

## INDEX TO VOLUME XLV.

### INDEX OF NAMES.

- Abelmann, A.** Estimation of mercury by Gluckmann's method, 238.
- Adams, R., and Marvel, C. S.** Reagents from *n*-butyl alcohol, 145.
- Aida, M.** Detection of minute quantities of petroleum spirit in vegetable oils, 385.
- Aikin, V. L.** Estimation of moisture in beet-sugar factory products, 450.
- Ajin, G.** Volumetric estimation of potassium, 462.
- Allina, A., and Salvatena, H.** Estimation of benzene in turpentine, 417.
- Allport, N. L.** See Chappel, E. J., and Allport, N. L.
- Alvarez, F. O. Santos y.** Biochemical study of copra meal, 335.
- Angerhausen, J.** Oxalic acid in rhubarb and the removal of oxalic acid from rhubarb products, 334.
- Annett, H. E., and Haridas Sen.** The estimation of codeine, 321.
- Arnali, F.** Determination of the relative strengths of some nitrogen bases of the aromatic series and of some alkaloids, 384.
- Arreguine, V., and Garcia, E. D.** Formation of  $\beta$ -methylumbelliferone as a reaction of acetylacetic acids and its esters, 135.
- Atack, F. W.** "The Chemist's Year-Book," 1918-1919 (Review), 37.
- Atkinson, H. M.** Air-Oven thermo-regulator, 430.
- Auerbach, F., and Riess, G.** Estimation of small quantities of nitrous acid, especially in salt meat, 141.
- Austin, J. H., and Van Slyke, D.** Estimation of chlorides in whole blood, 226.
- Bacho, F. De.** Formation and nature of black antimony sulphide, 148.
- Bacho, F. De.** Use of arsenious acid in the volumetric method of Namias, 150.
- Bacho, F. De.** Volumetric reduction method with arsenious acid, 149.
- Badger, W. L.** Determination of oxygen by the copper-ammonia-ammonium chloride reagent, 186.
- Badger, W. L.** Nitrogen generator for laboratory use, 32.
- Bailey, C. H.** Simple hydrogen electrode, 155.
- Bailey, H. S., and Edwards, C. B.** Determination of the specific heat of heavy mineral oils, 420.
- Baillie, A. Macbeth, A. K., and Maxwell, N. I.** Effect of reducing agents on tetranitromethane, and a rapid method of estimation, 387.
- Baillie, W. L.** Problems and fallacies of sampling, 190.
- Baker, F. P.** See Lewis, W. K., and Baker, F. P.
- Baker, G. C.** Preparation of water free from ammonia, 388.
- Baker, J. C., and Van Slyke, L. L.** Determination of keeping quality of milk, 140.
- Baker, J. C., and Van Slyke, L. L.** Detection of abnormal milk based on hydrogen ion concentration, 139.
- Baker, J. C.** See Van Slyke, L. L., and Baker, J. C.
- Baker, J. L.** The Analyst and the beer prices and description orders (Notes), 98.
- Bamberger, C.** New method of estimating quinine, 415.

- Baragiola, W. J.**, and **Schuppli, O.** Balance of the specific gravity of wine, 373.
- Barker, M. F.** See Fox, J. J., and Barker, M. F.
- Barnes, A. C.** See Kirkham, V. H. and Barnes, A. C.
- Barrett, E. P.** See Bonardi, J. P., and Barrett, E. P.
- Barrett, F. L.** Detection of ligneous impurities in cotton and cotton waste for nitration purposes, 231.
- Barsky, G.** Fuel value of volatile liquid mixtures, 106.
- Barton, R.** See Callan, T., Henderson, J. A. R., and Barton, R.
- Baughman, W. F.**, and **Jamieson, G. S.** Composition of Hubbard squash seed oil, 140.
- Baughman, W. F.** See Jamieson, G. S., and Baughman, W. F.
- Baume, G.**, and **Vignerou, H.** New form of viscometer, 64.
- Baxter, G. P.**, and **Kobayashi, M.** Estimation of potassium as perchlorate, 238.
- Baxter, G. P.**, and **Rupert, F. E.** Estimation of potassium as perchlorate, 462.
- Beckett, E. G.** Estimation of nitrogen in nitrocellulose and inorganic nitrates by the nitrometer, 185.
- Belucci, J.** Sensitive reaction of cobalt, 151.
- Bertiaux, L.** Estimation of antimony in lead-antimony alloys, 426.
- Beyer, O.** Analysis of saccharin, 304.
- Bezenberger, F. K.** Estimation of metallic aluminium in aluminium dross, 109.
- Birkner, V.** Simple method for measuring the acidity of cereal products: Its application to sulphured and unsulphured oats, 19.
- Bisson, C. S.** See Christie, A. W., and Bisson, C. S.
- Bjerregaard, A. P.** Method for bringing elementary sulphur into solution for analysis, 27.
- Bodmer, R.** Desiccated coco-nut (Notes), 18.
- Bohn, R. T.** See Kelley, G. L., and Bohn, R. T.
- Bolam, H. W.** Titration of chlorides with silver nitrate, 341.
- Bonardi, J. P.**, and **Barrett, E. P.** Estimation of molybdenum, 427.
- Bonardi, J. P.** See Coghill, W. H., and Bonardi, J. P.
- Bourion, F.** Distillation method for the analysis of commercial chlorobenzene, 231.
- Bourion, F.** Physico-chemical method for the analysis of commercial chlorobenzene, 271.
- Bourquelot, E.**, and **Bridel, M.** Detection and characterisation of dextrose in plants by a new biochemical method, 175.
- Bourquelot, E.**, and **Bridel, —.** Detection and identification of dextrose in vegetables by a biochemical method, 413.
- Bouton, C. M.**, and **Duschak, L. H.** Estimation of mercury, 273.
- Bowers, W. G.**, and **Moyer, J.** Photometric turbidimeter, 318.
- Braham, J. M.** Physical properties of mannite and its aqueous solutions, 23.
- Braley, S. A.** Bibliography of the use of "cupferron" as a quantitative reagent, 58.
- Brauer, K.** Detection of oxalic acid and lactic acid, especially their differentiation from tartaric acid, 338.
- Brewster, R. Q.** See Dains, F. B., and Brewster, R. Q.
- Briant, L.**, and **Harman, H. W.** Loss of spirit strength due to evaporation (Notes), 448.
- Bridel, M.** See Bourquelot, E., and Bridel, M.
- Brown, J.**, and **Madden, H. T.** Separation of zirconium and titanium as phosphates, 153.
- Browne, C. A.** Testing saccharimeters by means of the telescope control tube, 398.
- Bruckhausen, F. V.** Estimation of acetaldehyde in paraldehyde, 179.

- Bunker, J. W. M.** Determination of hydrogen ion concentration, 189.
- Burr, G. O.** See Hale, H., and Burr, G. O.
- Bushnell, L. S., and Clark, H. S.** Estimation of minute quantities of oil in sulphur, 315.
- Butler, G. S., and Dunningcliff, H. B.** Estimation of alcohol in mixtures of alcohol, sulphuric acid, and water, 267.
- Caillas, A.** Detection of invertase in honey, 174.
- Cain, J. C.** The Chemistry and Technology of the Diazo-Compounds (Review), 157.
- Caird, E.** See Corfield, C. E., and Caird, E.
- Callan, T., and Henderson, J. A. R.** Estimation of *p*-phenylenediamine, 108.
- Callan, T., Henderson, J. A. R., and Barton, R.** Estimation of sulphates in the presence of organic sulphonic acids, 108.
- Callan, T., Henderson, J. A. R., and Stafford, N.** Estimation of the nitro group in aromatic organic compounds, 235.
- Canals, E.** Estimation of calcium and magnesium in the presence of iron and aluminium salts, 426.
- Carleton, P. W.** See Lamb, A. B., Carleton, P. W., and Meldrum, W. B.
- Carleton, P. W.** See also Lamb, A. B., Carleton, P. W., Hughes, W. S., and Nichols, L. W.
- Carré, P.** See Marqueyrol, —, and Carré, P.
- Cavazzi, A.** Estimation of titanium in certain Italian puzzuolanas, 62.
- Cavazzi, A.** Rapid tests of cement, 56.
- Césari, E.** See Nicolle, M., Debains, E., and Césari, E.
- Chabas, A.** See Thomas, P., and Chabas, A.
- Chapin, R. M.** Determination of phenol in the presence of certain other phenols, 385.
- Chapin, R. M.** Diazometric estimation of phenol and of certain of its homologues, 312.
- Chappel, E. J., and Allport, N. L.** Assay of aconite preparations, 368.
- Chase, W. S.** Titration of ammonium hydrogen fluoride, 313.
- Chatterji, D.** See Hankin, E. H., and Chatterji, D.
- Chelle, L.** Detection and estimation of cyanides and thiocyanates in complex mixtures, 52.
- Chelle, L.** Detection of hydrocyanic acid in cases of poisoning, 21.
- Chernoff, L. H.** Colour test for oxalic acid, 422.
- Chikashige, M.** Composition of ancient Eastern bronzes, 390.
- Christie, A. W., and Bisson, C. S.** Rapid method for the determination of sulphur in petroleum oils, 187.
- Clark, C. M.** Distillation connecting bulb, 242.
- Clark, H. S.** See Bushnell, L. S., and Clark, H. S.
- Clark, L. F.** Permanganate method for copper, 57.
- Classen, A.** (with the co-operation of **H. Cloeren**). Quantitative Analysis by Electrolysis (Review), 290.
- Clemens, C. A.** Condenser for the determination of crude fibre, 242.
- Clemens, C. A.** Estimation of insoluble solids in jams, preserves, and marmalades, 100.
- Clevenger, C. B.** Method for the preparation of conductivity water, 34.
- Clifford, F. W.** The Library of the Chemical Society. A Record of a Recent Attempt at Co-operation (Review), 67.
- Clowes, F., and Coleman, J. B.** A Treatise on Qualitative Analysis (Review), 195.
- Clulow, F. S., and Taylor, C. W.** Consistency of greases, 418.
- Cocking, T. T.** Method for the estimation of cineol in eucalyptus oils, 370.

- Cofman, L.** The position of analytical chemistry in France, 440.
- Coghill, W. H.,** and **Bonardi, J. P.** Approximate quantitative microscopy of pulverised ores, 188.
- Coleman, J. B.** See Clowes, F., and Coleman, J. B.
- Collins, S. H.,** and **Spiller, A.** Sugar in oat straw and cattle foods, 175.
- Colman, H. G.** Estimation of paraffins in commercial toluene, 148.
- Corfield, C. E.,** and **Gaird, E.** Fat of *Momordica* seeds, 102.
- Cox, H. E.** The identification of acids by phenacyl bromide (Notes), 412.
- Crites, D. O.** See Milligan, L. H., Crites, D. O., and Wilson, W. S.
- Crossley, T. L.** Rapid examination of shellac, shellac varnish, and lacquer, 386.
- Cullen, G. E.,** and **Van Slyke, D.** Determination of fibrin, globulin, and albumin nitrogen in blood plasma, 226.
- Cummins, —,** and **Kay, —.** A Textbook of Quantitative Chemical Analysis (Review), 403.
- Curtis, R.,** and **Miles, F. D.** The "heat-rise" method of testing sulphuric acid and oleum, 186.
- Czapski, A.** Estimation of hydrocyanic acid from beans, 306.
- Czonka, F. A.** Study of the nephelometric values of cholesterol and the higher fatty acids. II., 181.
- Dains, F. B.,** and **Brewster, R. Q.** Estimation of halogen in organic compounds, 383.
- Davis, H. S.,** and **Davis, M. D.** Detection of arsenic in sulphur, 271.
- Davis, M. D.** See Davis, H. S., and Davis, M. D.
- Day, F. E.** Sour milk samples and Gerber's fat method (Notes), 411.
- Dean, E. W.** Motor gasoline [petrol] properties, laboratory methods of testing and practical specifications, 106.
- Dean, E. W.,** and **Stark, D. D.** Convenient method for the determination of water in petroleum and other organic emulsions, 270.
- Debains, E.** See Nicolle, M., Debains, E., and Césari, E.
- Dehn, W. M.,** and **Taylor, M. C.** Chemical method for the detection of a previously frozen condition in fruit, 449.
- Delépine, M.** Technical methyl chloroformates and their analysis, 232.
- Denham, H. G.** See Steele, B. D., and Denham, H. G.
- Denigès, G.** Differentiation of radium from barium by means of iodic acid, 462.
- Denigès, G.** Iodic acid as a characteristic microchemical reagent for gaseous ammonia, 391.
- Denigès, G.** Iodic acid as a reagent for the microchemical identification of soluble and insoluble calcium, strontium, and barium compounds, 273.
- Denis, W.** Estimation of magnesium in blood, 228.
- Dennis, L. M.** Apparatus for the determination of melting-points, 241.
- Desha, L. J.** Fluoremetry. Quantitative analysis by comparative fluorescence, 343.
- Desvergnès, L.** Estimation of nitro groups by Young and Swain's method, 312.
- Desvergnès, L.** Rapid method of analysing phenol-sulphonic acids, 386.
- Desvergnès, L.** See Marquoyrol, —, Loriette, P., and Desvergnès, L.
- Dixon, H. H.,** and **Mason, T. G.** Cryoscopic method for the determination of cane sugar, 135.
- Dixon, H. W.** Method of preparing phloroglucinol reagent for the Kreis test, 181.
- Dore, W. H.** Estimation of cellulose in woods, 230.
- Dore, W. H.** Proximate analysis of coniferous woods, 305.
- Dore, W. H.** Proximate analysis of hardwoods: Studies on *Quercus Agrifolia*, 456.
- Dovey, E. R.** An improved form of U-tube, 333.

- Dovey, E. R.** Apparatus for evolution methods of analysis, 330.  
**Dovey, E. R.** The examination of Chinese crude camphor, 220.  
**Dowell, C. T.** See Menaul, P., and Dowell, C. T.  
**Downie, J. R.** Chemist's Manual of Non-Ferrous Alloys (Review), 159.  
**Drawe, P.** Analysis of sodium silicofluoride, 393.  
**Druce, J. G. F.** Volumetric methods for estimating tin, 463.  
**Dunnicliff, H. B.** See Butler, G. S., and Dunnicliff, H. B.  
**Duschak, L. H.** See Bouton, C. M., and Duschak, L. H.
- Edwards, C. B.** See Bailey, H. S., and Edwards, C. B.  
**Eichhoff, R.** Estimation of dry solids-not-fat in separated milk, 303.  
**Elsdon, G. D.** Estimation of phenol and salicylic acid in B.P. ointments, 372.  
**Englis, D. T.** Alundum filtering crucibles, 394.  
**Epstein, S. W., and Moore, R. L.** Determination of cellulose in rubber goods, 236.  
**Erlich, J.** Analysis of tungsten ores, 275.  
**Erlich, J.** New method of measuring the velocity of a current of gas, 463.  
**Erlich, J.** Volumetric estimation of sulphate ion, 394.  
**Evans, B. S.** A new process for the estimation of arsenic, with notes on the chemistry of the Marsh-Berzelius process, 8.  
**Evans, H. G.** Estimation of paraffins and unsaturated compounds in commercial toluols, 54.  
**Evers, N.** Estimation of lead in acid solution, 391.  
**Evers, N., and Foster, H. J.** Mutton bird oil, 376.
- Faber, H. B., and Stoddard, W. B.** Short commercial analytical methods for the determination of purity of important chemicals used in pyrotechnics, 314.  
**Falk, K. G., and Noyes, H. M.** Colorimetric determinations with solutions containing two coloured substances, 317.  
**Fearon, W. R.** Adamkiewicz protein reaction and a new colour test for glyoxylic acid, 455.  
**Feigl, F.** Indirect detection of tin, 112.  
**Ferris, L. W.** Detection and estimation of neutralising agents in butter and similar products, 369.  
**Fieldner, A. C., Selvig, W. A., and Taylor, G. B.** Estimation of combustible matter in silicate and carbonate rocks, 110.  
**Fleming, N., and Thaysen, A. C.** Deterioration of cotton on wet storage, 145.  
**Fleury, P.** Iodimetric estimation of arsenic acid, 389.  
**Flohil, J. T.** Volumetric method for the determination of the diastatic capacity, 335.  
**Florentin, D., and Vandenberghe, H.** Estimation of aromatic hydrocarbons in petrol, 271.  
**Florentin, D., and Vandenberghe, H.** Volumetric estimation of nitro-aromatic derivatives, 234.  
**Folin, O., and Wu, H.** Determination of sugar in blood, 227.  
**Forcrand, R. De.** Cours de Chimie (Review), 347.  
**Foreman, F. W.** Rapid volumetric methods for the estimation of amino-acids, organic acids, and organic bases, 380.  
**Fosse, R.** Microchemical identification of cyanic acid, 458.  
**Foster, H. J.** See Evers, N., and Foster, H. J.  
**Fox, J. J., and Barker, M. F.** Analysis and composition of cresylic acid, 309.  
**Frederick, R. C.** An improvement in the Haldane general air analysis apparatus, 409.

- Freear, K., and Venn, E. C. V.** Acidity of ropy milk, 377.
- Frenkel, —.** Estimation of urea by means of xanthydrol, 377.
- Fresenius, W., and Grünhut, L.** Analysis of wines, 304, 415.
- Furman, N. H.** Electro-Analytical separation of nickel or cobalt from arsenic, 428.
- Furman, N. H.** See Yablick, M., Perrott, G. S., and Furman, N. H.
- Ganassini, D.** Behaviour in Marsh's apparatus of certain organic arsenic compounds used as drugs, 99.
- Garcia, E. D.** See Arreguine, V., and Garcia, E. D.
- Garino-Canina, E.** Estimation of amino-acids in wine, 47.
- Geake, A., and Squire, F. J.** Method for the analysis of nitrous gases, 25.
- Geake, A., and Squire, F. J.** Method for the analysis of nitrous gases and its application to the study of towers for the absorption of such gases, 61.
- Geloso, M.** See Nicolardot, P., Reglade, A., and Geloso, M.
- George, W. H.** Moisture in blast furnace coke, 57.
- Gerum, J.** Pentosans as a basis in determining the milling grade of flour, 334.
- Gettler, A. O.** Critical study of methods for the detection of methyl alcohol, 311.
- Ghose, T. K.** Statutory standard for ghee, 444.
- Giaya, S.** Zinc in the human organism, 378.
- Gibson, W. H., and Jacobs, L. M.** Falling sphere viscosimeter, 277.
- Gill, A. H.** Gas and Fuel Analysis for Engineers (Review), 38.
- Gillespie, L. J.** Colorimetric determination of titration curves without buffer mixtures, 240.
- Gilmour, G. Van B.** A new method for detecting adulteration in butter and for estimating fats of the coconut group, 2.
- Gilmour, G. Van B.** Detection of coal-tar dyes in butter and margarine (Notes), 173.
- Goldan, J.** Estimation of added water in milk, 20.
- Goldschmidt, —.** Hehner value of fats and oils, 413.
- Goldstein, A. E.** See McMaster, L., and Goldstein, A. E.
- Goodwin, L. F.** Analysis of acetone by Messinger's Method, 143.
- Gordon, H. B.** The estimation of mercury, 41.
- Gortner, R. A., and Holm, G. E.** Colorimetric estimation of tyrosine by the method of Folin and Denis, 388.
- Green, A. G.** The Analysis of Dyestuffs and their Identification in Dyed and Coloured Materials, Lake-Pigments, Foodstuffs, etc. (Review), 401.
- Grissom, J. T.** Formaldehyde method for determining ammonium nitrate, 182.
- Grossfeld, J.** Estimation of mineral constituents in organic substances, especially those containing phosphorus, 234.
- Grossfeld, J.** Serum obtained by the spontaneous curdling of milk. Its use in detecting adulteration, 336.
- Grün, A.** Analysis of hydrogenated oils, 310.
- Grün, A.** Errors in the determination of the acetyl value and their remedy, 105.
- Grünhut, L.** See Fresenius, W., and Grünhut, L.
- Guerbet, M.** Reaction of benzoic acid and its application to the toxicological detection of atropine, cocaine, and stovaine, 334.
- Guglielmelli, L.** Yellow light in polarimetric determinations, 398.
- Häglund, E.** New method for estimating the "copper value" of cellulose and the valuation of the quality of cellulose, 21.
- Hale, H., and Burr, G. O.** Separation of iron from aluminium by precipitation as Prussian blue, 460.

