

## INDEX TO VOLUME XLVI.

### INDEX TO NAMES,

- Abrams, A.** Effects of chemical reagents on the microstructure of wood, 468.  
**Achard, C., and Feuillee, E.** Detection of albumoses, 204.  
**Adriano, F. T.** Volumetric method for the estimation of lactose by alkaline potassium permanganate, 137.  
**Ajon, G.** Laboratory apparatus, 218.  
**Albrecht, P. G.** Study of molluscs of the Pacific coast, 145.  
**Allen, A. W.** Recovery of Nitrate from Chilean Caliche (Review), 224.  
**Allport, N. L.** See Chappel, E. J., and Allport, N. L.  
**Almy, L.H., and Field, E.** Preservation of fish frozen in chilled brine. Penetration of salt, 503.  
**Alsberg, C. L.** See Woodward, H. E., and Alsberg, C. L.  
**Ambler, J. A.** Qualitative detection of certain naphthalene disulphonic acids, 107.  
**Andelin, E. A.** Check valve for water vacuum pumps, 303.  
**Andrade, C. D.** Composition of Chicha, 136.  
**André, E.** Composition of grape-seed oil, 331.  
**André, E.** Determination of the acetyl value of fatty substances, 251.  
**André, E.** Grape-seed oils, 288.  
**Andress, K.** See Berl, E., Andress, K., and Müller, W.  
**Andrew, R. E., and Bailey, E. M.** Estimation of caffeine in tea and coffee, 405.  
**Andrews, A. B.** Gold cathodes for electrolytic work, 386.  
**Arduoyer, G.** Apparatus for the industrial analysis of gases, 424.  
**Arenson, S. B.** See Felsing, W. A., Arenson, S. B., and Kopp, F. L.  
**Ariano, R.** Separation of the phosphorus from the other components of steel, 212.  
**Arnold, R.** See Bridel, M., and Arnold, R.  
**Arreguine, V.** Determination of boiling-point of minute quantities of substances, 218.  
**Artmann, P.** Identification of mercury as cuprous mercuric iodide, 254.  
**Asahina, Y., and Motigase, S.** Alkaloids of Japanese corydalis, 143.  
**Atack, F. W.** The Chemist's Year-Book, 1921 (Review), 431.  
**Aten, A. H. W.** Determination of the conductivity of electrolytes, 109.  
**Atkinson, E. L., and Frederick, R. C.** Influence of minute quantities of metallic salts on the bacteriological content of water, 247.  
**Atkinson, H.** Estimation of potassium in presence of sodium, magnesium, sulphates and phosphates, 354.  
**Atsumi, K.** See Kariyone, T., and Atsumi, K.  
**d'Aymeric, A. M.** Analysis of South Tunisian palm wine, 243.
- Bach, A., and Zoubkoff, S.** Estimation of catalase, peroxydase, and etherase in a drop of blood, 15.  
**Back, S.** See Harvey, T. F., and Back, S.  
**Badreau, M. J.** Polarimetric estimation of mannitol, 368.

- Bailey, C. H., and Collatz, F. A.** Electrical conductivity of water extracts of wheat flour, 242.
- Bailey, E. M.** See Andrew, R. E., and Bailey, E. M.
- Bailey, H.** Repair of crystallised glass apparatus, 475.
- Bailey, H., and Baldsiefen, W. D.** Detection of oils other than linseed oil in paints by means of the hexabromide test, 104.
- Baker, J. C., and Breed, R. S.** Reaction of milk in relation to the presence of blood-cells and of specific bacterial infections of the udder, 16.
- Baker, J. C., Drew, J. D., and Conn, H. J.** Relation between lactic acid production and bacterial growth in the souring of milk, 248.
- Baker, J. L., and Hulton, H. F. E.** Amylases of the cereal grains—Rye, 329.
- Baker, J. L., and Hulton, H. F. E.** Iodimetric determination of the diastatic power of malt, 90.
- Baldi, P.** Gas-volumetric estimation of ammoniacal, nitric, and organic nitrogen in mixed fertilisers, 64.
- Baldsiefen, W. D.** See Bailey, H., and Baldsiefen, W. D.
- Bancroft, W. D.** Applied Colloid Chemistry—General Theory (Review), 310.
- Barishac, —** Presence of hydrocyanic acid in linseed cakes, 56.
- Barlot, —** New reagent for bitter *Lactarius* and *Russula* species, 96.
- Barlot, J., and Pernot, J.** Compounds of halogenated derivatives of mercury and thallium [Separation of mercury from thallium], 421.
- Bartlot, M. J.** See Mouret, M., and Barlot, M. J.
- Barrowcliff, M., and Carr, F. H.** Organic Medicinal Chemicals (Review), 115.
- Bartlett, H. H.** See Sando, C. E., and Bartlett, H. H.
- Baru, R.** See Margosches, B. M., and Baru, R.
- Bateman, E.** See Humphrey, C. J., Flemming, R. M., and Bateman, E.
- Baughmann, W. F., Brauns, D., and Jamieson, G. S.** Cantaloup seed oil, 51.
- Baughman, W. F., Jamieson, G. S., and Brauns, D. H.** Analysis of Otoba butter, 138.
- Baughman, W. F.** See Jamieson, G. S., Baughman, W. F., and Brauns, D. H.
- Baxter, G. P.** Rapid method of determining the density of air, 474.
- Beach, F. F., Needs, F. E., and Russell, E.** The composition of egg powder, 279.
- Beckley, V. A.** The formation of humus, 151.
- Beckley, V. A.** The preparation and fractionation of humic acid, 151.
- Beedle, F. C., and Bolam, T. R.** Hydrolytic alkalinity of pure and commercial soaps, 209.
- Behre, A.** Estimation of dextrose, laevulose, sucrose and dextrin in admixture, 368.
- Behre, A.** Methods for the analysis of artificial honey, 499.
- Bell, R. D., and Doisy, E. A.** Colorimetric methods for estimation of phosphorus in urine and blood, 13.
- Bell, R. D., and Doisy, E. A.** Estimation of chlorine in tissues, 146.
- Bell, R. D.** See Doisy, A. E., and Bell, R. D.
- Benedict, S. R., and Osterberg, E.** Estimation of sugar in normal urine, 508.
- Bennett, H. C.** Estimation of sodium chloride in soap, 467.
- Bennett, H. G.** Animal Proteins (Review), 479.
- Bergquist, C.** See Herschel, W. H., and Bergquist, C.
- Berl, E., Andress, K., and Müller, W.** Estimation of benzene hydrocarbons in coal-gas, 253.
- Berry, R. A.** Wet and dry feeding of concentrates to dairy cows, 195.
- Berry, R. M.** Analysis of light aluminium casting alloys, 21.

- Bertrand, G., and Rosenblatt, M.** Occurrence of manganese throughout the vegetable kingdom, 409.
- Bertrand, G., and Vladesco, R.** Variation in the zinc content of vertebrate animals, 244.
- Beythien, A.** Artificial "honey," 500.
- Bezssonoff, —.** Anti-Scorbutic principle of potato juice, 411.
- Bezssonoff, M.** Colour reaction common to antiscorbutic extracts and hydroquinone, 462.
- Biddulph-Smith, T.** Coke Oven and By-Product Works Chemistry (Review), 389.
- Biilmann, E., and Thaulow, K.** Volumetric estimation of mercury, 382.
- Blake, J. C.** The individuality of erythro-dextrin, 59.
- Blanco, G. W.** See Sherrard, E. C., and Blanco, G. W.
- Blau, N. F.** Estimation of creatinine in the presence of acetone and diacetic acid, 510.
- Blichfeldt, S. H., and Thornley, T.** Apparatus for the routine determination of melting-points of fats and fatty acids, 180.
- Bodansky, M.** Estimation of small quantities of zinc, 518.
- Boeree, A. R.** See Tizard, H. T., and Boeree, A. R.
- Bohn, R. T.** See Kelley, G. L., Wiley, J. A., Bohn, R. T., and Wright, W. C.
- Bohrmann, A.** See Tillmans, J., and Bohrmann, A.
- Bolam, T. R.** See Beedle, F. C., and Bolam, T. R.
- Bolland, A.** Microchemical reactions of iodic acid, 24.
- Bomer, A.** Glycerides of goose-fat, 500.
- Bone, W. A., and Silver, L.** New method for estimating the volatile matter yielded by coals up to various temperatures, 416.
- Bordas, F.** Petrols containing dissolved gases, 59.
- Bosart, L. W.** Need of a new table for specific gravity and percentage of glycerol, 513.
- Bossuet, R.** See Jolibois, P., Bossuet, R., and Chevy, —.
- Bourquelot, E., and Bridel, M.** Investigation of the products of the enzymic hydrolysis of inulin by the biological method for the detection of dextrose, 408.
- Boutwell, P. W.** See Steenbock, H., Sell, M. T., and Boutwell, P. W.
- Braley, S. A., and Hobart, F. B.** Detection and estimation of cobalt, 300.
- Brauns, D.** See Baughmann, W. F., Brauns, D., and Jamieson, G. S.
- Brauns, D. H., and MacLaughlin, J. A.** Estimation of phosphatides, 55
- Brauns, D. H.** See Jamieson, G. S., Baughman, W. F., and Brauns, D. H.
- Bray, G. T.** Gemsbok Beans (*Bauhinia esculenta* Burch.), 401.
- Bray, G. T., and Islip, H. T.** A further contribution to the study of South American oilseeds, 325.
- Breed, R. S.** See Baker, J. C., and Breed, R. S.
- Brewster, J. F.** Use of edestin in determining the proteolytic activity of pepsin, 245.
- Bridel, M., and Arnold, R.** Detection of dextrose in plants, 378.
- Bridel, M.** See Bourquelot, E., and Bridel, M.
- Brinsmaid, W.** Test for annatto in fats and oils, 198.
- Brioux, C., and Guerbet, M.** Detection of castor oil seeds in feeding cake, 100
- Britton, H. T. S.** The separation of aluminium from beryllium, Part I., 359.
- Britton, H. T. S.** The separation of aluminium from beryllium, Part II., 437.
- Bronfenbenner, J., and Schlesinger, M. J.** Serological method for detection of infected foods, 462.
- Brooks, F. T., and Kidd, M. N.** "Black spot" of chilled and frozen meat, 292.

- Browne, C. A., and Gamble, C. A.** Revision of the optical method for analysing mixtures of sucrose and raffinose, 456.
- Browning, G.** See Moore, W. A., and Browning, G.
- Browning, P. E.** Qualitative separation and detection of uranium, vanadium, and chromium when present together, 158.
- Browning, P. E., and Porter, L. E.** Separation of gallium from indium and zinc by fractional crystallisation of the caesium gallium alum, 158.
- Browning, P. E.** See Porter, L. E., and Browning, P. E.
- Bruhns, G.** Estimation of copper in sugar analysis by means of potassium thiocyanate and potassium iodide, 23.
- Bruhns, G.** Estimation of the hardness of water, 337.
- Bruhns, G.** Table for the estimation of dextrose, invert sugar, and laevulose by the thiocyanate-potassium iodide method, 330.
- Bruni, G.** Solubility of crystalline substances in rubber, 211.
- Bruno, A.** Sheep-foot and ox-foot oils, 371.
- Buell, M. V.** See Steenbock, H., Sell, M. T., and Buell, M. V.
- Bullis, D. E.** See Jones, J. S., and Bullis, D. E.
- Bunyea, H.** Souring of beef caused by *Bacillus Megatherium*, 461.
- Burton, E. F.** The Physical Properties of Colloidal Solutions (Review), 525.
- Buttenberg, P.** Caviare and caviare substitutes, 498.
- Caines, C. M.** See Evers, N., and Caines, C. M.
- Cake, W. E.** See Willard, H. H., and Cake, W. E.
- Camp, J. R., and Marden, J. W.** Analysis of aluminium, cobalt, and chromium alloys, 22.
- Canals, E.** Estimation of calcium and magnesium in various salt mixtures, 384.
- Canals, E.** The quantitative estimation of calcium and magnesium in various salt mixtures, 216.
- Canneri, G.** See Cuttica, V., and Canneri, G.
- Capps, J. H.** Estimation of aluminium and of aluminium oxide in commercial aluminium, 471.
- Carr, R. H.** Method of measuring soil toxicity, acidity, and basicity, 511.
- Carr, F. H.** See Barrowcliff, M., and Carr, F. H.
- Carter, C. L.** Chemical investigation of mutton-bird oil, 1, 458.
- Chandler, L. R.** See Schultz, E. W., and Chandler, L. R.
- Chapin, R. M.** Denigès' test for the detection and estimation of methyl alcohol in the presence of ethyl alcohol, 375.
- Chapin, R. M.** Estimation of cresol by the phenol reagent of Folin and Denis, 419.
- Chapman, J. E.** See Thornton, W. M., jun., and Chapman, J. E.
- Chappel, E. J., and Allport, N. L.** Method for the assay of aconite preparations, 98.
- Charpy, G., and Durand, J.** Melting-point of coal, 59.
- Chatterji, N. G.** Volumetric analysis of mixtures of permanganate, dichromate, and chromic salts, 520.
- Chaudun, A.** See Colin, H., and Chaudun, A.
- Chercheffsky, N.** Critical temperature of solution and turbidity-temperature of hydrocarbons, etc., 162.
- Chevry, —.** See Jolibois, P., Bossuet, R., and Chevry, —.
- Churchill, H.** See Peterson, W. H., and Churchill, H.
- Clark, R. H., and Gillie, K. B.** Salicin content of British Columbian willows and poplars, 502.

- Clark, W. M.** The Determination of Hydrogen Ions (Review), 70.
- Clawson, A. B.** See Marsh, C. D., and Clawson, A. B.
- Clayton, W.** Margarine (Review), 71
- Clevenger, J. F.** See Viehoveer, A., Clevenger, J. F., and Ewing, C. O.
- Clifford, C. W.** Calcium chloride method for the estimation of water in gasoline and in certain other substances, 417.
- Clifford, W. M.** Colorimetric estimation of carnosine, 507.
- Clostre, J.** See Rengade, E., and Clostre, J.
- Clot, G.** Composition of palm kernels from Madagascar, 138.
- Coffey, S.** Linolenic and hexabromostearic acids, 418.
- Coffey, S.** True oxygen absorption of drying oils, 418.
- Coffey, S.** True oxygen absorption of oils. I., Linolenic and linolic acids, 467.
- Coffignier, C.** See Nicolardot, P., and Coffignier, C.
- Cohn, R.** New test for formaldehyde with resorcinol and sulphuric acid, 502.
- Cole, S. W.** Practical Physiological Chemistry (Review), 116.
- Coles, A. C.** Critical Microscopy (Review), 390.
- Colin, H., and Chaudun, A.** Application of the law of hydrolysis to the determination of molecular weights, 153.
- Collatz, F. A.** See Bailey, C. H., and Collatz, F. A.
- Colombo, G.** Laboratory apparatus for measuring the permeability and heat-insulating capacity of textiles, 68.
- Compagno, I.** Estimation of arsenic and phosphorus in metallurgical products, 66.
- Compagno, I.** Rapid method of disintegrating metal alloys not attacked by acids, 65.
- Conn, H. J.** Rose Bengal as a general bacterial stain, 461.
- Conn, H. J.** See Baker, J. C., Drew, J. D., and Conn, H. J.
- Connell, V. B.** Apparatus for generating hydrogen sulphide, 113.
- Cook, F. C.** Composition of tubers, skins, and sprouts of three varieties of potatoes, 203.
- Copaux, H.** Rapid method for the estimation of phosphoric acid, 521.
- Cordebard, H.** Estimation of organic compounds by oxidation with chromic acid, 151.
- Costa, J.** See Little, E., and Costa, J.
- Coward, K. H.** See Drummond, J. C., Coward, K. H., and Watson, A. F.
- Coward, K. H.** See also Drummond, J. C., Golding, J., Zilva, S. S., and Coward, K. H.
- Craven, M. B.** See Sinnatt, F. S., and Craven, M. B.
- Cribier, J.** New method for the estimation of arsenic, 517.
- Crocker, E. C.** Significance of "lignin" colour reactions, 419.
- Croll, H. M.** See Myers, V. C., and Croll, H. M.
- Csanyi, W.** Indicator properties of two new phthalëins, 250.
- Cuisick, J. T.** Phosphorus in butter, 50.
- Curtman, J. L., and Hecht, N. H.** Approximate estimation of iron and manganese, 299.
- Curzio, A.** See Piutti, A., and Curzio, A.
- Cuttica, V., and Canneri, G.** Thallous ferricyanide. Estimation of thallium, 254.
- Dahle, C. D.** See Dutcher, R. A., Eckles, C. H., Dahle, C. D., Mead, S. W., and Schaefer, O. G.
- Damiens, A.** Estimation of traces of bromine in organic substances, 22.
- Damiens, A.** Toxicological detection of poisons containing bromine, 14.
- Dart, A. E.** See Schmidt, C. L. A., and Dart, A. E.

- Davidson, T. A.** The "Oil Bromide" test of linseed oil, 466.
- Davis, C. W.** Detection and estimation of platinum in ores, 518.
- Dean, A. L., and Wrenshall, R.** Fractionation of Chaulmoogra oil, 52.
- Débourdeaux, L.** Use of sodium persulphate in analysis, 516.
- Deckert, W.** See Thoms, H., and Deckert, W.
- Demolson, A.** Analysis of wool waste or refuse, 420.
- Denham, W. S.** Methylation of cellulose. III., Homogeneity of product and limit of methylation, 154.
- Denigès, G.** Estimation of small quantities of phosphates in biological products, 460.
- Denigès, G.** Microchemical identification of hydrocyanic acid by means of alloxan reagent, 334.
- Denigès, —.** Microchemical tests for saccharin and its salts, 459.
- Denigès, G.** Sensitive colour reaction of phosphates and arsenates, 24.
- Denigès, G.** Zinc purpurate as a reagent for mercury salts, 421.
- Dentler, M. L.** See Wang, C. C., and Dentler, M. L.
- Depew, H. A., and Ruby, I. R.** Micro-sections cut from vulcanised rubber articles, 108.
- Dervieux, —.** Diagnosis of individual blood and sperm, 336.
- Deschiens, M.** Viscosity of cellulose ester solutions, 19.
- Desvergnès, L.** Detection of manioc and ricé flours, 367.
- Deuel, H. J.** See Holmes, A. D., and Deuel, H. J.
- Dieckmann, R.** Estimation of sulphur dioxide and trioxide in sulphur burner gases, 517.
- Dijk, J. C. Van.** See Kolthoff, I. M., and Dijk, J. C. Van.
- Dill, D. B.** Chemical study of certain Pacific Coast fishes, 503.
- Dill, D. B.** Chemical study of the California sardine (*Sardinia caerulea*), 503.
- Dodd, A. H.** Guanidine carbonate as a standard alkali, 250.
- Dohme, A. R. L.** Assay of aconite, 374.
- Doisy, E. A., and Bell, R. D.** Estimation of sodium in blood, 147.
- Doisy, E. A.** See Bell, R. D., and Doisy, E. A.
- Dolt, D. B.** Decomposition of atropine, 502.
- Dorsch, H.** Non-return arrangement for water pumps, 163.
- Dott, D. B.** Apomorphine hydrochloride, 373.
- Drew, J. D.** See Baker, J. C., Drew, J. D., and Conn, H. J.
- Drummond, J. C.** Factors influencing the nutritive value of lard and lard substitutes, 245.
- Drummond, J. C., Coward, K. H., and Watson, A. F.** Factors influencing the value of milk and butter as sources of vitamin A., 506.
- Drummond, J. C., Golding, J., Zilva, S. S., and Coward, K. H.** Nutritive value of lard, 244.
- Dubosc, A.** Estimation of thiocyanates in the presence of salts precipitated by silver nitrate, 522.
- Duclaux, J.** See Lanzenberg, A., and Duclaux, J.
- Dupré, F. H., and Dupré, P. V.** Notes on the reactions of fulminate of mercury with sodium thiosulphate, 42.
- Dupré, P. V.** See Dupré, F. H., and Dupré, P. V.
- Durand, J.** See Charpy, G., and Durand, J.
- Dutcher, R. A., Eckles, C. H., Dahle, C.D., Mead, S. W., and Schaefer, O. G.** Influence of the diet of the cow upon the nutritive and antiscorbutic properties of the cow's milk, 99.

- Dutcher, R. A., Harshaw, H. M., and Hall, J. S.** Effect of heat and oxidation upon the anti-scorbutic vitamin, 411.
- Duyk, —** Analysis of fabrics composed of a mixture of cotton and wool, 20.
- Dybowsky, J., and Millia, E.** Detection of tea-seed oil in olive oil, 458.
- Eckles, C. H.** See Dutcher, R. A., Eckles, C. H., Dahle, C. D., Mead, S. W., and Schaefer, O. G.
- Eddy, W. H., and Stevenson, H. G.** The "Bachman Test" for water-soluble vitamin B., 507.
- Eddy, W. H., Heft, H. L., Stevenson, H. C., and Johnson, R.** Yeast test as a measure of vitamin B., 410.
- Edwards, K. B., and Freak, G. A.** Estimation of phenols in sheep dips, 60.
- Effront, J.** Biochemical Catalysts in Life and Industry: Proteolytic Enzymes (Review), 72.
- Elliott, F. A., and Sheppard, S. E.** The gold number of commercial gelatins, 470.
- Ellis, N. R.** See Hart, E. B., Steenbock, H., and Ellis, N. R.
- Elsdon, G. D.** Borough Analyst's Report to the Borough of Salford for the Year 1920, 403.
- Emery, W. P.** Estimation of salicylates and phenol, 376.
- Englert, F.** See Heiduschka, A., and Englert, F.
- English, F. L.** Analysis of aromatic nitro compounds by means of titanium trichloride, 19.
- Ensoll, R.** Technical Chemists' Pocket Book (Review), 227.
- Euler, H. Von, and Svanberg, O.** Characterisation of amylase solutions, 419.
- Evans, B. S.** A new process for the estimation of small quantities of chromium in steels, 38.
- Evans, B. S.** The estimation of small amounts of chromium in steels (Notes), 285.
- Evans, E. A.** Lubricating and Allied Oils (Review), 311.
- Evers, N.** The colorimetric method of determining hydrogen ion concentration: Some applications in the analytical laboratory, 393.
- Evers, N., and Caines, C. M.** Estimation of formaldehyde and paraformaldehyde in tablets, 374.
- Ewing, C. O.** See Viehoever, A., Clevenger, J. F., and Ewing, C. O.
- Fahrion, W.** Analysis of partly hydrolysed fats, 297.
- Fairchild, J. G.** Analysis of mineral sulphide waters, 205.
- Falciola, P.** Sensitive reaction for copper, 471.
- Farr, H. V.** See Stearn, A. E., Farr, H. V., and Knowlton, N. P.
- Fazi, R. De.** New reaction of aldehydes, 376.
- Fechner, P. P.** Use of dyes in the microscopical examination of bread, flour, feeding stuffs, etc., 287.
- Feigl, F., and Stern, R.** Use of spot reactions in qualitative analysis, 212.
- Feldstein, L.** See Hiltner, R. S., and Feldstein, L.
- Fellenberg, T. Von.** Poisonous haricot beans, 196.
- Fellers, C. R.** Soya-bean oil, 458.
- Felsing, W. A., Arenson, S. B., and Kopp, F. L.** Determination of sulphur monochloride in mustard gas mixtures, 20.
- Felton, L. D.** Colorimetric method for the estimation of hydrogen-ion concentration in small volumes of liquid, 297.
- Ferni, A., and Malaguti, P.** Detection and estimation of chromium in steel, 66.
- Ferrari, F.** Estimation of titanium and iron in rocks, 66.
- Feuillee, E.** See Achard, C., and Feuillee, E.

- Field, E.** See Almy, L. H., and Field, E.
- Fierz-David, H. E.** The Fundamental Processes of Dye Chemistry (Review), 263.
- Florentino, G.** Estimation of tungsten, 214.

- Walton, C. F., Junr.** Preparation of rhamnose, 137.
- Wang, C. C., and Dentler, M. L.** Creatinine and creatine in the blood, 100.
- Waterman, H. C., and Johns, C. O.** Effect of cooking on the digestibility of phaseolin, 246.
- Waterman, H. C., and Jones, D. B.** Relative digestibility of various preparations of proteins from beans, 409.
- Watson, A. F.** See Drummond, J. C., Coward, K. H., and Watson, A. F.
- Wattiez, N.** Estimation of hydrastine in *Hydrastis Canadensis*, 143.
- Weinzirl, J.** Detection of manurial pollution in milk by the anaerobic spore test, 461.
- Welcome, C. J.** See Kopeloff, N. and L., and Welcome, C. J.

- Wenger, P., and Morel, J.** Separation of silicon, tin, titanium, and zirconium by means of sodium carbonate, 342.
- Wenger, P., and Trampler, A.** Estimation of total carbon and new method for graphitic carbon in ferro-alloys, 343.
- Werder, J.** Estimation of chlorine in milk without calcination, 498.
- Westcott, W. W.** See Martindale, W. H., and Westcott, W. W.
- Wester, D. H.** The use of phenolphthaleïn and diphenylamine in the estimation of manganese by the persulphate method, 112.
- Wetmore, A. S.** Estimation of chlorides in blood, 101.
- Whitby, G. S.** Plantation Rubber and the Testing of Rubber (Review), 69.
- Whymper, R.** Cocoa and Chocolate: their Chemistry and Manufacture (Review), 261.
- Wichmann, H. J.** New lead number estimation in vanilla extracts, 333.
- Wiegner, G.** Colloid chemistry of indicators, 205.
- Wilczek, E.** Impurities of cacao, 499.
- Wiley, J. A.** See Kelley, G. L., Wiley, J. A., Bohn, R. T., and Wright, W. C.
- Willard, H. H., and Cake, W. E.** Iodimetric estimation of amino nitrogen, 64.
- Willard, H. H., and Cake, W. E.** Perchloric acid as a dehydrating agent in the estimation of silica, 67.
- Williams, M.** See Gardner, J. A., and Williams, M.
- Williams, O. E.** See Zoller, H. F., and Williams, O. E.
- Williams, R. J.** Vitamins and yeast growth, 246.
- Windisch, R.** Adulteration of ground cinnamon with ochre, 196.
- Winkler, L. W.** Estimation of sulphuric acid in water, 148.
- Witzemann, E. J.** Disodium hydrogen phosphate as a catalyst for the oxidation of dextrose with hydrogen peroxide, 105.
- Woodman, H. E.** Examination of proteins in cow and ox serum, colostrum, and milk by racemisation, 504.
- Woodward, H. E., and Alsberg, C. L.** Detection of volatile alkamines in the presence of ammonia and of tertiary alkamines in the presence of primary and secondary alkamines, 256.
- Woog, P.** Greasiness of fatty substances, 464.
- Woog, P.** Oil-film measurement of fatty oils, and certain phenomena of molecular solutions, 465.
- Woytacek, C.** Distillation apparatus for small quantities, 163.
- Wrenshall, R.** See Dean, A. L., and Wrenshall, R.
- Wright, C. R. A.** Animal and Vegetable Fixed Oils, Fats, Butters, and Waxes (Review), 350.
- Wright, W. C.** See Kelley, G. L., Wiley, J. A., Bohn, R. T., and Wright, W. C.
- Wu, H.** Phosphomolybdic and phosphotungstic acids, 24.
- Wyon, G. A.** See McLeod, J. W., and Wyon, G. A.
- Yanagisawa, H., and Kamio, M.** Estimation of aceto-acetic ester, 512.
- Youngberg, G. E.** Removal of ammonia from urine, 146.
- Zeitlinger, H., and Sotheran, H. C.** Bibliotheca Chemico-Mathematica, Vols I. and II. (Review), 171.
- Zeller, S. M.** See Schmitz, H., and Zeller, S. M.
- Zenghelis, C. D.** Detection of nitrogen in organic compounds, 415.
- Zenghelis, C. D.** New reagent for ammonia, 381.
- Zijp, C. Van.** Sodium salicylate as reagent for detecting aluminium and manganese, 300.

- Zilva, S. S., and Miura, M.** Differential dialysis of vitamins, 506.
- Zilva, S. S.** See Drummond, J. C., Golding, J., Zilva, S. S., and Coward, K. H.
- Zoller, H. F.** Standardisation of the borax solubility test for commercial caseins, 108.
- Zoller, H. F., and Williams, O. E.** Separation and identification of "sandy" crystals in ice cream, 455.
- Zoller, H. F.** See Okuda, Y., and Zoller, H. F.
- Zoubkoff, S.** See Bach, A., and Zoubkoff, S.
- Zucker, T. F.** See Meysenbug, L. v., Pappenheimer, A. M., Zucker, T. F., and Murray, M. F.
- Zwicknagl, K.** Arsenic reduction tube with electrical heating, 260.

