

INDEX TO VOLUME XLVIII.

INDEX TO NAMES.

A

- Abbott, R. C.** Apparatus for delivering concentrated sulphuric acid and sodium hydroxide solutions, 407.
- Adair, G. S.** See Stoddard, J. L., and Adair, G. S.
- Adams, E. T.** See Hammett, F. S., and Adams, E. T.
- Agafonoff, V.** Comparative study of certain methods of estimating humus in soils, 566.
- Agostini, P.** See Mazzetti, C., and Agostini, P.
- Aloy, J., and Valdiguié, A.** New reactions of copper and phenols, 85.
- Anderson, A. E.** See Williams, C. E., and Anderson, A. E.
- Anderson, L.** Coagulation of milk by acid, 494.
- Anderson, R. J., and Moore, M. G.** The phyto-sterols of maize, cottonseed and linseed oils, 556.
- André, E.** Separation of methyl oleate and linolate by fractional distillation, 290.
- Andrew, R. E.** Modified test for phthalates, with particular reference to the detection of diethyl phthalate, 508.
- Andrews, E. R.** See Coste, J. H., and Andrews, E. R.
- Andrews, E. R.** See also Coste, J. H., Andrews, E. R., and Powney, W. E. F.
- Andriska, V.** Estimation of carbon monoxide in air, 625.
- Angeletti, A.** Separation of copper from selenium, 463.
- Annett, H. E.** Influence of papaverine on the optical activity of narcotine in acid solution, 229.
- Annett, H. E., and Bose, M. N.** The estimation of narcotine and papaverine in opium, 53.
- Annett, H. E., and Ram Richhpal Sanghi.** The estimation of codeine, 16.
- Armstrong, E. F.** The title "Chemist," 217.
- Arnaud, F. W. F.** Kent. Report of the County Analyst for the Quarter ended December 31, 1922, 213.
- Artmann, P.** Separation and estimation of zinc as zinc ammonium phosphate, 140.
- Ashton, F. W.** Use of the Bunsen valve in connection with a filter pump, 406.
- Atack, F. W.** The Chemist's Year-book Review, 354.
- Athawale, D. Y.** See Sudborough, J. J., Watson, H. I., and Athawale, D. Y.
- Atkin, W. R., and Gardner, A.** Estimation of temporary hardness in water, 285.
- Atkins, W. R. G.** Hydrogen ion concentration of natural waters (and of some etching reagents), in relation to action on metals, 396.
- Atkinson, E., and Hazleton, E. O.** Qualitative test for tannin, 38.
- Ato, S.** See Wada, I., and Ato, S.
- Auden, H. A.** Starch and Starch Products (Review), 246.
- Averitt, S. D.** Method of analysis for dolomite and magnesian limestone, 92.
- Azadian, A.** Examination of hashish and preparations containing it, 77.
- Azadian, A.** Guava fruit, 74.
- Azadian, A.** Halawa (Oriental nougat), 496.

B

- Bacharach, A. L.** The estimation of lactose by the polarimetric and gravimetric methods, 521.
- Baier, E., and Pfizenmaier, K.** Behaviour of potassium nitrate in minced meat, 451.
- Bailey, E. M., Cannon, H. C., and Fisher, H. J.** Potency of commercial vitamin preparations, 340.
- Baker, J. B.** See Hamilton, T. S., Uyei, N., Baker, J. B., and Grindley, H. S.
- Baly, E. C. C.** See Heilbron, I. M., Baly, E. C. C., and Stewart, A. W.
- Barham, H. N.** See Mack, E., Board, C. E., and Barham, H. N.
- Barker, H. H.** See Baumgarten, C. E., and Barker, H. G.
- Barton, L. E.** Analysis of titanium pigments, 403.
- Baru, R.** See Margosches, B. M., Baru, R., and Wolf, L.
- Baughman, W. F., and Jamieson, G. S.** Composition of Soya bean oil, 126.
- Baughman, W. F.** See Jamieson, G. S., and Baughman, W. F.
- Baumgarten, C. E., and Barker, H. H.** Quantitative estimation of radium by the emanation method, 512.
- Baylis, J. R.** Tungsten wire for hydrogen ion determinations, 512.
- Beal, G. D.** See Brown, J. B., and Beal, G. D.

- Beaver, D. J., and Beaver, J. J.** Control of thermostats, 352.
- Beaver, J. J.** See Beaver, D. J., and Beaver, J. J.
- Becherer, F.** See Rupe, H., and Becherer, F.
- Behre, A., During, A., Ehrecke, H., and Thimme, K.** Composition of mayonnaise, 223.
- Behre, J. A.** Estimation of blood urea, 500.
- Benedict, E. M., and Harrop, G. A.** Estimation of formic acid in urine, 81.
- Benedict, S. R.** Estimation of uric acid, 80.
- Benedict, S. R.** Purification of picric acid for creatinine estimations, 78.
- Benedict, S. R.** See Davis, A. R., Newton, E. B., and Benedict, S. R.
- Bengtsson, N.** Effect of Babassu fodder on butter and lard, 225.
- Berg, L. M. Van Den.** Estimation of santonin in wormseed, 559.
- Berk, K., and Schneider, W.** Meat extracts and their substitutes, 551.
- Bevis, J. F.** Deterioration of edible fats, 607.
- Beyer, O.** Estimation of para-acid (*p*-sulphaminobenzoic acid) in commercial "saccharin," 608.
- Bidwell, J. L., Bopst, L. E., and Bowling, J. D.** Composition of Milo and Feterita (Sorghum) kernels, 125.
- Billiter, O.** Detection of minute quantities of arsenic, 238.
- Billiter, O., and Marfurt, E.,** Normal arsenic content of the human body, 618.
- Birge, E. A., and Juday, C.** The Inland lakes of Wisconsin. The Plankton. I. Its quantity and chemical composition (Review), 151.
- Black, O. F., Kelly, J. W., and Stockberger, W. W.** Examination of a Venezuelan jaborandi, 129.
- Blackie, A.** Apparatus for the measurement of the specific gravity of gases in small quantities, 141.
- Blair, E. W., and Wheeler, T. S.** The estimation of formaldehyde and acetaldehyde, 110.
- Blair, R. W.** Federated Malay States. Annual Report of the Chemical Laboratories, Institute for Medical Research, for the year 1922, 603.
- Blair, R. W.** Federated Malay States. Report for 1921. Chemical Section. Institute for Medical Research, Kuala Lumpur, 66.
- Blanchetière, A.** Estimation of sodium in biochemical work, 456.
- Blankart, A.** Detection of peroxides and persalts, 239.
- Bloxam, C. L.** Chemistry: Inorganic and Organic. Revised by A. G. Bloxam and S. Judd Lewis (Review), 513.
- Blunt, T. P.** Separation of arsenic (Notes), 596.
- Board, C. E.** See Mack, E., Board, C. E., and Barham, H. N.
- Boas, F.** Action of saponin on yeast cells, 35.
- Bogue, R. H.** The Chemistry and Technology of Glue and Gelatin (Review), 300.
- Boismenu, E.** See Moureu, C., and Boismenu, E.
- Bömer, A., and Mattis, H.** High solanin content of potatoes, 454.
- Booker, L. E.** See Myers, V. C., Schmitz, H. W., and Booker, L. E.
- Bopst, L. E.** See Bidwell, J. L., Bopst, L. E., and Bowling, J. D.
- Bordas, J.** Use of artificial resins for polishing coffee, 388.
- Borgstrom, P.** Estimation of formaldehyde in formalin, 608.
- Borgstrom, P., and Horsch, W. G.** Estimation of formaldehyde in paraformaldehyde, 457.
- Bose, M. N.** See Annett, H. E., and Bose, M. N.
- Bosselmann, H., and Koch, A.** The fate of arsenic in the fermentation of arsenical fruit juices, 618.
- Boudouard, O., and Lefranc, J.** Quantitative analysis of clays, 91.
- Bouillot, J.** Apparatus for drying organic substances, 195.
- Bouwman, L. R.** Formation of phenol by intestinal bacteria, 457.
- Bovie, W. T.** New vessel for electrometric titration, 143.
- Bowling, J. D.** See Bidwell, J. L., Bopst, L., and Bowling, J. D.
- Brinton, P. H. M., and Ellestad, R. B.** Quantitative separation of beryllium and uranium, 194.
- Brinton, P. H., and Paget, H. A.** Estimation of praseodymium, 464.
- Brinton, P. H. M. P., Sarver, L. A., and Stoppel, A. E.** Titration of hydrofluoric acid and hydrofluosilicic acid in mixtures containing small amounts of hydrofluosilicic acid, 628.
- Britton, C., Clibbens, D. A., and Ridge, B. P.** Chemical analysis of cotton. I., Absorption of methylene blue by cotton, 620.
- Broom, W. A.** See Clark, A. J., and Broom, W. A.
- Brown, J. B., and Beal, G. D.** The highly unsaturated fatty acids of fish oils, 453.
- Brown, R. B., and Jordan, H.** Valuation of dyestuffs by titration methods, 570.
- Browne, R. J.** Ultra-filtration of tannin and other solutions, 569.
- Bruère, — De La.** Absorption-spectra of tanning extracts in the ultra-violet, 351.
- Buchanan, J. H., and Naudain, G. G.** Influence of starch on the strength of wheat flour, 606.
- Bull, C. G., and McKee, C. M.** Whole culture method for testing the virulence of diphtheria bacilli, 343.
- Burkardt, H.** Analysis of sodium perborate, 194.
- Burke, S. P.** See McKee, R. H., and Burke, S. P.
- Bushill, J. H.** Estimation of acetone and of ethyl alcohol in mixtures of the two, 398.

C

- Cajori, F. A.** Estimation of sugars by the use of iodine, 73.
- Calcott, W. S., and English, F. L.** Analysis of triphenylmethane and azo dyes by means of titanium trichloride solution, 620.
- Callow, E. H.** See Ling, A. R., Callow, E. H., and Price, W. J.
- Calvert, E. G. B.** Estimation of sugar in blood, 230.

- Calvert, R.** See Stoneback, W. J., and Calvert, R.
- Calvert, R. L.** Detection of diethylphthalate and phthaleins in spirits, 75.
- Campbell, A. W.** See Daggett, W. L., Campbell, A. W., and Whitman, J. L.
- Cannizzaro, J.** Rapid method for the estimation of carbon dioxide in beverages, 608.
- Cannon, H. C.** See Bailey, E. M., Cannon, H. C., and Fisher, H. J.
- Capen, R. G.** See Viehoveer, A., and Capen, R. G.
- Carré, M. H.** Changes occurring in the pectic constituents of stored fruits, 34.
- Carroll, D. C.** See Levy-Simpson, S., and Carroll, D. C.
- Carter, R. H.** See Gimingham, C. T., and Carter, R. H.
- Castellani, A., and Taylor, F. E.** Mycological identification of inulin, 35.
- Jastle, W. F.** Dyed furs, 284.
- Jhaplin, W. H.** Second Year College Chemistry (Review), 296.
- Jhapman, A. C.** Spinacene, its oxidation and decomposition, 400.
- Chapman, A. C.** The title "Chemist," 216.
- Charpentier, J.** Isolation of ethylgalactoside- β in the presence of a large proportion of reducing sugars, 333.
- Charrion, A.** Separation of ferric oxide and alumina from magnesia by the nitrate method, 41.
- Charriou, A.** Separation of acids in aluminium precipitates, 293.
- Chervet, D.** See Treadwell, W. D., and Chervet, D.
- Chesnut V. K.** See Power, F. B., and Chesnut, V. K.
- Chevalier, J., and Mercier, F.** Insecticidal principle of pyrethrum flowers, 392.
- Chibnall, A. C.** Method for separate extraction of vacuole contents and protoplasmic material from leaf cells, 281.
- Christiansen, W. G., and Norton, A. J.** Purification of sodium hydrosulphite, 90.
- Cialdea, M.** Separation of radium from other elements, 240.
- Clark, A. J., and Broom, W. A.** Activity of pharmacopoeial preparations of ergot, 498.
- Clark, C. H. D.** Sliding scales for the convenient titration of strong liquids by dilution and use of aliquot parts, 61, 164, 211.
- Clark, M.** See Mallon, M. G., and Clark, M.
- Clarke, A.** Flavouring Materials, Natural and Synthetic (Review), 148.
- Clarke, H. T., and Taylor, E. R.** Separation of xylenes, 236.
- Clayton, W.** The Theory of Emulsions and Emulsification (Review), 147.
- Clibbens, D. A.** See Britton, C., Clibbens, D. A., and Ridge, B. P.
- Clifford, W. M.** Catalytic destruction of carnosine in vitro, 184.
- Coe, M. R.** See Walton, G. P., and Coe, M. R.
- Cofman-Nicoresi, J., and Tallantyre, S. B.** International standardisation of quillaia preparations, 497.
- Cohen, A.** Bromoxylenol Blue. A true-neutrality point indicator, 622.
- Cole, H. E.** Hexamethylene tetramine as a microchemical reagent, 509.
- Cole, H. I.** Detection of gold, 90.
- Cole, H. I.** Potassium ferrocyanide as a microchemical reagent for some alkaloids, 609.
- Collatz, F. A.** Action of malt and malt extract upon the strength of flour, 219.
- Collier, S., Levin, M., and Mease, R. T.** Estimation of total sulphur in rubber goods, 569.
- Collins, W. D., and Riffenburg, H. B.** Contamination of water samples with materials dissolved from glass containers, 132.
- Comber, N. M.** Flocculation of soils, III., 132.
- Comber, N. M.** Modified test for sour soils, 132.
- Conant, J. B.** Organic Syntheses, Vol. II. (Review), 243.
- Contzen, J.** See Popp, M., and Contzen, J.
- Corson, H. P.** See Weiss, J. M., Downs, C. R., and Corson, H. P.
- Coste, J. H.** The absorption of atmospheric gases by water, 433.
- Coste, J. H., and Andrews, E. R.** A case in which Winckler's manganous process for dissolved oxygen is untrustworthy (Notes), 543.
- Coste, J. H., Andrews, E. R., and Powney, W. E. F.** The sampling of coal: The general problem and some experiments, 580.
- Couch, J. F.** Toxic constituent of greasewood (*Sarcobatus vermiculatus*), 84.
- Cousin, H.** Reduction of bismuth by glucose, 625.
- Coward, K. H.** See Drummond, J. C., Coward, K. H., Golding, J., Mackintosh, J., and Zilva, S. S.
- Cramer, W.** Mode of action of vitamins. 391.
- Cramer, W., Drew, A. H., and Mottram, J. C.** Technique of blood platelet counting in Vitamin A deficiency, 499.
- Crasemann, E.** Estimation of the acids in silage, 287.
- Crocker, W.** See Harrington, G. T., and Crocker, W.
- Cross, C. F., and Dorée, C.** Researches on Cellulose, Vol. IV (1910-21) (Review), 196.
- Cuisinier, V.** Preparation of bismuth-sodium thiosulphate and its use in the estimation of potassium, 43.
- Cumming, A. C.** The Manufacture of Hydrochloric Acid and Saltcake (Review), 516.
- Cumming, W. M., Hopper, I. V., and Wheeler, T. S.** A Systematic Organic Chemistry (Review), 632.

D

- Daggett, W. L., Campbell, A. W., and Whitman, J. L.** Electrometric titration of reducing sugars, 277.
- Dakin, H. D.** Oxidations and Reductions in the Animal Body (Review), 297.
- Damon, S. R.** Observations in regard to growth-promoting substances of bacterial origin, 561.

- Damon, S. R.** Observations on the growth of the influenza bacillus, 393.
- Darmois, E.** Action of molybdic acid on the optical rotation of tartaric and malic esters, 346.
- Davenport, A.** See Hastings, E. G., Davenport, A., and Wright, W. H.
- Davis, A. R., Newton, E. B., and Benedict, S. R.** Combined uric acid in blood, 80.
- Davis, R.** Method of deciphering charred records, 241.
- Dede, L.** Detection and estimation of didymium in cerium salts, 626.
- Dehler, S. A.** See Havens, L. C., and Dehler, S. A.
- Dekker, J.** Oil of *Hibiscus cannabinus*, 126.
- De La Bruère, —.** Absorption-spectra of tanning extracts in the ultra-violet, 351.
- Denigès, —.** New method for the estimation of sugar in blood, 343.
- Deniges, G.** Rapid estimation of magnesium in one drop of sea water, 92.
- Deniges, M. G.** Microchemical identification of certain medicinal phenolic esters, 228.
- Denny, F. E.** Estimation of small amounts of starch in plant tissues, 220.
- Derfeld, G. V.** Apparatus for determining the viscosity of highly viscous substances, 630.
- Dickhart, W. H.** Reactions of crude vegetable oils with copper acetate, 224.
- Dickson, W.** The quantitative estimation of hemp and wood fibres in paper pulp, 373.
- Diedrichs, A., and Schmittmann, B.** The seeds of *Azelia Africana*, 125.
- Diénert, F., and Wandenbulcke, F.** Estimation of silica in waters, 398.
- Dimitrov, M.** See Karaglanov, Z., and Dimitrov, M.
- Dinshaw Rattonji Nanji and Shaw, W. S.** A quantitative study of the limitations of the reaction between ammonia and sodium hypobromite, 473.
- Dodge, R. L.** Analysis of hydrogen for traces of nitrogen, 509.
- Doerner, H. A.** Separation of arsenic and phosphorus from vanadium, 625.
- Doherty, W. M.** Notes on the food value of Pacific fish and on the constants of whale oil, 495.
- Doolittle, R. E.** Methods for the examination of cacao butter, 224.
- Dorée, C.** See Cross, C. F., and Dorée, C.
- Doucet, A.** Action of iodine on certain substituted semi-carbazides and its application to their estimation, 347.
- Downs, C. R.** See Weiss, J. M., Downs, C. R., and Corson, H. P.
- Dresbach, M.** See Knudson, A., and Dresbach, M.
- Drew, A. H.** See Cramer, W., Drew, A. H., and Motttram, J. C.
- Drummond, J. C., Coward, K. H., Golding, J. Mackintosh, J., and Zilva, S. S.** Cod-liver oil in the winter feeding of milch cows, 339.
- Drummond, J. C., Zilva, S. S., and Golding, J.** Use of cod-liver oil in the feeding of farm animals, 337.
- Drummond, J. C.** See Zilva, S. S., and Drummond, J. C.
- Dubief, M. J.** Rapid estimation of iodine in mineral waters containing sulphides, 285.
- Dudley, H. W.** Purification and properties of insulin, 500.
- During, A.** See Behre, A., During, A., Ehrecke, H., and Thimme, K.
- Dürst, N.** See Wenger, P., and Dürst, N.
- Duyster, M.** Seeds of *Chydenanthus excelsus*, 455.

E

- Eck, P. N. Van.** Estimation of eugenol in essential oils, 567.
- Edgar, G.** Preparation of standards for the estimation of creatine and creatinine, 394.
- Edmondson, R. B., Thom, C., and Giltner, L. T.** Experiments with *B. botulinus* under household conditions, 563.
- Edson, H. A.** Production of acid by *Rhizopus tritici* in decaying sweet potatoes, 614.
- Ehrecke, H.** See Behre, A., During, A., Ehrecke, H., and Thimme, K.
- Elles, S.** Detection of phthalyl-diethyl-ester in spirits, 558.
- Ekeley, J. B., and Macy, I. C.** Sensitiveness of some cyanide reactions, 183.
- Ellerdice, H. L., Junr.** See Thornton, W. M., Junr., and Ellerdice, H. L., Junr.
- Ellestad, R. B.** See Brinton, P. H. M., and Ellestad, R. B.
- Ellis, D.** Practical Bacteriology for Chemical Students (Review), 514.
- Elsdon, G. D.** County Borough of Salford. Annual Report of the Borough Analyst for 1921, 115.
- Elsdon, G. D.** County Borough of Salford. Report on Insurance Act Dispensing, 264.
- Elsdon, G. D.** Tables for sugar analysis, 435.
- Embrey, H.** Presence of Vitamin C in some oriental fruits and vegetables, 340.
- Engelenburg, A. J.** Electro-deposition methods for the estimation of metals in hydrochloric acid solution, 291.
- English, F. L.** See Calcott, W. S., and English, F. L.
- Etheridge, A. T.** The volumetric estimation of vanadium in steel, 588.
- Evans, B. S.** An investigation into the chemistry of the Reinsch Test for arsenic and antimony, and its extension to bismuth, Part I., 357.
- Evans, B. S.** An investigation into the chemistry of the Reinsch test for arsenic and antimony, and its extension to bismuth, Part II., 417.
- Evers, N., and Foster, H. J.** Note on the sulphuric acid test for fish liver oils, 58.
- Eynon, L., and Lane, J. H.** Action of alkaline earths upon the estimation of sugars by Fehling solution, 277.
- Eynon, L.** See Lane, J. H., and Eynon, L.

F

- Fabre, R.** Compound of antipyrin with xanthydrol, 32.
- Fabre, R.** Hydrolysis of the xanthylated derivatives of veronal and hypnotics of the barbituric series, and its toxicological importance, 284.
- Fabre, R., and Josset, J.** Contribution to the study of the toxicity of mercuric cyanide, 565.
- Fabre, R., and Penau, H.** Analysis of thyroid gland and detection of adulterants, 182.
- Fabre, R., and Penau, H.** Chemical examination of organo-therapeutic powders, 278.
- Fairbourne, A.** An avoidance of simultaneous equations (Notes), 263.
- Fajaus, K.** Indicator for silver and halogen ion titration, 401.
- Falkov, M., and Raiziss, G. W.** Quantitative estimation of carbon and hydrogen in organic compounds containing arsenic or mercury, 288.
- Faust, H. L.** See Fisher, H. L., Faust, H. L., and Walden, G. H.
- Fearon, W. R., and Foster, D. L.** Autolysis of beef and mutton, 33.
- Feigl, F.** Sensitive test for phosphoric acid, 93.
- Feigl, F., and Schorr, R.** Estimation of sulphur, arsenic and antimony in inorganic and organic compounds, 623.
- Fellers, C. R.** Actinomyces in milk, 232.
- Fenger, F.** Comparison between the chemical and physiological characteristics of pepsin and rennin, 130.
- Fenwick, F.** See Willard, H. H., and Fenwick, F.
- Fernandes, L., and Gatti, U.** Systematic method for detecting the principal anions, 292.
- Findlay, A.** Practical Physical Chemistry (Review), 573.
- Findlay, A.** The Phase-Rule and its Applications (Review), 575.
- Finks, A. J.** Growth-promoting value and vitamin content of palm-kernel meal, 611.
- Finner, L. L.** See Sumner, J. B., Hubbard, R. S., and Finner, L. L.
- Fischel, W. P.** See Gilman, H., Wilkinson, P. D., Fishel, W. P., and Meyers, C. H.
- Fischer, W. M.** Detection of hydroxylamine, 348.
- Fisher, H. J.** See Bailey, E. M., Cannon, H. C., and Fisher, H. J.
- Fisher, H. L., Faust, H. L., and Walden, G. H.** Alumina as an absorbent for water in gas analysis, 84.
- Fleck, L. C.** See Ritter, G. R., and Fleck, L. C.
- Florentin, D.** Oxidation of different forms of carbon and of oils by means of chromic acid, 37.
- Folin, O.** Revised method for the estimation of uric acid in blood, 79.
- Fontès, —, and Thivolle, —.** Microchemical estimation of copper by means of molybdenum, 511.
- Fontès, —, and Thivolle, —.** Micro-chemical estimation of iron by means of molybdenum, 511.
- Fontès, G., and Thivolle, L.** Micro-estimation of lactose, 29.
- Fornet, A.** Estimation and identification of flours by means of standard "crude fibre" types, 73.
- Foster, D. L.** See Fearon, W. R., and Foster, D. L.
- Foster, G. L., and Schmidt, C. L. A.** Electrolytic separation of hexone bases from protein hydrolysates, 501.
- Foster, H. J.** See Evers, N., and Foster, H. J.
- Fox, E. J., and Geldard, W. J.** Estimation of urea alone and in the presence of cyanamide by means of urease, 456.
- Fox, F. W., and Gardner, J. A.** The sterol content of cow's milk, 227.
- Francis, A. G.** Presence of barium and strontium in natural brines, 315.
- Francois, M.** Analysis of santonin tablets, 30.
- Frederick, R. C.** An abnormality found in water analysis (Notes), 66.
- Frevert, H. W.** See Trostel, L. J., and Frevert, H. W.
- Fricke, K., and Luning, O.** Detection of maize meal in bread, pastry, etc., 331.
- Frieden, A.** See Thomas, A. W., and Frieden, A.
- Friederich, A.** Determination of the velocity of digestion of albumin, 336.
- Friend, H.** Quantitative colour reaction given by adrenalin and urine, 616.
- Fry, W. H.** Microscopic estimation of colloids in soil separates, 619.
- Funk, C., Harrow, B., and Paton, J. B.** Vitamins from yeast and rice polishings, 561.
- Furman, N. H.** Separation of tin from other metals and estimation of tin by means of cupferron, 626.

G

- Gadient, St.** Micro-estimation of magnesium in serum, 615.
- Gardner, A.** See Atkin, W. R., and Gardner, A.
- Gardner, J. A.** See Fox, F. W., and Gardner, J. A.
- Garner, W. E., and Waters, C. A.** Simple apparatus for electrometric titration, 142.
- Gatti, U.** See Fernandes, L., and Gatti, U.
- Geldard, W. J.** See Fox, E. J., and Geldard, W. J.
- Gill, A. H.** Occurrence of *l*-menthone in pine oil, 567.
- Gilman, H., Wilkinson, P. D., Fishel, W. P., and Meyers, C. H.** Quantitative estimation of the Grignard reagent, 134.
- Giltner, L. T.** See Edmondson, R. B., Thom, C., and Giltner, L. T.
- Gimingham, C. T.** Colorimetric determination of the hydrogen-ion concentration in soils, 287.
- Gimingham, C. T., and Carter, R. H.** Estimation of nitrates in soil by the phenol-disulphonic acid method, 287.
- Giuffrè, U.** Detection of extract of *Atractylis gummifera* in liquorice extract, 30.
- Glichitch, L. S.** Estimation of the easily hydrated alcohols of essential oils, 505.

- Goldblatt, H.**, and **Zilva, S. S.** Relation between the growth-promoting and anti-rachitic functions of certain substances, 612.
- Golding, J.** See Drummond, J. C., Zilva, S. S., and Golding, J.
- Golding, J.** See also Drummond, J. C., Coward, K. H., Golding, J., Mackintosh, J., and Zilva, S. S.
- Goldsmith, H. E.** See Rhodes, F. H., and Goldsmith, H. E.
- Goldsmith, J. N., Lewis, S. J., and Twyman, F.** Optical Methods in Control and Research Laboratories. Vol. I., Spectrum Analysis, Absorption Spectra, Refractometry, Polarimetry (Review), 196.
- Gore, H. C.** Formation of maltose in sweet potatoes during cooking, 553.
- Gortner, R. A.** See Hoffmann, W. F., and Gortner, R. A.
- Gray, F. W.** The Chemistry Tangle Unravelling (Review), 242.
- Green, M. M.** Radiator for platinum crucibles, 573.
- Green, R. G.** Surface tension balance. Apparatus for the rapid measurement of surface tension, 629.

INDEX TO SUBJECTS.

A

Abietic Acids: Colophony; Estimation of — and. F. Schulz and S. Landa, 87.

Abnormal Cells: Cocoa powder; — in. A. Nestler, 606.

Abnormal Milk: Alcohol test; Detection of — by the. A. C. Weimar, 551.

Abnormality: Water analysis; An — found in (Notes). R. C. Frederick, 66.