- Hall, E. H.** Estimation of nickel in steels by direct titration, 392.
- Hall, G. F.** See Richmond, H. D., and Hall, G. F.
- Hall, J. A.** See Kremers, R. E., and Hall, J. A.
- Halverson, J. O., and Wells, E. B.** Modification of the American official chlorine method for feeds, fæces, and urine, 173.
- Hamilton, H. C.** Purified cresol (cresylic acid), 100.
- Hampshire, C. H.** Volumetric Analysis (Review), 40.
- Hanke, M. T., and Koessler, K. K.** Colorimetric estimation of histamine in proteins, 455.
- Hanke, M. T., and Koessler, K. K.** Colorimetric estimation of histidine in protein, 454.
- Hankin, E. H., and Chatterji, D.** Note on opium poisoning, 171.
- Hardy, C. R.** Colorimetric method of estimating copper and iron in lead and lead oxides, 272.
- Haridas Sen.** See Annett, H. E., and Haridas Sen.
- Harman, H. W.** See Briant, L., and Harman, H. W.
- Harrison, A. P.** See Scales, F. M., and Harrison, A. P.
- Hart, M. C.** See Hirschfelder, A. D., and Hart, M. C.
- Hartmann, W.** Estimation of carbon dioxide in alkali bicarbonate containing carbonate, 459.
- Harvey, E. M.** Colour changes of the diphenylamine reaction, 310.
- Harvey, R. B.** Thermoregulator with the characteristics of the Beckmann thermometer, 192.
- Harwood, H. E.** See Jannasch, P., and Harwood, H. E.
- Hasche, R. L.** See Pardee, A. M., Hasche, R. L., and Reid, E. E.
- Hasse, P.** Detection of methyl alcohol in spirits, 234.
- Hatlehof, R.** See Höst, H. F., and Hatlehof, R.
- Haun, F.** Preparation of diphenylamine-sulphuric acid reagent, 382.
- Heilbron, I. M.** See Neave, G. B., and Heilbron, I. M.
- Hémen, C.** See Wenger, P., and Hémen, C.
- Henderson, J. A. R.** See Callan, T., and Henderson, J. A. R. See also Callan, T., Henderson, J. A. R., and Barton, R.
- Henderson, J. A. R.** See also Callan, T., Henderson, J. A. R., and Strafford, N.
- Hendrixson, W. S.** Potassium hydrogen phthalate as a standard in volumetric analysis, 239.
- Henle, F.** Detection of water in alcohol and other organic solvents, 388.
- Hennings, C. R.** Paraguay tea, 334.
- Herbig, —.** Estimation of unsaponifiable substances in crude materials for soap manufacture, 24.
- Herschkowitsch, M.** Separation of chromium and manganese, 272.
- Hess, W.** Rapid method of estimating aromatic hydrocarbons in petroleum spirits, 417.
- Heyde, R. Van der.** See Kolthoff, J. M., and Van der Heyde, R.
- Hibbard, P. L.** Volumetric estimation of sulphates by oxidation of benzidine sulphate with potassium permanganate, 153.
- Hildt, E.** Estimation of dextrose in the presence of lactose, 179.
- Hinard, G.** Estimation of volatile acids in fermentation products, 375.
- Hinard, G.** Volumetric estimation of mercury, iron, and vanadium in the same solution, 460.
- Hirschfelder, A. D., and Hart, M. C.** Preparation of sodium amalgam in flakes, 315.
- Hitch, E. F., and Knapp, I. E.** Identification of dyes, 52.
- Hodgson, T. R.** The differentiation between poor and adulterated milk, 91.
- Hollely, W. F.** Volumetric estimation of  $\beta\beta$ -dichloroethyl sulphide, 381.

- Holluta, J.** Volumetric estimation of nickel, 61.
- Holm, G. E.** Modification of the apparatus for the estimation of arginine nitrogen by Van Slyke's method, 189.
- Holm, G. E.** See Gortner, R. A., and Holm, G. E.
- Hopp, G.** Determination of the tensile strength of glue, 233.
- Hornby, A. J. W.** Pectins in various plants, 377.
- Höst, H. F., and Hatlehof, R.** Blood sugar concentration and blood sugar methods, 304.
- Houben, J.** Volumetric estimation of iron, 151.
- Hoyt, L. F.** See Rolfe, G. W., and Hoyt, L. F.
- Hudson, C. S., and Sherwood, S. F.** Occurrence of melecitose in honey, 136.
- Huerre, R.** Estimation of ipecacuanhic acid in ipecacuanha preparations, 371.
- Hughes, W. S.** See Lamb, A. B., Carleton, P. W., Hughes, W. S., and Nichols, L. W.
- Hulett, G. A.** See Lowry, H. H., and Hulett, G. A.
- Hulett, G. A.** See also Nelson, O. A., and Hulett, G. A.
- Hulot, P.** Reaction of potassium anhydrotellurate, 238.
- Hult, W. L.** See Little, E., and Hult, W. L.
- Ingvaldsen, T.** See Levene, P. A., and Ingvaldsen, T.
- Ison, E. M.** See Richmond, H. D., and Ison, E. M.
- Issoglio, G.** Chemical composition of natural rice and of Italian polished rice, 451.
- Jacobs, B. R., and Rask, O. S.** Laboratory control of wheat flour milling, 415.
- Jacobs, L. M.** See Gibson, W. H., and Jacobs, L. M.
- James, C.** See Smith, M. M., and James, C.
- Jameson, P. E.** The influence of the free fatty-acid content in the valuation of Chinese wood-oil by the Browne polymerisation test, 328.
- Jamieson, G. S.** Estimation of saccharin in urine, 178.
- Jamieson, G. S., and Baughman, W. F.** Chemical composition of cotton-seed oil, 303.
- Jamieson, G. S., and Baughman, W. F.** Okra seed oil, 141.
- Jamieson, G. S.** See Baughman, W. F., and Jamieson, G. S.
- Jander, G.** See Zsigmondy, R., and Jander, G.
- Jannasch, P., and Harwood, H. E.** Analysis of vanadium compounds by means of carbon tetrachloride, 63.
- Jermstadt, A.** Assay of opium, 371.
- Jolibois, P.** New method for the physico-chemical analysis of precipitates. Application to the study of calcium phosphates, 65.
- Jolles, A.** Detection of indican in urine and blood, 143.
- Jones, G. C.** Hours of labour as affecting composition of milk, 138.
- Jones, W. J.** See Sanderson, W. J., and Jones, W. J.
- Jonescu, A., and Vargolici, V.** Volumetric method for the estimation of reducing sugars, 339.
- Joseph, A. F.** Change of refractive indices of fixed oils with temperature, 182.
- Jovinet, —.** See Koehler, —, Marqueyrol, —, and Jovinet, —.
- Judd, H. M.** Iodimetric estimation of sugars, 224.
- Judefind, W. L., and Reid, E. E.** Identification of acids. *v.* *p*-Halogen phenacyl esters, 267.

- Wu, H.** See Folin, O., and Wu, H.
- Wuhrmann, J.** See Wenger, P., and Wuhrmann, J.
- Yablick, M., Perrott, G. S., and Furman, N. H.** Quantitative estimation of traces of dichloroethyl sulphide (mustard gas) in air, 146.
- Zimmermann, W.** Identification of sulphonal and trional, 334.
- Zoller, H. F.** Estimation of indole in biological media, 177.
- Zsigmondy, R., and Jander, G.** Chemical analysis with membrane filters, 30.

## INDEX OF SUBJECTS.

- Abnormal Milk:** Recognition of —; New dye for the. I. J. O. de Vries, 450.
- Absorption:** Charcoal; Adsorption by. Relation of Service time to adsorption and —. H. H. Lowry and G. A. Hulett, 336.
- Abstracts of Papers Published in Other Journals:** 19, 47, 98, 135, 173, 223, 266, 303, 333, 368, 413, 449.
- Acetaldehyde:** Paraldehyde; Estimation of — in. F. V. Bruckhausen, 179.
- Acetaldehyde:** Paraldehyde; Estimation of — in. W. Stuve, 336.
- Acetates:** Acetic acid in —; New method for the estimation of. O. A. Pickett, 308.
- Acetic Acid:** Acetylsalicylic acid; Estimation of free — in. A. N. Smith, 368.
- Acetic Acid:** Thompson method for the estimation of — in white lead; Modification of the. L. McMaster and A. E. Goldstein, 185.
- Acetone:** Messinger's method; Analysis of — by. L. F. Goodwin, 143.
- Acetone:** Micro-method for the estimation of —. M. Richter-Quittner, 144.
- Acetone:** Mixtures of isopropyl alcohol and —; Note on the refractive indices of. D. M. Palmer, 302.
- Acetylsalicylic Acid:** Free acetic acid in —; Estimation of. A. N. Smith, 368.
- Acetyl Salicylic Acid:** Free salicylic acid in —; Masking the presence of (Notes). A. N. Smith, 412.
- Acetyl Value:** Determination of the — and their remedy; Errors in the. A. Grün, 105.
- Acetylacetic Acid:**  $\beta$ -methylumbelliferone as a reaction of — and its esters; Formation of. V. Arreguine and E. D. Garcia, 135.
- Acetylene:** —, ethylene, and benzene; Analytical method for the separation of. W. D. Treadwell and F. A. Tauber, 51.
- Acetylene:** Gaseous mixtures; Estimation of — in. J. A. Muller, 230.
- Acid Solution:** Lead in —; Estimation of. N. Evers, 391.
- Acidity:** Cereal products; Simple method for measuring the — of: Its application to sulphured and unsulphured oats. V. Birekner, 19.
- Acidity:** Ropy milk; — of. K. Freear and E. C. V. Venn, 376.
- Acids:** —; Identification of. *p*-Halogen phenacyl esters. W. L. Judefind and E. E. Reid, 267.
- Acids:** Phenacyl bromide; The identification of — by (Notes). H. E. Cox, 412.
- Aconite Preparations:** —; Assay of. E. J. Chappel and N. L. Allport, 368.
- Adamkiewicz Protein Reaction:** Glyoxylic acid; — and a new colour test for. W. R. Fearon, 455.
- Address:** Retiring president; Annual — of the. 71.
- Adrenalin:** —; Colorimetric estimation of. W. L. Scoville, 379.
- Absorption:** Charcoal; — by. Relation of Service time to — and absorption. H. H. Lowry and G. A. Hulett, 336.
- Adulterated Milk:** Poor and —; The differentiation between. T. R. Hodgson, 91.
- Air Analysis Apparatus:** Haldane general —; An improvement in the. R. C. Frederick, 409.
- Air:** Carbon dioxide and oxygen in — and flue gas; Indicators for. L. H. Milligan, D. O. Crites, and W. S. Wilson, 426.

- Air:** Carbon monoxide in — contaminated with motor exhaust gas; Determination of. M. C. Teague, 459.
- Air:** Carbon monoxide in —; Rapid estimation of. A. R. Lamb and A. T. Larson, 56.
- Air:** Dichloroethyl sulphide (mustard gas) in —; Quantitative estimation of traces of. M. Yablick, G. S. Perrott, and N. H. Furman, 146.
- Air:** Halogens in —; Copper flame test for. A. B. Lamb, P. W. Carleton, W. S. Hughes, and L. W. Nichols, 151.
- Air-Oven:** Thermo-regulator. H. M. Atkinson, 430.
- Albumen:** Urine; Detection and estimation of — in. O. Mayer, 103.
- Albumin Nitrogen:** Blood plasma; Determination of fibrin, globulin, and — in. G. E. Cullen and D. Van Slyke, 226.
- Alcohol:** Densities of — to  $\frac{15.5^\circ}{15.5^\circ}$ ; Corrections for (Notes). H. D. Richmond, 222.
- Alcohol:** Isopropyl — and acetone; Note on the refractive indices of mixtures of. D. M. Palmer, 302.
- Alcohol:** Medium for the determination of saponification numbers; Butyl — as a. A. M. Pardee, R. L. Hasche, and E. E. Reid, 268.
- Alcohol:** Methyl —; A new method for the estimation of. S. B. Schryver and C. C. Wood, 164.
- Alcohol:** Methyl —; Critical study of methods for the detection of. A. O. Gettler, 311.
- Alcohol:** Methyl — in cacao nibs and husks; Estimation of. Von Koers, 413.
- Alcohol:** Mixtures of —, sulphuric acid, and water; Estimation of — in. G. S. Butler and H. B. Dunnicliff, 267.
- Alcohol:** Spirits; Detection of methyl — in. P. Hasse, 234.
- Alcohol:** Water in — and other organic solvents; Detection of. F. Henle, 388.
- Algæ:** Chemical composition of marine —; Seasonal variation in the. L. Lapique, 103.
- Alkali Bicarbonate:** Carbon dioxide in — containing carbonate; Estimation of. W. Hartmann, 459.
- Alkali Solutions:** Standardising substance for —; Potassium chlorate as a. H. B. Van Valkenburgh, 238.
- Alkaloids:** Relative strengths of some nitrogen bases of the aromatic series and of some —; Determination of the. F. Arnall, 384.
- Alkaloids:** Silicotungstic acid to estimation of —; Application of. E. Taigner, 99.
- Alloys:** Antimony in lead-antimony —; Estimation of. L. Bertiaux, 426.
- Allyl Mustard Oil:** Black mustard; Estimation of — in. D. Raquet, 368.
- Aluminium:** Iron, —, chromium, glucinum, titanium and zirconium by means of sodium carbonate; Separation of. P. Wenger and J. Wuhrmann, 26.
- Aluminium:** Iron from — by precipitation as Prussian blue; Separation of. H. Hale and G. O. Burr, 460.
- Aluminium:** Metallic — in — dross; Estimation of. F. K. Bezenberger, 109.
- Aluminium Salts:** Calcium and magnesium in the presence of iron and —; Estimation of. E. Canals, 426.
- Alundum:** Filtering crucibles. D. T. Englis, 394.
- American Official Chlorine Method:** Feeds, fæces, and urine; Modification of the — for. J. O. Halverson and E. B. Wells, 173.
- Amino-Acids:** —, organic acids, and organic bases; Rapid volumetric methods for the estimation of. F. W. Foreman, 380.
- Amino Acids:** Hydrogen electrode; Determination of — by means of the. E. L. Tague, 144.

- Amino-Acids:** Wine; Estimation of — in. E. Garino-Canina, 47.
- Amino Acids:** Yeast proteins; Estimation of tyrosin and dibasic — in. P. Thomas and A. Chabas, 336.
- Aminoethanol:** Phosphatides; Estimation of — and of choline appearing in the hydrolysis of. P. A. Levene and T. Ingvaldsen, 452.
- Ammonia:** Gaseous —; Iodic acid as a characteristic microchemical reagent for. G. Denigès, 391.
- Ammonia Liquor:** Cyanogen compounds in concentrated —; Estimation of. Part II.: The estimation of thiocarbonate. P. E. Spielmann and H. Wood, 22.
- Ammonia:** Oil and fat preparations; Estimation of — in. N. Welwart, 425.
- Ammonia:** Water free from —; Preparation of. G. C. Baker, 388.
- Ammoniacal Copper Oxide Solution:** Starch enclosed in cellular tissue by means of —; Estimation of. F. Kaulfersch, 373.
- Ammoniacal Liquors:** Thiocyanates in —; Estimation of. J. A. Shaw, 340.
- Ammonium Hydrogen Fluoride:** —; Titration of. W. S. Chase, 313.
- Ammonium Nitrate:** Formaldehyde method for determining —. J. T. Grissom, 182.
- Amyolytic Action:** Diastase of *Aspergillus Oryzae* (Taka-diastrase); Testing the — of the. S. A. Waksman, 141.
- Analysis:** Evolution methods of —; Apparatus for. E. R. Dovey, 330.
- Analyst:** Beer prices and description orders; The — and the (Notes). J. L. Baker, 98.
- Analytical Chemistry:** France; The position of — in. L. Cofman, 440.
- Analytical Laboratory and Assay Office:** Work of the Government —, Cairo, Egypt, during the Period 1913-1919; Report on the. A. Lucas, 431.
- Analytical Method:** Acetylene, ethylene, and benzene; — for the separation of. W. D. Treadwell and F. A. Tauber, 51.
- Analytical Methods:** Important chemicals used in pyrotechnics; Short commercial — for the determination of purity of. H. B. Faber and W. B. Stoddard, 314.
- Analytical:** Standards. 344.
- Analytical:** Weighing. H. L. Wells, 189.
- Aniline:** Commercial anilines; Estimation of — in. W. J. Sanderson and W. Jones, 106.
- Antidiphtheritic and Antitetanic Sera:** Toxins and their antitoxins; Mutual precipitation of the. Titration of —. M. Nicolle, E. Debains, and E. Césari, 104.
- Antimony:** Lead- — alloys; Estimation of. L. Bertiaux, 426.
- Antimony Sulphide:** Black —; Formation and nature of. F. de Baeyens, 148.
- Antimony:** Tin and —; Separation of, and estimation of tin by means of cupferron. A. Kling and A. Lassieur, 275.
- Antitetanic Sera:** Toxins and their antitoxins; Mutual precipitation of the. Titration of antidiphtheritic and —. M. Nicolle, E. Debains, and E. Césari, 104.
- Apparatus:** —; Fat extraction. J. M. Pickel, 31.
- Apparatus:** Arginine nitrogen by Van Slyke's method; Modification of the — for the estimation of. G. E. Holm, 189.
- Apparatus:** Electrolytic hydrogen; Laboratory — for preparing. W. G. Palmer, 464.
- Apparatus, etc., Abstracts:** 28, 63, 112, 154, 189, 239, 276, 317, 342, 394, 429, 463.
- Apparatus:** Evolution methods of analysis; — for. E. R. Dovey, 330.
- Apparatus:** Haldane general air analysis —; An improvement in the. R. C. Frederick, 409.
- Apparatus:** Respiratory exchange work; Gas analysis —, accurate to 0.001 per cent., mainly designed for. A. Krogh, 395.

- Apparatus:** Vapour pressures; — for the estimation of. A. Morton, 33.
- Aqueous Solutions:** Mannite and its —; Physical properties of. J. M. Braham, 23.
- Arginine:** Van Slyke method for determining —; Modification of the. A. E. Koehler, 308.
- Arginine Nitrogen:** Van Slyke's method; Modification of the apparatus for the estimation of — by. G. E. Holm, 189.
- Aromatic Hydrocarbons:** Petrol; Estimation of — in. D. Florentin and H. Vandenberghe, 271.
- Aromatic Hydrocarbons:** Petroleum spirits; Rapid method of estimating — in. W. Hess, 417.
- Aromatic Organic Compounds:** Nitro group in —; Estimation of the. T. Callan, J. A. R. Henderson and N. Strafford, 235.
- Aromatic Series:** Nitrogen bases of the — and of some alkaloids; Determination of the relative strengths of some. F. Arnall, 384.
- Arsenic:** Commercial sulphuric acid; Rapid method for the estimation of — in. A. A. Kohr, 313.
- Arsenic:** Marsh-Berzelius process; A new process for the estimation of —, with notes on the chemistry of the. B. S. Evans, 8.
- Arsenic:** Nickel or cobalt from —; Electro-analytical separation of. N. H. Furman, 428.
- Arsenic:** Organic compounds; Estimation of — in. L. J. Rogers, 98.
- Arsenic:** Sulphur; Detection of — in. H. S. Davis and M. D. Davis, 271.
- Arsenic:** Tin and tin-plate; Estimation of — in. L. Vallery, 110.
- Arsenic Acid:** —; Iodimetric estimation of. P. Fleury, 389.
- Arsenic Compounds:** —; Electrometric analysis of. C. S. Robinson and O. B. Winter, 389.
- Arsenic Compounds:** Drugs; Behaviour in Marsh's apparatus of certain organic — used as drugs. D. Ganassini, 99.
- Arsenious Acid:** Volumetric method of Namias; Use of — in the. F. de Bacho, 150.
- Arsenious Acid:** Volumetric reduction method with —. F. de Bacho, 149.
- Amyloglycosylase Oryzæ:** Diastase of — (Taka-diastase): Testing the amylolytic action of the. S. A. Waksman, 141.
- Asphaltum:** Softening-point of — and other plastic substances; Determination of the. D. F. Twiss and E. A. Murphy, 63.
- Atmospheric Oxygen:** Chromium; Influence of — on the iodimetric estimation of. O. Meindl, 313.
- Atropine:** Benzoic acid and its application to the toxicological detection of —, cocaine, and stovaine; Reaction of. M. Guerbet, 334.
- Bacteria:** Hydrocarbons by the aid of —; Separation of. J. Tausz and M. Peter, 228.
- Bacteriological, Physiological, etc., Abstracts:** 20, 103, 141, 175, 226, 267, 304, 334, 373, 416, 452.
- Barger's Microscopical Method:** Molecular weights; — of determining. Part I.: Kumao Yarnakami, 240.
- Barium Compounds:** Soluble and insoluble calcium, strontium, and —; Iodic acid as a reagent for the microchemical identification of. G. Denigès, 273.
- Barium:** Radium from — by means of iodic acid; Differentiation of. G. Denigès, 462.
- Barytes:** Lithopone, etc.; Detection of natural — in. S. Stewart, 341.
- Bases:** Amino-acids, organic acids, and organic —; Rapid volumetric methods for the estimation of. F. W. Foreman, 380.

