

**Errata** in Vol. XLIX :

- p. 162, l. 20, for "1" read "2."  
p. 271, l. 3 from bottom, for "124" read "214."  
p. 468, l. 11, for "1" read "2."

## INDEX TO VOLUME XLIX.

### INDEX TO NAMES.

#### A

- Abbott, W. E.** See Becker, H. G., and Abbott, W. E.  
**Aeby, J.** Dangerous Goods (Review), 457.  
**Albert, K.** A simple viscometer for solutions of resins, etc., 252.  
**Alcock, F. H.** Total sulphur in rubber (Notes), 579.  
**Allen, R. S.** See Piper, H. A., Allen, R. S. and Murlin, J. R.  
**Alles, G. A., and Winegarden, H. M.** Oxidation of dextrose by means of iodine in presence of insulin, 97.  
**Alsberg, C. L.** See Rask, O. S., and Alsberg, C. L.  
**Alsberg, C. L.** See also Schwartz, E. W., and Alsberg, C. L.  
**Amberger, C., and Wieseahn, A.** Glycerides of lard, 143.  
**Anderson, R. J.** Anthocyanins in grapes, 39.  
**Anderson, R. J.** Phytosterols of the endosperm of maize, 399.  
**Anderson, R. J., and Nabenhauer, F. P.** Chemistry of grape pigments. Anthocyanins in Clinton grapes, 533.  
**Anderson, R. J., and Nabenhauer, F. P.** Separation of unsaturated from saturated sterols, 435.  
**Anderson, R. J., and Nabenhauer, F. P.** The phytosterols of wheat endosperm, 449.  
**André, E.** Apparatus for fractional distillation under reduced pressure, 407.  
**André, E.** Estimation of carbon disulphide by iodimetry, 107.  
**André, E.** Identity of phocoenic and valeric acids, 296, 533.  
**Andrew, R. E.** Estimation of the extract from tea, 141.  
**Andrew, R. L.** The colorimetric estimation of lead in cream of tartar, 129.  
**Ardagh, E. G. R., and Bongard, G. R.** Analysis of zinc ores. Use of powdered magnesium for the removal of copper and lead, 249.  
**Ardagh, E. G. R., and Bongard, G. R.** Separation of zinc from iron and aluminium, 249.  
**Armstrong, E. F.** The Simple Carbohydrates and the Glucosides (Review), 497.  
**Arnaud, F. W. F.** County of Kent. Report of the Agricultural Analyst for the Fourth Quarter, 1923, 182.

- Atack, F. W.** The Chemist's Year Book, 1924 (Review), 306.  
**Atkin, W. R.** Effects of varying hydrogen ion concentration on tannin analysis, 493.  
**Auerbach, F., and Bodländer, E.** New method of distinguishing between honey and artificial honey, 389.  
**Auerbach, F., and Kruger, D.** Estimation of malic acid in fruit products, 93.  
**Auerbach, F., and Kruger, D.** Polarimetric estimation of malic acid, 92.  
**Auger, M. V.** New volumetric method for estimating ammonium salts, 250.  
**Auger, V., and Odinet, L.** The carrying down of cobalt and nickel by tin precipitated as stannic sulphide, 198.

#### B

- Badger, C. H.** See Sale, J. W., and Badger, C. H.  
**Bagnall, H. H.** See Liverseege, J. F., and Bagnall, H. H.  
**Bahr, H.** Estimation of sulphur in coal, 454.  
**Bakke, G.** See Collenberg, O., and Bakke, G.  
**Balce, S.** See West, A. P., and Balce, S.  
**Bamford, F.** Note on the Denigès test for butyric acid (Notes), 226.  
**Ban, —.** Apparatus for filtering hygroscopic substances, 300.  
**Bankston, H. J., and Vilbrandt, F. C.** Influence of various solvents on the Hanus iodine values of cottonseed and coconut oils, 449.  
**Barlot, J.** Ferric oxalate. Application to the separation of iron and calcium, 544.  
**Barrs, C. E.** Estimation of cadmium in spelter and zinc ores, 248.  
**Barry, T. H.** See Myddleton, W. W., and Barry, T. H.  
**Bartschat, F.** See König, J., and Bartschat, F.  
**Bartschat, Fr.** Failure of the toxicological tests for phosphorus, 293.  
**Bartschat, Fr.** See Dinslage, E., and Bartschat, Fr.  
**Batsford, H. E.** Analysis of mixed salts by the freezing point method, 109.  
**Baudisch, O.** Chemistry of the pyrimidines, 392.  
**Bauer, K. H.** Analytische Chemie der Alkaloide (Review), 110.

- Baughman, W. F.** See Jamieson, G. S., and Baughman, W. F.
- Baumann, E. J.** Estimation of organic phosphorus, 349.
- Baumann, E. J.** Preparation of yeast nucleic acid as a magnesium compound, 536.
- Bayle, E., and Fabre, R.** Application of fluorescence phenomena to the identification of various drugs, 454.
- Beccadelli, G.** Influence of blood on chemical reactions, 243.
- Becker, H. G., and Abbott, W. E.** Estimation of dissolved air in small quantities of water, 104.
- Bedel, C.** Toxicity of a polymer of hydrocyanic acid, 539.
- Bedel, C.** See Lebeau, P., and Bedel, C.
- Bedford, C. W., and Winkelmann, H. A.** A Systematic Survey of Rubber Chemistry (Review), 207.
- Behr, M.** See Brukl, A., and Behr, M.
- Bellis, B.** See Hess, A. F., Supplee, G. C., and Bellis, B.
- Benedetti-Pichler, A.** Micro-analytical technique, 547.
- Benedict, S. R., and Theis, R. C.** Modification of molybdc method for the estimation of inorganic phosphorus in serum, 537.
- Benedict, S. R.** See Theis, R. C., and Benedict, S. R.
- Bennett, C. T., and Garratt, D. C.** Detection of esters of fixed acids in essential oils. A new method of testing, 46.
- Bertolo, P.** Preparation of commercial glycyrrhizin, 40.
- Bethke, R. M., Steenbock, H., and Nelson, M. T.** Fat-soluble vitamins. XV., 97.
- Bezssonoff, —.** Colour reactions of antirachitic and antiscorbutic principles, 594.
- Bickel, A., and Collazo, J. A.** Composition of "Tasajo," 187.
- Bidart, G.** See Malvezin, P., and Bidart, G.
- Bidwell, G. L.** See Coe, M. R., and Bidwell, G. L.
- Bierry, H., and Moquet, L.** Estimation of ketonic compounds and of  $\beta$ -hydroxybutyric acid in diabetic urine, 244.
- Biggs, R. P.** A qualitative differentiation between cube gambier and Indian cutch (Notes), 379.
- Bigwood, E. J., and Ladd, W. S.** Qualitative tests for acetone bodies, 100.
- Billmann, E., and Rimbart, E.** Hypobromous acid and estimation of hypobromous and bromic acids, 50.
- Bishop, W. B. S.** Detection of halogens, 154.
- Black, A.** See Steenbock, H., Hart, E. B., Jones, J. H., and Black, A.
- Blackadder, T.** Colour measurement of tanning materials, 51.
- Blanchard, A. A., and Phelan, J. W.** Synthetic Inorganic Chemistry (Review), 204.
- Bleecker, W. L.** See Hale, H., and Bleecker, W. L.
- Bleesen, M.** Substitute for platinum in electrolysis, 154.
- Bleyberg, W.** See Holde, D., Selim, M., and Bleyberg, W.
- Bliss, E. A.** See Meader, P. D., and Bliss, E. A.
- Bock, J. C.** Preservation of blood by means of formaldehyde, 238.
- Bodländer, E.** See Auerbach, F., and Bodländer, E.
- Boer, J. H. De.** Colour reaction for the detection of zirconium and fluorine, 497.
- Bogin, C. D.** Analysis of binary mixtures. Volumetric turbidity method, 299.
- Bogod, M.** See Lampitt, L. H., Hughes, E. B., and Bogod, M.
- Bolton, E. R., and Pelly, R. G.** Oils, Fats, Waxes, and Resins (Review), 303.
- Bolton, E. R.** See Williams, K. A., and Bolton, E. R.
- Bömer, A., and Mattis, H.** The solanine content of potatoes, 284.
- Bömer, A., and Schneider, K.** Glycerides of palm-kernel oil, 283.
- Bongard, G. R.** See Ardagh, E. G. R., and Bongard, G. R.
- Boone, P. D.** Constituents of pecan oil, 142.
- Bordas, J.** Cause of error in the Jodlbauer Process for the estimation of total nitrogen, 103.
- Bosselmann, H.** The fining of wine with potassium ferrocyanide, 342.
- Bosshard, E.** Apparatus for the analysis of oleum and other fuming liquids, 301.
- Bosshard, E., and Furrer, E.** Analysis of sodium peroxide, 353.
- Bouma, J. A. L.** Estimation of eugenol in clove oil, 345.
- Boureeet, P.** Detection of glycerides in beeswax, 284.
- Bradford, S. C.** A simple non-splash ring for use with Scheibler's desiccator, 497.
- Brandt, L.** Volumetric assay of iron ores by means of titanous chloride, 352.
- Breisch, K.** Separation of zinc by electrolytic deposition from alkaline solutions, 403.
- Breisch, K.** See Chalupny, K., and Breisch, K.
- Bridel, M.** A case of poisoning by sodium arsenate, 101.
- Bridel, M.** True nature of the methyl salicylate glucoside in the bark of the sweet birch, 285.
- Bridel, M., and Charpentier, I.** Biochemical detection of galactose in mixtures of galactose and arabinose, 445.
- Britton, H. T. S.** Electrometric titration of chromic acid, 496.
- Britton, H. T. S.** Notes on the estimation of chromium, 130.
- Brooke, W. L.** Limits for the detection of traces of alkali or soap in refined coconut oil, 592.
- Brooks, B. T.** The sodium plumbite test of gasoline, 397.
- Brooks, R.** Device for maintaining a constant level in a waterbath, 548.
- Brukl, A., and Behr, M.** Iodimetric estimation of phosphorous and hypophosphorous acids, 406.
- Buchanan, R.** Estimation of egg solids in alimentary pastes (Noodles), 436.

- Buffat, C.** See Piccard, J., and Buffat, C.  
**Bull, C. G., and King, W. V.** Identification of blood meal of mosquitoes, 99.  
**Bullock, K.** Assay of valerian root and certain other aromatic drugs, 443.  
**Bunker, H. J.** See Thaysen, A. C., and Bunker, H. J.  
**Burrows, G. H.** See Wallis, E. S., and Burrows, G. H.  
**Buswell, A. M., and Gallagher, W. U.** Estimation of dissolved oxygen in the presence of iron salts, 45.  
**Buttenberg, P., and Weiss, H.** The hydrocyanic acid fumigation of ships and its effect on food materials, 533.

## C

- Calcott, W. S., English, F. L., and Downing, F. B.** Analysis of naphthalenesulphonic acids and naphthalene, 150.  
**Callan, T.** Use of the lead cathode in the electrolytic method for the estimation of minute quantities of arsenic, 402.  
**Camargo, T. De A.** Vermine in green leaves and berries of the coffee plant, 189.  
**Campbell, F. H.** Rate of disappearance of sulphites in raw meat, 532.  
**Carr, R. H.** See Graham, V., and Carr, R. H.  
**Carriere, E., and Leenhardt, C.** Method of analysis of volatile organic substances by combustion in an open tube, 601.  
**Caseneuve, M.** Application of a new reaction of resorcinol to the detection of nitro-prussides and ammonia, 195.  
**Cattelain, E.** Analysis of gelatin ash, 344.  
**Cattelain, E.** Analysis of pharmaceutical and bacteriological gelatins, 391.  
**Chace, E. M., and Denny, F. E.** Use of ethylene in the colouring of Citrus fruits, 284.  
**Chalupny, K., and Breisch, K.** Separation of cadmium from zinc, 401.  
**Channon, H. J., Drummond, J. C., and Golding, J.** The effect of giving certain oils in the daily diet of cows on the composition of butter fat, 311.  
**Chaplin, W. H.** Second Year College Chemistry (Review), 53.  
**Charpentier, I.** See Bridel, M., and Charpentier, I.  
**Chlopine, V.** Separation of radium and barium, 49.  
**Christiansen, I. A., Hevesy, G., and Lomholt, S.** Distribution of lead in the living organism, 490.  
**Clark, E. D.** See Shostrum, O. E., Clough, R. W., and Clark, E. D.  
**Clark, R. H., and Gillie, K. B.** Cascara content of the wood and bark of *Rhamnus Purshiana*, 441.  
**Clark, W. M.** The Determination of Hydrogen Ions (Review), 157.  
**Clarke, H. T.** Organic Syntheses. Vol. III. (Review), 206.  
**Clemencet, N. B.** Bellier's reaction applied to the detection of adulteration of cacao butter, 343.

- Clemens, C. A.** Lead number of vanilla extracts, 534.  
**Clifford, T. H., Higginbotham, L., and Fargher, R. J.** Estimation of fat, wax and resin in cotton, 350.  
**Clough, R. W.** See Shostrum, O. E., Clough, R. W., and Clark, E. D.  
**Clover, A. M.** Autoxidation of chloroform, 95.  
**Clowes, F., and Coleman, J. B.** Quantitative Chemical Analysis (Review), 258.  
**Coe, M. R., and Bidwell, G. L.** Estimation of starch and sugars by the use of picric acid, 234.  
**Coleman, J. B.** See Clowes, F., and Coleman, J. B.  
**Collazo, J. A.** See Bickel, A., and Collazo, J. A.  
**Collenberg, O., and Bakke, G.** Volumetric estimation of antimony by means of permanganate, 152.  
**Collins, W. D., and Foster, M. D.** Estimation of manganese in water by the sodium bis-muthate method, 395.  
**Coltman, R. W.** Estimation of manganese. Manganous oxalate as a standard, 404.  
**Connell, S. J. B., and Zilva, S. S.** Differential dialysis of the antiscorbutic factor, II., 595.  
**Considine, F. J.** Simple, useful forms of hydrogen electrode, 332.  
**Cottrell, A.** The Manufacture of Nitric Acid and Nitrates (Review), 55.  
**Cox, H. E.** Lead in cream of tartar (Legal Notes), 136.  
**Cruz, C. C.** See West, A. P., and Cruz, C. C.  
**Cumming, W. M.** Estimation of ferrocyanides, 151.  
**Cuny, L., and Poirot, G.** Colorimetric estimation of small quantities of bismuth, 48.  
**Currie, A. N.** Separation of a fat pigment from fat, 290.  
**Cuttica, V.** See Rolla, L., Cuttica, V., and Fernandes, L.

## D

- Dalton, W. G.** See Sage, C. E., and Dalton, W. G.  
**Damiens, A.** Les Isotopes (Review), 407.  
**Damiens, A.** New reagent for carbon monoxide, 298.  
**Damon, S. R.** Relation of bacteria to growth-promoting substances, 446.  
**Damoy, G.** See Gascard, A., and Damoy, G.  
**Dauvillier, A.** Differentiation of natural and culture pearls, 607.  
**Davidson, A. W., and Van Klooster, H. S.** Laboratory Manual of Physical Chemistry (Review), 53.  
**Davies, H., and Davies, W.** New reagent for potassium, 154.  
**Davies, W.** See Davies, H., and Davies, W.  
**Davison, F. R.** See Willaman, J. J., and Davison, F. R.  
**De Boer, J. H.** Colour reaction for the detection of zirconium and fluorine, 497.  
**De Fazi, R.** New reaction of aldehydes, 601.

- De Lacy, S. A.** Apparatus for extraction and solvent recovery, 220.
- De Leon, A. I.** See West, A. P. and De Leon, A. I.
- De Montmollin, F.** See Picard, J., and De Montmollin, F.
- Deas, J.** Yeast growth-promoting vitamin tested for its effects on animals, 596.
- Debucquet, L.** Reaction of antipyrine with trichloroacetic acid, 487.
- Deighton, T.** Effect of movement of soil salts on the standardisation values of electrodes used in moisture estimations, 103.
- Delage, J. C.** Mustard flour and oil in the wine industry, 94.
- Delépine, M.** New form of fenchone oxime. Characterisation of fenchone in presence of camphor, 397.
- Delf, E. M.** Antiscorbutic value of fresh and canned English tomatoes, 594.
- Delf, E. M.** Vitamin *A* content of S. African oils, 291.
- Deming, H. G.** General Chemistry (Review), 301.
- Denigès, G.** Microchemical identification of cantharidin, 40.
- Denigès, G.** Microcrystalline reaction for identifying traces of cantharidin, 238.
- Denny, F. E.** See Chace, E. M., and Denny, F. E.
- Denny, F. E.** Hastening the coloration of lemons, 439.
- Dezani, S.** New reaction for myrrh, 441.
- D'Huart, G.** See Hackspill, L., and D'Huart, G.
- Dill, D. B.** Significance of urea in shark meal, 540.
- Dinslage, E., and Bartschat, Fr.** Poisoning by barium sulphate administered for X-Ray examination, 293.
- Dodd, A. H.** Analysis of lysol, 286.
- Doht, R.** Precipitation of platinum and copper as sulphides, 40-2.
- Domogalla, B. P.** See Peterson, W. H., Fred, E. B., and Domogalla, B. P.
- Donald, M. B.** The estimation of ammonia by means of sodium hypobromite, 375.
- Donovan, W.** The estimation of nitrogen in coal, 57.
- Dott, D. B.** Note on podophyllin, 144.
- Downing, F. B.** See Calcott, W. S., English, F. L., and Downing, F. B.
- Dox, A. W., and Houston, B.** Alkyl-chloro-malonamides. The influence of homology on taste, 345.
- Draves, C. Z.** See Tartar, H. V., and Draves, C. Z.
- Drawe, —.** The thiosulphate precipitation of copper, 495.
- Druce, J. G. F.** Volumetric estimation of tin, 402.
- Drummond, J. C.** See Channon, H. J., Drummond, J. C., and Golding, J.
- Dubois, R.** See Fosse, R., Hagene, P., and Dubois, R.
- Dudley, H. W.** Insulin from the cod fish. Direct application of picric acid to the islet tissue, 597.
- Dunnicliff, H. B.** The estimation of carbonates in highly coloured liquids (Notes), 426.
- Durand, J. F.** Volumetric estimation of carbon, 295.
- During, A.** Polarimetric estimation of starch in potted meats, 389.
- Dutcher, R. A.** See Thomas, W., and Dutcher, R. A.

## E

- Eck, P. N. Van.** Benzidine as a reagent for aldehydes, 105.
- Eddy, W. H., and Kohman, E. F.** Vitamin *C* in canned foods, 146.
- Eden, T.** Colorimetric estimation of humic matter in mineral soils, 491.
- Edgeworth, H.** See Sherman, H. C., and Edgeworth, H.
- Effront, J.** Toxicity of salts of copper, 447.
- Eibner, A., and Schmidinger, K.** Composition of linseed oil, 245.
- Elsdon, G. D.** Alcoholysis and the composition of oils and fats, 423.
- Elsdon, G. D.** Arsenic in printing ink (Notes), 336.
- Elsdon, G. D.** County Borough of Salford. Annual Report of the Borough Analyst for 1922, 33.
- Elsdon, G. D.** County Borough of Salford. Annual Report of the Borough Analyst for 1923, 518.
- Elsdon, G. D.** The composition of beef and malt wine, 210.
- Elsdon, G. D.** The composition of coconut oil (Notes), 274.
- Elsdon, G. D.** What is Bondon cheese? 267.
- Elsdon, G. D., and Smith, P.** The Reichert-Meissl value of almond oil and apricot kernel oil (Notes), 180.
- English, F. L.** See Calcott, W. S., English, F. L., and Downing, F. B.
- Errara, J.** Colloidal poles for observing the emission spectra of solutions, 606.
- Escher-Desrivières, J.** Mechanical separation of polonium in sodium hydroxide solution by various substances, 405.
- Essery, R. E.** Public Health (Condensed Milk) Regulations, 1923. Tables for testing "equivalent pints" Declaration (Notes), 178.
- Estève, —.** Case of acetanilide poisoning, 538.
- Etheridge, A. F.** The volumetric estimation of vanadium in steel (Notes), 83.
- Etheridge, A. T.** The estimation of cadmium in brass, 572.
- Etheridge, A. T.** The estimation of copper and tin in copper-tin alloys, 371.
- Eynon, L., and Lane, J. H.** Clarification of solutions in the analysis of sugar products, 90.
- Eynon, L.** See Lane, J. H., and Eynon, L.

## F

- Fabre, R.** Fate of morphine in the organism, 539.
- Fabre, R.** See Bayle, E., and Fabre, R.