## INDEX TO SUBJECTS.

- Abstracts of Papers Published in Other Journals:** 1921: 11, 49, 94, 136, 195, 241, 286, 328, 367, 404, 455, 498.
- Acetic Acid:** Pyroligneous acid; Estimation of — in. V. E. Grotlisch, 96.
- Aceto-Acetic Ester:** —; Estimation of. H. Yanagisawa and M. Kamio, 512.
- Acetone:** —; Iodimetric estimation of. P. H. Hermans, 338.
- Acetone:** Creatinine in the presence of — and diacetic acid; Estimation of. N. F. Blau, 510.
- Acetone:** Expired air; Estimation of — in. R. S. Hubbard, 18.
- Acetone:** Minute amounts of —; Titrimetric determination of. R. S. Hubbard, 18.
- Acetyl Value:** Fatty substances; Determination of the — of. E. André, 251.
- Acidimetry:** Boric acid; — of. J. A. M. v. Liempt, 160.
- Acidity:** Coloured solutions; A method for the determination of the — of. J. L. Lizius, 194.
- Acidity:** Goat's, cow's, and human milk; Comparison of the — of. E. W. Schultz and L. R. Chandler, 241.
- Acidity:** Indicator of —; Phenol red as. A. Massink, 470.
- Acidity:** Soil toxicity, —, and basicity; Method of measuring. R. H. Carr, 511.
- Acids:** Diluting —, etc., to a desired strength; Formulae for (Notes). A. E. Johnson, 488.
- Acids:** Formaldehyde; Solubility of metals in — containing. R. C. Griffin, 110.
- Acids:** Metal alloys not attacked by —; Rapid method of disintegrating. I. Compagno, 65.
- Acids:** Mixtures of — and of bases, and of polybasic — or bases; Volumetric estimation of. H. T. Tizard and A. R. Boeree, 154.
- Acids:** Titration of — and bases; The joint use of two indicators in the. J. L. Lizius, 355.
- Aconite:** —; Assay of. A. R. L. Dohme, 374.
- Aconite:** Colour Reaction for —; A. S. Mallanneh, 193.
- Aconite Leaves:** Aconitine in some samples of tincture of —; Content of. A. Richaud, 97.
- Aconite Preparations:** Assay of —; Method for the. E. J. Chappel and N. L. Allport, 98.
- Aconitine:** Tincture of aconite leaves; Content of — in some samples of. A. Richaud, 97.
- Acrolein:** Glycerol in wine by conversion into —; Estimation of. A. Heiduschka and F. Englert, 332.
- Act:** Dangerous Drugs —. Revised Regulations, 304.
- Act:** Safeguarding of Industries —, 1921. The List of Articles Chargeable with Duty under Part I. of the —. 475.
- Address:** President; Annual — of the. 81.
- Adrenaline and Suprenal Preparations:** Physiological control of —; Necessity for the. M. Tiffeneau, 291.

- Adulteration** : — in butter by means of the melting-point of the insoluble volatile acids; The detection of. G. van B. Gilmour, 183.
- Adulteration** : Gum arabic; — of gum tragacanth with. L. Thevenon, 55.
- Agar-Agar** : —; The detection of (Notes). A. E. Parkes, 239.
- Agricultural Analysis, Abstracts** : 1921: 148, 205, 295, 338, 379, 414, 463, 511.
- Agricultural Experiment Station** : Superphosphates; Estimation of citrate-soluble phosphoric acid in. Official method of the German —. 295.
- Agriculture** : United States Department of —. Food Inspection Decision. 182, 497.
- Air** : Acetone in expired —; Estimation of. R. S. Hubbard, 18.
- Air** : Carbon monoxide in — and in flue gases; Estimation of small proportions of. D. Florentin and H. Vandenberghe, 153.
- Air** : Density of —; Rapid method of determining the. G. P. Baxter, 474.
- Air** : Flash points of mixtures of — and benzine; Determination of the. W. Reinders, 219.
- Air** : Nitrous fumes in —; Estimation of. J. Moir, 517.
- Albumin** : Urine; Gravimetric estimation of — in. G. Pegurier, 17.
- Albumoses** : —; Detection of. C. Achard and E. Feuillee, 204.
- Alcohol** : Ether, —, and water; Analysis of liquid and gaseous mixtures of. I. Masson and T. L. McEwan, 250.
- Alcohol** : Methyl —; A method of purification of. A. Lanzenberg and J. Duclaux, 206.
- Alcohol** : Methyl — and ethyl — in spirits, medicines, cosmetics, etc., by means of the Zeiss immersion refractometer; Estimation of. W. Lange and G. Reif, 369.
- Alcohol** : Methyl — in cacao-beans and husks; Estimation of. C. H. Koers, 52.
- Alcohol** : Methyl — in liqueurs and spirits; Detection of. L. Hoton, 53.
- Alcohol** : Methyl — in the presence of ethyl —; Denigès' test for the detection and estimation of. R. M. Chapin, 375.
- Alcohol** : Mixtures of ethyl — and amyl —; Critical temperature of solution of fats in. A. J. J. Vandeveldel, 243.
- Alcohol** : Nitrates by means of —; Removal of. R. Schneidewind, 217.
- Alcoholic Solution** : Lead acetate in —; Precipitation of solid fatty acids with. E. Twitchell, 466.
- Alcohols** : — and phenols in essential oils by esterification with pyridine; Estimation of. H. W. Van Urk, 512.
- Alcohols** : Sugars and Polyatomic — in boric acid and borate solutions, with some analytical applications; Reactions of. G. Van B. Gilmour, 3.
- Aldehydes** : Reaction of —; New. R. de Fazi, 376.
- Aliphatic Fatty Acids** : Food; Anhydrides of higher — as. D. Holde and I. Tacke, 245.
- Alkali Solutions** : Standard — free from carbonate; Preparation of. I. M. Kolthoff, 516.
- Alkali** : Standard —; Guanidine carbonate as a. A. H. Dodd, 250.
- Alkalimetric Titration** : Inorganic phosphate in urine by —; Estimation of. C. H. Fiske, 294.
- Alkaline Sodium Hypobromite Solution** : Copper sulphate; Catalytic decomposition of — by. P. Fleury, 23.
- Alkaline Potassium Permanganate** : Lactose by —; Volumetric method for the estimation of. F. T. Adriano, 137.
- Alkaline Solutions** : Thymol and carvacrol from —; Extraction of. D. C. L. Sherk, 140.

- Alkalinity**: Foods; Estimation of the — and phosphate content of the ash of. J. Tillmans and A. Bohrmann, 199.
- Alkalinity**: Pure and commercial soaps; Hydrolytic — of. F. C. Beedle and T. R. Bolam, 209.
- Alkalis**: Pectin; Action of — and of pectase upon. F. Tutin, 505.
- Alkaloid and Oil Content**: Meadow saffron seeds; The — of. C. Grimme, 200.
- Alkaloids**: Japanese corydalis; — of. Y. Asahina and S. Motigase, 143.
- Alkaloids**: Quinine and other cinchona —; The estimation of strychnine in scale preparations containing. T. F. Harvey and S. Back, 188.
- Alkaloids**: Ptomaines and — in toxicological analysis; Separation of. A. Jonescu, 102.
- Alkaloids**: Valerian; — of. A. Goris and C. Vischniac, 244.
- Alkalines**: Volatile — in the presence of ammonia and of tertiary — in the presence of primary and secondary —; Detection of. H. E. Woodward and C. L. Alsberg, 256.
- Alkalis**: Cellulose; Adsorption of — by. I. M. Kolthoff, 257.
- Alloxan Reagent**: Hydrocyanic acid by means of —; Microchemical identification of. G. Denigès, 334.
- Alloy**: Nitric nitrogen; Comparison of Scales' method and the use of Devarda's — for the reduction of. A. P. Harrison, 257.
- Alloys**: Aluminium, cobalt and chromium —; Analysis of. J. R. Camp and J. W. Marden, 22.
- Alloys**: Copper and iron in aluminium —; Rapid estimation of. P. Hulot, 471.
- Alloys**: Light aluminium casting —; Analysis of. R. M. Berry, 21.
- Alloys**: Metal — not attacked by acids; Rapid method of disintegrating. I. Compagno, 65.
- Alloys**: Steels and iron —; Estimation of vanadium in. L. Rolla and M. Nuti, 422.
- Alum**: Fractional crystallisation of the caesium gallium —; Separation of gallium from indium and zinc by. P. E. Browning and L. E. Porter, 158.
- Aluminium Alloys**: Copper and iron in —; Rapid estimation of. P. Hulot, 471.
- Aluminium**: — and of — oxide in commercial —; Estimation of. J. H. Capps, 471.
- Aluminium**: Beryllium; The separation of — from. Part I. H. T. S. Britton, 359.
- Aluminium**: Beryllium; The separation of — from. Part II. H. T. S. Britton, 437.
- Aluminium Casting Alloys**: Light —; Analysis of. R. M. Berry, 21.
- Aluminium, Cobalt, and Chromium Alloys**: —; Analysis of. J. R. Camp and J. W. Marden, 22. (See Errata, p. xlvi.)
- Aluminium**: Estimating —; Gas volumetric method of. L. Losana, 383.
- Aluminium, Ferric, and Chromium Hydroxides**: Separating —; New method for. M. and M. Lemarchands, 215.
- Aluminium Oxide**: Aluminium and of — in commercial aluminium; Estimation of. J. H. Capps, 471.
- Aluminium**: Reagent for detecting — and manganese; Sodium salicylate as. C. van Zijp, 300.
- Aluminium**: Salts; Volumetric estimation of — in its. A. Tingle, 343.
- American**: Turpentine. 206.
- Amino-Acids**: Urea, ammonia, and — in urine after precipitation of the ammonia; Estimation of. M. J. Philibert, 378.
- Amino-Acids**: Urine; Estimation of — in. W. Mestrézal, 204.

- Aminonaphthol-Mono- and Di-Sulphonic Acids** : —; Volumetric estimation of. G. R. Levi, 420.
- Amino Nitrogen** : —; Iodimetric estimation of. H. H. Willard and W. E. Cake, 64.
- Ammonia** : Gaseous — as hexamethylenetetramine picrate; Microchemical identification of. C. Kollo and V. Teodossiu, 111.
- Ammonia** : Reagent for —; New. C. D. Zenghelis, 381.
- Ammonia** : Urea, —, and amino-acids in urine after precipitation of the —; Estimation of. M. J. Philibert, 378.
- Ammonia** : Urine; Removal of — from. G. E. Youngberg, 146.
- Ammonia** : Volatile alkamines in the presence of — and of tertiary alkamines in the presence of primary and secondary alkamines; Detection of. H. E. Woodward and C. L. Alsberg, 256.
- Ammonia Yield** : Oil shale for oil and —; Laboratory testing of. E. L. Lomax and F. G. P. Remfrey, 156.
- Ammoniacal, Nitric, and Organic Nitrogen** : Mixed fertilisers; Gas-Volumetric estimation of — in. P. Baldi, 64.
- Ammonium Carbonate Solutions** : Carbon monoxide by cuprous —; Absorption of. W. R. Hainsworth and E. Y. Titus, 152.
- Ammonium Molybdate** : Mannitol; Influence of — on the rotatory power of. G. Tanret, 330.
- Ammonium Salts** : Formaldehyde; Volumetric estimation of — by means of. I. M. Kolthoff, 250.
- Ammonium Molybdate** : Sugars; Influence of — on the rotatory powers or certain. G. Tanret, 330.
- Ammonium Salts** : Opiums; Quantity of — in various. L. J. Thomson, 54.
- Ammonium Zinc Phosphate** : Zinc as —; Estimation of. G. Luff, 383.
- Amyl Alcohol** : Fats in mixtures of ethyl alcohol and —; Critical temperature of solution of. A. J. J. Vandevelde, 243.
- Amylase** : *Rhizopus Tritici*; — of. L. L. Harter, 203.
- Amylase Solutions** : Characterisation of —. H. v. Euler and O. Svanberg, 419.
- Anaerobic Spore Test** : Manurial pollution in milk by the —; Detection of. J. Weinzirl, 461.
- Analysis** : Gallium ferrocyanide in —; Use of. L. E. Porter and P. E. Browning, 158.
- Analytical Constants** : Linseed oil and soya bean oil on the estimation of these oils by means of the hexabromide and iodine values; Effect of variation in the — of. E. A. Tschudy, 513.
- Analytical Investigations** : Highly sensitive rays of the elements applicable to —; Table of. A. de Gramont, 64.
- Anhydrides** : Food; — of higher aliphatic fatty acids as. D. Holde and I. Tacke, 245.
- Anhydrous Stannic Chloride** : —; Preparation of. C. Van Loon, 110.
- Anhydrous Stannic Chloride** : Petroleum and petroleum distillates; Action of — on. G. Torossian, 513.
- Animal Tissues** : Iodine in blood and —; Estimation of. E. C. Kendall and F. S. Richardson, 13.
- Animal Tissues** : Vegetable and —; New technique for microscopical preparations of. Larbaud, 303.
- Animals** : Zinc content of vertebrate —; Variation in the. G. Bertrand and R. Vladesco, 244.
- Annatto** : Fats and oils; Test for — in. W. Brinsmaid, 198.

- Annual Report**: Birmingham City Analyst, 1920; — of the. 451.
- Annual Report**: Borough Analyst for the Metropolitan Borough of Stepney for the Year 1920; — of the. H. Hawley, 452.
- Anti-Bodies**: Bacterial —; The chemical nature of. F. M. Huntoon, P. Masucci and E. Hannum, 57.
- Antimony**: Tin and — in hydrochloric acid solution by means of hydrogen sulphide; Separation of. G. Luff, 213.
- Antimony**: Tin and —; Quantitative separation of. M. Mouret and M. J. Barlot, 422.
- Antiscorbutic Capacity**: Milk powders; — of. E. B. Hart, H. Steenbock, and N. R. Ellis, 292.
- Antiscorbutic Extracts**: Hydroquinone; Colour reaction common to — and. M. Bezssonoff, 462.
- Antiscorbutic Power**: Milk; Relation of fodder to the — and salt-content of. A. F. Hess, L. J. Unger, and G. C. Supplee, 99.
- Anti-Scorbutic Principle**: Potato juice; — of. Bezssonoff, 411.
- Anti-Scorbutic Properties**: Cow's milk; Influence of the diet of the cow upon the nutritive and — of the. R. A. Dutcher, C. H. Eckles, C. D. Dahle, S. W. Mead and O. G. Schaefer, 99.
- Anti-Scorbutic Vitamin**: Heat and oxidation upon the —; Effect of. R. A. Dutcher, H. M. Harshaw, and J. S. Hall, 411.
- Apomorphine**: Hydrochloride. D. B. Dott, 373.
- Apparatus**: Continuous dialysis or extraction; — for. H. Mann, 25.
- Apparatus**: Crystallised glass —; Repair of. A. F. O. Germann, 164.
- Apparatus**: Crystallised glass —; Repair of. H. Bailey, 475.
- Apparatus, etc., Abstracts**: 1921: 25, 68, 113.
- Apparatus**: Hydrogen sulphide; — for generating. V. B. Connell, 113.
- Apparatus**: Industrial analysis of gases; — for the. G. Ardoyer, 424.
- Apparatus**: Laboratory —. G. Ajon, 218.
- Apparatus**: Melting-point —. F. Friedrichs, 218.
- Apparatus**: Melting-points of fats and fatty acids; — for the routine determination of. S. H. Blichfeldt and T. Thornley, 180.
- Apparatus**: Oil-testing —; Deeley's, 114.
- Apparatus**: Small quantities; Distillation — for. C. Woytacek, 163.
- Apparatus**: Steam distillation; New — for. E. A. Roff, 386.
- Apparatus**: Victor Meyer's vapour density —; Modification of. T. S. Patterson, 113.
- Apple Wood**: Hemicellulose of —. W. E. Tottingham, R. H. Roberts, and S. Lepkousky, 204.
- Approximate Estimation**: Commercial cresol in lysol; — of. C. J. Jordan and F. Southerden, 375.
- Approximate Estimation**: Iron and manganese; — of. L. J. Curtman and N. H. Hecht, 299.
- Arachis Oil**: —; Chemical composition of. G. S. Jamieson, W. F. Baughman, and D. H. Brauns, 457.
- Aromatic Hydrocarbons**: Petrol; Estimation of — in mixtures with. H. T. Tizard and A. G. Marshall, 155.
- Aromatic Nitro Compounds**: Titanium trichloride; Analysis of — by means of. F. L. English, 19.
- Arsenate**: Arsenite; Separation and detection of — and. G. W. Sears, 302.
- Arsenates**: Phosphates and —. Sensitive colour reaction of. G. Denigès, 24.

- Arsenic**: Detection and estimation of —; General method for the. Kohn-Abrest, 65.
- Arsenic**: Estimation of —; New method for the. J. Cribier, 517.
- Arsenic Halogen Compounds**: —; Reduction of. O. Ruff, 298.
- Arsenic**: Metallurgical products; Estimation of — and phosphorus in. I. Compagno, 66.
- Arsenic**: Organic compounds; Estimation of — in. G. R. Robertson, 152.
- Arsenic Reduction Tube**: Electrical heating; — with. K. Zwicknagl, 260.
- Arsenious Compounds**: Potassium dichromate; Volumetric estimation of — by means of. R. Meurice, 213.
- Arsenite**: Arsenate and —; Separation and detection of. G. W. Sears, 302.
- Artificial**: "Honey." A. Beythien, 500.
- Artificial Honey**: Analysis of —; Methods for the. A. Behre, 499.
- Asbestos**: Adsorption by —. I. M. Kolthoff, 258.
- Aschmann's Method**: Iodine value; — of determining the. B. M. Margosches and R. Baru, 465.
- Ash**: Alkalinity and phosphate content of the — of foods; Estimation of the. J. Tillmans and A. Bohrmann, 199.
- Atmosphere**: Iodine on different metals in the cold; Action of: Process for the detection of the presence of chlorine in the —. C. Matignon, 211.
- Atropine**: —; Decomposition of. D. B. Dolt, 502.
- Atropine**: Benzoic acid and its application to the detection of —, cocaine, and stovaine; Reaction of. M. Guerbet, 11.
- Autoclave**: Glass —. Schmidt, 163.
- Auto-Discharge**: Radium emanation; Rapid method measuring the — of an electroscope in the estimation of. P. Loisel, 346.
- "**Bachman Test**": Water-soluble vitamin B.; The — for. W. H. Eddy and H. C. Stevenson, 507.
- Bacillus aerogenes**: *Bacillus coli* and —; Notes on. M. Levine, 461.
- Bacillus coli**: — and *Bacillus aerogenes*; Notes on. M. Levine, 461.
- Bacillus megatherium**: Souring of beef caused by —. H. Bunyea, 461.
- Bacteria**: Denitrifying — in water; The effect of. K. Scheringa, 205.
- Bacteria**: Non-alcoholic drinks; — in. L. Gershenfeld, 102.
- Bacterial Anti-Bodies**: Chemical nature of —; The. F. M. Huntoon, P. Masucci, and E. Hannum, 57.
- Bacterial Growth**: Vitamins in promoting —; Supposed importance of. J. W. McLeod and G. A. Wyon, 505.
- Bacterial Infections**: Udder; Reaction of milk in relation to the presence of blood-cells and of specific — of the. J. C. Baker and R. S. Breed, 16.
- Bacterial Stain**: Rose Bengal as a general —. H. J. Conn, 461.
- Bacteriological Content**: Water; Influence of minute quantities of metallic salts on the — of. E. L. Atkinson and R. C. Frederick, 247.
- Bacteriological, Physiological, etc., Abstracts**: 1921: 12, 55, 98, 145, 201, 244, 291, 335, 377, 408, 460, 502.
- Bacteriology**: Canned olives; — of. S. A. Koser, 103.
- Balsam**: Gurjun —; The Turner reaction for. J. B. Luther, 332.
- Balsam**: Peru — and its adulteration. L. Van Itallie, 141.
- Barfoed's Reagent**: Maltose and lactose in the presence of other reducing sugars by —; Estimation of. L. Le Grand, 406.
- Barfoed's Solution**: Maltose or lactose in presence of other reducing sugars; Estimation of: Use of —. Legrand, 198.

- Bark**: Yohimba —; Estimation of yohimbine in. A. Schomer, 373.
- Bases**: Mixtures of acids and of —, and of polybasic acids or —; Volumetric estimation of. H. T. Tizard and A. R. Boeree, 154.
- Bases**: Two indicators in the titration of acids and —; The joint use of. J. L. Lizius, 355.
- Basicity**: Soil toxicity, acidity, and —; Method of measuring. R. H. Carr, 511.
- Bast Fibres**: Cellulose in —; Estimation of. Y. Uyeda, 209.
- (*Bauhinia esculenta* Burch.)** Gemsbok beans —. G. T. Bray, 401.
- Bean**: Georgia Velvet —; Seed of the. B. Sure and J. W. Read, 506.
- Bean**: Navy — and peas; Carbohydrate content of. W. H. Peterson and H. Churchill, 329.
- Beans**: Foreign haricot —; Structure of. N. T. Giung, 329.
- Beans**: Gemsbok — (*Bauhinia esculenta*). G. T. Bray, 401.
- Beans**: Haricot —; Poisonous. T. v. Fellenberg, 196.
- Beans**: Proteins from —; Relative digestibility of various preparations of. H. C. Waterman and D. B. Jones, 409.
- Beans**: "Rice" — (*Phaseolus calcaratus*), 286.
- Beef**: *Bacillus Megatherium*; Souring of — caused by. H. Bunyea, 461.
- Beef Fat**: Lard by Bömer's method; Detection of — in. Vitoux and C. F. Muttelet, 371.
- Beef Fat**: Lard; Detection of — in. Vitoux and C. F. Muttelet, 94.
- Belgian Bureau**: Pure and Applied Chemistry; International Union of —. — of Chemical Standards. 266.
- Benzene Hydrocarbons**: Coal-gas; Estimation of — in. E. Berl, K. Andress, and W. Müller, 253.
- Benzine**: Air and —; Determination of the flash points of mixtures of. W. Reinders, 219.
- Benzoic Acid**: Atropine, cocaine, and stovaine; Reaction of — and its application to the detection of. M. Guerbet, 11.
- Berries**: *Juniperus Phoenicea* from Sardinia; Essential oil from the — of. E. Puxeddu and F. Vodret, 53.
- Beryllium**: Aluminium from —; The separation of. Part II. H. T. S. Britton, 437.
- Beryllium**: Aluminium from —, The separation of. Part I. H. T. S. Britton, 359.
- Bile Acids**: —; Estimation of. C. L. A. Schmidt and A. E. Dart, 146.
- Biological Method**: Dextrose; Investigation of the products of the enzymic hydrolysis of inulin by the — for the detection of. E. Bourquelot and M. Bridel, 408.
- Biological Products**: Phosphates in —; Estimation of small quantities of. G. Denigès, 460.
- Biological Reaction**: Blood; New — for. R. Guyot, 101.
- Birch and Gaultheria Oils**: Methyl salicylate in —; Review of tests for. C. H. LaWall, 97.
- Birmingham City Analyst**: Report of the —, 1920; Annual. 451.
- Bismuth**: High-grade ores; Colorimetric estimation of — in. G. Spurge, 298.
- Bismuth Salts**: Titanium trichloride and Devarda's alloy; Estimation of nitrates in — by means of. T. McLachlan, 383.
- Bituminous Limestones**: Organic carbon in —; Estimation of the. E. Sernagiotto, 296.
- "Black Spot"**: Chilled and frozen meat; — of. F. T. Brooks and M. N. Kidd, 292.

- “ Black Spot ”** : Citrus fruits; — of. H. A. Lee, 336.
- Bleached Flour** : U.S.A.; — in. 139.
- Blood** : Biological reaction for —; New. R. Guyot, 101.
- Blood** : Catalase, peroxydase, and etherase in a drop of —; Estimation of. A. Bach and S. Zoubkoff, 15.
- Blood-Cells** : Milk in relation to the presence of — and of specific bacterial infections of the udder; Reaction of. J. C. Baker and R. S. Breed, 16.
- Blood** : Chlorides in —; Estimation of. A. S. Wetmore, 101.
- Blood** : Chlorides in —; Estimation of. V. C. Myers and J. J. Short, 12.
- Blood** : Creatinine and creatine in the —. C. C. Wang and M. L. Dentler, 100.
- Blood** : Iodine in — and animal tissues; Estimation of. E. C. Kendall and F. S. Richardson, 13.
- Blood** : Phosphorus in urine and —; Colorimetric methods for estimation of. R. D. Bell and E. A. Doisy, 13.
- Blood-** Reducing sugars in — and pathological fluids; Volumetric method of estimating. A. Jonescu and V. Vargolici, 101.
- Blood** : Reducing sugars in —; Estimation of. O. Guillaumin, 14.
- Blood-Serum** : Calcium in —; Estimation of. B. Kramer and J. Howland, 12.
- Blood-Serum** : Diffusible calcium of —; Estimation of the. L. v. Meysenbug, A. M. Pappenheimer, T. F. Zucker, and M. F. Murray, 412.
- Blood-Serum** : Milk; Estimation of tryptophane in — and. O. Fürth and E. Nobel, 293.
- Blood** : Sodium in —; Estimation of. E. A. Doisy and R. D. Bell, 147.
- Blood** : Sperm; Diagnosis of individual — and. Dervieux, 336.
- Blood** : Sugar in —; Estimation of. E. Ponder and L. Howie, 293.
- Boiling-Point** : Minute quantities of substances; Determination of — of. V. Arreguine, 218.
- Bombay Mace**, 139.
- Borate Solutions** : Sugars and polyatomic alcohols in boric acid and —, with some analytical applications; Reactions of. G. Van B. Gilmour, 3.
- Borax Solubility Test** : Commercial caseins; Standardisation of the — for. H. F. Zoller, 108.
- Boric Acid** : Acidimetry of —. J. A. M. v. Liempt, 160.
- Boric Acid** : Sugars and polyatomic alcohols in — and borate solutions, with some analytical applications; Reactions of. G. Van B. Gilmour, 3.
- Bottle Glass** : Ink; the acidity of ink and the influence of — upon. C. A. Mitchell, 129.
- Bracken** : Rhizomes. J. Hendrick, 96.
- Bran** : Rice —; Adulteration of. 286.
- Brass** : Lead in —; Estimation of small amounts of. F. W. Glaze, 382.
- Brazilian Ore** : Zirconia from — and a new method of estimation; Preparation of. E. C. Rossiter and P. H. Sanders, 255.
- Bread** : Dyes in the microscopical examination of —; flour, feeding stuffs, etc.; Use of. P. P. Fechner, 287.
- Brighton** : Public Analyst for the County Borough of —; Correspondence on appointment of. 76.
- Brine** : Fish frozen in chilled —; Preservation of. Penetration of salt. L. H. Almy and E. Field, 503.
- British Columbian Willows and Poplars** : Salicin content of —. R. H. Clark and K. B. Gillie, 502.
- Bromate** : —, dichromate, nitrite, and chloride ions; Electrometric estimation of. W. S. Hendrixson, 472.

- Bromine**: Minute amounts of —; Estimation of. E. Oppenheimer, 516.
- Bromine**: Organic substances; Estimation of traces of — in. A. Damiens, 22.
- Bromine**: Poisons containing —; Toxicological detection of. A. Damiens, 14.
- Bromine**: Saline waters; Estimation of — in. P. Lebeau and M. Picon, 423.
- Bromometric Estimation**: Salicylic acid; — of. I. M. Kolthoff, 290.
- Brown-Husked Maize**: Quercitin in —; Occurrence of. C. E. Sando and H. H. Bartlett, 502.
- Bulbs**: Narcissus — and seaweed; Coffee substitutes from. C. Griebel and W. Rothe, 195.
- Butter and Margarine Fats**: Rancidity of —; Investigations on the. W. N. Stokoe, 335.
- Butter**: Illipé — used as substitute for cacao —; Detection and estimation of. F. G. H. Tate and J. W. Pooley, 229.
- Butter**: Lecithin content of — and its possible relationship to fishy flavour, 50.
- Butter**: Melting-point of the insoluble volatile acids; The detection of adulteration in — by means of the. G. Van B. Gilmour, 183.
- Butter**: Milk and — as sources of vitamin A.; Factors influencing the value of. J. C. Drummond, K. H. Coward and A. F. Watson, 506.
- Butter**: Otopa —; Analysis of. W. F. Baughman, G. S. Jamieson, and D. H. Brauns, 138.
- Butter**: Phosphorus in —. J. T. Cuisick, 50.
- Butyro-Refractometer**: Zeiss — setting of scale (Notes). J. F. Liverseege and W. Singleton, 93.
- Cacao-Beans**: Methyl alcohol in — and husks; Estimation of. C. H. Koers, 52.
- Cacao Butter**: Illipé butter used as substitute for —; Detection and estimation of. F. G. H. Tate and J. W. Pooley, 229.
- Cacao**: —; Impurities of. E. Wilczek, 499.
- Cadmium**: Zinc and — in volumetric work; Reductions with. W. D. Treadwell, 342.
- Caesium Gallium Alum**: Gallium from indium and zinc by fractional crystallisation of the —; Separation of. P. E. Browning and L. E. Porter, 158.
- Caffeine**: Tea and coffee; Estimation of — in. R. E. Andrew and E. M. Bailey, 405.
- Caffeine**: The obromine and —; Identification of. M. Malmy, 143.
- Cakes**: Hydrocyanic acid in linseed —; Presence of. Barishac, 56.
- Cakes**: Hydrocyanic acid in linseed —; Presence of. E. Kohn-Abrest, 57.
- Calcination**: Chlorine in milk without —; Estimation of. J. Werder, 498.
- Calcium**: Blood serum; Estimation of — in. B. Kramer and J. Howland, 12.
- Calcium**: Blood serum; Estimation of the diffusible — of. L. v. Meysenbug, A. M. Pappenheimer, T. F. Zucker, and M. F. Murray, 412.
- Calcium Chloride Method**: Water in gasoline and in certain other substances; — for the estimation of. C. W. Clifford, 417.
- Calcium Content**: White-of-egg; — of. H. Kreis and J. Studinger, 372, 498.
- Calcium**: Salt mixtures; Estimation of — and magnesium in various. E. Canals, 384.
- Calcium**: Salt mixtures; The quantitative estimation of — and magnesium, in various. E. Canals, 216.
- California Sardine**: — (*Sardinia caerulea*); Chemical study of the. D. B. Dill, 503.
- Calorific Value**: Coal; Determination of the — of. F. S. Sinnatt and M. B. Craven, 524.