- Bead and Flame Tests:** Platinum wire in —; Substitutes for. C. C. Kiplinger, 278.
- Beans:** Hydrocyanic acid from —; Estimation of. A. Czapski, 306.
- Beans:** *Phaseolus lunatus* —; Yield of hydrocyanic acid by. H. Lührig, 174.
- Beckmann Thermometer:** Thermoregulator with the characteristics of the —. R. B. Harvey, 192.
- Beer Prices:** Description orders; The Analyst and the — and. (Notes). J. L. Baker, 98.
- Beet-Sugar Factory Products:** Moisture in —; Estimation of. V. L. Aikin, 450.
- Benzene:** Acetylene, ethylene, and —; Analytical method for the separation of. W. D. Treadwell and F. A. Tauber, 51.
- Benzenes:** Thiophene in commercial —; Estimation of. A. Meyer, 109.
- Benzidene Sulphate:** Oxidation of — with potassium permanganate; Volumetric estimation of sulphates by. P. L. Hibbard, 153.
- Benzine:** Turpentine; Estimation of — in. A. Allina and H. Salvatena, 417.
- Benzoic Acid:** Atropine, cocaine, and stovaine; Reaction of — and its application to the toxicological detection of. M. Guerbet, 334.
- Benzoic Acid:** Saccharin and —; Separation of. E. Schowalter, 266.
- Bibliography:** "Cupferron" as a quantitative reagent; — of the use of. S. A. Braley, 58.
- Bicarbonate:** Carbon dioxide in alkali — containing carbonate; Estimation of. W. Hartmann, 459.
- Biochemical Method:** Dextrose in plants by a new —; Detection and characterisation of. E. Bourquelot and Bridel, 175.
- Biochemical Method:** Dextrose in vegetables by a —; Detection and identification of. E. Bourquelot and Bridel, 413.
- Biochemical Study:** Copra meal; — of. F. O. Santos y Alvarez, 335.
- Biological Material:** Manganese in —; Estimation of. C. K. Reiman and A. S. Minot, 306.
- Biological Media:** Indole in —; Estimation of. H. F. Zoller, 177.
- Bismuth:** Lead and —; Separation and estimation of. G. Luff, 152.
- Bismuth:** Ore analysis; The gravimetric estimation of — as phosphate and its application in. W. R. Schoeller and E. P. Waterhouse, 435.
- Black Antimony Sulphide:** —; Formation and nature of. F. de Bacho, 148.
- Black Mustard:** Allyl mustard oil in —; Estimation of. D. Raquet, 368.
- Bladder:** Red mullet; Analysis of the swimming — of the. L. and D. Leroux, 143.
- Blarez and Tourrou's Method:** Uric acid by a modification of —; Volumetric estimation of. G. Pegurier, 267.
- Blast Furnace Coke:** Moisture in —. W. H. George, 57.
- Blood:** Chlorides in whole —; Estimation of. J. H. Austin and D. Van Slyke, 226.
- Blood:** Indican in urine and —; Detection of. A. Jolles, 143.
- Blood:** Magnesium in —; Estimation of. W. Denis, 228.
- Blood:** Methæmoglobin and hæmoglobin in —; Method for the determination of. W. S. McEllroy, 307.
- Blood:** Methæmoglobin in —; Determination of. W. C. Stadie, 176.
- Blood Plasma:** Fibrin, globulin, and albumin nitrogen in —; Determination of. G. E. Cullen and D. Van Slyke, 226.
- Blood:** Potassium and sodium in small quantities of —; Estimation of. B. Kramer, 177.
- Blood Sugar:** — Concentration and — methods. H. F. Höst and R. Hatlehof, 304.
- Blood:** Sugar in —; Determination of. O. Folin and H. Wu, 227.

- Boric Acid Modification:** Kjeldahl method for the analysis of cereals and soils; — of the. F. M. Scales and A. P. Harrison, 223.
- Borneo Petroleum:** Toluene-petrol fraction of —; Rectified petroleum spirit from the. W. A. Silvester, 338.
- Braunstein's Modification:** Urea; — of the Mörner-Sjöqvist process for the estimation of. A. H. Todd, 229.
- British East Africa:** Milk in —; The composition of. V. H. Kirkham and A. C. Barnes, 298.
- B.P. Ointments:** Phenol and salicylic acid in —; Estimation of. G. D. Elsdon, 372.
- Bromides:** Cyanides, cyanates, and — in the presence of each other; Estimation of. G. Velardi, 147.
- Bromine:** Organic chlorine or — by the chromic acid method; Estimation of. P. W. Robertson, 147.
- Bronzes:** Ancient Eastern —; Composition of. M. Chikashige, 390.
- Browne Polymerisation Test:** Chinese wood-oil by the —; The influence of the free fatty-acid content in the valuation of. P. E. Jameson, 328.
- Buffer Mixtures:** Titration curves without —; Colorimetric determination of. L. J. Gillespie, 240.
- Bulb:** Distillation connecting —. C. M. Clark, 242.
- Burette:** Gas analysis; Weighing — for. E. R. Weaver and P. G. Ledig, 318.
- Butter:** Coal-tar dyes in — and margarine; Detection of. (Notes.) G. Van B. Gilmour, 173.
- Butter Fat:** Crismer value of —. L. Vandam, 19.
- Butter:** Fats of the coconut group; A new method for detecting adulteration in — and for estimating. G. Van B. Gilmour, 2.
- Butter:** Neutralising agents in — and similar products; Detection and estimation of. L. W. Ferris, 369.
- n*-**Butyl Alcohol:** Reagents from —. R. Adams and C. S. Marvel, 145.
- Butyl Alcohol:** Saponification numbers; — as a medium for the determination of. A. M. Pardee, R. L. Hasche, and E. E. Reid, 268.
- Cacao Nibs and Husks:** Methyl alcohol in —; Estimation of. Von Koers, 413.
- Cacao Shell:** —; Toxicity of. Marchadier and Goujon, 20.
- Caffeine:** Coffee mixtures and so-called caffeineless coffees; Estimation of — in. E. Vautier, 333.
- Caffeineless Coffees:** Caffeine in coffee mixtures and so-called —; Estimation of. E. Vautier, 333.
- Calcium Cyanamide:** Cyanamide and dicyano-diamide in —; Estimation of. Marquayrol, P. Lorette, and L. Desvergnès, 337.
- Calcium:** Iron and aluminium salts; Estimation of — and magnesium in the presence of. E. Canals, 426.
- Calcium Phosphates:** Precipitates; New method for the physico-chemical analysis of. Application to the study of —. P. Jolibois, 65.
- Calcium, Strontium, and Barium Compounds:** Microchemical identification of soluble and insoluble —; Iodic acid as a reagent for the. G. Denigès, 273.
- Calomel Electrode:** —; New. A. E. Koehler, 240.
- Calorimetric Method:** Standardising thermometers by electrical energy; — for. T. W. Richards and S. Tamaru, 342.
- Gamphor:** Chinese crude —; The examination of. E. R. Dovey, 220.
- Gamphor:** Water in crude —; Rapid method of estimating. K. W. Lane and O. F. Lubatti, 135.
- Cane Sugar:** Determination of —; Cryoscopic method for the. H. H. Dixon and T. G. Mason, 135.

- Cane Sugar:** Determination of —; Double polarisation methods for the. G. W. Rolfe and L. F. Hoyt, 224.
- Carbon:** —; Rapid estimation of. L. Lescœur, 381.
- Carbon Dioxide:** Air and flue gas; Indicators for — and oxygen in. L. H. Milligan, D. O. Crites, and W. S. Wilson, 426.
- Carbon Dioxide:** Alkali bicarbonate containing carbonate; Estimation of — in. W. Hartmann, 459.
- Carbon Dioxide:** Fermentable sugars; Estimation of — and. A. Slator, 373.
- Carbon Dioxide:** Krogh's method of micro-analysis; Estimation of —, oxygen, and combustible gases by. H. O. Schmit-Jensen, 183.
- Carbon Monoxide:** Air contaminated with motor exhaust gas; Determination of — in. M. C. Teague, 459.
- Carbon Monoxide:** Air; Rapid estimation of — in. A. R. Lamb and A. T. Larson, 56.
- Carbon Tetrachloride:** Vanadium compounds by means of —; Analysis of. P. Jannasch and H. E. Harwood, 63.
- Carbonate:** Alkali bicarbonate containing —; Estimation of carbon dioxide in. W. Hartmann, 459.
- Carbonate Rocks:** Combustible matter in silicate and —; Estimation of. A. C. Fieldner, W. A. Selvig, and G. B. Taylor, 110.
- Carbonates:** Cow's milk; Carbonic acid and — in. L. L. Van Slyke and J. C. Baker, 139.
- Carbonic Acid:** Cow's milk; — and carbonates in. L. L. Van Slyke and J. C. Baker, 139.
- Carbonisation:** Coal; Comparative method of determining the heat of — of. G. Weyman, 309.
- Carbonised Substances:** Heavy mineral oils; Relation between the quantities of tarry and — in. W. Steinkopf and H. Winternitz, 420.
- Cassia Oil:** Lead in —; Rapid method of estimating. O. F. Lubatti, 136.
- Cattle Foods:** Oat straw and —: Sugar in. S. H. Collins and A. Spiller, 175.
- Cellular Tissue:** Starch enclosed in — by means of ammoniacal copper oxide solution; Estimation of. F. Kaulfersch, 373.
- Cellulose:** "Copper value" of —; New method for estimating the, and the valuation of the quality of —. E. Hägglund, 21.
- Cellulose:** Gelatin, — and varnishes; New turbidimeter for solutions of. S. E. Sheppard, 193.
- Cellulose:** Rubber goods; Determination of — in. S. W. Epstein and R. L. Moore, 236.
- Cellulose:** Woods; Determination of — in. S. A. Mahood, 416.
- Cellulose:** Woods; Estimation of — in. W. H. Dore, 230.
- Cement:** Rapid tests of. A. Cavazzi, 56.
- Cereal Products:** Acidity of —; Simple method for measuring the: Its application to sulphured and unsulphured oats. V. Birckner, 19.
- Cereals:** —; Moisture content of. O. A. Nelson and G. A. Hulett, 100.
- Cereals:** Kjeldahl method for the analysis of — and soils; Boric acid modification of the. F. M. Scales and A. P. Harrison, 223.
- Charcoal:** Adsorption by —. Relation of Service time to adsorption and absorption. H. H. Lowry and G. A. Hulett, 336.
- Chemical Analysis:** Membrane filters; — with. R. Zsigmondy and G. Jander, 30.
- Chemical Analysis:** Ultra-filters; — with. L. Moser and Kittl, 429.
- Chemicals:** Pyrotechnics; Short commercial analytical methods for the determination of purity of important — used in. H. B. Faber and W. B. Stoddard, 314.
- Chinese Crude Camphor:** —; The examination of. E. R. Dovey, 220.

- Chinese Wood-Oil:** Valuation of — by the Browne polymerisation test; The influence of the free fatty-acid content in the. P. E. Jameson, 328.
- Chlorides:** Nitrates; Effect of — on the nitrometer determination of. M. T. Sanders, 184.
- Chlorides:** Silver nitrate; Titration of — with. H. W. Bolam, 341.
- Chlorides:** Whole blood; Estimation of — in. J. H. Austin and D. Van Slyke, 226.
- Chlorine Method:** Feeds, fæces, and urine; Modification of the American official — for. J. O. Halverson and E. B. Wells, 173.
- Chlorine:** Nephelometer; Determination of — with the. A. B. Lamb, P. W. Carleton, and W. B. Meldrum, 150.
- Chlorine:** Organic — or bromine by the chromic acid method; Estimation of. P. W. Robertson, 147.
- Chlorobenzene:** Analysis of commercial —; Distillation method for the. F. Bourion, 231.
- Chlorobenzene:** Analysis of commercial —; Physico-Chemical method for the. F. Bourion, 271.
- Chloroformates:** Technical methyl — and their analysis. M. Delépine, 232.
- Cholesterol:** Nephelometric values of — and the higher fatty acids; Study of the. II. F. A. Czonka, 181.
- Choline:** Aminoethanol and of — appearing in the hydrolysis of phosphatides; Estimation of. P. A. Levene and T. Ingvaldsen, 452.
- Chrome Yellow:** Lead from chromium; Electrolytic separation of, and the analysis of — and other similar mineral pigments. J. Milbauer and I. Setlik, 60.
- Chromic Acid Method:** Organic chlorine or bromine by the —; Estimation of. P. W. Robertson, 147.
- Chromium:** Atmospheric oxygen on the iodimetric estimation of —; Influence of. O. Meindl, 313.
- Chromium:** Iron, aluminium, —, glucinum, titanium and zirconium by means of sodium carbonate; Separation of. P. Wenger and J. Wuhrmann, 26.
- Chromium:** Lead from —; Electrolytic separation of, and the analysis of chrome yellow and other similar mineral pigments. J. Milbauer and I. Setlik, 60.
- Chromium:** Manganese; Separation of — and. M. Herschkowitsch, 272.
- Chromium:** Tungsten high-speed steels; Influence of vanadium on the estimation of. P. Slawik, 429.
- Cineol:** Essential oils; Estimation of — in. C. Kleber and W. F. von Rechenberg, 457.
- Cineol:** Eucalyptus oils; Method for the estimation of — in. T. T. Cocking, 370.
- Citric Acid:** Tomato; Identification of — in the. R. E. Kremers and J. A. Hall, 174.
- Clip:** Preventing rubber connections from slipping off glass and metal tubing, and for attaching pressure pumps to taps; — for. C. A. Keane and G. Patchin, 64.
- Coagulable Proteins:** Feeding-stuffs, etc.; Estimation of gelatin, contained, together with —, in. H. Wagner and G. Schöler, 20.
- Coal:** Heat of carbonisation of —; Comparative method of determining the. G. Weyman, 309.
- Coal:** Sulphur compounds in —; Determination of. A. R. Powell, 423.
- Coal-Gas:** Unsaturated hydrocarbons present in —; An investigation into the composition of the. F. S. Sinnatt and L. Slater, 85.
- Coal-Tar Dyes:** Butter and margarine; Detection of — in (Notes). G. Van B. Gilmour, 173.
- Cobalt:** —; Sensitive reaction of. J. Bellucci, 151.
- Cobalt:** Nickel or — from arsenic; Electro-analytical separation of. N. H. Furman, 428.

- Cobaltinitrite Method:** Potassium by the —; Estimation of. P. Wenger and C. Hémen, 393.
- Cocaine:** Atropine, —, and stovaine; Reaction of benzoic acid and its application to the toxicological determination of. M. Guerbet, 334.
- Coco-nut:** —; Desiccated (Notes). R. Bodmer, 18.
- Coconut Group:** Fats of the —; A new method for detecting adulteration in butter and for estimating. G. Van B. Gilmour, 2.
- Codeine:** —; The estimation of. H. E. Annett and Haridas Sen, 321.
- Coefficient of Vulcanisation:** Vulcanised rubber; Determination of free sulphur and the — in. W. J. Kelly, 424.
- Coffees:** Coffee mixtures and so-called caffeineless —; Estimation of caffeine in. E. Vautier, 333.
- Coke:** Blast furnace —; Moisture in. W. H. George, 57.
- Colorimetric Determination:** Titration curves without buffer mixtures; — of. L. J. Gillespie, 240.
- Colorimetric Determinations:** Solutions containing two coloured substances; — with. K. G. Falk and H. M. Noyes, 317.
- Colorimetric Estimation:** Adrenalin; — of. W. L. Scoville, 379.
- Colorimetric Estimation:** Glycogen; — of. R. Thieulin, 375.
- Colorimetric Estimation:** Tyrosine by the method of Folin and Denis; — of. R. A. Gortner and G. E. Holm, 388.
- Colorimetric Method:** Uranium; New — for estimation of. Von Müller, 62.
- Colour Changes:** Diphenylamine reaction; — of the. E. M. Harvey, 310.
- Colour Test:** Glyoxylic acid; Adamkiewicz protein reaction and a new — for. W. R. Fearon, 455.
- Colour Test:** Oxalic acid; — for. L. H. Chernoff, 422.
- Coloured Substances:** Solutions containing two —; Colorimetric determinations with. K. G. Falk and H. M. Noyes, 317.
- Combustible Gases:** Carbon dioxide, oxygen, and — by Krogh's method of micro-analysis; Estimation of. H. O. Schmit-Jensen, 183.
- Combustible Matter:** Silicate and carbonate rocks; Estimation of — in. A. C. Fieldner, W. A. Selvig, and G. B. Taylor, 110.
- Complex Mixtures:** Cyanides and thiocyanates in —; Detection and estimation of. L. Chelle, 52.
- Condenser:** Crude fibre; — for the determination of. C. A. Clemens, 242.
- Conductivity Water:** Preparation of —; Method for the. C. B. Clevenger, 34.
- Coniferous Woods:** —; Proximate analysis of. W. H. Dore, 305.
- Constant Temperature Still-Head:** Light oil fractionation; — for. F. M. Washburn, 112.
- Control Tube:** Telescope —; Testing saccharimeters by means of the. C. A. Browne, 398.
- Copper-Ammonia-Ammonium Chloride Reagent:** Oxygen by the —; Determination of. W. L. Badger, 186.
- Copper and Nickel Oxides:** Ferric hydroxide; Simultaneous precipitation of — with. E. Torporescu, 393.
- Copper:** —; Permanganate method for. L. F. Clark, 57.
- Copper Flame Test:** Halogens in air; — for. A. B. Lamb, P. W. Carleton, W. S. Hughes, and L. W. Nichols, 151.
- Copper:** Lead and lead oxides; Colorimetric method of estimating — and iron in. C. R. Hardy, 272.
- Copper Oxide Solution:** Starch enclosed in cellular tissue by means of ammoniacal —; Estimation of. F. Kaufersch, 373.
- Copper:** Pyrites and pyrites cinders; Electrolytic estimation of — in. E. Mengler, 58.

