viscosity:** Media; Measurement of absolute — of very viscous. S. E. Sheppard, 316.
- Viscosity:** Starch for mill purposes; Determination of the — of. G. M. MacNider, 350.
- Vitamines:** Butter and margarine; — and lipoids in. J. de Ruiter, 13.
- Volatile Acids:** Estimation of —; Duclaux Method for the. L. J. Gillespie and E. H. Walters, 399.
- Volatile Fatty Acids:** Colorimetric qualitative reactions for their identification; Method of steam distillation for the determination of —, including a series of. D. C. Dyer, 149.
- Volatile Fatty Acids:** Duclaux Method for the estimation of the —. F. W. Upton, H. M. Plum, and J. E. Schott, 214.
- Volatile Fatty Acids:** Duclaux Method for —; Note on the. A. R. Lamb, 214.
- Volatile Fatty Acids:** Estimation of —; Duclaux's Method for the. F. W. J. Boekhout and J. J. O. de Vries, 149.
- Volatile Reducing Substance:** Cider vinegar; — in. R. W. Balcom, 142.
- Vulcanised Rubber:** Free and combined sulphur in —; Estimation of, and the rate of combination of sulphur with different types of plantation Para rubber. B. J. Eaton and F. W. F. Day, 91.
- Washing:** Precipitates; Device for automatic and intermittent — of. E. C. Lathrop, 317.

- Water:** Alkaloids from —; Sensibility of the general method of extraction of. L. Launoy, 362.
- Water:** Atmospheric gases by —; Absorption of. J. H. Coste, 341.
- Water:** Bacteria in —; Direct microscopical counting of. B. E. Nelson, 209.
- Water:** Bacteriological examination of —; Studies on the culture media employed in the. IV.: Neutral red lactose peptone media. E. M. Chamot and C. M. Sherwood, 331.
- Water:** Calcium carbonate in boiling —; Solubility of. A. Cavazzi, 368.
- Water-Content:** Margarines prepared from hydrogenated fats; — of. K. Brauer, 49.
- Water:** Ether; Estimation of alcohol and — in. R. L. Perkins, 281.
- Water:** Hardness in —; Blacher Method for the estimation of. A. S. Behrman, 403.
- Water:** Hydrogen sulphide in —; Estimation of. L. W. Winkler, 26.
- Water:** Hypochlorite solutions used for sterilising —; Volumetric analysis of, and a rapid method for the estimation of hydrogen peroxide. A. Bury, 181.
- Water:** Milk; Cryoscopic method for estimating added — in. J. T. Keister, 392.
- Water:** Milk; Detection of added — in. H. Durand, 302.
- Water-Soluble Arsenic:** Lead arsenate; Boiling method for estimation of — in. G. P. Gray and A. W. Christie, 53.
- Water-Soluble Arsenic:** Lead arsenate; Rapid method for estimation of — in. H. A. Scholz and P. J. Waldstein, 340.
- Water:** Strontium and lithium in —; Estimation of. S. D. Averitt, 345.
- Waters:** Phenolsulphonic acid method for nitrates in — containing much magnesium salts; Note on the. M. S. Nichols, 344.
- Waxes:** Unsaponifiable matter in oils, fats, and —; The estimation of. J. M. Wilkie, 200.
- Wet Combustion:** Nitrosite combustion method for the direct estimation of rubber; — in the. L. G. Wesson and E. S. Knorr, 217.
- Wheat Flour:** Factors measuring quality in —; Nitrogen in amino form as estimated by formol titration, in relation to some other. C. O. Swanson and E. L. Tague, 175.
- Wolfram:** Tin and tungsten in stanniferous —; Separation of. Travers, 404.
- Wood:** Chemistry of —. I.: Methods and results of analysis of some American species. A. W. Schorger, 336.
- Wood:** Chemistry of —. II.: Discussion of methods and results. A. W. Schorger, 338.
- Wood-Tar Pitches:** Free carbon of —. H. K. Benson and L. L. Davis, 212.
- Worts:** Amino-nitrogen in —, extracts, etc.; Gasometric estimation of. R. Emslander, 150.
- Writing:** Pigments in —; Copying-Ink pencils and the examination of their. C. A. Mitchell, 3.
- Xylene:** Solvent naphtha; Estimation of — in. P. E. Spielmann and F. B. Jones, 248.
- Yellow Mercuric Oxide:** Alkalimetry; — as a standard in. G. Incze, 253.
- Zinc:** Cadmium; Separation of — from, and estimation of cadmium iodimetrically. E. J. Ericson, 346.
- Zinc:** Electrometric titration of —. F. R. von Bichowsky, 346.
- Zinc:** Nickel in the presence of — and iron; Estimation of. S. Rothschild, 182.

- Zinc:** Phosphorus by Dusart and Blondlot's Method, and its application to Toxicology; Detection of. Preparation of pure — for the detection of phosphorus and arsenic. H. J. Lemkes, 183.
- Zingerone:** Ginger; Pungent principles of. Part I.: A new ketone, — (4-hydroxy-3-methoxy-phenylethyl methyl ketone), occurring in ginger. H. Nomura, 357.
- Zingerone:** Ginger; Pungent principles of. Part II.: Synthetic preparations of —, Methylzingerone and some related acids. A. Lapworth and F. H. Wykes, 359.
- Zirconium:** Iron, thallium, —, and titanium; Qualitative separation and detection of. P. E. Browning, G. S. Simpson, and L. E. Porter, 54.