Absolute Alcohol: Calcium chloride and lime; Preparation of — by means of. W. A. Noyes, 234.

Absorbent Mixtures: Carbon monoxide; — for. A. Prutti, 238.

Absorbent: Water in organic analysis; Alumina as an — for. H. L. Fisher, H. L. Faust and G. H. Walden, 84.

Absorption Bands: Measurement of the wavelength of —; Coincidence method for the. H. Hartridge, 351.

Absorption-Spectra: Tanning extracts in the ultra violet; — of. De La Bruère, 351.

Abstracts of Papers Published in Other Journals: 1923: 29, 72, 125, 178, 218, 276, 331, 385, 451, 494, 551, 605.

Accuracy: Dispensing; Limits of — in (Legal Notes), 324.

Acetaldehyde: Formaldehyde and —; The estimation of. E. W. Blair and T. S. Wheeler, 110.

Acetone: — and of ethyl alcohol in mixtures of the two; Estimation of. J. H. Bushill, 398.

Acid: Milk by —; Coagulation of. L. Anderson, 494.

Acid: *Rhizopus Tritici* in decaying sweet potatoes; Production of — by. H. A. Edson, 614.

Acidifier: Malic acid as a food —; Inactive. J. M. Weiss, C. R. Downs and H. P. Corson, 453.

Acidimetry: Indicator for —; New. A. Reisenleitner, 509.

Acidimetry: Hydrogen; Electrometric — and alkalimetry without the use of. P. A. Van Der Meulen and F. Wilcoxon, 139.

Acids: Aluminium precipitates; Separation of in. A. Charriou, 293.

Acids: Detection and separation of —; Systematic procedure for the. Z. Karao-glanov and M. Dimitrov, 623.

Acids: Different sugar groups; Reaction distinguishing between — derived from the. L. J. Simon and A. J. A. Guillaumin, 74.

Acids: Foods and in wine; The sourness of — occurring in. T. Paul, 334.

Acids: Fruits; The — present in certain. C. F. Muttelet, 181.

Acids: Silage; Estimation of the — in. E. Crasemann, 287.

Acrolein: Rancidity in fats; New test for — and its bearing on. W. C. Powick, 128.

Acrolein: Schiff's reagent in the quantitative estimation of —; Use of. C. Moureu and E. Boismenu, 189.

Act: Gas Regulation —, 1920. Abstract of Memorandum by the Gas Referees on the Appointment, Qualifications and Duties of Gas Examiners, 604.

Act: Ministry of Health. Milk and Dairies (Amendment) —, 1922. Special Designations. Circular 356, 25.

Act: Superannuation —; Local Government and Other Officers', 385.

Actinomyces: Milk; — in. C. R. Fellers, 232.

Active Principle: Chaparro; The — of, 77.

Active Principles: Digitalis; Chemical method of assaying the — of. A. Knudson and M. Dresbach, 76.

Acts: Sale of Food and Drugs —. Extracts from the Annual Report of the Ministry of Health for 1922-1923 and Abstract of Reports of Public Analysts for the Year 1922, 601.

Address: President; Annual — of the, 103.

Adrenaline: Urine; Quantitative colour reaction given by — and. H. Friend, 616.

Adulterants: Powdered thyroid gland; Analysis of, and detection of —. R. Fabre and H. Penau, 182.

Adulterants: Tanning materials and detection of —; Analytical characteristics of. M. Jamet, 135.

Aeration: Cyanide by —; Estimation of. J. H. Roe, 566.

Aizelia Africana: Seeds of —; The. A. Diedrichs and B. Schmittmann, 125.

Age: Mammals; — and chemical development in. C. R. Moulton, 560.

Agricultural Analysis, Abstracts: 1923: 36, 83, 132, 186, 234, 286, 345, 398, 566, 618.

Air: Carbon monoxide in —; Estimation of. V. Andriska, 625.

Air: Ethyl ether in —, blood and other fluids; Estimation of. H. W. Haggard, 235.

Air: Explosive dusts in —; Collection and examination of. L. J. Trostel and H. W. Frevort, 241.

- Air:** Upper —; Spores in the. E. C. Stakman and Others, 615.
- Albumin:** Velocity of digestion of —; Determination of the. A. Friederich, 336.
- Alcohol:** Absolute — by means of calcium chloride and lime; Preparation of. W. A. Noyes, 234.
- Alcohol:** Acetone and of ethyl — in mixtures of the two; Estimation of. J. H. Bushill, 398.
- Alcohol Content:** Bread; — of. T. Sundberg, 554.
- Alcohol:** Ethyl —; Detection of methyl — in. R. Meurice, 505.
- Alcohol:** Methyl — in ethyl —; Detection of. R. Meurice, 505.
- Alcohol:** Pentoses, formaldehyde and methyl —; Detection of. J. B. Sumner, 619.
- Alcohol Test:** Abnormal milk by the —; Detection of. A. C. Weimar, 551.
- Alcoholic Solution:** Substances in — from the elevation of the flash point; Determination of the molecular weight of. R. Wright, 46.
- Alcohols:** Bromomethylphthalimide; Separation and identification of — by means of. H. H. Hopkins, 189.
- Alcohols:** Essential oils; Estimation of the easily hydrated — of. L. S. Glichitch, 505.
- Alder:** Oxymethylantraquinone compounds in — and its galenic preparations; Variation of. E. Maurin, 32.
- Aldoses:** —; Iodimetric estimation of. I. M. Kolthoff, 386.
- Aldoses:** Mixtures containing carbohydrates; Application of the iodimetric estimation of — to the analysis of. I. M. Kolthoff, 386.
- Aliquot Parts:** Convenient titration of strong liquids by dilution and use of —; Sliding scales for the. C. H. D. Clark, 61, 164, 211.
- Alkali Metals:** Ferrocyanide titration of certain metals; Influence of — on the. W. D. Treadwell and D. Chervet, 461.
- Alkali Phosphotungstates:** —; Analysis of. R. Mellet, 465.
- Alkali:** Titratable — of the blood with dinitrosalicylic acid; Estimation of the. J. B. Sumner, R. S. Hubbard and L. L. Finner, 563.
- Alkalimetry:** Hydrogen; Electrometric acidimetry and — without the use of. P. A. Van Der Meulen and F. Wilcoxon, 139.
- Alkaline Earths:** Sugars by Fehling solution; Action of — upon the estimation of. L. Eynon and J. H. Lane, 277.
- Alkaline Pyrogallol Solution:** Colour changes in —; Oxygen-supplying power of the soil as indicated by. L. M. Hutchings, 618.
- Alkalis:** Rocks; Indirect estimation of — in. F. Walker, 626.
- Alkaloids:** Benzoyl radical in toxicological examinations for —; Diazotisation of the. H. Pecker, 502.
- Alkaloids:** Conductometric titration of —. W. D. Treadwell and S. Janett, 610.
- Alkaloids:** Microchemical reagent for some —; Potassium ferrocyanide as a. H. I. Cole, 609.
- Alkaloids:** Reagent for —; New. C. Viel and E. Viel, 333.
- Alkaloids:** Reagent for —; New. R. Weinland and J. Heinzler, 75.
- Allantoin:** —; Estimation of. J. More, 231.
- Almonds:** Ground —; Barley in (Legal Notes), 545.
- Aloes:** Oxymethylantraquinones in — and rhubarb; Detection of. M. Lestage, 334.
- Alloys, etc.:** Copper in —; Estimation of. B. Winkler, 139.
- Alloys:** Institute of Metals. Structure of —, 268.
- Alumina:** Absorbent for water in organic analysis; — as an. H. L. Fisher, H. L. Faust and G. H. Walden, 84.
- Alumina:** Ferric oxide and — from magnesia by the nitrate method; Separation of. A. Charriou, 41.
- Aluminium:** Phosphate; Estimation of — as G. E. F. Lundell and H. B. Knowles, 91.
- Aluminium Precipitates:** Acids in —; Separation of. A. Charriou, 293.
- American Turpentine:** Refractive index of —; The temperature coefficient of the (Notes). T. F. Harvey, 19.
- American Woods:** Analyses of some —; Results of. G. R. Ritter and L. C. Fleck, 39.
- Amines:** Reagent for —; "Permutit" as a. J. C. Whitehorn, 565.
- Amino Acid Nitrogen:** Foods by means of the "Ninhydrin" method; Colorimetric estimation of — in. H. Riffart, 179.
- Amino Acids:** Linseed meal, wheat meal, Soya beans, and red clover hay; Quantitative estimation of — of. T. S. Hamilton, N. Uyei, J. B. Baker, and H. S. Grindley, 234.
- Amino Compounds:** Aromatic —; Spectrophotometric estimation of. W. E. Mathewson, 227.
- Ammonia:** Reaction between — and sodium hypobromite; A quantitative study of the limitations of the. Dinshaw Rattouji Nanji and W. S. Shaw, 473.
- Ammonia:** Urine; Estimation of — and urea in. S. Levy-Simpson and D. C. Carroll, 615.
- Ammonia:** Waters; The addition of sodium carbonate before estimating free — in (Notes). A. W. Knapp, 486.
- Ammonium Sulphide Group:** Metals of the —; Separation of. G. Luff, 624.
- Amyl Alcohol:** Milk testing; — for (Notes). T. F. Harvey and C. O. Harvey, 213.
- Analyst:** County Borough of Salford. Annual Report of the Borough — for 1921. G. D. Eisdon, 115.
- Analytical Characters:** Commercial linseed oils; — of. H. Wolff, 191.
- Analytical Characteristics:** Tanning materials; — of, and detection of adulterants. M. Jamet, 135.
- Analytical Elutriation Methods:** Cacao husk from cocoa powder; — of separating. R. Whympier, 73.
- Analytical Procedure:** Sublimation as an —. J. Hortvet, 406.

- Animals:** Cod-liver oil in the feeding of farm —; Use of. J. C. Drummond, S. S. Zilva and J. Golding, 337.
- Anions:** Principal —; Systematic method for detecting the. L. Fernandes and U. Gatti, 292.
- Antimony:** Arsenic and —, and its extension to bismuth; An investigation into the chemistry of the Reinsch Test for. Part I. and Part II. B. S. Evans, 357, 417.
- Antimony:** Sulphur, arsenic, and — in inorganic and organic compounds; Estimation of. F. Feigl and R. Schorr, 623.
- Antimony:** Tin; Microchemical separation of — and. A. P. Ortodogsu and M. Ressay, 510.
- Antineuritic and Water-Soluble B-Vitamins:** Identity or non-identity of —. P. A. Levene and M. Muhlfeild, 612.
- Antipyrin:** Xanthidrol; Compound of — with. R. Fabre, 32.
- Anti-Rachitic Functions:** Growth-promoting and — of certain substances; Relation between the. H. Goldblatt and S. S. Zilva, 612.
- Antiscorbic Factor:** Vitamins in molluscs. Presence of the — in the oyster. (Mme.) Randoin, 561.
- Antiseptics:** Common —; Efficiency of. E. H. Harvey, 232.
- Apparatus:** Arsenic; Electrolytic — for the estimation of. G. W. Monier-Williams, 112.
- Apparatus:** Concentrated sulphuric acid and sodium hydroxide solutions — for delivering. R. C. Abbott, 407.
- Apparatus:** Electrometric titration; Simple — for. W. E. Garner and C. A. Waters, 142.
- Apparatus:** Organic substances; — for drying. J. Bouillot, 195.
- Apparatus:** Specific gravity of gases in small quantities; — for the measurement of the. A. Blackie, 141.
- Apple Seeds:** Respiration of —. G. T. Harrington, 186.
- Apple Skin:** Wax coating of —; Constituents of the. C. E. Sando, 496.
- Apples:** Department of Scientific and Industrial Research. Food Investigation Board. Brown Heart—a functional disease of — and pears, 490.
- Apples:** Geraniol in —; Detection of. F. B. Power and V. K. Chesnut, 129.
- Apricots:** Hesperidin deposits in —. C. Griebel, 454.
- Arachidic and Lignoceric Acids:** Arachis oil by means of magnesium soaps; Estimation of the mixture of — in. A. W. Thomas and C. L. Yu, 126.
- Arachis Oil:** Arachidic and lignoceric acids in — by means of magnesium soaps; Estimation of the mixture of. A. W. Thomas and C. L. Yu, 126.
- Aromatic Amino Compounds:** Spectrophotometric estimation of —. W. E. Mathewson, 227.
- Arrack:** Ceylon —. C. T. Symons and W. N. Rae, 387.
- Arsenic:** —; Separation of (Notes). T. P. Blunt, 596.
- Arsenic:** Chemistry of the Reinsch Test for — and antimony, and its extension to bismuth; An investigation into the. Part I. and Part II. B. S. Evans, 357, 417.
- Arsenic:** Cocoa; — in. 67.
- Arsenic Content:** Human body; Normal — of the. O. Billiter and E. Marfurt, 618.
- Arsenic:** Electrolytic method; Estimation of — by the (Notes). G. W. Monier-Williams, 262.
- Arsenic:** Estimation of —; Electrolytic apparatus for the. G. W. Monier-Williams, 112.
- Arsenic:** Fermentation of arsenical fruit juices; The fate of — in the. H. Bosselmann and A. Koch, 618.
- Arsenic:** Glass; Lead and — from (Legal Notes), 215.
- Arsenic:** Minute quantities of —; Detection of. O. Billiter, 238.
- Arsenic:** Organic compounds containing — or mercury; Quantitative estimation of carbon and hydrogen in. M. Falkov and G. W. Raiziss, 288.
- Arsenic:** Small amounts of —; The detection and estimation of, 63.
- Arsenic:** Steels; New method of estimating — in. C. Mazzetti and P. Agostini, 402.
- Arsenic:** Sulphur, —, and antimony in inorganic and organic compounds; Estimation of. F. Feigl and R. Schorr, 623.
- Arsenic:** Vanadium; Separation of — and phosphorus from. H. A. Doerner, 625.
- Arsenical Fruit Juices:** Arsenic in the fermentation of —; The fate of. H. Bosselmann and A. Koch, 618.
- Arsenious and Nitrous Acids:** —; Volumetric estimation of. A. Klemenc, 44.
- Aschmann's Method:** Iodine value of fats by —; Estimation of the. B. M. Margosches, R. Baru and L. Wolf, 346.
- Asphalt:** Coal tar pitch in natural —; Detection of. O. Hackl, 138.
- Asphaltenes:** Mineral oils by means of cyclohexane; Separation of — from. M. Jakeš, 567.
- Atmospheric Gases:** Water; The absorption of — by. J. H. Coste, 433.
- Atractylis gummifera:** Liqueur extract; Detection of extract of — in. U. Giuffrè, 30.
- Autolysis:** Beef and mutton; — of. W. D. Fearon and D. L. Foster, 33.
- Avocado:** Histology and chemistry of the —. W. J. Stoneback and R. Calvert, 553.
- Azo Dyes:** Triphenylmethane and — by means of titanium trichloride solution; Analysis of. W. S. Calcott and F. L. English, 620.

B

- Babassu Fodder:** Butter and lard; Effect of — on. N. Bengtsson, 225.
- Babcock Cream and Milk Test Bottles:** Accuracy of; Notes on a method for testing the. B. J. Smit, 477.

- Bacilli**: Virulence of diphtheria —; Whole culture method for testing the. C. G. Bull and C. M. McKee, 343.
- B. Botulinus**: Household conditions; experiments with — under. R. B. Edmondson, C. Thom and L. T. Giltner, 563.
- B. Coli Index**: Pollution of water; effect of *Gambusia affinis* on the — of. L. C. Havens and S. A. Dehler, 393.
- Bacillus**: Growth of the influenza —; Observations on the. S. R. Damon, 393.
- Bacteria**: Biological differentiation of —. H. W. Smith, 131.
- Bacteria**: Phenol by intestinal —; Formation of. L. R. Bouwman, 457.
- Bacteria**: Soil; Estimation of the number of — in. C. L. Whittles, 280.
- Bacteria**: Suspension of the — in a soil; The Whittles vibration method of obtaining a. H. G. Thornton, 455.
- Bacterial Origin**: Growth-promoting substances of —; Observations in regard to. S. R. Damon, 561.
- Bacteriological, Biochemical, Etc.: Abstracts**: 1923: 455.
- Bacteriological Examination**: Parliamentary Notes. House of Commons. April 8. Sale of Disinfectants. — of Milk. May 9. Preservatives in Food, 268.
- Baker's Yeast**: Bios requirement of —; J. J. Willaman and A. G. Olsen, 339.
- Balance**: Surface tension —. Apparatus for the rapid measurement of surface tension. R. G. Green, 629.
- Barbituric Series**: Xanthylated derivatives of veronal and hypnotics of the —; Hydrolysis of the, and its toxicological importance. R. Fabre, 284.
- Barium Chloride**: Conductivity titrations by means of —. I. M. Kolthoff, 40.
- Barium**: Harrogate waters; — in the. A. Woodmansey, 132.
- Barium**: Natural brines; Presence of — and strontium in. A. G. Francis, 315.
- Bark**: Wild Cherry —; Tannin of. J. C. Peacock and B. L. de G. Peacock, 559.
- Barley**: Ground almonds; — in (Legal Notes), 545.
- Barley**: Maltase in germinated and ungerminated —; Presence of. A. R. Ling and D. R. Nanji, 606.
- Barley**: Starch in — and wheat; Estimation of. A. R. Ling, E. H. Callow and W. J. Price, 29.
- Baths**: Oil —; Hydrogenated oil for. G. R. Robertson, 466.
- Beans**: Castor —; Cattle food containing (Legal Notes), 171.
- Beans**: Copper in —; Disclosure on tin (Legal Notes), 599.
- Beans**: Linseed meal, wheat meal, Soya — and red clover hay; Quantitative estimation of amino acids of. T. S. Hamilton, N. Uyei, J. B. Baker, and H. S. Grindley, 234.
- "Beef and Malt Wine"** (Legal Notes), 326.
- Beef**: Mutton; Autolysis of — and. W. D. Fearon and D. L. Foster, 33.
- Benzene**: Active charcoal; Estimation of — in coal gas by means of. R. Kattwinkel, 507.
- Benzene**: Coal-gas by means of active charcoal; Estimation of — in. A. Krieger, 347.
- Benzonaphthol**: Certain medicinal phenolic esters; Microchemical identification of —, Salol, Betol, Cresalol, Salophene. M. G. Deniges, 228.
- Benzoyl Radical**: Toxicological examinations for alkaloids; Diazotisation of the — in. H. Pecker, 502.
- Beryllium**: — and uranium; Quantitative separation of. P. H. M. Brinton and R. B. Ellestad, 194.
- Betol**: Certain medicinal phenolic esters; Microchemical identification of. Benzonaphthol, Salol, —, Cresalol, Salophene. M. G. Deniges, 228.
- Beverages**: Carbon dioxide in —; Rapid method for the estimation of. J. Cannizzaro, 608.
- Biochemical, Bacteriological, etc., Abstracts**: 1923: 33, 78, 130, 184, 229, 280, 334, 391, 499, 560, 611.
- Biochemical Differentiation**: Bacteria; — of. H. W. Smith, 131.
- Biochemical Work**: Sodium in —; Estimation of. A. Blanchetière, 456.
- Bio-Colorimetric Work**: Colorimeter for —; New. V. C. Myers, 143.
- Biological Work**: Lead in —; Electrolytic estimation of. A. S. Minot, 185.
- Bios Requirement**: Baker's yeast; — of. J. J. Willaman and A. G. Olsen, 339.
- Birmingham**: City of —. Annual Report of the City Analyst for 1922. J. F. Liverseege, 322.
- Birmingham**: City of —. Report of the City Analyst for the First Quarter, 1923. J. F. Liverseege, 323.
- Birmingham**: City of —. Report of the Public Analyst for the Second Quarter, 1923. J. F. Liverseege, 543.
- Birmingham**: City of —. Report of the City Analyst for the Fourth Quarter, 1922. J. F. Liverseege, 170.
- Bismuth**: —; Estimation of. Koster, 238.
- Bismuth**: Glucose; Reduction of — by. H. Cousin, 625.
- Bismuth**: Phosphate; Estimation of — as. Separation from lead, copper and cadmium. G. Luff, 238.
- Bismuth**: Reinsch Test for arsenic and antimony, and its extension to —; An investigation into the chemistry of the. Part I. and Part II. B. S. Evans, 357, 417.
- Bismuth Sodium Thiosulphate**: Potassium; Preparation of — and its use in the preparation of. V. Cuisinier, 43.
- Blood**: Air, — and other fluids; Estimation of ethyl ether in. H. W. Haggard, 235.
- Blood**: Carbon monoxide in —; Calibration of the reversion spectroscope for the estimation of. H. Hartridge, 341.
- Blood**: Choline in —; Quantitative estimation of. J. S. Sharpe, 231.

- Blood Filtrates:** Folin-Wu method for obtaining protein-free —; Modification of the. R. L. Haden, 501.
- Blood:** Hydrogen ion concentration of the —; Micro-colorimetric estimation of. V. C. Myers, H. W. Schmitz, and L. E. Booker, 564.
- Blood:** Iron in hæmoglobin and —; Colorimetric estimation of. S. Y. Wong, 342.
- Blood:** Phenols in —; Quantitative estimation of. N. W. Rakestraw, 395.
- Blood Platelet Counting:** Vitamin A deficiency; Technique of — in. W. Cramer, A. H. Drew and J. C. Mottram, 499.
- Blood:** Sugar in —; Estimation of. E. G. B. Calvert, 230.
- Blood:** Sugar in —; New method for the estimation of. Denigès, 343.
- Blood:** Titratable alkali of the — with dinitrosalicylic acid; Estimation of the. J. B. Sumner, R. S. Hubbard and L. L. Finner, 563.
- Blood Urea:** —; Estimation of. J. A. Behre, 500
- Blood:** Uric acid in —; Combined. A. R. Davis, E. B. Newton and S. R. Benedict, 80.
- Blood:** Uric acid in —; Revised method for the estimation of. O. Folin, 79.
- Body:** Arsenic content of the human —; Normal. O. Billiter and E. Marfurt, 618.
- Boerhaavia Repens:** — (Punarnava) (Notes). Jitendra Nath Rakshit, 169.
- Boleti:** Iron salts with tinctures of various —; Colour reactions of. R. Gruyot, 560.
- Boric Acid:** Cream, milk and other foods; Estimation of — in. (Process used in the Government Laboratory.) 416.
- Boric Acid:** "Liquid eggs" and other foodstuffs; The estimation of — in. G. W. Monier-Williams, 413.
- Boric Acid:** Ministry of Health. Circular 381. I., —. II., Imported Produce, 177.
- Borough Analyst:** Borough of Portsmouth. Annual Report of the — for 1922, 487.
- Borough Analyst:** Metropolitan Borough of Stepney. Annual Report of the — for 1922. H. Hawley, 381.
- Bottles:** Babcock cream and milk test —. Notes on a method for testing the accuracy of. B. J. Smit, 477.
- Botulism:** Scottish Board of Health. — at Loch Maree, 118.
- Bran:** Rice hulls in —; Microscopic method for estimation of. B. H. Silberberg, 186.
- Brandy:** —; Definition of (Legal Notes), 600.
- Bread:** Alcohol content of —. T. Sundberg, 554.
- Bread:** Maize meal in —, pastry, etc.; Detection of. K. Fricke and O. Luning, 331.
- Brines:** Barium and strontium in natural —; Presence of. A. G. Francis, 315.
- British Museum:** Museum Exhibits; The Cleaning and Restoration of. Second Report upon Investigations Conducted at the —, 173.
- Bromate:** Volumetric analysis; Use of — in. II., Influence of mercuric mercury upon bromic acid reactions. G. F. Smith, 462.
- Bromic Acid Reactions:** Bromate in volumetric analysis; Use of. II., Influence of mercuric mercury upon —. G. F. Smith, 462.
- Bromide:** Chloride, — and iodide in mixed silver halides; Qualitative separation of. H. Schmalfluss, 294.
- Bromomethylphthalimide:** Alcohols by means of —; Separation and identification of. H. H. Hopkins, 189.
- Bromoxyleneol Blue:** —. A true-neutrality point indicator. A. Cohen, 622.
- Brown Heart:** Department of Scientific and Industrial Research. Food Investigation Board. — a functional disease of apples and pears, 490.
- Brown Solutions:** Tannin extracts; Measurement of the colour of —, with special reference to. H. R. Procter, 405.
- Bulgarian:** Soya beans. A. Zlataroff and I. Trifonow, 125.
- Bunsen Valve:** Filter pump; Use of the — in connection with a. F. W. Ashton, 406.
- Bureau of Physico-Chemical Standards:** Chemical Society of Belgium; Third Annual Report (Financial Year 1922), presented by M. J. Timmermans to the, 269.
- Burette:** Explosion —; New. A. Krieger, 94.
- Butter:** Babassu fodder on — and lard; Effect of. N. Bengtsson, 225.
- Butter:** Cacao —; Adulteration of. M. Pichard, 556.
- Butter Fat:** Fatty acids in —; Estimation of. II. E. B. Holland and others, 555.
- Butter:** Margarine containing 1 per cent. of — (Legal Notes), 489.
- Butter:** Nut Cream — (Legal Notes), 325.

C

- Cacao Butter:** —; Adulteration of. M. Pichard, 556.
- Cacao Butter:** Examination of —; Methods for the. R. E. Doolittle, 224.
- Cacao Husk:** Cocoa powder; Analytical elutriation methods of separating — from. R. Whympfer, 73.
- Cadmium:** Bismuth as phosphate; Estimation of. Separation from lead, copper and —. G. Luff, 238.
- Cadmium:** Copper from —; Separation of. P. Wenger and N. Dürst, 463.
- Cadmium:** Toxicity of —, 284.
- Caffeine:** Theobromine and — with boiling chloroform; Extraction of. O. P. A. H. Schaap, 76.
- Cake:** Ministry of Health. Circular 381. I., Boric acid in —. II., Imported Produce, 177.
- Calcium Chloride:** Absolute alcohol by means of — and lime; Preparation of. W. A. Noyes, 234.
- Calcium:** Kramer-Tisdall method; Estimation of — in serum by the. F. F. Tisdall, 502.
- Calcium Phosphate:** Acid — ("Cream Powder"); The estimation of lead in (Notes). J. Miller, 263.