- Camphor**: Camphorated oils; Estimation of — in. D. A. Wallace and S. B. Plummer, 501.
- Camphorated Oils**: Camphor in —; Estimation of. D. A. Wallace and S. B. Plummer, 501.
- Cane Sugar**: —; Inversion and estimation of. A. R. Rose, 288.
- Canned Herrings**: Maturing of —. (Report of the Food Investigation Board for the Year 1920). 453.
- Canned Olives**: —; Bacteriology of. S. A. Koser, 103.
- Cantaloup Seed**: Oil. W. F. Baughman, D. Brauns, and G. S. Jamieson, 51.
- Capillary Tubes**: Surface tension from the rise in —; Determination of. S. Sugden, 523.
- Caps**: Detonators and percussion —; Examination of. A. Langhans, 344.
- Capsella Bursa Pastoris**: —; Active constituents of. H. W. van Urk, 244.
- Carbohydrate Content**: Navy bean and peas; — of the. W. H. Peterson and H. Churchill, 329.
- Carbohydrate**: Thrice-boiled vegetables; Available — in. L. O'Reilly and E. H. McCabe, 242.
- Carbohydrates**: Vegetable foods; Estimation of — in. V. C. Myers and H. M. Croll, 287.
- Carbon**: Bituminous limestones; Estimation of the organic — in. E. Sernagiotto, 296.
- Carbon Dioxide**: Coal; Estimation of — in. F. S. Sinnatt and W. Harrison, 104.
- Carbon Dioxide**: Water; Estimation of active — in. I. M. Kolthoff, 249.
- Carbon Monoxide**: Air and in flue gases; Estimation of small proportions of — in. D. Florentin and H. Vandenberghe, 153.
- Carbon Monoxide**: Cuprous ammonium carbonate solutions; Absorption of — by. W. R. Hainsworth and E. Y. Titus, 152.
- Carbon Monoxide**: —; Detection of. C. R. Hoover, 470.
- Carbon**: Organic matter and organic — in soil; Rapid combustion method for the estimation of. J. W. Read, 295.
- Carbon**: Total — and new method for graphitic — in ferro-alloys; Estimation of. P. Wenger and A. Trampler, 343.
- Carbonate**: Standard alkali solutions free from —; Preparation of. I. M. Kolthoff, 516.
- Carbonates**: Certain soils; Investigation into the occurrence of different kinds of — in. F. Hardy, 148.
- Carbonisation Purposes**: Coal for —; Assay of. T. Gray and J. G. King, 209.
- Carnosine**: —; Colorimetric estimation of. W. M. Clifford, 507.
- Carvacrol**: Thymol and — from alkaline solutions; Extraction of. D. C. L. Sherk, 140.
- Casein**: Commercial —; Analysis of. R. H. Shaw, 107.
- Casein**: Fat in —; Proportion of. D. M. Gangolli and A. N. Meldrum, 455.
- Caseinogen**: Hydrolysed — and the isolation of tryptophane; Substances precipitated by mercuric sulphate from. H. Onslow, 504.
- Caseins**: Borax solubility test for commercial —; Standardisation of the. H. F. Zoller, 108.
- Cassava**: Flour. C. Grimme, 287.
- Castor Oil**: Hydroxystearic acid from hardened —; New. H. Thoms and W. Deckert, 139.
- Castor Oil Seeds**: Feeding cake; Detection of — in. C. Brioux and M. Guerbet, 100.

- Catalase** : Blood; Estimation of —, peroxydase, and etherase in a drop of. A. Bach and S. Zoubkoff, 15.
- Catalase** : Fish; Occurrence of — in. P. C. Stockstad, 291.
- Catalysis** : Permanganate titrations; — in. P. H. Segnitz, 109.
- Catalyst** : Oxidation of dextrose with hydrogen peroxide; Disodium hydrogen phosphate as a — for the. E. J. Witzemann, 105.
- Catalytic Decomposition** : Alkaline sodium hypobromite solution by copper sulphate; — of. P. Fleury, 23.
- Cathodes** : Electrolytic work; Gold — for. A. B. Andrews, 386.
- Cattle Food** : Hydrolysed sawdust; — prepared from. E. C. Sherrard and G. W. Blanco, 199.
- Caviare** : — and — substitutes. P. Buttenberg, 498.
- Caviare Substitutes** : Caviare and —. P. Buttenberg, 498.
- Cellobiose** : — (cellose); Constitution of. W. N. Haworth and E. L. Hirst, 210.
- (Cellose)** : Cellobiose —; Constitution of. W. N. Haworth and E. L. Hirst, 210.
- Cellulose** : Alkalis by —; Adsorption of. I. M. Kolthoff, 257.
- Cellulose** : Bast fibres; Estimation of — in. Y. Uyeda, 209.
- Cellulose** : —; Methylation of. III. — Homogeneity of product and limit of methylation. W. S. Denham, 154.
- Cellulose Ester Solutions** : Viscosity of —. M. Deschiens, 19.
- Cellulose** : Lead and copper by —; Adsorption of. I. M. Kolthoff, 258.
- Cellulose** : Wood —; Examination of. F. Lenze, B. Pleus, and J. Müller, 106.
- Cement** : fibro- —; Analysis of. B. J. Smart and P. C. Pecover, 424.
- Cereal** : Egg-powder with —; Adulteration of. 404.
- Cereal Grains** : — Rye; Amylases of the. J. L. Baker and H. F. E. Hulton, 329.
- Cereals** : Chloropicrin in the disinfection of —; Use of. A. Piutti and A. Mango, 145.
- Characteristic Reaction** : Mercury fulminate; — of. A. Langhans, 253.
- Chaulmoogra Oil** : —; Fractionation of. A. L. Dean and R. Wrenshall, 52.
- Check Valve** : Water vacuum pumps; — for. E. A. Andelin, 303.
- Chemical Composition** : Arachis oil; — of. G. S. Jamieson, W. F. Baughman, and D. H. Brauns, 457.
- Chemical Conference** : International —; First. 120.
- Chemical Nature** : Bacterial anti-bodies; The — of. F. M. Huntoon, P. Masucci, and E. Hannum, 57.
- Chemical Reagents** : Wood; Effects of — on the microstructure of. A. Abrams, 468.
- Chemical Standards** : New —. (Analytically standardised samples). 477.
- Chemical Standards** : Pure and Applied Chemistry; International Union of. Belgian Bureau of —. 266.
- Chemistry** : Pure and Applied —; International Union of. Belgian Bureau of Chemical Standards. 266.
- Chia** : Oil. H. A. Gardner, 20.
- Chicha** : —; Composition of. D. C. Andrade, 136.
- Chicory** : Coffee substitutes; Analyses of — and other. J. Pritzker and R. Jungkuz, 289.
- Chilian** : Honey (Notes). G. R. Thompson, 328.
- Chilled and Frozen Meat** : "Black spot" of —. F. T. Brooks and M. N. Kidd, 292.
- Chinese Colza Seed** : Oils from — (*Brassica campestris chinoleifera*). A. Viehöver, J. F. Clevenger, and C. O. Ewing, 94.

- Chlorides**: Blood; Estimation of — in. A. S. Wetmore, 101.
- Chlorides**: Blood; Estimation of — in. V. C. Myers and J. J. Short, 12.
- Chloride Ions**: Bromate, dichromate, nitrite, and —; Electrometric estimation of. W. S. Hendrixson, 472.
- Chlorides**: Leather; Estimation of hydrochloric acid and neutral — in. A. W. Thomas and A. Frieden, 107.
- Chlorides**: Petroleum; Estimation of — in. R. R. Matthews, 252.
- Chlorine**: Calcination; Estimation of — in milk without. J. Werder, 498.
- Chlorine Disinfectants**: Germicidal value of some —. F. W. Tilley, 103.
- Chlorine**: Iodine on different metals in the cold; Action of: Process for the detection of the presence of — in the atmosphere. C. Matignon, 211.
- Chlorine**: Tissues; Estimation of — in. R. D. Bell and B. A. Doisy, 146.
- Chloropicrin**: Cereals; Use of — in the disinfection of. A. Piutti and A. Mango, 145.
- Cholesterol**: Allied substances; Methods for the estimation of — and. J. A. Gardner and M. Williams, 508.
- Chromic Acid**: Oxidation with —; Estimation of organic compounds by. H. Cordebard, 151.
- Chromic Oxide Precipitates**: Lime and magnesia by —; Entanglement of. E. Toporescu, 216.
- Chromic Salts**: Permanganate, dichromate, and —; Volumetric analysis of mixtures of. N. G. Chatterji, 520.
- Chromite**: Chromium in —; Iodimetric method for the estimation of. E. Little and J. Costa, 216.
- Chromium, Aluminium, and Cobalt Alloys**: —; Analysis of. J. R. Camp and J. W. Marden, 22.
- Chromium**: Chromite; Iodimetric method for the estimation of — in. E. Little and J. Costa, 216.
- Chromium**: —; Iodimetric titration of. J. M. Kolthoff, 160.
- Chromium, Ferric, and Aluminium Hydroxides**: Separating —; New method for. M. and M. Lemarchands, 215.
- Chromium**: Steel; Detection and estimation of — in. A. Ferni and P. Malaguti, 66.
- Chromium**: Steels; A new process for the estimation of small quantities of — in. B. S. Evans, 38.
- Chromium**: Steels; The estimation of small amounts of — in (Notes). B. S. Evans, 285.
- Chromium**: Uranium, vanadium, and — when present together; Qualitative separation and detection of. P. E. Browning, 158.
- Chromium**: Vanadium and — in ferrovanadium by electrometric titration; Estimation of. G. L. Kelley, J. A. Wiley, R. T. Bohn, and W. C. Wright, 519.
- Cinchona Alkaloids**: Strychnine in scale preparations containing quinine and other —; The estimation of. T. F. Harvey and S. Back, 188.
- Cinnamon**: Ochre; Adulteration of ground — with. R. Windisch, 196.
- Citrate-Soluble Phosphoric Acid**: Superphosphates; Estimation of — in. Official method of the German Agricultural Experiment Station. 295.
- Citric and Oxalic Acids**: —; Detection of. Polonovski, 464.
- Citrus Fruits**: Black spot of —. H. A. Lee, 336.
- Clay**: Heavy soils; Estimation of — in. A. F. Joseph and F. J. Martin, 463.
- Clove Oil**: Clove stems; — from. S. T. Gadre, 201.
- Clove Stems**: Clove oil from —. S. T. Gadre, 201.

- Coal**: Calorific value of —; Determination of the. F. S. Sinnatt and M. B. Craven, 524.
- Coal**: Carbon dioxide in —; Estimation of. F. S. Sinnatt and W. Harrison, 104.
- Coal**: Carbonisation purposes; Assay of — for. T. Gray and J. G. King, 209.
- Coal-Gas**: Benzene hydrocarbons in —; Estimation of. E. Berl, K. Address, and W. Müller, 253.
- Coal**: Melting-point of —. G. Charpy and J. Durand, 59.
- Coal**: Sulphide, sulphate, and organic sulphur in —; Estimation of. A. R. Powell, 514.
- Coal Tar Creosote**: Wood-destroying fungi; Toxicity of various fractions and combinations of fractions of — to. H. Schmitz and S. M. Zeller, 409.
- Coal Tar Dyes**: —; Classification and identification of. Circulaire du Chef du Service des Finances et MM. les Chimistes en Chef des Laboratoires. 63.
- Coal**: Tar from —; Apparatus for estimating the yield of. H. Schrader, 340.
- Coal Tar Oils**: Turpentine; Detection and estimation of — in. V. E. Grotlich and W. C. Smith, 469.
- Coals**: Volatile matter yielded by — up to various temperatures; New method for estimating the. W. A. Bone and L. Silver, 415.
- Cobalt, Aluminium, and Chromium Alloys**: —; Analysis of. J. R. Camp and J. W. Marden, 22.
- Cobalt**: — and nickel in — steels; Estimation of. G. E. F. Lundell and J. I. Hoffmann, 384.
- Cobalt**: —; Detection and estimation of. S. A. Braley and F. B. Hobart, 300.
- Cobalt**: Iron and —; The dimethyl-glyoxime reactions of. W. Vaubel, 422.
- Cobalt**: Nitroso R-salt, a reagent for the detection of —. H. S. van Klooster, 254.
- Cobalt Steels**: Cobalt and nickel in —; Estimation of. G. E. F. Lundell and J. I. Hoffmann, 384.
- Cocaine**: Atropine, —, and stovaine; Reaction of benzoic acid and its application to the detection of. M. Guerbet, 11.
- Cocoa**: Theobromine in — and its products; The estimation of. R. V. Wadsworth, 32.
- Coconut and Palm Kernel Oils**: Fat mixtures in which both oils may be present; Estimation of — in. W. N. Stokoe, 196.
- Codeine**: Indian opium; Morphine, —, and narcotine in. Jitendra Nath Rakshit, 481.
- Coffee Bean (*Daubentonia longifolia*)**: Poisonous plant; — as a. C. D. Marsh and A. B. Clawson, 145.
- Coffee**: Extracts. G. S. Ponce and J. R. Palma, 136.
- Coffee Substitutes**: Chicory and other —; Analyses of. J. Pritzker and R. Jungkunz, 289.
- Coffee Substitutes**: Narcissus bulbs and seaweed; — from. C. Griebel and W. Rothe, 195.
- Coffee**: Tea and —; Estimation of caffeine in. R. E. Andrew and E. M. Bailey, 405.
- Cohune Nut**: Globulin from the —. C. O. Johns and C. E. F. Gersdorff, 100.
- Cold Test Apparatus**: Oils; — for. G. H. P. Lichthardt, 218.
- Colloid Chemistry**: Indicators; — of. G. Wiegner, 205.
- Colloidal Matter**: Soils; Methods of estimating the amount of — in. C. J. Moore, W. H. Fry, and H. E. Middleton, 379.
- Colorimetric Estimation**: Tryptophane; — of. O. Fürth and F. Lieben, 100.

- Colorimetric Method**: Hydrogen-ion concentration in small volumes of liquid; — for the estimation of. L. D. Felton, 297.
- Colorimetric Method**: Hydrogen-ion concentration in water; — for the estimation of. I. M. Kolthoff, 379.
- Colorimetric Method**: Hydrogen-ion concentration; The —. of determining: Some applications in the analytical laboratory. N. Evers, 393.
- Colorimetric Methods**: Phosphorus in urine and blood; — for estimation of. R. D. Bell and E. A. Doisy, 13.
- Colostrum**: —. C. Porchet and L. Panisset, 98.
- Colostrum**: Proteins in cow and ox serum, —, and milk by racemisation; Examination of. H. E. Woodman, 504.
- Colour**: Measurement of —. C. E. K. Mees, 474.
- Colour Reaction**: Aconite; A — for. S. Mallanah, 193.
- Colour Reaction**: Antiscorbutic extracts and hydroquinone; — common to. M. Bezssonoff, 462.
- Colour Reaction**: Glycine anhydride and of its dipeptide compounds; — of. T. Sasaki, 514.
- Colour Reaction**: Phosphates and arsenates; Sensitive — of. G. Denigès, 24.
- Colour Reactions**: "Lignin" —; Significance of. E. C. Crocker, 419.
- Coloured Malts**: Extract of —; Estimation of the. C. G. Matthews, 95.
- Coloured Solutions**: Acidity of —; A method for the determination of the. J. L. Lizius, 194.
- Colouring**: Microscope field; Note on — of the (Notes). R. J. Phillips, 367.
- Colza Seed**: Chinese — (*Brassica campestris chinoleifera*); Oils from. A. Viehoever, J. F. Clevenger, and C. O. Ewing, 94.
- Combustion Method**: Organic matter and organic carbon in soil; Rapid — for the estimation of. J. W. Read, 295.
- Complex Mixture**: Neovalvarsan in a —; Detection of. M. A. Morel, 408.
- Concentrates**: Dairy cows; Wet and dry feeding of — to. R. A. Berry, 195.
- Concentrator**: Vacuum pump; Sulphuric acid — and. O. Maass, 68.
- Conductance**: Electrolytic —; New method of measuring. C. Marie and W. A. Noyes, Junr., 346.
- Conductimetric**: Titration. A. Heldring, 162.
- Conductimetric**: Titration. J. M. Kolthoff, 63.
- Conductivity**: Electrolytes; Determination of the — of. A. H. W. Aten, 109.
- Conference**: International Chemical —; First. 120.
- Constants and Numerical Data**: —: Chemical, Physical, and Technological; Annual Tables of. 388.
- Contact-Ring Stillheads**: Fractional distillation with —. R. Lessing, 386.
- Copper**: Aluminium alloys; Rapid estimation of — and iron in. P. Hulot, 471.
- Copper**: Gold and its separation from —, palladium, and platinum; Electrolytic estimation of. W. D. Treadwell, 298.
- Copper**: Lead and — by cellulose; Adsorption of. I. M. Kolthoff, 258.
- Copper**: Sensitive reaction for —. P. Falcicola, 471.
- Copper**: Sugar analysis by means of potassium thiocyanate and potassium iodide; Estimation of — in. G. Bruhns, 23.
- Copper Sulphate**: Alkaline sodium hypobromite solution by —; Catalytic decomposition of. P. Fleury, 23.
- Corydalis**: Japanese —; Alkaloids of. Y. Asahina and S. Motigase, 143.
- Cosmetics**: Spirits, medicines, —, etc., by means of the Zeiss immersion refractometer; Estimation of methyl alcohol and ethyl alcohol in. W. Lange and G. Reif, 369.

- Cotton** : Fabrics composed of a mixture of — and wool; Analysis of. Duyk, 20.
- Cow and Ox Serum** : Proteins in —, colostrum, and milk by racemisation; Examination of. H. E. Woodman, 504.
- Cow** : Nutritive and anti-scorbutic properties of the cow's milk; Influence of the diet of the — upon the. R. A. Dutcher, C. H. Eckles, C. D. Dahle, S. W. Mead, and O. G. Schaefer, 99.
- Cow's, and Human Milk** : Acidity of goat's, —; Comparison of the. E. W. Schultz and L. R. Chandler, 241.
- Cows** : Concentrates to dairy —; Wet and dry feeding of. R. A. Berry, 195.
- Creamery** : Fat tests in milk as determined by a milk-testing association and by a —; Comparison of. H. C. Troy, 49.
- Creatine** : Blood; Creatinine and — in the. C. C. Wang and M. L. Dentler, 100.
- Creatinine** : Acetone and diacetic acid; Estimation of — in the presence of. N. F. Blau, 510.
- Creatinine** : Blood; — and creatine in the. C. C. Wang and M. L. Dentler, 100.
- Creosote** : Wood-destroying fungi; Toxicity of various fractions and combinations of fractions of coal tar — to. H. Schmitz and S. M. Zeller, 409.
- Cresol** : Lysol; Approximate estimation of commercial — in. C. J. Jordan and F. Southerden, 375.
- Cresol** : Lysol; Approximate estimation of commercial — in (Notes). G. F. W. Martin, 451.
- Cresol** : Phenol reagent of Folin and Denis; Estimation of — by the. R. M. Chapin, 419.
- Critical Temperature** : Fats in mixtures of ethyl alcohol and amyl alcohol; — of solution of. A. J. J. Vandevelde, 243.
- Critical Temperature** : Hydrocarbons, etc.; — of solution and turbidity-temperature of. N. Chercheffsky, 162.
- Crystalline Substances** : Rubber; Solubility of — in. G. Bruni, 211.
- Crystallised Glass Apparatus** : Repair of —. A. F. O. Germann, 164.
- Crystallised Glass Apparatus** : Repair of —. H. Bailey, 475.
- Crystals** : Ice cream; Separation and identification of "sandy" — in. H. F. Zoller and O. E. Williams, 455.
- Cubebs** : Fruits of *Piper ribesoides* for —; Substitution of the. 144.
- Cup and Ball Viscosimeter** : —; Michell's. T. C. Thomsen, 114.
- Cupferron Method** : Iron by the —; Estimation of. G. E. F. Lundell, 254.
- Cuprous Ammonium Carbonate Solutions** : Carbon monoxide by —; Absorption of. W. R. Hainsworth and E. Y. Titus, 152.
- Cuprous Mercuric Iodide** : Mercury as —; Identification of. P. Artmann, 254.
- Curua** : Palm oil, 50.
- Cyanic Acid** : Oxidation of organic substances; Syntheses of — by. New methods of analysis of this substance. R. Fosse, 207.
- Cyanometric Assay** : Nickel; — of. G. H. Stanley, 519.
- Cyprus** : Perilla seed from —. 289.
- Dairy Cows** : Wet and dry feeding of concentrates to —. R. A. Berry, 195.
- Damp Material** : "Wet" and "dry" weights of —; Slide rule for calculation of. R. Scott, 303.
- Dangerous Drugs** : Act. Revised Regulations. 304.
- (*Daubentonia longifolia*)** : Coffee bean — as a poisonous plant. C. D. Marsh and A. B. Clawson, 145.
- Deeley's Oil-Testing Apparatus** : —. 114.

- Dehydrating Agent** : Silica; Perchloric acid as a — in the estimation of. H. H. Willard and W. E. Cake, 67.
- Denigès' Test** : Methyl alcohol in the presence of ethyl alcohol; — for the detection and estimation of. R. M. Chapin, 375.
- Denitrifying Bacteria** : Water; The effect of — in. K. Scheringa, 205.
- Density** : Air; Rapid method of determining the — of. G. P. Baxter, 474.
- Department of Scientific and Industrial Research** : Report of the Food Investigation Board for the Year 1920. 453.
- Derivatives** : Commercial salvarsan; — of sulphur in. H. King, 407.
- Derivatives** : Sulphur in commercial salvarsan; — of. — II. H. King, 459.
- Dermatitant** : *Rhus diversiloba* (poison oak); Lobinol, a — from. J. B. McNair, 143.
- Detonators** : Percussion caps; Examination of — and. A. Langhans, 344.
- Devarda's Alloy** : Nitrates in bismuth salts by means of titanium trichloride and —; Estimation of. T. McLachlan, 383.
- Devarda's Alloy** : Nitric nitrogen; Comparison of Scales' method and the use of — for the reduction of. A. P. Harrison, 257.
- Dextrin** : Dextrose, laevulose, sucrose and — in admixture; Estimation of. A. Behre, 368.
- Dextrin Pastes** : Starch and —; Consistence of. W. H. Herschel and C. Bergquist, 468.
- Dextrose** : —, laevulose, sucrose and dextrin in admixture; Estimation of. A. Behre, 368.
- Dextrose** : Enzymic hydrolysis of inulin by the biological method for the detection of —; Investigation of the products of the. E. Bourquelot and M. Bridel, 408.
- Dextrose** : Hydrogen peroxide; Disodium hydrogen phosphate as a catalyst for the oxidation of — with. E. J. Witzemann, 105.
- Dextrose** : Plants; Detection of — in. M. Bridel and R. Arnold, 378.
- Dextrose** : Small quantities of —; Estimation of. Perrier, 11.
- Dextrose** : Starch; Estimation of — and. F. A. Quisumbing, 58.
- Dextrose** : Thiocyanate-potassium iodide method; Table for the estimation of —, invert sugar, and laevulose by the. G. Bruhns, 330.
- Diacetic Acid** : Creatinine in the presence of acetone and —; Estimation of. N. F. Blau, 510.
- Dialysis** : Continuous — or extraction; Apparatus for. H. Mann, 25.
- Diastatic Power** : Malts; Iodimetric determination of the — of. J. L. Baker and H. F. E. Hulton, 90.
- Dichromate** : Bromate, —, nitrite, and chloride ions; Electrometric estimation of. W. S. Hendrixson, 472.
- Dichromate** : Mixtures of permanganate, —, and chromic salts; Volumetric analysis of. N. G. Chatterji, 520.
- Dicyanodiamide** : —; Direct estimation of. E. B. Johnson, 338.
- Dicyanodiamide** : Fertilisers; Estimation of — and of urea in. E. Johnson, 380.
- Diet** : Cow's milk; Influence of the — of the cow upon the nutritive and anti-scorbutic properties of the. R. A. Dutcher, C. H. Eckles, C. D. Dahle, S. W. Mead, and O. G. Schaefer, 99.
- Differential Dialysis** : Vitamins; — of. S. S. Zilva and M. Miura, 506.
- Digestibility** : Hydrogenated oils; — of some. A. D. Holmes and H. J. Deuel, 503.
- Digestibility** : Phaseolin; Effect of cooking on the — of. H. C. Waterman and C. O. Johns, 246.

- Digestibility**: Various preparations of proteins from beans; Relative — of. H. C. Waterman and D. B. Jones, 409.
- Digitalis**: —; Chemistry of. H. C. Hamilton, 98.
- Dimethylglyoxime Reactions**: Iron and cobalt; The — of. W. Vaubel, 422.
- Dinitrosalicylic Acid**: Sugar in urine; — as a reagent for the estimation of. J. B. Sumner, 413.
- Dipeptide Compounds**: Glycine anhydride and of its —; Colour reaction of. T. Sasaki, 514.
- Diphenylamine and Formaldehyde Reaction**: Milk; Iron as the cause of the — of. F. Reiss, 136.
- Diphenylamine**: Phenolphthaleïn and — in the estimation of manganese by the persulphate method; The use of. D. H. Wester, 112.
- Dips**: Phenols in sheep —; Estimation of. K. B. Edwards and G. A. Freak, 60.
- Discoloration**: Sweet potatoes in tins; — of. E. F. Kohman, 404.
- Disinfectants**: Chlorine —; Germicidal value of some. F. W. Tilley, 103.
- Disodium Hydrogen Phosphate**: Dextrose with hydrogen peroxide; — as a catalyst for the oxidation of. E. J. Witzemann, 105.
- Dissolved Gases**: Petrols containing —. F. Bordas, 59.
- Distillation Apparatus**: Small quantities; — for. C. Woytacek, 163.
- Distillation**: Contact-ring stillheads; Fractional — with. R. Lessing, 386.
- Distillation**: Steam —; New apparatus for. E. A. Roff, 386.
- Di-Sulphonic Acids**: Aminonaphthol mono- and —; Volumetric estimation of. G. R. Levi, 420.
- Disulphonic Acids**: Naphthalene —; Qualitative detection of certain. J. A. Ambler, 107.
- Drinking Water**: Hydrogen ion concentration in the examination of —; Estimation and significance of the. I. M. Kolthoff, 249.
- Drinks**: Non-alcoholic —; Bacteria in. L. Gershenfeld, 102.
- Drugs**: Act; Dangerous —. Revised Regulations. 304.
- Drying Oils**: Oxygen absorption of —; True. S. Coffey, 418.
- Dumas and Kjeldahl Methods**: Total nitrogen in urine by the —; Estimation of. W. Mestrezat and M. P. Janet, 17.
- Dyes**: Bread, flour, feeding, stuffs, etc.; Use of — in the microscopical examination of. P. P. Fechner, 287.
- Dyes**: Coal tar —; Classification and identification of. Circulaire du Chef du Service des Finances et MM. les Chimistes en Chef des Laboratoires. 63.
- Dyes**: Living and dead yeast; Action of methylene blue and other — on. C. G. Fraser, 247.
- Edestin**: Pepsin; Use of — in determining the proteolytic activity of. J. F. Brewster, 245.
- Edible Fungi**: Preserved —. J. Gerum, 243.
- Egg-Powder**: Cereal; Adulteration of — with. 404.
- Egg-Powder**: Composition of —; The. F. F. Beach, F. E. Needs, and E. Russell, 279.
- Egg Products**: Eggs and —. 404.
- Egg Substitute**: U.S.A. Service and Regulatory Announcements. Misbranding of —. 455.
- Egg**: White-of- —; Calcium content of. H. Kreis and J. Studinger, 372, 498.
- Egg-Yolk Lecithin**: Fatty acids of —. P. A. Levene and I. P. Roaf, 242.
- Eggs**: Egg products; — and. 404.