- Fabris, G.** Olii e Grassi. Vegetali, Animalii e Minerali (Review), 499.
- Fachini, —, and Somazzi, —.** Estimation of crude glycerol in crude glycerins, 245.
- Fairhall, L. T.** Rapid method of testing urine for lead, 490.
- Fairhall, L. T.** Solubility of various lead compounds in blood serum, 490.
- Falk, K. G., Noyes, H. M., and Sugiura, K.** Enzyme actions of beef tissues, 238.
- Fargher, R. J.** See Clifford, T. H., Higginbotham, L., and Fargher, R. J.
- Favre, L.** See Thuan, U. J., and Favre, L.
- Fazi, R. De.** New reaction of aldehydes, 601.
- Feigl, F.** Detection and estimation of antimony by means of pyrogallol, 402.
- Feigl, F., and Schummer, O.** Antimony chloride in volumetric analysis, 494.
- Feigl, F., and Weiner, F.** Oxidation of arsenious acid in alkaline solution by permanganate, 495.
- Fenger, F., and Wilson, R. S.** Amount of available insulin in the pancreas of domestic animals, 240.
- Fernandes, L.** Use of molybdenum as indicator in the volumetric estimation of zinc, 496.
- Fernandes, L.** See Rolla, L., Cuttica, V., and Fernandes, L.
- Findlay, G. M.** Destruction of Vitamin B by age, 190.
- Fischler, M.** See Mach, F., and Fischler, M.
- Flanders, F. F., and Truitt, A. D.** Analysis of soap powder, 105.
- Fleck, L. C.** See Hawley, L. F., Fleck, L. C., and Richards, C. A.
- Fleck, L. C.** See also Ritter, G. J., and Fleck, L. C.
- Fleming, R.** Sensitive reactions for copper (Notes), 275.
- Fleury, P.** Method of measuring the activity of laccase, 241.
- Fleury, P.** Use of guaiacol for measuring the activity of oxidase preparations, 347.
- Florentin, D.** Sulpho-chromic oxidation of organic substances and coals in presence of catalysts, 244.
- Fontès, G.** See Nieloux, M., and Fontès, G.
- Fosse, —, and Hieulle, A.** Colour reaction common to formaldehyde and glyoxylic acid, 601.
- Fosse, R., Hagene, P., and Dubois, R.** Gravimetric estimation of cyanamide in the form of xanthyl-urea, 492.
- Fosse, R., Hagene, P., and Dubois, R.** New method for the estimation of cyanamide in its calcium compound, 491.
- Foster, M. D.** See Collins, W. D., and Foster, M. D.
- Fred, E. B.** See Peterson, W. H., Fred, E. B., and Domogalla, B. P.
- Fred, E. B.** See also Peterson, W. H., Fred, E. B., and Schmidt, E. G.
- Frederick, R. C.** Device for stopping a leak in a water jacket (Notes), 135.
- Frederick, R. C.** Effect of storage on artificially polluted waters, 63.
- Frederick, R. C.** New flask for use with Soxhlet's apparatus (Notes), 474.
- Frèrejacque, M.** See Simon, L. J., and Frèrejacque, M.
- Frey, F.** Detection of phosphoric acid, 353.
- Fricke, K.** Determination of the rate of solidification of paraffin wax, 546.
- Fuller, H. C.** Ethylene glycol. Its properties and uses, 391.
- Furrer, E.** See Bosshard, E., and Furrer, E.
- Fylemann, E.** Estimation of acetic and butyric acids, 396.

## G

- Gallager, W. U.** See Buswell, A. M., and Gallager, W. U.
- Gardner, R.** Essential oil of Manuka (*Leptospermum scoparium*), 195.
- Gardner, W.** Chemical Synonyms and Trade Names (Review), 208.
- Garola, J.** Estimation of phosphorus in organic substances, 46.
- Garratt, D. C.** See Bennett, C. T., and Garratt, D. C.
- Gascard, A., and Damoy, G.** Acids and hydrocarbons of beeswax, 143.
- Gascard, A., and Damoy, G.** Acids of beeswax, 143.
- Gaubert, P.** Identification of minerals by microscopic examination of their traces left on a hard body, 108.
- Gault, H., and Mukerji, B. C.** Estimation of copper in cellulose substances by the molybdomanganic method of Fontès-Thivolle, 196.
- Gawalowski, A.** Examination of commercial pinene, 602.
- Geberth, R.** New method of gas analysis, 109.
- Gersdorff, C. E. F.** See Jones, D. B., and Gersdorff, C. E. F.
- Ghigliotto, C.** Total reduction of nitrates and chlorates during putrefaction of viscera, 395.
- Ghigliotto, C.** Solubility of mercuric sulphide in ammonia and its influence on the detection of arsenic in the presence of mercury, 43.
- Ghigliotto, C.** Toxicological detection of minute quantities of nitric acid, 44.
- Gibbs, W. E.** Clouds and Smokes (Review), 410.
- Gillie, K. B.** See Clark, R. H., and Gillie, K. B.
- Gilmour, G. van B.** Invert sugar as a reagent for boric acid estimations (Notes), 576.
- Giuffrè, U.** Detection of extract of *Atractylis gummifera* in liquorice extract, 534.
- Glaire, A.** Estimation of sulphonic and sulphonitric acids, 199.
- Glaser, R. W.** Survival of bacteria in flies, 100.
- Glott, G.** See Raymond, E., and Glott, G.
- Gobert, L.** Preserved spinach, 342.
- Goby, J.** See Langlais, P., and Goby, J.
- Godden, W.** See Richards, M. B., and Godden, W.
- Golding, J.** Report on the World's Dairy Congress, 259.
- Golding, J.** See Channon, H. J., Drummond, J. C., and Golding, J.

- Goldstück, M.** 2-4-dinitrosoresorcinol as a sensitive reagent for ferrous salts, 544.
- Gonzaga, L.** See West, A. P., and Gonzaga, L.
- Gore, H. C.** Polarimetric method for the estimation of diastatic power, 444.
- Gortner, R. A.** See Pervier, N. C., and Gortner R. A.

## INDEX TO SUBJECTS.

## A

- Absorption Pipette:** Gas analysis; — for. S. W. Saunders, 201.
- Abstracts of Papers published in other Journals:** 1924: 37, 90, 139, 187, 233, 282, 341, 388, 436, 485, 531, 591.
- Acetaldehyde:** Fruits; Microchemical detection of — in. C. Griebel, 486.
- Acetanilide Poisoning:** —; Case of. Estève, 538.
- Acetic Acid:** Saccharin and dulcin in vinegar and products containing —; Detection of. G. Reif, 92.
- Acetic and Butyric Acids:** —; Estimation of. E. Fyemann, 396.
- Acetone Bodies:** Qualitative tests for —. E. J. Bigwood and W. S. Ladd, 100.
- Acetone Method:** Milk-whey; Proteins of. Their separation by the —. M. Piettre, 139.
- Acetyl Value:** Fats; — of. E. Raymond and G. Glot, 448.
- Acetylene:** Phosphine in —; The estimation of (Notes). T. E. Perks, 32.
- Acid-soluble Phosphoric Acid:** Eggs; — in. L. Pine, 531.
- Acids:** Beeswax; — of. A. Gascard and G. Damoy, 143.
- Act:** Fertilisers and Feeding Stuffs —, 1906; Report of the Departmental Committee on the. 383.
- Act:** Rag Flock —; Appeal case under the (Legal Notes), 430.
- Active Constituent:** Dalmatian insect powder; Isolation and constitution of the — of. H. Staudinger and L. Ruzicka, 288.
- Acts:** Ministry of Health. Sale of Food and Drugs —. Public Health (Milk and Cream) Regulations, 1912 and 1917. Circular 462, 89.
- Address:** Retiring President; Annual — of the, 115.
- Adulteration:** Milk; Hæmolysis, as a means of detecting the — of. M. J. N. Schuurmsa, 487.
- African Oils:** South —; Vitamin A content of. E. M. Delf, 291.
- Age:** Vitamin B by —; Destruction of. G. M. Findlay, 190.
- Agricultural Analysis: Abstracts:** 1924: 45, 102, 192, 491, 540, 600.
- Agricultural Analyst:** County of Kent. Report of the — for the Fourth Quarter, 1923. F. W. F. Arnaud, 182.
- Agricultural Experiment Station:** Connecticut —. Twenty-seventh Report on Food Products (1922), 278.
- Agriculture and Fisheries:** Ministry of —. Investigations into the Causes of the Unusual Mortality in English Oyster Beds in 1920 and 1921, 484.
- Agriculture:** Department of —; United States. Food Inspection Decisions 193, 194, 195, 590.
- Air Ministry:** Meteorological Office. —. Advisory Committee on Atmospheric Pollution. Report on Observations in the Year ending March 31st, 1922, 34.
- Air Ministry:** Meteorological Office. —. Advisory Committee on Atmospheric Pollution. Report on Observations in the Year ending March 31st, 1923, 240.
- Air:** Spirits kept exposed to the —; The rate of loss of strength of (Notes). H. Lowe, 135.
- Air:** Water; Estimation of dissolved — in small quantities of. H. G. Becker and W. E. Abbott, 104.
- Alcohol:** Bread; Estimation of — in. T. Sundberg, 140.
- Alcohol:** Ether, — and water; Estimation of water in mixtures of. R. K. Newman, 541.
- Alcohol:** Glycerin; Dehydration of — by means of. E. Knecht and E. F. Muller, 395.
- Alcohols:** Beeswax; — and hydrocarbons of. A. Gascard and G. Damoy, 143.
- Alcoholysis:** Oils and fats; — and the composition of. G. D. Elsdon, 423.
- Aldehyde-bisulphite Reaction:** Volumetric analysis; Application of the — in. A. Kurlenacker, 405.
- Aldehydes:** Ether for anæsthesia; Detection of — in. E. Isnard, 441.
- Aldehydes:** Reaction of —; New. R. de Fazi, 601.
- Aldehydes:** Reagent for —; Benzidine as a. P. N. Van Eck, 105.
- Aleurites Montana:** Tung Oil. Oil from the seeds of —. R. N. Parker, M. G. Rau, W. A. Robertson, and J. L. Simonsen, 399.
- Alimentary Pastes:** Egg solids in — (Noodles); Estimation of. R. Buchanan, 436.
- Alimentary Pastes:** Lipoids and lipid-phosphoric acid in flours, —, and eggs; Estimation of. R. Hertwig, 37.
- Alkali:** Sulphur with — and alkaline-earth hydroxides; Reaction of. H. V. Tartar and C. Z. Draves, 250.
- Alkali Metals:** Aluminium and its alloys; Estimation of — in. Schürmann and Schob, 197.

- Alkali:** Refined coconut oil; Limits for the detection of traces of — or soap in. W. L. Brooke, 592.
- Alkaline Compounds:** Insulin; Action of — on. E. J. Witzemann and L. Livshis, 146.
- Alkaline-earth Hydroxides:** Sulphur with alkali and —; Reaction of. H. V. Tartar and C. Z. Draves, 250.
- Alkaline Solution:** Arsenious acid in — by permanganate; Oxidation of. F. Feigl and F. Weiner, 495.
- Alkaline Solutions:** Zinc by electrolytic deposition from —; Separation of. K. Breisch, 403.
- Alkyl-chloro-malonamides:** —. The influence of homology on taste. A. W. Dox and B. Houston, 345.
- Alloys:** Aluminium and its —; Estimation of alkali metals in. Schürmann and Schob, 197.
- Alloys:** Copper and tin in copper-tin —; The estimation of. A. T. Etheridge, 371.
- Alloys:** Silicon in iron-silicon — by their physical properties; Estimation of. T. D. Yensen, 300.
- Allyl-isothiocyanate:** Estimating —; New method of. Morvillez and Meesemaeker, 593.
- Almond oil:** Apricot kernel oil; The Reichert-Meissl value of — and (Notes). G. D. Elsdon and P. Smith, 180.
- Aluminium:** Alkali metals in — and its alloys; Estimation of. Schürmann and Schob, 197.
- Aluminium Cooking Utensils:** Corrosion of —; The. C. K. Tinkler and H. Masters, 30.
- Aluminium:** Filtered waters; Soluble — and the hæmotoxylin test in. W. D. Hatfield, 243.
- Aluminium:** Zinc from iron and —; Separation of. E. G. R. Ardagh and G. R. Bongard, 249.
- Amines:** —; Identification of. G. S. Marvel and F. E. Smith, 50.
- Ammonia:** Arsenic in the presence of mercury; Solubility of mercuric sulphide in — and its influence on the detection of. C. Ghigliotto, 43.
- Ammonia:** Nessler-Folin reagent for —; Direct Nesslerisation micro-Kjeldahl method and a modification of the. F. C. Koch and T. L. McMeekin, 604.
- Ammonia:** Nitroprussides and —; Application of a new reaction of resorcinol to the detection of. M. Caseneuve, 195.
- Ammonia:** Sodium hypobromite; The estimation of — by means of. M. B. Donald, 375.
- Ammonia:** Urine; Application of Permutit to the separation and estimation of — in. A. Kolb, 488.
- Ammonium Phosphomolybdate:** Molybdenum; Estimation of small amounts of. Application to — for the indirect titration of phosphorus. A. Vila, 153.
- Ammonium Salts:** —; Volumetric estimation of. S. Lövgren, 605.
- Ammonium Salts:** Volumetric method for estimating —; New. M. V. Auger, 250.
- Amygdalin:** Hydrogen cyanide content of —; Estimation of the. J. H. Roe, 190.
- Anaerobes:** Water samples; — from. P. D. Meader and E. A. Bliss, 100.
- Anaesthesia:** Ethers for —; Detection of aldehydes in. E. Isnard, 441.
- Analytical Filtrations:** Paper pulp in —; Use of. E. Wilke-Dörfurt and E. Locher, 546.
- Analytical Reagent:** Definite oxidation potential; Benzidine as an — and an indicator for a. I. M.-Kolthoff, 493.
- Anhydrous Quassine:** —; Commercial. Rengniez, 487.
- Anhydrous Soap:** Lubricating grease; Estimation of — in. B. Joachim, 449.
- Animal Fats:** Uncommon — (Notes). W. N. Rac, 83.
- Animal Oils:** Marine —. Identity of phoenic acid with valeric acid. E. André, 533.
- Animals:** Pancreas of domestic —; Amount of available insulin in the. F. Fenger and R. S. Wilson, 240.
- Animals:** Yeast growth-promoting vitamin tested for its effects on —. J. Deas, 596.
- Anthocyanins:** Grape pigments; Chemistry of. — in Clinton grapes. R. J. Anderson and F. P. Nabenhauer, 533.
- Anthocyanins:** Grapes; — in. R. J. Anderson, 39.
- Anti-Ferments:** Organic dyes as —; Efficiency of some. E. H. Harvey, 488.
- Antimony and Tin Oxides:** —; Solution of. E. Stelling, 298.
- Antimony Chloride:** Volumetric analysis; — in. F. Feigl and O. Schummer, 494.
- Antimony:** Copper, — and bismuth from lead; Electrolytic separation of. A. Lassieur, 603.
- Antimony:** Lead in the presence of tin and —; Estimation of. E. Stelling, 453.
- Antimony:** Permanganate; Volumetric estimation of — by means of. O. Collenberg and G. Bakke, 152.
- Antimony:** Pyrogallol; Detection and estimation of — by means of. F. Feigl, 402.
- Antimony Tetroxide:** The gravimetric ratio—antimony; —. J. Knop, 49.
- Antimony:** The gravimetric ratio—, —: — tetroxide. J. Knop, 49.
- Antipyrine:** Trichloroacetic acid; Reaction of — with. L. Debucquet, 487.
- Antirachitic and Antiscorbutic Principles.** Colour reactions of —. Bezssonoff, 594.
- Anti-rachitic Factor:** Vitamin A from the —; Differentiation of. E. Lesné and M. Vagliano, 99.
- Antiscorbutic Factor:** Dialysis of the —; Differential. II. S. J. B. Connell and S. S. Zilva, 595.
- Antiscorbutic Fraction:** Lemon juice; The — of. S. S. Zilva, 290.
- Antiscorbutic Fraction:** Lemon juice; — of. II. S. S. Zilva, 594.
- Antiscorbutic Principles:** Antirachitic and —; Colour reactions of. Bezssonoff, 594.
- Antiscorbutic Value:** Fresh and canned English tomatoes; — of. E. M. Delf, 594.
- Anti-Scorbutic Vitamin:** Copper in the destruction of —; Catalytic action of. A. F. Hess and M. Weinstock, 535.

- Apparatus, Abstracts:** 1924: 154.
- Apparatus:** Extraction and solvent recovery; — for. S. A. de Lacy, 220.
- Apparatus:** Fractional distillation under reduced pressure; — for. E. André, 407.
- Apparatus:** Gases; — for drying. V. T. Jackson, 200.
- Approximate Index of Refraction:** Liquids with a common microscope; Simple method for determining the — of. C. C. Kiplinger, 354.
- Apricot Kernel Oil:** Almond oil and —; The Reichert-Meissl value of (Notes). G. D. Elsdon and P. Smith, 180.
- Aqueous Extract:** Wheat and rye flours by means of their —; Identification of. R. Strohecker, 282.
- Aqueous Extracts:** Pancreas; — of. II. New facts. H. A. Piper, R. S. Allen and J. R. Murlin, 96.
- Aqueous Extracts:** Pancreas; — of. III. Precipitation reactions. C. P. Kimball and J. R. Murlin, 96.
- Arabinose:** Galactose in mixtures of galactose and —; Biochemical detection of. M. Bridel and I. Charpentier, 445.
- Aromatic Drugs:** Valerian root and certain other —; Assay of. K. Bullock, 443.
- Arsenic:** Arsenobenzenes; Composition and toxicity of the. Estimation of — in these products. M. de Myttenaere, 43.
- Arsenic:** Beverages; Solubility of — in. S. Goy and E. Wende, 394.
- Arsenic:** Borax; — in (Legal Notes). 520.
- Arsenic:** Lead cathode in the electrolytic method for the estimation of minute quantities of —; Use of the. T. Callan, 402.
- Arsenic:** Mercuric sulphide in ammonia; Solubility of, and its influence on the detection of — in the presence of mercury. C. Ghigliotto, 43.
- Arsenic:** Mercury from —; Separation of. P. Wenger and M. Schilt, 603.
- Arsenic:** Printing ink; — in (Notes). G. D. Elsdon, 336.
- Arsenical Poisoning:** Swedish Commission of —; The. Petré, 102.
- Arsenious Acid:** Permanganate; Oxidation of — in alkaline solution by. F. Feigl and F. Weiner, 495.
- Arsenobenzenes:** —; Composition and toxicity of the. Estimation of arsenic in these products. M. de Myttenaere, 43.
- Artemisia:** Santonin; Indian —, as a source of, 39.
- Artichoke:** Jerusalem —; Analysis of the. A. T. Shohi, 37.
- Artificial Honey:** Honey and —; New method of distinguishing between. F. Auerbach and E. Bodländer, 389.
- Ash:** Coal —; Melting point of. F. S. Sinnatt and N. Simpkin, 406.
- Ash:** Gelatin —; Analysis of. E. Cattelain, 344.
- Asphaltic Hydrocarbons:** Petroleum; Lubricant and — in. C. F. Mabery, 106.
- Atmospheric Pollution:** Meteorological Office. Air Ministry. Advisory Committee on —. Report on Observations in the Year ending March 31st, 1922. 34.
- Atmospheric Pollution:** Meteorological Office. Air Ministry. Advisory Committee on —. Report on Observations in the Year ending March 31st, 1923, 340.
- Attractylis Gummifera:** Liquorice extract; Detection of extract of — in. U. Giuffrè, 534.
- Autoxidation:** Chloroform; — of. A. M. Clover, 95.

## B

- Bacillus Coli Communis:** Oxygen supply on the metabolism of —; Effect of. M. Stephenson and M. D. Whetham, 598.
- Bacillus Granulobacter Pectinovorum:** Hydrogen ion concentration; Proteolytic action of — and its effect on the. W. H. Peterson, E. B. Fred and B. P. Domogalla, 599.
- Bacillus Granulobacter Pectinovorum:** Pentoses by —; Fermentation of. W. H. Peterson, E. B. Fred and E. G. Schmidt, 489.
- Bacillus:** Koch's — in ordinary media; Detection of. G. Pégurier, 489.
- Bacteria:** Flies; Survival of — in. R. W. Glaser, 100.
- Bacteria:** Growth-promoting substances; Relation of — to. S. R. Damon, 446.
- Bacteria:** Intestinal pathogenic — in fruits and Philippine foods eaten raw; Viability of. A. Vasquez-Colet, 241.
- Bacteria:** Soil; Determination of the number of — in. C. L. Whittles, 489.
- Bacterial Decay:** Textile Fibres; — of. A. C. Thaysen and H. J. Bunker, 292.
- Bactericidal Power:** Lactic acid organisms in sterilised milk; Influence of the — of raw milk on. P. Mazé, 348.
- Bacteriological Examination:** Ground beef; — of, I. and II. R. E. Hofstadt, 147.
- Bacteriological Gelatins:** Pharmaceutical and —; Analysis of. E. Cattelain, 391.
- Bangkok:** The Government Laboratory, —, Siam. First Report from November, 1917, to March 31, 1922, 88.
- Barfoed's Solution:** Maltose in presence of other reducing sugars by means of —; Estimation of. P. Nottin, 485.
- Barium:** Radium and —; Separation of. V. Chlopine, 49.
- Barium Sulphate:** X-Ray examination; Poisoning by — administered for. E. Dinslage and Fr. Bartschat, 293.
- Bark:** Methyl salicylate glucoside in the — of the sweet birch; True nature of the. M. Bridel, 285.
- Bark:** *Rhamnus Purshiana*; Cascara content of the wood and — of. R. H. Clark and K. B. Gillie, 441.
- Baudouin's Test:** Sesame oil; — for. C. O. Gravenhorst, 142.
- Beef and Malt Wine:** —; The composition of. G. D. Elsdon, 210.