- "Copper Value":** Cellulose; New method for estimating the — of, and the valuation of the quality of cellulose. E. Hägglund, 21.
- Copra Meal:** —; Biochemical study of. F. O. Santos y Alvarez, 335.
- Corrections:** Densities of alcohol to  $\frac{15.5^{\circ}}{15.5^{\circ}}$ ; — for (Notes). H. D. Richmond, 222.
- Cotton:** Ligneous impurities in — and — waste for nitration purposes; Detection of. F. L. Barrett, 231.
- Cotton-Seed Oil:** —; Chemical composition of. G. S. Jamieson and W. F. Baughman, 303.
- Cottonseed Oil Products:** Kreis reaction of —. W. B. Smith, 370.
- Cotton Waste:** Ligneous impurities in cotton and — for nitration purposes; Detection of. F. L. Barrett, 231.
- Cotton:** Wet storage; Deterioration of — on. N. Fleming and A. C. Thaysen, 145.
- Cow's Milk:** Carbonic acid and carbonates in —. L. L. Van Slyke and J. C. Baker, 139.
- Creatinine:** —; Estimation of. E. Vautier, 457.
- Cresol:** Purified — (cresylic acid). H. C. Hamilton, 100.
- Cresylic Acid:** —; Analysis and composition of. J. J. Fox and M. F. Barker, 309.
- (Cresylic Acid):** Purified cresol —. H. C. Hamilton, 100.
- Crismer Value:** Butter fat; — of. L. Vandam, 19.
- Crucibles:** Filtering —; Alundum. D. T. Englis, 394.
- Crude Fibre:** —; Estimation of. O. Nolte, 174.
- Cryoscopic Method:** Cane sugar; — for the determination of. H. H. Dixon and T. G. Mason, 135.
- Cupferron:** Antimony and tin; Separation of, and estimation of tin by means of —. A. Kling and A. Lassieur, 275.
- Cupferron:** Quantitative analysis; Use of — in. G. E. F. Lundell and H. B. Knowles, 237.
- "Cupferron":** Quantitative reagent; Bibliography of the use of — as a. S. A. Braley, 58.
- Cuprous Chloride:** Hydrochloric acid solution of — for use in gas analysis; Preparation of a. F. C. Krauskopf and L. H. Purdy, 185.
- Curdling:** Milk; Serum obtained by the spontaneous — of. J. Grossfeld, 336.
- Cyanamide:** Calcium —; Estimation of — and dicyano-diamide in. Marqueyrol, P. Loriette, and L. Desvergnès, 337.
- Cyanates:** Cyanides, —, and bromides in the presence of each other; Estimation of. G. Velardi, 147.
- Cyanic Acid:** Microchemical identification of —. R. Fosse, 458.
- Cyanides:** Complex mixtures; Detection and estimation of — and thiocyanates in. L. Chelle, 52.
- Cyanides:** —, Cyanates, and bromides in the presence of each other; Estimation of. G. Velardi, 147.
- Cyanogen Compounds:** Concentrated ammonia liquor; Estimation of — in. Part II.: The estimation of thiocarbonate. P. E. Spielmann and H. Wood, 22.
- Dairy Calculations:** Slide rule for —; An improved. H. D. Richmond, 218.
- Dairy Products:** Food values and —. O. R. Overman, 244.
- Dark Resins:** Saponification value of —; Determination of the. H. Salvaterra, 53.
- Densities:** Alcohol to  $\frac{15.5^{\circ}}{15.5^{\circ}}$ ; Corrections for — of (Notes). H. D. Richmond, 222.
- Derivatives:** Nitro-aromatic —; Volumetric estimation of. D. Florentin and H. Vandenberghe, 234.

- Deroode Method:** Potash; — for determining. T. E. Keith and H. E. Shiver, 27.
- Devarda's Method:** Nitrogen in nitroglycerine; Application of — to the estimation of. Koehler, Marqueyrol, and Jovinet, 420.
- Dextrose:** Lactose; Estimation of — in the presence of. E. Hildt, 179.
- Dextrose:** New biochemical method; Detection and characterisation of — in plants by a. E. Bourquelot and M. Bridel, 175.
- Dextrose:** Vegetables by a biochemical method; Detection and identification of — in. E. Bourquelot and Bridel, 413.
- Diastase:** *Aspergillus Oryza* (Taka-diastase); Testing the amylolytic action of the — of. S. A. Waksman, 141.
- Diastase:** Enzymic extract (Polyzime) as compared with malt —; Properties of an. J. Takamine, Junr., and K. Oshima, 305.
- Diastatic Capacity:** Determination of the —; Volumetric method for the. J. T. Flohill, 335.
- Diastatic Power:** —; Estimation of. E. I. Rosenblum, 453.
- Diastatic Preparations:** Saccharogenic power of —; Estimation of the. K. Oshima, 453.
- Diazometric Estimation:** Phenol and of certain of its homologues; — of. R. M. Chapin, 312.
- Dichloroethyl Sulphide:** — (mustard gas) in air; Quantitative estimation of traces of. M. Yablick, G. S. Perrott, and N. H. Furman, 146.
- Dichlorodiethyl Sulphide:** — ("mustard gas"); Reactions of. F. Martin, 419.
- $\beta$ -Dichloroethyl Sulphide:** —; Volumetric estimation of. W. F. Hollely, 381.
- Dibasic Amino Acids:** Tyrosin and — in yeast proteins; Estimation of. P. Thomas and A. Chabas, 336.
- Dicyano-Diamide:** Cyanamide and — in calcium cyanamide; Estimation of. Marqueyrol, P. Loriette, and L. Desvergnès, 337.
- Diffusing Power:** Pigments; — of. W. K. Lewis and F. P. Baker, 422.
- Diphenylamine Reaction:** Colour changes of the —. E. M. Harvey, 310.
- Diphenylamine-Sulphuric Acid Reagent:** —; Preparation of. F. Haun, 382.
- Distillation:** Connecting bulb. C. M. Clark, 242.
- Distillation Method:** Commercial chlorobenzene; — for the analysis of. F. Bourion, 231.
- Documents:** Finger-prints on —; The detection of. C. A. Mitchell, 122.
- Double Polarisation Methods:** Cane sugar; — for the determination of. G. W. Rolfe and L. F. Hoyt, 224.
- Dross:** Metallic aluminium in aluminium —; Estimation of. F. K. Bezenberger, 109.
- Drugs:** Organic arsenic compounds used as —; Behaviour in Marsh's apparatus of certain. D. Ganassini, 99.
- Durability:** Exterior varnishes compared with their physical and chemical analyses; — of. W. T. Pearce, 312.
- Dye:** Abnormal milk; New — for the recognition of. I. J. O. de Vries, 450.
- Dyes:** Butter and margarine; Detection of coal-tar — in (Notes). G. Van B. Gilmour, 173.
- Dyes:** —; Identification of. E. F. Hitch and I. E. Knapp, 52.
- Dyestuffs:** Strength of —; Estimation of the. W. H. Watkins, 52.
- Eastern Bronzes:** Ancient —; Composition of. M. Chikashige, 390.
- Edible Oils:** Purity of certain refined —; Use of the refractometer in ascertaining the. F. H. Trim, 414.
- Egypt:** Government Analytical Laboratory and Assay Office, Cairo, — during the Period 1913-1919; Report on the Work of the. A. Lucas, 431.

- Electrical Energy:** Standardising thermometers by —; Calorimetric method for T. W. Richards and S. Tamaru, 342.
- Electro-Analytical Separation:** Nickel or cobalt from arsenic; — of. N. H. Furman, 428.
- Electrode:** Amino acids by means of the hydrogen —; Determination of. E. L. Tague, 144.
- Electrode:** Calomel —; New. A. E. Koehler, 240.
- Electrode:** Hydrogen —; Electrometric titrations with a. W. D. Treadwell and L. Weiss, 341.
- Electrode:** Hydrogen —; Simple. C. H. Bailey, 155.
- Electrolytic Estimation:** Copper in pyrites and pyrites cinders; — of. E. Mengler, 58.
- Electrolytic Estimation:** Halogens; Indirect method for the — of the. J. H. Reedy, 59.
- Electrolytic Hydrogen:** Laboratory apparatus for preparing —. W. G. Palmer, 464.
- Electrolytic Separation:** Lead from chromium; — of, and the analysis of chrome yellow and other similar mineral pigments. J. Milbauer and I. Setlik, 60.
- Electrometric Analysis:** Arsenic compounds; — of. C. S. Robinson and O. B. Winter, 389.
- Electrometric Analysis:** Potassium ferrocyanide; — with. E. Müller, 25.
- Electrometric Method:** Ferrocyanides; — for the estimation of. G. L. Kelley and R. T. Bohn, 22.
- Electrometric Titration:** W. D. Treadwell and L. Weiss, 59.
- Electrometric Titration:** —; Theory of. W. D. Treadwell, 59.
- Electrometric Titrations:** Hydrogen electrode; — with a. W. D. Treadwell and L. Weiss, 341.
- Elementary Sulphur:** Solution for analysis; Method for bringing — into. A. P. Bjerregaard, 27.
- Emulsions:** Petroleum and other organic —; Convenient method for the determination of water in. E. W. Dean and D. D. Stark, 270.
- Enzymic Extract (Polyzyme):** Malt diastase; Properties of an — as compared with. J. Takamine, Junr., and K. Oshima, 305.
- Error:** Gravimetric analysis; Theory of, with special consideration of sources of —. L. Moser, 277.
- Essential Oils:** Cineol in —; Estimation of. C. Kleber and W. F. von Rechenberg, 457.
- Ester Transposition:** Saponification values; Influence of — in the determination of. A. M. Pardee and E. E. Reid, 180.
- Esters:** Acids; Identification of. V. *p*-Halogen phenacyl —. W. L. Judefind and E. E. Reid, 267.
- Esters:**  $\beta$ -methylumbelliferone as a reaction of acetylacetic acid and its —; Formation of. V. Arreguine and E. D. Garcia, 135.
- Ethylene:** Acetylene, —, and benzene; Analytical method for the separation of. W. D. Treadwell and F. A. Tauber, 51.
- Eucalyptus Oils:** Cineol in —; Method for the estimation of. T. T. Cocking, 370.
- Evaporation:** Loss of spirit strength due to — (Notes). L. Briant and H. W. Harman, 448.
- Evolution Methods:** Analysis; Apparatus for — of. E. R. Dovey, 330.
- Extraction Apparatus:** —; Fat. J. M. Pickel, 31.
- Extracts:** Mangrove [tannin] in mixed tannin —; Detection of. E. Schell, 425.
- Extracts:** Phytin in plant —; Determination of. A. Rippel, 416.
- Factory Products:** Beet-sugar —; Estimation of moisture in. V. L. Aikin, 450.

- Fæces:** American official chlorine method for feeds, —, and urine; Modification of the. J. O. Halverson and E. B. Wells, 173.
- Fæces:** Idiopathic tetany; Guanidine content of — in. J. S. Sharpe, 142.
- Falling Sphere:** Viscosimeter. W. B. Gibson and L. M. Jacobs, 277.
- Fat and Oil Preparations:** Ammonia in —; Estimation of. N. Welwart, 425.
- Fat Extraction:** Apparatus. J. M. Pickel, 31.
- Fat Method:** Sour milk samples and Gerber's — (Notes). F. E. Day, 411.
- Fat:** Momordica seeds; — of. C. E. Corfield and E. Caird, 102.
- Fats:** Coconut group; A new method for detecting adulteration in butter and for estimating — of the. G. Van B. Gilmour, 2.
- Fats:** Iodine value of —; Comparison of different methods for estimating the. T. Sundberg and M. Lundborg, 338.
- Fats:** Oils; Hehner value of — and. Goldschmidt, 413.
- Fatty-Acid Content:** Valuation of Chinese wood-oil by the Browne polymerisation test; The influence of the free — in the. P. E. Jameson, 328.
- Fatty Acids:** Cholesterol and the higher —; Study of the nephelometric values of. II. F. A. Czonka, 181.
- Fatty Acids:** Volatile —; Estimation of. G. Wiegner and J. Masasanik, 24.
- Feeding-Stuff:** South Africa; Sesbania: A — from. 50.
- Feeding-Stuffs, etc.:** Gelatin, contained, together with coagulable proteins, in —; Estimation of. H. Wagner and G. Schöler, 20.
- Feeding Stuffs:** Fibre in —; Estimation of. 121.
- Feeds:** —, fæces, and urine; Modification of the American official chlorine method for. J. O. Halverson and E. B. Wells, 173.
- Fermentable Sugars:** Carbon dioxide and —; Estimation of. A. Slator, 373.
- Fermentation Products:** Volatile acids in —; Estimation of. G. Hinard, 375.
- Ferric Hydroxide:** Copper and nickel oxides with —; Simultaneous precipitation of. E. Torporescu, 393.
- Ferrocyanides:** Estimation of —; Electrometric method for the. G. L. Kelley and R. T. Bohn, 22.
- Ferrous Iron:** —; Estimation of. J. M. Kolthoff, 151.
- Fibre:** Crude —; Condenser for the determination of. C. A. Clemens, 242.
- Fibre:** Feeding stuffs; Estimation of — in. 121.
- Fibrin, Globulin, and Albumin Nitrogen:** Blood plasma; Determination of — in. G. E. Cullen and D. Van Slyke, 226.
- Filtering Crucibles:** —; Alundum. D. T. Englis, 394.
- Filters:** Membrane —; Chemical analysis with. R. Zsigmondy and G. Jander, 30.
- Finger-Prints:** Documents; The detection of — on. C. A. Mitchell, 122.
- Fischer's Viscosimeter:** —. 430.
- Fixed Oils:** Temperature; Change of refractive indices of — with. A. F. Joseph, 182.
- Fixed Oils:** Temperature; Change of refractive indices of — with. C. H. Wright, 52.
- Flakes:** Sodium amalgam in —; Preparation of. A. D. Hirschfelder and M. C. Hart, 315.
- Flame Tests:** Platinum wire in bead and —; Substitutes for. C. C. Kiplinger, 278.
- Flask:** Frothing liquids; — for the distillation of. E. Lenk, 278.
- Flour:** Basis in determining the milling grade of —; Pentosans as a. J. Gerum, 334.
- Flour Milling:** Wheat —; Laboratory control of. B. R. Jacobs and O. S. Rask, 415.
- Flue Gas:** Carbon dioxide and oxygen in air and —; Indicators for. L. H. Milligan, D. O. Crites, and W. S. Wilson, 426.

- Fluoremetry:** —. Quantitative analysis by comparative fluorescence. L. J. Desha, 343.
- Fluorescence:** Fluoremetry. Quantitative analysis by comparative —. L. J. Desha, 343.
- Fluoride:** Ammonium hydrogen —; Titration of. W. S. Chase, 313.
- Fluorine:** Organic substances; Estimation of — in. E. Paternò, 147.
- Food and Drugs Analysis:** 19, 47, 98, 135, 173, 223, 266, 303, 333, 368, 413, 449.
- Food Values:** Dairy products; — and. O. R. Overman, 244.
- Foods:** Oat straw and cattle —; Sugar in. S. H. Collins and A. Spiller, 175.
- Foods:** Work of Inspectors of — for the year 1918-19; Report on the. A. W. J. Macfadden, 245.
- Formaldehyde Method:** Ammonium nitrate; — for determining. J. T. Grissom, 182.
- Fractionation:** Photospectrometry in organic analysis; Combination of — with. W. E. Matthewson, 318.
- France:** Analytical chemistry in —; The position of. L. Cofman, 440.
- Free Sulphur:** Vulcanised rubber; Determination of — and the coefficient of vulcanisation in. W. J. Kelly, 424.
- Frothing Liquids:** Distillation of —; Flask for the. E. Lenk, 278.
- Frozen Condition:** Fruit; Chemical method for the detection of a previously — in. W. M. Dehn and M. C. Taylor, 449.
- Fruit:** Previously frozen condition in —; Chemical method for the detection of a. W. M. Dehn and M. C. Taylor, 449.
- Fruit Juices:** Red wines and —; Acidimetry of. A. M. Macmillan and A. Tingle, 223.
- Fuel Oils:** Picric acid value; Characterisation of —, particularly petroleum spirit, by the. J. Tausz and E. Schnabel, 53.
- Fuel Value:** Volatile liquid mixtures; — of. G. Barsky, 106.
- Gas Analysis Apparatus:** Respiratory exchange work; —, accurate to 0.001 per cent., mainly designed for. A. Krogh, 395.
- Gas Analysis:** Hydrochloric acid solution of cuprous chloride for use in —; Preparation of a. F. C. Krauskopf and L. H. Purdy, 185.
- Gas Analysis:** Weighing burette for —. E. R. Weaver and P. G. Ledig, 318.
- Gas Meters:** Calibration, accuracy, and use of —. A. Krogh, 395.
- Gas:** Uniform addition of small proportions of one — to another; Apparatus for the. R. Mezger, 430.
- Gas:** Velocity of a current of —; New method of measuring the. J. Erlich, 463.
- Gaseous Ammonia:** Characteristic microchemical reagent for —; Iodic acid as a. G. Denigès, 391.
- Gaseous Mixtures:** Acetylene in —; Estimation of. J. A. Muller, 230.
- Gasoline:** Motor — [petrol] properties, laboratory methods of testing and practical specifications. E. W. Dean, 106.
- Gastric Analysis:** Starch solution; Apparatus for rapid — together with a method for the preservation of. R. J. Miller, 29.
- Gelatin:** Feeding-stuffs, etc.; Estimation of —, contained, together with coagulable proteins, in. H. Wagner and G. Schöler, 20.
- Gelatin:** Solutions of —, cellulose and varnishes; New turbidimeter for. S. E. Sheppard, 193.
- Gelatines:** Jellying power of — and glues by the polarimeter; Determination of the. C. R. Smith, 419.
- Generator:** Hydrogen sulphide —; New. B. D. Steele and H. G. Denham, 276.
- Generator:** Laboratory use; Nitrogen — for. W. L. Badger, 32.
- Gerber's Fat Method:** Sour milk samples and — (Notes). F. E. Day, 411.

- Ghee:** Standard for —; Statutory. T. K. Ghose, 444.
- Glass and Metal Tubing:** Preventing rubber connections from slipping off —, and for attaching pressure pumps to taps; Clip for. C. A. Keane and G. Patchin, 64.
- Glass:** Metal joints; — to. E. C. McKelvy and C. S. Taylor, 343.
- Glassware:** Laboratory resistance —; Tests for. 396.
- Glassware:** Scientific — at the National Physical Laboratory; Volumetric testing of. J. G. Petavel, 154.
- Globulin, and Albumin Nitrogen:** Blood plasma; Determination of fibrin, — in. G. E. Cullen and D. Van Slyke, 226.
- Glucinum:** Iron, aluminium, chromium, —, titanium and zirconium by means of sodium carbonate; Separation of. P. Wenger and J. Wuhrmann, 26.
- Gluckmann's Method:** Mercury by —; Estimation of. A. Abelmann, 238.
- Glue Jellies:** Strength of —; Testing the. W. H. Low, 232.
- Glue:** Tensile strength of —; Determination of the. G. Hopp, 233.
- Glues:** Gelatines and — by the polarimeter; Determination of the jellying power of. C. R. Smith, 419.
- Glycerol:** Trimethyleneglycol; Estimation of — in presence of. C. A. Rojahn, 147, 233.
- Glycerophosphates:** Inorganic phosphate in —; Detection of. J. L. Lizius, 370.
- Glycogen:** —; Colorimetric estimation of. R. Thieulin, 375.
- Glycol:** —; Estimation of. B. Müller, 338.
- Glyoxylic Acid:** Adamkiewicz protein reaction and a new colour test for —. W. R. Fearon, 455.
- Gouy:** Thermoregulator. T. S. Sligh, Junr., 156.
- Government Analytical Laboratory and Assay Office:** Work of the —, Cairo, Egypt, during the Period 1913-1919; Report on the. A. Lucas, 431.
- Government Chemist:** Work of the Government Laboratory for the year ended March 31, 1919; Report of — upon the. 113.
- Government Chemist:** Work of the Government Laboratory for the Year ended March 31, 1920, with Appendices; Report of the — upon the. 464.
- Gravimetric Analysis:** Error; Theory of —, with special consideration of sources of —. L. Moser, 277.
- Greases:** —; Consistency of. F. S. Clulow and C. W. Taylor, 418.
- Guanidine Content:** Fæces in idiopathic tetany; — of. J. S. Sharpe, 142.
- 
- Hæmoglobin Determination:** Various methods; Comparative study of — by. F. S. Robscheit, 176.
- Hæmoglobin:** Methæmoglobin and — in blood; Method for the determination of. W. S. McEllroy, 307.
- Haldane General Air Analysis Apparatus:** —; An improvement in the. R. C. Frederick, 409.
- Halogen:** Organic compounds; Estimation of — in. F. B. Dains and R. Q. Brewster, 383.
- Halogen:** Organic substances; Estimation of — in. W. A. Van Winkle and G. M. Smith, 180.
- p-Halogen Phenacyl Esters:** Acids; Identification of. V. —. W. L. Judefind and E. E. Reid, 267.
- Halogens:** Air; Copper flame test for — in. A. B. Lamb, P. W. Carleton, W. S. Hughes, and L. W. Nichols, 151.
- Halogens:** Electrolytic estimation of the —; Indirect method for the. J. H. Reedy, 59.
- Hardwoods:** Proximate analysis of —; Studies on *Quercus agrifolia*. W. H. Dore, 456.