- d-Camphor**: Refined natural —; The melting point and iodine value of. M. S. Salamon, 536.
- Camphorated Oil**: Substitute (Legal Notes), 172.
- Cane Sugar**: Formic acid by caramellisation of —; Formation of. S. G. Simpson, 607.
- Canned Foods**: Tin in — (Legal Notes), 326.
- Canned Fruits**: Oxygen and perforations in —, E. F. Kohman, 388.
- Cantharidin**: Source of —; New. A. Viehoever and R. G. Capen, 389.
- Caramel**: Sugar products; Estimation of — in. A criticism of the Ehrlich method. G. P. Meade, 223.
- Carbohydrates**: Aldoses to the analysis of mixtures containing —; Application of the iodometric estimation of. L. M. Kolthoff, 386.
- Carbohydrates**: Plant tissue; Effects of the method of desiccation on the — of. K. P. Link and W. E. Tottingham, 187.
- Carbohydrates**: Rats deprived of Vitamin B; Utilisation of — by. H. A. Mattill, 339.
- Carbolic Acid**: Coal-tar oils and crude —; Estimation of phenols in. J. B. Hill, 507.
- Carbon**: Chromic acid; Oxidation of different forms of — and of oils by means of. D. Florentin, 37.
- Carbon Content**: Solutions; Estimation of the — of. J. Needham, 505.
- Carbon Dioxide**: Beverages; Rapid method for the estimation of — in. J. Cannizzaro, 608.
- Carbon Dioxide**: Drinking water; Estimation of — in. P. Lehmann and A. Reuss, 503.
- Carbon Monoxide**: Absorbent mixtures for —, A. Piutti, 238.
- Carbon Monoxide**: Air; Estimation of — in. V. Andriska, 625.
- Carbon Monoxide**: Blood; Calibration of the reversion spectroscope for the estimation of — in. H. Hartridge, 341.
- Carbon Monoxide**: Cuprous ammonium carbonate and cuprous ammonium formate; Absorption of — by. A. T. Larson and C. S. Teitsworth, 138.
- Carbon**: Organic compounds containing arsenic or mercury; Quantitative estimation of — and hydrogen in. M. Falkov and G. W. Raiziss, 288.
- Carbon**: Soil; Estimation of — in. L. J. Simon, 398.
- Carnosine**: —; Estimation of. G. Hunter, 34.
- Carnosine**: In vitro; Catalytic destruction of — in. W. M. Clifford, 184.
- Castor Beans**: Cattle food containing — (Legal Notes), 171.
- Castor Oil**: Distinguishing — from other oils and determining its purity; A new test for. H. B. Stocks, 590.
- Catalytic Destruction**: Carnosine in vitro; — of. W. M. Clifford, 184.
- Catechin**: Gelatin test and —; The (Notes). M. Nierenstein, 542.
- Cattle Food**: Castor beans; — containing (Legal Notes), 171.
- Cattle Foodstuffs**: Sulphur dioxide in — after fumigation; Note on the presence of. H. A. Peacock, 160.
- Caviare**: —. G. Hinard, 552.
- Cells**: Vacuole contents and protoplasmic material from leaf —; Method for separate extraction of. A. C. Chibnall, 281.
- Celluloid**: Microscopic work; — for. O. Nuzzi, 242.
- Cereal Extracts**: Proteins from — by means of sodium tungstate; Precipitation of. J. A. Rumsey, 220.
- Cerium Salts**: Didymium in —; Detection and estimation of. L. Dede, 626.
- Ceylon**: Arrack. C. T. Symons and W. N. Rae, 387.
- Chaparro**: Active principle of —; The, 77.
- Charcoal**: Benzene in coal-gas by means of active —; Estimation of. A. Krieger, 347.
- Charcoal**: Benzene in coal gas by means of active —; Estimation of. R. Kattwinkel, 507.
- Charred Records**: —; Method of deciphering. R. Davis, 241.
- Chart**: Colorimetric indicator readings into hydrogen ion concentration; — for the conversion of. J. F. McClendon, 89.
- Cheese**: Cream — (Legal Notes), 447, 489.
- Cheese, Milk, and Cream**: Standards (Parliamentary Notes), 448.
- Cheese**: Standard for cream —; Test case to secure a (Legal Notes), 383.
- Cheese**: Standards; —, milk and cream (Parliamentary Notes), 448.
- Chemical and Physiological Characteristics**: Pepsin and rennin; Comparison between the — of. F. Fenger, 130.
- Chemical Development**: Mammals; Age and — in. C. R. Moulton, 560.
- Chemical Examiner**: Government of Madras. Annual Report of the —, 490.
- Chemical Laboratories**: Federated Malay States. Annual Report of the —, Institute for Medical Research, for the Year 1922, 603.
- Chemical Society of Belgium**: Bureau of Physico-Chemical Standards. Third Annual Report (Financial Year 1922), presented by M. J. Timmermans to the —, 269.
- Chemical Works**: Fumes from — (Legal Notes), 266.
- “Chemist”**: “Pharmacist”; — and. A. C. Chapman and E. F. Armstrong, 216.
- Chemistry**: Pure and Applied —; International Union of. Third Conference, 22.
- Cherry Bark**: Wild —; Tannin of. J. C. Peacock and B. L. de G. Peacock, 559.
- Chinese Wood (Tung) Oil**: Linseed oil; Heat treatment of — and. C. E. Mabery, 459.
- Chinese Wood (Tung) Oil**: Temperature; Variation of refractive index of — with. F. H. Rhodes and H. E. Goldsmith, 506.
- Chloramines**: Hypochlorites and — in milk and cream; Detection of. P. Rupp, 178.
- Chloride**: Mixed silver halides; Qualitative separation of —, bromide and iodide in. H. Schmalfluss, 294.
- Chlorine**: Water pollution; Phenol —; New reaction between phenol and —. E. F. Kohman, 397.

- Chloroform**: Theobromine and caffeine with boiling —; Extraction of. O. P. A. H. Schaap, 76.
- Choline**: Blood; Quantitative estimation of — in. J. S. Sharpe, 231.
- Chondrin**: Gelatin; Detection of — in. M. A. Rakusin, 569.
- Chrome-tanned Leather**: —; Analysis of. E. Little and E. Sargent, 459.
- Chromic Acid**: Different forms of carbon and of oils by means of —; Oxidation of. D. Florentin, 37.
- Chromic Oxide**: Sulpho-chromic oxidation; Rôle of — in the. L. J. Simon, 37.
- Chromium**: Vanadium in the presence of iron and —; New method for the electrometric titration of. H. H. Willard and F. Fenwick, 192.
- "Chydenanthus excelsus"**: Seeds of —. M. Duyster, 455.
- Cinnabar**: Mercury by means of sodium chloride; Volumetric estimation of. Analysis of — and organic mercury compounds. E. Votoček and L. Kašparek, 192.
- City Analyst**: City of Birmingham. Annual Report of the — for 1922. J. F. Liverseege, 322.
- City Analyst**: City of Birmingham. Report of the — for the First Quarter, 1923. J. F. Liverseege, 323.
- City Analyst**: City of Birmingham. Report of the — for the Fourth Quarter, 1922. J. F. Liverseege, 170.
- Clays**: —; Quantitative analysis of. O. Boudouard and J. Lefranc, 91.
- Coal-Gas**: Benzene in — by means of active charcoal; Estimation of. A. Krieger, 347.
- Coal-Gas**: Benzene in — by means of active charcoal; Estimation of. R. Kattwinkel, 507.
- Coal**: Microscopic investigations; Transparent preparations of — for. J. Lomax and J. R. Lomax, 630.
- Coal**: Sampling of —; The. The general problem and some experiments. J. H. Coste, E. R. Andrews, and W. E. F. Powney, 580.
- Coal-Tar Oils**: Phenols in — and crude carbolic acid; Estimation of. J. B. Hill, 507.
- Coal-Tar Pitch**: Natural asphalt; Detection of — in. O. Hackl, 138.
- Cobalt**: Nickel and other metals of the iron group by dinitroso-resorcinol; Estimation of — in the presence of. W. R. Orndorff and M. L. Nichols, 463.
- Cobalt**: Silver nitrate; Electrometric titration of — with. E. Müller and H. Lauterbach, 140.
- Cobaltinitrite and Perchlorate Methods**: Potassium by the —, and on the removal of sulphates; Further notes on the estimation of. R. L. Morris, 250.
- Cocoa**: Arsenic in —, 67.
- Cocoa Powder**: Abnormal cells in —. A. Nestler, 606.
- Cocoa Powder**: Cacao husk from —; Analytical elutriation methods of separating. R. Whympfer, 73.
- Cocoa**: Theobromine in —; New method for estimating. T. Ugarte, 388.
- Codeine**: —; The estimation of. H. E. Annett and Ram Rikhpal Sanghi, 16.
- Codex Reaction**: Ethyl chloride; The — for. A. Richard, 280.
- Cod-Liver Oil**: Farm animals; Use of — in the feeding of. J. C. Drummond, S. S. Zilva and J. Golding, 337.
- Cod-Liver Oil Industry**: Newfoundland —; The. S. S. Zilva and J. C. Drummond, 337.
- Cod-liver Oil**: Milch cows; — in the winter feeding of. J. C. Drummond, K. H. Coward, J. Golding, J. Mackintosh and S. S. Zilva, 339.
- Coffee**: Artificial resins for polishing —; Use of. J. Bordas, 388.
- Coincidence Method**: Wave-length of absorption bands; — for the measurement of the. H. Hartridge, 351.
- Coke**: True specific gravity of —; Determination of the. H. J. Ross, 38.
- Cold Store Meat**: Department of Scientific and Industrial Research. Food Investigation Board. Mould growths upon —, 549.
- Colloidal Gum Benzoin**: —; Properties of. H. D. Wright and W. O. Kermack, 611.
- Colloids**: Soil separates; Microscopic estimation of — in. W. H. Fry, 619.
- Colophony**: Abietic acids and —; Estimation of. F. Schulz and S. Landa, 87.
- Colorimeter**: Bio-colorimetric work; New — for. V. C. Myers, 143.
- Colorimeter**: Hemoglobin; New — for the estimation of. H. S. Newcomer, 342.
- Colorimetric Indicator Readings**: Hydrogen ion concentration; Chart for the conversion of — into. F. McClendon, 89.
- Colorimetric Method**: Magnesium; Note on the — for the estimation of. F. S. Hammett and E. T. Adams, 92.
- Colour Changes**: Alkaline pyrogallol solution; Oxygen-applying power of the soil as indicated by — in. L. M. Hutchings, 618.
- Colour Reaction**: Adrenaline and urine; Quantitative — given by. H. Friend, 616.
- Colour Reactions**: Iron salts with tinctures of various *Boleti*; — of. R. Gruyot, 560.
- Colour Test**: Vitamin B; — for. A. Jendrassik, 562.
- Coloured Wax Compositions**: —; Examination of. H. Smelkus, 237.
- Colouring**: Poisons; Distinctive — for. Report of the Codex Sub-Committee to the Council of the Pharmaceutical Society, 71.
- Colourings**: Food —. F. W. Richardson, 390.
- Combustion Products**: Effluents; Detection of toxic organic — in. A. Gregoire, 397.
- Condensed Milk**: Department of Scientific and Industrial Research. Food Investigation Board. Studies in sweetened and unsweetened —, 448.
- Condensed Milk**: Ministry of Health. The Public Health (—) Regulations (No. 2), 1923, 550.

- Condensed Milk:** Ministry of Health. —, Circular 393. Sale of Milk Deficient in Fat. Circular 399, 271.
- Condensed Milk:** Ministry of Health. — (Summary of New Regulations), 124.
- Condensed Milk:** Regulations, 1923 (Notes). E. Hinks, 596.
- Condensed Waters:** Sugar in — by means of cresol; Detection of. G. E. Stevens, 344.
- Conductivity Titrations:** Barium chloride; — by means of. I. M. Koltzoff, 40.
- Conductivity Titrations:** Sodium chromate; — by means of. I. M. Koltzoff, 139.
- Conductometric Titration:** Alkaloids; — of. W. D. Treadwell and S. Janett, 610.
- Conference:** Pure and Applied Chemistry; International Union of. Third —, 22.
- Congelation:** Essential oils. Note on the — of. W. J. Sanderson and W. J. Jones, 134.
- Congress:** Dairy —; World's, 52.
- Conphaseolin:** New globulin, —, in the Navy Bean (*Phaseolus vulgaris*); Presence of a. H. C. Waterman, C. O. Johns, D. B. Jones, and S. Phillips, 229.
- Copper Acetate:** Crude vegetable oils with —; Reaction of. W. H. Dickhart, 224.
- Copper:** Alloys, etc.; Estimation of — in. B. Winkler, 139.
- Copper:** Beans; — in. Disclosure on tin (Legal Notes), 599.
- Copper:** Bismuth as phosphate; Estimation of. Separation from lead, — and cadmium. G. Luff, 238.
- Copper:** Cadmium; Separation of — from. P. Wenger and N. Dürst, 463.
- Copper:** Molybdenum; Micro-chemical estimation of — by means of. Fontès and Thivolle, 511.
- Copper:** Peas; — in. Disclosure on tin (Legal Notes), 447.
- Copper:** Peas; — in (Legal Notes), 446, 488.
- Copper:** Phenols; New reactions of — and. J. Aloy and A. Valdiguié, 85.
- Copper:** Selenium; Separation of — from. A. Angeletti, 463.
- Copper Sulphate:** Formaldehyde in presence of —; Estimation of. M. Jakes, 346.
- Copper Sulphate:** Tinned Peas — in (Legal Notes), 267.
- Copper:** Tellurium, iron and —; Electro-metric titration of selenium in presence of. H. H. Willard and F. Fenwick, 349.
- Copra Cake:** Solvents; Extraction of — with. A. P. West, 36.
- Corn Syrup:** "Syrup treacle"; Disclosure of — (Legal Notes), 599.
- Corrosion:** Water pipes; New method of measuring — in. F. N. Speller and V. V. Kendall, 186.
- Corrosive Liquids:** Heavy and —; Laboratory device for delivering. A. P. Harrison, 406.
- Cotton:** Chemical analysis of —. I. Absorption of methylene blue by —. C. Britton, D. A. Clibbens and B. P. Ridge, 620.
- Cottonseed, Maize and Linseed Oils:** Phytosterols of —; The. R. J. Anderson and M. G. Moore, 556.
- County Analyst:** County of Lancaster. Annual Report of the — for the Year 1922. W. C. Williams, 445.
- County Analyst:** Kent. Report of the — for the Quarter ended December 31, 1922. F. W. F. Arnaud, 213.
- County Borough of Salford:** Insurance Act Dispensing; Report on. G. D. Elsdon, 264.
- Cow's Milk:** Sterol content of —; The. F. W. Fox and J. A. Gardner, 227.
- Cows' Milk:** Urea in —; Estimation of. Y. Morimoto, 394.
- Cows:** Winter feeding of milch —; Cod-liver oil in the. J. C. Drummond, K. H. Coward, J. Golding, J. Mackintosh and S. S. Zilva, 339.
- Cream and Milk Test Bottles:** Accuracy of Babcock —; Notes on a method for testing the. B. J. Smit, 477.
- Cream:** Boric acid in —, milk and other foods; Estimation of (Process used in the Government Laboratory), 416.
- Cream:** Cheese (Legal Notes), 447, 489.
- Cream:** Cheese, milk and — standards (Parliamentary Notes), 448.
- Cream Cheese:** Standard for —; Test case to secure a (Legal Notes), 383.
- Cream:** Milk and —; Detection of hypochlorites and chloramines in. P. Rupp, 178.
- ("Cream Powder"):** Lead in acid calcium phosphate —; The estimation of (Notes). J. Miller, 263.
- Creatine:** Standards for the estimation of — and creatinine; Preparation of. G. Edgar, 394.
- Creatinine:** Creatine and —; Preparation of standards for the estimation of. G. Edgar, 394.
- Creatinine Estimations:** Picric acid for —; Purification of. S. R. Benedict, 78.
- Cresolol:** Certain medicinal phenolic esters; Microchemical identification of. Benzonaphthol, Salol, Betol, —, Salophene. M. G. Deniges, 228.
- Cresol:** Sugar in condensed waters by means of —; Detection of. G. E. Stevens, 344.
- Critical State:** Compounds in the —; Molecular polymerisation of. J. A. Müller, 95.
- Crucibles:** Platinum —; Radiator for. M. M. Green, 573.
- "Crude Fibre" Types:** Flours by means of standard —; Estimation and identification of. A. Fornet, 73.
- Crude Vegetable Oils:** Copper acetate; Reaction of — with. W. H. Dickhart, 224.
- "Crystal":** Syrup (Legal Notes), 600.
- Cupferron:** Tin from other metals and estimation of tin by means of —; Separation of. N. H. Furman, 626.
- Cuprous Ammonium Carbonate:** Carbon Monoxide by — and cuprous ammonium formate; Absorption of. A. T. Larson and C. S. Teitsworth, 138.

- Cuprous Ammonium Formate:** Cuprous ammonium carbonate and —; Absorption of carbon monoxide by. A. T. Larson and C. S. Teitworth, 138.
- Custard Powder:** Egg — (Notes). E. Hinks, 542.
- Cyanamide:** Estimation of —; Method for the. A. Nanussi, 346.
- Cyanide:** Urea alone and in the presence of — by means of urease; Estimation of. E. J. Fox and W. J. Geldard, 456.
- Cyanide:** Aeration; Estimation of — by. J. H. Roe, 566.
- Cyanide Reactions:** Some —; Sensitiveness of. J. B. Ekeley and I. C. Macy, 183.
- Cyclohexane:** Asphaltenes from mineral oils by means of —; Separation of. M. Jakeš, 567.
- Cystine:** Urine; Colorimetric estimation of — in. J. M. Looney, 82.
- D**
- Dairy Congress:** World's —, 52.
- Dairy:** Statutory Rules and Orders, 1922, No. 1332. —, England, 27.
- Department of Scientific and Industrial Research:** —, Food Investigation Board. Brown heart—a functional disease of apples and pears, 490.
- Department of Scientific and Industrial Research:** —, Food Investigation Board. Mould growths upon cold store meat, 549.
- Department of Scientific and Industrial Research:** —, Stone Work; Preservation of, 327.
- Department of Scientific and Industrial Research:** —, Food Investigation Board for the Year 1921; Report of the, 20.
- Department of Scientific and Industrial Research:** —, Food Investigation Board. Studies in sweetened and unsweetened condensed milk, 448.
- Dermatitis:** Dyed fur; — from. A. C. Roxburgh, 283.
- Dermatitis:** Dyed fur; — from. H. C. Semon, 282.
- Dessication:** Carbohydrates of plant tissue; Effects of the method of dessication on the. K. P. Link and W. E. Tottingham, 187.
- Detergent Action:** Soaps; Method for determining the — of. J. W. McBain, R. S. Harborne and A. M. King, 568.
- Dextrose:** Lævulose; Separation of — and. F. Lucius, 607.
- Diastatic Enzymes:** Flour strength to the — present; Relation of. L. A. Rumsey, 218.
- Diazotisation:** Toxicological examinations for alkaloids; — of the benzoyl radical in. H. Pecker, 502.
- Dichromate Method:** Tellurium by the —; Volumetric estimation of. V. Lenher and H. F. Wakefield, 464.
- Didymium:** Cerium salts; Detection and estimation of — in. L. Dede, 626.
- Diethyl Phthalate:** Phthalates; Modified test for, with particular reference to the detection of —. R. E. Andrew, 508.
- Diethylphthalate:** Spirits; Detection of — and phthalates in. R. L. Calvert, 75.
- Digestibility:** Fats; — of. C. F. Langworthy, 232.
- Digestion:** Albumin; Determination of the velocity of — of. A. Friederich, 336.
- Digitalis:** Active principles of —; Chemical method of assaying the. A. Knudson and M. Dresbach, 76.
- Dilute Sodium Oxalate Solution:** —; Stability of. E. S. Hopkins, 191.
- Dinitrosalicyclic Acid:** Titratable alkali of the blood with —; Estimation of the. J. B. Sumner, R. S. Hubbard and L. L. Finner, 563.
- Dinitroso-Resorcinol:** Cobalt in the presence of nickel and other metals of the iron group by —; Estimation of. W. R. Orndorff and M. L. Nichols, 463.
- Dioxide:** Nickel as —; Gravimetric estimation of. W. Vanbel, 41.
- Diphtheria Bacilli:** Virulence of —; Whole culture method for testing the. C. G. Bull and C. M. McKee, 343.
- Disinfectants:** Parliamentary Notes. House of Commons, April 8. Sale of —. Bacteriological Examination of Milk, May 9. Preservatives in Food, 268.
- Dispensed Medicines:** —; Analysis of, 492.
- Dispensing:** Accuracy in —; Limits of (Legal Notes), 324.
- Dispensing:** Faulty — (Legal Notes), 215.
- Distillation:** Isotopes by — and analogous processes; Separation of. R. S. Mulliken, 45.
- Distribution Coefficients:** Organic acids by extraction; — and the estimation of. J. Pinnow, 141.
- Dolomite:** Magnesian limestone; Method of analysis for — and. S. D. Averitt, 92.
- Dominion Laboratory:** —, New Zealand. Fifty-fifth Annual Report, 1921. J. S. MacLaurin, 170.
- Dried Egg:** Liquid egg; Detection of — in. C. Hohenegger, 605.
- Dried Milk:** Labelling of — (Parliamentary Notes), 330.
- Dried Milk:** Ministry of Health. —, Circular 452. A. K. MacLachlan, 604.
- Dried Milks:** Fat, lactose, and moisture in —; Estimation of. H. Jephcott, 529.
- Dried Milks:** House of Commons, July 4. Skimmed —. Pasteurised Milk (Parliamentary Notes), 384.
- Drinking Water:** Carbon dioxide in —; Estimation of. P. Lehmann and A. Reuss, 503.
- Drug:** Potassium iodide; Compounded — containing excess of (Legal Notes), 448.
- Drugs:** Japanese Pharmacopoeia; — in the, 76.
- Drugs:** Neoarsphenamine; Examination of. Constitution of the French —. A. D. Macallum, 32.
- Drugs:** Oxymethylantraquinone compounds in —; Estimation of. E. Maurin, 31.
- Dust Estimation:** Method of —; New. R. N. Kotzé, 572.

Dyed Fur: Dermatitis from ——. A. C. Roxburgh, 283.

Dyed Fur: Dermatitis from ——. H. C. Semon, 282.

Dyed: Furs. W. F. Castle, 284.

Dyed Materials: —; Properties of. H. Wales, 620.

Dyes: Spectrophotometric identification of ——. W. C. Holmes, 572.

Dyes: Temperature indicators; Use of ——. as. P. A. Kober, 573.

Dyes: Triphenylmethane and azo — by means of titanium trichloride solution; Analysis of. W. S. Calcott and F. L. English, 620.

Dyestuffs: Titration methods; Valuation of — by. R. B. Brown and H. Jordan, 570.

E

Earths: Sugars by Fehling solution; Action of alkaline — upon the estimation of. L. Eynon and J. H. Lane, 277.

Earths: Thorium and rare — in pitch-blende; Separation of uranium from. W. Riss, 626.

Eastern Sweetmeats: — Composition of. A. Heiduschka and P. Zywnev, 332.

Edible Fats: —; Deterioration of. J. F. Bevis, 607.

Edible Fat: Unsaponifiable matter and sterols of —; Some observations with regard to the. D. W. Stewart, 155.

Effluents: Toxic organic combustion products in —; Detection of. A. Gregoire, 397.

Egg: Custard powder (Notes). E. Hinks, 542.

Egg: Dried — in liquid —; Detection of. C. Hohenegger, 605.

Egg Salad: Food poisoning traced to —; Outbreak of. C. E. A. Anslow, J. V. Hiscock, O. F. Rogers, and E. S. Robinson, 393.

Ehrlich Method: Caramel in sugar products; Estimation of. A criticism of the ——. G. P. Meade, 223.

Electro-Deposition Methods: Metals in hydrochloric acid solution; — for the estimation of. A. J. Engelenburg, 291.

Electrolytic Apparatus: Arsenic; — for the estimation of. G. W. Monier-Williams, 112.

Electrolytic Method: Arsenic by the —; Estimation of (Notes). G. W. Monier-Williams, 262.

Electrometric Acidimetry and Alkalimetry: Hydrogen; — without the use of. P. A. Van Der Meulen and F. Wilcoxon, 139.

Electrometric Standardising: Titanous solutions; — of. W. S. Hendrixson and L. M. Verbeck, 41.

Electrometric Titration: Apparatus for —; Simple. W. E. Garner and C. A. Waters, 142.

Electrometric Titration: Cobalt with silver nitrate; — of. E. Müller and H. Lauterbach, 140.

Electrometric Titration: Halides in the presence of one another; — of the. H. H. Willard and F. Fenwick, 240.

Electrometric Titration: Nickel with silver nitrate; — of. E. Müller and H. Lauterbach, 42.

Electrometric Titration: Reducing sugars; — of. W. L. Daggett, A. W. Campbell and J. L. Whitman, 277.

Electrometric Titration: Sulphurous acid with permanganate; — of. W. S. Hendrixson and L. M. Verbeck, 93.

Electrometric Titration: Vanadium in the presence of iron and chromium; New method for the — of. H. H. Willard and F. Fenwick, 192.

Electrometric Titration: Vessel for —; New. W. T. Bovie, 143.

Elementary Analysis: Volumetric method of —; New. L. Hackspill and G. de Heeckeren, 504.

Elements: Radium from other —; Separation of. M. Cialdea, 240.

Elutriation Methods: Cacao husk from cocoa powder; Analytical — of separating. R. Whympier, 73.

Emanation Method: Radium by the —; Quantitative estimation of. C. E. Baumgarten and H. H. Barker, 512.

Engines: Opening explosive — from a distance; Procedure for. G. A. Lé Roy, 407.

Enzymes: Flour strength to the diastatic — present; Relation of. L. A. Rumsey, 218.

Enzymes: Insulin; Action of proteolytic — upon. E. J. Witzemann and L. Livshis, 614.

Equations: Simultaneous —; An avoidance of (Notes). A. Fairbourne, 263.

Ergot: —; Adulteration of. G. Tanret, 278.

Ergot: Pharmacopoeial preparations of —; Activity of. A. J. Clark and W. A. Broom, 498.

Errata, etc.:

Vol. XLVII., 1922.

P. 214, line 2, for "220" read "135"

P. 306, line 24, for "262" read "292."

P. 484, line 3, for "1921" read "1922."

P. 501, line 16, for "Wyrney" read "Vyrnwy."

P. 502, line 3, for "Wyrney" read "Vyrnwy."

Vol. XLVIII., 1923.

P. 60, line 4, delete "do not."

P. 90, add "ANALYST, 1921, 215."

P. 173, line 25, for "122" read "120."

P. 252, line 8 from bottom, for "1922" read "285."

P. 395, line 9 from bottom, for "Bell's" read "Pelkan's."

P. 418, line 5 from bottom, after "47" add "3."

P. 433, line 13, for "231" read "239."

P. 457, line 6 from bottom, for "22" read "92."

P. 534, line 8, for "42:37" read "47:27."

P. 542, line 5, for "271" read "279."

Essential Oils: Congelation of —; Note on the. W. J. Sanderson and W. J. Jones, 134.

Essential Oils: Easily hydrated alcohols of —; Estimation of the. L. S. Glichitch, 505.

Essential Oils: Eugenol in —; Estimation of. P. N. Van Eck, 567.