- Beef:** Ground —; Bacteriological examination of, I. and II. R. E. Hoffstadt, 147.
- Beef:** Ministry of Health. Interim Report of the Food Preservatives Committee on the Treatment of Chilled — and Other Foods with Formaldehyde. 433.
- Beef Tissues:** Enzyme actions of —. K. G. Falk, H. M. Noyes and K. Sugiura, 238.
- Beeswax:** Acids of —. A. Gascard and G. Damoy, 143.
- Beeswax:** Alcohols and hydrocarbons of —. A. Gascard and G. Damoy, 143.
- Beeswax:** Glycerides in —; Detection of. P. Bourcet, 284.
- Bellier's Reaction:** Cacao butter; — applied to the detection of adulteration of. N. B. Clemencet, 343.
- Benzene:** Petroleum spirit and oil of turpentine; Estimation of — in. J. Pritzker and R. Jungkunz, 450.
- Benzidine:** Aldehydes; — as a reagent for. P. N. Van Eck, 105.
- Benzidine:** Oxidation potential; — as an analytical reagent and an indicator for a definite. I. M. Kolthoff, 493.
- Berries:** Coffee plant; Vernine in green leaves and — of the. T. de A. Camargo, 189.
- Beverages:** Arsenic in —; Solubility of. S. Goy and E. Wende, 394.
- Beverages:** Iodine in food, — and excreta; Estimation of. J. F. McClendon, 444.
- Beverages:** Zinc; Contamination of — and other food with. J. W. Sale and C. H. Badger, 192.
- Bile Acids:** Urine; — in. C. L. A. Schmidt and J. A. Merrill, 148.
- Binary Mixtures:** —; Analysis of. Volumetric turbidity method. C. D. Bogin, 299.
- Biochemical, Bacteriological, etc.: Abstracts:** 1924: 41, 95, 145, 190, 238, 289, 345, 392, 443, 487, 535, 593.
- Biochemical Detection:** Galactose in mixtures of galactose and arabinose; — of. M. Bridel and I. Charpentier, 445.
- Birch:** Bark of the sweet —; True nature of the methyl salicylate glucoside in the. M. Bridel, 285.
- Birmingham:** City of —. Annual Report of the City Analyst for 1923. J. F. Liversedge, 475.
- Birmingham:** City of —. Report of the City Analyst for the Third Quarter, 1923. J. F. Liversedge, 85.
- Birmingham:** City of —. Report of the City Analyst for the Fourth Quarter, 1923. J. F. Liversedge, 181.
- Birmingham:** City of —. Report of the City Analyst for the First Quarter, 1924. J. F. Liversedge, 380.
- Birmingham:** City of —. Report of the Public Analyst for the Second Quarter, 1924. J. F. Liversedge, 580.
- Bismuth:** Copper, antimony and — from lead; Electrolytic separation of. A. Lassieur, 603.
- Bismuth:** Heavy metals in the organism (mercury, — and lead); Circulation of some. S. Lomholt, 599.
- Bismuth:** Hydrolysis; Separation and estimation of — by. G. Luff, 249.
- Bismuth:** Phosphate; Separation of — as. G. Luff, 197.
- Bismuth:** Silver, copper, and — by graduated potentials; Rapid electro-analytical separation of. A. Lassieur, 297.
- Bismuth:** Small quantities of —; Colorimetric estimation of. L. Cuny and G. Poirot, 48.
- Bismuthate Method:** Manganese; Interference, of cobalt in the — for. G. E. F. Lundell, 152.
- Bleaching Damage:** Indicator of —; Methylene blue as an. E. Ristenpart, 603.
- Bleaching:** Pickled herrings with hydrogen peroxide; The — of. O. Luning, 532.
- Blood:** Analysis; Preservation of — for. F. V. Sander, 99.
- Blood:** Chemical reactions; Influence of — on. G. Beccadelli, 243.
- Blood:** Cholesterol estimation in —; Method for. S. L. Leiboff, 537.
- Blood:** Formaldehyde; Preservation of — by means of. J. C. Bock, 238.
- Blood-Groups:** Forensic importance of —. G. R. Lynch and F. C. Martley, 293.
- Blood Meal:** Mosquitoes; Identification of — of. C. G. Bull and W. V. King, 99.
- Blood:** Phenols in —; Estimation of. R. C. Theis and S. R. Benedict, 536.
- Blood:** Phosphorus in —; Notes on the estimation of. M. Martland and R. Robison, 598.
- Blood Serum:** Various lead compounds in —; Solubility of. L. T. Fairhall, 490.
- Blood:** Sugar in the —; Estimation of. R. V. Stanford and A. H. M. Wheatley, 291.
- Bondon Cheese:** —; What is? G. D. Elsdon, 267.
- Borax:** Arsenic in — (Legal Notes), 520.
- Boric Acid:** Cake; — in (Notes). G. R. Thompson, 134.
- Boric Acid:** Milk, etc.; Estimation of — in (Notes). J. F. Liversedge and H. H. Bagnall, 133.
- Boric Acid Estimations:** Reagent for —; Invert sugar as a (Notes). G. Van B. Gilmour, 576.
- Borough Analyst:** County Borough of Salford. Annual Report of the — for 1922. G. D. Elsdon, 33.
- Borough Analyst:** County Borough of Salford. Annual Report of the — for 1923. G. D. Elsdon, 518.
- Bran:** Wheat —; Proteins of. D. B. Jones and C. E. F. Gersdorff, 90.
- Brass:** Cadmium in —; The estimation of. A. T. Etheridge, 572.
- Bread:** Alcohol in —; Estimation of. T. Sundberg, 140.
- Bromate, Iodate, and Permanganate Methods:** Hydrazine by the iodine, —; Volumetric estimation of. I. M. Kolthoff, 605.
- Bromates:** Analysis; Mercuric — in. G. F. Smith, 452.
- Bromic and Hypobromous Acids:** Hypobromous acid and estimation of —. E. Billmann and E. Rimbart, 50.

- Bromides**: Linseed oil; The crystalline — of. H. Toms, 77.
- Bromimetric Estimation**: Thiocyanate; — of. A. Kurtenacker and H. Kubina, 540.
- Bromine**: Methyl esters of phenolsulphonic acids; Action of — on. Estimation of sulphur in phenolsulphonic esters and salts. L. J. Simon and M. Frèrejacque, 296.
- Bromometric Estimation**: Iodine values; — of. W. Manchot and F. Oberhauser, 400.
- Brucine**: Strychnine nitrate; — in. Reck, 237.
- Bulgarian Cheese**: "Kaschkawal." A —. A. Heiduschka, 389.
- Burner**: Monochromatic light; — for producing. A. O. Jones, 108.
- Butter**: Adulteration of cacao —; Bellier's reaction applied to the detection of. N. B. Clemencet, 343.
- Butter**: Adulteration of cacao —; Detection of. A. Kochler, 237.
- Butter**: Fat of goats' —; Preliminary notes on the composition of the. F. Knowles and J. C. Urquhart, 509.
- Butter Fat**: Stearic acid content of —; The (Notes). C. A. Mitchell, 515.
- Butter**: Miscibility to the detection of adulteration of cacao — and to the identification of various pure products; Application of. H. Rosset, Marange and Vinter, 91.
- Butter Mixture**: —; Sale of a (Legal Notes), 85.
- "**Butter Mixture**": Sale of — (Legal Notes), 476.
- Butyric Acid**: Denigès test for —; Note on the (Notes). F. Bamford, 226.
- Butyric and Acetic Acids**: —; Estimation of. E. Fyemann, 396.
- C**
- Cacao Butter**: Adulteration of —; Bellier's reaction applied to the detection of. N. B. Clemencet, 343.
- Cacao Butter**: Adulteration of —; Detection of. A. Koehler, 237.
- Cacao Butter**: Pure products; Application of miscibility to the detection of adulteration of — and to the identification of various. H. Rosset, Marange and Vinter, 91.
- Cacao**: Germ. F. Härtel, 390.
- Cadmium**: Brass; The estimation of — in. A. T. Etheridge, 572.
- Cadmium**: Mercury from — by means of pyridine; Separation of. G. Rotter, 401.
- Cadmium**: Spelter and zinc ores; Effect of — in. C. E. Barrs, 248.
- Cadmium**: Zinc; Separation of — from. K. Chalupny and K. Breisch, 401.
- Caffeine**: Salicylic acid; Molecular combination of — and. A. Regenbogen and N. Schoorl, 486.
- Cake**: Boric acid in — (Notes). G. R. Thompson, 134.
- Calcium Carbide**: —; Estimation of. J. Y. Yee and H. J. Krase, 397.
- Calcium Compound**: Cyanamide in its —; New method for the estimation of. R. Fosse, P. Hagene and R. Dubois, 491.
- Calcium**: Ferric oxalate. Application to the separation of iron and —. J. Barlot, 544.
- Calcium**: Traces of — and magnesium; Detection and estimation of. F. Pavelka, 604.
- Camel Hump Fat**: Fatty acids of —. N. McClelland, 343.
- Camphor**: Fenchone oxime; New form of. Characterisation of fenchone in presence of —. M. Delépine, 397.
- Camphor or Peppermint Oil**: Essential oils in certain flavouring extracts and of — in certain pharmaceutical preparations; Estimation of. W. W. Randall, 440.
- Cancer-producing Factor**: Tar; On the — in. E. L. Kennaway, 242.
- Cannabis Indica**: Smoking tobacco; — in. H. Henstock, 40.
- Canned Foods**: Tin in —; Apparatus for the estimation of. E. J. B. Willey, 234.
- Canned Foods**: Vitamin C in —. W. H. Eddy and E. F. Kohman, 146.
- Canned Fruits**: Corrosion in —; Nature of. E. F. Kohman and N. H. Sanborn, 234.
- Canned Salmon**: —; Composition of. O. E. Shostrum, R. W. Clough and E. D. Clark, 233.
- Cantharidin**: Identification of —; Microchemical. G. Denigès, 40.
- Cantharidin**: Traces of —; Microcrystalline reaction for identifying. G. Denigès, 238.
- Carbon**: —; Volumetric estimation of. J. F. Durand, 295.
- Carbon Dioxide**: Hydraulic limes; Estimation of water of hydration, water of constitution, and — in. J. A. Muller and E. Peytral, 251.
- Carbon Disulphide**: Iodimetry; Estimation of — by. E. André, 107.
- Carbon Monoxide**: —; Estimation of. P. Lebeau and C. Bedel, 451.
- Carbon Monoxide**: Public Gas Supplies; — in. Report to the Board of Trade, 482.
- Carbon Monoxide**: Reagent for —; New. A. Damiens, 298.
- Carbon Tetrachloride**: Commercial brands of —; Chemical examination of some. L. E. Warren, 144.
- Carbon Tetrachloride**: Purity of —; Tests for the (Notes). C. Newcomb, 225.
- Carbonate-Bicarbonate Titrations**: Mixed indicator for —. S. G. Simpson, 452.
- Carbonates**: Highly coloured liquids; The estimation of — in (Notes). H. B. Dunningcliff, 426.
- Carbons**: Decolorising —; Testing. J. E. Temple and P. Mahler, 350.
- Carrageen**: — (*Chondrus crispus*); Certain reactions of. E. Justin-Mueller, 535.
- Carvacrol**: Thyme oils; Estimation of thymol and — in. C. E. Sage and W. G. Dalton, 602.
- Cascara Content**: *Rhamnus Purshiana*; — of the wood and bark of. R. H. Clark and K. B. Gillie, 441.

- Caseinogen**: Tryptophan content of —. H. Onslow, 289.
- Cashew Nut Oil**: —; Composition of. A. P. West and C. C. Cruz, 39.
- Castor Oil Tablets**: Compound — (Legal Notes), 381.
- Catalysts**: Non-drying oils; Action of — with. A. G. Hill, 149.
- Catalysts**: Organic substances and coals in presence of —; Sulphochromic oxidation of. D. Florentin, 244.
- Catalytic Action**: Anti-scorbutic vitamin; — of copper in the destruction of. A. F. Hess and M. Weinstock, 535.
- Catechol Tannins**: Mitchell's colorimetric method to the estimation of —; An attempt to extend. P. H. Price, 361.
- Catechol Tans**: Reagent for —; Nitroso-methylurethane as a. W. Vogel and C. Schüller, 400.
- Cayenne Pepper**: Lead; Outbreak of poisoning due to — containing. M. Nicoloff, 394.
- Cellular Content**: Milk; The — of. Investigation made on behalf of the Medical Research Council, 585.
- Cellulose**: Chlorination method; Estimation of — in wood by the. G. J. Ritter and L. C. Fleck, 196.
- Cellulose**: Derivatives; Fluorescent powers of — and its. S. J. Lewis, 199.
- Cellulose Substances**: Copper in — by the molybdomanganic method of Fontès-Thivolle; Estimation of. H. Gault and B. C. Mukerji, 196.
- Charcoals**: Decolorisation of tinted white wines; Evaluation of — used for the. X. Rocques, 235.
- Chaulmoogra**: Allied preparations; Chemotherapeutic experiments with — and. O. Schöbl, 241, 593.
- Chaulmoogra Group**: Various oils in the —; Comparative analytical study of. G. A. Perkins, 236.
- Cheese**: Bondon —; What is? G. D. Elsdon, 267.
- Cheese**: Cheshire — (Legal Notes), 183, 228.
- Cheese**: Cream —. T. R. Hodgson, 264.
- Cheese**: "Kaschkawal." A. Bulgarian —. A. Heiduschka, 389.
- Cheese**: Legislative prescriptions concerning —; Collection of, 230.
- Chemical Composition**: Woods; Relation between the durability and — of. L. F. Hawley, L. C. Fleck and C. A. Richards, 450.
- Chemical Examiner**: Government of Madras. Report of the — for the Year 1923, 431.
- Chemical Factors**: Tobacco; — determining the quality of. V. Graham and R. H. Carr, 247.
- Chemical Reactions**: Substance containing insulin; Some — of the. H. A. Shonle and J. H. Waldo, 191.
- Chemical Reactions**: Blood on —; Influence of. G. Beccadelli, 243.
- Chemotherapeutic Experiments**: Chaulmoogra and allied preparations; — with. O. Schöbl, 241, 593.
- Cheshire**: Cheese (Legal Notes), 183, 228.
- Chilled Beef**: Ministry of Health. Interim Report of the Food Preservatives Committee on the Treatment of — and Other Foods with Formaldehyde, 433.
- Chloral Hydrate**: Chloroform and —; Colour test for. J. H. Ross, 144.
- Chlorates**: Nitrates and — during putrefaction of viscera; Total reduction of. C. Ghigliotto, 395.
- Chlorides**: Plant fluids; Titration of — in. J. V. Lawrence and J. A. Harris, 393.
- Chlorination Method**: Cellulose in wood by the —; Estimation of. G. J. Ritter and L. C. Fleck, 196.
- Chlorine**: Milk; Active — as a germicide for. H. Hale and W. L. Bleecker, 192.
- Chloroform**: Autoxidation of —. A. M. Clover, 95.
- Chloroform**: Chloral hydrate; Colour test for — and. J. H. Ross, 144.
- Chocolate**: — coated tablets and pills; — in. E. S. Rose, 485.
- Chocolate-coated Tablets and Pills**: Chocolate in —. E. S. Rose, 485.
- Chocolate**: — (Legal Notes), 519.
- Cholesterol Estimation**: Blood; Method for — in. S. L. Leiboff, 537.
- (Chondrus Crispus)**: Carrageen —; Certain reactions of. E. Justin-Mueller, 535.
- Chromates**: Acetic acid by different metallic —; Oxidation of. L. J. Simon, 396.
- Chrome-Leather**: Analysis. D. Woodroffe, 351.
- Chrome-Leather Analysis**: —. International Commission Report. R. F. Innes, 48.
- Chrome Upper Leather**: Perspiration on —; Effect of. R. F. Innes, 48.
- Chromic Acid**: Electrometric titration of —. H. T. S. Britton, 496.
- Chromium**: —; The estimation of (Notes). A. Harvey, 227.
- Chromium**: Estimation of —; Notes on the. H. T. S. Britton, 130.
- Cider**: Fruit wines (— or perry) in ordinary wine; Detection of. F. Schaffer, 235.
- Cinnamon**: Sand in — (Legal Notes), 228.
- Citric Acid Content**: Milk powder; The — of. D. W. Steuart, 465.
- Citrus Fruits**: Ethylene in the colouring of —; Use of. E. M. Chace and F. E. Denny, 284.
- City Analyst**: City of Birmingham. Annual Report of the — for 1923. J. F. Liverseege, 475.
- City Analyst**: City of Birmingham. Report of the — for the Third Quarter, 1923. J. F. Liverseege, 85.
- City Analyst**: City of Birmingham. Report of the — for the Fourth Quarter, 1923. J. F. Liverseege, 181.
- City Analyst**: City of Birmingham. Report of the — for the 1st Quarter, 1924. J. F. Liverseege, 380.
- City and County of Kingston-upon-Hull**: —. Report of the Public Analyst and Bacteriologist for 1923. A. R. Tankard, 474.

- City of Birmingham:** —. Annual Report of the City Analyst for 1923. J. F. Liverseege, 475.
- City of Birmingham:** —. Report of the City Analyst for the Third Quarter, 1923. J. F. Liverseege, 85.
- City of Birmingham:** —. Report of the City Analyst for the Fourth Quarter, 1923. J. F. Liverseege, 181.
- City of Birmingham:** —. Report of the City Analyst for the First Quarter, 1924. J. F. Liverseege, 380.
- City of Birmingham:** —. Report of the Public Analyst for the Second Quarter, 1924. J. F. Liverseege, 580.
- Clarification:** Sugar products; — of solutions in the analysis of. L. Eynon and J. H. Lane, 90.
- Classificatory Tests:** Drugs containing tannin; New — for. A. H. Ware, 442.
- Clinton Grapes:** Grape Pigments; Chemistry of. Anthocyanins in —. R. J. Anderson and F. P. Nabenhauer, 533.
- Clove Oil:** Eugenol in —; Estimation of. J. A. L. Bouma, 345.
- Coal Ash:** Melting point of —. F. S. Sinnatt and N. Simpkin, 406.
- Coal:** Department of Scientific and Industrial Research. Fuel Research Board. Methods of analysis of —. Estimation of nitrogen, 230.
- Coal:** Fuel Research Board. Physical and Chemical Survey of the National — Resources. Report on Methods of Analysis of —. 36.
- Coal:** Nitrogen in —; The estimation of. W. Donovan, 57.
- Coal:** Silver dichromate and sulphuric acid; Oxidation of. L. J. Simon, 245.
- Coal:** Sulphur in —; Estimation of. H. Bahr, 454.
- Coals:** Organic substances and — in presence of catalysts; Sulpho-chromic oxidation of. D. Florentin, 244.
- Cobalt:** Bismuthate method for manganese; Interference of — in. G. E. F. Lundell, 152.
- Cobalt:** Nickel; Detection of — and. C. C. Palit, 353.
- Cobalt:** Tin precipitated as stannic sulphide; The carrying down of — and nickel by. V. Auger and L. Odnot, 198.
- Coconut and Cottonseed Oils:** Hanus iodine values of —; Influence of various solvents on the. H. J. Bankston and F. C. Vilbrandt, 449.
- Coconut Oil:** Alkali or soap in refined —; Limits for the detection of traces of. W. L. Brooke, 592.
- Coconut Oil:** Composition of —; The (Notes). G. D. Elsdon, 274.
- Coconut Oil:** Composition of —; The (Notes). W. N. Stokoe, 577.
- Coconuts:** Liquid from ripe —; Notes on the (Notes). C. G. Matthews, 223.
- Cod Fish:** Insulin from the —. Direct application of picric acid to the islet tissue. H. W. Dudley, 597.
- Cod Liver Oil:** Vitamin A potency of —; Effect of storage of livers on the. A. D. Holmes, 240.
- Coffee Plant:** Green leaves and berries of the —; Vernine in. T. de A. Camargo, 189.
- Collodion Membranes:** High permeability; — of. J. M. Nelson and D. P. Morgan, junr., 201.
- Colloidal Poles:** Emission spectra of solutions; — for observing the. J. Errara, 606.
- Colloids:** Reductase test; Influence of — on the. A. I. Virtanen, 597.
- Coloration:** Lemons; Hastening the — of. F. E. Denny, 439.
- Colorimetry:** Improvements in —. R. V. Stanford, 200.
- Colour Measurement:** Tanning materials; — of. T. Blackadder, 51.
- Colour:** Measurement. O. Meissner, 607.
- Colour Reaction:** Formaldehyde and glyoxylic acid; — common to. Fosse and A. Hjeulle, 601.
- Colour Reaction:** Vitamin C; Alleged — for. H. D. Kay and S. S. Zilva, 191.
- Colour Reaction:** Zirconium and fluorine; — for the detection of. J. H. de Boer, 497.
- Colour Reactions:** Antirachitic and antiscorbutic principles; — of. Bezssonoff, 594.
- Colour Reactions:** Wool; Some — of. Meunier and Rey, 296.
- Colour Test:** Chloroform and Chloral hydrate; — for. J. H. Ross, 144.
- Colouring:** Citrus fruits; Use of ethylene in the — of. E. M. Chace and F. E. Denny, 284.
- Colouring Matters:** Preservatives and — in Food; Final Report of the Departmental Committee on the Use of, 522.
- Columbium:** Volumetric estimation of —; The. W. R. Schoeller and E. F. Waterhouse, 215.
- Combustion:** Analysis of volatile organic substances by — in an open tube; Method of. E. Carriere and C. Leenhardt, 601.
- Compounds:** Rancid fats; — developed in. W. C. Powick, 188.
- Condensed Milk:** Calculations (Notes). J. F. Liverseege, 276.
- (Condensed Milk) Regulations:** Public Health —. Tables for testing "Equivalent Pints" Declaration (Notes). R. E. Essery, 178.
- Connecticut Agricultural Experiment Station:** —. Twenty-seventh Report on Food Products (1922), 278.
- Constant Level:** Waterbath; Device for maintaining a — in a. R. Brooks, 548.
- Continuous-flow Wash-bottle:** —: New. A. G. Nasini, 548.
- Cooking Utensils:** Aluminium —; The corrosion of. C. K. Tinkler and H. Masters, 30.
- Copal:** Kauri —; Oil from. A. G. Hill and D. Nishida, 107.
- Copper:** Anti-scorbutic vitamin; Catalytic action of — in the destruction of. A. F. Hess and M. Weinstock, 535.
- Copper:** Cellulose substances by the molybdomanganic method of Fontès-Thivolle; Estimation of — in. H. Gault and B. C. Mukerji, 196.