- "Heat-Rise" Method:** Sulphuric acid and oleum; The — of testing. R. Curtis and F. D. Miles, 186.
- Heavy Metals:** Phosphates of —; Estimation of phosphoric acid in. F. Seeligmann, 393.
- Heavy Mineral Oils:** Specific heat of —; Determination of the. H. S. Bailey and C. B. Edwards, 420.
- Heavy Mineral Oils:** Tarry and carbonised substances in —; Relation between the quantities of. W. Steinkopf and H. Winternitz, 420.
- Hehner Value:** Fats and oils; — of. Goldschmidt, 413.
- Hexabromide Method:** Linseed oil; New — for. L. L. Steele and F. M. Washburn, 101.
- Higher Fatty Acids:** Cholesterol and the —; Study of the nephelometric values of. II. F. A. Czonka, 181.
- Histamine:** Proteins; Colorimetric estimation of — in. M. T. Hanke and K. K. Koessler, 455.
- Histidine:** Protein; Colorimetric estimation of — in. M. T. Hanke and K. K. Koessler, 454.
- Honey:** Invertase in —; Detection of. A. Caillas, 174.
- Honey:** Melecitose in —; Occurrence of. C. S. Hudson and S. F. Sherwood, 136.
- Hubbard Squash Seed Oil:** —; Composition of. W. F. Baughman and G. S. Jamieson, 140.
- Human Organism:** Zinc in the —. S. Giaya, 378.
- Husks:** Cacao nibs and —; Estimation of methyl alcohol in. Von Koers, 413.
- Hydrocarbon:** Raw and vulcanised rubber; Direct estimation of rubber — in. W. K. Lewis and W. H. McAdams, 339.
- Hydrocarbon:** Squalene: A highly unsaturated — in shark liver oil. M. Tsujimoto, 102.
- Hydrocarbons:** Bacteria; Separation of — by the aid of. J. Tausz and M. Peter, 228.
- Hydrocarbons:** Coal-gas; An investigation into the composition of the unsaturated — present in. F. S. Sinnatt and L. Slater, 85.
- Hydrocarbons:** Petrol; Estimation of aromatic — in. D. Florentin and H. Vandenbergh, 271.
- Hydrocarbons:** Petroleum spirits; Rapid method of estimating aromatic — in. W. Hess, 417.
- Hydrochloric Acid:** Iron, applicable in the presence of —, phosphorus, oxy-acids, and organic matter; A rapid volumetric method for the estimation of. H. D. Richmond and E. M. Ison, 258.
- Hydrochloric Acid Solution:** Cuprous chloride for use in gas analysis; Preparation of a — of. F. C. Krauskopf and L. H. Purdy, 185.
- Hydrocyanic Acid:** Beans; Estimation of — from. A. Czapski, 306.
- Hydrocyanic Acid:** —; Estimation of. R. L. Morris, 383.
- Hydrocyanic Acid:** *Phaseolus lunatus* beans; Yield of — by. H. Lührig, 174.
- Hydrocyanic Acid:** Poisoning; Detection of — in cases of. L. Chelle, 21.
- Hydrogen Electrode:** Amino acids by means of the —; Determination of. E. L. Tague, 144.
- Hydrogen Electrode:** —; Electrometric titrations with a. W. D. Treadwell and L. Weiss, 341.
- Hydrogen Electrode:** —; Simple. C. H. Bailey, 155.
- Hydrogen:** Electrolytic —; Laboratory apparatus for preparing. W. G. Palmer, 464.
- Hydrogen Ion Concentration:** Abnormal milk based on —; Detection of. J. C. Baker and L. L. Van Slyke, 139.
- Hydrogen Ion Concentration:** —; Determination of. J. W. M. Bunker, 189.

- Hydrogen Ions:** Milk; Concentration of — in. J. Tillmans, 450.
- Hydrogen Sulphide Generator:** —; New. B. D. Steele and H. G. Denham, 276.
- Hydrogenated Oils:** —; Analysis of. A. Grün, 310.
- Hydrosulphides:** Sulphides, thiosulphates, and sulphites; Volumetric estimation of — in the presence of. A. Wöber, 390.
- Idiopathic Tetany:** Faeces in —; Guanidine content of. J. S. Sharpe, 142.
- Ignition Temperatures:** Soap-bubble method; Determination of — by the. A. G. White and T. W. Price, 28.
- Incompletely Nitrated Phenol:** Mother-liquors of melinite; Estimation of — in the. Marquerol and P. Carré, 236.
- Indian:** Turpentine and rosin, 49.
- Indican:** Urine and blood; Detection of — in. A. Jolles, 143.
- Indicators:** Carbon dioxide and oxygen in air and flue gas; — for. L. H. Milligan, D. O. Crites, and W. S. Wilson, 426.
- Indole:** Biological media; Estimation of — in. H. F. Zoller, 177.
- Ink:** Writing; Estimation of the age of — in. C. A. Mitchell, 247.
- Inorganic Analysis, Abstracts:** 25, 56, 109, 148, 182, 237, 271, 313, 341, 388, 425, 459.
- Inorganic Phosphate:** Glycerophosphates; Detection of — in. J. L. Lizzius, 370.
- Insoluble Solids:** Jams, preserves, and marmalades; Estimation of — in. C. A. Clemens, 100.
- Inspectors of Foods:** Work of — for the year 1918-19; Report on the. A. W. J. Macfadden, 243.
- Institute of Chemistry:** 160, 246.
- Instrument:** Vapour tension; — for measuring. H. Moore, 239.
- Invertase:** Honey; Detection of — in. A. Caillas, 174.
- Iodic Acid:** Radium from barium by means of —; Differentiation of. G. Deniges, 462.
- Iodic Acid:** Gaseous ammonia; — as a characteristic microchemical reagent for. G. Denigès, 391.
- Iodic Acid:** Soluble and insoluble calcium, strontium, and barium compounds; — as a reagent for the microchemical identification of. G. Denigès, 273.
- Iodimetric Estimation:** Arsenic acid; — of. P. Fleury, 389.
- Iodimetric Estimation:** Chromium; Influence of atmospheric oxygen on the — of. O. Meindl, 313.
- Iodimetric Estimation:** Sugars; — of. H. M. Judd, 224.
- Iodine Value:** Fats; Comparison of different methods for estimating the — of. T. Sundberg and M. Lundborg, 338.
- Iodoform Reaction:** Lieben —; Sensitive form of the. R. Kunz, 458.
- Ipecacuanhic acid:** Ipecacuanha preparations; Estimation of — in. B. Huerre, 371.
- Iron and Aluminium Salts:** Calcium and magnesium in the presence of —; Estimation of. E. Canals, 426.
- Iron:** Copper and iron in lead and lead oxides; Colorimetric method of estimating. C. R. Hardy, 272.
- Iron:** Ferrous —; Estimation of. J. M. Kolthoff, 151.
- Iron:** Hydrochloric acid, phosphorus, oxy-acids, and organic matter; A rapid volumetric method for the estimation of —, applicable in the presence of. H. D. Richmond and E. M. Ison, 258.
- Iron:** —, aluminium, chromium, glucinum, titanium and zirconium by means of sodium carbonate; Separation of. P. Wenger and J. Wuhmann, 26.
- Iron:** —; Volumetric estimation of. J. Houben, 151.

- Iron:** Mercury, —, and vanadium in the same solution; Volumetric estimation of. G. Hinard, 460.
- Iron:** Molybdenum in steel and —; Qualitative and quantitative test for. S. L. Malowan, 111.
- Iron Ore:** —; Analysis of. E. Little and W. L. Hult, 237.
- Iron:** Phosphorus in — and steel, ores and slags; Examination of the methods used in estimating. H. Kinder, 461.
- Iron:** Prussian blue; Separation of — from aluminium by precipitation as. H. Hale and G. O. Burr, 460.
- Iron:** Rotating reductors in estimation of —; Application of. W. Scott, 60.
- Isopropyl Alcohol:** Refractive indices of mixtures of — and acetone; Note on the. D. M. Palmer, 302.
- Italian Polished Rice:** Natural rice and of —; Chemical composition of. G. Issoglio, 451.
- Italian Puzzuolanas:** Titanium in certain —; Estimation of. A. Cavazzi, 62.
- Jams:** Soluble solids in —, preserves, and marmalades; Estimation of. C. A. Clemens, 100.
- Jellies:** Glue —; Testing the strength of. W. H. Low, 232.
- Jellying Power:** Gelatines and glues by the polarimeter; Determination of the — of. C. R. Smith, 419.
- Juices:** Red wines and fruit —; Acidimetry of. A. M. Macmillan and A. Tingle, 223.
- Keeping Quality:** Milk; Determination of — of. J. C. Baker and L. L. Van Slyke, 140.
- Kjeldahl Method:** Cereals and soils; Boric acid modification of the — for the analysis of. F. M. Scales and A. P. Harrison, 223.
- Kreis Reaction:** Cottonseed oil products; — of. W. B. Smith, 370.
- Kreis Test:** Phloroglucinol reagent for the —; Method of preparing. H. W. Dixon, 181.
- Krogh's Method:** Carbon dioxide, oxygen, and combustible gases by — of micro-analysis; Estimation of. H. O. Schmit-Jensen, 183.
- Laboratory Apparatus:** Electrolytic hydrogen; — for preparing. W. G. Palmer, 464.
- Laboratory Control:** White flour milling; — of. B. R. Jacobs and O. S. Rask, 415.
- Laboratory Porcelain:** —; Tests for. 397.
- Laboratory Resistance Glassware:** —; Tests for. 396.
- Lacquer:** Shellac, shellac varnish, and —; Rapid examination of. T. L. Crossley, 386.
- Lactic Acid:** Oxalic acid and —; Detection of, especially their differentiation from tartaric acid. K. Brauer, 338.
- Lactose:** Dextrose in the presence of —; Estimation of. E. Hildt, 179.
- Lævulose:** —; Specific rotation of. W. C. Vosburgh, 383.
- Lead:** Acetic acid in white —; Modification of the Thompson method for the estimation of. L. McMaster and A. E. Goldstein, 185.
- Lead:** Acid solution; Estimation of — in. N. Evers, 391.
- Lead-Antimony Alloys:** Antimony in —; Estimation of. L. Bertiaux, 426.
- Lead:** Bismuth; Separation and estimation of — and. G. Luff, 152.
- Lead:** Cassia Oil; Rapid method of estimating — in. O. F. Lubatti, 136.
- Lead Chromate:** Lead as —; Titration of. J. M. Kolthoff, 427.

- Lead:** Chromium; Electrolytic separation of — from, and the analysis of chrome yellow and other similar mineral pigments. J. Milbauer and I. Setlik, 60.
- Lead:** Copper and iron in — and — oxides; Colorimetric method of estimating. C. R. Hardy, 272.
- Lead Dioxide:** Litharge; Colorimetric determination of — in. W. V. Morgan, 25.
- Lead:** — Chromate; Titration of — as. J. M. Kolthoff, 427.
- Lead Oxides:** Copper and iron in lead and —; Colorimetric method of estimating. C. R. Hardy, 272.
- Lead:** Water on —; Action of. J. F. Liversseege and A. W. Knapp, 152.
- Library:** Chemical Society; The — of the. A Record of a Recent Attempt at Co-operation (Review). F. W. Clifford, 67.
- Lieben Iodoform Reaction:** —; Sensitive form of the. R. Kunz, 458.
- Light Oil Fractionation:** Still-head for —; Constant temperature. F. M. Washburn, 112.
- Ligneous Impurities:** Cotton and cotton waste for nitration purposes; Detection of — in. F. L. Barrett, 231.
- Linseed Oil:** Hexabromide method for —; New. L. L. Steele and F. M. Washburn, 101.
- Linseed Oil:** Oxygen absorption of —; Factors affecting the. A. de Waele, 137.
- Liquid Mixtures:** Volatile —; Fuel value for. G. Barsky, 106.
- Liquids:** Distillation of frothing —; Flask for the. E. Lenk, 278.
- Liquids:** Small quantities of —; Surface tensimeter for. C. C. Kiplinger, 191.
- Litharge:** Lead dioxide in —; Colorimetric determination of. W. V. Morgan, 25.
- Lithopone:** Natural barytes in —, etc.; Detection of. S. Stewart, 341.
- Litmus Paper:** Red —; The treatment of (Notes). T. J. Ward, 412.
- Machine:** Precipitates; — for washing. E. Sinkinson, 94.
- Magnesium:** Blood; Estimation of — in. W. Denis, 228.
- Magnesium:** Calcium and — in the presence of iron and aluminium salts; Estimation of. E. Canals, 426.
- Magnesium:** Sodium and potassium chlorides; Separation of — from. S. Palkin, 392.
- Maize:** Oil in —; Effect of mould on the. F. Rabak, 101.
- Malt Diastase:** Enzymic extract (Polyzime) as compared with —; Properties of an. J. Takamine, Junr., and K. Oshima, 305.
- Malt:** Moisture in —; Determination of. T. J. Ward, 47.
- Manganese:** Biological material; Estimation of — in. C. K. Reiman and A. S. Minot, 306.
- Manganese:** Chromium and —; Separation of. M. Herschkowitsch, 272.
- Manganese:** —; Volumetric estimation of. P. Nicolardot, A. Reglade, and M. Geloso, 237.
- Mangrove:** Mixed tannin extracts; Detection of — [tannin] in. E. Schell, 425.
- Mannite:** Aqueous solutions; Physical properties of — and its. J. M. Braham, 23.
- Margarine:** Coal-tar dyes in butter and —; Detection of (Notes). G. Van B. Gilmour, 173.
- Marine Algæ:** Chemical composition of —; Seasonal variation in the. L. Lapicque, 103.
- Marmalades:** Jams, preserves, and —; Estimation of insoluble solids in. C. A. Clemens, 100.
- Marsh-Berzelius Process:** Arsenic, with notes on the chemistry of the —; A new process for the estimation of. B. S. Evans, 8.
- Marsh's Apparatus:** Organic arsenic compounds used as drugs; Behaviour in — of certain. D. Ganassini, 99.
- Meat:** Incipient putrefaction in —; Detection of. R. Strohecker, 449.

- Meat:** Nitrous acid, especially in salt —; Estimation of small quantities of. F. Auerbach and G. Riess, 141.
- Media:** Indole in biological —; Estimation of. H. F. Zoller, 177.
- Melecitose:** Honey; Occurrence of — in. C. S. Hudson and S. F. Sherwood, 136.
- Melinite:** Mother-liquors of —; Estimation of incompletely nitrated phenol in the. Marquoyrol and P. Carré, 236.
- Melting-Points:** Determination of —; Apparatus for the. L. M. Dennis, 241.
- Membrane Filters:** Chemical analysis with —. R. Zsigmondy and G. Jander, 30.
- Mercury:** Gluckmann's method; Estimation of — by. A. Abelmann, 238.
- Mercury:** —; Estimation of. C. M. Bouton and L. H. Duschak, 273.
- Mercury:** —, iron, and vanadium in the same solution; Volumetric estimation of. G. Hinard, 460.
- Mercury:** —; The estimation of. H. B. Gordon, 41.
- Messinger's Method:** Acetone by —; Analysis of. L. F. Goodwin, 143.
- Metal Joints:** Glass to —. E. C. McKelvy and C. S. Taylor, 343.
- Metal Tubing:** Preventing rubber connections from slipping off glass and —, and for attaching pressure pumps to taps; Clip for. C. A. Keane and G. Patchin, 64.
- Metallic Aluminium:** Aluminium dross; Estimation of — in. F. K. Bezenberger, 109.
- Metals:** Phosphates of heavy —; Estimation of phosphoric acid in. F. Seeligmann, 393.
- Meters:** Gas —; Calibration, accuracy, and use of. A. Krogh, 395.
- Methæmoglobin:** Blood; Determination of — in. W. C. Stadie, 176.
- Methæmoglobin:** Blood; Method for the determination of — and hæmoglobin in. W. S. McEllroy, 307.
- Method of Folin and Denis:** Tyrosine by the —; Colorimetric estimation of. R. A. Gortner and G. E. Holm, 388.
- Methyl Alcohol:** Cacao nibs and husks; Estimation of — in. Von Koers, 413.
- Methyl Alcohol:** Estimation of —; A new method for the. S. B. Schryver and C. C. Wood, 164.
- Methyl Alcohol:** Methods for the detection of —; Critical study of. A. O. Gettler, 311.
- Methyl Alcohol:** Spirits; Detection of — in. P. Hasse, 234.
- Methyl Chloroformates:** Analysis; Technical — and their. M. Delépine, 232.
- $\beta$ -Methylumbelliferone:** Acetylacetic acids and its esters; Formation of — as a reaction of. V. Arreguine and E. D. Garcia, 135.
- Micro-Analysis:** Carbon dioxide, oxygen, and combustible gases by Krogh's method of —; Estimation of. H. O. Schmit-Jensen, 183.
- Microchemical Identification:** Cyanic acid; — of. R. Fosse, 458.
- Microchemical Reagent:** Gaseous ammonia; Iodic acid as a characteristic — for. G. Denigès, 391.
- Micro-Method:** Acetone; — for the estimation of. M. Richter-Quittner, 144.
- Microscopical Method:** Molecular weights; Barger's — of determining. Part I. Kumao Yamakami, 240.
- Microscopy:** Pulverised ores; Approximate quantitative — of. W. H. Coghill and J. P. Bonardi, 188.
- Milk:** Abnormal —; New dye for the recognition of. I. J. O. de Vries, 450.
- Milk:** Added water in —; Estimation of. J. Goldan, 20.
- Milk:** British East Africa; The composition of — in. V. H. Kirkham and A. C. Barnes, 298.
- Milk:** Composition of —; Hours of labour as affecting the. G. C. Jones, 138.
- Milk:** Cow's —; Carbonic acid and carbonates in. L. L. Van Slyke and J. C. Baker, 139.
- Milk:** Dry solids-not-fat in separated —; Estimation of. R. Eichhoff, 303.

- Milk:** Hydrogen ion concentration; Detection of abnormal — based on. J. C. Baker and L. L. Van Slyke, 139.
- Milk:** Hydrogen ions in —; Concentration of. J. Tillmans, 450.
- Milk:** Keeping quality of —; Determination of. J. C. Baker and L. L. Van Slyke, 140.
- Milk:** Poor and adulterated —; The differentiation between. T. R. Hodgson, 91.
- Milk:** Reaction of freshly drawn —; Conditions causing variation in. L. L. Van Slyke and J. C. Baker, 139.
- Milk Records:** Certain —; An examination of. G. W. Monier-Williams, 203.
- Milk:** Ropy —; Acidity of. K. Freear and E. C. V. Venn, 376.
- Milk Samples:** Gerber's fat method; Sour — and (Notes). F. E. Day, 411.
- Milk:** Spontaneous curdling of —; Serum obtained by the. J. Grossfeld, 336.
- Milling Grade:** Flour; Pentosans as a basis in determining the — of. J. Gerum, 334.
- Milling:** Wheat flour —; Laboratory control of. B. R. Jacobs and O. S. Rask, 415.
- Mineral Constituents:** Organic substances, especially those containing phosphorus; Estimation of — in. J. Grossfeld, 234.
- Mineral Oils:** Specific heat of heavy —; Determination of the. H. S. Bailey and C. B. Edwards, 420.
- Mineral Oils:** Tarry and carbonised substances in heavy —; Relation between the quantities of. W. Steinkopf and H. Winternitz, 420.
- Mineral Pigments:** Chrome yellow and other similar —; Electrolytic separation of lead from chromium and the analysis of. J. Milbauer and I. Setlik, 60.
- Ministry of Food Reports:** Oils and Fats Branch. Report by the Committee of Analysts on Standards of Good Merchantable Quality, 286.
- Ministry of Food Reports:** Oils and Fats Branch. Report by the Committee of Analysts on Standard Methods of Analysis of Seeds, Nuts and Kernels, Fats and Oils, and Fatty Residues. 278.
- Ministry of Health:** Therapeutic substances; Effective control of certain. 200.
- Moisture:** Beet-sugar factory products; Estimation of — in. V. L. Aikin, 450.
- Moisture:** Blast furnace coke; — in. W. H. George, 57.
- Moisture Content:** Cereals; — of. O. A. Nelson and G. A. Hulett, 100.
- Moisture:** Malt; Determination of — in. T. J. Ward, 47.
- Molecular Weights:** —; Barger's microscopical method of determining. Part I.: Kumao Yamakami, 240.
- Molybdenum:** —; Estimation of. J. P. Bonardi and E. P. Barrett, 427.
- Molybdenum:** Rotating zinc reductor to the estimation of —; Application of the. W. Scott, 316.
- Molybdenum:** Steel and iron; Qualitative and quantitative test for. S. L. Malowan, 111.
- Molybdenum:** Sulphide; Gravimetric estimation of — as. J. Sterba-Böhm and J. Vostrebal, 274.
- Molybdenum:** Xanthic acid; Detection of — by means of. J. Koppel, 60.
- Momordica Seeds:** Fat of —. C. E. Corfield and E. Caird, 102.
- Mörner-Sjöqvist Process:** Urea; Braunstein's modification of the — for the estimation of. A. H. Todd, 229.
- Motor Exhaust Gas:** Carbon monoxide in air contaminated with —; Determination of. M. C. Teague, 459.
- Motor Gasoline:** — [Petrol] properties, laboratory methods of testing and practical specifications. E. W. Dean, 106.
- Mould:** Oil in maize; Effect of — on the. F. Rabak, 101.
- Mullet:** Swimming bladder of the red —; Analysis of the. L. and D. Leroux, 143.