- Essex:** Sulphated waters of —. J. C. Thresh, 82.
- Ester:** Hexose-phosphoric —; New. R. Robison, 189.
- Esters:** Linalyl — in peaches; Confirmation of the presence of. F. B. Power and V. K. Chesnut, 129.
- Esters:** Medicinal phenolic —; Microchemical identification of certain. Benzonaphthol, Salol, Betol, Cresalol, Salophene. M. G. Deniges, 228.
- Etching Reagents:** Natural waters (and of some —) in relation to action on metals; Hydrogen ion concentration of. W. R. G. Atkins, 396.
- Ether:** Ethyl — in air, blood and other fluids; Estimation of. H. W. Haggard, 235.
- Ethyl Alcohol:** Acetone and of — in mixtures of the two; Estimation of. J. H. Bushill, 398.
- Ethyl Alcohol:** Methyl alcohol in —; Detection of. R. Meurice, 505.
- Ethyl Chloride:** Codex reaction for —; The. A. Richaud, 280.
- Ethyl Ether:** Air, blood and other fluids; Estimation of — in. H. W. Haggard, 235.
- Ethylgalactoside- β :** Reducing sugars; Isolation of — in the presence of a large proportion of. J. Charpentier, 333.
- Eugenol:** Essential oils; Estimation of — in. P. N. Van Eck, 567.
- Explosion Burette:** —; New. A. Krieger, 94.
- Explosive Dusts:** Air; Collection and examination of — in. L. J. Trostel and H. W. Frevert, 241.
- Explosive Engines:** Opening — from a distance; Procedure for. G. A. Le Roy, 407.
- Extract of *Atractylis Gummifera*:** Liquorice extract; Detection of — in. U. Giuffre, 30.
- Extracts:** Substitutes; Meat — and their. K. Berk and W. Schneider, 551.
- F**
- Farm Animals:** Cod-liver oil in the feeding of — Use of. J. C. Drummond, S. S. Silva and J. Golding, 337.
- Fat:** Dried milks; Estimation of —, lactose and moisture in. H. Jephcott, 529.
- Fat:** Hogs; Effect of fish meal upon the — of. J. B. Martin, 387.
- Fat:** Ministry of Health. Condensed Milk, Circular 393. Sale of Milk Deficient in —, Circular 399, 271.
- Fat-Soluble Vitamin:** Light; — and the action of. H. Steenbock and E. M. Nelson, 499.
- Fats:** Acrolein and its bearing on rancidity in —; New test for. W. C. Powick, 128.
- Fats:** Digestibility of —. C. F. Langworthy, 232.
- Fats:** Edible —; Deterioration of. J. F. Bevis, 607.
- Fats:** Iodine value of — by Aschmann's method; Estimation of the. B. M. Margosches, R. Baru and L. Wolf, 346.
- Fats:** Unsaponifiable matter and sterols of edible —; Some observations with regard to the. D. W. Steuart, 155.
- Fatty Acids:** Butter fat; Estimation of — in. H. E. B. Holland and others, 555.
- Fatty Acids:** Fish oils; The highly unsaturated — of. J. B. Brown and G. D. Beal, 453.
- Fatty Matters:** Soil; Investigation by means of pyridine of the humus and — of the. M. Piettre, 345.
- Faulty:** Dispensing (Legal Notes), 215.
- Federated Malay States:** —. Annual Report of the Chemical Laboratories, Institute for Medical Research, for the year 1922, 603.
- Feder's Value:** Minced meats; — for. Pannwitz and Harder, 227.
- Fehling Solution:** Reducing sugars by means of — with methylene blue as internal indicator; Estimation of. J. H. Lane and L. Eynon, 220.
- Fehling Solution:** Sugars by —; Action of alkaline earths upon the estimation of. L. Eynon and J. H. Lane, 277.
- Ferric Oxide:** Nitrate method; Separation of — and alumina from magnesia by the. A. Charriou, 41.
- Ferrocyanide Titration:** Metals; Influence of alkali metals on the — of certain. W. D. Treadwell and D. Chervet, 461.
- Ferrous Hydroxide:** Nitrites and nitrates; Ferrous hydroxide as reducing agent in the estimation of. S. Miyomato, 45.
- Ferrous Hydroxide:** Reducing action of —. New method of estimating nitrites and nitrates. S. Miyamoto, 402.
- Ferrum Redactum:** Metallic iron in —; Estimation of. C. E. Williams and A. E. Anderson, 77.
- Féry Spectrograph:** —; Simplified, 94.
- Feterita (Sorghum) Kernels:** Milo and —; Composition of. J. L. Bidwell, L. E. Bopst and J. D. Bowling, 125.
- Field Weeds:** Seeds and fruit of certain —. J. Greger, 622.
- Filter Plates:** Laboratory use; Porous glass — for. G. F. Hüttig, 629.
- Filter Pump:** Bunsen valve in connection with a —; Use of the. F. W. Ashton, 406.
- Filtrates:** Folin-Wu method for obtaining protein-free blood —; Modification of the. R. L. Haden, 501.
- Firearms:** Forensic cases; The examination of — and projectiles in. A. Lucas, 203.
- Firearms:** Projectiles; The examination of — and (Notes), 380.
- Fish:** Food value of Pacific — and on the constants of whale oil; Notes on the. W. M. Doherty, 495.
- Fish Liver Oils:** Sulphuric acid test for —; Note on the. N. Evers and H. J. Foster, 58.
- Fish Meal:** Fat of hogs; Effect of — upon the. J. B. Martin, 387.
- Fish Oils:** Highly unsaturated fatty acids of —; The. J. B. Brown and G. D. Beal, 453.

- Flash Point:** Elevation of the —; Determination of the molecular weight of substances in alcoholic solution from the. R. Wright, 46.
- Flash Points:** Pure organic substances; Calculation of — of. E. Mack, C. E. Board and H. N. Barham, 571.
- Flax:** Hemp; Method for distinguishing — from. C. R. Nodder, 88.
- Flesh Food:** Vitamin B in frozen —; Presence of. A. M. Wright, 611.
- Flocculation:** Soils; — of. III. N. M. Comber, 132.
- Flour:** Malt and malt extract upon the strength of —; Action of. F. A. Collatz, 219.
- Flour Millers:** British —; Research Association of. 550.
- Flour Strength:** Diastatic enzymes present; Relation of — to the. L. A. Rumsey, 218.
- Flour:** Strength of wheat —; Chemistry of the. H. E. Woodman, 72.
- Flour:** Strength of wheat —; Influence of starch on the. J. H. Buchanan and G. G. Naudain, 606.
- Flour:** Wheat hairs present; Grading of — by enumeration of the. G. L. Keenan, 178.
- Flours:** Standard "crude fibre" types; Estimation and identification of — by means of. A. Fornet, 73.
- Flowers:** Pyrethum —; Insecticidal principle of. J. Chevalier and F. Mercier, 392.
- Fluids:** Ethyl ether in air, blood and other —; Estimation of. H. W. Haggard, 235.
- Fluorine:** Zinc blende; Estimation of — in. L. A. Rocha-Schmidt and K. Kruger, 628.
- Fodder:** Babassu — on butter and lard; Effect of. N. Bengtsson, 225.
- Folin and Wu Estimation:** Photochemical action in the — of uric acid; Error due to. H. Rogers, 282.
- Folin's Method:** Nitrogen estimation; Use of potassium persulphate in — for. S. Y. Wong, 342.
- Folin-Wu Method:** Protein-free blood filtrates; Modification of the — for obtaining. R. L. Haden, 501.
- Food Acidifier:** Inactive malic acid as a —. J. M. Weiss, C. R. Downs and H. P. Corson, 453.
- Food and Drugs Analysis: Abstracts:** 1923; 29, 72, 125, 178, 218, 276, 331, 385, 451, 494, 551, 605.
- Food:** Colourings. F. W. Richardson, 390.
- Food Investigation Board:** Department of Scientific and Industrial Research. — Brown Heart — a functional disease of apples and pears, 490.
- Food Investigation Board:** Department of Scientific and Industrial Research. — Mould growths upon cold store meat, 549.
- Food Investigation Board:** Department of Scientific and Industrial Research. — Studies in sweetened and unsweetened condensed milk, 448.
- Food Investigation Board:** Department of Scientific and Industrial Research. Report of the — for the Year 1921, 20.
- Food Inspection:** United States Department of Agriculture. — Decision 192. Mustard and mustard products, 493.
- Food:** Parliamentary Notes. House of Commons. April 8. Sale of Disinfectants. Bacteriological Examination of Milk. May 9. Preservatives in —, 268.
- Food Poisoning:** Egg Salad; Outbreak of — traced to. C. E. A. Winslow, J. V. Hiscock, O. F. Rogers, and E. S. Robinson, 393.
- Food:** Preservatives, 216.
- Food Preservatives:** Committee, 384.
- Food:** Preservatives in —. Hull Statistics for the ten years 1913 to 1922. A. R. Tankard, 540.
- Food Value:** Pacific fish and on the constants of whale oil; Notes on the — of. W. M. Doherty, 495.
- Foods:** Acids occurring in — and in wine; The sourness of. T. Paul, 334.
- Foods:** Amino acid nitrogen in — by means of the "Ninhydrin" method; Colorimetric estimation of. H. Riffart, 179.
- Foods:** Cream, milk and other —; Estimation of boric acid in (Process used in the Government Laboratory), 416.
- Foods:** Tin in Canned — (Legal Notes), 326.
- Foods:** Vitamin C in —; Protection of. E. F. Kohman, 232.
- Foodstuffs:** "Liquid eggs" and other —; The estimation of boric acid in. G. W. Monier-Williams, 413.
- Foodstuffs:** Metallic poisons in —. W. M. Willoughby, 184.
- Foodstuffs:** Sulphur dioxide in cattle — after fumigation; Note on the presence of. H. A. Peacock, 160.
- Forensic Cases:** Firearms and projectiles in —; The examination of. A. Lucas, 203.
- Formaldehyde:** Acetaldehyde; The estimation of — and. E. W. Blair and T. S. Wheeler, 110.
- Formaldehyde:** Copper sulphate; Estimation of — in presence of. M. Jakes, 346.
- Formaldehyde:** Formalin; Estimation of — in. P. Borgstrom, 608.
- Formaldehyde:** Organic material; Detection of — in. H. Lührig, 396.
- Formaldehyde:** Paraformaldehyde; Estimation of — in. P. Borgstrom and W. G. Horsch, 457.
- Formaldehyde:** Pentoses, —, and methyl alcohol; Detection of. J. B. Sumner, 619.
- Formalin:** Formaldehyde in —; Estimation of. P. Borgstrom, 608.
- Formic Acid:** Caramelisation of cane sugar; Formation of — by. S. G. Simpson, 607.
- Formic Acid:** —; Estimation of. E. O. Whittier, 290.
- Formic Acid:** Urine; Estimation of — in. E. M. Benedict and G. A. Harrop, 81.
- Formula:** Sulphuric acid from its specific gravity; A — for the determination of the normality of a solution of (Notes). C. C. Roberts, 381.
- Fractional Distillation:** Methyl oleate and linolate by —; Separation of. E. André, 290.

- Freezing Point Curve:** Proportions of T.N.T. and tetryl from the —; Estimation of the. C. A. Taylor and W. H. Rinckenback, 137.
- French Drugs:** Neosarsphenamine; Examination of. Constitution of the —. A. D. Macalulm, 32.
- Frozen Flesh Food:** Vitamin B in —; Presence of. A. M. Wright, 611.
- Fruit:** Certain field weeds; Seeds and — of. J. Greger, 622.
- Fruit:** Guava —. A. Azadian, 74.
- Fruit Juices:** Arsenic in the fermentation of arsenical —; The fate of. H. Bosselmann and A. Koch, 618.
- Fruit:** Pectin in — and — products; Estimation of. H. J. Wichmann, 181.
- Fruit Products:** Pectin in fruit and —; Estimation of. H. J. Wichmann, 181.
- Fruits:** Acids present in certain —; The. C. F. Muttelet, 181.
- Fruits:** Canned —; Oxygen and perforations in. E. F. Kohman, 388.
- Fruits:** Pectic constituents of stored —; Changes occurring in the. M. H. Carré, 34.
- Fruits:** Vitamin C in some oriental — and vegetables; Presence of. H. Embrey, 340.
- Fuller's Earth:** Pinene and other terpenes; Effect of — on. C. S. Venable, 235.
- Fumaric Acid:** Microchemical detection of —. L. Van Itallie, 190.
- Fumaric, Malic, and Maleic Acids:** Volumetric standards; — as. N. A. Lange and H. Kline, 133.
- Fumes:** Chemical Works; — from (Legal Notes), 266.
- Fumigation:** Sulphur dioxide in cattle foodstuffs after —; Note on the presence of. H. A. Peacock, 160.
- Fur:** Dyed —; Dermatitis from. A. C. Roxburgh, 283.
- Fur:** Dyed —; Dermatitis from. H. C. Semon, 282.
- Furs:** Dyed —. W. F. Castle, 284.

G

- Galenic Preparations:** Alder and its —; Variation of oxymethylantraquinone compounds in. E. Maurin, 32.
- Gallic Acid:** Pyrogallol, gallotannin and —; The colorimetric estimation of. C. A. Mitchell, 2.
- Gallo-tannin:** Glucose; A — apparently free from (Notes). M. Nierenstein, 321.
- Gallotannin:** Pyrogallol, — and gallic acid; The colorimetric estimation of. C. A. Mitchell, 2.
- Gambusia Affinis:** *B. Coli* index of pollution of water; Effect of — on the. L. C. Havens and S. A. Dehler, 393.
- Gas Analysis:** Phosphorus in —; Use of. A. Holmes, 348.
- Gas:** Benzene in coal — by means of active charcoal; Estimation of. R. Kattwinkel, 507.
- Gas Examiners:** Gas Regulation Act, 1920. Abstract of Memorandum by the Gas Referees on the Appointment, Qualifications and Duties of —. 604.
- Gas Mixtures:** Methyl chloride; Analysis of — containing. R. H. McKee and S. P. Burke, 458.
- Gas Regulation Act:** —, 1920. Abstract of Memorandum by the Gas Referees on the Appointment, Qualifications and Duties of Gas Examiners, 604.
- Gases:** Measurement of the specific gravity of — in small quantities; Apparatus for the. A. Blackie, 141.
- Gases:** Water; The absorption of atmospheric — by. J. H. Coste, 433.
- Gas Works Effluent:** Pollution of river with — (Legal Notes), 214.
- Gasometric Method:** Halogens in organic compounds; — of estimating. A. K. Macbeth, 85.
- Gauze Dish:** Solids or moisture by means of a —; Estimation of. A. Seidenberg, 466.
- Gelatin:** Chondrin in —; Detection of. M. A. Rakusin, 569.
- Gelatin-Tannin Reaction:** —; The. A. W. Thomas and A. Frieden, 508.
- Gelatin Test:** Catechin; The — and (Notes). M. Nierenstein, 542.
- Geraniol:** Apples; Detection of — in. F. B. Power and V. K. Chesnut, 129.
- German-Grown Tobacco:** Leaves and smoke of untreated —; Nicotine content of the. H. Rhode, 334.
- Germanium:** Gravimetric estimation of —; New method for the. J. H. Müller, 42.
- Germinated and Ungerminated Barley:** Maltase in —; Presence of. A. R. Ling and D. R. Nanji, 606.
- Gillespie's Method:** Hydrogen-ion concentration; Modification of — for the determination of. W. D. Hatfield, 290.
- Gland:** Powdered thyroid —; Analysis of, and detection of adulterants. R. Fabre and H. Penau, 182.
- Glass Containers:** Material dissolved from —; Contamination of water samples with. W. D. Collins and H. B. Riffenburg, 132.
- Glass Filter Plates:** Laboratory use; Porous — for. G. F. Hüttig, 629.
- Glass:** Lead and arsenic from — (Legal Notes), 215.
- Glass:** Lead —; The action of potassium carbonate on. H. D. Richmond, 260.
- Globulin:** New —, Conphaseolin, in the Navy bean (*Phaseolus vulgaris*); Presence of a. H. C. Waterman, C. O. Johns, D. B. Jones and S. Phillips, 229.
- Gloucestershire Public Analyst:** —; Appointment of (Parliamentary Notes), 330.
- Glucose:** Bismuth by —; Reduction of. H. Cousin, 625.
- Glucose:** Gallo-tannin apparently free from —; A (Notes). M. Nierenstein, 321.
- Gold:** —; Detection of. H. I. Cole, 90.

- Gold**: —; Volumetric estimation of. W. B. Pollard, 401.
- "Golden Syrup"**: Warranty (Legal Notes), 544.
- Government Chemist**: Work of the Government Laboratory; Report of the — upon the. For the Year Ending March 31st, 1923, 545.
- Government Laboratory**: Government Chemist upon the Work of the —; Report of the. For the Year Ending March 31st, 1923, 545.
- Grading**: Flour by enumeration of the wheat hairs present; — of. G. L. Keenan, 178.
- Grape Beverages and Flavours**: Methyl anthranilate in —. R. D. Scott, 453.
- Grape Juices**: Methyl anthranilate; Examination of authentic — for. F. B. Power and V. K. Chesnut, 181.
- Grass Sickness**: Horses; — in, 327.
- Greasewood**: — (*Sarcobatus vermiculatus*); Toxic constituent of. J. F. Couch, 84.
- Greensand**: Toxicity of so-called poisonous —; Cause of the. J. W. Kelly, 286.
- Grignard Reagent**: —; Quantitative estimation of the. H. Gilman, P. D. Wilkinson, W. P. Fishel and C. H. Meyers, 134.
- Ground Almonds**: Barley in — (Legal Notes), 545.
- Growth-Promoting and Anti-Rachitic Functions**: Certain substances; Relation between the — of. H. Goldblatt and S. S. Zilva, 612.
- Growth-Promoting Substances**: Bacterial origin; Observations in regard to — of. S. R. Damon, 561.
- Growth-Promoting Value**: Palm-kernel meal; — and vitamin content of. A. J. Finks, 611.
- Guava**: Fruit. A. Azadian, 74.
- Gum Benzoin**: Colloidal —; Properties of. H. D. Wright and W. O. Kermack, 611.
- Gums**: Sugar products; Estimation of — in. H. T. Ruff and J. R. Withrow, 74.
- H**
- Hæmoglobin**: Colorimeter for the estimation of —; New. H. S. Newcomer, 342.
- Hæmoglobin**: Iron in — and blood; Colorimetric estimation of. S. Y. Wong, 342.
- Hæmoglobin**: Refractometric estimation of —. J. L. Stoddard and G. S. Adair, 617.
- Hair**: Mammalian —; Preparation of sections of. J. A. F. Roberts, 352.
- Halides**: Chloride, bromide and iodide in mixed silver —; Qualitative separation of. H. Schmaifuss, 294.
- Halides**: — in the presence of one another; Electrometric titration of the. H. H. Willard and F. Fenwick, 240.
- Halogen Ion Titration**: Silver; Indicator for, and —. K. Fajaus, 401.
- Halogen**: Sulphur and — in organic compounds; Method for the simultaneous estimation of. C. S. Leonard, 188.
- Halogens**: Organic compounds; Gasometric method of estimating — in. A. K. Macbeth, 85.
- Hardened Vegetable Oils**: Iodine values and refractive indices of some —; Relationship between the. J. J. Sudborough, H. I. Watson and D. Y. Athawale, 180.
- Hardness**: Water; Estimation of temporary — in. W. R. Atkin and A. Gardner, 285.
- Harrogate Waters**: Barium in the —. A. Woodmansey, 132.
- Hashish**: Preparations containing it; Examination of — and. A. Azadian, 77.
- Hawala**: — (Oriental nougat). A. Azadian, 496.
- Hay**: Amino acids of linseed meal, wheat meal, Soya beans, and red clover —; Quantitative estimation of. T. S. Hamilton, N. Uyei, J. B. Baker and H. S. Grindley, 234.
- Heat Coagulation**: Milk; — of. A. Leighton and C. S. Mudge, 385.
- Heat Treatment**: Chinese wood (Tung) oil and linseed oil; — of. C. E. Mabery, 459.
- Heavy and Corrosive Liquids**: Delivering —; Laboratory device for. A. P. Harrison, 406.
- Hemp and Wood Fibres**: Paper pulp; The quantitative estimation of — in. W. Dickson, 373.
- Hemp**: Flax from —; Method for distinguishing. C. R. Nodder, 88.
- Hesperidin Deposits**: Apricots; — in. C. Griebel, 454.
- Hexamethylene Tetramine**: Microchemical reagent; — as a. H. E. Cole, 509.
- Hexone Bases**: Protein hydrolysates; Electrolytic separation of — from. G. L. Foster and C. L. A. Schmidt, 501.
- Hexose-Phosphoric Ester**: —; New. R. Robison, 189.
- Highly Unsaturated Fatty Acids**: Fish oils; The — of. J. B. Brown and G. D. Beal, 433.
- Histidine**: Knoop's reaction for —; Modification of. G. Hunter, 79.
- Histology**: Avocado; — and chemistry of the. W. J. Stoneback and R. Calvert, 553.
- Hogs**: Fat of —; Effect of fish meal upon the. J. B. Martin, 387.
- Hogs**: Lard obtained from — fed with a control ration; Vitamin A content of. M. G. Mallon and M. Clark, 130.
- Honey**: Proteins of —; New method for estimating. O. Laxa, 495.
- Horses**: Grass sickness in —, 327.
- House of Commons**: Parliamentary Notes. — April 8. Sale of Disinfectants, Bacteriological Examination of Milk. May 9. Preservatives in Food. 268.
- Household Conditions**: *B. Botulinus* under —; Experiments with. R. B. Edmondson, C. Thom and L. T. Giltner, 563.
- Hull Statistics**: Preservatives in Food. — for the ten years 1913 to 1922. A. R. Tankard, 540.
- Human Body**: Arsenic content of the —; Normal. O. Billiter and E. Marfurt, 618.
- Humus**: Soil; Investigation by means of pyridine of the — and fatty matters of the. M. Piettre, 345.

- Humus:** Soils; Comparative study of certain methods of estimating — in. V. Agafonoff, 566.
- Humus Soils:** Mechanical analysis of —. G. W. Robinson, 84.
- Hydrochloric Acid Solution:** Metals in —; Electro-Deposition methods for the estimation of. A. J. Engelenburg, 291.
- Hydrocyanic Acid:** Microchemical estimation of —. L. Rosenthaler and K. Seiler, 399.
- Hydrofluoric Acid:** Hydrofluosilicic acid; Titration of — and hydrofluosilicic acid in mixtures containing small amounts of. P. H. M. P. Brinton, L. A. Sarver and A. E. Stoppel, 628.
- Hydrofluosilicic Acid:** Hydrofluoric acid and — in mixtures containing small amounts of —; Titration of. P. H. M. P. Brinton, L. A. Sarver and A. E. Stoppel, 628.
- Hydrogen:** Electrometric acidimetry and alkali-metry without the use of —. P. A. Van Der Meulen and L. Wilcoxon, 139.
- Hydrogen Ion Concentration:** Blood; Micro-colorimetric estimation of — of the. V. C. Myers, H. W. Schmitz and L. E. Booker, 564.
- Hydrogen Ion Concentration:** Natural waters (and of some etching reagents) in relation to action on metals; — of. W. R. G. Atkins, 396.
- Hydrogen Ion Concentration:** Soils; Colorimetric determination of the — in. C. T. Gimmingham, 287.
- Hydrogen Ion Concentration:** Sulphonphthalein indicators for the determination of —; New, 401.
- Hydrogen Ion Concentration:** Vegetable tanning materials; Effect of — on the analysis of. J. A. Wilson and E. J. Kern, 88.
- Hydrogen Ion Concentrations:** Gillespie's method for the determination of —; Modification of. W. D. Hatfield, 290.
- Hydrogen Ion Determinations:** Tungsten wire for —. J. R. Baylis, 512.
- Hydrogen:** Organic compounds containing arsenic or mercury; Quantitative estimation of carbon and — in. M. Falkov and G. W. Raiziss, 288.
- Hydrogen:** Traces of nitrogen; Analysis of — for. R. L. Dodge, 509.
- Hydrogenated Oil:** Oil baths; — for. G. R. Robertson, 466.
- Hydrolysates:** Hexone bases from protein —; Electrolytic separation of. G. L. Foster and C. L. A. Schmidt, 501.
- Hydrolysis:** Pectin; — of. F. Tutin, 223.
- Hydroxylamine:** —; Characteristic reaction of. W. N. Hirschel and J. A. Verhoeff, 464.
- Hydroxylamine:** —; Detection of. W. M. Fischer, 348.
- Hypnotics:** Veronal and — of the barbituric series; Hydrolysis of the xanthylated derivatives of, and its toxicological importance. R. Fabre, 284.
- Hypochlorite Solution:** Tropics; Alleged deterioration of — in the (Legal Notes), 68.
- Hypochlorites:** Milk and cream; Detection of — and Chloramines in. P. Rupp, 178.
- Hypochlorous Acid:** —; Volumetric estimation of. A. Schleicher, 403.

I.

- Indicator:** Acidimetry; New — for. A. Reisenleitner, 509.
- Indicator:** Bromoxyleneol blue. A true-neutrality point —. A. Cohen, 622.
- Indicator:** Methyl orange —; Modified. K. C. D. Hickman and R. P. Linstead, 89.
- Indicator:** Reducing sugars by means of Fehling solution with methylene blue as internal —; Estimation of. J. H. Lane and L. Eynon, 220.
- Indicator:** Silver and halogen ion titration; — for. K. Fajaus, 401.
- Indicators:** Dyes as temperature —; Use of. P. A. Kober, 573.
- Indicators:** Hydrogen-ion concentration; New Sulphonphthalein — for the determination of, 401.
- Indium:** —; Detection and estimation of. I. Wada and S. Ato, 571.
- Influenza bacillus;** Growth of the —; Observations on the. S. R. Damon, 393.
- Inks:** Writing —; Examination of. F. F. Rupert, 459.
- Inorganic Analysis: Abstracts:** 1923; 40, 89, 138, 191, 238, 250, 348, 401, 461, 509, 571, 622.
- Inorganic and Organic Compounds:** Sulphur, arsenic, and antimony in —; Estimation of. F. Feigl and R. Schorr, 623.
- Inositol:** —; Quantitative estimation of. J. Needham, 496.
- Insecticidal Principle:** Pyrethrum flowers; — of. J. Chevalier and F. Mercier, 392.
- Institute for Medical Research:** Federated Malay States. Annual Report of the Chemical Laboratories, — for the Year 1922, 603.
- Institute of Chemistry of Great Britain and Ireland:** 1923: 152, 175, 270, 412.
- Institute of Metals:** Alloys; Structure of, 268.
- Insulin:** —. F. A. Hocking, 613.
- Insulin:** —; Purification and properties of. H. W. Dudley, 500.
- Insulin:** Proteolytic enzymes upon —; Action of. E. J. Witzemann and L. Livshis, 614.
- Insurance Act Dispensing:** County Borough of Salford. Report on —. G. D. Elsdon, 264.
- International Standardisation:** Quillaia preparations; — of. J. Cofman-Nicoresti and S. B. Tallantyre, 497.
- International Union:** Pure and Applied Chemistry; — of. Third Conference, 22.
- Intestinal Bacteria:** Phenol by —; Formation of. L. R. Bouwman, 457.
- Inulin:** Mycological identification of —. A. Castellani and F. E. Taylor, 35.
- Invertase:** Substances inhibiting the action of —; Efficiency of. E. H. Harvey, 131.
- Iodine:** Certain substituted semi-carbazides and its application to their estimation; Action of — on. A. Doucet, 347.

Iodine: Chloride, bromide and — in mixed silver halides; Qualitative separation of. H. Schmalfluss, 294.

Iodine: Mineral waters containing sulphides; Rapid estimation of — in. M. J. Dubief, 285.

Iodine: Sugars by the use of —; Estimation of. F. A. Cajori, 73.

Iodine Value: Fats by Aschmann's method; Estimation of the — of. B. M. Margosches, R. Baru and L. Wolf, 346.

Iodine Value: Refined natural *d*-camphor; The Melting point and — of. M. S. Salamon, 536.

Iodine Values: Hardened vegetable oils; Relationship between the — and refractive indices of some. J. J. Sudborough, H. I. Watson and D. Y. Athawale, 180.

Iron Group: Nickel and other metals of the — by dinitroso-resorcinol; Estimation of cobalt in the presence of. W. R. Oradorff and M. L. Nichols, 463.

Iron: Haemoglobin and blood; Colorimetric estimation of — in. S. Y. Wong, 342.

Iron: Manganese; Gravimetric estimation of — and its separation from. B. Solaja, 463.

Iron: Metallic — in ferrum redactum. Estimation of. C. E. Williams and A. E. Anderson, 77.

Iron: Molybdenum; Micro-chemical estimation of — by means of. Fontès and Thivolle, 511.

Iron Salts: Tinctures of various *Boletis*; Colour reactions of — with. R. Gruyot, 560.

Iron: Selenium in presence of tellurium, —, and copper; Electrometric titration of. H. H. Willard and F. Fenwick, 349.

Iron: Sulphur in — and steel; Estimation of. F. Nikolai, 43.