- Elaeostearic Acid Tetrabromide**: Tung oil with ordinary linolic acid tetrabromide; Non-Identity of — from. B. H. Nicolet, 251.
- Electric Oven**: Rapid moisture estimations; — for. G. L. Spencer, 217.
- Electrical Conductivity**: Water extracts of wheat flour; — of. C. H. Bailey and F. A. Collatz, 242.
- Electrical Heating**: Arsenic reduction tube with —. K. Zwicknagl, 260.
- Electrolytes**: Conductivity of —; Determination of the. A. H. W. Aten, 109.
- Electrolytic Conductance**: Measuring —; New method of. C. Marie and W. A. Noyes, Junr., 346.
- Electrolytic Estimation**: Gold; — of, and its separation from copper, palladium and platinum. W. D. Treadwell, 298.
- Electrolytic Work**: Gold cathodes for —. A. B. Andrews, 386.
- Electrometric Estimation**: Bromate, dichromate, nitrite, and chloride ions; — of. W. S. Hendrixson, 472.
- Electrometric Titration**: Hydriodic acid and its use as a standard in oxidimetry; — of. W. S. Hendrixson, 211.
- Electrometric Titration**: Hypochlorous acid; — of. W. D. Treadwell, 301.
- Electrometric Titration**: Iodic acid and silver by —; Estimation of. W. S. Hendrixson, 255.
- Electrometric Titration**: Vanadium and chromium in ferrovanadium by —; Estimation of. G. L. Kelley, J. A. Wiley, R. T. Bohn, and W. C. Wright, 519.
- Electroscope**: Radium emanation; Rapid method for measuring the auto-discharge of an — in the estimation of. P. Loisel, 346.
- Elements**: Highly sensitive rays of the — applicable to analytical investigations; Table of. A. de Gramont, 64.
- Endosperm**: Wheat berry; Distribution of enzymes and proteins in the — of the. F. J. Martin, 56.
- Enzymes**: Endosperm of the wheat berry; Distribution of — and proteins in the. F. J. Martin, 56.
- Enzymes**: Fruits; Oxidising — of. M. W. Onslow, 292.
- Enzymic Hydrolysis**: Products of the — of inulin by the biological method for the detection of dextrose; Investigation of the. E. Bourquelot and M. Bridel, 408.
- Epidemic**: Ropy milk; An — of. H. A. Harding and M. J. Prucha, 99.
- Errata**: 1920:  
 Page 270, line 11 from top, for "2549" read "2849".  
 Page 218, bottom line, for "69" read "169".  
 Page 262, line 24, delete "with."  
 Page 284, top line, for "saponifiable" substitute "unsaponifiable."  
 Page 339, line 4, for "1895, 19, 14" read "1894, 19, 141."  
 Page 450, line 9, add "ANALYST, 1920, 45, 139."
- Errata**: 1921:  
 Page 22, lines for "Aluminium" read "Molybdenum."  
 Page 33, line 15, for "11" read "9."  
 Page 110, last line, for "1920" read "1921."  
 Page 111, line 10, for "1896" read "1895."  
 Page 131, line 21, delete "1909, 30."  
 Page 144, for "Onoperdon" substitute *Onopordon*.  
 Pages 143 and 374, for "acid-soluble" read "acid-insoluble."  
 Page 332, line 29, for "ANALYST" read "*J. Inst. Br.*"  
 Page 344, line 19, for "sulphite" read "sulphur trioxide."  
 Page 424, line 24, for "arsenious acid" read "arsenic."  
 Page 502, for "Dolt" read "Dott."

- Erythro-dextrin**: Individuality of —; The. J. C. Blake, 59.
- Essential Oil**: Berries of *Juniperus phoenicea* from Sardinia; — from the. E. Puxeddu and F. Vodret, 53.
- Essential Oil**: *Perilla Nankinensis*; — from. S. Furukawa and Z. Tomizawa, 290.
- Essential Oil**: *Skimmia laureola*; — from leaves of. J. L. Simonsen, 333.
- Essential Oil**: Spearmint from South Africa; — of. 201.
- Essential Oils**: Alcohols and phenols in — by esterification with pyridine; Estimation of. H. W. Van Urk, 512.
- Ester**: Aceto-acetic —; Estimation of. H. Yanagisawa and M. Kamio, 512.
- Esterification**: Pyridine; Estimation of alcohols and phenols in essential oils by — with. H. W. Van Urk, 512.
- Ether**: Liquid and gaseous mixtures of —, alcohol, and water; Analysis of. I. Masson and T. L. McEwan, 250.
- Etherase**: Catalase, peroxydase, and — in a drop of blood; Estimation of. A. Bach and S. Zoubkoff, 15.
- Ethyl Alcohol**: Fats in mixtures of — and amyl alcohol; Critical temperature of solution of. A. J. J. Vandeveld, 243.
- Ethyl Alcohol**: Methyl alcohol and — in spirits, medicines, cosmetics, etc., by means of the Zeiss immersion refractometer; Estimation of. W. Lange and G. Reif, 369.
- Ethyl Alcohol**: Methyl alcohol in the presence of —; Denigès' test for the detection and estimation of. R. M. Chapin, 375.
- (Ethylhydrocupreine)**: Optochin —; Remijin, an inferior Japanese substitute for. C. A. Rojahn, 142.
- Ethyl Nitrite**: Sweet spirit of nitre; Volatilisation of — from. J. G. Roberts, 334.
- Explosives**: Nitroglycerin —; Quantitative test of the stability towards heat of. M. Taliani, 377.
- Extract**: Coloured malts; Estimation of the — of. C. G. Matthews, 95.
- Extract**: Soil —; Relation of soil solution to the. D. R. Hoagland, J. C. Martin, and G. R. Stewart, 109.
- Extraction**: Continuous dialysis or —; Apparatus for. H. Mann, 25.
- Extracts**: Antiscorbutic — and hydroquinone; Colour reaction common to. M. Bezssonoff, 462.
- Extracts**: Coffee —. G. S. Ponce and J. R. Palma, 136.
- Extracts**: Vanilla —; New lead number estimation in. H. J. Wichmann, 333.
- Extracts**: Wheat flour; Electrical conductivity of water — of. C. H. Bailey and F. A. Collatz, 242.
- Fabrics**: Cotton and wool; Analysis of — composed of a mixture of. Duyk, 20.
- Faeces**: Peculiar constituents of —; The identification of (Notes). W. Partridge, 489.
- Fat**: Casein; Proportion of — in. D. M. Gangolli and A. N. Meldrum, 455.
- Fat Content**: Skimmed milk; Comparison of methods for the estimation of the — of. T. J. McInerney and H. C. Troy, 50.
- Fat Globules**: Goat's milk; The size of — in. E. W. Schultz and L. R. Chandler, 241.
- Fat-Soluble Vitamin Content**: Pigmentation; — of peas in relation to their. H. Steenbock, M. T. Sell and P. W. Boutwell, 411.
- Fat-Soluble Vitamin**: Yellow plant pigments from the —; Differentiation of. M. Stephenson, 246.

- Fat Tests:** Milk-testing association and by a creamery; Comparison of — in milk as determined by a. H. C. Troy, 49.
- Fats:** Cholesterol in tissue —; Source of error in the colorimetric estimation of. J. A. Gardner and F. W. Fox, 508.
- Fats:** Ethyl alcohol and amyl alcohol; Critical temperature of solution of — in mixtures of. A. J. J. Vandeveldt, 243.
- Fats:** — and oils; Test for annatto in. W. Brinsmaid, 198.
- Fats:** Melting-points of — and fatty acids; Apparatus for the routine determination of. S. H. Blichfeldt and T. Thornley, 180.
- Fats:** Partly hydrolysed —; Analysis of. W. Fahrion, 297.
- Fats:** Water in — and oils; Estimation of. H. Oertel, 12.
- Fatty Acids:** Anhydrides of higher aliphatic — as food. D. Holde and I. Tacke, 245.
- Fatty Acids:** Egg-yolk lecithin; — of. P. A. Levene and I. P. Roaf, 242.
- Fatty Acids:** Fish oils; New method for the separation of highly unsaturated — in. M. Tsujimoto, 57.
- Fatty Acids:** Lead salts of saturated and of less saturated —; Quantitative separation of the. A. Seidenberg, 465.
- Fatty Acids:** Melting-points of fats and —; Apparatus for the routine determination of. S. H. Blichfeldt and T. Thornley, 180.
- Fatty Acids:** Solid — with lead acetate in alcoholic solution; Precipitation of. E. Twitchell, 466.
- Fatty Acids:** Turkey-red oil; Estimation of — in. 339.
- Fatty Mixtures:** Resin acids in —; Estimation of. D. McNicoll, 340.
- Fatty Oils:** Molecular solutions; Oil-Film measurement of —, and certain phenomena of. P. Woog, 465.
- Fatty Oils:** Reptilia; — from. M. Tsujimoto and S. Kobayashi, 198.
- Fatty Substances:** Acetyl value of —; Determination of the. E. André, 251.
- Fatty Substances:** Greasiness of —. P. Woog, 464.
- Feeding Cake:** Castor oil seeds in —; Detection of. C. Brioux and M. Guerbet, 100.
- Feeding Stuffs:** Bread, flour, —, etc.; Use of dyes in the microscopical examination of. P. P. Fechner, 287.
- Fennel Oil:** Sweet —. C. E. Sage, 458.
- Fermentation Glycerol:** Estimation of —; Rapid method for the. K. Fleischer, 514.
- Fermentation:** Substance from yeast and rice polishings which accelerates —; Estimation of a. S. Fränkel and E. Schwarz, 202.
- Ferric, Chromium, and Aluminium Hydroxides:** Separating —; New method for. M. and M. Lemarchands, 215.
- Ferro-Alloys:** Graphitic carbon in —; Estimation of total carbon and new method for. P. Wenger and A. Trampler, 343.
- Ferrocyanide Method:** Zinc by the —; Estimation of. E. Olivier, 299.
- Ferrovanadium:** Vanadium and chromium in — by electrometric titration; Estimation of. G. L. Kelley, J. A. Wiley, R. T. Bohn, and W. C. Wright, 519.
- Fertilisers:** Dicyanodiamide and of urea in —; Estimation of. E. Johnson, 380.
- Fertilisers:** Urea in —; Estimation of. E. B. Johnson, 338.
- Fibres:** Cellulose in bast —; Estimation of. Y. Uyeda, 209.
- Fibres:** Vegetable —; Digestion of. W. Thomann, 203.
- Fibro-Cement:** —; Analysis of. B. J. Smart and P. C. Pecover, 424.
- Fine Chemicals Industry:** —; The. 174.

- Fish**: Catalase in —; Occurrence of. P. C. Stockstad, 291.
- Fish**: Chilled brine; Preservation of — frozen in. Penetration of salt. L. H. Almy and E. Field, 503.
- Fish Oils**: Highly unsaturated fatty acids in —; New method for the separation of. M. Tsujimoto, 57.
- Fish Preservation**: Committee. (Report of the Food Investigation Board for the Year 1920.) 453.
- Fishes**: Pacific Coast —; Chemical study of certain. D. B. Dill, 503.
- Fishy Flavour**: Lecithin content of butter and its possible relationship to —. G. C. Supplee, 50.
- Fixed Oils**: Identification; The spectrometric examination of certain — as a means of. H. C. T. Gardner, 356.
- Flames**: Reducing —; Analysis by means of; detection of traces of manganese in presence of iron or other substances. J. Meunier, 259.
- Flash Points**: Air and benzine; Determination of the — of mixtures of. W. Reinders, 219.
- Flour**: Bread, —, feeding stuffs, etc.; Use of dyes in the microscopical examination of. P. P. Fechner, 287.
- Flour**: Cassava —. C. Grimme, 287.
- Flour**: Potatoes and potato —; Mineral constituents of. C. E. Mangels, 328.
- Flour**: Sterilising agent for —; Hydrocyanic acid as a. Marchadier and Goujon, 287.
- Flour**: U.S.A.; Bleached — in. 139.
- Flour**: Water extracts of wheat —; Electrical conductivity of. C. H. Bailey and F. A. Collatz, 242.
- Flours**: Hydrogen peroxide on —; Action of. Marion, 11.
- Flours**: Manioc and rice —; Detection of. L. Desvergues, 367.
- Flowers**: Saffron; Substitution of — of *Onopordon* species for. 144.
- Flue Gases**: Carbon monoxide in air and in —; Estimation of small proportions of. D. Florentin and H. Vandenberghe, 153.
- Fluidity**: Oils at low temperatures; Apparatus for determining the. — of. 69.
- Fluorescein**: Underground water; — as an aid to tracing. H. Stabler, 511.
- Fluorescein**: Very dilute solutions; Detection of — in. M. Lombard, 337.
- Fodder**: Milk; Relation of — to the anti-scorbutic power and salt-content of. A. F. Hess, L. J. Unger, and G. C. Supplee, 99.
- Food and Drugs Analysis, Abstracts**: 1921: 11, 49, 94, 136, 195, 241, 286, 328, 367, 404, 455, 498.
- Food Control**: —. Statutory Rules and Orders. Nos. 350 and 379, 1921. 305.
- Food Control**: (Statutory Rules and Orders, 1921, No. 1305.) The Sale of Food Order, 1921, dated August 16, 1921. Made by the Board of Trade under the Ministry of Food (Continuance) Act, 1920 (10 and 11 Geo. V., c. 47, and the Ministry of Food (Cessation) Order, 1921. 426.
- Food Control**: —; Statutory Rules and Orders, No. 1056, 1921. 388.
- Food**: Higher aliphatic acids as —; Anhydrides of. D. Holde and I. Tacke, 245.
- Food Inspection**: Agriculture; United States Department of. — Decision. 182, 497.
- Food Investigation Board**: Department of Scientific and Industrial Research. Report of the — for the Year 1920. 453.
- Food Supply**: Vitamins and the —. A. Harden, 201.
- Foods**: Ash of —; Estimation of the alkalinity and phosphate content of the. J. Tillmans and A. Bohrmann, 199.

INDEX TO VOLUME XLVI.

- Foods** : Carbohydrates in vegetable —; Estimation of. V. C. Myers and H. M. Croll, 287.
- Foods** : Infected —; Serological method for detection of. J. Bronfenbenner and M. J. Schlesinger, 462.
- Foods** : Laevulinic acid in —; Detection and estimation of. L. Grünhut, 406.
- Foreign Haricot Beans** : Structure of —. N. T. Giung, 329.
- Formaldehyde** : Ammonium salts by means of —; Volumetric estimation of. I. M. Kolthoff, 520.
- Formaldehyde and Diphenylamine Reaction** : Milk; Iron as the cause of the — of. F. Reiss, 136.
- Formaldehyde** : — and paraformaldehyde in tablets; Estimation of. N. Evers and C. M. Caines, 374.
- Formaldehyde** : Metals in acids containing —; Solubility of. R. C. Griffin, 110.
- Formaldehyde** : Resorcinol and sulphuric acid; New test for — with. R. Cohn, 502.
- Formic Acid** : Potassium cyanide; Decomposition of, and estimation of — in the presence of hydrocyanic acid. G. Harker, 415.
- Formic, Oxalic, and Tartaric Acids** : — in presence of each other; Detection of. F. Kraüss and H. Tampke, 296.
- Formulae** : Diluting acids, etc., to a desired strength; — for (Notes). A. E. Johnson, 488.
- "Fornitral"** : Nitric acid; Use of — for the detection and estimation of. 385.
- Fractional Crystallisation** : Gallium from indium and zinc by — of the caesium gallium alum; Separation of. P. E. Browning and L. E. Porter, 158.
- Fractional Distillation** : Contact-ring stillheads; — with. R. Lessing, 386.
- Fractional** : Precipitation. P. Jolibois, R. Bossuet and Chevy, 162.
- Fractionation** : Humic acid; The preparation and — of. V. A. Beckley, 151.
- French Oil of Turpentine** : —; Composition of. M. Vèzes, 252.
- Frozen Meat** : Chilled and —; "Black spot" of. F. T. Brooks and M. N. Kidd, 292.
- Fruit** : Rectin in —. (Report of the Food Investigation Board for the Year 1920.) 453.
- Fruits** : Citrus —; Black spot of. H. A. Lee, 336.
- Fruits** : Cubebs; Substitution of the — of *Piper ribesoides* for. 144.
- Fruits** : Oxidising enzymes of —. M. W. Onslow, 292.
- Fuels** : Smokeless —. F. S. Sinnatt, 468.
- Fulminate of Mercury** : Sodium thiosulphate; Notes on the reactions of — with. F. H. Dupré and P. V. Dupré, 42.
- Fumes** : Air; Estimation of nitrous — in. J. Moir, 517.
- Fungi** : Coal tar creosote to wood-destroying —; Toxicity of various fractions and combinations of fractions of. H. Schmitz and S. M. Zeller, 409.
- Fungi** : Edible —; Preserved. J. Gerum, 243.
- Furnace** : Gas combustion — for use in organic analysis; Improved. T. J. Hedley, 473.
- Fusions** : Sodium peroxide —; Apparatus for. H. J. Hodsmen, 260.
- Gallium** : Caesium — alum; Separation of — from indium and zinc by fractional crystallisation of the. P. E. Browning and L. E. Porter, 158.
- Gallium Ferrocyanide** : Analysis; Use of — in. L. E. Porter and P. E. Browning, 158.
- Gas Combustion Furnace** : Organic analysis; Improved — for use in. T. J. Hedley, 473.

- Gases** : Sulphur dioxide and sulphur trioxide in sulphur burner —; Estimation of. R. Dieckmann, 517.
- Gas-Volumetric Estimation** : Ammoniacal, nitric, and organic nitrogen in mixed fertilisers; — of. P. Baldi, 64.
- Gas Volumetric Method** : Aluminium; — of estimating. L. Losana, 383.
- Gaseous Ammonia** : Hexamethylenetetramine picrate; Micro-Chemical identification of — as. C. Kollo and V. Teodossiu, 111.
- Gaseous Mixtures** : Ether, alcohol, and water; Analysis of liquid and — of. I. Masson and T. L. McEwan, 250.
- Gases** : Carbon monoxide in air and in flue —; Estimation of small proportions of. D. Florentin and H. Vandenberghe, 153.
- Gases** : Dissolved —; Petrols containing. F. Bordas, 59.
- Gases** : Industrial analysis of —; Apparatus for the. G. Ardoyer, 424.
- Gasoline** : Water in — and in certain other substances; Calcium chloride method for the estimation of. C. W. Clifford, 417.
- Gasometric Determination** : Nitrogen; Note on the — of. R. L. Stehle, 421.
- Gasometric Estimation** : Hypochlorites; — of. A. K. Macbeth, 344.
- Gasometric Estimation** : Nitrogen; — of. R. L. Stehle, 110.
- Gasometric Estimation** : Urea in urine; — of. R. L. Stehle, 412.
- Gaultheria and Birch Oils** : Methyl salicylate in —; Review of tests for. C. H. LaWall, 97.
- Gelatins** : Commercial —; The gold number of. F. A. Elliott and S. E. Sheppard, 470.
- Gelatins** : Glues; Jelly strength of — and. S. E. Sheppard, S. S. Sweet, and J. W. Scott, Junr., 20.
- Gelatins** : Setting and melting points of —; The. S. E. Sheppard and S. Sweet, 341.
- Gemsbok Beans** : — (*Bauhinia esculenta* Burch.) G. T. Bray, 401.
- Georgia Velvet Bean** : Seed of the —. B. Sure and J. W. Read, 506.
- German Agricultural Experiment Station** : Citrate-soluble phosphoric acid in superphosphates; Estimation of. Official method of the —. 295.
- Germicidal Properties** : Milk; — of. 293.
- Germicidal Value** : Chlorine disinfectants; — of some. F. W. Tilley, 103.
- Glandular and Other Tissues** : Vitamine in connection with determinations of vitamine in —; Quantitative method for the determination of. F. K. Swoboda, 17.
- Glass Apparatus** : Crystallised —; Repair of. A. F. O. Germann, 164.
- Glass Apparatus** : Crystallised —; Repair of. H. Bailey, 475.
- Glass** : Autoclave. Schmidt, 163.
- Glass** : Bottle — upon ink; The acidity of ink and the influence of. C. A. Mitchell, 129.
- Glass-Wool** : —; Adsorbent properties of. I. M. Kolthoff, 259.
- Globulin** : Cohune nut; — from the. C. O. Johns and C. E. F. Gersdorff, 100.
- Glue** : Testing —; A simple method for (Notes). D. R. Frazer, 284.
- Glues** : Gelatins and —; Jelly strength of. S. E. Sheppard, S. S. Sweet, and J. W. Scott, Junr., 20.
- Glycerides** : Goose-fat; — of. A. Bömer, 500.
- Glycerol** : Acrolein; Estimation of — in wine by conversion into. A. Heiduschka and F. Englert, 332.
- Glycerol** : Fermentation —; Rapid method for the estimation of. K. Fleischer, 514.

- Glycerol** : Specific gravity and percentage of —; Need of a new table for. L. W. Bosart, 513.
- Glycine Anhydride** : Dipeptide compounds; Colour reaction of — and of its. T. Sasaki, 514.
- Glycyrrhizin** : Liquorice root; Estimation of — in. P. A. Houseman, 372
- Goat's, Cow's, and Human Milk** : Acidity of —; Comparison of the. E. W. Schultz and L. R. Chandler, 241.
- Goat's Milk** : Fat globules in —; The size of. E. W. Schultz and L. R. Chandler, 241.
- Gold Cathodes** : Electrolytic work; — for. A. B. Andrews, 386.
- Gold** : Copper, palladium, and platinum; Electrolytic estimation of — and its separation from. W. D. Treadwell, 298.
- Gold Number** : Commercial gelatins; The — of. F. A. Elliott and S. E. Shepard, 470.
- (**Golden Seal**) : *Hydrastis* —. 374.
- Goldenseal (*Hydrastis*) Root** : Standard for —; Proposed. 143.
- Goose-Fat** : Glycerides of —. A. Bömer, 500.
- Government Chemist** : Work of the Government Laboratory; Report of the — upon the (For the year ended March 31, 1921). 493.
- Government Laboratory** : Government Chemist upon the Work of the —; Report of the. (For the year ended March 31, 1921.) 493.
- Grains** : Cereal — rye; Amylases of the. J. L. Baker and H. F. E. Hulton, 329.
- Grape Seed** : Oil. E. Klinger, 138.
- Grape-Seed** : Oil. F. Rabak, 500.
- Grape-Seed Oil** : —; Composition of. E. André, 331.
- Grape-Seed** : Oils. E. André, 288.
- Graphite** : Volatile matter in —; Estimation of. O. L. Shinn, 416.
- Graphitic Carbon** : Ferro-alloys; Estimation of total carbon and new method for — in. P. Wenger and A. Trampler, 343.
- Greasiness** : Fatty substances; — of. P. Woog, 464.
- Grignard Reagent** : Oxidation of the —. C. W. Porter and C. Steel, 60.
- Growth-Promoting Factors** : Lower vegetable organisms; — in. P. Goy, 99.
- Guanidine Carbonate** : Standard alkali; — as a. A. H. Dodd, 250.
- Gum Arabic** : Gum tragacanth with —; Adulteration of. L. Thevenon, 55.
- Gum Levan** : Mould spores; Formation of — by. N. and L. Kopeloff and C. J. Welcome, 15.
- Gum Tragacanth** : Gum arabic; Adulteration of — with. L. Thevenon, 55.
- Gum** : Yacca —. 54.
- Gurjun Balsam** : Turner reaction for —; The. J. B. Luther, 332.
- Haemolytic Streptococci** : Milk and from human lesions; — from. R. C. Salter, 248.
- Haemolytic Streptococci** : Water; Vitality and viability of — in. G. S. Livingston, 247.
- Halogen Acids** : Oil of juniper; Action of — on. R. Huerre, 140.
- Halogen Compounds** : Arsenic —; Reduction of. O. Ruff, 298.
- Halogenated Derivatives** : Mercury and thallium; Compounds of —. [Separation of mercury from thallium.] J. Barlot and J. Pernot, 421.
- Hardened Castor Oil** : Hydroxystearic acid from —; New. H. Thoms and W. Deckert, 139.
- Hardness** : Water; Estimation of the — of. G. Bruhns, 337.
- Hardness** : Water; Soap solution for use in estimating — of. A. Krieger, 337.

- Haricot Beans** : Foreign —; Structure of. N. T. Giung, 329.
- Haricot Beans** : —; Poisonous. T. V. Fellenberg, 196.
- Harrogate Mineral Waters** : —; Composition of the. W. Lowson, 125.
- Head Oil** : Sperm whale; Composition of the — of the. M. Tsujimoto, 197.
- Heat** : Anti-scorbutic vitamin; Effect of — and oxidation upon the. R. A. Dutcher, H. M. Harshaw, and J. S. Hall, 411.
- Heat-Insulating Capacity** : Textiles; Laboratory apparatus for measuring the permeability and — of. G. Colombo, 68.
- Heavy Soils** : Clay in —; Estimation of. A. F. Joseph and F. J. Martin, 463.
- Hemicellulose** : Apple wood; — of. W. E. Tottingham, R. H. Roberts, and S. Lepkowsky, 204.
- Herrings** : Canned —; Maturing of. (Report of the Food Investigation Board for the Year 1920.). 453.
- Hexabromide and Iodine Values** : Linseed oil and soya bean oil on the estimation of these oils by means of the —; Effect of variation in the analytical constants of. E. A. Tschudy, 513.
- Hexabromide Test** : Oils other than linseed oil in paints by means of the —; Detection of. H. Bailey and W. D. Baldisiefen, 104.
- Hexabromostearic Acids** : Linolenic and —. S. Coffey, 418.
- Hexamethylenetetramine Picrate** : Gaseous ammonia as —; Micro-Chemical identification of. C. Kollo and V. Teodossiu, 111.
- High-Grade Ores** : Bismuth in —; Colorimetric estimation of. G. Spurge, 298.
- Hippuric Acid** : Urine; Rapid method for the estimation of — in. F. B. Kingsbury and W. W. Swanson, 509.
- Hollyhock Seed** : — and oil; Composition of. R. S. Hiltner and L. Feldstein, 407.
- “**Honey**” : Artificial —. A. Beythien, 500.
- Honey** : Artificial —; Methods for the analysis of. A. Behre, 499.
- Honey** : Chilian — (Notes). G. R. Thompson, 328.
- Hops** : Tannin in —; Polarimetric estimation of. A. R. Ling and D. R. Nanji, 332.
- Human Lesions** : Milk and from —; Haemolytic Streptococci from. R. C. Salter, 248.
- Human Milk** : Goat's, cow's, and —; Comparison of the acidity of. E. W. Schultz and L. R. Chandler, 241.
- Humic Acid** : —; The preparation and fractionation of. V. A. Beckley, 151.
- Humus** : —; The formation of. V. A. Beckley, 151.
- Husks** : Cacao-beans and —; Estimation of methyl alcohol in. C. H. Koers, 52.
- Hydrastine** : *Hydrastis canadensis*; Estimation of — in. N. Wattiez, 143.
- Hydrastis** : — (Golden Seal). 374.
- Hydrastis Canadensis** : Hydrastine in —; Estimation of. N. Wattiez, 143.
- Hydrastis** : Goldenseal — root; Proposed standard for. 143.
- Hydrazines** : —; Preparation of. L. Thompson, 105.
- Hydriodic Acid** : Oxidimetry; Electrometric titration of — and its use as a standard in. W. S. Hendrixson, 211.
- Hydrocarbons** : Benzene — in coal-gas; Estimation of. E. Berl, K. Andress, and W. Müller, 253.
- Hydrocarbons** : Petrol; Estimation of aromatic — in mixtures with. H. T. Tizard and A. G. Marshall, 155.
- Hydrocarbons** : Solution and turbidity-temperature of —, etc.; Critical temperature of. N. Chercheffsky, 162.

- Hydrochloric Acid** : Leather; Estimation of — and neutral chlorides in. A. W. Thomas and A. Frieden, 107.
- Hydrochloric Acid Solution** : Tin and antimony in — by means of hydrogen sulphide; Separation of. G. Luff, 213.
- Hydrochloride** : Apomorphine —. D. B. Dott, 373.
- Hydrocyanic Acid** : Alloxan reagent; Microchemical identification of — by means of. G. Denigès, 334.
- Hydrocyanic Acid** : Flour; — as a sterilising agent for. Marchadier and Goujon, 287.
- Hydrocyanic Acid** : —; Estimation of. R. L. Morris, 97.
- Hydrocyanic Acid** : Linseed cakes; Presence of — in. Barishac, 56.
- Hydrocyanic Acid** : Linseed cakes; Presence of — in. E. Kohn-Abrest, 57.
- Hydrocyanic Acid** : Potassium cyanide; Decomposition of, and estimation of formic acid in the presence of —. G. Harker, 415.
- Hydrogen-Ion Concentration** : Colorimetric method of determining —; The: Some applications in the analytical laboratory. N. Evers, 393.
- Hydrogen-Ion Concentration** : Drinking water; Estimation and significance of the — in the examination of. I. M. Kolthoff, 249.
- Hydrogen-Ion Concentration** : Indicator papers; Estimation of — in small volumes of liquid by means of. J. M. Kolthoff, 381.
- Hydrogen-Ion Concentration** : Measurement of —; Notes on the. G. W. Monier-Williams, 315.
- Hydrogen-Ion Concentration** : Small volumes of liquid; Colorimetric method for the estimation of — in. L. D. Felton, 297.
- Hydrogen-Ion Concentration** : Water; Colorimetric method for the estimation of — in. I. M. Kolthoff, 379.
- Hydrogen Peroxide** : Catalyst for the oxidation of dextrose with —; Disodium hydrogen phosphate as a. E. J. Witzemann, 105.
- Hydrogen Peroxide** : Flours; Action of — on. Marion, 11.
- Hydrogen Peroxide** : Pure —; Properties of. O. Maass and W. H. Hatcher, 110.
- Hydrogen Peroxide** : Traces of —; Detection and estimation of. F. W. Horst, 341.
- Hydrogen Sulphide** : Generating —; Apparatus for. V. B. Connell, 113.
- Hydrogen Sulphide** : Seeds of certain Papilionaceae; Substance yielding — contained in the. M. Mirande, 408.
- Hydrogen Sulphide** : Tin and antimony in hydrochloric acid solution by means of —; Separation of. G. Luff, 213.
- Hydrogen Sulphide** : Waters at great depths; Occurrence of — in. O. Luning, 148.
- Hydrogenated Oils** : Digestibility of some —. A. D. Holmes and H. J. Deuel, 503.
- Hydrolysed Caseinogen** : Substances precipitated by mercuric sulphate from — and the isolation of tryptophane. H. Onslow, 504.
- Hydrolysed Fats** : Partly —; Analysis of. W. Fahrion, 297.
- Hydrolysed Sawdust** : Cattle food prepared from —. E. C. Sherrard and G. W. Blanco, 199.
- Hydrolysis** : Molecular weights; Application of the law of — to the determination of. H. Colin and A. Chaudun, 153.
- Hydrolytic Alkalinity** : Soaps; — of pure and commercial. F. C. Beedle and T. R. Bolam, 209.