- Mustard:** Allyl — oil in black —; Estimation of. D. Raquet, 368.  
**(Mustard Gas):** Dichloroethyl sulphide — in air; Quantitative estimation of traces of. M. Yablick, G. S. Perrott, and N. H. Furman, 146.  
**(“Mustard Gas”):** Dichlorodiethyl sulphide —; Reactions of. F. Martin, 419.  
**Mustard Oil:** Black mustard; Estimation of allyl — in. D. Raquet, 368.  
**Mutton Bird:** Oil. N. Evers and H. J. Foster, 376.
- Namias:** Arsenious acid in the volumetric method of —; Use of. F. de Bacho, 150.  
**Naphthalene:** Tar, tar oil, and crude — by conversion into its picrate; Method for the direct estimation of — in. Knoblauch, 23.  
**National Physical Laboratory:** Scientific glassware at the —; Volumetric testing of. J. G. Petavel, 154.  
**Nephelometer:** Chlorine with the —; Determination of. A. B. Lamb, P. W. Carleton, and W. B. Meldrum, 150.  
**Nephelometric Values:** Cholesterol and the higher fatty acids; Study of the — of. H. F. A. Czonka, 181.  
**Neutralising Agents:** Butter and similar products; Detection and estimation of — in. L. W. Ferris, 369.  
**Nibs:** Cacao — and husks; Estimation of methyl alcohol in. Von Koers, 413.  
**Nickel and Copper Oxides:** Ferric hydroxide; Simultaneous precipitation of — with. E. Torporescu, 393.  
**Nickel:** Arsenic; Electro-Analytical separation of — or cobalt from. N. H. Furman, 428.  
**Nickel:** —; Volumetric estimation of. J. Holluta, 61.  
**Nickel:** Steels by direct titration; Estimation of — in. E. H. Hall, 392.  
**Nitrates:** Nitrocellulose and inorganic — by nitrometer; Estimation of nitrogen in. E. G. Beckett, 185.  
**Nitrates:** Nitrometer determination of —; Effect of chlorides on the. M. T. Sanders, 184.  
**Nitrates:** Soil; Determination of — in. A. L. Whiting, T. E. Richmond, and W. R. Schoonover, 460.  
**Nitrates:** Sulphuric Acid; Estimation of — and nitrites in. L. B. Sefton, 314.  
**Nitration Purposes:** Cotton and cotton waste for —; Detection of ligneous impurities in. F. L. Barrett, 231.  
**Nitrites:** Sulphuric acid; Estimation of nitrates and — in. L. B. Sefton, 314.  
**Nitro-Aromatic Derivatives:** —; Volumetric estimation of. D. Florentin and H. Vandenberghe, 234.  
**Nitro Group:** Aromatic organic compounds; Estimation of the — in. T. Callan, J. A. R. Henderson, and N. Strafford, 235.  
**Nitro Groups:** Young and Swain's method; Estimation of — by. L. Desvergnès, 312.  
**Nitrocellulose:** Nitrogen in — and inorganic nitrates by nitrometer; Estimation of. E. G. Beckett, 185.  
**Nitroform:** Potassium permanganate; Estimation of — by. P. V. McKie, 266.  
**Nitrogen:** Arginine — by Van Slyke's method; Modification of the apparatus for the estimation of. G. E. Holm, 189.  
**Nitrogen Bases:** The aromatic series and of some alkaloids; Determination of the relative strengths of some — of. F. Arnall, 384.  
**Nitrogen:** Blood plasma; Determination of fibrin, globulin, and albumin — in. G. E. Cullen and D. Van Slyke, 226.  
**Nitrogen Generator:** Laboratory use; — for. W. L. Badger, 32.  
**Nitrogen:** Nitrocellulose and inorganic nitrates by nitrometer; Estimation of. E. G. Beckett, 185.

- Nitrogen:** Nitroglycerine; Application of Devarda's method to the estimation of — in. Koehler, Marqueyrol, and Jovinet, 420.
- Nitroglycerine:** Devarda's method to the estimation of nitrogen in —; Application of. Koehler, Marqueyrol, and Jovinet, 420.
- Nitroglycerine:** —; The estimation of. H. D. Richmond, 260.
- Nitrometer Determination:** Nitrates; Effect of chlorides on the — of. M. T. Sanders, 184.
- Nitrometer:** Nitrogen in nitrocellulose and inorganic nitrates by —; Estimation of. E. G. Beckett, 185.
- Nitrous Acid:** Salt meat; Estimation of small quantities of —, especially in. F. Auerbach and G. Riess, 141.
- Nitrous Gases:** Analysis of —; Method for the. A. Geake and F. J. Squire, 25.
- Nitrous Gases:** Gases; Method for the analysis of — and its application to the study of towers for the absorption of such. A. Geake and F. J. Squire, 61.
- Noli Palm:** Oil; Fruit of the South American — as a source of, 48.
- Notes:** 18, 98, 173, 222, 303, 411, 448.
- Oat Straw:** Sugar in — and cattle foods. S. H. Collins and A. Spiller, 175.
- Oats:** Cereal products; Simple method for measuring the acidity of: Its application to sulphured and unsulphured —. V. Birkner, 19.
- Obituary Notice:**  
**Fisher, Walter William, M.A., F.I.C., 201.**
- Oil and Fat Preparations:** Ammonia in —; Estimation of. N. Welwart, 425.
- Oil:** Maize; Effect of mould on the — in. F. Rabak, 101.
- Oil:** Shark's eggs; Occurrence of squalene in the — from. M. Tsujimoto, 102.
- Oil:** South American Noli palm as a source of —; Fruit of the. 48.
- Oil:** Sulphur; Estimation of minute quantities of — in. L. S. Bushnell and H. S. Clark, 315.
- Oils and Fats Branch:** Ministry of Food Reports: Report by the Committee of Analysts on Standard Methods of Analysis of Seeds, Nuts and Kernels, Fats and Oils, and Fatty Residues. 278. Report by the Committee of Analysts on Standards of Good Merchantable Quality. 286.
- Oils:** Fats and —; Hehner value of. Goldschmidt, 413.
- Oils:** Hydrogenated —; Analysis of. A. Grün, 310.
- Oils:** Sulphur in —; Method for the estimation of. C. E. Waters, 274.
- Okra:** Seed oil. G. S. Jamieson and W. F. Baughman, 141.
- Oleum:** Sulphuric acid and —; The "heat-rise" method of testing. R. Curtis and F. D. Miles, 186.
- Olive Oils:** Oxy-fatty acids in extracted —; Estimation of. Stadlinger, 414.
- Opium:** —; Assay of. A. Jermstadt, 371.
- Opium Poisoning:** —; Note on. E. H. Hankin and D. Chatterji, 171.
- Ore Analysis:** Bismuth as phosphate and its application in —; The Gravimetric estimation of. W. R. Schoeller and E. P. Waterhouse, 435.
- Ore:** Iron —; Analysis of. E. Little and W. L. Hult, 237.
- Ores:** Phosphorus in iron and steel, — and slags; Examination of the methods used in estimating. H. Kinder, 461.
- Ores:** Pulverised —; Approximate quantitative microscopy of. W. H. Coghill and J. P. Bonardi, 188.
- Ores:** Titanium and zirconium in zirconium —; Estimation of. G. E. F. Lundell and H. B. Knowles, 342.
- Ores:** Tungsten —; Analysis of. J. Erlich, 275.
- Organic Acids:** Amino-acids, —, and organic bases; Rapid volumetric methods for the estimation of. F. W. Foreman, 380.

- Organic Acids:** Urine; Titration of — in. D. Van Slyke and W. W. Palmer, 229.
- Organic Analysis, Abstracts:** 21, 51, 105, 143, 179, 230, 267, 308, 336, 379, 417, 457.
- Organic Analysis:** Fractionation with photospectrometry in —; Combination of W. E. Matthewson, 318.
- Organic Arsenic Compounds:** Drugs; Behaviour in Marsh's apparatus of certain — used as. D. Ganassini, 99.
- Organic Bases:** Amino-acids, organic acids, and —; Rapid volumetric methods for the estimation of. F. W. Foreman, 380.
- Organic Chlorine:** Chromic acid method; Estimation of — or bromine by the. P. W. Robertson, 147.
- Organic Compounds:** Arsenic in —; Estimation of. L. J. Rogers, 98.
- Organic Compounds:** Halogen in —; Estimation of. F. B. Dains and R. Q. Brewster, 383.
- Organic Compounds:** Nitro group in aromatic —; Estimation of the. T. Callan, J. A. R. Henderson, and N. Strafford, 235.
- Organic Emulsions:** Water in petroleum and other —; Convenient method for the determination of. E. W. Dean and D. D. Stark, 270.
- Organic Matter:** Hydrochloric acid, phosphorus, oxy-acids, and —; A rapid volumetric method for the estimation of iron, applicable in the presence of. H. D. Richmond and E. M. Ison, 258.
- Organic Solvents:** Alcohol and other —; Detection of water in. F. Henle, 388.
- Organic Substances:** Fluorine in —; Estimation of. E. Paternò, 147.
- Organic Substances:** Halogen in —; Estimation of. W. A. Van Winkle and G. M. Smith, 180.
- Organic Substances:** Mineral constituents in —, especially those containing phosphorus; Estimation of. J. Grossfeld, 234.
- Organic Sulphonic Acids:** Sulphates in the presence of —; Estimation of. T. Callan, J. A. R. Henderson, and R. Barton, 108.
- Oxalic Acid:** Colour test for —. L. H. Chernoff, 422.
- Oxalic Acid:** Rhubarb products; — in rhubarb and the removal of — from. J. Angerhausen, 334.
- Oxalic Acid:** Tartaric acid; Detection of — and lactic acid, especially their differentiation from. K. Brauer, 338.
- Oxy-Acids:** Hydrochloric acid, phosphorus, —, and organic matter; A rapid volumetric method for the estimation of iron, applicable in the presence of. H. D. Richmond and E. M. Ison, 258.
- Oxy-Fatty Acids:** Extracted olive oils; Estimation of — in. Stadlinger, 414.
- Oxygen Absorption:** Linseed oil; Factors affecting the — of. A. de Waele, 137.
- Oxygen:** Carbon dioxide and — in air and flue gas; Indicators for. L. H. Milligan, D. O. Crites, and W. S. Wilson, 426.
- Oxygen:** Carbon dioxide, —, and combustible gases by Krogh's method of micro-analysis; Estimation of. H. O. Schmit-Jensen, 183.
- Oxygen:** Chromium; Influence of atmospheric — on the iodimetric estimation of. O. Meindl, 313.
- Oxygen:** Copper-ammonia-ammonium chloride reagent; Determination of — by the. W. L. Badger, 186.
- Oxygen:** Sodium perborate and in perborate soap powders; The estimation of the available — in. H. Trickett, 88.
- Palm:** Oil; Fruit of the South American Noli — as a source of. 48.
- Paracymene:** Solvent; — as a. A. S. Wheeler, 422.
- Paraffins:** Commercial toluene; Estimation of — in. E. Lewis, 148.
- Paraffins:** Commercial toluols; Estimation of — and unsaturated compounds in. H. G. Evans, 54.

- Paraldehyde:** Acetaldehyde in —; Estimation of. F. V. Bruckhausen, 179.
- Paraldehyde:** Acetaldehyde in —; Estimation of. W. Stuve, 336.
- Paraguay:** Tea. C. R. Hennings, 334.
- Peat:** Grade of —; Determination of. G. Keppeler, 377.
- Pectins:** Various plants; — in. A. J. W. Hornby, 377.
- Pentosans:** Milling grade of flour; — as a basis in determining the. J. Gerum, 334.
- Pentosans:** Phenylhydrazine method of determining —; Modification of the. P. Menaul and C. T. Dowell, 23.
- Perborate Soap Powders:** Sodium perborate and in —; The estimation of the available oxygen in. H. Trickett, 88.
- Perchlorate:** Potassium as —; Estimation of. G. P. Baxter and F. E. Rupert, 462.
- Perchlorate:** Potassium as —; Estimation of. G. P. Baxter and M. Kobayashi, 238.
- Perchlorate:** Potassium as the —; A study of the determination of, and the separation from sodium, etc. R. L. Morris, 349.
- Permanganate Method:** Copper; — for. L. F. Clark, 57.
- Petrol:** Aromatic hydrocarbons in —; Estimation of. D. Florentin and H. Vandenberghé, 271.
- [**Petrol**]: Motor gasoline — properties, laboratory methods of testing and practical specifications. E. W. Dean, 106.
- Petroleum Oils:** Sulphur in —; Rapid method for the determination of. A. W. Christie and C. S. Bisson, 187.
- Petroleum:** —, — residues, or other oils immiscible with water; Distillation of. H. Offermann, 458.
- Petroleum Spirit:** Fuel oils, particularly —, by the picric acid value; Characterisation of. J. Tausz and E. Schnabel, 53.
- Petroleum Spirit:** Toluene-petrol fraction of Borneo petroleum; Rectified — from the. W. A. Silvester, 338.
- Petroleum Spirit:** Vegetable oils; Detection of minute quantities of — in. M. Aida, 385.
- Petroleum Spirits:** Aromatic hydrocarbons in —; Rapid method of estimating. W. Hess, 417.
- Petroleum:** Toluene-petrol fraction of Borneo —; Rectified — spirit from the. W. A. Silvester, 338.
- Petroleum:** Water in — and other organic emulsions; Convenient method for the determination of. E. W. Dean and D. D. Stark, 270.
- Phaseolus Lunatus Beans:** Hydrocyanic acid by —; Yield of. H. Lührig, 174.
- Phenacyl Bromide:** Acids by —; The identification of (Notes). H. E. Cox, 412.
- Phenol:** B.P. ointments; Estimation of — and salicylic acid in. G. D. Elsdon, 372.
- Phenol:** Homologues; Diazometric estimation of — and of certain of its. R. M. Chapin, 312.
- Phenol:** Mother-liquors of melinite; Estimation of incompletely nitrated — in the. Marqueyrol and P. Carré, 236.
- Phenol:** Phenols; Determination of — in the presence of certain other. R. M. Chapin, 385.
- Phenolphthalein:** Tetraiodophenolphthalein; Estimation of — as. S. Palkin, 372.
- Phenolsulphonic Acids:** Analysing —; Rapid method of. L. Desvergnés, 386.
- p*-**Phenylenediamine:** —; Estimation of. T. Callan and J. A. R. Henderson, 108.

- Phenylhydrazine Method:** Pentosans; Modification of the — of determining. P. Menaul and C. T. Dowell, 23.
- Phloroglucinol Reagent:** Kreis test; Method of preparing — for the. H. W. Dixon, 181.
- Phosphate:** Glycerophosphates; Detection of inorganic — in. J. L. Lizius, 370.
- Phosphate Method:** Zirconium by the —; Estimation of. G. E. F. Lundell and H. B. Knowles, 28.
- Phosphate:** Ore analysis; The gravimetric estimation of bismuth as — and its application in. W. R. Schoeller and E. P. Waterhouse, 435.
- Phosphates:** Phosphoric acid in — of heavy metals; Estimation of. F. Seeligmann, 393.
- Phosphates:** Zirconium and titanium as —; Separation of. J. Brown and H. T. Madden, 153.
- Phosphatides:** Aminoethanol and of choline appearing in the hydrolysis of —; Estimation of. P. A. Levene and T. Ingvaldsen, 452.
- Phosphoric Acid:** Phosphates of heavy metals; Estimation of — in. F. Seeligmann, 393.
- Phosphoric Acid:** Qualitative analysis in the presence of —. H. Remy, 182.
- Phosphorus:** Hydrochloric acid, —, oxy-acids, and organic matter; A rapid volumetric method for the estimation of iron, applicable in the presence of. H. D. Richmond and E. M. Ison, 258.
- Phosphorus:** Iron and steel, ores and slags; Examination of the methods used in estimating — in. H. Kinder, 461.
- Phosphorus:** Organic substances, especially those containing —; Estimation of mineral constituents in. J. Grossfeld, 234.
- Phosphorus:** Steel containing vanadium; Method for estimating — in. J. Maitchell, 26.
- Photometric:** Turbidimeter. W. G. Bowers and J. Moyer, 318.
- Photomicrography:** Simple apparatus; — with. T. J. Ward, 130.
- Photospectrometry:** Fractionation with — in organic analysis; Combination of. W. E. Matthewson, 318.
- Physical Properties:** Mannite and its aqueous solutions; — of. J. M. Braham, 23.
- Physico-Chemical Analysis:** Precipitates; New method for the — of. Application to the study of calcium phosphates. P. Jolibois, 65.
- Physico-Chemical Method:** Commercial chlorobenzene; — for the analysis of. F. Bourion, 271.
- Phytin:** Plant extracts; Determination of — in. A. Rippel, 416.
- Picrate:** Naphthalene in tar, tar oil, and crude naphthalene by conversion into its —; Method for the direct estimation of. Knoblauch, 23.
- Picric Acid Value:** Fuel oils, particularly petroleum spirit, by the —; Characterisation of. J. Tausz and E. Schnabel, 53.
- Pigments:** Lead from chromium; Electrolytic separation of, and the analysis of chrome yellow and other similar mineral —. J. Milbauer and I. Setlik, 60.
- Pigments:** —; Diffusing power of. W. K. Lewis and F. P. Baker, 422.
- Plant Extracts:** Phytin in —; Determination of. A. Rippel, 416.
- Plants:** Dextrose in — by a new biochemical method; Detection and characterisation of. E. Bourquelot and M. Bridel, 175.
- Plants:** Various —; Pectins in. A. J. W. Hornby, 377.
- Plastic Substances:** Asphaltum and other —; Determination of the softening-point of. D. F. Twiss and E. A. Murphy, 63.
- Platinum Wire:** Bead and flame tests; Substitutes for — in. C. C. Kiplinger, 278.
- Poisoning:** Hydrocyanic acid in cases of —; Detection of. L. Chelle, 21.
- Polarimetric Determinations:** Yellow light in —. L. Guglielmelli, 398.