Iron: Vanadium in the presence of — and chromium; New method for the electrometric titration of. H. H. Willard and F. Fenwick, 192.

Isotopes: Distillation and analogous processes; Separation of — by. R. S. Mulliken, 45.

J

Jaborandi: Venezuelan —; Examination of a. O. F. Black, J. W. Kelly and W. W. Stockberger, 129.

Japanese Pharmacopoeia: Drugs in the —, 76.

Journal: Scientific instruments; — of, 200, 578.

K

Kent: —. Report of the County Analyst for the Quarter ended December 31, 1922. F. W. F. Arnaud, 213.

Kernels: Milo and Feterita (Sorghum) —; Composition of. J. L. Bidwell, L. E. Bopst and J. D. Bowling, 125.

Kingston-upon-Hull: City and County of —. Annual Report of the Public Analyst and Bacteriologist for 1922. A. R. Tankard, 598.

Kjeldahl's Nitrogen Estimation: Potassium persulphate for accelerating digestion in —; Use of. S. Y. Wong, 341.

Knoop's Reaction: Histidine; Modification of — for. G. Hunter, 79.

Kramer-Tisdall Method: Calcium in serum by the —; Estimation of. F. F. Tisdall, 502.

Kreis Test: Quantitative aspects of the —. G. E. Holm and G. R. Greenbank, 608.

L

Laboratory Device: Heavy and corrosive liquids; — for delivering. A. P. Harrison, 406.

Laboratory Use: Filter plates for —; Porous glass. G. F. Hüttig, 629.

Lactose: Dried milks; Estimation of fat, —, and moisture in. H. Jephcott, 529.

Lactose: Micro-estimation of —. G. Fontès and L. Thivolle, 29.

Lactose: Polarimetric and the gravimetric methods; The estimation of — by the. A. L. Bacharach, 521.

Lævulose: Dextrose and —; Separation of. F. Lucius, 607.

Lancaster: County of —. Annual Report of the County Analyst for the Year 1922. W. C. Williams, 445.

Lard: Butter and —; Effect of Babassu tudder on. N. Bengtsson, 225.

Lard: Hogs fed with a control ration; Vitamin A content of — obtained from. M. G. Mallon and M. Clark, 130.

Lead: Acid calcium phosphate ("Cream Powder"); The estimation of — in (Notes). J. Miller, 263.

Lead: Biological work; Electrolytic estimation of — in. A. S. Minot, 185.

Lead: Bismuth as phosphate; Estimation of. Separation from —, copper and cadmium. G. Luff, 238.

Lead Dioxide: —; Estimation of. C. R. Somayajulu, 292.

Lead: Glass; — and arsenic from (Legal Notes), 215.

Lead Glass: Potassium carbonate on —; The action of. H. D. Richmond, 260.

Lead: Lime water; — in (Legal Notes), 116.

Leaf Cells: Vacuole contents and protoplasmic material from —; Method for separate extraction of. A. C. Chibnall, 281.

Leather: Chrome-tanned —; Analysis of. F. Little and E. Sargent, 459.

Leathers: Shoe- —; Wearing qualities of, 621.

Leaves: Untreated German-grown tobacco; Nicotine content of the — and smoke of. H. Rhode, 334.

Legal Notes: 1923; 19, 67, 116, 171, 214, 266, 324, 382, 446, 488, 544, 599.

Light: Fat-soluble vitamin and the action of —. H. Steenbock and E. M. Nelson, 499.

Lignoceric and Arachidic Acids: Arachis oil by means of magnesium soaps; Estimation of the mixture of — in. A. W. Thomas and C. L. Yu, 126.

- Lime:** Calcium chloride and —; Preparation of absolute alcohol by means of. W. A. Noyes, 234.
- Lime Water:** Lead in — (Legal Notes), 116.
- Limestone:** Dolomite and magnesian —; Method of analysis for. S. D. Averitt, 92.
- Linalyl Esters:** Peaches; Confirmation of the presence of — in. F. B. Power and V. K. Chesnut, 129.
- Linolate:** Methyl oleate and — by fractional distillation; Separation of. E. André, 290.
- Linseed, Maize and Cottonseed Oils:** Phytosterols of —; The. R. J. Anderson and M. G. Moore, 556.
- Linseed Meal:** Amino acids of —, wheat-meal, Soya beans, and red clover hay; Quantitative estimation of. T. S. Hamilton, N. Uyei, J. B. Baker, and H. S. Grindley, 234.
- Linseed Meal:** Oil; — and, 225.
- Linseed Oil:** Chinese wood (Tung) oil and —; Heat treatment of. C. E. Mabery, 459.
- Linseed Oil:** Meal; — and, 225.
- Linseed Oils:** Commercial —; Analytical characters of. H. Wolff, 191.
- Liquid Egg:** Dried egg in —; Detection of. C. Hohenegger, 605.
- "Liquid Eggs":** Boric acid in — and other foodstuffs; The estimation of. G. W. Monier-Williams, 413.
- Liquids:** Dilution and use of aliquot parts; Sliding scales for the convenient titration of strong — by. C. H. D. Clark, 61, 164, 211.
- Liquorice Extract:** Extract of *Atractylis gummifera* in —; Detection of. U. Giuffrè, 30.
- Liver Oils:** Sulphuric acid test for fish —; Note on the. N. Evers and H. J. Foster, 58.
- Liver Oils:** Sulphuric acid test for —; The. A. Harden and R. Robison, 226.
- Loch Maree:** Scottish Board of Health. Botulism at —, 118.
- London:** City of —. Report on Samples Submitted to the Public Analyst in 1922, 486.
- M**
- Madras:** Government of —. Annual Report of the Chemical Examiner, 490.
- Magnesia:** Ferric oxide and alumina from — by the nitrate method; Separation of. A. Charriou, 41.
- Magnesian Limestone:** Dolomite and —; Method of analysis for. S. D. Averitt, 92.
- Magnesium:** Colorimetric method for the estimation of —; Note on the. F. S. Hammett and E. T. Adams, 92.
- Magnesium:** Sea water; Rapid estimation of — in one drop of. G. Deniges, 92.
- Magnesium:** Serum; Micro-estimation of — in. St. Gadiet, 615.
- Magnesium Soaps:** Mixture of arachidic and lignoceric acids in arachis oil by means of —; Estimation of the. A. W. Thomas and C. L. Yu, 126.
- Magnetic Analysis:** Silicates and silicic acids; — of. P. Pascal, 45.
- Maize, Cottonseed and Linseed Oils:** Phytosterols of —; The. R. J. Anderson and M. G. Moore, 556.
- Maize Meal:** Bread, pastry, etc.; Detection of — in. K. Fricke and O. Luning, 331.
- Malay States:** Federated —. Annual Report of the Chemical Laboratories, Institute for Medical Research for the Year 1922, 603.
- Malay States:** Federated —. Report for 1921. Chemical Section. Institute for Medical Research, Kuala Lumpur. R. W. Blair, 66.
- Malay Sugar:** Native — (*Pula Malacca*); The composition of (Notes). H. Lowe and A. Houlbrooke, 114.
- Maleic, Malic and Fumaric Acids:** Volumetric standards; — as. N. A. Lange and H. Kline, 133.
- Malic Acid:** Food acidifier; Inactive — as a. J. M. Weiss, C. R. Downs and H. P. Corson, 453.
- Malic and Tartaric Esters:** Molybdic acid on the optical rotation of —; Action of. E. Darmois, 346.
- Malic, Maleic and Fumaric Acids:** Volumetric standards; — as. N. A. Lange and H. Kline, 133.
- Malt Extract:** Strength of flour; Action of malt and — upon the. F. A. Collatz, 219.
- Malt:** Strength of flour; Action of — and — extract upon the. F. A. Collatz, 219.
- Maltase:** Germinated and ungerminated barley; Presence of — in. A. R. Ling and D. R. Nanji, 606.
- Maltose:** Sweet potatoes during cooking; Formation of — in. H. C. Gore, 553.
- Mammalian Hair:** Sections of —; Preparation of. J. A. F. Roberts, 352.
- Mammals:** Age and chemical development in —. C. R. Moulton, 560.
- Manganese:** Iron and its separation from —; Gravimetric estimation of. B. Solaja, 463.
- Manganous Process:** A case in which Winckler's — for dissolved oxygen is untrustworthy (Notes). J. H. Coste and E. R. Andrews, 543.
- Margarine:** Butter; — containing 1 per cent. of (Legal Notes), 489.
- Mayonnaise:** —; Composition of. A. Behre, A. Doring, H. Ehrecke, and K. Thimme, 223.
- Meat:** Department of Scientific and Industrial Research. Food Investigation Board. Mould growths upon cold store —, 549.
- Meat Extracts:** Substitutes; — and their. K. Berk and W. Schneider, 551.
- Meat:** Potassium nitrate in minced —; Behaviour of. E. Baier and K. Pfizenmaier, 451.
- Meat Proteins:** —; Separation of. C. R. Moulton, 179.
- Meats:** Minced —; Feder's Value for. Pannwitz and Harder, 227.
- Meats:** Preserved —, etc.; Notes on the examination of. O. Jones, 429.
- Mechanical Analysis:** Humus soils; — of. G. W. Robinson, 84.

- Mechanical Analysis:** Soils and other dispersions; New method for the — of. G. W. Robinson, 83.
- Medicinal Phenolic Esters:** Certain —; Microchemical identification of. Benzonaphthol, Salol, Betol, Cresalol, Salophene. M. G. Deniges, 228.
- Medicines:** Dispensed —; Analysis of, 492.
- Melting Point:** Refined natural *D*-camphor; The — and iodine value of. M. S. Salamon, 536.
- l*-Menthone:** Pine oil; Occurrence of — in. A. H. Gill, 567.
- Mercuric Cyanide:** Toxicity of —; Contribution to the study of the. R. Fabre and J. Josset, 565.
- Mercuric Mercury:** Bromate in volumetric analysis; Use of. II., Influence of — upon bromic acid reactions. G. E. Smith, 462.
- Mercury:** Bromate in volumetric analysis; Use of. II., Influence of mercuric — upon bromic acid reactions. G. E. Smith, 462.
- Mercury Compounds:** Mercury by means of sodium chloride; Volumetric estimation of. Analysis of cinnabar and organic —. E. Votoček and L. Kašparek, 192.
- Mercury:** —; Electrolytic estimation of. A. de Meëus, 191.
- Mercury:** Organic compounds containing arsenic or —; Quantitative estimation of carbon and hydrogen in. M. Fulkov and G. W. Raiziss, 288.
- Mercury:** Sodium chloride; Volumetric estimation of — by means of. Analysis of cinnabar and organic — compounds. E. Votoček and L. Kašparek, 192.
- Metallic Iron:** Ferrous reductant; Estimation of — in. C. E. Williams and A. E. Anderson, 77.
- Metallic Poisons:** Foodstuffs; — in. W. M. Willoughby, 184.
- Metals:** Ammonium sulphide group; Separation of — of the. G. Luff, 624.
- Metals:** Ferrocyanide titration of certain —; Influence of alkali — on the. W. D. Treadwell and D. Chervet, 461.
- Metals:** Hydrochloric acid solution; Electrodeposition method for the estimation of — in. A. J. Engelburg, 291.
- Metals:** Natural Waters (and of some etching reagents) in relation to action on —; Hydrogen ion concentration of. W. R. G. Atkins, 396.
- Metals of the Iron Group:** Cobalt in the presence of nickel and other — by dinitroso-resorcinol; Estimation of. W. R. Orndorff and M. L. Nichols, 463.
- Methyl Alcohol:** Ethyl alcohol; Detection of — in. R. Maurice, 505.
- Methyl Alcohol:** Pentoses, formaldehyde and —; Detection of. J. B. Sumner, 619.
- Methyl Alcohol:** Sodium hypochlorite; Purification of — by means of. R. C. Menzies, 133.
- Methyl Alcohol:** Toxicity of —, 344.
- Methyl Anthranilate:** Authentic grape juices for —; Examination of. F. B. Power and V. K. Chesnut, 181.
- Methyl Anthranilate:** Grape beverages and flavours; — in. R. D. Scott, 453.
- Methyl Chloride:** Gas mixtures containing —; Analysis of. R. H. McKee and S. P. Burke, 458.
- Methyl Oleate:** — and linolate by fractional distillation; Separation of. E. André, 290.
- Methyl Orange Indicator:** —; Modified. K. C. D. Hickman and R. P. Linstead, 89.
- Methylene Blue:** Cotton; Chemical analysis of. I., Absorption of — by cotton. C. Britton, D. A. Clibbens and B. P. Ridge, 620.
- Methylene Blue:** Phosphorus by means of a standard solution of —; Volumetric estimation of small amounts of. W. M. Thornton, jun., and H. L. Elderdice, jun., 241.
- Methylene Blue:** Reducing sugars by means of Fehling solution with — as internal indicator; Estimation of. J. H. Lane and L. Eynon, 220.
- Methylene Blue Reduction Test:** Milk; Influence of certain factors on the — for. E. G. Hastings, A. Davenport and W. H. Wright, 233.
- Mexican Poppy:** Oil of the —, 75.
- Microchemical Detection:** Fumaric acid; — of. L. Van Itallie, 190.
- Microchemical Estimation:** Hydrocyanic acid; — of. L. Rosenthaler and K. Seiler, 399.
- Microchemical Estimation:** Copper by means of molybdenum; — of. Fontès and Thivolle, 511.
- Microchemical Estimation:** Iron by means of molybdenum; — of. Fontès and Thivolle, 511.
- Microchemical Identification:** Medicinal phenolic esters; — of certain. Benzonaphthol, Salol, Betol, Cresalol, Salophene. M. G. Deniges, 228.
- Micro-Colorimetric Estimation:** Hydrogen ion concentration of the blood; — of. V. C. Myers, H. W. Schmitz and L. E. Booker, 564.
- Microchemical Reagent:** Alkaloids; Potassium ferrocyanide as a — for some. H. I. Cole, 609.
- Microchemical Reagent:** Hexamethylene tetramine as a —. H. E. Cole, 509.
- Microchemical Separation:** Antimony and tin; — of. A. P. Ortodogsu and M. Ressay, 510.
- Micro-Estimation:** Lactose; — of. G. Fontès and L. Thivolle, 29.
- Micro-Organisms:** Milk; Rapid enumeration of — in. E. Pozzi-Escot, 394.
- Microscopic Estimation:** Colloids in soil separates; — of. W. H. Fry, 619.
- Microscopic Investigations:** Coal for —; Transparent preparations of. J. Lomax and J. R. Lomax, 630.
- Microscopic Method:** Rice hulls in bran; — for estimation of. B. H. Silberberg, 186.
- Microscopical Appearance:** Potassium and sodium picrate and tartrate crystals; — of. E. Justin-Mueller, 512.
- Microscopic Work:** Celluloid for —. O. Nuzzi, 242.

- Microscopy Unit:** —; Quantitative (Notes). T. E. Wallis, 18.
- Micro-Sublimation:** Method of —; New. R. Kempf, 295.
- Milch Cows:** Winter feeding of —; Cod-liver oil in the. J. C. Drummond, K. H. Coward, J. Golding, J. Mackintosh and S. S. Zilva, 339.
- Milk:** Abnormal — by the alcohol test; Detection of. A. C. Weimar, 551.
- Milk:** Abnormal sample of —; An (Notes). T. R. Hodgson, 443.
- Milk:** Acid; Coagulation of — by. L. Anderson, 494.
- Milk:** Actinomyces in —. C. R. Fellers, 232.
- Milk and Dairies (Amendment) Act:** Ministry of Health. —, 1922. Special Designations. Circular 356, 25.
- Milk:** Cow's —; The sterol content of. F. W. Fox and J. A. Gardner, 227.
- Milk:** Cream, — and other foods; Estimation of boric acid in. (Process used in the Government Laboratory), 416.
- Milk:** Department of Scientific and Industrial Research. Food Investigation Board. Studies in sweetened and unsweetened condensed —, 448.
- Milk:** Dirty sediment in —; The estimation of (Notes). A. R. Tankard, 444.
- Milk:** Dried —; Labelling of (Parliamentary Notes), 330.
- Milk:** Heat coagulation of —. A. Leighton and C. S. Mudge, 385.
- Milk:** House of Commons, July 4. Skimmed Dried Milks. Pasteurised — (Parliamentary Notes), 384.
- Milk:** Hypochlorites and chloramines in — and cream; Detection of. P. Rupp, 178.
- Milk:** Methylene blue reduction test for —; Influence of certain factors on the. E. G. Hastings, A. Davenport and W. H. Wright, 233.
- Milk:** —; The Sale of (Legal Notes), 19.
- Milk:** Micro-organisms in —; Rapid enumeration of. E. Pozzi-Escot, 394.
- Milk:** Ministry of Health. Condensed —. Circular 393. Sale of — Deficient in Fat, Circular 399, 271.
- Milk:** Ministry of Health. Condensed — (Summary of New Regulations), 124.
- Milk:** Ministry of Health. Dried —, 451.
- Milk:** Ministry of Health. Dried —. Circular 452. A. K. Maclachlan, 604.
- Milk:** Ministry of Health. Sale of — under Special Designations. "Certified" — "Grade A (Tuberculin Tested)" — "Grade A" — "Pasteurised," 120.
- Milk:** Parliamentary Notes. House of Commons, April 8. Sale of Disinfectants. Bacteriological Examination of —. May 9. Preservatives in Food, 268.
- Milk:** Reducing and oxidising properties of —. P. Haas and T. G. Hill, 494.
- Milk Regulations:** Condensed — 1923 (Notes). E. Hinks, 596.
- Milk (Special Designations) Order:** Ministry of Health. —, 1923. Circular 408. A. K. Maclachlan, 330.
- Milk:** Standards; Cheese, —, and cream (Parliamentary Notes), 448.
- Milk Test Bottles:** Babcock cream and —; Notes on a method for testing the accuracy of. B. J. Smit, 477.
- Milk Testing:** Amyl alcohol for — (Notes). T. F. Harvey and C. O. Harvey, 213.
- Milk:** Urea in cows' —; Estimation of. Y. Morimoto, 394.
- Milk Vans:** Dirty — (Parliamentary Notes), 448.
- Milks:** Fat, lactose, and moisture in dried —; Estimation of. H. Jephcott, 529.
- Milks:** House of Commons, July 4. Skimmed dried —. Pasteurised Milk (Parliamentary Notes), 384.
- Milo and Feterita (Sorghum) Kernels:** —; Composition of. J. L. Bidwell, L. E. Bopst and J. D. Bowling, 125.
- Minced Meats:** Feder's Value for —. Pannwitz and Harder, 227.
- Mineral Oils:** Asphaltene from — by means of cyclohexane; Separation of. M. Jakeš, 567.
- Mineral Oils:** Water in —; Estimation of. L. Losana, 190.
- Mineral Waters:** Iodine in — containing sulphides; Rapid estimation of. M. J. Dubief, 285.
- Mineralogical Examination:** Soil types; Method of — of soils and its use in determining. J. Hendrick and G. Newlands, 286.
- Ministry of Health:** —; Circular 381. I. Boric acid in cake. II., Imported produce, 177.
- Ministry of Health:** —. Condensed Milk. Circular 393. Sale of Milk Deficient in Fat, Circular 399, 271.
- Ministry of Health:** —. Condensed Milk (Summary of New Regulations), 124.
- Ministry of Health:** —. Dried milk, 451.
- Ministry of Health:** —. Dried Milk, Circular 452. A. K. Maclachlan, 604.
- Ministry of Health:** —. Milk and Dairies (Amendment) Act, 1922. Special Designations, Circular 356, 25.
- Ministry of Health:** —. Milk (Special Designations) Order, 1923, Circular 408. A. K. Maclachlan, 330.
- Ministry of Health:** —. Sale of Milk under Special Designations. "Certified" — "Grade A (Tuberculin Tested)" — "Grade A" — "Pasteurised," 120.
- Ministry of Health:** Sale of Food and Drugs Acts. Extracts from the Annual Report of the — for 1922-1923 and Abstract of Reports of Public Analysts for the year 1922, 601.
- Ministry of Health:** —. The Public Health (Condensed Milk) Regulations (No. 2), 1923, 550.
- Moisture:** Fat, lactose and — in dried milks; Estimation of. H. Jephcott, 529.
- Moisture:** Gauze dish; Estimation of solids or — by means of a. A. Seidenberg, 466.

- Molecular Polymerisation:** Compounds in the critical state; — of. J. A. Müller, 95.
- Molecular Weight:** Substances in alcoholic solution from the elevation of the flash point; Determination of the — of. R. Wright, 46.
- Molluscs:** Vitamins in —. Presence of the antiscorbic factor in the oyster. (Mme.) Randoïn, 561.
- Molybdenum:** Copper by means of —; Microchemical estimation of. Fontès and Thivolle, 511.
- Molybdenum:** Iron by means of —; Microchemical estimation of. Fontès and Thivolle, 511.
- Molybdenum:** Tungsten; Estimation of small quantities of — in. W. J. King, 349.
- Molybdic Acid:** Optical rotation of tartaric and malic esters; Action of — on the. E. Darmois, 346.
- Monohydric Phenols:** Phenol reagent of Folin and Denis; Estimation of various — by the, 348.
- Mould Growths:** Department of Scientific and Industrial Research. Food Investigation Board. Cold store meat; — upon, 549.
- Mucic Acid:** —; Estimation of. E. O. Whittier, 458.
- Museum Exhibits:** Cleaning and Restoration of —; The. Second Report upon Investigations Conducted at the British Museum, 173.
- Mustard Products:** United States Department of Agriculture. Food Inspection Decision 192. Mustard and —, 493.
- Mustard:** United States Department of Agriculture. Food Inspection Decision 192. — and — products, 493.
- Mutton:** Beef and —; Autolysis of. W. D. Fearon and D. L. Foster, 33.
- Mycological Identification:** Inulin; — of. A. Castellani and F. E. Taylor, 35.
- N**
- α -Naphthol:** β -naphthol in —, and of — in β -naphthol; Estimation of. J. Prochazka, 568.
- β -Naphthol:** α -naphthol; Estimation of — in and of α -naphthol in —. J. Prochazka, 568.
- β -Naphthylamine:** —; Analysis of. H. R. Lee and D. O. Jones, 86.
- Narcotine:** Opium; The estimation of — and papaverine in. H. E. Annett and M. N. Bose, 53.
- Narcotine:** Optical activity of — in acid solution; Influence of papaverine on the. H. E. Annett, 229.
- Natural Asphalt:** Coal tar pitch in —; Detection of. O. Hackl, 138.
- Natural Waters:** Metals; Hydrogen ion concentration of — (and of some etching reagents) in relation to action on. W. R. G. Atkins, 396.
- Navy Bean:** New globulin, Conphaseolin, in the — (*Phaseolus vulgaris*); Presence of a. H. C. Waterman, C. O. Jones, and S. Phillips, 229.
- Nearsphenamine:** —; Examination of. Constitution of the French drugs. A. D. Macallum, 32.
- Neo-Salvarsan:** —; Reaction of. K. Schering, 183.
- New Zealand:** Dominion Laboratory —. Fifty-fifth Annual Report, 1921. J. S. Maclaurin, 170.
- Newfoundland Cod-Liver Oil Industry:** —; The. S. S. Zilva and J. C. Drummond, 337.
- Nickel:** Cobalt in the presence of — and other metals of the iron group by dinitroso-resorcinol; Estimation of. W. R. Orndorff and M. L. Nichols, 463.
- Nickel:** Dioxide; Gravimetric estimation of — as. W. Vaubel, 41.
- Nickel:** Silver nitrate; Electrometric titration of — with. E. Müller and H. Lauterbach, 42.
- Nickel:** Solution; New method of detecting — in. C. G. Vernon, 350.
- Nicotine Content:** Leaves and smoke of untreated German-grown tobacco; — of the. H. Rhode, 334.
- Nicotine:** Tobacco and tobacco extracts; Estimation of — in. O. M. Shedd, 610.
- Nicotine:** Tobacco and in tobacco smoke; Estimation of — in. M. Popp and J. Contzen, 33.
- Nile Silt:** Titanium in —. E. Griffiths-Jones, 320.
- "Ninhydrin" Method:** Amino acid nitrogen in foods by means of the —; Colorimetric estimation of. H. Riffart, 179.
- Nitrate Method:** Ferric oxide and alumina from magnesia by the —; Separation of. A. Charriou, 41.
- Nitrates:** Ferrous hydroxide; Reducing action of. New method of estimating nitrites and —. S. Miyamoto, 402.
- Nitrates:** Nitrites and —; Ferrous hydroxide as reducing agent in the estimation of. S. Miyamoto, 45.
- Nitrates:** Phenol-disulphonic acid method; Estimation of — in soil by the. C. T. Gimingham and R. H. Carter, 287.
- Nitrates:** Test for —; New. L. G. Nixon, 350.
- Nitric Acid:** —; Gravimetric estimation of. H. Rupe and F. Becherer, 465.
- Nitrites:** Ferrous hydroxide; Reducing action of. New method of estimating — and nitrates. S. Miyamoto, 402.
- Nitrites:** Reducing agent in the estimation of — and nitrates; Ferrous hydroxide as. S. Miyamoto, 45.
- Nitrites:** Water; Detection of — in. A. Zlataroff, 397.
- Nitrogen:** Amino acid — in foods by means of the "Ninhydrin" method; Colorimetric estimation of. H. Riffart, 179.
- Nitrogen Estimation:** Folin's method for —; Use of potassium persulphate in. S. Y. Wong, 342.
- Nitrogen Estimation:** Potassium persulphate for accelerating digestion in Kjeldahl's —; Use of. S. Y. Wong, 341.