- Copper**: —; Gravimetric estimation of. E. Wilke-Dörfurt and U. Rhein, 544.
- Copper**: — -tin alloys; The estimation of — and tin in. A. T. Etheridge, 371.
- Copper**: Iodide; Estimation of — as. L. W. Winkler, 247.
- Copper**: Lead; Electrolytic separation of —, antimony and bismuth from. A. Lassieur, 603.
- Copper**: Micro-detection of —; Schönbein's reaction applied to the. H. Imbert, R. Imbert and P. Pilgrain, 248.
- Copper**: Milk; — as a constituent of. A. F. Hess, G. C. Supplee and B. Bellis, 41.
- Copper**: Milk; Solubility of — in. F. E. Rice and J. Miscall, 145.
- Copper**: Platinum and — as sulphides; Precipitation of. R. Doht, 402.
- Copper**: Platinum metals; Separation of — from the. W. H. Swanger and E. Wichers, 545.
- Copper**: Reactions for —; Sensitive (Notes). R. Fleming, 275.
- Copper Salts**: Lacto-proteins by —; Precipitation of. A. J. J. Vandeveldt, 289.
- Copper**: Salts of —; Toxicity of. J. Efront, 447.
- Copper**: Silver, —, and bismuth by graduated potentials; Rapid electro-analytical separation of. A. Lassieur, 297.
- Copper**: Thiosulphate precipitation of —; The. Drawe, 495.
- Copper-Tin Alloys**: Copper and tin in —; The estimation of. A. T. Etheridge, 371.
- Copper**: Water; Colorimetric estimation of lead and — in. C. Pyriki, 491.
- Copper**: Zinc ores; Analysis of. Use of powdered magnesium for the removal of — and lead. E. G. R. Ardagh and G. R. Bongard, 249.
- Cordials**: Ministry of Health. Report on the composition of commoner British wines and —. 387.
- Cottonseed and Coconut Oils**: Hanus iodine values of —; Influence of various solvents on the. H. J. Bankston and F. C. Vilbrandt, 449.
- Corrosion**: Aluminium cooking utensils; The — of. C. K. Tinkler and H. Masters, 30.
- Cottonseed**: Gossypol content; Toxicity of — and its. E. W. Schwartz and C. L. Alsberg, 540.
- Cottonseed**: Gossypol; Quantitative variation of, and its relation to the oil content of —. E. W. Schwartz and C. L. Alsberg, 47.
- County Analyst**: County of Lancaster. Annual Report of the — for 1923. W. C. Williams, 337.
- County of Kent**: —. Report of the Agricultural Analyst for the Fourth Quarter, 1923. F. W. F. Arnaud, 182.
- County of Lancaster**: —. Annual Report of the County Analyst for 1923. W. C. Williams, 337.
- Cows**: Certain oils in the daily diet of — on the composition of butter fat; The effect of giving. H. J. Channon, J. C. Drummond, and J. Golding, 311.
- Cream**: Cheese. T. R. Hodgson, 264.
- Cream of Tartar**: Lead in — (Legal Notes), 136.
- Cream of Tartar**: Lead in —; The colorimetric estimation of. R. L. Andrew, 129.
- Cream of Tartar**: Lead standards for — (Legal Notes), 136.
- Creatinine**: Jaffé's reaction for —; Chemistry of. I. Greenwald and J. Gross, 346.
- Creatinine Picrates**: Rubidium and caesium —. I. Greenwald and J. Gross, 346.
- Crucibles**: Filtrations; Porous porcelain — for. G. F. Hüttig and K. Schmitz, 454.
- Crystalline Bromides**: Linseed oil; The — of. H. Toms, 77.
- Cube Gambier**: Indian cutch; A qualitative differentiation between — and (Notes). R. P. Biggs, 379.
- Culture Pearls**: Natural and —; Differentiation of. A. Dauvillier, 607.
- Cupro-Potassium Solution**: Reducing sugars by means of —; Estimation of. L. Maquenne, 90.
- Cutch**: Cube gambier and Indian —; A qualitative differentiation between (Notes). R. P. Biggs, 379.
- Cyanamide**: Calcium compound; New method for the estimation of — in its. R. Fosse, P. Hagene and R. Dubois, 491.
- Cyanamide**: Nitrate nitrogen in the presence of — and some of its derivatives; Estimation of. K. D. Jacob, 46.
- Cyanamide**: Xanthyl-urea; Gravimetric estimation of — in the form of. R. Fosse, P. Hagene and R. Dubois, 492.
- Cyanogen**: Wine; Detection and estimation of small quantities of — in. F. Mach and M. Fischler, 438.
- Cyperus Esculentus**: Oil of —. J. Pieraerts, 188.

## D

- Dairy Congress**: World's —; Report on the. J. Golding, 259.
- Dairy Products**: Mojonner Tester; The routine examination of — with special reference to the. L. H. Lampitt, E. B. Hughes and M. Bogod, 413.
- Dalmatian Insect Powder**: Active constituent of —; Isolation and constitution of the. H. Staudinger and L. Ruzicka, 288.
- Decolorising Carbons**: —; Testing. J. E. Temple and P. Mahler, 350.
- Dehydrating Agent**: Sodamide as a —. Preparation of indol, methyl-indol and its homologues. M. A. Verley, 535.
- Dehydration**: Pumice stone during the — of organic liquids; Behaviour of. A. Seidenberg, 51.
- Denigès Test**: Butyric acid; Note on the — for (Notes). F. Bamford, 226.
- Department of Agriculture**: United States —. Food Inspection Decisions 193, 194, 195: 590.
- Department of Scientific and Industrial Research**: —. Fuel Research Board. Methods of analysis of coal. Estimation of nitrogen, 230.

- Department of Scientific and Industrial Research :**  
 ——. Food Investigation Board. Red discoloration (so-called "Pink") on dried salted fish, 86.
- Department of Scientific and Industrial Research :**  
 ——. Report of the Food Investigation Board for the Year 1922, 137.
- Derivatives :** Nitrate nitrogen in the presence of cyanamide and some of its —; Estimation of. K. D. Jacob, 46.
- Dermatitis :** Ministry of Health. Fur —, 521.
- Dessication :** Nitrogenous constituents of plant tissue; Effects of the method of — on the. K. P. Link and E. R. Schule, 600.
- Dessicator :** Simple non-splash ring for use with Scheibler's —; A. S. C. Bradford, 497.
- Device :** Constant level in a waterbath; — for maintaining a. R. Brooks, 548.
- Dextrose :** Iodine in presence of insulin; Oxidation of — by means of. G. A. Alles and H. M. Winegarden, 97.
- Dholl :** Dyed talc; — mixed with (Notes). A. A. Kloot, 514.
- Diabetic Urine :** Ketonic compounds and of  $\beta$ -hydroxybutyric acid in —; Estimation of. H. Bierry and L. Moquet, 244.
- Dial-Ciba :** —; Reactions of. Isnard, 287.
- Diastatic Power :** Polarimetric method for the estimation of. H. C. Gore, 444.
- Dichromate Method :** Purity of various organic products by the —; Evaluation of. E. C. Grey, 194.
- Diet :** Certain oils in the daily — of cows on the composition of butter fat; The effect of giving. H. J. Channon, J. C. Drummond and J. Golding, 311.
- Diet :** Vitamins of milk; Influence of — and sunlight on. E. M. Luce, 595.
- Diethyl Phthalate :** —; Detection of. H. Lemmann, 487.
- Differential Dialysis :** Antiscorbutic factor; — of the. H. S. J. B. Connell and S. S. Zilva, 595.
- Dilution :** Spirits sold with Notice of — (Legal Notes), 229.
- Dilution :** Spirits with notice of —; Sale of (Legal Notes), 581.
- 2-4-Dinitrosoresorcinol :** Ferrous salts; — as a sensitive reagent for. M. Goldstück, 544.
- Diphenylamine Indicator :** Iron; — with. W. W. Scott, 404.
- Disinfectants :** Standardisation of —; Possible discordant factor in the. Walker and Weiss, 41.
- Dissociation Constants :** PH value and the apparent — of indicators; Spectrophotometric determination of. W. C. Holmes, 253.
- Dissolved Air :** Water; Estimation of — in small quantities of. H. G. Becker and W. E. Abbott, 104.
- Distillation :** Low pressures; Receiving apparatus for — at. W. F. Scyer, 354.
- Distilled Wines :** Hydrocyanic acid in —. O. Reichard, 439.
- Domestic Animals :** Available insulin in the pancreas of —; Amount of. F. Fenger and R. S. Wilson, 240.
- Dominion Analyst :** Dominion Laboratory, New Zealand. Fifty-sixth Annual Report of the — for the Year 1922, 184.
- Dominion Laboratory :** —, New Zealand. Fifty-sixth Annual Report of the Dominion Analyst for the Year 1922, 184.
- (Dried Milk) :** Calculations: Public Health — Regulations, 1923 (Notes). D. Henville, 472.
- (Dried Milk) :** Public Health — Regulations, 1923. Calculation of "Equivalent Pints" (Notes). E. Hinks, 471.
- Drugs :** Fluorescence phenomena to the identification of various —; Application of. E. Bayle and R. Fabre, 454.
- Drugs :** Tannin; Identification and classification by chemical methods of — containing. I. Application of the goldbeater's skin test. C. J. Jordan and A. H. Ware, 442.
- Drugs :** Tannin; New classificatory tests for — containing. A. H. Ware, 442.
- Drugs :** Valerian root and certain other aromatic —; Assay of. K. Bullock, 443.
- Dulcin :** Saccharin and — in vinegar and products containing acetic acid; Detection of. G. Reif, 92.
- Dulcin :** Xanthidrol; Estimation of — by means of. G. Reif, 390.
- Durability Tests :** Glass; — of. W. E. S. Turner, 252.
- Durability :** Woods; Relation between the — and chemical composition of. L. F. Hawley, L. C. Fleck and C. A. Richards, 450.
- Dyes :** Anti-ferments; Efficiency of some organic — as. E. H. Harvey, 488.

## E

- Egg Solids :** Alimentary pastes (Noodles); Estimation of — in. R. Buchanan, 436.
- Eggs :** Acid-soluble phosphoric acid in —. L. Pine, 531.
- Eggs :** Composition and decomposition of —; The. T. T. Thomson and J. Sorley, 327.
- Eggs :** Lipoids and lipid-phosphoric acid in flours, alimentary pastes, and —; Estimation of. R. Hertwig, 37.
- Eggs :** Shell —; Adulteration of (Legal Notes), 520.
- Elaeostearic Acid :** —; Composition and constitution of. L. Maquenne, 105.
- Elder :** Flowers of —; Rutin from the. C. E. Sando and J. U. Lloyd, 195.
- Electro-Analytical Separation :** Silver, copper, and bismuth by graduated potentials; Rapid — of. A. Lassieur, 297.
- Electrode :** Hydrogen —; Simple, useful forms of. F. J. Considine, 332.
- Electrodes :** Moisture estimations; Effect of movement of soil salts on the standardisation values of — used in. T. Deighton, 103.
- Electrolysis :** Platinum in —; Substitute for. M. Bleesen, 154.
- Electrolytic Deposition :** Zinc by — from alkaline solutions; Separation of. K. Breisch, 403.

- Electrometric Titration:** Chromic acid; — of. H. T. S. Britton, 496.
- Elementary Analysis:** Measurement of gaseous volumes; New method of — based on the. L. Hackspill and G. D'Huart, 447.
- Emission Spectra:** Solutions; Colloidal poles for observing the — of. J. Errara, 606.
- Endosperm:** Maize; Phytosterols of the — of. R. J. Anderson, 399.
- Endosperm:** Phytosterols of wheat —; The. R. J. Anderson and F. P. Nabenhauer, 449.
- English Oyster Beds:** Ministry of Agriculture and Fisheries. Investigations into the Unusual Mortality in — in 1920 and 1921, 484.
- English Tomatoes:** Fresh and canned —; Anti-scorbutic value of. E. M. Delf, 594.
- Enzyme Actions:** Beef tissues; — of. K. G. Falk, H. M. Noyes and K. Sugiura, 238.
- Enzyme Solutions:** Sugars; Rapid analysis of. Purification and concentration of —. F. W. Reynolds, 188.
- Enzymes:** Oxidising — of the higher and lower plants; Comparison of certain. M. E. Robinson, 596.
- Enzymes:** Oxidising —. VII. The oxygenase of the higher plants. M. W. Onslow, 597.
- “Equivalent Pints”:** Public health (Dried Milk). Regulations, 1923. Calculation of — (Notes). E. Hinks, 471.
- Errata:** 1924: 133, 473, 500, 606.
- Error:** Jodlbauer Process for the estimation of total nitrogen; Cause of — in the. J. Bordas, 103.
- Essential Oil:** Manuka; — of (*Leptospermum scoparium*). R. Gardner, 195.
- Essential Oil of Mustard:** Wine; Use of — as a preservative for. P. Malvezin and G. Bidart, 140.
- Essential Oils:** Camphor or peppermint oil in certain pharmaceutical preparations; Estimation of — in certain flavouring extracts and of. W. W. Randall, 440.
- Essential Oils:** Esters of fixed acids in —; Detection of. A new method of testing. C. T. Bennett and D. C. Garratt, 46.
- Esters:** Essential oils; Detection of — of fixed acids in. A new method of testing. C. T. Bennett and D. C. Garratt, 46.
- Esters:** Methyl — of phenolsulphonic acids; Action of bromine on. Estimation of sulphur in phenolsulphonic — and salts. L. J. Simon and M. Frèrejacque, 296.
- Ether:** Peroxide in —; Estimation of. A. W. Rowe and E. P. Phelps, 593.
- Ether:** Water in mixtures of —, alcohol and water; Estimation of. R. K. Newman, 541.
- Ethers:** Aldehydes in — for anaesthesia; Detection of. E. Isnard, 441.
- Ethyl Nitrite:** Sweet spirit of nitre deficient in — (Legal Notes), 277.
- Ethylene Glycol:** —. Its properties and uses. H. C. Fuller, 391.
- Eucalyptus Oils:** Germicides; — as. A. R. Penfold and R. Grant, 95.
- Eugenol:** Clove oil; Estimation of — in. J. A. L. Bouma, 345.
- Excreta:** Iodine in food, beverages and —; Estimation of. J. F. McClendon, 444.
- Excreta:** Uric acid in poultry —; Estimation of. H. E. Woodman, 492.
- Extract:** — of *Atractylis gummifera* in liquorice —; Detection of. U. Giuffrè, 534.
- Extraction:** Solvent recovery; Apparatus for — and. S. A. de Lacy, 220.

## F

- Fat:** Cotton; Estimation of —, wax and resin in. P. H. Clifford, L. Higginbotham and R. G. Fargher, 350.
- Fat:** — pigment from —; Separation of a. A. N. Currie, 290.
- Fat:** Goats' butter; Preliminary notes on the composition of the — of. F. Knowles and J. C. Urquhart, 509.
- Fat Pigment:** Fat; Separation of a — from. A. N. Currie, 290.
- Fat-soluble Vitamins:** —. XIV. H. Steenbock, E. B. Hart, J. H. Jones and A. Black, 97.
- Fat-soluble Vitamins:** —. XV. R. M. Bethke, H. Steenbock and M. T. Nelson, 97.
- Fat-soluble:** Vitamins, XVI. H. Steenbock, J. H. Jones and E. B. Hart, 147.
- Fats:** Acetyl value of —. E. Raymond and G. Glot, 448.
- Fats:** Animal —; Uncommon (Notes). W. N. Rae, 83.
- Fats:** Iodine value of oils and — by means of pyridine sulphate-bromide; Estimation of the. K. W. Rosenmund and W. Kuhnhen, 105.
- Fats:** Iodine with —; The reaction of. B. M. Margosches and W. Hinner, 449.
- Fats:** Oils and —; Alcoholysis and the composition of. G. D. Elsdon, 423.
- Fats:** Rancid —; Compounds developed in. W. C. Powick, 188.
- Fatty Acids:** Camel hump fat; — of. N. McClelland, 343.
- Fatty Acids:** Solid and liquid —; Quantitative separation of. D. Holde, M. Selim and W. Bleyberg, 448.
- Fehling's Solution:** Insulin towards —; Behaviour of. Knops-Niederhoff, 445.
- Fehling's Solution:** Sugar in urine by means of — with methylene blue as internal indicator; Estimation of. J. H. Lane and L. Eynon, 366.
- Fenchone:** — oxime; New form of. Characterisation of — in presence of camphor. M. Delépine, 397.
- Fenchone Oxime:** —; New form of. Characterisation of fenchone in presence of camphor. M. Delépine, 397.
- Ferric Oxalate:** —. Application to the separation of iron and calcium. J. Barlot, 544.
- Ferrocyanides:** —; Estimation of. W. M. Cumming, 151.
- Ferrous Salts:** Sensitive reagent for —; 2,4-Dinitrosoresorcinol as a. M. Goldstück, 544.

- Fertilisers and Feeding Stuffs Act** : —, 1906; Report of the Departmental Committee on the, 383.
- Fibres** : Textile —; Bacterial decay of. A. C. Thaysen and H. J. Bunker, 292.
- Filter** : Light —; New. L. W. McCay, 109.
- Filtered Waters** : Soluble aluminium and the hæmotoxylin test in —. W. D. Hatfield, 243.
- Filtering** : Hygroscopic substances; Apparatus for —. Ban, 300.
- Filtrations** : Paper pulp in analytical —; Use of. E. Wilke-Dörfurt and E. Locher, 546.
- Filtrations** : Porous porcelain crucibles for —. G. F. Hüttig and K. Schmitz, 454.
- Fining** : Wine with potassium ferro-cyanide; The — of. H. Bosselmann, 342.
- Fire** : Parchments damaged by —; Notes on the treatment of (Notes). C. G. Matthews, 516.
- Fish** : Department of Scientific and Industrial Research. Food Investigation Board. Red discoloration (so-called "Pink") on dried salted —, 86.
- Fish** : Incipient putrefaction in —; Detection of. J. Tillmans and R. Otto, 292.
- Fish Meal** : Excessive oil and deficient phosphate; — with (Legal Notes), 228.
- Fish Meal** : Excessive oil; — with (Legal Notes), 382.
- Fish** : Metallic salts by —; Absorption of. A. Thomas, 190.
- Fixed Acids** : Esters of — in essential oils; Detection of. A new method of testing. C. T. Bennett and D. C. Garratt, 46.
- Flask** : Soxhlet's apparatus; New — for use with (Notes). R. C. Frederick, 474.
- Flavouring Extracts** : Essential oils in certain — and of camphor or peppermint oil in certain pharmaceutical preparations; Estimation of. W. W. Randall, 440.
- Flies** : Bacteria in —; Survival of. R. W. Glaser, 100.
- Flour** : Moisture in wheat and —; Estimation of. H. Snyder and B. Sullivan, 436.
- Flour** : Rye — in wheat —; Estimation of. J. König and F. Bartschat, 187.
- Flours** : Lipoids and lipid-phosphoric acid in —, alimentary pastes, and eggs; Estimation of. R. Hertwig, 37.
- Flours** : Wheat and rye — by means of their aqueous extract; Identification of. R. Strohecker, 282.
- Flowers** : Elder; rutin from the — of. C. E. Sando and J. U. Lloyd, 195.
- Fluids** : Chlorides in plant —; Titration of. J. V. Lawrence and J. A. Harris, 393.
- Fluorescence Phenomena** : Drugs; Application of — to the identification of various. E. Bayle and R. Fabre, 454.
- Fluorescent Powers** : Cellulose and its derivatives; — of. S. J. Lewis, 199.
- Fluorine** : —; Volumetric estimation of. W. W. Scott, 453.
- Fluorine** : Organic compounds; Estimation of — in. J. Piccard and C. Buffat, 104.
- Fluorine** : Small quantities of —; Detection and estimation of. R. J. Meyer, 453.
- Fluorine** : Zirconium and —; Colour reaction for the detection of. J. H. de Boer, 497.
- Fluosilicic Acid** : Poisoning by —; Case of. Lührig, 538.
- Fontès-Thivolle** : Copper in cellulose substances by the molybdomanganic method of —; Estimation of. H. Gault and B. C. Mukerji, 196.
- Food and Drugs Analysis : Abstracts** : 1924 : 37, 90, 139, 187, 233, 282, 341, 388, 436, 485, 531, 591.
- Food Inspection Decisions** : United States Department of Agriculture. — 193, 194, 195 : 590.
- Food Investigation Board** : Department of Scientific and Industrial Research. —. Red discoloration (so-called "Pink") on dried salted fish, 86.
- Food Investigation Board** : Department of Scientific and Industrial Research. Report of the — for the Year 1922, 137.
- Food** : Iodine in —, beverages and excreta; Estimation of. J. F. McClendon, 444.
- Food Material** : Hydrocyanic acid fumigation of ships and its effect on —; The. P. Buttenberg and H. Weiss, 533.
- Food** : Preservatives and Colouring Matters in —; Final Report of the Departmental Committee on the Use of, 522.
- Food Preservatives Committee** : Ministry of Health. Interim Report of the — on the Treatment of Chilled Beef and Other Foods with Formaldehyde, 433.
- Food Products** : Connecticut Agricultural Experiment Station. Twenty-seventh Report on — (1922), 278.
- Food** : Zinc; Contamination of beverages and other — with. J. W. Sale and C. H. Badger, 192.
- Foods** : Canned —; Vitamin C in. W. H. Eddy and E. F. Kohman, 146.
- Foods** : Fruits and Philippine — eaten raw; Viability of intestinal pathogenic bacteria in. A. Vasquez-Colet, 241.
- Foods** : Ministry of Health. Interim Report of the Food Preservatives Committee on the Treatment of Chilled Beef and Other — with Formaldehyde, 433.
- Foods** : Tin in canned —; Apparatus for the estimation of. E. J. B. Willey, 234.
- Forensic Importance** : Blood-groups; — of. G. R. Lynch and F. C. Martley, 293.
- Formaldehyde** : Blood by means of —; Preservation of. J. C. Bock, 238.
- Formaldehyde** : Glyoxylic acid; Colour reaction common to — and. Fosse and A. Hieulle, 601.
- Formaldehyde** : Ministry of Health. Interim Report of the Food Preservatives Committee on the Treatment of Chilled Beef and Other Foods with —, 433.
- "Formol Titration"** : Kjeldahl method of estimating nitrogen; Application of — to the. W. S. Shaw, 558.