- Hydroquinone**: Antiscorbutic extracts and —; Colour reaction common to. M. Bezssonoff, 462.
- Hypochlorite**: —; Volumetric estimation of. R. Formhals, 24.
- Hydroxides**: Ferric, chromium, and aluminium —; New method for separating. M. and M. Lemarchands, 215.
- Hydroxystearic Acid**: Hardened castor oil; New — from. H. Thoms and W. Deckert, 139.
- Hypochlorites**: Gasometric estimation of —. A. K. Macbeth, 344.
- Hypochlorous Acid**: —; Electrometric titration of. W. D. Treadwell, 301.
- Hypophosphorous Acid**: Silver and its separation from lead and other metals by means of —; Estimation of. L. Möser and T. Kittl, 381.
- Hypophosphorous Acid**: Silver by precipitation with —; Estimation of. L. Möser and T. Kittl, 342.
- Ice Cream**. 405.
- Ice Cream**: "Sandy" crystals in —; Separation and identification of. H. F. Zoller and O. E. Williams, 455.
- Illipé Butter**: Cacao butter; Detection and estimation of — used as substitute for. F. G. H. Tate and J. W. Pooley, 229.
- Indian**: Kapok seed. 196.
- Indian Opium**: Morphine, codeine, and narcotine in —. Jitendra Nath Rakshit, 481.
- Indican**: Purity of water; Detection of — as a criterion of the. A. Jolles, 103.
- Indicator**: Indigo carmine; Methyl orange as an — in presence of. F. X. Moerk, 515.
- Indicator**: New —; A. R. W. Kinkead, 109.
- Indicator Papers**: Hydrogen-ion concentration in small volumes of liquid by means of —; Estimation of. J. M. Kolthoff, 381.
- Indicator**: Phenol red as — of acidity. A. Massink, 470.
- Indicator**: Poirrier blue as an —. W. Mestrezat, 341.
- Indicator Properties**: Phthalëins; — of two new. W. Csanyi, 250.
- Indicators**: Colloid chemistry of —. G. Wiegner, 205.
- Indicators**: Titration of acids and bases; The joint use of two — in the. J. L. Lizius, 355.
- Indicators**: Whey; Use of — to determine the reaction of. Y. Okuda and H. F. Zoller, 368.
- Indigo Carmine**: Indicator in presence of —; Methyl orange as an. F. X. Moerk, 515.
- Indium**: Gallium from — and zinc by fractional crystallisation of the caesium gallium alum; Separation of. P. E. Browning and L. E. Porter, 158.
- Industrial Analysis**: Gases; Apparatus for the — of. G. Ardoyer, 424.
- Infected Foods**: Detection of —; Serological method for. J. Bronfenbenner and M. J. Schlesinger, 462.
- Infections**: Specific bacterial — of the udder; Reaction of milk in relation to the presence of blood-cells and of. J. C. Baker and R. S. Breed, 16.
- Ink**: Acidity of — and the influence of bottle glass upon —; The. C. A. Mitchell, 129.
- Inks**: —: Their composition, manufacture, and methods of testing. 61.
- Inorganic Analysis, Abstracts**: 1921: 21, 63, 109, 157, 211, 254, 297, 341, 381, 421, 470, 515.
- Inorganic Phosphate**: Alkalimetric titration; Estimation of — in urine by. C. H. Fiske, 294.

- Insoluble Volatile Acids** : Adulteration in butter by means of the melting-point of the —; The detection of. G. Van B. Gilmour, 183.
- Institute of Brewing** : Research Scheme; The —. 425.
- Institute of Chemistry of Great Britain and Ireland** : 1921: 76, 173, 267, 387.
- Institute of Metals** : —; The. 266.
- Intermediate Products** : Organic —; Importation of. 122.
- International Normal Weight** : Saccharimeter; The — for the. 268.
- International** : Physico-Chemical Symbols. 121.
- International Union** : Pure and Applied Chemistry; — of. Belgian Bureau of Chemical Standards. 266.
- Inulin** : Biological method for the detection of dextrose; Investigation of the products of the enzymic hydrolysis of — by the. E. Bourquelot and M. Bridel, 408.
- Invert Sugar** : Dextrose, —, and laevulose by the thiocyanate-potassium iodide method; Table for the estimation of. G. Bruhns, 330.
- Iodic Acid** : — and silver by electrometric titration; Estimation of. W. S. Hendrixson, 255.
- Iodic Acid** : Microchemical reactions of —. A. Bolland, 24.
- Iodimetric Determination** : Diastatic power of malts; — of the. J. L. Baker and H. F. E. Hulton, 90.
- Iodimetric Estimation** : Acetone; — of. P. H. Hermans, 338.
- Iodimetric Estimation** : Amino nitrogen; — of. H. H. Willard and W. E. Cake, 64.
- Iodimetric Estimation** : Mercaptans; — of. J. W. Kimball, R. L. Kramer, and E. E. Reid, 338.
- Iodimetric Method** : Chromium in chromite; — for the estimation of. E. Little and J. Costa, 216.
- Iodimetric Titration** : Chromium; — of. J. M. Kolthoff, 160.
- Iodine and Hexabromide Values** : Linseed oil and soya bean oil on the estimation of these oils by means of the —; Effect of variation in the analytical constants of. E. A. Tschudy, 513.
- Iodine** : Blood and animal tissues; Estimation of — in. E. C. Kendall and F. S. Richardson, 13.
- Iodine** : Different metals in the cold; Action of — on: Process for the detection of the presence of chlorine in the atmosphere. C. Matignon, 211.
- Iodine Solution** : Reich test; Modified — for the. H. M. Lowe, 341.
- Iodine Value** : Aschmann's method of determining the —. B. M. Margosches and R. Baru, 465.
- Iodine Value** : Sterols and the —. (Report of the Food Investigation Board for the Year 1920.) 453.
- Iodoform** : Reaction. N. Schoorl, 154.
- Ions** : Bromate, dichromate, nitrite, and chloride —; Electrometric estimation of. W. S. Hendrixson, 472.
- Iron Alloys** : Vanadium in steels and —; Estimation of. L. Rolla and M. Nuti, 422.
- Iron** : Cobalt; The dimethylglyoxime reactions of — and. W. Vaubel, 422.
- Iron** : Copper and — in aluminium alloys; Rapid estimation of. P. Hulot, 471.
- Iron** : Cupferron method; Estimation of — by the. G. E. F. Lundell, 254.
- Iron** : Formaldehyde and diphenylamine reaction of milk; — as the cause of the. F. Reiss, 136.
- Iron** : Manganese; Approximate estimation of — and. L. J. Curtman and N. H. Hecht, 299.

- Iron**: Manganese; New method for the separation and estimation of — and. C. Kollo, 111.
- Iron**: Organic liquids, especially in wines; Estimation of small quantities of — in. Malvezin and C. Rivilland, 206.
- Iron**: Reducing flames; Analysis by means of; detection of traces of manganese in presence of — or other substances. J. Meunier, 259.
- Iron**: Titanium and — in rocks; Estimation of. F. Ferrari, 66.
- Iron**: Titanous salts; Volumetric determination of — by means of. W. M. Thornton, Junr., and J. E. Chapman, 159.
- Jamaica**: Leaves of the "wild pimento" of —; Volatile oil from the. O. D. Roberts, 289.
- Japanese Corydalis**: Alkaloids of —. Y. Asahina and S. Motigase, 143.
- Japanese Substitute**: Optochin (ethylhydrocupreine); Remijin, an inferior — for. C. A. Rojahn, 142.
- Jelly Strength**: Gelatins and glues; — of. S. E. Sheppard, S. S. Sweet, and J. W. Scott, Junr., 20.
- Juices**: Lead-preserved sugar-cane —; Estimation of reducing sugars in. J. B. Harris, 499.
- Juniper**: Halogen acids on oil of —; Action of. R. Huerre, 140.
- Juniperus Phoenicea**: Berries of — from Sardinia; Essential oil from the. E. Puxeddu and F. Vodret, 53.
- Kapok Seed**: Indian —. 196.
- Kernels**: Palm — from Madagascar; Composition of. G. Clot, 138.
- Kjeldahl and Dumas Methods**: Total nitrogen in urine by the —; Estimation of. W. Mestrezat and M. P. Janet, 17.
- Krameria triandra**: *Polygonum bistorta* as a substitute for —. Ruiz and Pavon, 141.
- Laboratory**: Apparatus. G. Ajon, 218.
- Laboratory Apparatus**: Textiles; — for measuring the permeability and heat insulating capacity of. G. Colombo, 68.
- Lactarius and Russula Species**: Bitter —; New reagent for. Barlot, 96.
- Lactate**: Lactic acid as sodium ferric —; Separation and detection of. K. A. Hoffmann, 296.
- Lactic Acid**: —; Detection of. L. Hartwig and R. Saar, 243.
- Lactic Acid**: Sodium ferric lactate; Separation and detection of — as. K. A. Hoffmann, 296.
- Lactic Organisms**: Individual divergences of —; Sudden physiological mutations caused by. C. Gorini, 336.
- Lactic Streptococcus**: Milk; Viscous — in. H. Violle, 409.
- Lactose**: Alkaline potassium permanganate; Volumetric method for the estimation of — by. F. T. Adriano, 137.
- Lactose**: Maltose and — in the presence of other reducing sugars by Barfoed's reagent; Estimation of. L. Le Grand, 406.
- Lactose**: Maltose or — in presence of other reducing sugars; Estimation of: Use of Barfoed's solution. Legrand, 198.
- Lactose**: Milk; Colorimetric estimation of — in. R. G. Owen and R. Gregg, 286.
- Laevulinic Acid**: Foods; Detection and estimation of — in. L. Grünhut, 406.
- Laevulose**: Dextrose, invert sugar, and — by the thiocyanate-potassium iodide method; Table for the estimation of. G. Bruhns, 330.

- Laevulose**: Dextrose, —, sucrose and dextrin in admixture; Estimation of. A. Behre, 368.
- Lamp Method**: Sulphur in petroleum spirits; — of estimating. J. S. Jackson and A. W. Richardson, 156.
- Lard**: Beef fat in — by Bömer's method; Detection of. Vitoux and C. F. Muttelet, 371.
- Lard**: Beef fat in —; Detection of. Vitoux and C. F. Muttelet, 94.
- Lard**: Nutritive value of — and — substitutes; Factors influencing the. J. C. Drummond, 245.
- Lard**: Nutritive value of —. J. C. Drummond, J. Golding, S. S. Silva, and K. H. Coward, 244.
- Lard Substitutes**: Lard and —; Factors influencing the nutritive value of. J. C. Drummond, 245.
- Lathyrism**: Vetch seeds; — or poisoning caused by. M. Mirande, 291.
- Lead Acetate**: Solid fatty acids with — in alcoholic solution; Precipitation of. E. Twitchell, 466.
- Lead**: Brass; Estimation of small amounts of — in. F. W. Glaze, 382.
- Lead**: Cellulose; Adsorption of — and copper by. I. M. Kolthoff, 258.
- Lead Number Estimation**: Vanilla extracts; New — in. H. J. Wichmann, 333.
- Lead**: Peaty waters; — in (Notes). T. Tickle, 240.
- Lead-Preserved Sugar-Cane Juices**: Reducing sugars in —; Estimation of. J. B. Harris, 499.
- Lead Salts**: Saturated and of less saturated fatty acids; Quantitative separation of the — of. A. Sedenberg, 465.
- Lead**: Silver and its separation from — and other metals by means of hypophosphorous acid; Estimation of. L. Möser and T. Kittl, 381.
- Lead**: Water on —; Notes on the so-called action of. J. C. Thesh, 270.
- Leather**: Hydrochloric acid and neutral chlorides in —; Estimation of. A. W. Thomas and A. Frieden, 107.
- Leaves**: *Ocimum gratissimum*, Linn.; Volatile oil from the — of. O. D. Roberts, 372.
- Leaves**: *Skimmia laureola*; Essential oil from — of. J. L. Simonsen, 333.
- Leaves**: Tincture of aconite —; Content of aconitine in some samples of. A. Richaud, 97.
- Leaves**: "Wild pimento" of Jamaica; Volatile oil from the — of the. O. D. Roberts, 289.
- Lecithin Content**: Fishy flavour; — of butter and its possible relationship to. G. C. Supplee, 50.
- Lecithin**: Egg-yolk —; Fatty acids of. P. A. Levene and I. P. Roaf, 242.
- Lecithin**: —; Estimation of. J. L. B. van der Marck, 372.
- Legumes**: Manganese in commonly grown —. J. S. Jones and D. E. Bullis, 377.
- Lesions**: Milk and from human —; Haemolytic Streptococci from. R. C. Salter, 248.
- "Lignin" Colour Reactions**: —; Significance of. E. C. Crocker, 419.
- Lime**: Chromic oxide precipitates; Entanglement of — and magnesia by. E. Toporescu, 216.
- Limestones**: Organic carbon in bituminous —; Estimation of the. E. Sernagiotto, 296.
- Linolenic and Linolic Acids**: Oxygen absorption of oils; True. II. —. S. Coffey, 467.

- Linolenic Acids**: Hexabromostearic and ——. S. Coffey, 418.
- Linolic Acid Tetrabromide**: Elaeostearic acid tetrabromide from tung oil with ordinary —; Non-Identity of. B. H. Nicolet, 251.
- Linolic and Linolenic Acids**: Oils; True oxygen absorption of. II. ——. S. Coffey, 467.
- Linseed Cakes**: Hydrocyanic acid in —; Presence of. Barishac, 56.
- Linseed Cakes**: Hydrocyanic acid in —; Presence of. E. Kohn-Abrest, 57.
- Linseed Oil**: Hexabromide and iodine values; Effect of variation in the analytical constants of — and soya bean oil on the estimation of these oils by means of the. E. A. Tschudy, 513.
- Linseed Oil**: "Oil bromide" test of —; The. T. A. Davidson, 466.
- Linseed Oil**: Paints by means of the hexabromide test; Detection of oils other than — in. H. Bailey and W. D. Baldsiefen, 104.
- Liqueurs**: Methyl alcohol in — and spirits; Detection of. L. Hoton, 53.
- Liquid and Gaseous Mixtures**: Ether, alcohol, and water; Analysis of — of. I. Masson and T. L. McEwan, 250.
- Liquid**: Hydrogen-ion concentration in small volumes of — by means of indicator papers; Estimation of. J. M. Kolthoff, 381.
- Liquid**: Hydrogen-ion concentration in small volumes of —; Colorimetric method for the estimation of. L. D. Felton, 297.
- Liquids**: Iron in organic —, especially in wines; Estimation of small quantities of. Malvezin and C. Rivilland, 206.
- Liquorice Root**: Glycyrrhizin in —; Estimation of. P. A. Houseman, 372.
- Lobinol**: *Rhus diversiloba* (poison oak); —, a dermatitant from. J. B. McNair, 143.
- Lubricants**: —; Solid. 161.
- Locust Bean Seeds**: .—; The composition of (Notes). T. R. Hodgson, 366.
- Lysol**: Commercial cresol in —; Approximate estimation of. C. J. Jordan and F. Southerden, 375.
- Lysol**: Commercial cresol in —; Approximate estimation of (Notes). G. F. W. Martin, 451.
- Mace**: Bombay —. 139.
- Madagascar**: Palm kernels from —; Composition of. G. Clot, 138.
- Magnesia**: Lime and — by chromic oxide precipitates; Entanglement of. E. Toporescu, 216.
- Magnesium**: Calcium and — in various salt mixtures; Estimation of. E. Canals, 384.
- Magnesium**: Calcium and — in various salt mixtures; The quantitative estimation of. E. Canals, 216.
- Magnesium**: Potassium and sodium in presence of —; Micro-Chemical identification of. E. Ludwig and H. Spirescu, 112.
- Magnesium**: Sodium, —, sulphates and phosphates; Estimation of potassium in presence of. H. Atkinson, 354.
- Maize**: Quercitin in brown-husked —; Occurrence of. C. E. Sando and H. H. Bartlett, 502.
- Maltose**: Barfoed's reagent; Estimation of — and lactose in the presence of other reducing sugars by. L. Le Grand, 406.
- Maltose**: Reducing sugars; Estimation of — or lactose in presence of other: Use of Barfoed's solution. Legrand, 198.
- Malts**: Diastatic power of —; Iodimetric determination of the. J. L. Baker and H. F. E. Hulton, 90.

- Malts** : Extract of coloured —; Estimation of the. C. G. Matthews, 95.
- Manganese** : Aluminium and —; Sodium salicylate as reagent for detecting. C. Van Zijp, 300.
- Manganese** : Commonly grown legumes; — in. J. S. Jones and D. E. Bullis, 377.
- Manganese** : Detection of —; Interference of phosphates with. T. Sabalitschka and H. Niesemann, 159.
- Manganese** : Iron and —; Approximate estimation of. L. J. Curtman and N. H. Hecht, 299.
- Manganese** : Iron and —; New method for the separation and estimation of. C. Kollo, 111.
- Manganese** : Phenolphthaleïn and diphenylamine in the estimation of — by the persulphate method; The use of. D. H. Wester, 112.
- Manganese** : Reducing flames; Analysis by means of; detection of traces of — in presence of iron or other substances. J. Meunier, 259.
- Manganese Salts** : —; Reaction of. V. Maeri, 159.
- Manganese** : Vegetable kingdom; Occurrence of — throughout the. G. Bertrand and M. Rosenblatt, 409.
- Manioc and Rice Flours** : —; Detection of. L. Desvergnès, 367.
- Manna** : Mannitol; — and the extraction of. G. Scarlata, 369.
- Mannitol** : Manna and the extraction of —. G. Scarlata, 369.
- Mannitol** : —; Polarimetric estimation of. M. J. Badreau, 368.
- Mannitol** : Rotatory power of —; Influence of ammonium molybdate on the. G. Tanret, 330.
- Manurial Pollution** : Anaerobic spore test; Detection of — in milk by the. J. Weinzirl, 461.
- Margarine and Butter Fats** : Rancidity of —; Investigations on the. W. N. Stokoe, 335.
- “Maroola” Nuts** : — (*Sclerocarya Caffra*); Oil of. 289.
- Meadow Saffron Seeds** : Alkaloid and oil content of —; The. C. Grimme, 200.
- Meat** : Chilled and frozen —; “Black spot” of. F. T. Brooks and M. N. Kidd, 292.
- Meat** : Storage; Changes in — on. (Report of the Food Investigation Board for the Year 1920.) 453.
- Medicines** : Spirits, —, cosmetics, etc., by means of the Zeiss immersion refractometer; Estimation of methyl alcohol and ethyl alcohol in. W. Lange and G. Reif, 369.
- Melting-Point** : Apparatus. F. Friedrichs, 218.
- Melting-Point** : Coal; — of. G. Charpy and J. Durand, 59.
- Melting-Point Determinations** : Phosphoric acid instead of sulphuric acid in —; Use of. A. Graustein, 161.
- Melting-Point** : Insoluble volatile acids; The detection of adulteration in butter by means of the — of the. G. Van B. Gilmour, 183.
- Melting-Points** : Fats and fatty acids; Apparatus for the routine determination of — of. S. H. Blichfeldt and T. Thornley, 180.
- Melting-Points** : Gelatins; The setting and — of. S. E. Sheppard and S. Sweet, 341.
- Mercaptans** : —; Iodimetric estimation of. J. W. Kimball, R. L. Kramer, and E. E. Reid, 338.
- Mercuric Sulphate** : Tryptophane; Substances precipitated by — from hydrolysed caseinogen and the isolation of. H. Onslow, 504.
- Mercury** : —; Volumetric estimation of. E. Büllmann and K. Thaulow, 382.

- Mercury** : Cuprous mercuric iodide; Identification of — as. P. Artmann, 254.
- Mercury Fulminate** : Characteristic reaction of ——. A. Langhans, 253.
- Mercury** : Halogenated derivatives of — and thallium; Compounds of. [Separation of — from thallium.] J. Barlot and J. Pernot, 421.
- Mercury Salts** : Reagent for —; Zinc purpurate as a. G. Denigès, 421.
- Metal Alloys** : Acids; Rapid method of disintegrating — not attacked by. I. Compagno, 65.
- Metal-Glass** : Tap. W. E. Garner, 68.
- Metallic Salts** : Water; Influence of minute quantities of — on the bacteriological content of. E. L. Atkinson and R. C. Frederick, 247.
- Metallurgical Products** : Arsenic and phosphorus in —; Estimation of. I. Compagno, 66.
- Metallurgical Products** : Ores and —; Estimation of vanadium in. R. B. Schaal, 472.
- Metals** : Acids containing formaldehyde; Solubility of — in. R. C. Griffin, 110.
- Metals** : Institute of —; The. 266.
- Metals** : Iodine on different — in the cold; Action of: Process for the detection of the presence of chlorine in the atmosphere. C. Matignon, 211.
- Metals** : Silver; Estimation of, and its separation from lead and other — by means of hypophosphorous acid. L. Möser and T. Kittl, 381.
- Metals** : Sulphides; Estimation of — as. L. Moser and A. Schattner, 421.
- Methoxy Group** : —; Volumetric estimation of the. J. Troeger and E. Tiebe, 414.
- Methyl Alcohol** : Cacao-beans and husks; Estimation of — in. C. H. Koers, 52.
- Methyl Alcohol** : Ethyl alcohol; Denigès' test for the detection and estimation of — in the presence of. R. M. Chapin, 375.
- Methyl Alcohol** : Liqueurs and spirits; Detection of — in. L. Hoton, 53.
- Methyl Alcohol** : Purification of —; A method of. A. Lanzenberg and J. Duclaux, 206.
- Methyl Alcohol** : Spirits, medicines, cosmetics, etc., by means of the Zeiss immersion refractometer; Estimation of — and ethyl alcohol in. W. Lange and G. Reif, 369.
- Methyl Orange** : Indigo carmine; — as an indicator in presence of. F. X. Moerk, 515.
- Methyl Salicylate** : Gaultheria and birch oils; Review of tests for — in. C. H. LaWall, 97.
- Methylation** : Cellulose; — of. III. — Homogeneity of product and limit of —. W. S. Denham, 154.
- Methylene Blue** : Living and dead yeast; Action of — and other dyes on. C. G. Fraser, 247.
- Metropolitan Borough of Stepney** : Report of the Borough Analyst for the — for the Year 1920; Annual. H. Hawley, 452.
- Michell's Cup and Ball** : Viscosimeter. T. C. Thomsen, 114.
- Micro-Chemical Identification** : Gaseous ammonia as hexamethylenetetramine picrate; — of. C. Kollo and V. Teodossiu, 111.
- Microchemical Identification** : Hydrocyanic acid by means of alloxan reagent; — of. G. Denigès, 334.
- Micro-Chemical Identification** : Potassium and sodium in presence of magnesium; — of. E. Ludwig and H. Spirescu, 112.
- Microchemical Reactions** : Iodic acid; — of. A. Bolland, 24.
- Microchemical Tests** : Saccharin and its salts; — for. Denigès, 459.
- Microscope Field** : Colouring of the —; Note on (Notes). R. J. Phillips, 367.

- Microscopical Examination** : Dyes in the — of bread, flour, feeding stuffs, etc.; Use of. P. P. Fechner, 287.
- Microscopic Examination** : Opaque objects; Apparatus for — of. M. François and P. Lormand, 345.
- Microscopical Preparations** : Vegetable and animal tissues; New technique for — of. Larbaud, 303.
- Micro-Sections** : Vulcanised rubber articles; — cut from. H. A. Depew and I. R. Ruby, 108.
- Microstructure** : Wood; Effects of chemical reagents on the — of. A. Abrams, 468.
- Milk** : Anti-scorbutic power and salt-content of —; Relation of fodder to the. A. F. Hess, L. J. Unger, and G. C. Supplee, 99.
- Milk** : Fat content of skimmed —; Comparison of methods for the estimation of the. T. J. McNerney and H. C. Troy, 50.
- Milk** : Chlorine in — without calcination; Estimation of. J. Werder, 498.
- Milk** : Cow and ox serum, colostrum, and — by racemisation; Examination of proteins in. H. E. Woodman, 504.
- Milk** : Fat globules in goat's —; The size of. E. W. Schultz and L. R. Chandler, 241.
- Milk** : Fat tests in — as determined by a — -testing association and by a creamery; Comparison of. H. C. Troy, 49.
- Milk** : Formaldehyde and diphenylamine reaction of —; Iron as the cause of the. F. Reiss, 136.
- Milk** : Germicidal properties of —. 293.
- Milk** : Goat's, cow's, and human —; Comparison of the acidity of. E. W. Schultz and L. R. Chandler, 241.
- Milk** : Human lesions; Haemolytic Streptococci from — and from. R. C. Salter, 248.
- Milk** : Lactose in —; Colorimetric estimation of. R. G. Owen and R. Gregg, 286.
- Milk** : Manurial pollution in — by the anaerobic spore test; Detection of. J. Weinzirl, 461.
- Milk** : Nutritive and anti-scorbutic properties of the cow's —; Influence of the diet of the cow upon the. R. A. Dutcher, C. H. Eckles, C. D. Dahle, S. W. Mead, and O. G. Schaefer, 99.
- Milk-Powder** : Moisture in —; Estimation of. N. Schoorl and S. C. L. Geritzen, 241.
- Milk Powders** : Antiscorbutic capacity of —. E. B. Hart, H. Steenbock, and N. R. Ellis, 292.
- Milk** : Presence of blood-cells and of specific bacterial infections of the udder; Reaction of — in relation to the. J. C. Baker and R. S. Breed, 16.
- Milk Preservative** : Mustard oil as a —. P. Post, 136.
- Milk** : Ropiness in —; A Streptococcus which produces. H. Violle, 248.
- Milk** : Ropy —; An epidemic of. H. A. Harding and M. J. Prucha, 99.
- Milk** : Secretion disturbances in Detection of. G. Koestler, 460.
- Milk** : Streptococcus in —; Viscous lactic. H. Violle, 409.
- Milk-Testing Association** : Fat tests in milk as determined by a — and by a creamery; Comparison of. H. C. Troy, 49.
- Milk** : Tryptophane in blood-serum and —; Estimation of. O. Fürth and E. Nobel, 293.
- Milk** : Vitamin A.; Factors influencing the value of — and butter as sources of. J. C. Drummond, K. H. Coward and A. F. Watson, 506.
- Mineral Constituents** : Potatoes and potato flour; — of. C. E. Mangels, 328.

- Mineral Residue**: Smokeless powders; Estimation of — in. G. Lutri, 61.
- Mineral Sulphide Waters**: —; Analysis of. J. G. Fairchild, 205.
- Mineral Waters**: Harrogate —; Composition of the. W. Lowson, 125.
- Ministry of Food**: —; The. 80.
- Ministry of Health**: Therapeutic Substances; Report of the Departmental Committee on the control of certain, 1921 (Cmd. 1156). 227.
- Minute Quantities**: Boiling-point of — of substances; Determination of. V. Arreguine, 218.
- Mixed and Waste Acids**: Nitrous acid in —; Estimation of. H. Toussaint, 217.
- Moisture Estimations**: Rapid —; Electric oven for. G. L. Spencer, 217.
- Moisture**: Milk-powder; Estimation of — in. N. Schoorl and S. C. L. Geritzen, 241.
- Molecular Solutions**: Fatty oils; Oil-Film measurement of, and certain phenomena of —. P. Woog, 465.
- Molecular Weights**: Hydrolysis to the determination of —; Application of the law of. H. Colin and A. Chaudun, 153.
- Molluscs**: Pacific coast; Study of — of the. P. G. Albrecht, 145.
- Mono- and Di-Sulphonic Acids**: Aminonaphthol- —; Volumetric estimation of. G. R. Levi, 420.
- Morphine**: Indian opium; —, codeine, and narcotine in. Jitendra Nath Rakshit, 481.
- Morphine**: Opium and its preparations; New rapid method for the estimation of — in. T. Ugarte, 142.
- Morphine**: Opium; Estimation of — in. A. Jermsted, 53.
- Mosla japonica**: Thymol in the volatile oil of —; Estimation of. T. Kariyone and K. Atsumi, 140.
- Mould Spores**: Gum levan by —; Formation of. N. and L. Kopeloff and C. J. Welcome, 15.
- Mustard Gas Mixtures**: Sulphur monochloride in —; Determination of. W. A. Felsing, S. B. Arenson, and F. J. Kopp, 20.
- Mustard Oil**: Milk preservative; — as a. P. Post, 136.
- Mutations**: Individual divergences of lactic organisms; Sudden physiological — caused by. C. Gorini, 336.
- Mutton-Bird Oil**: —; Chemical investigation of. I. C. L. Carter, 458.
- Naphthalene Disulphonic Acids**: Certain —; Qualitative detection of. J. A. Ambler, 107.
- Narcissus Bulbs**: Seaweed; Coffee substitutes from — and. C. Griebel and W. Rothe, 195.
- Narcotine**: Morphine, Codeine, and — in Indian opium. Jitendra Nath Rakshit, 481.
- National Physical Laboratory**: Report for the Year 1920. 490.
- Navy Bean**: Peas; Carbohydrate content of the — and. W. H. Peterson and H. Churchill, 329.
- Neosalvarsan**: Complex mixture; Detection of — in a. M. A. Morel, 408.
- Neo-Salvarsan**: —; Examination of. L. Van Itallie, 144.
- Neutral Chlorides**: Hydrochloric acid and — in leather; Estimation of. A. W. Thomas and A. Frieden, 107.
- Nickel**: Cobalt and — in cobalt steels; Estimation of. G. E. F. Lundell and J. I. Hoffmann, 384.
- Nickel**: Cyanometric assay of —. G. H. Stanley, 519.
- Nitrates**: Alcohol; Removal of — by means of. R. Schneidewind, 217.