- Nitrogen**: Hydrogen for traces of —; Analysis of. R. L. Dodge, 509.
- Nitrous and Arsenious acids**: —; Volumetric estimation of. A. Klemenc, 44.
- Notes**: 1923: 18, 66, 114, 169, 213, 262, 321, 380, 443, 486, 542, 596.
- Notes from the Reports of Public Analysts**: 1923: 66, 115, 170, 213, 264, 322, 381, 445, 486, 543, 598.
- Nottingham Section**: Society of Public Analysts and other Analytical Chemists and of the — of the Society of Chemical Industry; Joint Meeting of the, 63.
- Nougat**: Halawa (Oriental —). A. Azadian, 496.
- Nut Cream**: Butter (Legal Notes), 325.
- O**
- Obituary Notices**:
Embrey, George, F.I.C., 201.
Grimwood, Robert George, 102.
Lloyd, Frederick James, 153.
Thomson, William, 519.
- Oil Baths**: Hydrogenated oil for —. G. R. Robertson, 466.
- Oil**: *Hibiscus cannabinus*; — of. J. Dekker, 126.
- Oil**: Mexican poppy; — of the, 75.
- Oils**: Carbon and of — by means of chromic acid; Oxidation of different forms of. D. Florentin, 37.
- Oils**: Distinguishing castor oil from other — and determining its purity; A new test for. H. B. Stocks, 590.
- Opium**: Narcotine and papaverine in —; The estimation of. H. E. Annett and M. N. Bose, 53.
- Optical Activity**: Narcotine in acid solution; Influence of papaverine on the — of. H. E. Annett, 229.
- Optical Rotation**: Tartaric and malic esters; Action of molybdic acid on the — of. E. Darmois, 346.
- Organic Acids**: Extraction; Distribution coefficients and the estimation of — by. J. Pinnow, 141.
- Organic Analysis, Abstracts**: 1923: 37, 84, 133, 188, 234, 288, 346, 398, 457, 504, 566, 619.
- Organic Analysis**: Water in —; Alumina as an absorbent for. H. L. Fisher, H. L. Faust and G. H. Walden, 84.
- Organic Combustion Products**: Toxic — in effluents; Detection of. A. Gregoire, 397.
- Organic Compounds**: Carbon and hydrogen in — containing arsenic or mercury; Quantitative estimation of. M. Falkov and G. W. Raiziss, 288.
- Organic Compounds**: Halogens in —; Gasometric method of estimating. A. K. Macbeth, 85.
- Organic Compounds**: Sulphur and halogen in —; Method for the simultaneous estimation of. C. S. Leonard, 188.
- Organic Compounds**: Sulphur, arsenic, and antimony in inorganic and —; Estimation of. F. Feigl and R. Schorr, 623.
- Organic Compounds**: Sulphur in —; Estimation of. W. F. Hoffman and R. A. Gortner, 289.
- Organic Material**: Formaldehyde in —; Detection of. H. Lührig, 396.
- Organic Mercury Compounds**: Mercury by means of sodium chloride; Volumetric estimation of. Analysis of cinnabar and —. E. Votoček and L. Kašparek, 192.
- Organic Phosphorus**: —; Gravimetric estimation of. W. Jones and M. E. Perkins, 289.
- Organic Substances**: Drying —; Apparatus for. J. Bouillot, 195.
- Organic Substances**: Flash points of pure —; Calculation of. E. Mack, C. E. Board and H. N. Barham, 571.
- Organic-Therapeutic Powders**: —; Chemical examination of. R. Fabre and H. Penau, 278.
- Oriental Fruits and Vegetables**: Vitamin C in some —; Presence of. H. Embrey, 340.
- (Oriental Nougat)**: Hawala —. A. Azadian, 496.
- Oubain**: Strophanthin and —; Properties and reactions of. M. Tiffeneau, 182.
- Oxalic Acid**: Reaction for —; New. C. Müller, 38.
- Oxidation**: Chromic oxide in the sulphochromic —; Rôle of. L. J. Simon, 37.
- Oxidation**: Different forms of carbon and of oils by means of chromic acid; — of. D. Florentin, 37.
- Oxidation**: Spinacene, its — and decomposition. A. C. Chapman, 400.
- Oxidation**: Vitamin C; Influence of reaction on the — of. S. S. Zilva, 499.
- Oxidising Properties**: Milk; Reducing and — of. P. Haas and T. G. Hill, 494.
- Oxygen**: Canned fruits; — and perforations in. E. F. Kohman, 388.
- Oxygen-Supplying Power**: Colour changes in alkaline pyrogallol solution; — of the soil as indicated by. L. M. Hutchings, 618.
- Oxygen**: Winckler's manganous process for dissolved — is untrustworthy; A case in which (Notes). J. H. Coste and E. R. Andrews, 543.
- Oxymethylantraquinone Compounds**: Alder and its galenic preparations; Variation of — in. E. Maurin, 32.
- Oxymethylantraquinone Compounds**: Drugs; Estimation of — in. E. Maurin, 31.
- Oxymethylantraquinones**: Aloes and rhubarb; Detection of — in. M. Lestage, 334.
- Oyster**: Vitamins in Molluscs. Presence of the antiscorbic factor in the —. (Mme.) Randoin, 561.
- P**
- Pacific Fish**: Whale oil; Notes on the food value of — and on the constants of. W. M. Doherty, 495.
- Palladium**: Platinum, —, etc., with thiocyanate; Precipitation of. W. N. Iwanoff, 293.
- Palm-Kernel Meal**: Growth-promoting value and vitamin content of —. A. J. Finks, 611.

- apaverine**: narcotine and — in opium; The estimation of. H. E. Annett and M. N. Bose, 53.
- apaverine**: Narcotine in acid solution; Influence of — on the optical activity of. H. E. Annett, 229.
- Paper Pulp**: Hemp and wood fibres in —; The quantitative estimation of. W. Dickson, 373.
- Para-Acid**: Commercial "saccharin"; Estimation of — (*p*-sulphamino-benzoic acid) in. O. Beyer, 608.
- p*-Sulphaminobenzoic Acid**: Para-acid — in commercial "saccharin"; Estimation of. O. Beyer, 608.
- Paraformaldehyde**: Formaldehyde in —; Estimation of. P. Borgstrom and W. G. Horsch, 457.
- Parliamentary Notes**: 1923: 268, 330, 384, 448.
- Pasteurised Milk**: House of Commons, July 4. Skimmed Dried Milks — (Parliamentary Notes), 384.
- "Pasteurised"**: Ministry of Health. Sale of Milk under Special Designation — "Certified" — "Grade A (Tuberculin Test)" — "Grade A" —, 120.
- Pastry**: Maize meal in bread, —, etc.; Detection of. K. Fricke and O. Luning, 331.
- Peaches**: Linalyl esters in —; Confirmation of the presence of. F. B. Power and V. K. Chesnut, 129.
- Peas**: Department of Scientific and Industrial Research. Food Investigation Board. Brown heart—a functional disease of apples and —, 490.
- Peas**: Copper in —; Disclosure on tin (Legal Notes), 447.
- Peas**: Copper in — (Legal Notes), 446, 488.
- Peas**: Tinned —; Copper Sulphate in (Legal Notes), 267.
- Pectic Constituents**: Stored fruits; Changes occurring in the — o. M. H. Carré, 34.
- Pectin**: Fruit and fruit products; Estimation of — in. H. J. Wichmann, 181.
- Pectin**: Hydrolysis of —. F. Tuin, 223.
- Pentoses**: —, formaldehyde and methyl alcohol; Detection of. J. B. Sumner, 619.
- Pepsin**: Chemical and physiological characteristics of — and rennin; Comparison between the. F. Fenger, 130.
- Perchlorate and Cobaltinitrite Methods**: Potassium by the —, and on the removal of sulphates; Further notes on the estimation of. R. L. Morris, 250.
- Perchlorate Method**: Potassium from sodium by the —; Separation of. G. F. Smith, 627.
- Perforations**: Canned fruits; Oxygen and — in. E. F. Kohman, 388.
- Permanganate**: Sulphurous acid with —; Electrometric titration of. W. S. Hendrixon and L. M. Verbeck, 93.
- "Permutit"**: Amines; — as a reagent for. J. C. Whitehorn, 565.
- Peroxides**: Per-salts; Detection of — and. A. Blankart, 239.
- Per-Salts**: Peroxides and —; Detection of. A. Blankart, 239.
- Pharmaceutical Society**: Poisons; Distinctive colouring for. Report of the Codex Sub-Committee to the Council of the —, 71.
- "Pharmacist"**: "Chemist" and —. A. C. Chapman and E. F. Armstrong, 216.
- Pharmacopoeia**: Japanese —; Drugs in the, 76.
- Pharmacopoeial Preparations**: Ergot; Activity of — of. A. J. Clark and W. A. Broom, 498.
- Phaseolus vulgaris***: Navy Bean —; Presence of a new globulin, Conphaseolin, in the. H. C. Waterman, C. O. Johns, D. B. Jones, and S. Phillips, 229.
- Phenol-Chlorine Water Pollution**: —. New reaction between phenol and chlorine. E. F. Kohman, 397.
- Phenol-Disulphonic Acid Method**: Nitrates in soil by the —; Estimation of. C. T. Gimmingham and R. H. Carter, 287.
- Phenol**: Mixtures of tar acids; Estimation of — in. W. H. Hoffert, 39.
- Phenol**: — -chlorine water pollution. New reaction between — and chlorine. E. F. Kohman, 397.
- Phenol**: Intestinal bacteria; Formation of — by. L. R. Bouwman, 457.
- Phenol Reagent of Folin and Denis**: Monohydric phenols by the —; Estimation of various, 348.
- Phenolic Esters**: Medicinal —; Microchemical identification of certain. Benzonaphthol, Salol, Betol, Cresalol, Salophene. M. G. Deniges, 228.
- Phenols**: Blood; Quantitative estimation of — in. N. W. Rakestraw, 395.
- Phenols**: Coal-tar oils and crude carbolic acid; Estimation of — in. J. B. Hill, 507.
- Phenols**: Copper and —; New reactions of. J. Aloy and A. Valdiviúic, 85.
- Phenols**: Phenol reagent of Folin and Denis; Estimation of various monohydric — by the, 348.
- Phosphate**: Aluminium as —; Estimation of. G. E. F. Lundell and H. B. Knowles, 91.
- Phosphate**: Bismuth as —; Estimation of. Separation from lead, copper and cadmium. G. Luff, 238.
- Phosphoric Acid**: Phosphorous acid in presence of —; Volumetric estimation of. A. Wingler, 403.
- Phosphoric Acid**: Sensitive test for —. F. Feigl, 93.
- Phosphorus**: Gas analysis; Use of — in. A. Holmes, 348.
- Phosphorus**: Organic —; Gravimetric estimation of. W. Jones and M. E. Perkins, 289.
- Phosphorus**: Standard solution of methylene blue; Volumetric estimation of small amounts of — by means of a. W. M. Thornton, jun., and H. L. Elderdice, jun., 241.
- Phosphorus**: Vanadium; Separation of arsenic and — from. H. A. Doerner, 625.
- Phosphorous Acid**: Phosphoric acid; Volumetric estimation of — in presence of. A. Wingler, 403.

- Phosphotungstates:** Alkali —; Analysis of. R. Mellet, 465.
- Photochemical Action:** Uric acid; Error due to — in the Folin and Wu estimation of. H. Rogers, 282.
- Phthalates:** Diethyl phthalate; Modified test for —, with particular reference to the detection of. R. E. Andrew, 508.
- Phthaleins:** Diethylphthalate and — in spirits; Detection of. R. L. Calvert, 75.
- Phthalyl-diethyl-Ester:** Spirits; Detection of — in. S. Eilles, 558.
- Physical Methods, Apparatus, etc., Abstracts:** 1923: 45, 93, 141, 195, 241, 351, 405, 512, 571, 629.
- Physico-Chemical Standards:** Bureau of —. Third Annual Report (Financial Year 1922), presented by M. J. Timmermans to the Chemical Society of Belgium, 269.
- Physiological:** Standardisation. J. S. White, 303.
- Phytosterols:** Maize, cottonseed and linseed oils; The — of. R. J. Anderson and M. G. Moore, 556.
- Picric Acid:** Creatinine estimations; Purification of — for. S. R. Benedict, 78.
- Pigment:** Silage; Nature of the — of. H. E. Woodman, 345.
- Pigments:** Titanium —; Analysis of. L. E. Barton, 403.
- Pilehard:** Oil. H. M. Langton, 180.
- Pine Oil:** *l*-menthone in —; Occurrence of. A. H. Gill, 567.
- Pinene:** Fuller's earth on — and other terpenes; Effect of. C. S. Venable, 235.
- Pipes:** Corrosion in water —; New method of measuring. F. N. Speller and V. V. Kendall, 186.
- Pitch:** Coal tar — in natural asphalt; Detection of. O. Hackl, 138.
- Pitchblende:** Uranium from thorium and rare earths in —; Separation of. W. Riss, 626.
- Plant Tissue:** Carbohydrates of —; Effects of the method of dessication on the. K. P. Link and W. E. Tottingham, 187.
- Plant Tissues:** Starch in —; Estimation of small amounts of. F. E. Denny, 220.
- Platinum Crucibles:** Radiator for —. M. M. Green, 573.
- Platinum:** Thiocyanate; Precipitation of —, palladium, etc., with. W. N. Iwanoff, 293.
- Pods:** Robinia —; Toxic properties of. E. M. Holmes, 233.
- Point Indicator:** Bromoxylenol blue. A true-neutrality —. A. Cohen, 622.
- Poisoning:** Food — traced to egg salad; Outbreak of. C. E. A. Winslow, J. V. Hiscock, O. F. Rogers, and E. S. Robinson, 393.
- Poisoning:** Rhododendron —. S. W. Hardikar, 184.
- Poisonous Greensand:** Toxicity of so-called —; Cause of the. J. W. Kelly, 286.
- Poisons:** Distinctive colouring for —. Report of the Codex Sub-Committee to the Council of the Pharmaceutical Society, 71.
- Poisons:** Foodstuffs; Metallic — in. W. M. Willoughby, 184.
- Polarimetric and the Gravimetric Methods:** Lactose by the —; Estimation of. A. L. Bacharach, 521.
- Pollution:** Gas works effluent; — of river with (Legal Notes), 214.
- Polymerisation:** Compounds in the critical state; Molecular — of. J. A. Müller, 95.
- Polysaccharides:** Starch content in the presence of interfering —; Estimation of. G. P. Walton and M. R. Coe, 452.
- Polysaccharides:** Starch in presence of interfering —; Estimation of. G. P. Walton and M. R. Coe, 276.
- Poppy:** Mexican —. Oil of the, 75.
- Portsmouth:** Borough of —. Annual Report of the Borough Analyst for 1922. R. P. Page, 487.
- Potassium and Sodium Picrate and Tartrate Crystals:** Microscopical appearance of —. E. Justin-Mueller, 512.
- Potassium:** Bismuth-sodium thiosulphate and its use in the estimation of —; Preparation of. V. Cuisinier, 43.
- Potassium Carbonate:** Lead glass. The action of — on. H. D. Richmond, 299.
- Potassium:** Estimation of — by the perchlorate and cobaltinitrite methods, and on the removal of sulphates; Further notes on the. R. L. Morris, 233.
- Potassium Ferrocyanide:** Alkaloids; — as a micro-chemical reagent for —. H. I. Cole, 609.
- Potassium Iodide:** Compound drug containing excess of — (Legal Notes), 448.
- Potassium Nitrate:** Mineral meat; Behaviour of — in. J. Baier and E. Pözenmaier, 451.
- Potassium:** Perchlorate method; Separation of — from sodium by the. G. F. Smith, 627.
- Potassium Fersulphate:** Digestion in Kjeldahl's nitrogen estimation; Use of — for accelerating. S. Y. Wong, 344.
- Potassium Persulphate:** Folin's method for nitrogen estimation; Use of — in. S. Y. Wong, 342.
- Potassium:** —; Volumetric estimation of. Macheloidt, 43.
- Potatoes:** Acid by *Phytophthora tritici* in decaying sweet —; Production of. H. A. Edson, 614.
- Potatoes:** Maltose in sweet — during cooking; Formation of. H. C. Gore, 553.
- Potatoes:** *Rhizopus* responsible for the decay of sweet —; Species of. J. I. Lauritzen and L. L. Harter, 614.
- Potatoes:** Solanin content of —; High. A. Bömer and H. Mattis, 454.
- Potatoes:** Solanin; Impurities — rich in. C. Griebel, 454.
- Potatoes:** Starch in —; Estimation of. A. R. Ling and W. C. Price, 554.
- Powders:** Organo-therapeutic —; Chemical examination of. R. Fabre and H. Penau, 278.
- Praseodymium:** —; Estimation of. P. H. Brinton and H. A. Paget, 464.

- Precipitates:** Acids in aluminium —; Separation of. A. Charriou, 293.
- Prescription:** Ambiguous —; An (Legal Notes) 488.
- Prescription:** Quinine sulphate in a —; Deficiency of (Legal Notes), 382.
- Preservatives:** Food —, 216.
- Preservatives:** Food; — in. Hull Statistics for the ten years 1913 to 1922. A. R. Tankard, 540.
- Preservatives:** Parliamentary Notes. House of Commons. April 8. Sale of Disinfectants, Bacteriological Examination of Milk. May 9. — in Food, 268.
- Preserved Meats, Etc.:** Examination of —; Notes on the. O. Jones, 429.
- President:** Address of the —; Annual, 103.
- Projectiles:** Firearms and —; The examination of (Notes), 380.
- Projectiles:** Forensic cases; The examination of firearms and — in. A. Lucas, 203.
- Protein: Free Blood Filtrates:** Folin-Wu method for obtaining —; Modification of the. R. L. Haden, 501.
- Protein Hydrolysates:** Hexone bases from —; Electrolytic separation of. G. L. Foster and C. L. A. Schmidt, 501.
- Proteins:** Honey; New method for estimating — in. O. Laxa, 495.
- Proteins:** Meat —; Separation of. C. R. Moulton, 179.
- Proteins:** Serum —; Refractometric estimation of. B. S. Neuhausen and D. M. Rioch, 282.
- Proteins:** Sodium tungstate; Precipitation of — from cereal extracts by means of. L. A. Rumsey, 220.
- Proteolytic Enzymes:** Insulin; Action of — upon. E. J. Witzemann and L. Livshis, 614.
- Protoplasmic Material:** Vacuole contents and — from leaf cells; Method for separate extraction of. A. C. Chibnall, 281.
- Public Analyst and Bacteriologist:** City and County of Kingston-upon-Hull. Annual Report of the — for 1922. A. R. Tankard, 598.
- Public Analyst:** City of Birmingham. Report of the — for the Second Quarter, 1923. J. F. Liverseege, 543.
- Public Analyst:** City of London. Report on Samples Submitted to the — in 1922, 486.
- Public Analyst:** Gloucestershire —; Appointment of (Parliamentary Notes), 330.
- Public Analysts:** Sale of Food and Drugs Acts. Extracts from the Annual Report of the Ministry of Health for 1922-1923, and Abstract of Reports of — for the Year 1922, 601.
- Public Health (Condensed Milk) Regulations:** Ministry of Health. The — (No. 2), 1923, 550.
- Publications Received:** 1923: 51, 152, 248, 356, 411, 472.
- Pula Malacca:** Native Malay sugar —; The composition of (Notes). H. Lowe and A. Houlbrooke, 114.
- Pulp:** Hemp and wood fibres in paper —; The quantitative estimation of. W. Dickson, 373.
- (Punarnava): Boerhaavia Repens** — (Note). Jitendra Nath Rakshit, 169.
- Pure and Applied Chemistry:** International Union of —. Third Conference, 22.
- Pyramidon:** Localisation and diffusion of —; Note on the. R. Pronzergue, 344.
- Pyrethrum Flowers:** Insecticidal principle of —. J. Chevalier and F. Mercier, 392.
- Pyridine:** Humus and fatty matters of the soil; Investigation by means of — of the. M. Piettre, 345.
- Pyrogallol:** —, gallotannin and gallic acid; The colorimetric estimation of. C. A. Mitchell, 2.
- Pyrogallol Solution:** Colour changes in alkaline —; Oxygen-supplying power of the soil as indicated by. L. M. Hutchings, 618.

Q

- Qualitative Test:** Tannin; — for. E. Atkinson and E. O. Hazleton, 38.
- Qualitative Tests:** Rape and tung oils; New — for. A. W. Thomas and C. L. Yu, 128.
- Quantitative Analysis:** Supersaturation-time of reactions; — by measurement of. H. Roder, 93.
- Quantitative Aspects:** Kreis test; — of the. G. E. Holm and G. R. Greenbank, 608.
- Quantitative Microscopy:** Unit (Notes). T. E. Wallis, 18.
- Quillaia Preparations:** International standardisation of —. J. Cofman-Nicoresi and S. B. Tallantyre, 497.
- Quinine Mixture:** Quinine in —; Deficiency of (Legal Notes), 117.
- Quinine:** — Mixture; Deficiency of — in (Legal Notes), 117.
- Quinine Sulphate:** Prescription; Deficiency of — in a (Legal Notes), 382.

R

- Radiator:** Platinum crucibles; — for. M. M. Green, 573.
- Radium:** Emanation method; Quantitative estimation of — by the. C. E. Baumgarten and H. H. Barker, 512.
- Radium:** Other elements; Separation of — from. M. Cialdea, 240.
- Rancidity:** Fats; New test for acrolein and its bearing on — in. W. C. Powick, 128.
- Rape and Tung Oils:** Qualitative tests for —; New. A. W. Thomas and C. L. Yu, 128.
- Rare Earths:** Thorium and — in pitchblende; Separation of uranium from. W. Riss, 626.
- Rats:** Carbohydrates by — deprived of Vitamin B; Utilisation of. H. A. Mattill, 339.
- Rats:** Estimation of Vitamin B by use of —; Modified technique in. H. Steenbock, M. T. Sell and E. M. Nelson, 280.
- Reaction:** Oxalic acid; New — for. C. Müller, 38.

- Reactions:** Measurement of supersaturation-time of —; Quantitative analysis by. H. Roder, 93.
- Reactions:** Sterols; New — of. G. S. Whitby, 226.
- Readings:** Colorimetric indicator — into hydrogen ion concentration; Chart for the conversion of. J. F. McClendon, 89.
- Reagent:** Alkaloids; New — for. C. Viel and E. Viel, 333.
- Reagent:** Alkaloids; New — for. R. Weinland and J. Heinzler, 75.
- Reagent:** Grignard —; Quantitative estimation of the. H. Gilman, P. D. Wilkinson, W. P. Fisher and C. H. Meyers, 134.
- Reagent of Folin and Denis:** Various monohydric phenols by the phenol —; Estimation of, 348.
- Records:** Deciphering charred —; Method of. R. Davis, 241.
- Red Clover Hay:** Amino acids of linseed meal, wheat meal, Soya beans, and —; Quantitative estimation of. T. S. Hamilton, N. Uyei, J. B. Baker and H. S. Grindley, 234.
- Reducing Agent:** Nitrites and nitrates; Ferrous hydroxide as — in the estimation of. S. Miyamoto, 45.
- Reducing and Oxidising Properties:** Milk; — of. P. Haas and T. G. Hill, 494.
- Reducing Sugars:** Electrometric titration of —. W. L. Daggett, A. W. Campbell and J. L. Whitman, 277.
- Reducing Sugars:** Ethylgalactoside- β in the presence of a large proportion of —; Isolation of. J. Charpentier, 333.
- Reducing Sugars:** Fehling solution with methylene blue as internal indicator; Estimation of — by means of. J. H. Lane and L. Eynon, 220.
- Refractive Index:** American turpentine; The temperature coefficient of the — of (Notes). T. F. Harvey, 19.
- Refractive Index:** Chinese wood (Tung) oil with temperature; Variation of — of. F. H. Rhodes and H. E. Goldsmith, 506.
- Refractive Indices:** Hardened vegetable oils; Relationship between the iodine values and — of some. J. J. Sudborough, H. I. Watson and D. Y. Athawale, 180.
- Refractometric Estimation:** Hæmoglobin; — of. J. L. Stoddard and G. S. Adair, 617.
- Refractometric Estimation:** Serum proteins; — of. B. S. Neuhausen and D. M. Rioch, 282.
- Reinsch Test:** Arsenic and antimony; An investigation into the chemistry of the — for, and its extension to bismuth. Part I. and Part II. B. S. Evans, 357, 417.
- Rennin:** Pepsin and —; Comparison between the chemical and physiological characteristics of. F. Fenger, 130.
- Report:** Borough of Portsmouth. Annual — of the Borough Analyst for 1922. R. P. Page, 487.
- Report:** Bureau of Physico-Chemical Standards. Third Annual — (Financial Year 1922), presented by M. J. Timmermans to the Chemical Society of Belgium, 269.
- Report:** City and County of Kingston-upon-Hull. Annual — of the Public Analyst and Bacteriologist for 1922. A. R. Tankard, 598.
- Report:** City of Birmingham. Annual — of the City Analyst for 1922. J. F. Liverseege, 322.
- Report:** City of Birmingham. — of the City Analyst for the First Quarter, 1923. J. F. Liverseege, 323.
- Report:** City of Birmingham. — of the City Analyst for the Fourth Quarter, 1922. J. F. Liverseege, 170.
- Report:** City of Birmingham. — of the Public Analyst for the Second Quarter, 1923. J. F. Liverseege, 543.
- Report:** City of London. — on Samples Submitted to the Public Analyst in 1922, 486.
- Report:** County of Lancaster. Annual — of the County Analyst for the Year 1922. W. C. Williams, 445.
- Report:** County Borough of Salford. Annual — of the Borough Analyst for 1921. G. D. Elsdon, 115.
- Report:** County Borough of Salford. — on Insurance Act Dispensing. G. D. Elsdon, 264.
- Report:** Department of Scientific and Industrial Research. Food Investigation Board for the Year 1921; — of the, 20.
- Report:** Distinctive colouring for poisons. — of the Codex Sub-Committee to the Council of the Pharmaceutical Society, 71.
- Report:** Dominion Laboratory, New Zealand. Fifty-Fifth Annual —, 1921. J. S. Maclaurin, 170.
- Report:** Federated Malay States. Annual — of the Chemical Laboratories, Institute for Medical Research for the Year 1922, 603.
- Report:** Federated Malay States. — for 1921. Chemical Section. Institute for Medical Research, Kuala Lumpur. R. W. Blair, 66.
- Report:** Government of Madras. Annual — of the Chemical Examiner, 490.
- Report:** Kent. — of the County Analyst for the Quarter Ended December 31, 1922. F. W. F. Arnaud, 213.
- Report:** Metropolitan Borough of Stepney. Annual — of the Borough Analyst for 1922. H. Hawley, 381.
- Report:** Museum Exhibits; The Cleaning and Restoration of. Second — upon Investigations Conducted at the British Museum, 173.
- Report:** Sale of Food and Drugs Acts. Extracts from the Annual — of the Ministry of Health for 1922-1923 and Abstract of Reports of Public Analysts for the Year 1922, 601.
- Report:** The Rowett Institute. First —, 1922, 69.
- Report:** Work of the Government Laboratory; — of the Government Chemist upon the. For the Year Ending March 31st, 1923, 545.
- Reports:** Sale of Food and Drugs Acts. Extracts from the Annual Report of the Ministry of Health for 1922-1923 and Abstract of — of Public Analysts for the Year 1922, 601.
- Research Association:** British Flour Millers; — of, 550.