- Fortified Milks:** Microscopic detection of some —. D. W. Horn, 388.
- Fractional Distillation:** Reduced pressure; Apparatus for — under. E. André, 407.
- Freezing Point:** Sudan milk; The — of. A. F. Joseph and F. J. Martin, 420.
- Freezing Point Method:** Mixed salts by the —; Analysis of. H. E. Batsford, 109.
- Frerichs' Method:** Nitrate in water by the —; Estimation of. A. Massink, 539.
- Frothing Agents:** Saponins as —; Evaluation of. L. Kofler, 239.
- Frozen Meat:** Moulds on —. A. M. Wright, 101.
- Frozen Pork:** Vitamin *A* in —; Presence of. A. M. Wright, 98.
- Fruit Products:** Malic acid in —; Estimation of. F. Auerbach and D. Kruger, 93.
- Fruit Wines:** Ordinary Wine; Detection of — (cider or perry) in. F. Schaffer, 235.
- Fruits:** Acetaldehyde in —; Microchemical detection of. C. Griebel, 486.
- Fruits:** Corrosion in canned —; Nature of. E. F. Kohman and N. H. Sanborn, 234.
- Fruits:** Ethylene in the colouring of citrus —; Use of. E. M. Chace and F. E. Denny, 284.
- Fruits:** Intestinal pathogenic bacteria in — and Philippine foods eaten raw; Viability of. A. Vasquez-Colet, 241.
- Fuel Research Board:** Department of Scientific and Industrial Research, —. Methods of analysis of coal. Estimation of nitrogen, 230.
- Fuel Research Board:** —. Physical and Chemical Survey of the National Coal Resources. Report on Methods of Analysis of Coal, 36.
- Fuels:** Gaseous —; Exact methods for the analysis of. E. Ott, 602.
- Fumigation:** Food material; The hydrocyanic acid — of ships and its effect on. P. Buttenberg and H. Weiss, 533.
- Fuming Liquids:** Oleum and other —; Apparatus for the analysis of. E. Bosshard, 301.
- Fur Dermatitis:** Ministry of Health. —. 521.
- Furfuraldehyde:** Pentoses and pentosans; Estimation of. I. The formation and distillation of —. N. C. Pervier and R. A. Gortner, 47.
- Furfuraldehyde:** Pentoses and pentosans; Estimation of. II. Estimation of —. N. C. Pervier and R. A. Gortner, 106.
- G**
- Gadolinite:** Yttrium from the other elements of —; Separation of. L. Rolla, V. Cutticia and L. Fernandes, 604.
- Galactose:** — in mixtures of — and arabinose; Biochemical detection of. M. Bridel and I. Charpentier, 445.
- Gallotannin:** Tannase; The quantitative estimation of the degree of hydrolysis of — by. W. N. Nicholson and D. Rhind, 505.
- Gas Analysis:** Absorption pipette for —. S. W. Saunders, 201.
- Gas Analysis:** Method of —; New. R. Geberth, 109.
- Gas Mixtures:** Separation of —; Method for the. M. Shepherd and F. Porter, 50.
- Gas Supplies:** Public —; Carbon monoxide in. Report to the Board of Trade, 482.
- Gaseous Fuels:** Analysis of —; Exact methods for the. E. Ott, 602.
- Gaseous Volumes:** Elementary analysis based on the measurement of —; New method of. L. Hackspill and G. D'Huart, 447.
- Gases:** Drying —; Apparatus for. V. T. Jackson, 200.
- Gasoline:** Sodium plumbite test of —; The. B. T. Brooks, 397.
- Gelatin Ash:** —; Analysis of. E. Cattelain, 344.
- Gelatin:** Inorganic impurities in —; The estimation of the. S. R. Trotman and R. W. Sutton, 271.
- Gelatins:** Pharmaceutical and bacteriological —; Analysis of. E. Cattelain, 391.
- Germicide:** Milk; Active chlorine as a — for. H. Hale and W. L. Bleecker, 192.
- Germicides:** Eucalyptus oils as —. A. R. Penfold and R. Grant, 95.
- Glass:** Durability tests of —. W. E. S. Turner, 522.
- Glassware:** Scientific —; Joint Committee for the Standardisation of. Report No. 1. On Units of Volume, 479.
- Glassware:** Volumetric —; Tests on. Classes A and B. The National Physical Laboratory, Teddington, Middlesex. Metrology Department, Sept. 1924, 477.
- Glucose:** Phenylhydrazine; Interaction of — and. E. Knecht and F. P. Thompson, 150.
- Glucoside:** Methyl salicylate — in the bark of the sweet birch; True nature of the. M. Bridel, 285.
- Glycerides:** Beeswax; Detection of — in. P. Bourcet, 284.
- Glycerides:** Lard; — of. C. Amberger and A. Wieschahn, 143.
- Glycerides:** Palm-kernel oil; — of. A. Bömer and K. Schneider, 283.
- Glycerin:** Alcohol by means of —; Dehydration of. E. Knecht and E. F. Müller, 395.
- Glycerins:** Glycerol in crude —; Estimation of. Fachini and Somazzi, 245.
- Glycerol:** Crude glycerins; Estimation of — in. Fachini and Somazzi, 245.
- Glycerol:** Iodate and sulphuric acid; Estimation of — by oxidation with. R. Strebingner and J. Streit, 398.
- Glycol:** Ethylene —. Its properties and uses. H. C. Fuller, 391.
- Glycyrrhizin:** Commercial —; Preparation of. P. Bertolo, 40.
- Glyoxylic Acid:** Formaldehyde and —; Colour reaction common to. Fosse and A. Hieulle, 601.
- Goats' Butter:** Fat of —; Preliminary notes on the composition of the. F. Knowles and J. C. Urquhart, 509.

- Goldbeaters' Skin Test**: Drugs containing tannin; Identification and classification by chemical methods of. I. Application of the ——. C. J. Jordan and A. H. Ware, 442.
- Gold-beaters' Skin Test**: Tannins; Osmium tetroxide as a reagent for the — for. (Notes). P. H. Price, 336.
- Gold-beaters' Skin Test**: Tannins; The — for. P. H. Price, 25.
- Golden Syrup**: Warranty (Legal Notes), 137.
- Gossypol Content**: Cottonseed and its —; Toxicity of. E. W. Schwartz and C. L. Alsberg, 540.
- Gossypol**: Oil content of cottonseed; Quantitative variation of — and its relation to the. E. W. Schwartz and C. L. Alsberg, 47.
- Gossypol**: Pharmacology of —. E. W. Schwartz and C. L. Alsberg, 540.
- Government Chemist**: Work of the Government Laboratory; Report of the — upon the. 525.
- Government Laboratory**: Government Chemist upon the Work of the —; Report of the, 525.
- Government Laboratory**: The —, Bangkok, Siam. First Report from November, 1917, to March 31, 1922, 88.
- Grape Pigments**: —; Chemistry of. Anthocyanins in Clinton grapes. R. J. Anderson and F. P. Nabenhauer, 533.
- Grapes**: Anthocyanins in —. R. J. Anderson, 39.
- Grapes**: Grape pigments; Chemistry of. Anthocyanins in Clinton —. R. J. Anderson and F. P. Nabenhauer, 533.
- Graphs**: Reproducing — in quantity; Method for. W. C. Greene and R. S. Hunt, 110.
- Gravimetric Analysis**: Hypophosphorous acid in —; use of. L. Moser and M. Niessner, 152.
- Gravimetric Ratio**: The — -antimony: anti-mony tetroxide. J. Knop, 49.
- Grease**: Anhydrous soap in lubricating —; Estimation of. B. Joachim, 449.
- Ground Beef**: Bacteriological examination of —, I. and II. R. E. Hoffstadt, 147.
- Growth-promoting Substances**: Bacteria to —; Relation of. S. R. Damon, 446.
- Guaiacol**: Oxidase preparations; Use of — for measuring the activity of. P. Fleury, 347.
- Gypsum**: — and — products; Analysis of. F. C. Welch, 251.
- Gypsum Products**: Gypsum and —; Analysis of. F. C. Welch, 251.
- H**
- Haemolysis**: Milk; —, as a means of detecting the adulteration of. M. J. N. Schuurisma, 487.
- Haemotoxylin Test**: Filtered waters; Soluble aluminium and the — in. W. D. Hatfield, 243.
- Hake Liver Oil**: Vitamin A potency of —; The. A. D. Holmes, 291.
- Halogen**: Organic compounds; Detection of — in. J. Piccard and F. De Montmollin, 104.
- Halogens**: —; Detection of. W. B. S. Bishop, 154.
- Halogens**: Two —; Simultaneous estimation of. H. Jahn, 250.
- Hammersmith**: Metropolitan Borough of —. Annual Report of the Public Analyst for 1923. P. A. E. Richards, 428.
- Hanus Iodine Values**: Various solvents on the — of cottonseed and coconut oils; Influence of. H. J. Bankston and F. C. Vilbrandt, 449.
- Hard Body**: Minerals by microscopic examination of their traces left on a —; Identification of. P. Gaubert, 108.
- Heat**: Destruction of Vitamin B by —; Quantitative study of the. H. C. Sherman and M. R. Grose, 42.
- Heat**: Milk; Action of rennet and of — on. N. C. Wright, 290.
- Heating**: Optical activity of sucrose produced by —; Changes in the. M. A. Rakusin and A. N. Nesmejanow, 591.
- Heavy Metals**: Some — in the organism (mercury, bismuth and lead); Circulation of. S. Lomholt, 599.
- Herrings**: Hydrogen peroxide; The bleaching of pickled — with. O. Luning, 532.
- Heterogeneous Systems**: Viscosity of — such as paints; Measurement of the. H. Wolff, 547.
- Hexamethylenetetramine**: Microchemical tests for —. H. Leffmann, 400.
- Higher and Lower Plants**: Oxidising enzymes of the —; Comparison of certain. M. E. Robinson, 596.
- Higher Plants**: Oxidising enzymes. VII. The oxygenase of the —. M. W. Onslow, 597.
- Histamine**: —; Estimation of. M. T. Hanke and K. K. Koessler, 346.
- Histo-chemical Investigations**: Micro-incineration applicable to —; Method of. A. Policard, 52.
- Histological and Chemical Examination**: Seeds of *Ipomoea hederacea* and other species of *Ipomoea*; — of the. H. L. Kassner, 285.
- Homology**: Alkyl-chloro-malonamides. The influence of — on taste. A. W. Dox and B. Houston, 345.
- Honey**: — and artificial —; New method of distinguishing between. F. Auerbach and E. Bodländer, 389.
- Hubl's Iodine Solution**: Mercuric chloride in —; Substitutes for. B. M. Margosches and W. Hinner, 400.
- Humic Matter**: Mineral soils; Colorimetric estimation of — in. T. Eden, 491.
- Husks**: Sharps; Rice — in (Legal Notes), 429.
- Hydraulic Limes**: Water of hydration, water of constitution, and carbon dioxide in —; Estimation of. J. A. Muller and E. Peytral, 251.
- Hydrazine**: Iodine, bromate, iodate, and permanganate methods; Volumetric estimation of — by the. I. M. Kolthoff, 605.
- Hydrocarbons**: Beeswax; Alcohols and — of. A. Gascard and G. Damoy, 143.
- Hydrocarbons**: Petroleum; Lubricant and asphaltic — in. C. F. Mabery, 106.

- Hydrochloric Acid**: International Union of Pure and Applied Chemistry. Suggested Standards for —, Sodium Chloride and Zinc, 280.
- Hydrocyanic Acid**: Distilled wines; — in. O. Reichard, 439.
- Hydrocyanic Acid Fumigation**: Food material; The — of ships and its effect on. P. Buttenberg and H. Weiss, 533.
- Hydrocyanic Acid**: —; Detection and colorimetric estimation of. J. M. Kolthoff, 41.
- Hydrocyanic Acid**: Polymer of —; Toxicity of a. C. Bedel, 539.
- Hydrocyanic Cyanide Content**: Amygdalin; Estimation of the — of. J. H. Roe, 190.
- Hydrogen Electrode**: —; Simple, useful forms of. F. J. Conside, 332.
- Hydrogen Electrode**: Meat pastes, etc.; — for use with (Notes). G. W. Monier-Williams, 224.
- Hydrogen Ion Concentration**: *Bacillus Granulobacter Pectinovorum* and its effect on the —; Proteolytic action of. W. H. Peterson, E. B. Fred and B. P. Domogalla, 599.
- Hydrogen Ion Concentration**: Tannin analysis; Effects of varying — on. W. R. Atkin, 493.
- Hydrogen Peroxide**: Pickled herrings with —; The bleaching of. O. Lüning, 532.
- Hydrogenated Oils**: —; The recognition of. K. A. Williams and E. R. Bolton, 460.
- Hydrogenation**: Philippine Lumbang and Pili nut oils; Effect of composition on the complete — of. A. P. West and L. Gonzaga, 38.
- Hydrolysis**: Bismuth by —; Separation and estimation of. G. Luff, 249.
- Hydrolysis**: Degree of — of gallotannin by tannase; The quantitative estimation of the. W. N. Nicholson and D. Rhind, 505.
- Hydrostrychnine Reagent**: Nitrite and nitrate; The — for the estimation of. I. M. Kolthoff, 546.
- Hydroxides**: Alkali and alkaline-earth —; Reaction of sulphur with. H. V. Tartar and C. Z. Draves, 250.
- $\beta$ -Hydroxybutyric Acid**: Ketonic compounds and of — in diabetic urine; Estimation of. H. Bierry and L. Moquet, 244.
- Hygroscopic Substances**: Filtering —; Apparatus for. Ban, 300.
- Hypobromous Acid**: Hypobromous and bromic acids; — and estimation of. E. Büllmann and E. Rimbart, 50.
- Hypobromous and Bromic Acids**: Hypobromous acid and estimation of —. E. Büllmann and E. Rimbart, 50.
- Hypophosphorous Acid**: Gravimetric analysis; Use of — in. L. Moser and M. Niessner, 152.
- Hypophosphorous and Phosphorous Acids**: —; Iodimetric estimation of. A. Brukl and M. Behr, 406.
- Indian Artemisia**: Santonin; — as a source of, 39.
- Indian Catch**: Cube gambier and —; A qualitative differentiation between (Notes). R. P. Biggs, 379.
- Indicator**: Bleaching damage; Methylene blue as an — of. E. Ristenpart, 603.
- Indicator**: Carbonate-bicarbonate titrations; Mixed — for. S. G. Simpson, 452.
- Indicator**: Definite oxidation potential; Benzidine as an analytical reagent and an — for a. I. M. Kolthoff, 493.
- Indicator**: Methylene blue as internal —; Estimation of sugar in urine by means of Fehling's solution with. J. H. Lane and L. Eynon, 366.
- Indicator**: Zinc; Use of molybdenum as — in the volumetric estimation of. L. Fernandes, 496.
- Indicators**: Apparent dissociation constants of —; Spectrophotometric determination of PH value and the. W. C. Holmes, 253.
- Indol**: Sodamide as a dehydrating agent. Preparation of —, methyl-indol and its homologues. M. A. Verley, 535.
- Ink**: Printing —; Arsenic in (Notes). G. D. Elsdon, 336.
- Inorganic Analysis**: Abstracts: 1924: 48, 107, 152, 197, 247, 297, 352, 401, 451, 493, 544, 603.
- Inorganic Impurities**: Gelatin; The estimation of the — in. S. R. Trotman and R. W. Sutton, 271.
- Insect Powder**: Active constituent of Dalmatian —; Isolation and constitution of the. H. Staudinger and L. Ruzicka, 288.
- Institute of Chemistry of Great Britain and Ireland**: —. Forty-sixth Annual General Meeting, 3rd March, 1924, 186.
- Institute of Chemistry of Great Britain and Ireland, The**: 1924: 112, 186, 310.
- Insulin**: Alkaline compounds on —; Action of. E. J. Witzemann and L. Livshis, 146.
- Insulin**: Cod fish; — from the. Direct application of picric acid to the islet tissue. H. W. Dudley, 597.
- Insulin**: Dextrose by means of iodine in presence of —; Oxidation of. G. A. Alles and H. M. Winegarden, 97.
- Insulin**: Fehling's solution; Behaviour of — towards. Knops-Niederhoff, 445.
- Insulin**: Pancreas of domestic animals; Amount of available — in the. F. Fenger and R. S. Wilson, 240.
- Insulin Preparations**: Physiological assay of —. H. Penau and H. Simonnet, 95.
- Insulin**: Substance containing —; Some chemical reactions of the. H. A. Shonle and J. H. Waldo, 191.
- International Commission Report**: Chrome-leather analysis. —. R. F. Innes, 48.
- International Union**: Pure and Applied Chemistry; — of. Suggested Standards for Hydrochloric Acid, Sodium Chloride and Zinc, 280.
- Intestinal Pathogenic Bacteria**: Fruits and Philippine foods eaten raw; Viability of — in. A. Vasquez-Colet, 241.

- Invert Sugar**: Boric acid estimations; — as a reagent for (Notes). G. Van B. Gilmour, 576.
- Iodate, and Permanganate Methods**: Hydrazine by the iodine, bromate, —; Volumetric estimation of. I. M. Kolthoff, 605.
- Iodate**: Glycerol by oxidation with — and sulphuric acid; Estimation of. R. Strebinger and J. Streit, 398.
- Iodide**: Copper as —; Estimation of. L. W. Winkler, 247.
- Iodides**: Iodine in —; Estimation of. Weichherz and Klinger, 299.
- Iodimetric Method**: Sugar products; The application of the — to the analysis of. C. L. Hinton and T. Macara, 2.
- Iodimetric Standard**: Potassium permanganate as an —. J. M. Hendel, 247.
- Iodimetry**: Carbon disulphide by —; Estimation of. E. André, 107.
- Iodine**: Dextrose by means of — in presence of insulin; Oxidation of. G. A. Alles and H. M. Winegarden, 97.
- Iodine, Bromate, Iodate, and Permanganate Methods**: Hydrazine by the —; Volumetric estimation of. I. M. Kolthoff, 605.
- Iodine**: Fats; The reaction of — with. B. M. Margosches and W. Hinner, 449.
- Iodine**: Food, beverages and excreta; Estimation of — in. J. F. McClendon, 444.
- Iodine**: Iodides; Estimation of — in. Weichherz and Klinger, 299.
- Iodine Solution**: Mercuric chloride in Hubl's —; Substitutes for. B. M. Margosches and W. Hinner, 400.
- Iodine Value**: Oils and fats by means of pyridine sulphate-bromide; Estimation of the — of. K. W. Rosenmund and W. Kuhnhenh, 105.
- Iodine Values**: Bromometric estimation of —. W. Manchoth and F. Oberhauser, 400.
- Iodine Values**: Cottonseed and coconut oils; Influence of various solvents on the Hanus — of. H. J. Bankston and F. C. Vilbrandt, 449.
- Ipomoea Hederacea***: Seeds of — and other species of *Ipomoea*; Histological and chemical examination of the. H. L. Kassner, 285.
- Ipomoea***: Seeds of *Ipomoea hederacea* and other species of —; Histological and chemical examination of the. H. L. Kassner, 285.
- Iron Content**: Spinach; — of. A. Lichtin, 390.
- Iron**: Diphenylamine indicator with —. W. W. Scott, 404.
- Iron**: Ferric oxalate; Application to the separation of — and calcium. J. Barlot, 544.
- Iron Ores**: Titanous chloride; Volumetric assay of — by means of. L. Brandt, 352.
- Iron Salts**: Dissolved oxygen in the presence of —; Estimation of. A. M. Buswell and W. U. Gallager, 45.
- Iron-Silicon Alloys**: Silicon in — by their physical properties; Estimation of. T. D. Yensen, 300.
- Iron**: Zinc from — and aluminium; Separation of. E. G. R. Ardagh and G. R. Bongard, 249.
- Islet Tissue**: Insulin from the cod fish. Direct application of picric acid to the —. H. W. Dudley, 597.

## J

- Jaffé's Reaction**: Creatinine; Chemistry of — for. I. Greenwald and J. Gross, 346.
- Japanese Tung Oil**: —; Characteristics of. I. Miura, 542.
- Jerusalem Artichoke**: —; Analysis of the. A. T. Shohl, 37.
- Jodlbauer Process**: Total nitrogen; Cause of error in the — for the estimation of. J. Bordas, 103.

## K

- "Kaschkawal"**: —. A Bulgarian cheese. A. Heiduschka, 389.
- Kauri Copal**: Oil from —. A. G. Hill and D. Nishida, 107.
- Kent**: County of —. Report of the Agricultural Chemist for the Fourth Quarter, 1923. F. W. F. Arnaud, 182.
- Ketonic Compounds**:  $\beta$ -hydroxybutyric acid in diabetic urine; Estimation of — and of. H. Bierry and L. Moquet, 244.
- Kingston-upon-Hull**: City and County of —. Report of the Public Analyst and Bacteriologist for 1923. A. R. Tankard, 474.
- Kjeldahl Method**: "Formol Titration" to the — of estimating nitrogen; Application of. W. S. Shaw, 558.
- Koch's Bacillus**: Ordinary media; Detection of — in. G. Pégurier, 489.
- Kreis Test**: —; The. G. E. Holm and G. R. Greenbank, 344.