- Polarisation Methods:** Cane sugar; Double — for the determination of. G. W. Rolfe and L. F. Hoyt, 224.
- Polenske and Reichert-Meissl Values:** Pressure upon the —; The effect of. V. H. Kirkham, 293.
- Polished Rice:** Natural rice and of Italian —; Chemical composition of. G. Issoglio, 451.
- Polymerisation Test:** Chinese wood-oil by the Browne —; The influence of the free fatty-acid content in the valuation of. P. E. Jameson, 328.
- (Polyzime):** Enzymic extract — as compared with malt diastase; Properties of an. J. Takamine, Junr., and K. Oshima, 305.
- Porcelain:** Laboratory —; Tests for. 397.
- Potash:** Derode method for determining —. T. E. Keith and H. E. Shiver, 27.
- Potassium and Sodium Chlorides:** Magnesium from —; Separation of. S. Palkin, 392.
- Potassium Anhydrotellurate:** —; Reaction of. P. Hulot, 238.
- Potassium:** Blood; Estimation of — and sodium in small quantities of. B. Kramer, 177.
- Potassium Chlorate:** Alkali solutions; — as a standardising substance for. H. B. Van Valkenburgh, 238.
- Potassium:** Cobaltinitrite method; Estimation of — by the. P. Wenger and C. Hémen, 393.
- Potassium Ferrocyanide:** —; Electrometric analysis with. E. Müller, 25.
- Potassium Hydrogen Phthalate:** Standard in volumetric analysis; — as a. W. S. Hendrixson, 239.
- Potassium:** Perchlorate; A study of the determination of — as the, and the separation from sodium, etc. R. L. Morris, 349.
- Potassium:** Perchlorate; Estimation of — as. G. P. Baxter and F. E. Rupert, 462.
- Potassium:** Perchlorate; Estimation of — as. G. P. Baxter and M. Kobayashi, 238.
- Potassium Permanganate:** Nitroform by —; Estimation of. P. V. McKie, 266.
- Potassium Permanganate:** Oxidation of benzidine sulphate with —; Volumetric estimation of sulphates by. P. L. Hibbard, 153.
- Potassium Permanganate:** Thiocyanates by means of —; Volumetric estimation of. R. Meurice, 429.
- Potassium:** —; Volumetric estimation of. G. Ajin, 462.
- Potassium:** — and sodium in the presence of each other; Estimation of. A. Quartaroli, 428.
- Potassium:** Qualitative reactions; Sensitiveness of. I.: —. O. Lutz, 315.
- Precipitates:** Physico-chemical analysis of —; New method for the. Application to the study of calcium phosphates. P. Jolibois, 65.
- Precipitates:** Washing —; Machine for. E. Sinkinson, 94.
- Preserves:** Insoluble solids in jams, —, and marmalades; Estimation of. C. A. Clemens, 100.
- President:** Retiring —; Annual address of the. 71.
- Pressure:** Polenske and Reichert-Meissl values; The effect of — upon the. V. H. Kirkham, 293.
- Pressure Pumps:** Taps; Clip for preventing rubber connections from slipping off glass or metal tubing, and for attaching — to. C. A. Keane and G. Patchin, 64.
- Protein:** Histidine in —; Colorimetric estimation of. M. T. Hanke and K. K. Koessler, 454.
- Protein Reaction:** Glyoxylic acid; Adamkiewicz — and a new colour test for. W. R. Fearon, 455.

- Proteins:** Gelatin, contained together with coagulable —, in feeding-stuffs, etc.; Estimation of. H. Wagner and G. Schöler, 20.
- Proteins:** Histamine in —; Colorimetric estimation of. M. T. Hanke and K. K. Koessler, 455.
- Proteins:** Tyrosin and dibasic amino acids in yeast —; Estimation of. P. Thomas and A. Chabas, 336.
- Proximate Analysis:** Hardwoods; — of: Studies on *Quercus agrifolia*. W. H. Dore, 456.
- Prussian Blue:** Iron from aluminium by precipitation as —; Separation of.
- Purity:** Commercial toluene; Criteria of the degree of — of. J. S. Lumsden, 54.
- Purity:** Important chemicals used in pyrotechnics; Short commercial analytical methods for the determination of — of. H. B. Faber and W. B. Stoddard, 314.
- Putrefaction:** Meat; Detection of incipient — in. R. Strohecker, 449.
- Puzzuolanas:** Titanium in certain Italian —; Estimation of. A. Cavazzi, 62.
- Pyrites:** Copper in — and — cinders; Electrolytic estimation of. E. Mengler, 58.
- Pyrotechnics:** Purity of important chemicals used in —; Shot commercial analytical methods for the determination of. H. B. Faber and W. B. Stoddard, 314.
- Qualitative Analysis:** Phosphoric acid; — in the presence of. H. Remy, 182.
- Qualitative and Quantitative Test:** Molybdenum in steel and iron; — for. S. I. Malowan, 111.
- Qualitative Reactions:** Sensitiveness of — I.: Potassium. O. Lutz, 315.
- Quantitative Analysis:** Cupferron in —; Use of. G. E. F. Lundell and H. B. Knowles, 237.
- Quantitative Analysis:** Fluoremetry. — by comparative fluorescence. L. J. Desha, 343.
- Quantitative Microscopy:** Pulverised ores; Approximate — of. W. H. Coghill and J. P. Bonardi, 188.
- Quercus Agrifolia:** Hardwoods; Proximate analysis of; Studies on —. W. H. Dore, 456.
- Quinine:** Estimating —; New method of. C. Bamberger, 415.
- Radium:** Barium by means of iodic acid; Differentiation of — from. G. Denigès, 462.
- Reagent:** "Cupferron" as a quantitative —; Bibliography of the use of. S. A. Braley, 58.
- Reagent:** Diphenylamine-sulphuric acid —; Preparation of. F. Haun, 382.
- Reagent:** Microchemical identification of soluble and insoluble calcium, strontium, and barium compounds; Iodic acid as a — for the. G. Denigès, 273.
- Reagent:** Oxygen by the copper-ammonia-ammonium chloride —; Determination of. W. L. Badger, 186.
- Reagent:** Phloroglucinol — for the Kreis test; Method of preparing. H. W. Dixon, 181.
- Reagents:** *n*-Butyl alcohol; — from. R. Adams and C. S. Marvel, 145.
- Red Litmus Paper:** —; The treatment of (Notes). T. J. Ward, 412.
- Red Mullet:** Swimming bladder of the —; Analysis of the. L. and D. Leroux, 143.
- Red Wines:** Fruit juices; Acidimetry of — and. A. M. Macmillan and A. Tingle, 223.
- Reducing Agents:** Tetranitromethane; Effect of — on, and a rapid method of estimation. A. Baillie, A. K. Macbeth, and N. I. Maxwell, 387.

- Reduction Method:** Arsenious acid; Volumetric — with. F. de Bacho, 149.
- Reducing Sugars:** Estimation of —; Volumetric method for the. A. Jonescu and V. Vargolici, 339.
- Reductor:** Molybdenum; Application of the rotating zinc — to the estimation of. W. Scott, 316.
- Reducers:** Iron; Application of rotating — in estimation of. W. Scott, 60.
- Refined Edible Oils:** Purity of certain —; Use of the refractometer in ascertaining the. F. H. Trim, 414.
- Refractive Indices:** Fixed oils with temperature; Change of — of. A. F. Joseph, 182.
- Refractive Indices:** Fixed oils with temperature; Change of — of. C. H. Wright, 52.
- Refractive Indices:** Isopropyl alcohol and acetone; Note on the — of mixtures of. D. M. Palmer, 302.
- Refractometer:** Purity of certain refined edible oils; Use of the — in ascertaining the. F. H. Trim, 414.
- Reichert-Meissl and Polenske Values:** Pressure upon the —; The effect of. V. H. Kirkham, 293.
- Reichert-Meissl-Polenske Method:** —; Note on the. H. D. Richmond and G. F. Hall, 223.
- Relative Strengths:** Nitrogen bases of the aromatic series and of some alkaloids; Determination of the — of some. F. Arnall, 384.
- Report:** Government Analytical Laboratory and Assay Office, Cairo, Egypt, during the Period 1913-1919; — on the Work of the. A. Lucas, 431.
- Report:** Work of Inspectors of Foods for the year 1918-19; — on the. A. W. J. Macfadden, 243.
- Report:** Work of the Government Laboratory for the year ended March 31, 1919; — of Government Chemist upon the. 113.
- Report:** Work of the Government Laboratory for the Year ended March 31, 1920, with Appendices; — of the Government Chemist upon the. 464.
- Reports:** Ministry of Food: Oils and Fats Branch—Report by the Committee of Analysts on Standard Methods of Analysis of Seeds, Nuts and Kernels, Fats and Oils, and Fatty Residues. 278.
- Reports:** Ministry of Food: Oils and Fats Branch—Report by the Committee of Analysts on Standards of Good Merchantable Quality. 286.
- Resins:** Saponification value of dark —; Determination of the. H. Salva-terra, 53.
- Resistance Glassware:** Laboratory —; Tests for. 396.
- Respiratory Exchange Work:** Gas analysis apparatus, accurate to 0.001 per cent., mainly designed for —. A. Krogh, 395.
- Reviews of Books:**
- Alcohol:** —; Its Production, Properties, Chemistry, and Industrial Applications. C. Simmonds, 194.
- Alloys:** Non-Ferrous —; Chemists' Manual of. J. R. Downie, 159.
- Analysis:** Qualitative —; A Treatise on. F. Clowes and J. B. Coleman, 195.
- Analysis:** Volumetric —. C. H. Hampshire, 40.
- Animal and Vegetable Oils:** —, Fats, and Waxes, including the Manufacture of Candles, Margarine, and Butter; The Manufacture, Refining and Analysis of. G. Martin, 432.
- Annuaire:** l'An 1920; — pour. 196.
- Applied Chemistry:** —. C. K. Tinkler and H. Masters, 346.
- Bacteriology:** Foods; The — and Mycology of. F. W. Tanner, 119.
- Calculation Tables:** Laboratory Use; Chemical — for. H. L. Wells, 159.
- Carbohydrates:** Alcohol; The — and. S. Rideal, and Associates, 467.

**Reviews of Books—continued:**

- Catalysis:** Theory and Practice; — in. E. K. Rideal and H. S. Taylor, 197.
- Chemical Analysis:** Quantitative —; A Textbook of. Cummins and Kay, 403.
- Chemical Reagents:** —: Their Uses, Methods of Testing for Purity and Commercial Varieties. C. Krauch, 35.
- Chemical Society:** Library of the —; The. A Record of a Recent Attempt at Co-operation. F. W. Clifford, 67.
- Chemistry:** Applied —. C. K. Tinkler and H. Masters, 346.
- Chemistry:** Profession of —; The. R. B. Pilcher, 198.
- Chemistry:** Scientific Criminal Investigation; Legal — and. A. Lucas, 245.
- Chimie:** Cours de —. R. de Forchand, 347.
- Coal:** —; The Chemistry of. J. B. Robertson, 290.
- Colloid Chemistry:** Theoretical and Applied —; An Introduction to. W. Ostwald, 66.
- Diazo-Compounds:** —; The Chemistry and Technology of the. J. C. Cain, 157.
- Dictionary:** Chemical —; Popular. C. T. Kingzett, 158.
- Dictionary:** Explosives; — of. A. Marshall, 433.
- Dyestuffs:** Dyed and Coloured Materials, Lake-Pigments, Foodstuffs, etc.; The Analysis of — and their Identification in. A. G. Green, 401.
- Electrolysis:** Quantitative Analysis by —. A. Classen, with the co-operation of H. Cloeren, 290.
- Fuel Analysis:** Engineers; Gas and — for. A. H. Gill, 38.
- Fuel:** Production and Utilisation. H. S. Taylor, 291.
- Legal Chemistry:** Scientific Criminal Investigation; — and. A. Lucas, 245.
- Minerals:** Rarer Elements; The Analysis of — and Ores of the. W. R. Schoeller and A. R. Powell, 39.
- Mycology:** Foods; The Bacteriology and — of. F. W. Tanner, 119.
- Non-Ferrous Alloys:** —; Chemists' Manual of. J. R. Downie, 159.
- Organic Compounds:** —; The Identification of. G. B. Neave and I. M. Heilbron, 320.
- Pharmacopœia:** Extra —; The. W. H. Martindale and W. W. Westcott, 400.
- Physical Chemistry:** —; Introduction to. J. Walker, 199.
- Quantitative Analysis:** Electrolysis; — by. A. Classen, with the co-operation of H. Cloeren, 290.
- Reagents:** Chemical —: Their Uses, Methods of Testing for Purity and Commercial Varieties. C. Krauch, 35.
- Rocks:** Chemical Analysis of —; Manual of the. H. S. Washington, 292.
- Year-Book:** Chemist's —, 1918-19; The. F. W. Atack, 37.
- Rhubarb:** Oxalic acid in — and the removal of oxalic acid from — products. J. Angerhausen, 334.
- Rice:** Natural — and of Italian polished —; Chemical composition of. G. Issoglio, 451.
- Ropy Milk:** Acidity of —. K. Freear and E. C. V. Venn, 376.
- Rosin:** Turpentine and —; Indian, 49.
- Rubber Analysis:** —; Notes on. A. R. Pearson, 405.
- Rubber Connections:** Attaching pressure pumps to taps; Clip for preventing — from slipping off glass and metal tubing, and for. C. A. Keane and G. Patchin, 64.
- Rubber:** Free sulphur and the coefficient of vulcanisation in vulcanised —; Determination of. W. J. Kelly, 424.
- Rubber Goods:** Cellulose in —; Determination of. S. W. Epstein and R. L. Moore, 236.
- Rubber Hydrocarbon:** Raw and vulcanised rubber; Direct estimation of — in. W. K. Lewis and W. H. McAdams, 339.

- Rubber:** — Hydrocarbon in raw and vulcanised —; Direct estimation of. W. K. Lewis and W. H. McAdams, 339.
- Saccharimeters:** Telescope control tube; Testing — by means of the. C. A. Browne, 398.
- Saccharin:** Benzoic acid; Separation of — and. E. Schowalter, 266.
- Saccharin:** —; Analysis of. O. Beyer, 304.
- Saccharin:** Urine; Estimation of — in. G. S. Jamieson, 178.
- Saccharogenic Power:** Diastatic preparations; Estimation of the — of. K. Oshima, 453.
- Salicylic Acid:** Acetyl —; Masking the presence of free — in (Notes). A. N. Smith, 412.
- Salicylic Acid:** Phenol and — in B.P. ointments; Estimation of. G. D. Elsdon, 372.
- Salt Meat:** Nitrous acid, especially in —; Estimation of small quantities of. F. Auerbach and G. Riess, 141.
- Salts:** Iron and aluminium —; Estimation of calcium and magnesium in the presence of. E. Canals, 426.
- Salts of Tin:** Reaction of —; New. A. Mazuir, 112.
- Sampling:** Problems and fallacies of —. W. L. Baillie, 190.
- Saponification Numbers:** Medium for the determination of —; Butyl alcohol as a. A. M. Pardee, R. L. Hasche, and E. E. Reid, 268.
- Saponification Value:** Dark resins; Determination of the — of. H. Salvaterra, 53.
- Saponification Values:** Ester transposition in the determination of —; Influence of. A. M. Pardee and E. E. Reid, 180.
- Seasonal Variation:** Marine Algæ; — in the chemical composition of. L. Lapique, 103.
- Seeds:** Momordica —; Fat of. C. E. Corfield and E. Caird, 102.
- Sensitive Reaction:** Cobalt; — of. J. Bellucci, 151.
- Sensitiveness:** Qualitative reactions; — of. I.: Potassium. O. Lutz, 315.
- Sera:** Toxins and their antitoxins; Mutual precipitation of the. Titration of antidiphtheritic and antitetanic —. M. Nicolle, E. Debains, and E. Césari, 104.
- Serum:** Milk; — obtained by the spontaneous curdling of. J. Grossfeld, 336.
- Service Time:** Charcoal; Adsorption by. Relation of — to adsorption and absorption. H. H. Lowry and G. A. Hulett, 336.
- Sesbania:** South Africa; —: A feeding-stuff from. 50.
- Shark Liver Oil:** Squalene: A highly unsaturated hydrocarbon in —. M. Tsujimoto, 102.
- Shark's Eggs:** Squalene in the oil from —; Occurrence of. M. Tsujimoto, 102.
- Shellac:** —, — Varnish, and lacquer; Rapid examination of. T. L. Crossley, 386.
- Silicate and Carbonate Rocks:** Combustible matter in —; Estimation of. A. C. Fieldner, W. A. Selvig, and R. Barton, 110.
- Silicotungstic Acid:** Alkaloids; Application of — to estimation of. E. Taigner, 99.
- Silver Nitrate:** Chlorides with —; Titration of. H. W. Bolam, 341.
- Slags:** Iron and steel, ores and —; Examination of the methods used in estimating phosphorus in. H. Kinder, 461.
- Slide Rule:** Dairy calculations; An improved — for. H. D. Richmond, 218.
- Soap-Bubble Method:** Ignition temperatures by the —; Determination of. A. G. White and T. W. Price, 28.
- Soap Manufacture:** Unsaponifiable substances in crude materials for —; Estimation of. Herbig, 24.

- Soap Powders:** Available oxygen in sodium perborate and in perborate —; The estimation of the. H. Trickett, 88.
- Society of Public Analysts and other Analytical Chemists, Proceedings of:** 1, 41, 69, 121, 163, 202, 247, 293, 321, 349, 405, 435.
- Sodium Amalgam:** Flakes; Preparation of — in. A. D. Hirschfelder and M. C. Hart, 315.
- Sodium and Potassium Chlorides:** Magnesium from —; Separation of. S. Palkin, 392.
- Sodium Carbonate:** Iron, aluminium, chromium, glucinum, titanium and zirconium by means of —; Separation of. P. Wenger and J. Wuhrmann, 26.
- Sodium Perborate:** Available oxygen in — and in perborate soap powders; The estimation of the. H. Trickett, 88.
- Sodium:** Potassium and — in small quantities of blood; Estimation of. B. Kramer, 177.
- Sodium:** Potassium and — in the presence of each other; Estimation of. A. Quartaroli, 428.
- Sodium:** Potassium as the perchlorate; A study of the determination of, and the separation from —, etc. R. L. Morris, 349.
- Sodium Silicofluoride:** —; Analysis of. P. Drawe, 393.
- Softening-Point:** Asphaltum and other plastic substances; Determination of the — of. D. F. Twiss and E. A. Murphy, 63.
- Soil:** Nitrates in —; Determination of. A. L. Whiting, T. E. Richmond, and W. R. Schoonover, 460.
- Soils:** Cereals and —; Boric acid modification of the Kjeldahl method for the analysis of. F. M. Scales and A. P. Harrison, 223.
- Solids-Not-Fat:** Separated milk; Estimation of dry — in. R. Eichhoff, 303.
- Solubilities:** Theobromine; Note on the — of. R. V. Wadsworth, 133.
- Solutions:** Two coloured substances; Colorimetric determinations with — containing. K. G. Falk and H. M. Noyes, 317.
- Solvents:** Alcohol and other organic —; Detection of water in. F. Henle, 388.
- Sour Milk Samples:** Gerber's fat method; — and (Notes). F. E. Day, 411.
- South Africa:** Sesbania: A feeding-stuff from —. 50.
- South American Noli Palm:** Oil; Fruit of the — as a source of. 48.
- Specific Gravity:** Wine; Balance of the — of. W. J. Baragiola and O. Schuppli, 373.
- Specific Heat:** Heavy mineral oils; Determination of the — of. H. S. Bailey and C. B. Edwards, 420.
- Specific Rotation:** Lævulose; — of. W. C. Vosburgh, 383.
- Spirit Strength:** Evaporation; Loss of — due to (Notes). L. Briant and H. W. Harman, 448.
- Spirits:** Methyl alcohol in —; Detection of. P. Hasse, 234.
- Squalene:** Oil from Shark's eggs; Occurrence of — in the. M. Tsujimoto, 102.
- Squalene:** Shark liver oil; —: A highly unsaturated hydrocarbon in. M. Tsujimoto, 102.
- Squash Seed Oil:** Hubbard —; Composition of. W. F. Baughman and G. S. Jamieson, 140.
- Standard:** Ghee; Statutory — for. T. K. Ghose, 444.
- Standard:** Volumetric analysis; Potassium hydrogen phthalate as a — in. W. S. Hendrixson, 239.
- Standardising Substance:** Alkali solutions; Potassium chlorate as a — for. H. B. Van Valkenburgh, 238.
- Standards:** Analytical —. 344.
- Starch:** Ammoniacal copper oxide solution; Estimation of — enclosed in cellular tissue by means of. F. Kaulfersch, 373.