- Nitrates**: Bismuth salts by means of titanium trichloride and Devarda's alloy; Estimation of — in. T. McLachlan, 383.
- Nitre**: Ethyl nitrite from sweet spirit of —. Volatilisation of. J. G. Roberts, 334
- Nitric Acid**: "Fornitral" for the detection and estimation of —; Use of. 385.
- Nitric and Organic Nitrogen**: Mixed fertilisers; Gas-Volumetric estimation of ammoniacal, — in. P. Baldi, 64.
- Nitric Nitrogen**: Scales' method and the use of Devarda's alloy for the reduction of —; Comparison of. A. P. Harrison, 257.
- Nitrite**: Bromate, dichromate, —, and chloride ions; Electrometric estimation of. W. S. Hendrixson, 472.
- Nitrite**: Water; Estimation of — in. P. A. Meerburg, 65.
- Nitro Compounds**: Titanium trichloride; Analysis of aromatic — by means of. F. L. English, 19.
- Nitro Derivatives**: Smokeless powder; Detection of nitroso compounds and estimation of — in. C. Lutri, 61.
- Nitrogen**: Amino —; Iodimetric estimation of. H. H. Willard and W. E. Cake, 64.
- Nitrogen**: Gasometric determination of —; Note on the. R. L. Stehle, 421.
- Nitrogen**: Mixed fertilisers; Gas-volumetric estimation of ammoniacal, nitric, and organic — in. P. Baldi, 64.
- Nitrogen**: —; Gasometric estimation of. R. L. Stehle, 110.
- Nitrogen**: Organic compounds; Detection of — in. C. D. Zenghelis, 415.
- Nitrogen**: Urine by the Dumas and Kjeldahl methods; Estimation of total — in. W. Mestrezat and M. P. Janet, 17.
- Nitroglycerin Explosives**: Stability towards heat of —; Quantitative test of the. M. Taliani, 377.
- Nitroso Compounds**: Nitro derivatives in smokeless powder; Detection of — and estimation of. C. Lutri, 61.
- Nitroso R-Salt**: Cobalt; —, a reagent for the detection of. H. S. van Klooster, 254.
- Nitrous Acid**: Mixed and waste acids; Estimation of — in. H. Toussaint, 217.
- Nitrous Acid**: —; Decomposition of. E. Oliveri-Mandalà, 257.
- Nitrous Fumes**: Air; Estimation of — in. J. Moir, 517.
- Non-Alcoholic Drinks**: Bacteria in —. L. Gershenfeld, 102.
- Non-Return Arrangement**: Water pumps; — for. H. Dorsch, 163.
- Normal Weight**: Saccharimeter; The International — for the. 268.
- Notes from Reports of Public Analysts**: 1921: 403, 451.
- Notes**: 1921: 93, 239, 284, 328, 366, 402, 451, 488.
- Novarsenicals**: Therapeutic —; Elimination and fixation of. Kohn-Abrest, Sicard, and Paraf, 147.
- Nut**: Cohune —; Globulin from the. C. O. Johns and C. E. F. Gersdorff, 100.
- Nutmeg**: Otoba —; The. 51.
- Nutritional Requirements**: Yeast; — of I. Rôle of vitamins in the growth of yeast. E. I. Fulmer, V. E. Nelson, and F. F. Sherwood, 146.
- Nutritive and Anti-Scorbutic Properties**: Cow's milk; Influence of the diet of the cow upon the — of the. R. A. Dutcher, C. H. Eckles, C. D. Dahle, S. W. Mead, and O. G. Schaefer, 99.
- Nutritive Value**: Lard and lard substitutes; Factors influencing the — of. J. C. Drummond, 245.
- Nutritive Value**: Lard; — of. J. C. Drummond, J. Golding, S. S. Zilva, and K. H. Coward, 244.
- Nuts**: "Maroola" — (*Sclerocarya Caffa*); Oil of. 289.

- Opium**: Indian —; Morphine, codeine, and narcotine in. Jitendra Nath Rakshit, 481.
- Opium**: Morphine in — and its preparations; New rapid method for the estimation of. T. Ugarte, 142.
- Opium**: Morphine in —; Estimation of. A. Jermsted, 53.
- Opiums**: Ammonium salts in various —; Quantity of. L. J. Thomson, 54.
- Optical Method**: Mixtures of sucrose and raffinose; Revision of the — for analysing. C. A. Browne and C. A. Gamble, 456.
- Optochin (Ethylhydrocupreine)**: Japanese substitute for —; Remijin, an inferior. C. A. Rojahn, 142.
- Orange Vinegar**: —: Its manufacture and composition. H. D. Poore, 95.
- Ore**: Zirconia from Brazilian — and a new method of estimation; Preparation of. E. C. Rossiter and P. H. Sanders, 255.
- Ores**: Bismuth in high-grade —; Colorimetric estimation of. G. Spurge, 298.
- Ores**: Platinum in —; Detection and estimation of. C. W. Davis, 518.
- Ores**: Vanadium in — and metallurgical products; Estimation of. R. B. Schaal, 472.
- Organic Analysis, Abstracts**: 1921: 18, 57, 104, 151, 205, 250, 296, 338, 375, 414, 464, 512.
- Organic Analysis**: Gas combustion furnace for use in —; Improved. T. J. Hedley, 473.
- Organic Carbon**: Bituminous limestones; Estimation of the — in. E. Sernagiotto, 296.
- Organic Carbon**: Soil; Rapid combustion method for the estimation of organic matter and — in. J. W. Read, 295.
- Organic Compounds**: Arsenic in —; Estimation of. G. R. Robertson, 152.
- Organic Compounds**: Oxidation with chromic acid; Estimation of — by. H. Cordebard, 151.
- Organic Compounds**: Nitrogen in —; Detection of. C. D. Zenghelis, 415.
- Organic Intermediate Products**: —; Importation of. 122.
- Organic Liquids**: Wines; Estimation of small quantities of iron in —, especially in. Malvezin and C. Rivilland, 206.
- Organic Matter**: Soil; Rapid combustion method for the estimation of — and organic carbon in. J. W. Read, 295.
- Organic Nitrogen**: Ammoniacal, nitric, and — in mixed fertilisers; Gas-volumetric estimation of. P. Baldi, 64.
- Organic Substances**: Bromine in —; Estimation of traces of. A. Damiens, 22.
- Organic Substances**: Cyanic acid by oxidation of —; Synthesis of. New methods of analysis of this substance. R. Fosse, 207.
- Organic Substances**: Total sulphurous acid in —; Volumetric method for the estimation of. V. Froboese, 205.
- Organisms**: Lower vegetable —; Growth-promoting factors in. P. Goy, 99.
- Otoba Butter**: —; Analysis of. W. F. Baughman, G. S. Jamieson, and D. H. Brauns, 138.
- Otoba Nutmeg**: —; The. 51.
- Ouabain**: Strophanthin; Identification of — and. A. Richaud, 459.
- Oven**: Rapid moisture estimations; Electric — for. G. L. Spencer, 217.
- Ox-Foot Oils**: Sheep-foot and —. A. Bruno, 371.
- Ox Serum**: Proteins in cow and —, colostrum, and milk by racemisation; Examination of. H. E. Woodman, 504.
- Oxalic and Citric Acids**: —; Detection of. Polonovski, 464.

**Oats** : "Oil" of —; A note on the. E. Paul, 238.

**Obituary Notices** :

- Bevan, Edward John**, 435.

- Palm Wine** : South Tunisian —; Analysis of. A. M. d'Aymeric, 243.
- Papers** : Indicator —; Estimation of hydrogen-ion concentration in small volumes of liquid by means of. J. M. Kolthoff, 381.
- Papilionaceae** : Seeds of certain —; Substance yielding hydrogen sulphide contained in the. M. Mirande, 408.
- Paraformaldehyde** : Formaldehyde and — in tablets; Estimation of. N. Evers and C. M. Caines, 374.
- Pastes** : Starch and dextrin —; Consistence of. W. H. Herschel and C. Bergquist, 468.
- Pathological Fluids** : Blood and —; Volumetric method of estimating reducing sugars in. A. Jonescu and V. Vargolici, 101.
- Peas** : Navy bean and —; Carbohydrate content of. W. H. Peterson and H. Churchill, 329.
- Peas** : Pigmentation; Fat-soluble vitamin content of — in relation to their. H. Steenbock, M. T. Sell, and P. W. Boutwell, 411.
- Peaty Waters** : Lead in — (Notes). T. Tickle, 240.
- Pectase** : Pectin; Action of alkalis and of — upon. F. Tutin, 505.
- Pectin** : Alkalis and of pectase upon —; Action of. F. Tutin, 505.
- Pectin** : Fruit; — in. (Report of the Food Investigation Board for the Year 1920.) 453.
- Pentosans** : Phenylhydrazine; Volumetric estimation of, and its application to the estimation of — and pentoses. A. R. Ling and D. R. Nanji, 512.
- Pentoses** : Phenylhydrazine; Volumetric estimation of, and its application to the estimation of pentosans and —. A. R. Ling and D. R. Nanji, 512.
- Pepsin** : Proteolytic activity of —; Use of edestin in determining the. J. F. Brewster, 245.

- Perchloric Acid** : Silica; — as a dehydrating agent in the estimation of. H. H. Willard and W. E. Cake, 67.
- Percussion Caps** : Detonators and —; Examination of. A. Langhans, 344.
- Perilla Nankinensis*** : Essential oil from —. S. Furukawa and Z. Tomizawa, 290.
- Perilla Seed*** : Cyprus; — from. 289.
- Permanganate** : Mixtures of —, dichromate, and chromic salts; Volumetric analysis of. N. G. Chatterji, 520.
- Permanganate Titrations** : Catalysis in —. P. H. Segnitz, 109.
- Permeability** : Textiles; Laboratory apparatus for measuring the — and heat-insulating capacity of. G. Colombo, 68.
- Peroxide** : Dextrose with hydrogen —; Disodium hydrogen phosphate as a catalyst for the oxidation of. E. J. Witzemann, 105.
- Peroxide** : Hydrogen —; Detection and estimation of traces of. F. W. Horst, 341.
- Peroxide** : Pure hydrogen —; Properties of. O. Maass and W. H. Thatcher, 110.
- Peroxydase** : Blood; Estimation of catalase, —, and etherase in a drop of. A. Bach and S. Zoubkoff, 15.
- Persulphate Method** : Manganese by the —; The Use of phenolphthaleïn and diphenylamine in the estimation of. D. H. Wester, 112.
- Peru Balsam** : Adulteration; — and its. L. Van Itallie, 141.
- Petrol** : Aromatic hydrocarbons in mixtures with —; Estimation of. H. T. Tizard and A. G. Marshall, 155.
- Petroleum** : Anhydrous stannic chloride on — and — distillates; Action of. G. Torossian, 513.
- Petroleum** : Chlorides in —; Estimation of. R. R. Matthews, 252.
- Petroleum Distillates** : Petroleum and —; Action of anhydrous stannic chloride on. G. Torossian, 513.
- Petroleum Spirits** : Sulphur in —; Lamp method of estimating. J. S. Jackson and A. W. Richardson, 156.
- Petrols** : Dissolved gases; — containing. F. Bordas, 59.
- Pharmacopœia Method** : Phosphoric acid and soluble phosphates; The United States — for the estimation of. A. E. Stearn, H. V. Farr, and N. P. Knowlton, 200.
- Phaseolin** : Digestibility of —; Effect of cooking on the. H. C. Waterman and C. O. Johns, 246.
- (*Phaseolus calcaratus*)** : "Rice" beans —. 286.
- Phenol Reagent of Folin and Denis** : Cresol by the —; Estimation of. R. M. Chapin, 419.
- Phenol Red** : Indicator of acidity; — as. A. Massink, 470.
- Phenol** : Salicylates and —; Estimation of. W. P. Emery, 376.
- Phenol** : Specific test for —; New. G. Rodillon, 157.
- Phenolphthaleïn** : Manganese by the persulphate method; The use of — and diphenylamine in the estimation of. D. H. Wester, 112.
- Phenols** : Alcohols and — in essential oils by esterification with pyridine; Estimation of. H. W. Van Urk, 512.
- Phenols** : Sheep dips; Estimation of — in. K. B. Edwards and G. A. Freak, 60.
- Phenols** : Water; Detection of — in. R. D. Scott, 337.
- Phenylhydrazine** : Pentosans and pentoses; Volumetric estimation of — and its application to the estimation of. A. R. Ling and D. R. Nanji, 512.
- Phosgene** : Ricinolein; Action of — on. A. Piutti and A. Curzio, 371.

- Phosphate Content**: Ash of foods; Estimation of the alkalinity and — of the. J. Tillmans and A. Bohrmann, 199.
- Phosphate**: Inorganic — in urine by alkalimetric titration; Estimation of. C. H. Fiske, 294.
- Phosphates**: Arsenates; Sensitive colour reaction of — and. G. Denigès, 24.
- Phosphates**: Biological products; Estimation of small quantities of — in. G. Denigès, 460.
- Phosphates**: Manganese; Interference of — with detection of. T. Sabalitschka and H. Niesemann, 159.
- Phosphates**: Phosphoric acid and soluble —; The United States Pharmacopoeia method for the estimation of. A. E. Stearn, H. V. Farr, and N. P. Knowlton, 200.
- Phosphates**: Potassium in presence of sodium, magnesium, sulphates and —; Estimation of. H. Atkinson, 354.
- Phosphates**: Water; Estimation of — in. D. Florentin, 511.
- Phosphatides**: —; Estimation of. D. H. Brauns and J. A. MacLaughlin, 55.
- Phosphomolybdic and Phosphotungstic**: Acids. H. Wu, 24.
- Phosphor-Bronze**: Phosphorus in —; Estimation of. G. Greenwood, 301.
- Phosphoric Acid**: Citrate-soluble — in superphosphates; Estimation of. Official method of the German Agricultural Experiment Station. 295.
- Phosphoric Acid**: Estimation of —; Rapid method for the. H. Copaux, 521.
- Phosphoric Acid**: Heating with sulphuric acid or fusion with pyrosulphate; Loss of — on. W. F. Hillebrand and G. E. F. Lundell, 67.
- Phosphoric Acid**: Melting-point determinations; Use of — instead of sulphuric acid in. A. Graustein, 161.
- Phosphoric Acid**: — and soluble phosphates; The United States Pharmacopoeia method for the estimation of. A. E. Stearn, H. V. Farr, and N. P. Knowlton, 200.
- Phosphorus**: Arsenic and — in metallurgical products; Estimation of. I. Compagno, 67.
- Phosphorus**: Butter; — in. J. T. Cuisick, 50.
- Phosphorus**: Phosphor-bronze; Estimation of — in. G. Greenwood, 301.
- Phosphorus**: Steel; Separation of the — from the other components of. R. Ariano, 212.
- Phosphorus**: Urine and blood; Colorimetric methods for estimation of — in. R. D. Bell and E. A. Doisy, 13.
- Phosphotungstic and Phosphomolybdic**: Acids. H. Wu, 24.
- Phthalëins**: Two new —; Indicator properties of. W. Csanyi, 250.
- Physical Methods, Apparatus, etc., Abstracts**: 1921: 161, 217, 257, 303, 345, 385, 424, 473, 523.
- Physico-Chemical Symbols**: —; International. 121.
- Physiological Control**: Adrenaline and suprarenal preparations; Necessity for the — of. M. Tiffeneau, 291.
- Physiological Mutations**: Lactic organisms; Sudden — caused by individual divergences of. C. Gorini, 336.
- Picrate**: Potassium as —; Detection and estimation of. S. Minovici and A. Jonescu, 423.
- Pictures**: Polarised light for the examination of old —; Use of. P. Lambert, 345.
- Pigments**: Yellow plant — from the fat-soluble vitamin; Differentiation of. M. Stephenson, 246.

- Pigmentation:** Peas in relation to their —; Fat-soluble vitamin content of. H. Steenbock, M. T. Sell, and P. W. Boutwell, 411.
- Pimento:** "Wild —" of Jamaica; Volatile oil from the leaves of the. O. D. Roberts, 289.
- Piper ribesoides:*** Cubebs; Substitution of the fruits of — for. 144.
- Plant Pigments:** Fat-soluble vitamin; Differentiation of yellow — from the. M. Stephenson, 246.
- Plants:** Dextrose in —; Detection of. M. Bridel and R. Arnold, 378.
- Platinum:** Copper, palladium, and —; Electrolytic estimation of gold and its separation from. W. D. Treadwell, 298.
- Platinum:** Ores; Detection and estimation of — in. C. W. Davis, 518.
- Podophyllum Ash:** Standards. E. L. Newcombe, C. H. Rogers and C. W. Folkstad, 374.
- Poirrier Blue:** Indicator; — as an. W. Mestrezat, 341.
- (Poison Oak):** *Rhus diversiloba* —; Lobinol, a dermatitant from. J. B. McNair, 143.
- Poison:** Red squill (*Scilla maritima*) as a rat —; Liquid extract of. F. W. Smith, 178.
- Poisoning:** Vetch seeds; Lathyrism or — caused by. M. Mirande, 291.
- Poisonous:** Haricot beans. T. v. Fellenberg, 196.
- Poisonous Plant:** Coffee bean (*Daubentonia longifolia*) as a —. C. D. Marsh and A. B. Clawson, 145.
- Poisons:** Bromine; Toxicological detection of — containing. A. Damiens, 14.
- Polarimetric Estimation:** Mannitol; — of. M. J. Badreau, 368.
- Polarimetric Estimation:** Tannin in hops; — of. A. R. Ling and D. R. Nanji, 332.
- Polarised Light:** Old pictures; Use of — for the examination of. P. Lambert, 345.
- Pollution:** Manurial — in milk by the anaerobic spore test; Detection of. J. Weinzirl, 461.
- Polyatomic Alcohols:** Sugars and — in boric acid and borate solutions, with some analytical applications; Reactions of. G. Van B. Gilmour, 3.
- Polybasic Acids:** Mixtures of acids and of bases, and of — or bases; Volumetric estimation of. H. T. Tizard and A. R. Boeree, 154.
- Polygonum bistorta:*** *Krameria triandra*; — as a substitute for. Ruiz and Pavon, 141.
- Poplars:** British Columbian willows and —; Salicin content of. R. H. Clark and K. B. Gillie, 502.
- Potassium Cyanide:** Formic acid in the presence of hydrocyanic acid; Decomposition of — and estimation of. G. Harker, 415.
- Potassium Dichromate:** Arsenious compounds by means of —; Volumetric estimation of. R. Meurice, 213.
- Potassium Iodide:** Copper in sugar analysis by means of potassium thiocyanate and —; Estimation of. G. Bruhns, 23.
- Potassium:** Magnesium; Micro-chemical identification of — and sodium in presence of. E. Ludwig and H. Spirescu, 112.
- Potassium Permanganate:** Lactose by alkaline —; Volumetric method for the estimation of. F. T. Adriano, 137.
- Potassium:** Picrate; Detection and estimation of — as. S. Minovici and A. Jonescu, 423.
- Potassium Platinochloride:** —; Composition of. A. Vürtheim, 67.

- Potassium** : Sodium, magnesium, sulphates and phosphates; Estimation of — in presence of. H. Atkinson, 354.
- Potassium Thiocyanate** : Copper in sugar analysis by means of — and potassium iodide; Estimation of. G. Bruhns, 23.
- Potato Flour** : Potatoes and —; Mineral constituents of. C. E. Mangels, 328.
- Potato Juice** : Anti-scorbutic principle of —. Bezssonoff, 411.
- Potatoes** : Potato flour; Mineral constituents of — and. C. E. Mangels, 328.
- Potatoes** : Sweet — in tins; Discoloration of. E. F. Kohman, 404.
- Potatoes** : Tubers, skins, and sprouts of three varieties of —. F. C. Cook, 203.
- Powder** : Egg —; The composition of. F. F. Beach, F. E. Needs, and E. Russell, 279.
- Powders** : Milk —; Anti-scorbutic capacity of. E. B. Hart, H. Steenbock, and N. R. Ellis, 292.
- Precipitation** : —; Fractional. P. Jolibois, R. Boussuet, and Chevry, 162.
- Preservation** : Fish frozen in chilled brine; — of. Penetration of salt. L. H. Almy and E. Field, 503.
- Preservative** : Milk —; Mustard oil as a. P. Post, 136.
- Preservatives** : Wood —; Toxicity of. C. J. Humphrey, R. M. Flemming, and E. Bateman, 410.
- Preserved** : Edible fungi. J. Gerum, 243.
- President** : Annual address of the —. 81.
- Prickly Pear** : Seed oil; —. S. Lomanitz, 94.
- Primary Alkamines** : Volatile alkamines in the presence of ammonia and of tertiary alkamines in the presence of secondary and —; Detection of. W. E. Woodward and C. L. Alsberg, 256.
- Projection** : Sugar crystals by —; Examination of. G. P. Meade, 456.
- Protein Content** : Wheat; Relation of hardness to — of. H. F. Roberts, 414.
- Proteins** : Beans; Relative digestibility of various preparations of — from. H. C. Waterman and D. B. Jones, 409.
- Proteins** : Cow and ox serum, colostrum, and milk by racemisation; Examination of — in. H. E. Woodman, 504.
- Proteins** : Wheat berry; Distribution of enzymes and — in the endosperm of the. F. J. Martin, 56.
- Proteolytic Activity** : Pepsin; Use of edestin in determining the — of. J. F. Brewster, 245.
- Ptomaines** : Toxicological analysis; Separation of — and alkaloids in. A. Jonescu, 102.
- Public Analyst** : Brighton; Correspondence on appointment of — for the County Borough of. 76.
- Public Analysts** : Reports of —; Notes from the. 451.
- Pump** : Vacuum —; Sulphuric acid concentrator and. O. Maass, 68.
- Pumps** : Water —; Non-return arrangement for. H. Dorsch, 163.
- Pumps** : Water vacuum —; Check valve for. E. A. Andelin, 303.
- Pure and Applied Chemistry** : International Union of —. Belgian Bureau of Chemical Standards. 266.
- Pyknometer** : Improved —; An. R. Saar, 163.
- Pyridine** : Alcohols and phenols in essential oils by esterification with —; Estimation of. H. W. Van Urk, 512.
- Pyroligneous Acid** : Acetic acid in —; Estimation of. V. E. Grotlisch, 96.
- Pyrosulphate** : Heating with sulphuric acid or fusion with —; Loss of phosphoric acid on. W. F. Hillebrand and G. E. F. Lundell, 67.

- Qualitative Analysis** : Spot reactions in — : Use of. F. Feigl and R. Stern, 212.
- Quantitative Test** : Stability towards heat of nitroglycerin explosives; — of the. M. Taliani, 377.
- Quercetin** : Brown-husked maize; Occurrence of — in. C. E. Sando and H. H. Bartlett, 502.
- Quinine** : Scale preparations containing — and other cinchona alkaloids; The estimation of strychnine in. T. F. Harvey and S. Back, 188.
- Racemisation** : Proteins in cow and ox serum, colostrum, and milk by —; Examination of. H. E. Woodman, 504.
- Radium Emanation** : Auto-discharge of an electroscope in the estimation of —; Rapid method for measuring the. P. Loisel, 346.
- Raffinose** : Sucrose and —; Revision of the optical method for analysing mixtures of. C. A. Browne and C. A. Gamble, 456.
- Rain** : Snow; Substances dissolved in — and. W. A. Moore and G. Browning, 104.
- Rancidity** : Butter and margarine fats; Investigations on the — of. W. N. Stokoe, 335.
- Rat Poison** : Liquid extract of red squill (*Scilla maritima*) as a —. F. W. Smith, 178.
- Rays** : Highly sensitive — of the elements applicable to analytical investigations; Table of. A. de Gramont, 64.
- Rays** : Roentgen —; Spectrum analysis by means of. M. Siegbahn, A. E. Lindh, and N. Stensson, 303.
- Reagent** : Aluminium and manganese; Sodium salicylate as — for detecting. C. Van Zijp, 300.
- Reagent** : Ammonia; New — for. C. D. Zenghelis, 381.
- Reagent** : Bitter Lactarius and *Russula* species; New — for. Barlot, 96.
- Reagent** : Cobalt; Nitroso R-salt, a — for the detection of. H. S. van Klooster, 254.
- Reagent** : Grignard —; Oxidation of the. C. W. Porter and C. Steel, 60.
- Reagent** : Hydrocyanic acid by means of alloxan —; Microchemical identification of. G. Denigès, 334.
- Reagent of Folin and Denis** : Phenol —; Estimation of cresol by the. R. M. Chapin, 419.
- Reagents** : Microstructure of wood; Effects of chemical — on the. A. Abrams, 468.
- Red Squill** : Rat poison; Liquid extract of — (*Scilla maritima*) as a. F. W. Smith, 178.
- Reducing Flames** : Analysis by means of —; detection of traces of manganese in presence of iron or other substances. J. Meunier, 259.
- Reducing Sugars** : Blood and pathological fluids; Volumetric method of estimating — in. A. Jonescu and V. Vargolici, 101.
- Reducing Sugars** : Blood; Estimation of — in. O. Guillaumin, 14.
- Reducing Sugars** : Lead-preserved sugar-cane juices; Estimation of — in. J. B. Harris, 499.
- Reducing Sugars** : Maltose and lactose in the presence of other — by Barfoed's reagent; Estimation of. L. Le Grand, 406.
- Reducing Sugars** : Maltose or lactose in presence of other —; Estimation of: Use of Barfoed's solution. Legrand, 198.
- Reducing Sugars** : Volumetric estimation of —; New method for the. A. Jonescu and V. Varcolic, 405.

- Refractive Indices** : Oils; Determination of — of. H. S. Simms, 385.
- Refractometer** : Zeiss immersion —; Estimation of methyl alcohol and ethyl alcohol in spirits, medicines, cosmetics, etc., by means of the. W. Lange and G. Reif, 369.
- Reich Test** : Iodine solution for the —; Modified. H. M. Lowe, 341.
- Remijin** : Optochin (ethylhydrocupreine); —, an inferior Japanese substitute for. C. A. Rojahn, 142.
- Report** : Department of Scientific and Industrial Research. — of the Food Investigation Board for the Year 1920. 453.
- Report** : Government Chemist upon the Work of the Government Laboratory; — of the. (For the year ended March 31, 1921.) 493.
- Report** : Ministry of Health. — of the Departmental Committee on the control of certain therapeutic substances, 1921 (Cmd. 1156). 227.
- Report** : The National Physical Laboratory. — for the Year 1920. 490.
- Reports** : Public Analysts; Notes from the — of. 451.
- Reptilia** : Fatty oils from —. M. Tsujimoto and S. Kobayashi, 198.
- Research Department** : —; Scientific and Industrial. 174.
- Research Scheme** : Institute of Brewing —; The. 425.
- Residue** : Smokeless powders; Estimation of mineral — in. G. Lutri, 61.
- Resin Acids** : Fatty mixtures; Estimation of — in. D. McNicoll, 340.
- Resins** : Varnishes; Characters of — used for making. P. Nicolardot and C. Coffignier, 208.
- Resorcinol** : Formaldehyde with — and sulphuric acid; New test for. R. Cohn, 502.
- Reviews of Books** :
- Alloys** : Special Steels, Steel-Making —, their Ores and Graphites; Rapid Methods for the Chemical Analysis of. C. M. Johnson, 223.
- Analysis** : Volumetric —. C. H. Hampshire, 263.
- Analyst's Laboratory Companion**; The. A. E. Johnson, 73.
- Animal and Vegetable Fixed Oils** : —, Fats, Butters, and Waxes. C. R. A. Wright, 350.
- Animal** : Proteins. H. G. Bennett, 479.
- Applied Chemistry** : Dictionary of —; A. Volume I.: A to Calcium. E. Thorpe, 225.
- Applied Chemistry** : Dictionary of —; A. Volume II. Calculi to Explosion. E. Thorpe, 430.
- Applied Chemistry** : Progress of —; Reports of the Progress of. Volume V., 1920. 352.
- Applied Colloid Chemistry** : — General Theory. W. D. Bancroft, 310.
- Bacteriology** : Dairy —. Orla-Jensen, 433.
- Beet** : Sugar from the Cane and —; The Manufacture of. T. H. P. Heriot, 29.
- Benzene** : Valence; The electronic Conception of, and the Constitution of —. H. S. Fry, 307.
- Bibliotheca** : Chemico-Mathematica. H. Zeitlinger and H. C. Sotheran, 171.
- Biochemical Catalysts** : Life and Industry; — in: Proteolytic Enzymes. J. Effront, 72.
- Breathing Apparatus** : Self-Contained —; Recent Practice in the Use of. R. C. Smart, 265.
- Butters** : Animal and Vegetable Fixed Oils, Fats, —, and Waxes. C. R. A. Wright, 350.
- By-Product Works Chemistry** : Coke Oven and —. T. Biddulph-Smith, 389.