- Resins**: Hops: Estimation of the soft — in. T. K. Walker, 399.
- Resins**: Polishing coffee; Use of artificial — for. J. Bordas, 388.
- Respiration**: Apple seeds; — of. G. T. Harrington, 186.
- Respirometer**: Seeds and other small objects; New — for. G. T. Harrington and W. Crocker, 187.
- Reversion Spectroscope**: Carbon monoxide in blood; Calibration of the — for the estimation of. H. Hartridge, 341.
- Reviews of Books**:
- Absorption Spectra**: Organic Compounds; — and Chemical Constitution of. I. M. Heilbron, E. C. C. Baly and A. W. Stewart, 295.
- Acridine**: Synthetic Colouring Matters; Dye-stuffs Derived from Pyridine, Quinoline, —, and Xanthene. J. T. Hewitt, 245.
- Acts**: Sale of Food and Drugs —; Bell's. C. F. Lloyd, with Chemical Notes by R. A. Robinson, 410.
- Allotropy**: Theory of —; The. A. Smits, 146.
- Animal Body**: Oxidations and Reductions in the —. H. D. Dakin, 297.
- Annual Tables**: Constants and Numerical Data; — of: Chemical, Physical and Technological, 46.
- Applied Chemistry**: Dictionary of —; A. Vol. IV.; L—Oxydisilin. E. Thorpe, 144.
- Applied Chemistry**: Progress of —; Reports on the. Vol. VII, for 1922, 411.
- Applied Colloid Chemistry**: Theoretical and —; An Introduction to. W. Ostwald, 515.
- Artificial Perfumes**: Essential Oils and —; The Chemistry of. E. J. Parry, 97.
- Artificial Stone**: Cements and —. J. Watson, 246.
- Atomic**: Form. E. E. Price, 95.
- Bacteriology**: Chemical Students; Practical — for. D. Ellis, 514.
- Basic Slag "A"**: British Chemical Standard; New. — (Analytically Standardised Sample), 151.
- Bell's Sale of Food and Drugs**: Acts. C. F. Lloyd, with Chemical Notes by R. A. Robinson, 410.
- Bibliography**: Colloid Chemistry; — of. Vol. IV. S. P. Mullikin, 467.
- Bio-Chemistry**: Human Physiology; Fundamentals of — in Relation to. T. R. Parsons, 244.
- Bleaching**: — Powder and its Action in —. R. L. Taylor, 517.
- Bleaching Powder**: Bleaching; — and its Action in. R. L. Taylor, 517.
- Boiler Feed**: Water. P. G. Jackson, 199.
- British Association Reports**: The Nitrogen Industry. — (Hull Meeting, 1922), No. 14. D. A. Reynold, 355.
- British Chemical Standard**: —; New. Basic Slag "A" (Analytically Standardised Sample), 151.
- Reviews of Books—continued**:
- British Pharmaceutical Codex**: —; The, 1923, 576.
- Carbon Compounds**: Organic Chemistry, or the Chemistry of the —. Vol. III. The Chemistry of the Heterocyclic Compounds. V. Von Richter, 354.
- Carotinoids**: Pigments; — and Related. The Chromolipoids. L. S. Palmer, 150.
- Cellulose**: —; Researches on. Vol. IV. (1910-1921). C. F. Cross and C. Dorée, 196.
- Cements**: Artificial Stone; — and. J. Watson, 246.
- Chemica Applicata**: Merceologia e di —; Dizionario di. Vol. I. A to Cuscuta. G. V. Villavecchia and others, 631.
- Chemical Analysis**: Systematic Qualitative —; A. G. W. Sears, 47.
- Chemical Constitution**: Organic Compounds; Absorption Spectra and — of. I. M. Heilbron, E. C. C. Baly and A. W. Stewart, 295.
- Chemical Phenomena**: Surface Tension and Surface Energy, and Their Influence on —. R. S. Willows and E. Hatschek, 409.
- Chemical Students**: Practical Bacteriology for —. D. Ellis, 514.
- Chemistry**: Applied —; A Dictionary of. Vol. IV.; I—Oxydisilin. E. Thorpe, 144.
- Chemistry**: —; Inorganic and Organic. C. L. Bloxam, 513.
- Chemistry**: College —; Second Year. W. H. Chaplin, 296.
- Chemistry**: Colloid —; Bibliography of. Vol. IV. S. P. Mullikin, 467.
- Chemistry**: Inorganic and Theoretical —; A Comprehensive Treatise on. J. W. Mellor, 407.
- Chemistry**: Inorganic —; A Text Book of. G. S. Newth, 408.
- Chemistry**: Organic —; Theories of. F. Henrich, 296.
- Chemistry**: Plant Products; An Introduction to the — of. Vol. II, Metabolic Processes. P. Haas and T. G. Hill, 50.
- Chemistry**: Practical Physical —. A. Findlay, 573.
- Chemistry**: Progress of Applied —; Reports on the. Vol. VII, for 1922, 411.
- Chemistry**: Systematic Organic —; A. W. M. Cumming, I. V. Hopper, and T. S. Wheeler, 632.
- Chemistry Tangle**: — Unravelled; The. F. W. Gray, 242.
- Chemist's Year-Book**: —, 1923; The. F. W. Atack, 354.
- Chromolipoids**: Carotinoids and Related Pigments. The —. L. S. Palmer, 150.
- Codex**: Pharmaceutical —; The British, 1923, 576.
- College Chemistry**: Second Year —. W. H. Chaplin, 296.
- Colloid Chemistry**: Bibliography of —. H. N. Holmes, 467.
- Colloid Chemistry**: Laboratory Manual of —. H. N. Holmes, 49.

Reviews of Books—continued:

- Colloid Chemistry:** Theoretical and Applied —; An Introduction to. W. Ostwald, 515.
- Colouring Matters:** Industrial Chemistry; Monographs on. Synthetic —. Vat Colours. J. F. Thorpe and C. K. Ingold, 470.
- Colouring Matters:** Synthetic —; Dyestuffs Derived from Pyridine, Quinoline, Acridine and Xanthene. J. T. Hewitt, 245.
- Colours:** Industrial Chemistry; Monographs on. Synthetic Colouring Matters. Vat —. J. F. Thorpe and C. K. Ingold, 470.
- Constants:** — and Numerical Data; Annual Tables of; Chemical, Physical and Technological, 46.
- Control and Research Laboratories:** —; Official Methods in. Vol. I. (Spectrum Analysis, Absorption Spectra, Refractometry, Polarimetry). J. N. Goldsmith, S. J. Lewis and F. Twyman, 196.
- Dictionary:** Applied Chemistry; A — of. Vol. IV.; L-Oxydisilin. E. Thorpe, 144.
- Dizionario:** Merceologia e di Chémica Applicata; — di. Vol. I. A to Cuscuta. G. V. Villavecchia and others, 631.
- Drugs:** Foods and —; The Microscopical Examination of. H. G. Greenish, 96.
- Dyestuffs:** Synthetic Colouring Matters; — Derived from Pyridine, Quinoline, Acridine and Xanthene. J. T. Hewitt, 245.
- Emulsification:** Emulsions and —; The Theory of. W. Clayton, 147.
- Emulsions:** Emulsification; The Theory of — and. W. Clayton, 147.
- Essential Oils:** Artificial Perfumes; The Chemistry of — and. E. J. Parry, 97.
- Flavouring Materials:** —, Natural and Synthetic. A. Clarke, 148.
- Food and Drugs Acts:** Sale of —; Bell's. C. F. Lloyd, with Chemical Notes by R. A. Robinson, 410.
- Foods:** Drugs; The Microscopical Examination of — and. H. G. Greenish, 96.
- Gasworks Chemistry:** Modern —. G. Weyman, 98.
- Gelatin:** Glue and —; The Chemistry and Technology of. R. H. Bogue, 300.
- Glue:** Gelatin; The Chemistry and Technology of — and. R. H. Bogue, 300.
- Heterocyclic Compounds:** Organic Chemistry, or the Chemistry of the Carbon Compounds. Vol. III., The Chemistry of the —. V. von Richter, 354.
- Human Physiology:** Bio-Chémistry in Relation to —; Fundamentals of. T. R. Parsons, 244.
- Hydrochloric Acid:** Saltcake; The Manufacture of — and. A. C. Cumming, 516.
- Industrial Chemistry:** Monographs on —. Synthetic Colouring Matters. Vat Colours. J. F. Thorpe and C. K. Ingold, 470.
- Ink:** —. C. A. Mitchell, 634.
- Inorganic and Organic:** Chemistry; —. C. L. Bloxam, 513.

Reviews of Books—continued:

- Inorganic and Theoretical Chemistry:** Comprehensive Treatise on —; A. Vol. III. J. W. Mellor, 407.
- Inorganic Chemistry:** Text-Book of —; A. G. S. Newth, 408.
- Laboratory Manual:** Colloid Chemistry; — of. H. N. Holmes, 49.
- Lakes:** Wisconsin; The Inland — of. The Plankton. I., Its Quantity and Chemical Composition. E. A. Birge and C. Juday, 151.
- Medical Research Laboratories:** Park Davis & Co., Detroit, Mich.; Collected Papers from the — of, 472.
- Merceologia:** Chémica Applicata; Dizionario di — e di. Vol. I., A to Cuscuta. G. V. Villavecchia and Others, 631.
- Metabolic Processes:** Plant Products; An Introduction to the Chemistry of. Vol. II., —. P. Haas and T. G. Hill, 50.
- Microscopical Examination:** Foods and Drugs; The — of. H. G. Greenish, 96.
- Modern:** Gasworks Chemistry. G. Weyman, 98.
- Nitrogen Industry:** —; The. British Association Reports (Hull Meeting, 1922), No. 14. B. A. Reynold, 355.
- Nitrogen Industry:** —; The. J. R. Partington and L. H. Parker, 147.
- Numerical Data:** Constants and —; Annual Tables of; Chemical, Physical and Technological, 46.
- Official Methods:** Control and Research Laboratories; — in. Vol. I. (Spectrum, Analysis, Absorption Spectra, Refractometry, Polarimetry). J. N. Goldsmith, S. J. Lewis and F. Twyman, 196.
- Organic Chemistry:** Carbon Compounds; —, or the Chemistry of the. Vol. III., The Chemistry of the Heterocyclic Compounds. V. Von Richter, 354.
- Organic Chemistry:** Systematic —; A. W. M. Cumming, I. V. Hopper and T. S. Wheeler, 632.
- Organic Chemistry:** Theories of —. F. Henrich, 296.
- Organic Compounds:** Absorption Spectra and Chemical Constitution of. I. M. Heilbron, E. C. C. Baly and A. W. Stewart, 295.
- Organic Compounds:** Pure —; Identification of. Vol. IV. S. P. Mullikin, 466.
- Organic:** Syntheses. Vol. II. J. B. Conant, 243.
- Oxidations:** Animal Body; — and Reductions in the. H. D. Dakin, 297.
- Paracelsus:** Theophrastus Bombastus Von Hohenheim Called —. His Personality and Influence as Physician, Chemist and Reformer. J. M. Stillman, 353.
- Parfums Synthétiques:** Technique Industrielle des —; I.a. R. Sornet, 633.
- Park Davis & Co.:** Medical Research Laboratories of —, Detroit, Mich.; Collected Papers from the, 472.

Reviews of Books—continued:

- Perfumes:** Essential Oils and Artificial —; The Chemistry of. E. J. Parry, 97.
- Pharmaceutical Codex:** British —; The, 1923, 576.
- Phase-Rule:** Applications; The — and its. A. Findlay, 575.
- Physical Chemistry:** —; Practical. A. Findlay, 573.
- Physiology:** Bio-Chemistry in Relation to Human —; Fundamentals of. T. R. Parsons, 244.
- Pigments:** Carotinoids and Related —. The Chromolipoids. L. S. Palmer, 150.
- Plankton:** The Inland Lakes of Wisconsin. The —. I., Its Quantity and Chemical Composition. E. A. Birge and C. Juday, 151.
- Plant Products:** Chemistry of —; An Introduction to the. Vol. II., Metabolic Processes. P. Haas and T. G. Hill, 50.
- Pyridine:** Synthetic Colouring Matters. Dye-stuffs Derived from —, Quinoline, Acridine and Xanthene. J. T. Hewitt, 245.
- Qualitative Chemical Analysis:** Systematic —; A. G. W. Sears, 47.
- Quinoline:** Synthetic Colouring Matters; Dye-stuffs Derived from Pyridine, —, Acridine and Xanthene. J. T. Hewitt, 245.
- Reductions:** Animal Body; Oxidations and — in the. H. D. Dakin, 297.
- Reports:** Applied Chemistry; — on the Progress of. Vol. VII. for 1922, 411.
- Research Laboratories:** Control and —; Official Methods in. Vol. I. (Spectrum Analysis, Absorption Spectra, Refractometry, Polarimetry). J. N. Goldsmith, S. J. Lewis and F. Twyman, 196.
- Rubber:** Analysis of —; The. J. B. Tuttle, 99.
- Sale of Food and Drugs Acts:** Bell's —. C. F. Lloyd, with Chemical Notes by R. A. Robinson, 410.
- Saltcake:** Hydrochloric Acid and —; The Manufacture of. A. C. Cumming, 516.
- Second Year:** College Chemistry. W. H. Chaplin, 296.
- Spectrum Analysis:** Wave-Length Tables for —. F. Twyman, 633.
- Standard:** British Chemical —; New. Basic Slag "A" (Analytically Standardised Sample), 151.
- Starch Products:** Starch and —. H. A. Auden, 246.
- Starch:** — Products; — and. H. A. Auden, 246.
- Stone:** Cements and Artificial —. J. Watson, 246.
- Students:** Bacteriology for Chemical —; Practical. D. Ellis, 514.
- Sulphur Dioxide:** Sulphuric Acid and — Raw Materials. Vol. I. W. Wyld, 468.
- Sulphuric Acid:** Sulphur Dioxide Raw Materials; — and. Vol. I. W. Wyld, 468.

Reviews of Books—continued:

- Surface Energy:** Chemical Phenomena; Surface Tension and —, and Their Influence on. R. S. Willows and E. Hatschek, 409.
- Surface Tension:** Chemical Phenomena; — and Surface Energy, and Their Influence on. R. S. Willows and E. Hatschek, 409.
- Syntheses:** Organic —. Vol. II. J. B. Conant, 243.
- Synthetic Colouring Matters:** Industrial Chemistry; Monographs on —. Vat Colours. J. F. Thorpe and C. K. Ingold, 470.
- Synthetic Colouring Matters:** —; Dye-stuffs Derived from Pyridine, Quinoline, Acridine and Xanthene. J. T. Hewitt, 245.
- Tables:** Constants and Numerical Data; Annual — of; Chemical, Physical and Technological, 46.
- Tables:** Spectrum Analysis; Wave-Length — for. F. Twyman, 633.
- Technique Industrielle:** Parfums Synthétiques; La — des. R. Sornet, 633.
- Technology:** Glue and Gelatin; The Chemistry and — of. R. H. Bogue, 300.
- Theoretical and Applied Colloid Chemistry:** Introduction to —; An. W. Ostwald, 515.
- Theoretical Chemistry:** Inorganic and —; A Comprehensive Treatise on. Vol. III. J. W. Mellor, 407.
- Vat Colours:** Industrial Chemistry; Monographs on. Synthetic Colouring Matters. —. J. F. Thorpe and C. K. Ingold, 470.
- Water:** Boiler Feed —. P. G. Jackson, 199.
- Wave-Length Tables:** Spectrum Analysis; — for. F. Twyman, 633.
- Wisconsin:** Inland Lakes of —; The. The Plankton. I., Its Quantity and Chemical Composition. E. A. Birge and C. Juday, 151.
- Xanthene:** Synthetic Colouring Matters; Dye-stuffs Derived from Pyridine, Quinoline, Acridine and —. J. T. Hewitt, 245.
- Year-Book:** Chemist's —, 1923; The. F. W. Atack, 354.
- Rhizopus:** Sweet potatoes; Species of — responsible for the decay of. J. I. Lauritzen and L. L. Harter, 614.
- Rhizopus tritici:** Decaying sweet potatoes, Production of acid by — in. H. A. Edson, 614.
- Rhododendron:** Poisoning. S. W. Hardikar, 184.
- Rhubarb:** Oxymethylantraquinones in aloe and —; Detection of. M. Lestage, 334.
- Rice Hulls:** Bran; Microscopic method for estimation of — in. B. H. Silberberg, 186.
- Rice Polishings:** Yeast and —; Vitamins from. C. Funk, B. Harrow and J. B. Paton, 561.
- Robinia Pods:** —; Toxic properties of. E. M. Holmes, 233.
- Rocks:** Alkalis in —; Indirect estimation of. F. Walker, 626.
- Rosin:** Powdered — stored in closed containers; Changes in. F. P. Veitch and W. F. Sterling, 459.

Rowett Institute: The ——. First Report. 1922, 69.

Rubber Goods: Total sulphur in ——; Estimation of. S. Collier, M. Levin and R. T. Mease, 569.

S

“**Saccharin**”: Para-acid (*p*-sulphaminobenzoic acid) in commercial ——; Estimation of. O. Beyer, 608.

Saffron: Adulterants; —— and its. G. Pierlot, 389.

Sale of Food and Drugs Acts: ——. Extracts from the Annual Report of the Ministry of Health for 1922-1923 and Abstract of Reports of Public Analysts for the Year 1922, 601.

Salford: County Borough of ——. Annual Report of the Borough Analyst for 1921. G. D. Elsdon, 115.

Salford: County Borough of ——. Report on Insurance Act Dispensing. G. D. Elsdon, 264.

Salol: Certain medicinal phenolic esters; Microchemical identification of. Benzophenol, —, Betol, Cresalol, Salophene. M. G. Deniges, 228.

Salophene: Certain medicinal phenolic esters; Microchemical identification of. Benzophenol, Salol, Betol, Cresalol, —. M. G. Deniges, 228.

Salts: Didymium in cerium ——; Detection and estimation of. L. Dede, 626.

Salvarsan: Neo- ——; Reaction of. K. Scheringa, 183.

Samples: Material dissolved from glass containers; Contamination of water —— with. W. D. Collins and H. B. Riffenburg, 132.

Sampling: Coal; The —— of; The general problem and some experiments. J. H. Coste, E. R. Andrews and W. E. F. Powney, 580.

Santonin: Sources of ——; New. A. Viehoever and R. G. Capen, 559.

Santonin: Wormseed; Estimation of —— in. L. M. van den Berg, 559.

Saponin Tablets: ——; Analysis of. M. François, 30.

Saponins: Yeast cells; Action of —— on. F. Boas, 35.

Sarcobatus vermiculatus: Greasewood ——; Toxic constituent of. J. F. Couch, 84.

Schiff's Reagent: Acrolein; Use of —— in the quantitative estimation of. C. Moureu and E. Boismenu, 189.

Scientific Instruments: ——; Journal of, 200, 578.

Scottish Board of Health: Botulism at Loch Maree, 118.

Sea Water: Magnesium in one drop of ——; Rapid estimation of. G. Deniges, 92.

Sediment: Milk; The estimation of dirty —— in (Notes). A. R. Tankard, 444.

Seeds: *Azelia Africana*; The —— of. A. Diedrichs and B. Schmittmann, 125.

Seeds: Apple ——; Respiration of. G. T. Harrington, 186.

Seeds: Certain field weeds; —— and fruit of. J. Greger, 622.

Seeds: *Chydenanthus excelsus*; —— of. M. Duyster, 455.

Seeds: Small objects; New Respirometer for —— and other. G. T. Harrington and W. Crocker, 187.

Selenium: Copper from ——; Separation of. A. Angeletti, 463.

Selenium: ——; Estimation of. L. Losana, 44.

Selenium: Tellurium, iron and copper; Electro-metric titration of —— in presence of. H. H. Willard and F. Fenwick, 349.

Semi-Carbazides: Iodine on certain substituted —— and its application to their estimation; Action of. A. Doucet, 347.

Sensitive Test: Phosphoric acid; —— for. F. Feigl, 93.

Sensitiveness: Cyanide reactions; —— of some. J. B. Ekeley and I. C. Macy, 183.

Serum: Calcium in —— by the Kramer-Tisdall method; Estimation of. F. F. Tisdall, 502.

Serum: Magnesium in ——; Micro-estimation of. St. Gadiant, 615.

Serum Proteins: Refractometric estimation of ——. B. S. Neuhausen and D. M. Rioch, 282.

Shoe-Leathers: Wearing qualities of ——, 621.

Silage: Acids in ——; Estimation of the. E. Crasemann, 287.

Silage: Pigment of ——; Nature of the. H. E. Woodman, 345.

Silica: Waters; Estimation of —— in. F. Diéniert and F. Wandenbulcke, 398.

Silicates: —— and silicic acids; Magnetic analysis of. P. Pascal, 45.

Silicic Acids: Silicates and ——; Magnetic analysis of. P. Pascal, 45.

Silt: Nile ——; Titanium in. E. Griffiths-Jones, 320.

Silver Halides: Chloride, bromide and iodide in mixed ——; Qualitative separation of. H. Schmalfluss, 294.

Silver: Halogen ion titration; Indicator for —— and. K. Fajaus, 401.

Silver Nitrate: Cobalt with ——; Electro-metric titration of. E. Müller and H. Lauterbach, 140.

Silver Nitrate: Nickel with ——; Electro-metric titration of. E. Müller and H. Lauterbach, 42.

Simultaneous Equations: Avoidance of ——; An (Notes). A. Fairbourne, 263.

Sliding Scales: Strong liquids by dilution and use of aliquot parts; —— for the convenient titration of. C. H. D. Clark, 61, 164, 211.

Smoke: Leaves and —— of untreated German-grown tobacco; Nicotine content of the. H. Rhode, 334.

Soaps: Detergent action of ——; Method for determining the. J. W. McBain, R. S. Harborne and A. M. King, 568.

Society of Chemical Industry: Society of Public Analysts and other Analytical Chemists and of the Nottingham Section of the ——; Joint Meeting of the, 63.

- Society of Public Analysts and other Analytical Chemists:** Nottingham Section of the Society of Chemical Industry; Joint Meeting of the — and of the, 63.
- Society of Public Analysts and other Analytical Chemists, Proceedings of the:** 1923: 1, 53, 101, 153, 201, 249, 303, 357, 413, 473, 519, 579.
- Sodium:** Biochemical work; Estimation of — in. A. Blanchetière, 456.
- Sodium Carbonate:** Free ammonia in waters; The addition of — before estimating (Notes). A. W. Knapp, 486.
- Sodium Chloride:** Mercury by means of —; Volumetric estimation of. Analysis of cinnabar and organic mercury compounds. E. Votoček and L. Kašpárek, 192.
- Sodium Chromate:** Conductivity titrations by means of —. I. M. Kolthoff, 139.
- Sodium Cresylate:** —; Estimation of. E. Insard, 228.
- Sodium Formaldehydesulphoxalate:** —; Titration of. B. Salkin, 507.
- Sodium Hydrosulphite:** —; Iodimetric estimation of, 294.
- Sodium Hydrosulphite:** —; Purification of. W. G. Christiansen and A. J. Norton, 90.
- Sodium Hydroxide Solutions:** Concentrated sulphuric acid and —; Apparatus for delivering. R. C. Abbott, 407.
- Sodium Hypobromite:** Ammonia and —; A quantitative study of the limitations of the reaction between. Dinshaw Rattonji Nanji and W. S. Shaw, 473.
- Sodium Hypochlorite:** Methyl alcohol by means of —; Purification of. R. C. Menzies, 133.
- Sodium Oxalate Solution:** Dilute —; Stability of. E. S. Hopkins, 191.
- Sodium Perborate:** —; Analysis of. H. Burkhardt, 194.
- Sodium Picrate and Tartrate Crystals:** Potassium and —; Microscopical appearance of. E. Justin-Mueller, 512.
- Sodium:** Potassium from — by the perchlorate method; Separation of. G. F. Smith, 627.
- Sodium Tungstate:** Proteins from cereal extracts by means of —; Precipitation of. L. A. Rumsey, 220.
- Soft Resins:** Hops; Estimation of the — in. T. K. Walker, 399.
- Soil:** Bacteria in a —; The Whittles vibration method of obtaining a suspension of the. H. G. Thornton, 455.
- Soil:** Bacteria in —; Estimation of the number of. C. L. Whittles, 280.
- Soil:** Carbon in —; Estimation of. L. J. Simon, 398.
- Soil:** Colour changes in alkaline pyrogallol solution; Oxygen-supplying power of the — as indicated by. L. M. Hutchings, 618.
- Soil:** Humus and fatty matters of the —; Investigation by means of pyridine of the. M. Piettre, 345.
- Soil:** Nitrates in — by the phenol-disulphonic acid method; Estimation of. C. T. Gimingham and R. H. Carter, 287.
- Soil Separates:** Colloids in —; Microscopic estimation of. W. H. Fry, 619.
- Soil Types:** Mineralogical examination of soils and its use in determining —; Method of. J. Hendrick and G. Newlands, 286.
- Soils:** Flocculation of —. III. N. M. Comber, 132.
- Soils:** Humus in —; Comparative study of certain methods of estimating. V. Agafonoff, 566.
- Soils:** Humus —; Mechanical analysis of. G. W. Robinson, 84.
- Soils:** Hydrogen-ion concentration in —; Colorimetric determination of the. C. T. Gimingham, 287.
- Soils:** Mechanical analysis of — and other dispersions; New method for the. G. W. Robinson, 83.
- Soils:** Soil types; Method of mineralogical examination of — and its use in determining. J. Hendrick and G. Newlands, 286.
- Soils:** Sour —; Modified test for. N. M. Comber, 132.
- Solanin Content:** Potatoes; High — of. A. Bömer and H. Mattis, 454.
- Solanin:** Potatoes rich in —; Injurious. C. Griebel, 454.
- Solids:** Gauze dish; Estimation of — or moisture by means of a. A. Seidenberg, 466.
- Soluble Sulphides:** Sulphur in —; Electro-metric estimation of. H. H. Willard and F. Fenwick, 240.
- Solutions:** Carbon content of —; Estimation of the. J. Needham, 505.
- Solutions:** Tannin extracts; Measurement of the colour of brown — with special reference to. H. R. Procter, 405.
- Solvents:** Copra cake with —; Extraction of. A. P. West, 36.
- (Sorghum) Kernels:** Milo and Feterita —; Composition of. J. L. Bidwell, L. E. Bopstand J. D. Bowling, 125.
- Sour Soils:** Test for —; Modified. N. M. Comber, 132.
- Sourness:** Acids occurring in foods and in wine; The — of. T. Paul, 334.
- Soya Bean Oil:** —; Composition of. W. F. Baughman and G. S. Jamieson, 126.
- Soya Beans:** Bulgarian —. A. Zlataroff and I. Trifonow, 125.
- Soya Beans:** Linseed meal, wheat meal, —, and red clover hay; Quantitative estimation of amino acids of. T. S. Hamilton, N. Uyei, J. B. Baker and H. S. Grindley, 234.
- Sparteine:** Tablets; Estimation of — in. P. W. Jewel, 560.
- Specific Gravity:** Coke; Determination of the true — of. H. J. Ross, 38.
- Specific Gravity:** Gases in small quantities; Apparatus for the measurement of the — of. A. Blackie, 141.
- Specific Gravity:** Normality of a solution of sulphuric acid from its —; A formula for the determination of the (Notes). C. C. Roberts, 381.