- Starch Solution:** Rapid gastric analysis; Apparatus for, together with a method for the preservation of —. R. J. Miller, 29.
- Steel:** Iron and —, ores and slags; Examination of the methods used in estimating phosphorus in. H. Kinder, 461.
- Steel:** Molybdenum in — and iron; Qualitative and quantitative test for. S. L. Malowan, 111.
- Steel:** Phosphorus in — containing vanadium; Method for estimating. J. Maitchell, 26.
- Steel:** Zirconium in —; Estimation of. G. E. F. Lundell and H. B. Knowles, 316.
- Steels:** Chromium in tungsten high-speed —; Influence of vanadium on the estimation of. P. Slawik, 429.
- Steels:** Nickel in — by direct titration; Estimation of. E. H. Hall, 392.
- Still-Head:** Light oil fractionation; Constant temperature — for. F. M. Washburn, 112.
- Stovaine:** Atropine, cocaine, and —; Reaction of benzoic acid and its application to the toxicological determination of. M. Guerbet, 334.
- Straw:** Oat — and cattle foods; Sugar in. S. H. Collins and A. Spiller, 175.
- Strength:** Glue jellies; Testing the — of. W. H. Low, 232.
- Strontium, and Barium Compounds:** Soluble and insoluble calcium, —; Iodic acid as a reagent for the microchemical identification of. G. Denigès, 273.
- Sugar:** Blood; Determination of — in. O. Folin and H. Wu, 227.
- Sugar:** Blood — concentration and blood — methods. H. F. Höst and R. Hatlehof, 304.
- Sugar:** Cane —; Cryoscopic method for the determination of. H. H. Dixon and T. G. Mason, 135.
- Sugar:** Cane —; Double polarisation methods for the determination of. G. W. Rolfe and L. F. Hoyt, 224.
- Sugar:** Oat straw and cattle foods; — in. S. H. Collins and A. Spiller, 175.
- Sugars:** Carbon dioxide and fermentable —; Estimation of. A. Slator, 373.
- Sugars:** Reducing —; Volumetric method for the estimation of. A. Jonescu and V. Vargolici, 339.
- Sugars:** —; Iodimetric estimation of. H. M. Judd, 224.
- Sugars:** Titration of —. N. Schoorl, 340.
- Sulphate Ion:** —; Volumetric estimation of. J. Erlich, 394.
- Sulphate:** Sulphonated oils; Estimation of — in. E. J. Kern, 394.
- Sulphates:** Organic sulphonic acids; Estimation of — in the presence of. T. Callan, J. A. R. Henderson, and R. Barton, 108.
- Sulphates:** Oxidation of benzidine sulphate with potassium permanganate; Volumetric estimation of — by. P. L. Hibbard, 153.
- Sulphide:** Molybdenum as —; Gravimetric estimation of. J. Sterba-Böhm and J. Vostrebal, 274.
- Sulphides:** Hydrosulphides in the presence of —, thiosulphates, and sulphites; Volumetric estimation of. A. Wöber, 390.
- Sulphides:** —; Iodimetric estimation of. J. M. Kolthoff, 153.
- Sulphites:** Hydrosulphides in the presence of sulphides, thiosulphates, and —; Volumetric estimation of. A. Wöber, 390.
- Sulphonol:** Trional; Identification of — and. W. Zimmermann, 334.
- Sulphonated Oils:** —; Commercial examination of. G. F. Pickering, 420.
- Sulphonated Oils:** Sulphate in —; Estimation of. E. J. Kern, 394.
- Sulphonic Acids:** Sulphates in the presence of organic —; Estimation of. T. Callan, J. A. R. Henderson, and R. Barton, 108.
- Sulphur:** Arsenic in —; Detection of. H. S. Davis and M. D. Davis, 271.
- Sulphur Compounds:** Coal; Determination of — in. A. R. Powell, 423.

- Sulphur:** Oil in —; Estimation of minute quantities of. L. S. Bushnell and H. S. Clark, 315.
- Sulphur:** Oils; Method for the estimation of — in. C. E. Waters, 274.
- Sulphur:** Petroleum oils; Rapid method for the determination of — in. A. W. Christie and C. S. Bisson, 187.
- Sulphur:** Solution for analysis; Method for bringing elementary — into. A. P. Bjerregaard, 27.
- Sulphur:** Vulcanised rubber; Determination of free — and the coefficient of vulcanisation in. W. J. Kelly, 424.
- Sulphured and Unsulphured Oats:** Acidity of cereal products; Simple method for measuring the: Its application to —. V. Birekner, 19.
- Sulphuric Acid:** Alcohol in mixtures of alcohol, —, and water; Estimation of. G. S. Butler and H. B. Dunncliff, 267.
- Sulphuric Acid:** Arsenic in commercial —; Rapid method for the estimation of. A. A. Kohr, 313.
- Sulphuric Acid:** Nitrates and nitrites in —; Estimation of. L. B. Sefton, 314.
- Sulphuric Acid:** Testing — and oleum; The “heat-rise” method of. R. Curtis and F. D. Miles, 186.
- Surface Tensimeter:** Liquids; — for small quantities of. C. C. Kiplinger, 191.
- Sweetening Power:** —; Estimation of. R. Pauli, 452.
- (**Taka-Diastase**): Diastase of *Aspergillus Oryzae* —; Testing the amyolytic action of. S. A. Waksman, 141.
- Tannin Extracts:** Mangrove [tannin] in mixed —; Detection of. E. Schell, 425.
- Tanning Materials:** Vegetable —; Tanning value of. J. A. Wilson and E. J. Kern, 269.
- Taps:** Pressure pumps to —; Clip for preventing rubber connections from slipping off grass and metal tubing, and for attaching. C. A. Keane and G. Patchin, 64.
- Tar:** Naphthalene in —, — oil, and crude naphthalene by conversion into its picrate; Method for the direct estimation of. Knoblauch, 23.
- Tar Oil:** Naphthalene in tar, —, and crude naphthalene by conversion into its picrate; Method for the direct estimation of. Knoblauch, 23.
- Tarry and Carbonised Substances:** Heavy mineral oils; Relation between the quantities of — in. W. Steinkopf and H. Winternitz, 420.
- Tartaric Acid:** Oxalic acid and lactic acid, especially their differentiation from —; Detection of. K. Brauer, 338.
- Tea:** Paraguay —. C. R. Hennings, 334.
- Telescope Control Tube:** Saccharimeters by means of the —; Testing. C. A. Browne, 398.
- Temperature:** Refractive indices of fixed oils with —; Change of. C. H. Wright, 52.
- Temperature:** Refractive indices of fixed oils with —; Change of. A. F. Joseph, 182.
- Tensile Strength:** Glue; Determination of the — of. G. Hopp, 233.
- Tensimeter:** Liquids; Surface — for small quantities of. C. C. Kiplinger, 191.
- Tetany:** Idiopathic —; Guanidine content of fæces in. J. S. Sharpe, 142.
- Tetraiodophenolphthalein:** Phenolphthalein as —; Estimation of. S. Palkin, 372.
- Tetranitromethane:** Reducing agents on —; Effect of, and a rapid method of estimation. A. Baillie, A. K. Macbeth, and N. I. Maxwell, 387.
- Theobromine:** Solubilities of —; Note on the. R. V. Wadsworth, 133.
- Therapeutic Substances:** Certain —; Effective control of. (Ministry of Health). 200.

- Thermometer:** Beckmann; Thermoregulator with the characteristics of the. R. B. Harvey, 192.
- Thermometers:** Standardising — by electrical energy; Calorimetric method for. T. W. Richards and S. Tamaru, 342.
- Thermoregulator:** Beckmann thermometer; — with the characteristics of the. R. B. Harvey, 192.
- Thermoregulator:** Gouy —. T. S. Sligh, Junr., 156.
- Thermoregulator:** —; Air-Oven. H. M. Atkinson, 430.
- Thermoregulator:** —. J. F. King, 464.
- Thiocarbonate:** Cyanogen compounds in concentrated ammonia liquor; Estimation of. Part II.: The estimation of —. P. E. Spielmann and H. Wood, 22.
- Thiocyanates:** Ammoniacal liquors; Estimation of — in. J. A. Shaw, 340.
- Thiocyanates:** Cyanides and — in complex mixtures; Detection and estimation of. L. Chelle, 52.
- Thiocyanates:** Potassium permanganate; Volumetric estimation of — by means of. R. Meurice, 429.
- Thiophene:** Commercial benzenes; Estimation of — in. A. Meyer, 109.
- Thiosulphates:** Hydrosulphides in the presence of sulphides, —, and sulphites; Volumetric estimation of. A. Wöber, 390.
- Thompson Method:** Acetic acid in white lead; Modification of the — for the estimation of. L. McMaster and A. E. Goldstein, 185.
- Tin:** Antimony; Separation of — and, and estimation of — by means of cupferron. A. Kling and A. Lassieur, 275.
- Tin:** Arsenic in — and — -plate; Estimation of. L. Vallery, 110.
- Tin:** Estimating —; Volumetric methods for. J. G. F. Druce, 463.
- Tin:** Salts of —; New reaction of. A. Mazuir, 112.
- Tin:** —; Estimation of. J. M. Kolthoff and R. Van der Heyde, 188.
- Tin:** —; Indirect detection of. F. Feigl, 112.
- Tissue:** Starch enclosed in cellular — by means of ammoniacal copper oxide solution; Estimation of. F. Kaulfersch, 373.
- Titanium:** Iron, aluminium, chromium, glucinum, — and zirconium by means of sodium carbonate; Separation of. P. Wenger and J. Wuhrmann, 26.
- Titanium:** Italian puzzuolanas; Estimation of — in certain. A. Cavazzi, 62.
- Titanium:** Zirconium and — as phosphates; Separation of. J. Brown and H. T. Madden, 153.
- Titanium:** Zirconium and — in zirconium ores; Estimation of. G. E. F. Lundell and H. B. Knowles, 342.
- Titration Curves:** Buffer mixtures; Colorimetric determination of — without. L. J. Gillespie, 240.
- Titration:** Electrometric —. W. D. Treadwell and L. Weiss, 59.
- Titration:** Electrometric —; Theory of. W. D. Treadwell, 59.
- Toluene:** Paraffins in commercial —; Estimation of. E. Lewis, 148.
- Toluene-Petrol Fraction:** Borneo petroleum; Rectified petroleum spirit from the — of. W. A. Silvester, 338.
- Toluene:** Purity of commercial —; Criteria of the degree of. J. S. Lumsden, 54.
- Toluols:** Paraffins and unsaturated compounds in commercial —; Estimation of. H. G. Evans, 54.
- Tomato:** Citric Acid in the —; Identification of. R. E. Kremers and J. A. Hall, 174.
- Towers:** Nitrous gases; Method for the analysis of, and its application to the study of — for the absorption of such gases. A. Geake and F. J. Squire, 61.
- Toxicity:** Cacao shell; — of. Marchadier and Goujon, 20.
- Toxicological Detection:** Atropine, cocaine, and stovaine; Reaction of benzoic acid and its application to the — of. M. Guerbet, 334.

- Toxins:** Antitoxins; Mutual precipitation of the — and their. Titration of antidiphtheritic and antitetanic sera. M. Nicolle, E. Debains, and E. Césari, 104.
- Trimethyleneglycol:** Distilled glycerol; Estimation of — in. C. A. Rojahn, 233.
- Trimethyleneglycol:** Glycerol in presence of —; Estimation of. C. A. Rojahn, 147.
- Trional:** Sulphonal and —; Identification of. W. Zimmermann, 334.
- Tungsten High-Speed Steels:** Chromium in —; Influence of vanadium on the estimation of. P. Slawik, 429.
- Tungsten Ores:** —; Analysis of. J. Erlich, 275.
- Turbidimeter:** Gelatin, cellulose and varnishes; New — for solutions of. S. E. Sheppard, 193.
- Turbidimeter:** Photometric —. W. G. Bowers and J. Moyer, 318.
- Turpentine:** Benzine in —; Estimation of. A. Allina and H. Salvatena, 417.
- Turpentine:** Rosin; Indian — and. 49.
- Tyrosin:** Yeast proteins; Estimation of — and dibasic amino acids in. P. Thomas and A. Chabas, 336.
- Tyrosine:** Method of Folin and Denis; Colorimetric estimation of — by the. R. A. Gortner and G. E. Holm, 388.
- U-Tube:** Improved form of —; An. E. R. Dovey, 333.
- Ultra-Filters:** Chemical analysis with —. L. Moser and Kittl, 429.
- Unsaponifiable Substances:** Soap manufacture; Estimation of — in crude materials for. Herbig, 24.
- Unsaturated Compounds:** Paraffins and — in commercial toluols; Estimation of. H. G. Evans, 54.
- Unsaturated Hydrocarbons:** Coal-gas; An investigation into the composition of the — present in. F. S. Sinnatt and L. Slater, 85.
- Unsulphured Oats:** Cereal products; Simple method for measuring the acidity of: Its application to sulphured and —. V. Birekner, 19.
- Uranium:** Estimation of —; New colorimetric method for. Von Müller, 62.
- Uranium:** —; Estimation of. R. Schwartz, 275.
- Urea:** Mörner-Sjöqvist process for the estimation of —; Braunstein's modification of the. A. H. Todd, 229.
- Urea:** —; Detection of. J. F. A. Pool, 307.
- Urea:** Xanthidrol; Estimation of — by means of. Frenkel, 377.
- Uric Acid:** Modification of Blarez and Tourrou's method; Volumetric estimation of — by a. G. Pegurier, 267.
- Urine:** Albumen in —; Detection and estimation of. O. Mayer, 103.
- Urine:** Feeds, fæces, and —; Modification of the American official chlorine method for. J. O. Halverson and E. B. Wells, 173.
- Urine:** Indican in — and blood; Detection of. A. Jolles, 143.
- Urine:** Organic acids in —; Titration of. D. Van Slyke and W. W. Palmer, 229.
- Urine:** Saccharin in —; Estimation of. G. S. Jamieson, 178.
- Vanadium:** Chromium in tungsten high-speed steels; Influence of — on the estimation of. P. Slawik, 429.
- Van Slyke Method:** Arginine; Modification of the — for determining. A. E. Koehler, 308.
- Van Slyke's Method:** Arginine nitrogen by —; Modification of the apparatus for the estimation of. G. E. Holm, 189.
- Vanadium Compounds:** Carbon tetrachloride; Analysis of — by means of. P. Jannasch and H. E. Harwood, 63.

- Vanadium:** Mercury, iron, and — in the same solution; Volumetric estimation of. G. Hinard, 460.
- Vanadium:** Phosphorus in steel containing —; Method for estimating. J. Maitchell, 26.
- Vapour Pressures:** Estimation of —; Apparatus for the. A. Morton, 33.
- Vapour Tension:** Measuring —; Instrument for. H. Moore, 239.
- Varnish:** Shellac, shellac —, and lacquer; Rapid examination of. T. L. Crossley, 386.
- Varnishes:** Gelatin, cellulose and —; New turbidimeter for solutions of. S. E. Sheppard, 193.
- Varnishes:** Physical and chemical analyses; Durability of exterior — compared with their. W. T. Pearce, 312.
- Vegetable Oils:** Petroleum spirit in —; Detection of minute quantities of. M. Aida, 385.
- Vegetable Tanning Materials:** —; Tanning value of. J. A. Wilson and E. J. Kern, 269.
- Vegetables:** Dextrose in — by a biochemical method; Detection and identification of. E. Bourquelot and Bridel, 413.
- Velocity:** Gas; New method of measuring the — of a current of. J. Erlich, 463.
- Viscometer:** —; New form of. G. Baume and H. Vignerson, 64.
- Viscosimeter:** Falling sphere —. W. H. Gibson and L. M. Jacobs, 277.
- Viscosimeter:** Fischer's —. 430.
- Vitamine:** —; Determination of. R. J. Williams, 307.
- Volatile Acids:** Fermentation products; Estimation of — in. G. Hinard, 375.
- Volatile Fatty Acids:** —; Estimation of. G. Wiegner and J. Magasanik, 24.
- Volatile Liquid Mixtures:** Fuel value of —. G. Barsky, 106.
- Volumetric Analysis:** Standard in —; Potassium hydrogen phthalate as a. W. S. Hendrixson, 239.
- Volumetric Method:** Diastatic capacity; — for the determination of the. J. T. Flohill, 335.
- Volumetric Methods:** Tin; — for estimating. J. G. F. Druce, 463.
- Vulcanised Rubber:** Free sulphur and the coefficient of vulcanisation in —; Determination of. W. J. Kelly, 424.
- Water:** Alcohol and other organic solvents; Detection of — in. F. Henle, 388.
- Water:** Alcohol in mixtures of alcohol, sulphuric acid, and —; Estimation of. G. S. Butler and H. B. Dunnicliff, 267.
- Water:** Ammonia; Preparation of — free from. G. C. Baker, 388.
- Water:** Conductivity —; Method for the preparation of. C. B. Clevenger, 34.
- Water:** Crude camphor; Rapid method of estimating — in. K. W. Lane and O. F. Lubatti, 135.
- Water:** Lead; Action of — on. J. F. Liverseege and A. W. Knapp, 152.
- Water:** Milk; Estimation of added — in. J. Goldan, 20.
- Water:** Petroleum and other organic emulsions; Convenient method for the determination of — in. E. W. Dean and D. D. Stark, 270.
- Water:** Petroleum, petroleum residues, or other oils immiscible with —; Distillation of. H. Offermann, 458.
- Waxes:** Animal and Vegetable Oils, Fats, and —, including the Manufacture, Refining and Analysis of Candles, Margarine, and Butter; The Manufacture, Refining and Analysis of. G. Martin, 432.
- Weighing:** Analytical —. H. L. Wells, 189.
- Weighing Burette:** Gas analysis; — for. E. R. Weaver and P. G. Ledig, 318.
- Wet Storage:** Cotton on —; Deterioration of. N. Fleming and A. C. Thaysen, 145.

- Wheat Flour Milling:** Laboratory control of —. B. R. Jacobs and O. S. Rask, 415.
- White Lead:** Acetic acid in —; Modification of the Thompson method for the estimation of. L. McMaster and A. E. Goldstein, 185.
- Wine:** Amino-acids in —; Estimation of. E. Garino-Canina, 47.
- Wine:** Specific gravity of —; Balance of the. W. J. Baragiola and O. Schuppli, 373.
- Wines:** Red — and fruit juices; Acidimetry of. A. M. Macmillan and A. Tingle, 223.
- Wines:** —; Analysis of. W. Fresenius and L. Grünhut, 304, 415.
- Wood-Oil:** Valuation of Chinese — by the Browne polymerisation test; The influence of the free fatty-acid content in the. P. E. Jameson, 328.
- Woods:** Cellulose in —; Determination of. S. A. Mahood, 416.
- Woods:** Cellulose in —; Estimation of. W. H. Dore, 230.
- Woods:** Coniferous —; Proximate analysis of. W. H. Dore, 305.
- Writing:** Age of ink in —; Estimation of the. C. A. Mitchell, 247.
- Xanthic Acid:** Molybdenum by means of —; Detection of. J. Koppel, 60.
- Xanthidrol:** Urea by means of —; Estimation of. Frenkel, 377.
- Yeast Fat:** —; Nature of. I. S. MacLean and E. M. Thomas, 378.
- Yeast Proteins:** Tyrosin and dibasic amino acids in —; Estimation of. P. Thomas and A. Chabas, 336.
- Yellow AB:** — and Yellow OB in mixtures; Detection and estimation of. W. E. Mathewson, 415.
- Yellow OB:** Yellow AB and — in mixtures; Detection and estimation of. W. E. Mathewson, 415.
- Yellow Light:** Polarimetric determinations; — in. L. Guglielmelli, 398.
- Young and Swain's Method:** Nitro groups by —; Estimation of. L. Desvergues, 312.
- Zinc:** Commercial —; Analysis of. E. Olivier, 394.
- Zinc:** Human organism; — in the. S. Giaya, 378.
- Zinc Reductor:** Molybdenum; Application of the rotating — to the estimation of. W. Scott, 316.
- Zirconium:** Iron, aluminium, chromium, glucinum, titanium and — by means of sodium carbonate; Separation of. P. Wenger and J. Wuhrmann, 26.
- Zirconium:** Phosphate method; Estimation of — by the. G. E. F. Lundell and H. B. Knowles, 28.
- Zirconium:** Phosphates; Separation of — and titanium as. J. Brown and H. T. Madden, 153.
- Zirconium:** Steel; Estimation of — in. G. E. F. Lundell and H. B. Knowles, 316.
- Zirconium:** — and titanium in — ores; Estimation of. G. E. F. Lundell and H. B. Knowles, 342.
- Zirconium:** —; Estimation of. M. M. Smith and C. James, 429.