## L

- Laboratory**: Stirrer. C. E. Waters, 355.
- Laccase**: Activity of —; Method of measuring the. P. Fleury, 241.
- Lactic Acid Organisms**: Bactericidal power of raw milk on — in sterilised milk; Influence of the. P. Mazé, 348.
- Lacto-Proteins**: Copper salts; Precipitation of — by. A. J. J. Vandeveldel, 289.
- Lancaster**: County of —. Annual Report of the County Analyst for 1923. W. C. Williams, 337.
- Lard**: Glycerides of —. C. Amberger and A. Wiesehahn, 143.
- Lead Cathode**: Arsenic; Use of the — in the electrolytic method for the estimation of minute quantities of. T. Callan, 402.
- Lead**: Cayenne pepper containing —; Outbreak of poisoning due to. M. Nicoloff, 394.
- Lead Compounds**: Blood serum; Solubility of various — in. L. T. Fairhall, 490.
- Lead**: Copper, antimony and bismuth from —; Electrolytic separation of. A. Lassieur, 603.
- Lead**: Cream of tartar; — in (Legal Notes), 136.

- Lead**: Cream of tartar; The colorimetric estimation of — in. R. L. Andrew, 129.
- Lead**: Heavy metals in the organism (mercury, bismuth and —); Circulation of some. S. Lomholt, 599.
- Lead**: Living organism; Distribution of — in the. I. A. Christiansen, G. Hevesy and S. Lomholt, 490.
- Lead Number**: Vanilla extracts; — of. C. A. Clemens, 534.
- Lead**: Potable waters, and in urine; The estimation of — in. J. C. Thresh, 124.
- Lead Standards**: Cream of tartar; — for (Legal Notes), 136.
- Lead**: Testing urine for —; Rapid method of. L. T. Fairhall, 490.
- Lead**: Tin and antimony; Estimation of — in the presence of. E. Stelling, 453.
- Lead**: Water; Colorimetric estimation of — and copper in. C. Pyriki, 491.
- Lead**: Zinc ores; Analysis of. Use of powdered magnesium for the removal of copper and —. E. G. R. Ardagh and G. R. Bongard, 249.
- Leak**: Water jacket; Device for stopping a — in a (Notes). R. C. Frederick, 135.
- Leather Analysis**: Chrome- —. D. Woodroffe, 351.
- Leather Analysis**: Chrome- —. International Commission Report. R. F. Innes, 48.
- Leather**: Chrome upper —; Effect of perspiration on. R. F. Innes, 48.
- Leathers**: Trypsin on various —; Action of. A. W. Thomas and F. L. Seymour-Jones, 196.
- Leaves**: Coffee plant; Vernine in green — and berries of the. T. de A. Camargo, 189.
- Legal Notes**: 1924 : 85, 136, 183, 228, 276, 338, 381, 429, 476, 521, 581.
- Legislative Prescriptions**: Cheese; Collection of — concerning, 230.
- Lemon Juice**: Antiscorbatic fraction of —; The. S. S. Zilva, 290.
- Lemon Juice**: Antiscorbatic fraction of —. II. S. S. Zilva, 594.
- Lemon Peel**: Protopectin and some other constituents of —. R. Sucharipa, 141.
- Lemons**: Coloration of —; Hastening the. F. E. Denny, 439.
- (*Leptospermum scoparium*)**: Manuka; Essential oil of. —. R. Gardner, 195.
- Light Filter**: —; New. L. W. McCay, 109.
- Light**: Monochromatic —; Burner for producing. A. O. Jones, 108.
- Lignin**: Wood; Chemistry of. Relation between methoxyl and — in wood. G. J. Ritter, 106.
- Lignin**: Wood pulp; Quantitative estimation of — in. H. Wenzl, 543.
- Lignoceric**: Acid. P. A. Levene, F. A. Taylor and H. L. Haller, 542.
- Lime Sulphur**: Sulphur compounds in dry —; Estimation of the. C. P. Jones, 45.
- Limes**: Water of hydration, water of constitution, and carbon dioxide in hydraulic —; Estimation of. J. A. Muller and E. Peytral, 251.
- Linseed and Lumbang Oils**: Principal compounds in Lumbang oil; Oxidation of — and of the. A. P. West and A. L. de Leon, 246.
- Linseed Oil**: Crystalline bromides of —; The. H. Toms, 77.
- Linseed Oil**: —; Composition of. A. Etbner and K. Schmidinger, 245.
- Lipoid-phosphoric Acid**: Lipoids and — in flours, alimentary pastes, and eggs; Estimation of. R. Hertwig, 37.
- Lipoids**: Flours, alimentary pastes, and eggs; Estimation of — and lipoid-phosphoric acid in. R. Hertwig, 37.
- Liquid Fatty Acids**: Solid and —; Quantitative separation of. D. Holde, M. Selim and W. Bleyberg, 448.
- Liquid**: Ripe coconuts; Notes on the — from (Notes). C. G. Matthews, 223.
- Liquids**: Approximate index of refraction of — with a common microscope; Simple method for determining the. C. C. Kiplinger, 354.
- Liquids**: Carbonates in highly coloured —; The estimation of (Notes). H. B. Dunningcliff, 426.
- Liquorice Extract**: Extract of *Atractylis gummifer* in —; Detection of. U. Giuffrè, 534.
- Liver Oil**: Vitamin A potency of hake —; The. A. D. Holmes, 291.
- Livers**: Vitamin A potency of cod liver oil; Effect of storage of — on the. A. D. Holmes, 240.
- Living Organism**: Lead in the —; Distribution of. I. A. Christiansen, G. Hevesy and S. Lomholt, 490.
- Low-grade Ores**: Tungsten in —; Estimation of. E. Jünger, 298.
- Low Pressures**: Distillation at —; Receiving apparatus for. W. F. Seyler, 354.
- Low Temperature Tars**: Reaction for —; New. F. Schulz and J. Prunet, 398.
- Lower Plants**: Oxidising enzymes of the higher and —; Comparison of certain. M. E. Robinson, 596.
- Lubricant and Asphaltic Hydrocarbons**: Petroleum; — in. C. F. Mabery, 106.
- Lubricating Grease**: Anhydrous soap in —; Estimation of. B. Joachim, 449.
- Lumbang and Linseed Oils**: Lumbang oil; Oxidation of — and of the principal compounds in. A. P. West and A. L. de Leon, 246.
- Lumbang and Pili Nut Oils**: Complete hydrogenation of Philippine —; Effect of composition on the. A. P. West and L. Gonzaga, 38.
- Lumbang Oil**: Lumbang and linseed oils; Oxidation of, and of the principal compounds in —. A. P. West and A. L. de Leon, 246.
- Lysol**: —; Analysis of. A. H. Dodd, 286.

## M

**Madras**: Government of —. Report of the Chemical Examiner for the Year 1923, 431.

- Magnesium**: Calcium and —; Detection and estimation of traces of. F. Pavelka, 604.
- Magnesium Compound**: Yeast nucleic acid as a —; Preparation of. E. J. Baumann, 536.
- Magnesium**: Zinc ores; Analysis of. Use of powdered — for the removal of copper and lead. E. G. R. Ardagh and G. R. Bongard, 249.
- Maize**: Endosperm of —; Phytosterols of the. R. J. Anderson, 399.
- Malay States**: Federated —. Annual Report of the Chemical Laboratories for 1923. H. Marsden, 584.
- Malic Acid**: Fruit products; Estimation of — in. F. Auerbach and D. Kruger, 93.
- Malic Acid**: Polarimetric estimation of —. F. Auerbach and D. Kruger, 92.
- Maltose**: Barfoed's solution; Estimation of — in presence of other reducing sugars by means of. P. Nottin, 485.
- Manganese**: Cobalt in the bismuthate method for —; Interference of. G. E. F. Lundell, 152.
- Manganese**: —; Estimation of. Manganous oxalate as a standard. R. W. Coltman, 404.
- Manganese**: Persulphate and silver nitrate; Estimation of — by means of. K. Swoboda, 403.
- Manganese**: Sodium bismuthate method; Estimation of — in water by the. W. D. Collins and M. D. Foster, 395.
- Manganese**: Vitamins; Association of — with. J. S. McHargue, 445.
- Manganous Oxalate**: Manganese; Estimation of — as a standard. R. W. Coltman, 404.
- Manuka**: Essential oil of — (*Leptospermum scoparium*). R. Gardner, 195.
- Margarine**: Labelling of — (Legal Notes), 276.
- Marine Animal Oils**: —. Identity of phoconic acid with valeric acid. E. André, 533.
- Meat**: Frozen —; Moulds on. A. M. Wright, 101.
- Meat Pastes**: Hydrogen electrode for use with —, etc. (Notes). G. W. Monier-Williams, 224.
- Meat**: Sulphites in raw —; Rate of disappearance of. F. H. Campbell, 532.
- Meats**: Starch in potted —; Polarimetric estimation of. A. Doring, 389.
- Mechanical Separation**: Polonium in sodium hydroxide solution by various substances; — of. J. Escher-Desrivières, 405.
- Media**: Koch's bacillus in ordinary —; Detection of. G. Péguier, 489.
- Medical Research Council**: Cellular Content of Milk; The. Investigation Made on Behalf of the —. 585.
- Melting Point**: Coal ash; — of. F. S. Sinnatt and N. Simpkin, 406.
- Membranes**: High permeability; Collodion — of. J. M. Nelson and D. P. Morgan, junr., 201.
- Mercuric Bromates**: Analysis; — in. G. F. Smith, 452.
- Mercuric Chloride**: Hubl's iodine solution; Substitutes for — in. B. M. Margosches and W. Hinner, 400.
- Mercuric Chloride Poisoning**: —; A case of. Limit of sensitiveness of the test for mercury in toxicology. A. Sartori, 348.
- Mercuric Sulphide**: Arsenic in the presence of mercury; Solubility of — in ammonia and its influence on the detection of. C. Ghigliotto, 43.
- Mercury**: Arsenic in the presence of —; Solubility of mercuric sulphide in ammonia and its influence on the detection of. C. Ghigliotto, 43.
- Mercury**: Arsenic; Separation of — from. P. Wenger and M. Schilt, 603.
- Mercury**: Heavy metals in the organism (—, bismuth and lead); Circulation of some. S. Lomholt, 599.
- Mercury**: Mercuric chloride poisoning; A case of. Limit of sensitiveness of the test for — in toxicology. A. Sartori, 348.
- Mercury**: Pyridine; Separation of — from cadmium by means of. G. Rotter, 401.
- Mercury**: Spectroscopic identification of —. Naoum, 348.
- Metabolism**: *Bacillus Coli Communis*; Effect of oxygen supply on the — of. M. Stephenson and M. D. Whetham, 598.
- Metallic Chromates**: Acetic acid by different —; Oxidation of. L. J. Simon, 396.
- Metallic Salts**: Fish; Absorption of — by. A. Thomas, 190.
- Metals**: Heavy — in the organism (mercury, bismuth and lead); Circulation of some. S. Lomholt, 599.
- Meteorological Office**: —. Air Ministry. Advisory Committee on Atmospheric Pollution. Report on Observations in the Year ending March 31st, 1922, 34.
- Meteorological Office**: —. Air Ministry. Advisory Committee on Atmospheric Pollution. Report on Observations in the Year ending March 31st, 1923, 340.
- Methaemoglobin**: —; Preparation and estimation of. M. Nicloux and G. Fontès, 392.
- Methoxyl**: Wood; Chemistry of. Relation between — and lignin in wood. G. J. Ritter, 106.
- Methyl Esters**: Bromine on — of phenolsulphonic acids; Action of. Estimation of sulphur in phenolsulphonic esters and salts. L. J. Simon and M. Frèrejacque, 296.
- Methyl-Indol**: Sodamide as a dehydrating agent. Preparation of indol, — and its homologues. M. A. Verley, 535.
- Methyl Salicylate Glucoside**: Sweet birch; True nature of the — in the bark of the. M. Bridel, 285.
- Methylated-spirit Regulations**: —; New. 341.
- Methylene Blue**: Bleaching damage; — as an indicator of. E. Ristenpart, 603.
- Methylene Blue**: Sugar in urine by means of Fehling's solution with — as internal indicator; Estimation of. J. H. Lane and L. Eynon, 366.
- Micro-Analytical**: Technique. H. Häusler and A. Benedetti-Pichler, 547.
- Microchemical Detection**: Acetaldehyde in fruits; — of. C. Griebel, 486.

- Microchemical Estimation:** Perchlorate; — of. A. Pamfilov and W. Jofinow, 497.
- Microchemical Identification:** Cantharidin; — of. G. Denigès, 40.
- Microchemical Tests:** Hexamethylenetetramine; — for. H. Leftmann, 400.
- Microchemistry:** White pigments and inert bodies as they occur mixed in paints; — of. H. Green, 451.
- Microcrystalline Reaction:** Cantharidin; — for identifying traces of. G. Denigès, 238.
- Micro-Detection:** Copper; Schönbein's reaction applied to the — of. H. Imbert, R. Imbert and P. Pilgrain, 248.
- Micro-Estimation:** Sodium; Volumetric — of. H. Müller, 107.
- Micro-Incineration:** Histo-chemical investigations; Method of — applicable to. A. Policard, 52.
- Micro-Kjeldahl Method:** Nessler-Folin reagent for ammonia; Direct Nesslerisation — and a modification of the. F. C. Koch and T. L. McMeekin, 604.
- Micro-Organisms:** Stock cultures of —; Preservation of. A. C. Thaysen, 446.
- Microscope:** Approximate index of refraction of liquids with a common —; Simple method for determining the. C. C. Kiplinger, 354.
- Microscopic Detection:** Fortified milks; — of some. D. W. Horn, 388.
- Microscopic Examination:** Minerals by — of their traces left on a hard body; Identification of. P. Gaubert, 108.
- Milk:** Adulteration of —; Haemolysis, as a means of detecting the. M. J. N. Schuurmsma, 487.
- (Milk and Cream):** Ministry of Health. Sale of Food and Drugs Acts. Public Health — Regulations, 1912 and 1917. Circular 462, 89.
- Milk:** Boric acid in —, etc.; Estimation of (Notes). J. F. Liverseege and H. H. Bagnall, 133.
- Milk Calculations:** Condensed — (Notes). J. F. Liverseege, 276.
- Milk:** Calculations: Public Health (Dried —) Regulations, 1923 (Notes). D. Henville, 472.
- Milk:** Cellular Content of —; The. Investigation made on behalf of the Medical Research Council, 585.
- Milk:** Copper as a constituent of —. A. F. Hess, G. C. Supplee and B. Bellis, 41.
- Milk:** Copper in —; Solubility of. F. E. Rice and J. Miscall, 145.
- Milk:** Germicide for —; Active chlorine as a. H. Hale and W. L. Bleecker, 192.
- Milk:** Lactic acid organisms in sterilised —; Influence of the bactericidal power of raw — on. P. Mazé, 348.
- Milk:** Nitrates in —; Detection of. M. E. Pozzi-Escot, 233.
- Milk Powder:** Citric acid content of —; The. D. W. Steuart, 465.
- Milk Powder:** Solubility of —; The (Notes). L. H. Lampitt and E. B. Hughes, 176.
- Milk Products Sub-Committee:** —. Uniformity of Methods of Analysis, 556.
- Milk:** Public Health [Dried —] Regulations, 1923. Calculation of "Equivalent Pints" (Notes). E. Hinks, 471.
- Milk:** Rennet and of heat on —; Action of. N. C. Wright, 290.
- Milk:** Sudan —; The freezing point of. A. F. Joseph and F. J. Martin, 420.
- Milk:** Trimyristin from —; Separation of. M. Piettre and C. Roeland, 437.
- Milk:** Vitamins of —; Influence of diet and sunlight on. E. M. Luce, 595.
- Milks:** Fortified —; Microscopic detection of some. D. W. Horn, 388.
- Mineral Soils:** Humic matter in —; Colorimetric estimation of. T. Eden, 491.
- Minerals:** Microscopic examination of their traces left on a hard body; Identification of — by. P. Gaubert, 108.
- Ministry of Agriculture and Fisheries:** —. Investigations into the Causes of the Unusual Mortality in English Oyster Beds in 1920 and 1921, 484.
- Ministry of Health:** —. Fur dermatitis, 521.
- Ministry of Health:** —. Interim Report of the Food Preservatives Committee on the Treatment of Chilled Beef and Other Foods with Formaldehyde, 433.
- Ministry of Health:** —. Report on the composition of commoner British wines and cordials, 387.
- Ministry of Health:** —. Sale of Food and Drugs Acts. Public Health (Milk and Cream) Regulations, 1912 and 1917. Circular 462, 89.
- Miscibility:** Cacao butter; Application of — to the detection of adulteration of, and to the identification of various pure products. H. Rossett, Marange and Vinter, 91.
- Mitchell's Colorimetric Method:** Catechol tannins; An attempt to extend — to the estimation of. P. H. Price, 361.
- Mixed Salts:** Freezing point method; Analysis of — by the. H. E. Batsford, 109.
- Moisture Estimations:** Movement of soil salts on the standardisation values of electrodes used in —; Effect of. T. Deighton, 103.
- Moisture:** Sulphur and — in Pyrites Ores; Methods for the Determination of. As approved by the Swedish Government Testing Institute and by the Norwegian Government Analysis Committee, 528.
- Moisture:** Wheat and flour; Estimation of — in. H. Snyder and B. Sullivan, 436.
- Mojonnier Tester:** Dairy products with special reference to the —; The routine examination of. L. H. Lampitt, E. B. Hughes, and M. Bogod, 413.
- Molasses:** Raffinose in sugars; Estimation of. Proportion of raffinose in —. E. Saillard, 437.
- Molecular Combination:** Caffeine and salicylic acid; — of. A. Regenbogen and N. Schoorl, 486.
- Molybdenum:** Small amounts of —; Estimation of. Application to ammonium phosphomolybdate for the indirect titration of phosphorus. A. Vila, 153.

- Molybdenum** : Zinc; Use of — as indicator in the volumetric estimation of. L. Fernandes, 496.
- Molybdc Method** : Inorganic phosphorus in serum; Modification of — for the estimation of. S. R. Benedict and R. C. Theis, 537.
- Molybdomanganic Method of Fontès-Thivolle** : Copper in cellulose substances by the —; Estimation of. H. Gault and B. C. Mukerji, 196.
- Monochromatic Light** : Burner for producing —. A. O. Jones, 108.
- Morphine** : Organism; Fate of — in the. R. Fabre, 539.
- Mortality** : Ministry of Agriculture and Fisheries. Investigation into the Causes of the Unusual — in English Oyster Beds in 1920 and 1921, 484.
- Mosquitoes** : Blood meal of —; Identification of. C. G. Bull and W. V. King, 99.
- Moulds** : Frozen meat; — on. A. M. Wright, 101.
- Mustard** : Added — bran in prepared —; Composition of commercial — brans with special reference to the detection of. R. Hertwig and J. I. Palmore, 141.
- Mustard Bran** : Commercial mustard brans with special reference to the detection of added — in prepared mustard; Composition of. R. Hertwig and J. I. Palmore, 141.
- Mustard Brans** : Added mustard bran in prepared mustard; Composition of commercial — with special reference to the detection of. R. Hertwig and J. I. Palmore, 141.
- Mustard Flour and Oil** : Wine industry; — in the. J. C. Delage, 94.
- Mustard** : Preservative for wine; Use of essential oil of — as a. P. Malvezin and G. Bidart, 140.
- Myrrh** : Reaction for —; New. S. Dezani, 441.
- N
- Naphthalene** : Naphthalenesulphonic acids and —; Analysis of. W. S. Calcott, F. L. English and F. B. Downing, 150.
- Naphthalenesulphonic Acids** : Naphthalene; Analysis of — and. W. S. Calcott, F. L. English and F. B. Downing, 150.
- National Physical Laboratory** : Volumetric Glassware; Test on. Classes A and B. The —, Teddington, Middlesex, Metrology Department, Sept. 1924, 477.
- Natural and Culture Pearls** : —; Differentiation of. A. Dauvillier, 607.
- Nessler-Folin Reagent** : Ammonia; Direct Nesslerisation micro-Kjeldahl method and a modification of the — for. F. C. Koch and T. L. McMeekin, 604.
- Nesslerisation Micro-Kjeldahl Method** : Direct — and a modification of the Nessler-Folin reagent for ammonia. F. C. Koch and T. L. McMeekin, 604.
- New Zealand** : Dominion Laboratory, —. Fifty-sixth Annual Report of the Dominion Analyst for the Year 1922, 184.
- Nickel** : Cobalt and — by tin precipitated as stannic sulphide; The carrying down of. V. Auger and L. Odinet, 198.
- Nitric** : Cobalt and —; Detection of. C. C. Palit, 353.
- Nitrate** : Frerichs' method; Estimation of — in water by the. A. Massink, 539.
- Nitrate** : Nitrite and —; The hydrostrychnine reagent for the estimation of. I. M. Kolthoff, 546.
- Nitrate Nitrogen** : —; Colorimetric estimation of. F. M. Scales and A. P. Harrison, 405.
- Nitrate Nitrogen** : — in the presence of cyanamide and some of its derivatives; Estimation of. K. D. Jacob, 46.
- Nitrates** : Milk; Detection of — in. M. E. Pozzi-Escot, 233.
- Nitrates** : Phenoldisulphonic acid method; Estimation of — in soils by the. H. J. Harper, 193.
- Nitrates** : Putrefaction of viscera; Total reduction of — and chlorates during. C. Ghigliotto, 395.
- Nitre** : Ethyl nitrite; Sweet spirit of — deficient in (Legal Notes), 277.
- Nitric Acid** : Minute quantities of —; Toxicological detection of. C. Ghigliotto, 44.
- Nitrite** : Nitrate; The hydrostrychnine reagent for the estimation of — and. I. M. Kolthoff, 546.
- Nitrogen** : Coal; The estimation of — in. W. Donovan, 57.
- Nitrogen** : Department of Scientific and Industrial Research. Fuel Research Board. Methods of analysis of coal. Estimation of —, 230.
- Nitrogen** : Error in the Jodlbauer Process for the estimation of total —; Cause of. J. Bordas, 103.
- Nitrogen** : Kjeldahl method of estimating —; Application of "Formol Titration" to the. W. S. Shaw, 558.
- Nitrogen** : Nitrate —; Colorimetric estimation of. F. M. Scales and A. P. Harrison, 405.
- Nitrogenous Constituents** : Plant tissue; Effects of the method of dessication on the — of. K. P. Link and E. R. Schule, 600.
- Nitroprussides** : Ammonia; Application of a new reaction of resorcinol to the detection of — and. M. Caseneuve, 195.
- Nitrosomethylurethane** : Catechol tans; — as a reagent for. W. Vogel and C. Schüller, 400.
- Non-drying Oils** : Catalysts with —; Action of. A. G. Hill, 149.
- Non-Volatile Acids** : Peach; — of the. E. K. Nelson, 592.
- (Noodles)** : Alimentary pastes —; Estimation of egg solids in. R. Buchanan, 436.
- Norwegian Government Analysis Committee** : Sulphur and Moisture in Pyrites Ores; Methods for the Determination of. As approved by the Swedish Government Testing Institute and by the —, 528.
- Notes** : 1924 : 32, 82, 133, 176, 223, 274, 335, 379, 426, 471, 514, 576.
- Notes from the Reports of Public Analysts** : 1924 : 33, 85, 181, 337, 380, 428, 474, 517, 580.