- Spectrograph:** Féry —; Simplified, 94.
- Spectrophotometric Estimation:** Aromatic amino compounds; — of. W. E. Mathewson, 227.
- Spectrophotometric Identification:** Dyes; — of. W. C. Holmes, 572.
- Spectroscope:** Carbon monoxide in blood; Calibration of the reversion — for the estimation of. H. Hartridge, 341.
- Spinacene:** —, its oxidation and decomposition. A. C. Chapman, 400.
- Spirits:** Phthalyl-diethyl-ester —; Detection of. S. Eilles, 558.
- Spirits:** Diethylphthalate and phthaleins in —; Detection of. R. L. Calvert, 75.
- Spores:** Upper air; — in the. E. C. Stakman and Others, 615.
- Squalene:** —; Chemical constituents of. R. Majima and B. Kubota, 400.
- Stalagmometry:** Viscometry; — and. F. V. von Hahn, 352.
- Standard:** Cream cheese; Test case to secure a — for (Legal Notes), 383.
- Standard "Crude Fibre" Types:** Flours by means of —; Estimation and identification of. A. Fornet, 73.
- Standard Solution:** Phosphorus by means of a — of methylene blue; Volumetric estimation of small amounts of. W. M. Thornton, Jun., and H. L. Elderdice, Jun., 241.
- Standardisation:** Physiological —. J. S. White, 303.
- Standardisation:** Quillaia preparations; International — of. J. Cofman-Nicoresiti and S. B. Tallantyre, 497.
- Standardising:** Titanous solutions; Electro-metric — of. W. S. Hendrixson and L. M. Verbeck, 41.
- Standards:** Creatine and creatinine; Preparation of — for the estimation of. G. Edgar, 394.
- Starch:** Barley and wheat; Estimation of — in. A. R. Ling, E. H. Callow and W. J. Price, 29.
- Starch Content:** Interfering polysaccharides; Estimation of — in the presence of. G. P. Walton and M. R. Coe, 452.
- Starch:** Interfering polysaccharides; Estimation of — in presence of. G. P. Walton and M. R. Coe, 276.
- Starch:** Plant tissues; Estimation of small amounts of — in. F. E. Denny, 220.
- Starch:** Potatoes; Estimation of — in. A. R. Ling and W. J. Price, 554.
- Starch:** Strength of wheat flour; Influence of — on the. J. H. Buchanan and G. G. Naudain, 606.
- Starch:** Zamia —. T. E. Wallis, 219.
- Starches:** Weights of their grains; Estimation of — by the. L. Lindet and P. Nottin, 332.
- Statutory Rules and Orders:** —, 1922, No. 1332. Dairy, England, 27.
- Steel:** Sulphur in iron and —; Estimation of. F. Nikolai, 43.
- Steel:** Vanadium in —; The volumetric estimation of. A. T. Etheridge, 588.
- Steels:** Arsenic in —; New method of estimating. C. Mazzetti and P. Agostini, 402.
- Stepney:** Metropolitan Borough of —. Annual Report of the Borough Analyst for 1922. H. Hawley, 381.
- Sterol Content:** Cow's milk; The — of. F. W. Fox and J. A. Gardner, 227.
- Sterols:** Reactions of —; New. G. S. Whitby, 226.
- Sterols:** Unsaponifiable matter and — of edible fats; Some observations with regard to the. D. W. Steuart, 155.
- Stone Work:** Department of Scientific and Industrial Research. Preservation of —, 327.
- Stored Fruits:** Pectic constituents of —; Changes occurring in the. M. H. Carré, 34.
- Strength:** Flour; Action of malt and malt extract upon the — of. F. A. Collatz, 219.
- Strength:** Wheat flour; Chemistry of the — of. H. E. Woodman, 72.
- Strength:** Wheat Flour; Influence of starch on the — of. J. H. Buchanan and G. G. Naudain, 606.
- Strogy Liquids:** Convenient titration of — by dilution and use of aliquot parts; Sliding scales for the. C. H. D. Clark, 61, 164, 211.
- Strontium:** Natural brines; Presence of barium and — in. A. G. Francis, 315.
- Strophanthin:** Ouabain; Properties and reactions of — and. M. Tiffeneau, 182.
- Sublimation:** Analytical procedure; — as an. J. Hortvet, 406.
- Substances:** Growth-promoting and anti-rachitic functions of certain —; Relation between the. H. Goldblatt and S. S. Zilva, 612.
- Substances:** Invertase; Efficiency of — inhibiting the action of. E. H. Harvey, 131.
- Substances:** Molecular weight of — in alcoholic solution from the elevation of the flash point; Determination of the. R. Wright, 46.
- Substances:** Viscosity of highly viscous —; Apparatus for determining the. G. V. Derfeld, 630.
- Substitute:** Camphorated oil — (Legal Notes), 172.
- Sugar Analysis:** Tables for —. G. D. Elsdon, 435.
- Sugar:** Blood; Estimation of — in. E. G. B. Calvert, 230.
- Sugar:** Blood; New method for the estimation of — in. Denigés, 343.
- Sugar:** Cresol; Detection of — in condensed waters by means of. G. E. Stevens, 344.
- Sugar:** Formic acid by caramelisation of cane —; Formation of. S. G. Simpson, 607.
- Sugar Groups:** Acids derived from the different —; Reaction distinguishing between. L. J. Simon and A. J. A. Guillaumin, 74.
- Sugar:** Native Malay — (*Pula Malacca*); The composition of (Notes). H. Lowe and A. Houlbrooke, 114.
- Sugar Products:** Caramel in —; Estimation of. A criticism of the Ehrlich method. G. P. Meade, 223.
- Sugar Products:** Gums in —; Estimation of. H. T. Ruff and J. R. Withrow, 74.

- Sugars:** Ethylgalactoside- β in the presence of a large proportion of reducing —; Isolation of. J. Charpentier, 333.
- Sugars:** Fehling solution; Action of alkaline earths upon the estimation of — by. L. Eynon and J. H. Lane, 277.
- Sugars:** Iodine; Estimation of — by the use of. F. A. Cajori, 73.
- Sugars:** Methylene blue as internal indicator; Estimation of reducing — by means of Fehling solution with. J. H. Lane and L. Eynon, 220.
- Sugars:** Reducing —; Electrometric titration of. W. L. Daggett, A. W. Campbell and J. L. Whitman, 277.
- Sulphated Waters:** Essex; — of. J. C. Thresh, 82.
- Sulphates:** Potassium by the perchlorate and cobaltinitrite methods, and on the removal of —; Further notes on the estimation of. R. L. Morris, 250.
- Sulphides:** Mineral waters containing —; Rapid estimation of iodine in. M. J. Dubief, 285.
- Sulphides:** Sulphur in soluble —; Electrometric estimation of. H. H. Willard and F. Fenwick, 240.
- Sulphite:** Thiosulphate, even in presence of —; Colorimetric estimation of traces of. O. Hackl, 350.
- Sulpho-Chromic Oxidation:** Chromic oxide in the —; Rôle of. L. J. Simon, 37.
- Sulphonphthalein Indicators:** Hydrogen-ion concentration; New — for the determination of, 401.
- Sulphur Dioxide:** Cattle foodstuffs after fumigation; Note on the presence of — in. H. A. Peacock, 160.
- Sulphur:** Inorganic and organic compounds; Estimation of —, arsenic and antimony in. F. Feigl and R. Schorr, 623.
- Sulphur:** Iron and steel; Estimation of — in. F. Nikolai, 43.
- Sulphur:** Organic compounds; Estimation of — in. W. F. Hoffman and R. A. Gortner, 289.
- Sulphur:** Organic compounds; Method for the simultaneous estimation of — and halogen in. C. S. Leonard, 188.
- Sulphur:** Rubber goods; Estimation of total — in. S. Collier, M. Levin and R. T. Mease, 569.
- Sulphur:** Soluble sulphides; Electrometric estimation of. H. H. Willard and F. Fenwick, 240.
- Sulphuric Acid and Sodium Hydroxide Solutions:** Delivering concentrated —; Apparatus for. R. C. Abbott, 407.
- Sulphuric Acid:** Normality of a solution of — from its specific gravity; A formula for the determination of the (Notes). C. C. Roberts, 381.
- Sulphuric Acid Test:** Fish liver oils; Note on the — for. N. Evers and H. J. Foster, 58.
- Sulphuric Acid Test:** Liver oils; The — for. A. Harden and R. Robison, 226.
- Sulphurous Acid:** Permanganate; Electrometric titration of — with. W. S. Hendrixon and L. M. Verbeck, 93.
- Sunflower Seed Oil:** —; Composition of. G. S. Jamieson and W. F. Baughman, 126.
- Superannuation Act:** Local Government and other Officers' —, 385.
- Supersaturation-Time:** Reactions; Quantitative analysis by measurement of — of. H. Roder, 93.
- Surface Tension:** — balance. Apparatus for the rapid measurement of —. R. G. Green, 629.
- Sweetened and Unsweetened Condensed Milk:** Department of Scientific and Industrial Research. Food Investigation Board. Studies in —, 448.
- Sweetmeats:** Eastern —; Composition of. A. Heiduschka and P. Zywnew, 332.
- Sweet Potatoes:** Decay of —; Species of *Rhizopus* responsible for the. J. I. Lauritzen and L. L. Harter, 614.
- Sweet Potatoes:** Maltose in — during cooking; Formation of. H. C. Gore, 553.
- Sweet Potatoes:** *Rhizopus tritici* in decaying —; Production of acid by. H. A. Edson, 614.
- Syrup:** "Crystal —" (Legal Notes), 600.
- "Syrup Treacle":** —; Disclosure of corn syrup (Legal Notes), 599.
- Systematic Procedure:** Acids; — for the detection and separation of. Z. Karaoglanov and M. Dimitrov, 623.

T

- Tables:** Sugar analysis; — for. G. D. Elsdon, 435.
- Tablets:** Saponin —; Analysis of. M. François, 30.
- Tablets:** Sparteine in —; Estimation of. P. W. Jewel, 560.
- Tannin and other Solutions:** Ultra-filtration of —. R. J. Browne, 569.
- Tannin Extracts:** Colour of brown solutions with special reference to —; Measurement of the. H. R. Procter, 405.
- Tannin:** Test for —; Qualitative. E. Atkinson and E. O. Hazleton, 38.
- Tannin:** Whiskey; — in. R. W. Scott, 181.
- Tannin:** Wild cherry bark; — of. J. C. Peacock and B. L. de G. Peacock, 559.
- Tanning Extracts:** Ultra violet; Absorption-spectra of — in the. De La Bruère, 351.
- Tanning Materials:** Adulterants; Analytical characteristics of — and detection of. M. Jamet, 135.
- Tanning Materials:** Analysis of vegetable —; Effect of hydrogen ion concentration on the. J. A. Wilson and E. J. Kern, 88.
- Tar Acids:** Phenol in mixtures of —; Estimation of. W. H. Hoffert, 39.
- Tartaric and Malic Esters:** Molybdcic acid on the optical rotation of —; Action of. E. Darmois, 346.

- Tellurium:** Dichromate method; Volumetric estimation of — by the. V. Lenher and H. F. Wakefield, 464.
- Tellurium:** Selenium in presence of —, iron and copper; Electrometric titration of. H. H. Willard and F. Fenwick, 349.
- Temperature Coefficient:** American turpentine; The — of the refractive index of (Notes). T. F. Harvey, 19.
- Temperature Indicators:** Dyes as — Use of. P. A. Kober, 573.
- Terpenes:** Pinene and other —; Effect of fuller's earth on. C. S. Venable, 235.
- Tetryl and TNT Mixtures:** —; Analysis of. C. A. Taylor and W. H. Rinckenbach, 236.
- Tetryl:** Proportions of TNT and — from the freezing point curve; Estimation of the. C. A. Taylor and W. H. Rinckenbach, 137.
- Theobromine:** Boiling chloroform; Extraction of — and caffeine with. O. P. A. H. Schaap, 76.
- Theobromine:** Cocoa; New method for estimating — in. T. Ugarte, 388.
- Thermostats:** —; Control of. D. J. Beaver and J. J. Beaver, 352.
- Thiocyanate:** Platinum, palladium, etc., with —; Precipitation of. W. N. Iwanoff, 293.
- Thiosulphate:** Traces of —, even in presence of sulphite; Colorimetric estimation of. O. Hackl, 350.
- Thorium:** Uranium from — and rare earths in pitchblende; Separation of. W. Riss, 626.
- Thyroid Gland:** Powdered —; Analysis of, and detection of adulterants. R. Fabre and H. Penau, 182.
- Tin:** Antimony and —; Microchemical separation of. A. P. Ortodogsu and M. Ressay, 510.
- Tin:** Canned Foods; — in (Legal Notes), 326.
- Tin:** Cupferron; Separation of — from other metals and estimation of — by means of. N. H. Furman, 626.
- Tinctures:** Iron salts with — of various *Boleti*; Colour reactions of. R. Gruyot, 560.
- Tinned Peas:** Copper Sulphate in — (Legal Notes), 267.
- Tissue:** Carbohydrates of plant —; Effects of the method of dessication on the. K. P. Link and W. E. Tottingham, 187.
- Tissues:** Starch in plant —; Estimation of small amounts of. F. E. Denny, 220.
- Titanium:** Nile silt; — in. E. Griffiths-Jones, 320.
- Titanium Pigments:** —; Analysis of. L. E. Barton, 403.
- Titanium Trichloride Solution:** Triphenylmethane and azo dyes by means of —; Analysis of. W. S. Calcott and F. L. English, 620.
- Titanous Solutions:** Standardising of —; Electrometric. W. S. Hendrixson and L. M. Verbeck, 41.
- Titrateable Alkali:** Dinitrosalicylic acid; Estimation of the — of the blood with. J. B. Sumner, R. S. Hubbard and L. L. Finner, 563.
- Titration:** Electrometric —; New vessel for. W. T. Bovie, 143.
- Titration:** Electrometric —; Simple apparatus for. W. E. Garner and C. A. Waters, 142.
- Titration Methods:** Dyestuffs by —; Valuation of. R. B. Brown and H. Jordan, 570.
- Titrations:** Barium chloride; Conductivity — by means of. I. M. Kolthoff, 40.
- Tobacco Extracts:** Nicotine in tobacco and —; Estimation of. O. M. Shedd, 610.
- Tobacco:** Nicotine in — and — extracts; Estimation of. O. M. Shedd, 610.
- Tobacco:** Nicotine in — and in — smoke; Estimation of. M. Popp and J. Contzen, 33.
- Tobacco Smoke:** Nicotine in tobacco and in —; Estimation of. M. Popp and J. Contzen, 33.
- Tobacco:** Untreated German-grown —; Nicotine content of the leaves and smoke of. H. Rhode, 334.
- Tolidine:** —; Estimation of. S. Palkin, 619
- Toxic Constituent:** Greasewood (*Sarcobatus vermiculatus*); — of. J. F. Couch, 84.
- Toxic Organic Combustion Products:** Effluents; Detection of — in. A. Gregoire, 397.
- Toxic Properties:** Robinia pods; — of. E. M. Holmes, 233.
- Toxicity:** Cadmium; — of, 284.
- Toxicity:** Mercuric cyanide; Contribution to the study of the — of. R. Fabre and J. Josset, 565.
- Toxicity:** Methyl alcohol; — of, 344.
- Toxicity:** So-called poisonous greensand; Cause of the — of. J. W. Kelly, 286.
- Toxicological and Forensic, Abstracts:** 1923: 184, 233, 282, 344, 396, 457, 502, 565, 618.
- Toxicological Examinations:** Benzoyl radical in — for alkaloids; Diazotisation of the. H. Pecker, 502.
- Toxicological Importance:** Xanthylated derivatives of veronal and hypnotics of the barbituric series; Hydrolysis of the, and its —. R. Fabre, 284.
- Transparent Preparations:** Coal for microscopic investigations; — of. J. Lomax and J. R. Lomax, 630.
- Treacle:** "Syrup —"; Disclosure of corn syrup (Legal Notes), 599.
- Trinidad:** Notes from the Reports of Public Analysts, —, 67.
- TNT and Tetryl Mixtures:** —; Analysis of. C. A. Taylor and W. H. Rinckenbach, 236.
- TNT:** Proportions of — and tetryl from the freezing point curve; Estimation of the. C. A. Taylor and W. H. Rinckenbach, 137.
- Triphenylmethane:** Titanium trichloride solution; Analysis of — and azo dyes by means of. W. S. Calcott and F. L. English, 620.
- Tropics:** Hypochlorite solution in the —; Alleged deterioration of (Legal Notes), 68.
- True Specific Gravity:** Coke; Determination of the — of. H. J. Ross, 38.
- Tryptophan:** —; Estimation of. G. E. Holm and G. R. Greenbank, 508.
- "Tuberculin Tested":** Ministry of Health. Sale of Milk under Special Designations. "Certified"—"Grade A —"—"Grade A"—Pasteurised, 120.

- Tung and Rape Oils:** Qualitative tests for —; New. A. W. Thomas and C. L. Yu, 128.
- (Tung) Oil:** Chinese wood — and linseed oil; Heat treatment of. C. E. Mabery, 459.
- (Tung) Oil:** Refractive index of Chinese wood — with temperature; Variation of. F. H. Rhodes and H. E. Goldsmith, 506.
- Tungsten:** Molybdenum in —; Estimation of small quantities of. W. J. King, 349.
- Tungsten Wire:** Hydrogen ion determinations; — for. J. R. Baylis, 512.
- Turpentine:** Refractive index of American —; The temperature coefficient of the (Notes). T. F. Harvey, 19.
- Urine:** Adrenalin and —; Quantitative colour reaction given by. H. Friend, 616.
- Urine:** Ammonia and urea in —; Estimation of. S. Levy-Simpson and D. C. Carroll, 615.
- Urine:** Cystine in —; Colorimetric estimation of. J. M. Looney, 82.
- Urine:** Formic acid in —; Estimation of. E. M. Benedict and G. A. Harrop, 81.
- Urine:** Urobilin in —; Detection of. G. Rodillon, 36.
- Urobilin:** Urine; Detection of — in. G. Rodillon, 36.

V

- U**
- Ultra-Filtration:** Tannin and other solutions; — of. R. J. Browne, 569.
- Ultra Violet:** Absorption-spectra of tanning extracts in the —. De La Bruère, 351.
- Ungerminated Barley:** Maltase in germinated and —; Presence of. A. R. Ling and D. R. Nanji, 606.
- United States Department of Agriculture:** —. Food Inspection Decision 192. Mustard and Mustard Products, 493.
- Unaponifiable Matter:** Edible fats; Some observations with regard to the — and sterols of. D. W. Steuart, 155.
- Unsweetened Condensed Milk:** Department of Scientific and Industrial Research. Food Investigation Board. Studies in sweetened and —, 448.
- Uranium:** Beryllium and —; Quantitative separation of. P. H. M. Brinton and R. B. Ellestad, 194.
- Uranium:** Thorium and rare earths in pitch-blende; Separation of — from. W. Riss, 626.
- Urea:** Ammonia and — in urine; Estimation of. S. Levy-Simpson and D. C. Carroll, 615.
- Urea:** Blood —; Estimation of. J. A. Behre, 500.
- Urea:** Cows' milk; Estimation of — in. Y. Morimoto, 394.
- Urea:** Urease; Estimation of — alone and in the presence of cyanamide by means of. E. J. Fox and W. J. Geldard, 456.
- Urea:** Urease; Estimation of — by means of. G. M. Wishart, 501.
- Urease:** Urea alone and in the presence of cyanamide by means of —; Estimation of. E. J. Fox and W. J. Geldard, 456.
- Urease:** Urea by means of —; Estimation of. G. M. Wishart, 501.
- Uric Acid:** Blood; Combined — in. A. R. Davis, E. B. Newton and S. R. Benedict, 80.
- Uric Acid:** Blood; Revised method for the estimation of — in. O. Folin, 79.
- Uric Acid:** Photochemical action in the Folin and Wu estimation of —; Error due to. H. Rogers, 282.
- Uric Acid:** —; Estimation of. S. R. Benedict, 80.
- Vacuole Contents:** Leaf cells; Method for separate extraction of — and protoplasmic material from. A. C. Chibnall, 281.
- Valve:** Bunsen — in connection with a filter pump; Use of the. F. W. Ashton, 406.
- Vanadium:** Arsenic and phosphorus from —; Separation of. H. A. Doerner, 625.
- Vanadium:** Iron and chromium; New method for the electrometric titration of — in the presence of. H. H. Willard and F. Fenwick, 192.
- Vanadium:** Steel; The volumetric estimation of — in. A. T. Etheridge, 588.
- Vanillin:** Purity of —; Determination of the. S. B. Phillips, 367.
- Vegetable Oils:** Copper acetate; Reaction of crude — with. W. H. Dickhart, 224.
- Vegetable Oils:** Iodine values and refractive indices of some hardened —; Relationship between the. J. J. Sudborough, H. I. Watson and D. Y. Athawale, 180.
- Vegetable Tanning Materials:** Hydrogen ion concentration on the analysis of —; Effect of. J. A. Wilson and E. J. Kern, 88.
- Vegetables:** Oriental fruits and —; Presence of Vitamin C in some. H. Embrey, 340.
- Venezuelan Jaborandi:** —; Examination of a. O. F. Black, J. W. Kelly and W. W. Stockberger, 129.
- Veronal:** Xanthylated derivatives of — and hypnotics of the barbituric series; Hydrolysis of the, and its toxicological importance. R. Fabre, 284.
- Vessel:** Electrometric titration; New — for. W. T. Bovie, 143.
- Vibration Method:** Suspension of the bacteria in a soil; The Whittles — of obtaining a. H. G. Thornton, 455.
- Vinegar:** — (Legal Notes), 544.
- Viscometry:** Stalagmometry and —. F. V. Von Hahn, 352.
- Viscosity:** Highly viscous substances; Apparatus for determining the — of. G. V. Derfeld, 630.
- Viscous Substances:** Viscosity of highly —; Apparatus for determining the. G. V. Derfeld, 630.
- Vitamin A Content:** Lard obtained from hogs fed with a control ration; — of. M. G. Mallon and M. Clark, 130.

- Vitamin A Deficiency:** Blood platelet counting in —; Technique of. W. Cramer, A. H. Drew and J. C. Mottram, 499.
- Vitamin A:** —; Characteristics of. K. Kashima, 78.
- Vitamin B:** Colour test for —. A. Jendrassik, 562.
- Vitamin B:** Frozen flesh food; Presence of — in. A. M. Wright, 611.
- Vitamin B:** Rats deprived of —; Utilisation of carbohydrates by. H. A. Mattill, 339.
- Vitamin B:** Rats; Modified technique in estimation of — by use of. H. Steenbock, M. T. Sell and E. M. Nelson, 280.
- Vitamin B:** Source of —; Yeast as a. C. Kennedy and L. S. Palmer, 36.
- Vitamin C:** Foods; Protection of — in. E. F. Kohman, 232.
- Vitamin C:** Oriental fruits and vegetables; Presence of — in some. H. Embrey, 340.
- Vitamin C:** Oxidation of —; Influence of reaction on the. S. S. Zilva, 499.
- Vitamin Content:** Palm-kernel meal; Growth-promoting value and — of. A. J. Finks, 611.
- Vitamin D:** —. T. B. Heaton, 185.
- Vitamin:** Light; Fat-soluble — and the action of. H. Steenbock and E. M. Nelson, 499.
- Vitamin Preparations:** Commercial —; Potency of. E. M. Bailey, H. C. Cannon and H. J. Fisher, 340.
- Vitamins:** Action of —; Mode of. W. Cramer, 391.
- B-Vitamins:** Antineuritic and water-soluble —; Identity or non-identity of. P. A. Levene and M. Muhlfield, 612.
- Vitamins:** Molluscs; — in. Presence of the antiscorbic factor in the oyster. (Mme.) Randoin, 561.
- Vitamins:** Yeast and rice polishings; — from. C. Funk, B. Harrow and J. B. Paton, 561.
- Volatile Acids:** Detection of —; General method for the. G. Karaoglanov, 293.
- Volumetric Analysis:** Bromate in —; Use of. II. Influence of mercuric mercury upon bromic acid reactions. G. F. Smith, 462.
- Volumetric Method:** Elementary analysis; New — of. L. Hackspill and G. de Heeckeren, 504.
- Volumetric Standards:** Malic, maleic, and fumaric acids as —. N. A. Lange and H. Kline, 133.
- W**
- Water:** Absorbent for — in organic analysis; Alumina as an. H. L. Fisher, H. L. Faust and G. H. Walden, 84.
- Water Analysis:** Abnormality found in —; An (Notes). R. C. Frederick, 66.
- Water Analysis, Abstracts:** 1923: 82, 132, 186, 285, 344, 396, 503.
- Water:** Atmospheric gases by —; The absorption of. J. H. Coste, 433.
- Water:** *B. coli* index of pollution of —; Effect of *Gambusia affinis* on the. L. C. Havens and S. A. Dehler, 393.
- Water:** Carbon dioxide in drinking —; Estimation of. P. Lehmann and A. Reuss, 503.
- Water:** Magnesium in one drop of sea —; Rapid estimation of. G. Deniges, 92.
- Water:** Mineral oils; Estimation of — in. L. Losana, 190.
- Water:** Nitrites in —; Detection of. A. Zlataroff, 397.
- Water Pipes:** Corrosion in —; New method of measuring. F. N. Speller and V. V. Kendall, 186.
- Water Pollution:** Phenol-chlorine —. New reaction between phenol and chlorine. E. F. Kohman, 397.
- Water Samples:** Material dissolved from glass containers; Contamination of — with. W. D. Collins and H. B. Riffenburg, 132.
- Water-Soluble B-Vitamins:** Antineuritic and —; Identity or non-identity of. P. A. Levene and M. Muhlfield, 612.
- Water:** Temporary hardness in —; Estimation of. W. R. Atkin and A. Gardner, 285.
- Waters:** Essex; Sulphated — of. J. C. Thresh, 82.
- Waters:** Free ammonia in —; The addition of sodium carbonate before estimating (Notes). A. W. Knapp, 486.
- Waters:** Harrogate —; Barium in the. A. Woodmansey, 132.
- Waters:** Iodine in mineral — containing sulphides; Rapid estimation of. M. J. Dubief, 285.
- Waters:** Metals; Hydrogen ion concentration of natural — (and of some etching reagents) in relation to action on. W. R. G. Atkins, 396.
- Waters:** Silica in —; Estimation of. F. Diéner and F. Wandenbulcke, 398.
- Waters:** Sugar in condensed — by means of cresol; Detection of. G. E. Stevens, 344.
- Wave-Length:** Absorption bands; Coincidence method for the measurement of the — of. H. Hartridge, 351.
- Wax Coating:** Apple skin; Constituents of the — of. C. E. Sando, 496.
- Wax Compositions:** Coloured —; Examination of. H. Smelkus, 237.
- Wearing Qualities:** Shoe-leathers; — of, 621.
- Weeds:** Field —; Seeds and fruit of certain. J. Greger, 622.
- Weights:** Starches by the — of their grains; Estimation of. L. Lindet and P. Nottin, 332.
- Whale Oil:** Constants of —; Notes on the food value of Pacific fish and on the. W. M. Doherty, 495.
- Wheat Flour:** Starch on the strength of —; Influence of. J. H. Buchanan and G. G. Naudain, 606.
- Wheat Flour:** Strength of —; Chemistry of the. H. E. Woodman, 72.
- Wheat Hairs:** Flour by enumeration of the — present; Grading of. G. L. Keenan, 178.
- Wheat Meal:** Amino acids of linseed meal, —, Soya beans, and red clover hay; Quantitative estimation of. T. S. Hamilton, N. Uyei, J. B. Baker and H. S. Grindley, 234.

Wheat: Starch in barley and —; Estimation of. A. R. Ling, E. H. Callow and W. J. Price, 29.

Whiskey: Tannin in —. R. W. Scott, 181.

Whittles Vibration Method: Bacteria in a soil; The — of obtaining a suspension of the. H. G. Thornton, 455.

Whole Culture Method: Diphtheria bacilli; — for testing the virulence of. C. G. Bull and C. M. McKee, 343.

Winckler's Manganous Process: A case in which — for dissolved oxygen is untrustworthy (Notes). J. H. Coste and E. R. Andrews, 543.

Wine: Acids occurring in foods and in —; The sourness of. T. Paul, 334.

Wine: "Beef and Malt —" (Legal Notes), 326.

Winter Feeding: Milch cows; Cod-liver oil in the — of. J. C. Drummond, K. H. Coward, J. Golding, J. Mackintosh and S. S. Silva, 339.

Wire: Hydrogen ion determinations; Tungsten — for. J. R. Baylis, 512.

Wood Fibres: Hemp and — in paper pulp; The quantitative estimation of. W. Dickson, 373.

Woods: Some American —; Results of analyses of. G. R. Ritter and L. C. Fleck, 39.

Wormseed: Santonin in —; Estimation of. L. M. van den Berg, 559.

Writing Inks: Examination of —. F. F. Rupert, 459.

X

Xanthylated Derivatives: Veronal and hypnotics of the barbituric series; Hydrolysis of the — of, and its toxicological importance. R. Fabre, 284.

Xanthydrol: Antipyrin with —; Compound of. R. Fabre, 32.

Xylenes: —; Separation of. H. T. Clarke and E. R. Taylor, 236.

Y

Yeast: Baker's —; Bios requirement of. J. J. Willaman and A. G. Olsen, 339.

Yeast: Rice polishings; Vitamins from — and. C. Funk, B. Harrow and J. B. Paton, 561.

Yeast: Vitamin B; — as a source of. C. Kennedy and L. S. Palmer, 36.

Yeast Cells: Saponins on —; Action of. F. Boas, 35.

Z

Zamia: Starch. T. E. Wallis, 219.

Zinc Ammonium Phosphate: Zinc as —; Separation and estimation of. P. Artmann, 140.

Zinc Blende: Fluorine in —; Estimation of. L. da Rocha-Schmidt and K. Kruger, 628.

Zinc: — ammonium phosphate; Separation and estimation of — as. P. Artmann, 140.