**Reviews of Books—continued:**

- Caliche:** Nitrate from Chilean —; Recovery of. A. W. Allen, 224.
- Cane:** Sugar from the — and Beet; The Manufacture of. T. H. P. Heriot, 29.
- Catalysts:** Biochemical — in Life and Industry: Proteolytic Enzymes. J. Effront, 72.
- Centenary Volume:** Charles Griffin and Company, Ltd., Publishers, 1820–1920; The — of. 74.
- Chemical Analysis:** Public Health —. R. C. Frederick and A. Forster, 221.
- Chemical Analysis:** Qualitative —; Introduction to. T. W. Fresenius, 309.
- Chemical Analysis:** Special Steels, Steel-Making Alloys, their Ores and Graphites; Rapid Methods for the — of. C. M. Johnson, 223.
- Chemical Constants:** Physical and —. G. W. C. Kaye and T. H. Laby, 347.
- Chemicals:** Medicinal —; Organic. M. Barrowcliff and F. H. Carr, 115.
- Chemistry:** Aids to —. W. Partridge, 477.
- Chemistry:** Applied —; A Dictionary of. Volume I.: A to Calcium. E. Thorpe, 225.
- Chemistry:** Applied —; A Dictionary of. Volume II.: Calculi to Explosion. E. Thorpe, 430.
- Chemistry:** Applied —; Reports of the Progress of. Volume V., 1920. 352.
- Chemistry:** Coke Oven and By-Products Works —. T. Biddulph-Smith, 389.
- Chemistry:** Dairy —; A Practical Handbook for Dairy Chemists and Others having Control of Dairies. H. D. Richmond, 222.
- Chemistry:** Elementary Colloid —; A Laboratory Manual of. E. Hatschek, 28.
- Chemistry:** Factory —. W. H. Hawkes, 525.
- Chemistry:** Forensic —. G. A. Lucas, 529.
- Chemistry:** Medical, Intermediate Science and Pharmaceutical Students; Organic — for. A. K. Macbeth, 74.
- Chemistry:** Organic —; A Textbook of. A. F. Holleman, 117.
- Chemistry:** Organic —; Laboratory Manual of. H. L. Fisher, 166.
- Chemistry:** Organic —; Recent Advances in. A. W. Stewart, 167.
- Chemistry:** Physical —; A System of. Vol. II.: Thermodynamics. W. C. McC. Lewis, 164.
- Chemistry:** Physiological —; Practical. S. W. Cole, 116.
- Chemistry:** Plant Products; An Introduction to the — of. Vol. I. P. Haas and T. G. Hill, 169.
- Chemistry:** Thermodynamics and —. F. H. Macdougall, 308.
- Chemist's Year-Book:** —, 1921: The. F. W. Atack, 431.
- Chemists:** Famous —; The Men and their Work. W. A. Tilden, 313.
- Chilean Caliche:** Nitrate from —; Recovery of. A. W. Allen, 224.

- Laboratory Companion**: Analyst's —; The. A. E. Johnson, 73.
- Laboratory Manual**: Elementary Colloid Chemistry; A — of. E. Hatschek, 28.
- Laboratory Manual**: Organic Chemistry; — of. H. L. Fisher, 166.
- Lubricating and Allied Oils**: —. E. A. Evans, 311.
- Margarine**: —. W. Clayton, 71.
- Medicinal Chemicals**: Organic —. M. Barrowcliff and F. H. Carr, 115.
- Medicines**: Drugs and —; The Chemistry and Analysis of. H. C. Fuller, 348.
- Microscopy**: Critical —. A. C. Coles, 390.
- Nitrate**: Chilean Caliche; Recovery of — from. A. W. Allen, 224.
- Nucleic Acids**: —: Their Chemical Properties and Physiological Conduct. W. Jones, 168.
- Oils, Fats, and Waxes**: Refractive Indices; Tables of. Vol. II. —. R. Kanthack, 347.
- Oils**: Lubricating and Allied —. E. A. Evans, 311.
- Optical Methods**: Control and Research Laboratories; — in. 165.
- Ores**: Special Steels, Steel-Making Alloys, their —, and Graphites; Rapid Methods for the Chemical Analysis of. C. M. Johnson, 223.
- Organic Chemistry**: Advances in —; Recent. A. W. Stewart, 167.
- Organic Chemistry**: Medical, Intermediate Science and Pharmaceutical Students; — for. A. K. Macbeth, 74.
- Organic Chemistry**: —; Laboratory Manual of. H. L. Fisher, 166.
- Organic Chemistry**: Textbook of —; A. A. F. Holleman, 117.
- Organic**: Medicinal Chemicals. M. Barrowcliff and F. H. Carr, 115.
- Organic Substances**: Inorganic and —; Solubilities of. A. Seidell, 27.
- Paper-Making**: Pulp and —; Chemistry of. E. Sutermeister, 433.
- Perfumes**: Soap and other Toilet Articles; —, Essential Oils and Fruit Essences Used for. G. Martin, 527.
- Pharmacopoeia**: Extra —, Vol. II., Seventeenth Edition. W. H. Martindale and W. W. Westcott, 262.
- Pharmacy**: Year-Book of —; The. 116.
- Physical Chemistry**: System of —; A. Vol. II., Thermodynamics. W. C. McC. Lewis, 164.
- Physical Constants**: Chemical and —. G. W. C. Kaye and T. H. Laby, 347.
- Physical Properties**: Colloidal Solutions; The — of. E. F. Burton, 525.
- Physiological Chemistry**: —; Practical. S. W. Cole, 116.
- Physiological Conduct**: Nucleic Acids: Their Chemical Properties and —. W. Jones, 168.
- Plant Products**: Chemistry of —; An Introduction to the. Vol. I. P. Haas and T. G. Hill, 169.
- Plantation Rubber**: Rubber; — and the Testing of. G. S. Whitby, 69.
- Pocket Book**: Technical Chemists' —. R. Ensoll, 226.
- Proteins**: Animal —. H. G. Bennett, 478.
- Proteolytic Enzymes**: Life and Industry; Biochemical Catalysts in —. J. Efront, 72.
- Public Health**: Chemical Analysis. R. C. Frederick and A. Forster, 221.
- Pulp**: Paper-Making; Chemistry of — and. E. Sutermeister, 433.

**Reviews of Books—continued :**

- Qualitative Chemical Analysis :** Introduction to ——. T. W. Fresenius, 309.
- Refractive Indices :** —; Tables of. Vol. II., Oils, Fats, and Waxes. R. Kanthack, 347.
- Reports :** Applied Chemistry — of the Progress of. Vol. V., 1920. 352.
- Research Laboratories :** Control and —; Optical Methods in. 165.
- Rubber :** Plantation — and the Testing of —. G. S. Whitby, 69.
- Scientific and Learned Societies :** Great Britain and Ireland; Official Year-Book of the — of. 261.
- Self-Contained Breathing Apparatus :** Use of —; Recent Practice in the. R. C. Smart, 265.
- Soap :** Perfumes, Essential Oils, and Fruit Essences Used for — and other Toilet Articles. G. Martin, 527.
- Societies :** Scientific and Learned — of Great Britain and Ireland; Official Year-Book of the. 261.
- Solubilities :** Inorganic and Organic Substances; — of. A. Seidell, 27.
- Steel-Making Alloys :** Chemical Analysis of Special Steels, —, their Ores, and Graphites; Rapid Methods for the. C. M. Johnson, 223.
- Steels :** Special —, Steel-Making Alloys, their Ores and Graphites; Rapid Methods for the Chemical Analysis of. C. M. Johnson, 223.
- Students :** Medical, Intermediate Science and Pharmaceutical —; Organic Chemistry for. A. K. Macbeth, 74.
- Substances Hétérogènes :** L'Équilibre des —. W. Gibbs, 220.
- Sugar :** Cane and Beet, The Manufacture of — from the. T. H. P. Heriot, 29.
- Synthetic Drugs :** —; The Chemistry of. P. May, 348.
- Technical Chemists' :** Pocket Book. R. Ensoll, 226.
- Thermodynamics :** Chemistry; — and. F. H. Macdougall, 308.
- Thermodynamics :** Physical Chemistry; A System of. Vol. II.: —. W. C. McC. Lewis, 164.
- Toilet Articles :** Soap and other —; Perfumes, Essential Oils, and Fruit Essences Used for. G. Martin, 527.
- Valence :** Benzene; The Electronic Conception of — and the constitution of. H. S. Fry, 307.
- Vegetable Fixed Oils :** Animal and —, Fats, Butters, and Waxes. C. R. A. Wright, 350.
- Volatile Oils :** —; The. Gildemeister and Hoffmann, 118.
- Volumetric :** Analysis. C. H. Hampshire, 263.
- Waxes :** Animal and Vegetable Fixed Oils, Fats, Butters, and Waxes. C. R. A. Wright, 350.
- Waxes :** Refractive Indices; Tables of. Vol. II.: Oils, Fats, and —. R. Kanthack, 347.
- Year-Book :** Pharmacy; The — of. 116.
- Year-Book :** Chemist's —, 1921; The. F. W. Atack, 431.
- Year-Book :** Scientific and Learned Societies of Great Britain and Ireland; Official — of the. 261.
- Yeasts :** —; The. A. Guilliermond, 170.
- Rhamnose :** —; Preparation of. C. F. Walton, Junr., 137.
- Rhizomes :** Bracken —. J. Hendrick, 96.
- Rhizopus Tritici :** Amylase of —. L. L. Harter, 203.
- Rkus diversiloba (Poison Oak) :** Lobinol, a dermatitant from —. J. B. McNair, 143.
- Rice and Manioc Flours :** —; Detection of. L. Desvergnés, 367.

- “Rice” Beans** : — ( *Phaseolus calcaratus* ). 286.
- Rice Bran** : —; Adulteration of. 286.
- Rice Polishings** : Substance from yeast and — which accelerates fermentation; Estimation of a. S. Fränkel and E. Schwarz, 202.
- Ricinolein** : Phosgene on —; Action of. A. Piutti and A. Curzio, 371.
- Rocks** : Titanium and iron in —; Estimation of. F. Ferrari, 66.
- Roentgen Rays** : Spectrum analysis by means of —. M. Siegbahn, A. E. Lindh, and N. Stensson, 303.
- Ropiness** : Milk; A Streptococcus which produces — in. H. Violle, 247.
- Ropy Milk** : Epidemic of —; An. H. A. Harding and M. J. Prucha, 99.
- Rose Bengal** : General bacterial stain; — as a. H. J. Conn, 461.
- Rotatory Power** : Mannitol; Influence of ammonium molybdate on the — of. G. Tanret, 330.
- Rotatory Powers** : Sugars; Influence of ammonium molybdate on the — of certain. G. Tanret, 330.
- Routine Determination** : Fats and fatty acids; Apparatus for the — of melting-points of. S. H. Blichfeldt and T. Thornley, 180.
- Routine Test** : Sulphites; A — for the presence of (Notes). A. E. Parkes, 402.
- Rubber Articles** : Vulcanised —; Micro-Sections cut from. H. A. Depew and I. R. Ruby, 108.
- Rubber** : Crystalline substances in —; Solubility of. G. Bruni, 211.
- Russula and Lactarius Species** : Bitter —; New reagent for. Barlot, 96.
- Rye** : Cereal Grains —; Amylases of the. J. L. Baker and H. F. E. Hulton, 329.
- Saccharimeter** : International Normal Weight for the —; The. 268.
- Saccharin** : Purity of —; Examination of some methods of ascertaining the. P. V. McKie, 335.
- Saccharin** : Reaction of —; New. L. Thevenon, 54.
- Saccharin** : —; Reaction of (A correction). L. Thevenon, 201.
- Saccharin** : Salts; Microchemical tests for — and its. Denigès, 459.
- Saccharin** : Wine; Detection of — in. C. von der Heide and W. Lohmann, 370.
- Saccharin** : Wine; Detection of — in. W. Fresenius and L. Grünhut, 501.
- Safeguarding of Industries Act, 1921** : Articles Chargeable with Duty under Part I. of the Act. 475.
- Saffron** : Flowers of *Onopordon* species for —; Substitution of. 144.
- Saffron Seeds** : Meadow —; The alkaloid and oil content of. C. Grimme, 200.
- Salicin Content** : British Columbian willows and poplars; — of. R. H. Clark and K. B. Gillie, 502.
- Salicylates** : Phenol; Estimation of — and. W. P. Emery, 376.
- Salicylic Acid** : —; Bromometric estimation of. I. M. Kolthoff, 290.
- Saline Waters** : Bromine in —; Estimation of. P. Lebeau and M. Picon, 423.
- Salt-Content** : Anti-scorbutic power and — of milk; Relation of fodder to the. A. F. Hess, L. J. Unger, and G. C. Supplee, 99.
- Salt** : Fish frozen in chilled brine; Preservation of. Penetration of —. L. H. Almy and E. Field, 503.
- Salt Mixtures** : Calcium and magnesium in various —; Estimation of. E. Canals, 384.
- Salt Mixtures** : Calcium and magnesium in various —; The quantitative estimation of. E. Canals, 216.
- Salts** : Aluminium in its —; Volumetric estimation of. A. Tingle, 343.
- Salts** : Ammonium — by means of formaldehyde; Volumetric estimation of. I. M. Kolthoff, 520.

- Salts**: Bacteriological content of water; Influence of minute quantities of metallic — on the. E. L. Atkinson and R. C. Frederick, 247.
- Salts**: Iron by means of titanous —; Volumetric determination of. W. M. Thornton, Junr., and J. E. Chapman, 159.
- Salts**: Lead — of saturated and of less saturated fatty acids; Quantitative separation of the. A. Seidenberg, 465.
- Salts**: Manganese —; Reaction of. V. Maeri, 159.
- Salts**: Opiums; Quantity of ammonium — in various. L. J. Thomson, 54.
- Salts**: Permanganate, dichromate, and chromic —; Volumetric Analysis of mixtures of. N. G. Chatterji, 520.
- Salts**: Saccharin and its —; Microchemical tests for. Denigès, 459.
- Salts**: Thiocyanates in the presence of — precipitated by silver nitrate; Estimation of. A. Dubosc, 522.
- Salvarsan**: Sulphur in commercial —; Derivatives of. H. King, 407, 459.
- “Sandy” Crystals**: Ice cream; Separation and identification of — in. H. F. Zoller and O. E. Williams, 455.
- Santonin**: Wormseeds; Estimation of — in. T. Kariyone and Y. Kimura, 200.
- Saponification**: Time factor in —; The. P. J. Fryer, 87.
- Sardine**: California — (*Sardini caerulea*); Chemical study of the. D. B. Dill, 503.
- (*Sardinia caerulea*): California sardine —; Chemical study of the. D. B. Dill, 503.
- Sardinia**: *Juniperus phoenicea* from —; Essential oil from the berries of. E. Puxeddu and F. Vodret, 53.
- Saturated and of Less Saturated Fatty Acids**: Lead salts of —; Quantitative separation of the. A. Seidenberg, 465.
- Sawdust**: Hydrolysed —; Cattle food prepared from. E. C. Sherrard and G. W. Blanco, 199.
- Scale Preparations**: Strychnine in — containing quinine and other cinchona alkaloids; The estimation of. T. F. Harvey and S. Back, 188.
- Scales’ Method**: Nitric nitrogen; Comparison of — and the use of Devarda’s alloy for the reduction of. A. P. Harrison, 257.
- Scientific and Industrial Research**: Department of —. Report of the Food Investigation Board for the Year 1920. 453.
- (*Scilla maritima*): Rat poison; Liquid extract of red squill — as a. F. W. Smith, 178.
- (*Sclerocarya Caffea*): “Maroola” nuts —; Oil of. 289.
- Seaweed**: Narcissus bulbs and —; Coffee substitutes from. C. Griebel and W. Rothe, 195.
- Secondary Alkamines**: Volatile alkamines in the presence of ammonia and of tertiary alkamines in the presence of primary and —; Detection of. H. E. Woodward and C. L. Alsberg, 256.
- Secretion Disturbances**: Milk; Detection of — in. G. Koestler, 460.
- Secretions**: Sera and —; Estimation of urea in. W. Mestrezat and M. P. Janet, 16.
- Seed**: Georgia Velvet Bean; — of the. B. Sure and J. W. Read, 506.
- Seed**: Hollyhock — and oil; Composition of. R. S. Hiltner and L. Feldstein, 407.
- Seed**: Kapok —; Indian. 196.
- Seed Oil**: Prickly pear —. S. Lomanitz, 94.
- Seed**: *Perilla* — from Cyprus. 289.

- Seeds**: Hydrogen sulphide contained in the — of certain Papilionaceae; Substance yielding. M. Mirande, 408.
- Seeds**: Locust bean —; The composition of (Notes). T. R. Hodgson, 366.
- Seeds**: Vetch —; Lathyrism or poisoning caused by. M. Mirande, 291.
- Selenium Oxochloride**: —; Properties of. V. Lenher, 157.
- (*Selinum Monnieri* L.)**: “Shê-chuang-tzu” —; Constituents of. M. Nakao, 141.
- Sensitive Colour Reaction**: Phosphates and arsenates; — of. G. Denigès, 24.
- Sensitive Reaction**: Copper; — for. P. Falciola, 471.
- Sera**: Urea in — and secretions; Estimation of. W. Mestrezat and M. P. Janet, 16.
- Serological Method**: Infected foods; — for detection of. J. Bronfenbenner and M. J. Schlesinger, 462.
- Serum**: Cow and ox —, colostrum, and milk by racemisation; Examination of proteins in. H. E. Woodman, 504.
- Serum**: Diffusible calcium of blood —; Estimation of the. L. v. Meysenbug, A. M. Pappenheimer, T. F. Zucker, and M. F. Murray, 412.
- Serum**: Sodium in small volumes of —; Estimation of. B. Kramer and F. F. Tisdall, 294.
- Serum**: Tryptophane in blood- — and milk; Estimation of. O. Fürth and E. Nobel, 293.
- Setting and Melting Points**: Gelatins; The — of. S. E. Sheppard and S. Sweet, 341.
- Shale**: Oil — for oil and ammonia yield; Laboratory testing of. E. L. Lomax and F. G. P. Remfrey, 156.
- “Shê-Chuang-Tzu” (*Selinum Monnieri* L.)**: —; Constituents of. M. Nakao, 141.
- Sheep Dips**: Phenols in —; Estimation of. K. B. Edwards and G. A. Freak, 60.
- Sheep-Foot and Ox-Foot**: Oils. A. Bruno, 371.
- Silica**: Dehydrating agent in the estimation of —; Perchloric acid as a. H. H. Willard and W. E. Cake, 67.
- Silica**: Estimation of —; New method for the. Travers, 522.
- Silicon**: —, tin, titanium, and zirconium by means of sodium carbonate; Separation of. P. Wenger and J. Morel, 342.
- Silver**: Hypophosphorous acid: Estimation of — by precipitation with. L. Moser and T. Kittl, 342.
- Silver**: Iodic acid and — by electrometric titration; Estimation of. W. S. Hendrixson, 255.
- Silver**: Lead and other metals by means of hypophosphorous acid; Estimation of — and its separation from. L. Möser and T. Kittl, 381.
- Silver Nitrate**: Thiocyanates in the presence of salts precipitated by —; Estimation of. A. Dubosc, 522.
- Skimmed Milk**: Fat content of —; Comparison of methods for the estimation of the. T. J. McInerney and H. C. Troy, 50.
- Skimmia laureola***: Leaves of —; Essential oil from. J. L. Simonsen, 333.
- Skins**: Potatoes; Composition of tubers, —, and sprouts of three varieties of. F. C. Cook, 203.
- Slide Rule**: “Wet” and “dry” weights of damp material; — for calculation of. R. Scott, 303.
- Smokeless**: Fuels. F. S. Sinnatt, 468.
- Smokeless Powder**: Nitroso compounds and estimation of nitro derivatives in —; Detection of. C. Lutri, 61.

- Smokeless Powders**: Mineral residue in —; Estimation of. G. Lutri, 61.
- Snow**: Rain and —; Substances dissolved in. W. A. Moore and G. Browning, 104.
- Soap**: Sodium chloride in —; Estimation of. H. C. Bennett, 467.
- Soap Solution**: Hardness of water; — for use in estimating. A. Krieger, 337.
- Soaps**: Pure and commercial —; Hydrolytic alkalinity of. F. C. Beedle and T. R. Bolam, 209.
- Society of Public Analysts and other Analytical Chemists, Proceedings of the**: 1921: 1, 32, 79, 123, 175, 229, 269, 315, 353, 393, 435, 481.
- Sodium**: Blood; Estimation of — in. E. A. Doisy and R. D. Bell, 147.
- Sodium Carbonate**: Silicon, tin, titanium, and zirconium by means of —; Separation of. P. Wenger and J. Morel, 342.
- Sodium Chloride**: Soap; Estimation of — in. H. C. Bennett, 467.
- Sodium Ferric Lactate**: Lactic acid as —; Separation and detection of. K. A. Hoffmann, 296.
- Sodium Hypobromite Solution**: Copper sulphate; Catalytic decomposition of alkaline — by. P. Fleury, 23.
- Sodium Hyposulphite**: —; Estimation of. J. H. Smith, 473.
- Sodium Perborate**: —; Constitution of. F. Foerster, 385.
- Sodium Peroxide Fusions**: Apparatus for —. H. J. Hodsman, 260.
- Sodium Persulphate**: Analysis; Use of — in. L. Débourdeaux, 516.
- Sodium**: Potassium and — in presence of magnesium; Micro-Chemical identification of. E. Ludwig and H. Spirescu, 112.
- Sodium**: Potassium in presence of —, magnesium, sulphates and phosphates; Estimation of. H. Atkinson, 354.
- Sodium Salicylate**: Aluminium and manganese; — as reagent for detecting. C. Van Zijp, 300.
- Sodium**: Serum; Estimation of — in small volumes of. B. Kramer and F. F. Tisdall, 294.
- Sodium Thiosulphate**: Fulminate of mercury with —; Notes on the reactions of. F. H. Dupré and P. V. Dupré, 42.
- Soil Extract**: Soil solution to the —; Relation of. D. R. Hoagland, J. C. Martin and G. R. Stewart, 109.
- Soil**: Organic matter and organic carbon in —; Rapid combustion method for the estimation of. J. W. Read, 295.
- Soil Reaction**: —; Studies on. E. A. Fisher, 149.
- Soil Solution**: Soil extract; Relation of — to the. D. R. Hoagland, J. C. Martin and G. R. Stewart, 109.
- Soil Toxicity, Acidity, and Basicity**: Measuring —; Method of. R. H. Carr, 511.
- Soils**: Carbonates in certain —; Investigation into the occurrence of different kinds of. F. Hardy, 148.
- Soils**: Clay in heavy —; Estimation of. A. F. Joseph and F. J. Martin, 463.
- Soils**: Colloidal matter in —; Methods of estimating the amount of. C. J. Moore, W. H. Fry, and H. E. Middleton, 379.
- Solid Fatty Acids**: Lead acetate in alcoholic solution; Precipitation of — with. E. Twitchell, 466.
- Solid**: Lubricants. 161.
- Solubility**: Crystalline substances in rubber; — of. G. Bruni, 211.
- Soluble Phosphates**: Phosphoric acid and —; The United States Pharmacopoeia method for the estimation of. A. E. Stearn, H. V. Farr, and N. P. Knowlton, 200.

- Solution and Turbidity-Temperature** : Hydrocarbons, etc.; Critical temperature of — of. N. Chercheffsky, 162.
- Solutions** : Amylase —; Characterisation of. H. v. Euler and O. Svanberg, 419.
- Solutions** : Cellulose ester —; Viscosity of. M. Deschiens, 19.
- Solutions** : Fluoresceïn in very dilute —; Detection of. M. Lombard, 337.
- Souring** : *Bacillus Megatherium*; — of beef caused by. H. Bunyea, 461.
- South Africa** : Spearmint from —; Essential oil of. 201.
- South American Oilseeds** : Study of —; A further contribution to the. G. T. Bray and H. T. Islip, 325.
- Soxhlet** : Apparatus. L. Soep, 163.
- Soxhlet Apparatus** : —; Improved. O. Hagen, 164.
- Soya-Bean** : Oil. C. R. Fellers, 458.
- Soya-Bean Oil** : Linseed oil and — on the estimation of these oils by means of the hexabromide and iodine values; Effect of variation in the analytical constants of. E. A. Tschudy, 513.
- Soya-Bean Oil** : —; Identification of. C. A. Newhall, 94.
- Spanish Oil of Thyme** : Thymol; Estimation of : —. H. Mastbaum, 140.
- Spearmint** : South Africa; Essential oil of — from. 201.
- Specific Gravity** : Glycerol; Need of a new table for — and percentage of. L. W. Bosart, 513.
- Specific Test** : Phenol; New — for. G. Rodillon, 157.
- Spectrometric Examination** : Certain fixed oils as a means of identification; The — of. H. C. T. Gardner, 356.
- Spectrum Analysis** : Roentgen rays; — by means of. M. Siegbahn, A. E. Lindh, and N. Stensson, 303.
- Sperm** : Individual blood and —; Diagnosis of. Dervieux, 336.
- Sperm Whale** : Head oil of the —; Composition of the. M. Tsujimoto, 197.
- Spirits** : Liqueurs and —; Detection of methyl alcohol in. L. Hoton, 53.
- Spirits** : Methyl alcohol and ethyl alcohol in —, medicines, cosmetics, etc., by means of the Zeiss immersion refractometer; Estimation of. W. Lange and G. Reif, 369.
- Spirits** : Sulphur in petroleum —; Lamp method of estimating. J. S. Jackson and A. W. Richardson, 156.
- Spores** : Mould —; Formation of gum levan by. N. and L. Kopeloff and C. J. Welcome, 15.
- Spot Reactions** : Qualitative analysis; Use of — in. F. Feigl and R. Stern, 212.
- Sprouts** : Potatoes; Composition of tubers, skins, and — of three varieties of. F. C. Cook, 203.
- Squill** : Rat poison; Liquid extract of red — (*Scilla maritima*) as a. F. W. Smith, 178.
- Stability** : Nitroglycerin explosives; Quantitative test of the — towards heat of. M. Taliani, 377.
- Stain** : Bacterial —; Rose Bengal as a general. H. J. Conn, 461.
- Standard Alkali** : Guanidine carbonate as a —. A. H. Dodd, 250.
- Standard Alkali Solutions** : Carbonate; Preparation of — free from. I. M. Kolthoff, 516.
- Standard** : Goldenseal (*Hydrastis*) root; Proposed — for. 143.
- Standard** : Hydriodic acid and its use as a — in oxidimetry; Electrometric titration of. W. S. Hendrixson, 211.
- Standard Steels** : British Chemical —; New (Analytically standardised turnings). 347.

- Standardisation:** Commercial caseins; — of the borax solubility test for. H. F. Zoller, 108.
- Standards:** Chemical — ; New. (Analytically standardised samples.) 477.
- Standards:** Podophyllum ash —. E. L. Newcombe, C. H. Rogers and C. W. Folkstad, 374.
- Stannic Chloride:** Anhydrous —; Preparation of. C. Van Loon, 110.
- Stannic Chloride:** Petroleum and petroleum distillates; Action of anhydrous — on. G. Torossian, 513.
- Starch and Dextrin Pastes:** —; Consistence of. W. H. Herschel and C. Bergquist, 468.
- Starch:** Taka-diastrase; Estimation of — by means of. E. Horton, 456.
- Starch:** Dextrose and —; Estimation of. F. A. Quisumbing, 58.
- Statutory Rules and Orders, 1921, No. 1305: Food Control.** The Sale of Food Order, 1921, Dated August 16, 1921, Made by the Board of Trade under the Ministry of Food (Continuance) Act, 1920 (10 and 11 Geo. V., c. 47, and the Ministry of Food (Cessation) Order, 1921. 426.
- Steam Distillation:** Apparatus for —; New. E. A. Roff, 386.
- Steel:** Chromium in —; Detection and estimation of. A. Ferni and P. Malaguti, 66.
- Steel:** Phosphorus from the other components of —; Separation of the. R. Ariano, 212.
- Steels:** Chromium in —; A new process for the estimation of small quantities of. B. S. Evans, 38.
- Steels:** Chromium in —; The estimation of small amounts of (Notes). B. S. Evans, 285.
- Steels:** Cobalt and nickel in cobalt —; Estimation of. G. E. F. Lundell and J. I. Hoffmann, 384.
- Steels:** Standard —; New British Chemical (Analytically standardised turnings). 347.
- Steels:** Vanadium in — and iron alloys; Estimation of. L. Rolla and M. Nuti, 422.
- Sterilising Agent:** Flour; Hydrocyanic acid as a — for. Marchadier and Goujon, 287.
- Sterols:** Iodine value; — and the. (Report of the Food Investigation Board for the Year 1920.) 453.
- Stillheads:** Contact-ring —; Fractional distillation with. R. Lessing, 386.
- Stovaine:** Atropine, cocaine, and —; Reaction of benzoic acid and its application to the detection of. M. Guerbet, 11.
- Streptococci:** Haemolytic — in water; Vitality and viability of. G. S. Livingston, 247.
- Streptococci:** Milk and from human lesions; Haemolytic — from. R. C. Salter, 248.
- Streptococcus:** Milk, Viscous lactic — in. H. Violle, 409.
- Streptococcus:** Ropiness in milk; A — which produces. H. Violle, 248.
- Strophanthin:** Ouabain and —; Identification of. A. Richaud, 459.
- Strychnine:** Scale preparations containing quinine and other cinchona alkaloids; The estimation of — in. T. F. Harvey and S. Back, 188.
- Substances:** Boiling-point of minute quantities of —; Determination of. V. Arreguine, 218.
- Substances:** Hydrolysed caseinogen; — precipitated by mercuric sulphate from, and the isolation of tryptophane. H. Onslow, 504.