- Nucleic Acid:** Yeast — as a magnesium compound; Preparation of. E. J. Baumann, 536.
- Nut Oil:** Cashew —; Composition of. A. P. West and C. C. Cruz, 39.
- Nut Oil:** Pili —; Composition of. A. P. West and S. Balce, 38.
- Nut Oils:** Philippine Lumbang and Pili —; Effect of composition on the complete hydrogenation of. A. P. West and L. Gonzaga, 38.
- O
- Obituary Notices:**  
**Otto Hehner,** 501.  
**Edgar Richards,** 161.
- Official Method:** Tannin analysis; Behaviour of sodium sulphocinate in the — of. U. J. Thuan and L. Favre, 451.
- Oil Content:** Cottonseed; Quantitative variation of Gossypol and its relation to the — of. E. W. Schwartze and C. L. Alsberg, 47.
- Oil:** *Cyperus esculentus*; — of. J. Pieraerts, 188.
- Oil:** Excessive —; Fish meal with (Legal Notes), 382.
- Oil:** Fish meal with excessive — and deficient phosphate (Legal Notes), 228.
- Oil:** Kauri copal; — from. A. G. Hill and D. Nishida, 107.
- Oil of Orris:** —; Fixed. P. Langlais and J. Goby, 542.
- Oil of Turpentine:** Petroleum spirit and —; Estimation of benzene in. J. Pritzker and R. Jungkunz, 450.
- Oil:** Paraffin wax; Refraction method for estimating. R. E. Wilson and R. E. Wilkin, 148.
- Oils and Fats:** Alcoholysis and the composition of —. G. D. Elsdon, 423.
- Oils and Fats:** Iodine value of — by means of pyridine sulphate-bromide; Estimation of the. K. W. Rosenmund and W. Kuhnhehn, 105.
- Oils:** Butter fat; The Effect of giving certain — in the daily diet of cows on the composition of. H. J. Channon, J. C. Drummond and J. Golding, 311.
- Oils:** Catalysts with non-drying —; Action of. A. G. Hill, 149.
- Oils:** Chaulmoogra group; Comparative analytical study of various — in the. G. A. Perkins, 236.
- Oils:** Hydrogenated —; The recognition of. K. A. Williams and E. R. Bolton, 460.
- Oleum:** Fuming liquids; Apparatus for the analysis of — and other. E. Bosshard, 301.
- Olive:** Oil (Notes). F. F. Shelley, 335.
- Opium:** Paregoric without — (Legal Notes), 583.
- Optical Activity:** Sucrose produced by heating; Changes in the — of. M. A. Rakusin and A. N. Nesmejanow, 591.
- Ores:** Cadmium in spelter and zinc —; Effect of. C. E. Barrs; 248.
- Ores:** Sulphur and Moisture in Pyrites —; Methods for the Determination of. As approved by the Swedish Government Testing Institute and by the Norwegian Government Analysis Committee, 528.
- Ores:** Titanous chloride; Volumetric assay of iron — by menas of. I. Brandt, 352.
- Ores:** Tungsten in low-grade —; Estimation of. E. Jünger, 298.
- Ores:** Zinc —; Analysis of. Use of powdered magnesium for the removal of copper and lead. E. G. R. Ardagh and G. R. Bongard, 249.
- Organic Analysis: Abstracts:** 1924: 46, 104, 148, 194, 244, 295, 349, 395, 447, 493, 540, 600.
- Organic Analysis:** Volumetric method; — by a. J. Lindner, 600.
- Organic Compounds:** Fluorine in —; Estimation of. J. Piccard and C. Buffat, 104.
- Organic Compounds:** Halogen in —; Detection of. J. Piccard and F. De Montmollin, 104.
- Organic Dyes:** Anti-ferments; Efficiency of some — as. E. H. Harvey, 488.
- Organic Liquids:** Pumice stone during the dehydration of —; Behaviour of. A. Seidenberg, 51.
- Organic Phosphorus:** —; Estimation of. E. J. Baumann, 349.
- Organic Products:** Purity of various — by the dichromate method; Evaluation of. E. C. Grey, 194.
- Organic Substances:** Catalysts; Sulpho-chromic oxidation of — and coals in presence of. D. Florentin, 244.
- Organic Substances:** Combustion in an open tube; Method of analysis of volatile — by. E. Carriere and C. Lechhardt, 601.
- Organic Substances:** Phosphorus in —; Estimation of. J. Garola, 46.
- Organism:** Heavy metals in the — (mercury, bismuth and lead); Circulation of some. S. Lomholt, 599.
- Organism:** Lead in the living —; Distribution of. I. A. Christiansen, G. Hevesy and S. Lomholt, 490.
- Organism:** Morphine in the —; Fate of. R. Fabre, 539.
- Orris:** Oil of —; Fixed. P. Langlais and J. Goby, 542.
- Osazones:** —; Iodimetric estimation of. D. R. Nanji, 194.
- Osmium Tetroxide:** Gold-beaters' skin test for tannins; — as a reagent for the (Notes). P. H. Price, 336.
- Osmium Tetroxide:** Tannins and their derivatives; — as a reagent for the estimation of. C. A. Mitchell, 162.
- Oxalic Acid:** Standard substance for titrations; — as a. W. D. Treadwell and H. Johner, 349.
- Oxidase Preparations:** Guaiacol for measuring the activity of —; Use of. P. Fleury, 347.
- Oxidation:** Acetic acid by different metallic chromates; — of. L. J. Simon, 396.
- Oxidation:** Arsenious acid in alkaline solution by permanganate; — of. F. Feigl and F. Weiner, 495.

- Oxidation Potential:** Benzidine as an analytical reagent and an indicator for a definite —. I. M. Kolthoff, 493.
- Oxidising Enzymes:** Higher and lower plants; Comparison of certain — of the. M. E. Robinson, 596.
- Oxidising Enzymes:** —. VII. The oxygenase of the higher plants. M. W. Onslow, 597.
- Oxygen:** Iron salts; Estimation of dissolved — in the presence of. A. M. Buswell and W. U. Gallager, 45.
- Oxygen Supply:** Metabolism of *Bacillus Coli Communis*; Effect of — on the. M. Stephenson and M. D. Whetham, 598.
- Oxygenase:** Oxidising enzymes. VII. The — of the higher plants. M. W. Onslow, 597.
- Oyster Beds:** Ministry of Agriculture and Fisheries. Investigations into the Causes of the Unusual Mortality in English — in 1920 and 1921, 484.
- P**
- pH Value:** Apparent dissociation constants of indicators; Spectrophotometric determination of — and the. W. C. Holmes, 253.
- pH Value:** Tungstic acid precipitation of protein; The relation of — to. A. T. Merrill, 443.
- Paints:** Heterogeneous systems such as —; Measurement of the viscosity of. H. Wolff, 547.
- Paints:** White pigments and inert bodies as they occur mixed in —; Microchemistry of. H. Green, 451.
- Palm-kernel Oil:** Glycerides of —. A. Bömer and K. Schneider, 283.
- Pancreas:** Aqueous extracts of —. II. New facts. H. A. Piper, R. S. Allen and J. R. Murlin, 96.
- Pancreas:** Aqueous extracts of —. III. Precipitation reactions. C. P. Kimball and J. R. Murlin, 96.
- Pancreas:** Available insulin in the — of domestic animals; Amount of. F. Fenger and R. S. Wilson, 240.
- Paper Pulp:** Analytical filtrations; Use of — in. E. Wilke-Dörfurt and E. Locher, 546.
- Paraffin Oil:** Pharmaceutical preparations, Estimation of — in. J. Weichherz and Z. Klinger, 189.
- Paraffin Wax:** Oil in —; Refraction method for estimating. R. E. Wilson and R. E. Wilkin, 148.
- Paraffin Wax:** Solidification of —; Determination of the rate of. K. Fricke, 546.
- Parchments:** Fire; Notes on the treatment of — damaged by (Notes). C. G. Matthews, 516.
- Paregoric:** Opium; — without (Legal Notes), 583.
- Pastes:** Egg solids in alimentary — (Noodles); Estimation of. R. Buchanan, 436.
- Pastes:** Meat —, etc.; Hydrogen electrode for use with (Notes). G. W. Monier-Williams, 224.
- Pathogenic Bacteria:** Fruits and Philippine foods eaten raw; Viability of intestinal — in. A. Vasquez-Colet, 241.
- Peach:** Non-Volatile acids of the —. E. K. Nelson, 592.
- Pearls:** Natural and culture —; Differentiation of. A. Dauvillier, 607.
- Pecan Oil:** —; Constituents of. P. D. Boone, 142.
- Peel:** Constituents of lemon —; Protopectin and some other. R. Sucharipa, 141.
- Pemberton-Neumann Method:** Phosphorus; The — for the estimation of. M. B. Richards and W. Godden, 565.
- Pentosans:** Pentoses and —; Estimation of. I. The formation and distillation of furfuraldehyde. N. C. Pervier and R. A. Gortner, 47.
- Pentosans:** Pentoses and —; Estimation of. II. Estimation of furfuraldehyde. N. C. Pervier and R. A. Gortner, 106.
- Pentoses:** *Bacillus Granulobacter Pectinovorum*; Fermentation of — by. W. H. Peterson, E. B. Fred and E. G. Schmidt, 489.
- Pentoses:** Pentosans; Estimation of — and. II. Estimation of furfuraldehyde. N. C. Pervier and R. A. Gortner, 106.
- Pentoses:** — and pentosans; Estimation of. I. The formation and distillation of furfuraldehydes. N. C. Pervier and R. A. Gortner, 47.
- Pepper:** Poisoning due to cayenne — containing lead; Outbreak of. M. Nicoloff, 394.
- Peppermint Oil:** Essential oils in certain flavouring extracts and of camphor or — in certain pharmaceutical preparations; Estimation of. W. W. Randall, 440.
- Perchlorate Method:** Potassium in soils; The — for the estimation of. H. J. Page, 192.
- Perchlorate:** Microchemical estimation of —. A. Pamfilov and W. Jofinow, 497.
- Permanganate:** Antimony by means of —; Volumetric estimation of. O. Collenberg and G. Bakke, 152.
- Permanganate:** Arsenious acid in alkaline solution by —; Oxidation of. F. Feigl and F. Weiner, 495.
- Permanganate, Iodine, Bromate, and Iodate Methods:** Hydrazine by the —; Volumetric estimation of. I. M. Kolthoff, 605.
- Permeability:** Colloidion membranes of high —. J. M. Nelson and D. P. Morgan, junr., 201.
- Permutit:** Ammonia in urine; Application of — to the separation and estimation of. A. Kolb, 488.
- Peroxide:** Ether; Estimation of — in. A. W. Rowe and E. P. Phelps, 593.
- Perry:** Fruit wines (cider or —) in ordinary wine; Detection of. F. Schaffer, 235.
- Perspiration:** Chrome upper leather; Effect of — on. R. F. Innes, 48.
- Persulphate:** Manganese by means of — and silver nitrate; Estimation of. K. Swoboda, 403.
- Petroleum:** Lubricant and asphaltic hydrocarbons in —. C. F. Mabery, 106.

- Petroleum Spirit:** Benzene in — and oil of turpentine; Estimation of. J. Pritzker and R. Jungkunz, 450.
- Pharmaceutical and Bacteriological Gelatins:** —; Analysis of. E. Cattelain, 391.
- Pharmaceutical Preparations:** Camphor or peppermint oil in certain —; Estimation of essential oils in certain flavouring extracts and of. W. W. Randall, 440.
- Pharmaceutical Preparations:** Paraffin oil in —; Estimation of. J. Weichherz and Z. Klinger, 189.
- Pharmacology:** Gossypol; — of. E. W. Schwartz and C. L. Alsberg, 540.
- Phenoldisulphonic Acid Method:** Nitrates in soils by the —; Estimation of. H. J. Harper, 193.
- Phenols:** Blood; Estimation of — in. R. C. Theis and S. R. Benedict, 536.
- Phenols:** Spectroscopic; Identification of — by means of the. S. Palkin and H. Wales, 407.
- Phenolsulphonic Acids:** Methyl esters of —; Action of bromine on. Estimation of sulphur in phenolsulphonic esters and salts. L. J. Simon and M. Frèrejacque, 296.
- Phenolsulphonic Esters and Salts:** Methyl esters of phenolsulphonic acids; Action of bromine on. Estimation of sulphur in —. L. J. Simon and M. Frèrejacque, 296.
- Phenylhydrazine:** Glucose and —; Interaction of. E. Knecht and F. P. Thompson, 150.
- Philippine Foods:** Fruits and — eaten raw; Viability of intestinal pathogenic bacteria in. A. Vasquez-Colet, 241.
- Philippine Lumbang and Pili Nut Oils:** Complete hydrogenation of —; Effect of composition on the. A. P. West and L. Gonzaga, 38.
- Phocœnic Acid:** Marine animal oils. Identity of — with valeric acid. E. André, 533.
- Phocœnic and Valeric Acids:** —; Identity of. E. André, 296.
- Phosgene:** —; Estimation of. H. G. Reeves, 495.
- Phosphate:** Bismuth as —; Separation of. G. Luff, 197.
- Phosphate:** Excessive oil and deficient —; Fish meal with (Legal Notes), 228.
- Phosphate:** Secondary —; Direct estimation of. I. N. Kugelmass and C. Rothwell, 198.
- Phosphine:** Acetylene; The estimation of — in (Notes). T. E. Perks, 32.
- Phosphoric Acid:** Eggs; Acid-soluble — in. L. Pine, 531.
- Phosphoric Acid:** —; Detection of. F. Frey, 353.
- Phosphorous and Hypophosphorous Acids:** —; Iodimetric estimation of. A. Brukl and M. Behr, 406.
- Phosphorus:** Blood; Notes on the estimation of — in. M. Martland and R. Robison, 598.
- Phosphorus:** Molybdenum; Estimation of small amounts of. Application to ammonium phosphomolybdate for the indirect titration of —. A. Vila, 153.
- Phosphorus:** Molybdic method for the estimation of inorganic — in serum; Modification of. S. R. Benedict and R. C. Theis, 537.
- Phosphorus:** Organic —; Estimation of. E. J. Baumann, 349.
- Phosphorus:** Organic substances; Estimation of — in. J. Garola, 46.
- Phosphorus:** Pemberton-Neumann method for the estimation of —; The. M. B. Richards and W. Godden, 565.
- Phosphorus:** Toxicological tests for —; Failure of the. Fr. Bartschat, 293.
- Physical Methods, Apparatus, Etc.:** Abstracts: 1924: 50, 108, 199, 252, 299, 354, 406, 454, 497, 546, 606.
- Physiological Assay:** Insulin preparations; — of. H. Penau and H. Simonnet, 95.
- Phytosterols:** Endosperm of maize; — of the. R. J. Anderson, 399.
- Phytosterols:** Wheat endosperm; The — of. R. J. Anderson and F. P. Nabenhauer, 449.
- Picric Acid:** Insulin from the cod fish. Direct application of — to the islet tissue. H. W. Dudley, 597.
- Picric Acid Method:** Sugars; Modifications of the — for the estimation of. J. J. Willaman and F. R. Davison, 591.
- Pickled Herrings:** Hydrogen peroxide; The bleaching of — with. O. Lüning, 532.
- Picrates:** Creatinine —; Rubidium and caesium. I. Greenwald and J. Gross, 346.
- Picric Acid:** Starch and sugars by the use of —; Estimation of. M. R. Coe and G. L. Bidwell, 234.
- Pigments:** Grape; —; Chemistry of. Anthocyanins in Clinton grapes. R. J. Anderson and F. P. Nabenhauer, 533.
- Pigments:** White — and inert bodies as they occur mixed in paints; Microchemistry of. H. Green, 451.
- Pili and Lumbang Nut Oils:** Complete hydrogenation of Philippine —; Effect of composition on the. A. P. West and L. Gonzaga, 38.
- Pili Nut Oil:** —; Composition of. A. P. West and S. Balce, 38.
- Pills:** Chocolate-coated tablets and —; Chocolate in. E. S. Rose, 485.
- Pinene:** Commercial —; Examination of. A. Gawalowski, 602.
- “Pink”:** Department of Scientific and Industrial Research. Food Investigation Board. Red discoloration (so-called —) on dried salted fish, 86.
- Pipette:** Gas analysis; Absorption — for. S. W. Saunders, 201.
- Plant Fluids:** Chlorides in —; Titration of. J. V. Lawrence and J. A. Harris, 393.
- Plant Tissue:** Nitrogenous constituents of —; Effects of the method of dessication on the. K. P. Link and E. R. Schule, 600.
- Plant Tissues:** Tannin in —; Estimation of. P. Menaul, 193.
- Plants:** Oxidising enzymes of the higher and lower —; Comparison of certain. M. E. Robinson, 596.

- Plants:** Oxidising enzymes. VII. The oxygenase of the higher ——. M. W. Onslow, 597.
- Platinum:** Electrolysis; Substitute for — in. M. Bleses, 154.
- Platinum Metals:** Copper from the —; Separation of. W. H. Swanger and E. Wichers, 545.
- Platinum:** Rhodium from —; Separation of. E. Wichers, 545.
- Platinum:** Sulphides; Precipitation of — and copper as. R. Doht, 402.
- Podophyllin:** —; Note on. D. B. Dott, 144.
- Poisoning:** Acetanilide —; Case of. Estève, 538.
- Poisoning:** Arsenical —; The Swedish Commission on. Petré, 102.
- Poisoning:** Barium sulphate administered for X-Ray examination; — by. E. Dinslage and Ir. Bartschat, 293.
- Poisoning:** Cayenne pepper containing lead; Outbreak of — due to. M. Nicoloff, 394.
- Poisoning:** Fluosilicic acid; Case of — by. Lührig, 538.
- Poisoning:** Mercuric chloride —; A case of. Limit of sensitiveness of the test for mercury in toxicology. A. Sartori, 348.
- Poisoning:** Sodium arsenate; A case of — by. M. Bridel, 101.
- Polarimetric Estimation:** Malic acid; — of. F. Auerbach and D. Kruger, 92.
- Polarimetric Method:** Diastatic power; — for the estimation of. H. C. Gore, 444.
- Polluted Waters:** Artificially —; Effects of storage on. R. C. Frederick, 63.
- Polonium:** Sodium hydroxide solution by various substances; Mechanical separation of — in. J. Escher-Desrivieres, 405.
- Polymer:** Hydrocyanic acid; Toxicity of a — of. C. Bedel, 539.
- Porcelain Crucibles:** Filtrations; Porous — for. G. F. Hüttig and K. Schmitz, 454.
- Pork:** Vitamin A in frozen —; Presence of. A. M. Wright, 98.
- Portsmouth:** Borough of —. Report of the Public Analyst for the Year 1923. R. P. Page, 517.
- Potable Waters:** Urine; The estimation of lead in —, and in. J. C. Thresh, 124.
- Potassium Ferrocyanide:** Fining of wine with —; The. H. Bosselmann, 342.
- Potassium Permanganate:** Iodimetric standard; — as an. J. M. Hendel, 247.
- Potassium:** Reagent for —; New. H. Davies and W. Davies, 154.
- Potassium:** Soils; The perchlorate method for the estimation of — in. H. J. Page, 192.
- Potatoes:** Solanine content of —; The. A. Bömer and H. Mattis, 284.
- Potatoes:** Solanine content of the 1922 crop of —; The. C. Griebel, 486.
- Potatoes:** Solanine; — containing a large amount of. E. Schowalter and W. Hartmann, 394.
- Potentials:** Silver, copper, and bismuth by graduated —; Rapid electro-analytical separation of. A. Lassieur, 297.
- Potted Meats:** Starch in —; Polarimetric estimation of. A. Daring, 389.
- Poultry Excreta:** Uric acid in —; Estimation of. H. E. Woodman, 492.
- Precipitation Reactions:** Pancreas; Aqueous extracts of. III. —. C. P. Kimball and J. R. Murlin, 96.
- Preservation:** Blood for analysis; — of. F. V. Sander, 99.
- Prescriptions:** Cheese; Collection of legislative — concerning, 230.
- Preservatives:** Food; Final Report of the Departmental Committee on the Use of — and Colouring Matters in, 522.
- President:** Retiring —; Annual Address of the. 115.
- Pressure:** Fractional distillation under reduced —; Apparatus for. E. André, 407.
- Printing Ink:** Arsenic in — (Notes). G. D. Elsdon, 336.
- Protein:** PH value to tungstic acid precipitation of —; The relation of. A. T. Merrill, 443.
- Proteins:** Copper salts; Precipitation of lacto — by. A. J. J. Vandeveld, 289.
- Proteins:** Milk-whey; — of. Their separation by the acetone method. M. Piettre, 139.
- Proteins:** Wheat bran; — of. D. B. Jones and C. E. F. Gersdorff, 90.
- Proteolytic Action:** Hydrogen ion concentration; — of *Bacillus Granulobacter Pectinovorum* and its effect on the. W. H. Peterson, E. B. Fred and B. P. Domogalla, 599.
- Protopectin:** Lemon peel; — and some other constituents of. R. Sucharipa, 141.
- Public Analyst and Bacteriologist:** City and County of Kingston-upon-Hull. Report of the — for 1923. A. R. Tankard, 474.
- Public Analyst:** Borough of Portsmouth. Report of the — for the Year 1923. R. P. Page, 517.
- Public Analyst:** City of Birmingham. Report of the — for the Second Quarter, 1924. J. F. Liverseege, 580.
- Public Analyst:** Metropolitan Borough of Hammersmith. Annual Report of the — for 1923. P. A. E. Richards, 428.
- Public Gas Supplies:** Carbon monoxide in —. Report to the Board of Trade, 482.
- Public Health (Condensed Milk) Regulations:** "Equivalent Pints" Declaration; Tables for testing (Notes). R. E. Essery, 178.
- Public Health (Dried Milk) Regulations:** Calculations: —, 1923 (Notes). D. Henville, 472.
- Public Health (Dried Milk) Regulations:** —, 1923. Calculation of "Equivalent Pints" (Notes). E. Hinks, 471.
- Public Health (Milk and Cream) Regulations:** Ministry of Health. Sale of Food and Drugs Acts. —, 1912 and 1917. Circular 462. 89.
- Publications Received:** 1924: 56, 160, 310, 360, 556.
- Pulp:** Analytical filtrations; Use of paper — in. E. Wilke-Dörfurt and E. Locher, 546.
- Pulp:** Lignin in wood —; Quantitative estimation of. H. Wenzl, 543.