- Substances**: Oxidation of organic —; Syntheses of cyanic acid by. New methods of analysis of this substance. R. Fosse, 207.
- Substances**: Rain and snow; — dissolved in. W. A. Moore and G. Browning, 104.
- Substances**: Total sulphurous acid in organic —; Volumetric method for the estimation of. V. Froboese, 205.
- Sucrose**: Dextrose, laevulose, — and dextrin in admixture; Estimation of. A. Behre, 368.
- Sucrose**: Mixtures of — and raffinose; Revision of the optical method for analysing. C. A. Browne and C. A. Gamble, 456.
- Sugar Analysis**: Potassium thiocyanate and potassium iodide; Estimation of copper in — by means of. G. Bruhns, 23.
- Sugar**: Blood; Estimation of — in. E. Ponder and L. Howie, 293.
- Sugar**: Calculations. J. F. Liverseege, 446.
- Sugar-cane Juices**: Reducing sugars in lead-preserved —; Estimation of. J. B. Harris, 499.
- Sugar**: Cane —; Inversion and estimation of. A. R. Rose, 288.
- Sugar Crystals**: Projection; Examination of — by. G. P. Meade, 456.
- Sugar**: Dextrose, invert —, and laevulose by the thiocyanate-potassium iodide method; Table for the estimation of. G. Bruhns, 330.
- Sugar**: Normal urine; Estimation of — in. S. R. Benedict and E. Osterberg, 508.
- Sugar**: Urine; Dinitrosalicylic acid as a reagent for the estimation of — in. J. B. Sumner, 413.
- Sugar**: Wine; Estimation of — in. W. Fresenius and L. Grünhut, 136.
- Sugars**: Boric acid and borate solutions, with some analytical applications; Reactions of — and polyatomic alcohols in. G. Van B. Gilmour, 3.
- Sugars**: Maltose and lactose in the presence of other reducing — by Barfoed's reagent; Estimation of. L. Le Grand, 406.
- Sugars**: Maltose or lactose in presence of other reducing —; Estimation of: Use of Barfoed's solution. Legrand, 198.
- Sugars**: Reducing — in blood and pathological fluids; Volumetric method of estimating. A. Jonescu and V. Vargolici, 101.
- Sugars**: Reducing — in blood; Estimation of. O. Guillaumin, 14.
- Sugars**: Reducing — in lead-preserved sugar-cane juices; Estimation of. J. B. Harris, 499.
- Sugars**: Reducing —; New method for the volumetric estimation of. A. Jonescu and V. Vargolici, 405.
- Sugars**: Rotatory powers of certain —; Influence of ammonium molybdate on the. G. Tanret, 330.
- Sulphate**: Sulphide, —, and organic sulphur in coal; Estimation of. A. R. Powell, 514.
- Sulphates**: Potassium in presence of sodium, magnesium, — and phosphates; Estimation of. H. Atkinson, 354.
- Sulphide**: Coal; Estimation of —, sulphate, and organic sulphur in. A. R. Powell, 514.
- Sulphide Waters**: Mineral —; Analysis of. J. G. Fairchild, 205.
- Sulphides**: Metals as —; Estimation of. L. Moser and A. Schattner, 421.
- Sulphites**: Presence of —; A routine test for the (Notes). A. E. Parkes, 402.
- Sulphur Burner Gases**: Sulphur dioxide and sulphur trioxide in —; Estimation of. R. Dieckmann, 517.
- Sulphur**: Commercial salvarsan; Derivatives of — in. H. King, 407, 459.

- Sulphur Dioxide and Trioxide**: Sulphur burner gases; Estimation of — in. R. Dieckmann, 517.
- Sulphur Monochloride**: Mustard gas mixtures; Determination of — in. W. A. Felsing, S. B. Arenson, and F. J. Kopp, 20.
- Sulphur**: Petroleum spirits; Lamp method of estimating — in. J. S. Jackson and A. W. Richardson, 156.
- Sulphur**: Sulphide, sulphate, and organic — in coal; Estimation of. A. R. Powell, 514.
- Sulphuric Acid Concentrator**: Vacuum pump; — and. O. Naass, 68.
- Sulphuric Acid**: Formaldehyde with resorcinol and —; New test for. R. Cohn, 502.
- Sulphuric Acid**: Phosphoric acid instead of — in melting-point determinations; Use of. A. Graustein, 161.
- Sulphuric Acid**: Phosphoric acid on heating with — or fusion with pyrosulphate; Loss of. W. F. Hillebrand and G. E. F. Lundell, 67.
- Sulphuric Acid**: Volumetric estimation of —. C. Pezzi, 256.
- Sulphuric Acid**: Water; Estimation of — in. L. W. Winkler, 148.
- Sulphurous Acid**: Organic substances; Volumetric method for the estimation of total — in. V. Froboese, 205.
- Superphosphates**: Citrate-soluble phosphoric acid in —; Estimation of. Official method of the German Agricultural Experiment Station. 295.
- Suprarenal Preparations**: Adrenaline and —; Necessity for the physiological control of. M. Tiffeneau, 291.
- Surface Tension**: Rise in capillary tubes; Determination of — from the. S. Sugden, 523.
- Sweet Fennel**: Oil. C. E. Sage, 458.
- Sweet Potatoes**: Tins; Discoloration of — in. E. F. Kohman, 404.
- Sweet Spirit of Nitre**: Ethyl nitrite from —; Volatilisation of. J. G. Roberts, 334.
- Symbols**: Physico-Chemical —; International. 121.
- Synthetic**: Fats. (Report of the Food Investigation Board for the Year 1920.) 453.
- Table**: New — for specific gravity and percentage of glycerol; Need of a. L. W. Bosart, 513.
- Tables**: Constants and Numerical Data; Annual — of: Chemical, Physical, and Technological. 388.
- Tablets**: Formaldehyde and paraformaldehyde in —; Estimation of. N. Evers and C. M. Caines, 374.
- “Taifushi”**: Oil. S. Keimatsu, 52.
- Taka-Diastase**: Starch by means of —; Estimation of. E. Horton, 456.
- Tannin**: Hops; Polarimetric estimation of — in. A. R. Ling and D. R. Namji, 332.
- Tap**: Metal-Glass —. W. E. Garner, 68.
- Tar**: Coal; Apparatus for estimating the yield of — from. H. Schrader, 340.
- Tar Oils**: Coal — in turpentine; Detection and estimation of. V. E. Grotlich and W. C. Smith, 469.
- Tartaric Acid**: Wines; Detection of — in. L. Mathieu, 370, 457.
- Tartaric, and Formic Acids**: Oxalic, — in presence of each other; Detetion of. F. Kräuss and H. Tampke, 296.
- Tea**: Caffeine in — and coffee; Estimation of. R. E. Andrew and E. M. Bailey, 405.

- Tea-seed Oil** : Olive oil; Detection of — in. J. Dybowski and E. Millia, 458.
- Temperature** : Absolute viscosity of oils and other liquids; — as a function of the. H. Schwedhelm, 161.
- Temperature** : Solution and turbidity- — of hydrocarbons, etc.; Critical — of. N. Chercheffsky, 162.
- Temperatures** : Oils at low —; Apparatus for determining the fluidity of. 69.
- Temperatures** : Volatile matter yielded by coals up to various —; New method for estimating the. W. A. Bone and L. Silver, 415.
- Tempering** : Changes produced in wheat by —. E. L. Tague, 139.
- Tension** : Capillary tubes; Determination of surface — from the rise in. S. Sugden, 523.
- Tertiary Alkamines** : Volatile alkamines in the presence of ammonia and of — in the presence of primary and secondary alkamines; Detection of. H. E. Woodward and C. L. Alsberg, 256.
- Tetrabromide** : Elaeostearic acid — from tung oil with ordinary linolic acid —; Non-Identity of. B. H. Nicolet, 251.
- Textiles** : Permeability and heat-insulating capacity of —; Laboratory apparatus for measuring the. G. Colombo, 68.
- Thalioquin Reaction** : —; Origin, development, and value of the. W. B. Hart, 253.
- Thallium** : Mercury and —; Compounds of halogenated derivatives of. [Separation of mercury from —.] J. Barlot and J. Pernot, 421.
- Thallium** : Thallous ferricyanide. Estimation of —. V. Cuttica and G. Canneri, 254.
- Thallous Ferricyanide** : —. Estimation of thallium. V. Cuttica and G. Canneri, 254.
- Theobromine** : Caffeine; Identification of — and. M. Malmy, 143.
- Theobromine** : Cocoa and its products; The estimation of — in. R. V. Wadsworth, 32.
- Therapeutic Novarsenicals** : —; Elimination and fixation of. Kohn-Abrest, Sicard, and Paraf, 147.
- Therapeutic Substances** : Ministry of Health. Report of the Departmental Committee on the control of certain —, 1921 (Cmd. 1156). 227.
- Thiocyanate-Potassium Iodide Method** : Dextrose, invert sugar, and laevulose by the —; Table for the estimation of. G. Bruhns, 330.
- Thiocyanates** : Salts precipitated by silver nitrate; Estimation of — in the presence of. A. Dubosc, 522.
- Thyme** : Thymol; Estimation of; Spanish oil of —. H. Mastbaum, 140.
- Thymol** : Alkaline solutions; Extraction of — and carvacrol from. D. C. L. Sherk, 140.
- Thymol** : —; Estimation of: Spanish oil of Thyme. H. Mastbaum, 140.
- Thymol** : Volatile oil of *Mosla japonica*; Estimation of — in the. T. Kariyone and K. Atsumi, 140.
- Time Factor** : Saponification; The — in. P. J. Fryer, 87.
- Tin** : Antimony; Quantitative separation of — and. M. Mouret and M. J. Barlot, 422.
- Tin** : Hydrogen sulphide; Separation of — and antimony in hydrochloric acid solution by means of. G. Luff, 213.
- Tin** : Silicon, —, titanium, and zirconium by means of sodium carbonate; Separation of. P. Wenger and J. Morel, 342.
- Tincture** : Aconitine in some samples of — of aconite leaves; Content of. A. Richaud, 97.

- Tissue Fats**: Cholesterol in —; Source of error in the colorimetric estimation of. J. A. Gardner and F. W. Fox, 508.
- Tissues**: Chlorine in —; Estimation of. R. D. Bell and E. A. Doisy, 146.
- Tissues**: Iodine in blood and animal —; Estimation of. E. C. Kendall and F. S. Richardson, 13.
- Tissues**: Microscopical preparations of vegetable and animal —; New technique for. Larbaud, 303.
- Tissues**: Vitamine in glandular and other —; Quantitative method for the determination of vitamine in connection with determinations of. F. K. Swoboda, 17.
- Titanium**: rocks; Estimation of — and iron in. F. Ferrari, 66.
- Titanium**: Silicon, tin, —, and zirconium by means of sodium carbonate; Separation of. P. Wenger and J. Morel, 342.
- Titanium Trichloride**: Aromatic nitro compounds by means of —; Analysis of. F. L. English, 19.
- Titanium Trichloride**: Nitrates in bismuth salts by means of — and Devarda's alloy; Estimation of. T. McLachlan, 383.
- Titanous Salts**: Iron by means of —; Volumetric determination of. W. M. Thornton, Junr., and J. E. Chapman, 159.
- Titration**: —; Conductimetric. J. M. Kolthoff, 63.
- Titrimetric Determination**: Acetone; — of minute amounts of. R. S. Hubbard, 18.
- Toxicity**: Soil —, acidity, and basicity; Method of measuring. R. H. Carr, 511.
- Toxicity**: Wood-destroying fungi; — of various fractions and combinations of fractions of coal tar creosote to. H. Schmitz and S. M. Zeller, 409.
- Toxicity**: Wood preservatives; — of. C. J. Humphrey, R. M. Flemming, and E. Bateman, 410.
- Toxicological Analysis**: Ptomaines and alkaloids in —; Separation of. A. Jonescu, 102.
- Toxicological Detection**: Poisons containing bromine; — of. A. Damiens, 14.
- Transformer Oils**: Water in —; Estimation of. E. Rengade and J. Clostre, 417.
- Tryptophane**: Blood-serum and milk; Estimation of — in. O. Fürth and E. Nobel, 293.
- Tryptophane**: Hydrolysed caseinogen; Substances precipitated by mercuric sulphate from, and the isolation of —. H. Onslow, 504.
- Tryptophane**: —; Colorimetric estimation of. O. Fürth and F. Lieben, 100.
- Tube**: Electrical heating; Arsenic reduction — with. K. Zwicknagl, 260.
- Tubers**: Potatoes; Composition of —, skins, and sprouts of three varieties of. F. C. Cook, 203.
- Tung Oil**: Elaeostearic acid tetrabromide from — with ordinary linolic acid tetrabromide; Non-Identity of. B. H. Nicolet, 251.
- Tungsten**: —; Estimation of. G. Fiorentino, 214.
- Tunisian Palm Wine**: South —; Analysis of. A. M. d'Aymeric, 243.
- Turbidity-Temperature**: Hydrocarbons, etc.; Critical temperature of solution and — of. N. Chercheffsky, 162.
- Turkey-Red Oil**: Fatty acids in —; Estimation of. 339.
- Turner Reaction**: Gurjun balsam; The — for. J. B. Luther, 332.
- Turpentine**: Coal tar oils in —; Detection and estimation of. V. E. Grotlich and W. C. Smith, 469.
- Turpentine**: French oil of —; Composition of. M. Vèzes, 252.
- Turpentine**: Oil of —; Estimation of. H. Salvaterra, 155.

**Turpentine** : —; American. 206.

**Udder** : Milk in relation to the presence of blood-cells and of specific bacterial infections of the —; Reaction of. J. C. Baker and R. S. Breed, 16.

**Underground Water** : Tracing —; Fluorescein as an aid to. H. Stabler, 511.

**U.S.A. Service and Regulatory Announcements** : Egg substitute; Misbranding of. 455.

**United States** : Department of Agriculture. Food Inspection Decision 182. 497.

**United States Pharmacopoeia Method** : Phosphoric acid and soluble phosphates; The — for the estimation of. A. E. Stearn, H. V. Farr, and N. P. Knowlton, 200.

**Unsaturated Fatty Acids** : Fish oils; New method for the separation of highly — in. M. Tsujimoto, 57.

**Uranium** : —, vanadium, and chromium when present together; Qualitative separation and detection of. P. E. Browning, 158.

**Urea** : Dicyanodiamide and of — in fertilisers; Estimation of. E. Johnson, 380

**Urea** : Fertilisers; Estimation of — in. E. B. Johnson, 338.

**Urea** : Sera and secretions; Estimation of — in. W. Mestrezat and M. P. Janet, 16.

**Urea** : —, ammonia, and amino-acids in urine after precipitation of the ammonia; Estimation of. M. J. Philibert, 378.

**Urea** : Urine; Gasometric estimation of — in. R. L. Stehle, 412.

**Urine** : Albumin in —; Gravimetric estimation of. G. Pegurier, 17.

**Urine** : Alkalimetric titration; Estimation of inorganic phosphate in — by. C. H. Fiske, 294.

**Urine** : Amino-acids in —; Estimation of. W. Mestrézal, 204.

**Urine** : Ammonia from —; Removal of. G. E. Youngberg, 146.

**Urine Analysis** : Reagent in —; Zinc-potassium ferrocyanide as a. Thiéry, 412.

**Urine** : Hippuric acid in —; Rapid method for the estimation of. F. B. Kingsbury and W. W. Swanson, 509.

**Urine** : Phosphorus in — and blood; Colorimetric methods for estimation of. R. D. Bell and E. A. Doisy, 13.

**Urine** : Reagent for the estimation of sugar in —; Dinitrosalicylic acid as a. J. B. Sumner, 413.

**Urine** : Sugar in normal —; Estimation of. S. R. Benedict and E. Osterberg, 508.

**Urine** : Total nitrogen in — by the Dumas and Kjeldahl methods; Estimation of. W. Mestrezat and M. P. Janet, 17.

**Urine** : Urea, ammonia, and amino-acids in — after precipitation of the ammonia; Estimation of. M. J. Philibert, 378.

**Urine** : Urea in —; Gasometric estimation of. R. L. Stehle, 412.

**Vacuum Pump** : Sulphuric acid concentrator and —. O. Maass, 68.

**Vacuum Pumps** : Water —; Check valve for. E. A. Andelin, 303.

**Valerian** : Alkaloids of —. A. Goris and C. Vischniac, 244.

**Valve** : Water vacuum pumps; Check — for. E. A. Andelin, 303.

**Vanadium** : Ferrovandium by electrometric titration; Estimation of — and chromium in. G. L. Kelley, J. A. Wiley, R. T. Bohn, and W. C. Wright, 519.

**Vanadium** : Ores and metallurgical products; Estimation of — in. R. B. Schaal, 472.

**Vanadium** : Steels and iron alloys; Estimation of — in. L. Rolla and M. Nuti, 422.

- Vanadium**: Uranium, —, and chromium when present together; Qualitative separation and detection of. P. E. Browning, 158.
- Vanilla Extracts**: Lead number estimation in —; New. H. J. Wichmann, 333.
- Vanilla**: Paste. 407.
- Vanillin**: Wood and —; Reagent for. J. Grüs, 253.
- Vapour Density Apparatus**: Victor Meyer's —; Modification of. T. S. Patterson, 113.
- Varnishes**: Resins used for making —; Characters of. P. Nicolardot and C. Coffignier, 208.
- Vegetable and Animal Tissues**: Microscopical preparations of —; New technique for. Larbaud, 303.
- Vegetable Fibres**: —; Digestion of. W. Thomann, 203.
- Vegetable Foods**: Carbohydrates in —; Estimation of. V. C. Myers and H. M. Croll, 287.
- Vegetable Kingdom**: Manganese throughout the —; Occurrence of. G. Bertrand and M. Rosenblatt, 409.
- Vegetable Organisms**: Lower —; Growth-promoting factors in. P. Goy, 99.
- Vegetables**: Carbohydrate in thrice-boiled —; Available. L. O'Reilly and E. H. McCabe, 242.
- Veronal**: —; Estimation of. L. Van Itallie and A. J. Steenhauer, 413.
- Vertebrate Animals**: Zinc content of —; Variation in the. G. Bertrand and R. Vladesco, 244.
- Vetch Seeds**: Lathyrism or poisoning caused by —. M. Mirande, 291.
- Victor Meyer's Vapour Density Apparatus**: —; Modification of. T. S. Patterson, 113.
- Vinegar**: Orange —; Its manufacture and composition. H. D. Poore, 95.
- Viscosimeter**: Cup and ball —; Michell's. T. C. Thomsen, 114.
- Viscosity**: Cellulose ester solutions; — of. M. Deschiens, 19.
- Viscosity**: Oils and other liquids; Temperature as a function of the absolute — of. H. Schwedhelm, 161.
- Vitamin A.**: Milk and butter as sources of —; Factors influencing the value of. J. C. Drummond, K. H. Coward and A. F. Watson, 506.
- Vitamin**: Anti-scorbutic —; Effect of heat and oxidation upon the. R. A. Dutcher, H. M. Harshaw, and J. S. Hall, 411.
- Vitamin-B.**: Measure of —; Yeast test as a. W. H. Eddy, H. L. Heft, H. C. Stevenson, and R. Johnson, 410.
- Vitamin-B.**: Water-soluble —; The "Bachman test" for. W. H. Eddy and H. C. Stevenson, 507.
- Vitamin Content**: Peas in relation to their pigmentation; Fat-Soluble — of. H. Steenbock, M. T. Sell, and P. W. Boutwell, 411.
- Vitamin**: Yellow plant pigments from the fat-soluble —; Differentiation of. M. Stephenson, 246.
- Vitamine**: Glandular and other tissues; Quantitative method for the determination of — in connection with determinations of — in. F. K. Swoboda, 17.
- Vitamins**: Bacterial growth; Supposed importance of — in promoting. J. W. McLeod and G. A. Wyon, 505.
- Vitamins**: Food supply; — and the. A. Harden, 201.
- Vitamins**: —; Differential dialysis of. S. S. Zilva and M. Miura, 506.
- Vitamins**: Yeast growth; — and. R. J. Williams, 246.
- Vitamins**: Yeast; Nutritional requirements of. I. Rôle of — in the growth of yeast. E. I. Fulmer, V. E. Nelson, and F. F. Sherwood, 146.

- Volatile Acids**: Adulteration in butter by means of the melting-point of the insoluble —; The detection of. G. Van B. Gilmour, 183.
- Volatile Alkamines**: Ammonia; Detection of — in the presence of, and of tertiary alkamines in the presence of primary and secondary alkamines. H. E. Woodward and C. L. Alsberg, 256.
- Volatile Matter**: Coals up to various temperatures; New method for estimating the — yielded by. W. A. Bone and L. Silver, 416.
- Volatile Matter**: Graphite; Estimation of — in. O. L. Shinn, 416.
- Volatile Oil**: *Ocimum gratissimum*, Linn.; — from the leaves of. O. D. Roberts, 372.
- Volatile Oil**: "Wild pimento" of Jamaica; — from the leaves of the. O. D. Roberts, 289.
- Volumetric Work**: Zinc and cadmium in —; Reductions with. W. D. Treadwell, 342.
- Vulcanised Rubber Articles**: Micro-sections cut from —. H. A. Depew and I. R. Ruby, 108.
- Waste Acids**: Nitrous acid in mixed and —; Estimation of. H. Toussaint, 217.
- Water**: Active carbon dioxide in —; Estimation of. I. M. Kolthoff, 249.
- Water Analysis: Abstracts**: 103, 148, 205, 249, 337, 379, 511.
- Water**: Bacteriological content of —; Influence of minute quantities of metallic salts on the. E. L. Atkinson and R. C. Frederick, 247.
- Water**: Denitrifying bacteria in —; The effect of. K. Scheringa, 205.
- Water**: Ether, alcohol, and —; Analysis of liquid and gaseous mixtures of. I. Masson and T. L. McEwan, 250.
- Water Extracts**: Wheat flour; Electrical conductivity of — of. C. H. Bailey and F. A. Collatz, 242.
- Water**: Fats and oils; Estimation of — in. H. Oertel, 12.
- Water**: Gasoline and in certain other substances; Calcium chloride method for the estimation of — in. C. W. Clifford, 417.
- Water**: Haemolytic Streptococci in —; Vitality and viability of. G. S. Livingston, 247.
- Water**: Hardness of —; Estimation of the. G. Bruhns, 337.
- Water**: Hardness of —; Soap solution for use in estimating. A. Krieger, 337.
- Water**: Hydrogen ion concentration in the examination of drinking —; Estimation and significance of the. I. M. Kolthoff, 249.
- Water**: Hydrogen-ion concentration in —; Colorimetric method for the estimation of. I. M. Kolthoff, 379.
- Water**: Indican as a criterion of the purity of —; Detection of. A. Jolles, 103.
- Water**: Lead; Notes on the so-called action of — on. J. C. Thresh, 270.
- Water**: Nitrite in —; Estimation of. P. A. Meerburg, 65.
- Water**: Phenols in —; Detection of. R. D. Scott, 337.
- Water**: Phosphates in —; Estimation of. D. Florentin, 511.
- Water Pumps**: Non-return arrangement for. H. Dorsch, 163.
- Water-Soluble Vitamin B.**: "Bachman test" for —; The. W. H. Eddy and H. C. Stevenson, 507.
- Water**: Sulphuric acid in —; Estimation of. L. W. Winkler, 148.
- Water**: Transformer oils; Estimation of — in. E. Rengade and J. Clostre, 417.
- Water**: Underground —; Fluorescein as an aid to tracing. H. Stabler, 511.
- Water Vacuum Pumps**: Check valve for —. E. A. Andelin, 303.
- Waters**: Bromine in saline —; Estimation of. P. Lebeau and M. Picon, 423.
- Waters**: Harrogate mineral —; Composition of the. W. Lowson, 125.

- Waters:** Hydrogen sulphide in — at great depths; Occurrence of. O. Luning, 148.
- Waters:** Mineral sulphide —; Analysis of. J. G. Fairchild, 205.
- Waters:** Peaty —; Lead in (Notes). T. Tickle, 240.
- Weights:** Molecular —; Application of the law of hydrolysis to the determination of. H. Colin and A. Chaudun, 153.
- Weights:** "Wet" and "dry" — of damp material; Slide rule for calculation of. R. Scott, 303.
- "Wet" and "Dry" Weights:** Damp material; Slide rule for calculation of — of. R. Scott, 303.
- Whale:** Head oil of the sperm —; Composition of the. M. Tsujimoto, 197.
- Wheat Berry:** Enzymes and proteins in the endosperm of the —; Distribution of. F. J. Martin, 56.
- Wheat Flour:** Water extracts of —; Electrical conductivity of. C. H. Bailey and F. A. Collatz, 242.
- Wheat:** Protein content of —; Relation of hardness to. H. F. Roberts, 414.
- Wheat:** Tempering; Changes produced in — by. E. L. Tague, 139.
- Whey:** Indicators to determine the reaction of —; Use of. Y. Okuda and H. F. Zoller, 368.
- White-of-Egg:** Calcium content of —. H. Kreis and J. Studinger, 372, 498.
- "Wild Pimento":** Leaves of the — of Jamaica; Volatile oil from the. O. D. Roberts, 289.
- Willows:** British Columbian — and poplars; Salicin content of. R. H. Clark and K. B. Gillie, 502.
- Wine:** Glycerol in — by conversion into acrolein; Estimation of. A. Heiduschka and F. Englert, 332.
- Wine:** Palm —; Analysis of South Tunisian. A. M. d'Aymeric, 243.
- Wine:** Saccharin in —; Detection of. C. von der Heide and W. Lohmann, 370.
- Wine:** Saccharin in —; Detection of. W. Fresenius and L. Grünhut, 501.
- Wine:** Sugar in —; Estimation of. W. Fresenius and L. Grünhut, 136.
- Wines:** Iron in organic liquids, especially in —; Estimation of small quantities of. Malvezin and C. Rivilland, 206.
- Wines:** Tartaric acid in —; Detection of. L. Mathieu, 370, 457.
- Wood:** Apple —; Hemicellulose of. W. E. Tottingham, R. H. Roberts, and S. Lepkousky, 204.
- Wood Cellulose:** —; Examination of. F. Lenze, B. Pleus, and J. Müller, 106.
- Wood:** Chemical reagents on the microstructure of —; Effects of. A. Abrams, 468.
- Wood-Destroying Fungi:** Coal tar creosote to —; Toxicity of various fractions and combinations of fractions of. H. Schmitz and S. M. Zeller, 409.
- Wood Preservatives:** Toxicity of —. C. J. Humphrey, R. M. Fleming, and E. Bateman, 410.
- Wood:** Vanillin; Reagent for — and. J. Grös, 253.
- Wool:** Cotton and —; Analysis of fabrics composed of a mixture of. Duyk, 20.
- Wool Waste:** — or refuse; Analysis of. A. Demolon, 420.
- Wormseeds:** Santonin in —; Estimation of. T. Kariyone and Y. Kimura, 200.
- Yacca:** Gum. 54.
- Yeast Growth:** Vitamins and —. R. J. Williams, 246.
- Yeast:** Living and dead —; Action of methylene blue and other dyes on. C. G. Fraser, 247.

- Yeast**: Substance from — and rice polishings which accelerates fermentation; Estimation of a. S. Fränkel and E. Schwarz, 202.
- Yeast Test**: Vitamin-B; — as a measure of. W. H. Eddy, H. L. Heft, H. C. Stevenson, and R. Johnson, 410.
- Yeast**: —; Nutritional requirements of. I. Rôle of vitamins in the growth of —. E. I. Fulmer, V. E. Nelson and F. F. Sherwood, 146.
- Yellow Plant Pigments**: Fat-soluble vitamin; Differentiation of — from the. M. Stephenson, 246.
- Yohimba Bark**: Yohimbine in —; Estimation of. A. Schomer, 373.
- Yohimbine**: Yohimba bark; Estimation of — in. A. Schomer, 373.
- Zeiss Butyro-Refractometer**: — setting of scale (Notes). J. F. Liverseege and W. Singleton, 93.
- Zeiss Immersion Refractometer**: Methyl alcohol and ethyl alcohol in spirits, medicines, cosmetics, etc., by means of the —; Estimation of. W. Lange and G. Reif, 369.
- Zinc**: Ammonium — phosphate; Estimation of — as. G. Luff, 383.
- Zinc Content**: Vertebrate animals; Variation in the — of. G. Bertrand and R. Vladesco, 244.
- Zinc**: Ferrocyanide method; Estimation of — by the. E. Olivier, 299.
- Zinc**: Gallium from indium and — by fractional crystallisation of the caesium gallium alum; Separation of. P. E. Browning and L. E. Porter, 158.
- Zinc-Potassium Ferrocyanide**: Urine analysis; — as a reagent in. Thiéry, 412.
- Zinc**: Small quantities of —; Estimation of. M. Bodansky, 518.
- Zinc Purpurate**: Mercury salts; — as a reagent for. G. Denigès, 421.
- Zinc**: Volumetric work; Reductions with — and cadmium in. W. D. Treadwell, 342.
- Zinc**: —; Volumetric estimation of. I. M. Kolthoff and J. C. Van Dijk, 299.