- Pumice Stone:** Organic liquids; Behaviour of — during the dehydration of. A. Seidenberg, 51.
- Pure and Applied Chemistry:** International Union of —. Suggested Standards for Hydrochloric Acid, Sodium Chloride and Zinc, 280.
- Pure Products:** Identification of various —; Application of miscibility to the detection of adulteration of cacao butter and to the. H. Rosset, Marange and Vinter, 91.
- Purity:** Various organic products by the dichromate method; Evaluation of — of. E. C. Grey, 194.
- Putrefaction:** Fish; Detection of incipient — in. J. Tillmans and R. Otto, 292.
- Putrefaction:** Viscera; Total reduction of nitrates and chlorates during — of. C. Ghigliotto, 395.
- Pyridine:** Mercury from cadmium by means of —; Separation of. G. Rotter, 401.
- Pyridine Sulphate-Bromide:** Iodine value of oils and fats by means of —; Estimation of the. K. W. Rosenmund and W. Kuhnemann, 105.
- Pyrimidines:** —; Chemistry of the. O. Baudisch, 392.
- Pyrites Ores:** Sulphur and Moisture in —; Methods for the Determination of. As approved by the Swedish Government Testing Institute and by the Norwegian Government Analysis Committee, 528.
- Pyrogallol:** Antimony by means of —; Detection and estimation of. F. Feigl, 402.
- Q**
- Qualitative Tests:** Acetone bodies; — for. E. J. Bigwood and W. S. Ladd, 100.
- Quassine:** Anhydrous —; Commercial. Rengnierz, 487.
- R**
- Radium:** Barium; Separation of — and. V. Chlopine, 49.
- Raffinose:** Sugars; Estimation of — in. Proportion of — in molasses. E. Saillard, 437.
- Rag Flock Act:** Appeal case under the — (Legal Notes), 430.
- Rag Flock Act:** Case (Legal Notes), 338.
- Rancid Fats:** Compounds developed in —. W. C. Powick, 188.
- Rat-Growth Method:** Vitamin B; Investigation and application of the — for studying. H. C. Sherman and A. Spohn, 42.
- Raw Meat:** Sulphites in —; Rate of disappearance of. F. H. Campbell, 532.
- Reaction:** Aldehydes; New — of. R. de Fazi, 601.
- Reaction:** Low temperature tars; New — for. F. Schulz and J. Prunet, 398.
- Reagent:** Aldehydes; Benzidine as a — for. P. N. Van Eck, 105.
- Reagent:** Boric acid estimations; Invert sugar as a — for (Notes). G. Van B. Gilmour, 576.
- Reagent:** Carbon monoxide; New — for. A. Damiens, 298.
- Reagent:** Catechol tans; Nitrosomethylurethane as a — for. W. Vogel and C. Schüller, 400.
- Reagent:** Nitrite and nitrate; The hydrostrychnine — for. I. M. Kolthoff, 546.
- Reagent:** Potassium; New — for. H. Davies and W. Davies, 154.
- Reagent:** Tannins and their derivatives; Osmium tetroxide as a — for the estimation of. C. A. Mitchell, 162.
- Receiving Apparatus:** Distillation at low pressures; — for. W. F. Seyer, 354.
- Red Discoloration:** Department of Scientific and Industrial Research. Food Investigation Board. — (so-called "Pink") on dried salted fish, 86.
- Reducing Agents:** Titanous salts as —. E. Knecht, 494.
- Reducing Sugars:** Cupro-potassium solution; Estimation of — by means of. L. Maquenne, 90.
- Reducing Sugars:** Maltose in presence of other — by means of Barfoed's solution; Estimation of. P. Nottin, 485.
- Reducing Sugars:** Sucrose; Estimation of — and. W. Thomas and R. A. Dutcher, 437.
- Reductase Test:** Colloids on the —; Influence of. A. I. Virtanen, 597.
- Refined Coconut Oil:** Alkali or soap in —; Limits for the detection of traces of. W. L. Brooke, 592.
- Refraction:** Approximate index of — of liquids with a common microscope; Simple method for determining the. C. C. Kiplinger, 354.
- Refraction Method:** Oil in paraffin wax; — for estimating. R. E. Wilson and R. E. Wilkin, 148.
- Regulations:** Calculations; Public Health (Dried Milk) —, 1923 (Notes). D. Henville, 472.
- Regulations:** Methylated-Spirit —; New, 341.
- Regulations:** Public Health (Condensed Milk) —. Tables for testing "Equivalent Pints" Declaration (Notes). R. E. Essery, 178.
- Regulations:** Public Health (Dried Milk) —, 1923. Calculation of "Equivalent Pints" (Notes). E. Hinks, 471.
- Reichert-Meißl Value:** Almond oil and apricot kernel oil; The — of (Notes). G. D. Elsdon and P. Smith, 180.
- Rennet:** Milk; Action of — and of heat on. N. C. Wright, 290.
- Report:** Borough of Portsmouth. — of the Public Analyst for the Year 1923. R. P. Page, 517.
- Report:** Carbon monoxide in Public Gas Supplies. — to the Board of Trade, 482.
- Report:** Chrome-leather analysis. International Commission —. R. F. Innes, 48.
- Report:** City and County of Kingston-upon-Hull. — of the Public Analyst and Bacteriologist for 1923. A. R. Tankard, 474.
- Report:** City of Birmingham. Annual — of the City Analyst for 1923. J. F. Liversidge, 475.

- Report:** City of Birmingham. — of the City Analyst for the Third Quarter, 1923. J. F. Liverseege, 85.
- Report:** City of Birmingham. — of the City Analyst for the Fourth Quarter, 1923. J. F. Liverseege, 181.
- Report:** City of Birmingham. — of the City Analyst for the 1st Quarter, 1924. J. F. Liverseege, 380.
- Report:** City of Birmingham. — of the Public Analyst for the Second Quarter, 1924. J. F. Liverseege, 580.
- Report:** Connecticut Agricultural Experiment Station. Twenty-seventh — on Food Products (1922), 278.
- Report:** County Borough of Salford. Annual — of the Borough Analyst for 1922. G. D. Elsdon, 33.
- Report:** County Borough of Salford. Annual — of the Borough Analyst for 1923. G. D. Elsdon, 518.
- Report:** County of Kent. — of the Agricultural Analyst for the Fourth Quarter, 1923. F. W. F. Arnaud, 182.
- Report:** County of Lancaster. Annual — of the County Analyst for 1923. W. C. Williams, 337.
- Report:** Department of Scientific and Industrial Research. — of the Food Investigation Board for the Year 1922, 137.
- Report:** Dominion Laboratory, New Zealand. Fifty-sixth Annual — of the Dominion Analyst for the Year 1922, 184.
- Report:** Federated Malay States. Annual — of the Chemical Laboratories for 1923. H. Marsden, 584.
- Report:** Fertilisers and Feeding Stuffs Act, 1906; — of the Departmental Committee on the, 383.
- Report:** Fuel Research Board. Physical and Chemical Survey of the National Coal Resources. — on Methods of Analysis of Coal, 36.
- Report:** Government Laboratory; — of the Government Chemist upon the Work of the, 525.
- Report:** Government of Madras. — of the Chemical Examiner for the Year 1923, 431.
- Report:** Meteorological Office. Air Ministry. Advisory Committee on Atmospheric Pollution. — on Observations in the Year Ending March 31st, 1922, 34.
- Report:** Meteorological Office. Air Ministry. Advisory Committee on Atmospheric Pollution. — on Observations in the Year ending March 31st, 1923, 340.
- Report:** Metropolitan Borough of Hammersmith. Annual — of the Public Analyst for 1923. P. A. E. Richards, 428.
- Report:** Ministry of Health. Interim — of the Food Preservatives Committee on the Treatment of Chilled Beef and Other Foods with Formaldehyde, 433.
- Report:** Ministry of Health. — on the composition of commoner British wines and cordials, 387.
- Report:** Preservatives and Colouring Matters in Food; Final — of the Departmental Committee on the Use of, 522.
- Report:** Standardisation of Scientific Glassware; Joint Committee for the. — No. 1. On Units of Volume, 479.
- Report:** The Government Laboratory, Bangkok, Siam. First — from November, 1917, to March 31, 1922, 88.
- Report:** World's Dairy Congress; — on the. J. Golding, 259.
- Resin:** Cotton; Estimation of fat, wax and — in. P. H. Clifford, L. Higginbotham and R. G. Fargher, 350.
- Resins:** Solutions of —, etc.; A simple viscometer for. K. Albert, 252.
- Resorcinol:** Nitroprussides and ammonia; Application of a new reaction of — to the detection of. M. Caseneuve, 195.
- Reviews of Books:**
- Alcoholic:** Fermentation. A. Harden, 158.
- Alkaloide:** Analytische Chemie der —. K. H. Bauer, 110.
- Alkaloids:** Plant —; The. T. A. Henry, 551.
- Allen's:** Commercial Organic Analysis. Vol. I., 155.
- Analysis:** Gravimetric —; Supplementary Notes on. W. Lowson, 458.
- Analytical Chemistry:** —, Vol. II., Quantitative. F. P. Treadwell and W. T. Hall, 608.
- Analytische Chemie:** Alkaloide; — der. K. H. Bauer, 110.
- Applied Chemistry:** Dictionary of —; A. Volume V., Oxygen to Rye. E. Thorpe and Eminent Contributors, 549.
- Applied Chemistry:** Society of Chemical Industry; Reports of the Progress of — Issued by the. Vol. VIII., 359.
- Boiler Chemistry:** Feed Water Supplies; — and. J. H. Paul, 553.
- British Empire:** Mineral Resources, with Special Reference to the —; Monographs on. Vanadium Ores, 412.
- Canned Foods:** Health (Milroy Lectures, 1923); — in Relation to. W. G. Savage, 302.
- Carbohydrates:** Glucosides; The Simple — and the. E. F. Armstrong, 497.
- Cereal Chemistry:** —; Modern. D. W. Kent-Jones, 609.
- Chamber Process:** Sulphuric Acid; The Manufacture of. —. W. Wyld, 611.
- Cheese:** Legislative Prescriptions Concerning —; Collection of. A. J. Swaving, 207.
- Chemical Analysis:** Quantitative —. F. Clowes and J. B. Coleman, 258.
- Chemical Analysis:** Technical Methods of —. Lunge and Keane, 355.
- Chemical:** Encyclopaedia. C. G. Kingzett, 555.
- Chemical Reactions:** Equations; — and their. J. W. D. Hackle, 455.
- Chemical Synonyms:** Trade Names; — and. W. Gardner, 208.
- Chemical Synthesis:** —. Studies in the Investigation of Natural Organic Products. H. Hepworth, 457.

**Reviews of Books—continued:**

- Chemistry:** Analytical —, Vol. II., Quantitative. F. P. Treadwell and W. T. Hall, 608.
- Chemistry:** Cereal —; Modern. D. W. Kent-Jones, 609.
- Chemistry:** Electron in —; The. J. J. Thomson, 202.
- Chemistry:** General —. H. C. Deming, 301.
- Chemistry:** Rubber; The — of. B. D. W. Luff, 159.
- Chemist's Year Book:** —; The, 1924. F. W. Attack, 306.
- Chimie Colloïdale:** Manipulations de —. W. Ostwald, 410.
- Chimie Minérale:** Conférences de —. Métaux. M. Guichard, 255.
- Chocolate Industry:** Cocoa and —; The. A. W. Knapp, 550.
- Clouds:** Smokes; — and. W. E. Gibbs, 410.
- Cocoa:** — and Chocolate Industry; The. A. W. Knapp, 550.
- Complex Compounds:** Inorganic —; The Chemistry of the. An Introduction to Werner's Coordination Theory. R. Schwarz, 552.
- Compounds:** Inorganic Complex —; The Chemistry of the. An Introduction to Werner's Coordination Theory. R. Schwarz, 552.
- Coordination Theory:** Inorganic Complex Compounds; The Chemistry of the. An Introduction to Werner's —. R. Schwarz, 552.
- Dangerous:** Goods. J. Aeby, 457.
- Dictionary:** Applied Chemistry; A — of. Volume V., Oxygen to Rye. E. Thorpe and Eminent Contributors, 549.
- Differentiation:** Tissue Culture "in Vitro"; The Technique of. Tissue Culture in Relation to Growth and —. T. S. P. Strangeways, 614.
- Electron:** Chemistry; The — in. J. J. Thomson, 202.
- Encyclopaedia:** Chemical —. C. T. Kingzett, 555.
- Equations:** Chemical Reactions and their —. J. W. D. Hackle, 455.
- Fats:** —: Natural and Synthetic. W. W. Myddleton and T. H. Barry, 305.
- Fats:** Oils, —, Waxes and Resins. E. R. Bolton and R. G. Pelly, 303.
- Feed Water Supplies:** Boiler Chemistry and —. J. H. Paul, 553.
- Fermentation:** Alcoholic —. A. Harden, 158.
- Food Analysis:** Pharmaceutical and —. A. Thurston, 455.
- Foods:** Health (Milroy Lectures, 1923); Canned — in Relation to. W. G. Savage, 302.
- Glucosides:** Simple Carbohydrates and the —; The. E. F. Armstrong, 497.
- Grassi:** Olii e —. Vegetali, Animali e Minerali. G. Fabris, 499.

**Reviews of Books—continued:**

- Gravimetric Analysis:** Supplementary Notes on —. W. Lowson, 458.
- Growth:** Tissue Culture "in Vitro"; The Technique of. Tissue Culture in Relation to — and Differentiation. T. S. P. Strangeways, 614.
- Health:** Canned Foods in Relation to — (Milroy Lectures, 1923). W. G. Savage, 302.
- Hetero-Atom:** Nitrogen Ring Compounds Containing a Single — (Nitrogen); The Synthesis of. C. Hollins, 613.
- Hydrogen Ions:** Determination of —; The. W. M. Clark, 157.
- Inks:** —: Their Composition and Manufacture. C. A. Mitchell, 498.
- Inorganic and Theoretical Chemistry:** Comprehensive Treatise on —; A. Vol. IV. J. W. Mellor, 254.
- Inorganic Chemistry:** Synthetic —. A. A. Blanchard and J. W. Phelan, 204.
- Inorganic Complex Compounds:** Chemistry of the —; The. An Introduction to Werner's Coordination Theory. R. Schwarz, 552.
- Isotopes:** —; Les. A. Damiens, 407.
- Konduktometrische:** Titrationen. I. M. Kolthoff, 607.
- Laboratory Manual:** Physical Chemistry; — of. A. W. Davidson and H. S. Van Klooster, 53.
- Laboratory Organisation:** Tested Method of —; A. S. Pile and R. G. Johnston, 157.
- Lead:** —: Its Occurrence in Nature, the Modes of its Extraction, its Properties and Uses, with some Account of its Principal Compounds. J. A. Smythe, 256.
- Legislative Prescriptions:** Cheese; Collection of — Concerning. A. J. Swaving, 207.
- Lime:** Magnesia; — and. N. V. S. Knibbs, 612.
- Living Organisms:** Urea; The Chemistry of: The Theory of its Constitution, and of the Origin, and Mode of its Formation in —. E. A. Werner, 112.
- Magnesia:** Lime and —. N. V. S. Knibbs, 612.
- Métaux:** Chimie Minérale; Conférences de —. M. Guichard, 255.
- Micro-Organisms:** Soil; The — of the. Sir J. Russell and Others, 111.
- (Milroy Lectures, 1923):** Canned Foods in Relation to Health —. W. G. Savage, 302.
- Mineral Analysis:** Tested Methods of —. B. T. Kitto, 357.
- Mineral Resources:** British Empire; Monographs on —, with Special Reference to the. Vanadium Ores, 412.
- Natural Organic Products:** Chemical Synthesis. Studies in the Investigation of —. H. Hepworth, 457.
- Nitrates:** Nitric Acid and —; The Manufacture of. A. Cottrell, 55.

**Reviews of Books—continued:**

- Nitric Acid:** — and Nitrates; The Manufacture of. A. Cottrell, 55.
- Nitrogen:** Hetero-atom (—); The Synthesis of — Ring Compounds Containing a Single. C. Hollins, 613.
- Nitrogen Ring Compounds:** Hetero-atom; The Synthesis of — Containing a Single (Nitrogen). C. Hollins, 613.
- Oils:** —, Fats, Waxes and Resins. E. R. Bolton and R. G. Pelly, 303.
- Olii:** — e Grassi. Vegetali, Animali e Minerali. G. Fabris, 499.
- Organic Analysis:** Commercial —; Allen's. Vol. I., 155.
- Organic Products:** Chemical Synthesis. Studies in the Investigation of Natural —. H. Hepworth, 457.
- Organic:** Syntheses. Vol. III. H. T. Clarke, 206.
- Organisation:** Laboratory —; A Tested Method of. S. Pile and R. G. Johnston, 157.
- Perfumes:** Synthetics; — and Synthetics with Especial Reference to. W. A. Poucher, 500.
- Petroleum Technologist's Pocket Book:** Redwood and Eastlake's —, 54.
- Pharmaceutical and Food:** Analysis. A. Thurston, 455.
- Photography:** Scientific Implement; — as a. By Various Contributors, 307.
- Physical Chemistry:** Laboratory Manual of —. A. W. Davidson and H. S. Van Klooster, 53.
- Physiology:** Plant —. V. I. Palladin, 205.
- Plant Alkaloids:** —; The. T. A. Henry, 551.
- Plant:** Physiology. V. I. Palladin, 205.
- Prescriptions:** Cheese; Collection of Legislative — Concerning. A. J. Swaving, 207.
- Proteins:** Vegetable —; The. T. B. Osborne, 359.
- Quantitative:** Chemical Analysis. F. Clowes and J. B. Coleman, 258.
- Reactions:** Equations; Chemical — and their. J. W. D. Hackle, 455.
- Redwood and Eastlake's:** Petroleum Technologist's Pocket Book, 54.
- Reports:** Progress of Applied Chemistry Issued by the Society of Chemical Industry; — of the. Vol. VIII., 359.
- Resins:** Oils, Fats, Waxes, and —. E. R. Bolton and R. G. Pelly, 303.
- Rubber:** Chemistry of —; The. B. D. W. Luff, 159.
- Rubber Chemistry:** Systematic Survey of —; A. C. W. Bedford and H. A. Winkelmann, 207.
- Smokes:** Clouds and —. W. E. Gibbs, 410.
- Society of Chemical Industry:** Progress of Applied Chemistry Issued by the —; Reports of the. Vol. VIII., 359.
- Soil:** Micro-Organisms of the —; The. Sir J. Russell and Others, 111.
- Sulphuric Acid:** Manufacture of —; The Chamber Process. W. Wyld, 611.

**Reviews of Books—continued:**

- Synonyms:** Trade Names; Chemical — and. W. Gardner, 208.
- Syntheses:** Organic —. Vol. III. H. T. Clarke, 206.
- Synthesis:** Chemical —. Studies in the Investigation of Natural Organic Products. H. Hepworth, 457.
- Synthetic:** Organic Chemistry. A. A. Blanchard and J. W. Phelan, 204.
- Synthetics:** Perfumes and — with Especial Reference to —. W. A. Poucher, 500.
- Systematic Survey:** Rubber Chemistry; A — of. C. W. Bedford and H. A. Winkelmann, 207.
- Technical Methods:** Chemical Analysis; — of. Lunge and Keane, 355.
- Tested Methods:** Mineral Analysis; — of. B. T. Kitto, 357.
- Theoretical Chemistry:** Inorganic and —; A Comprehensive Treatise on. Vol. IV. J. W. Mellor, 254.
- Tissue Culture:** "In Vitro"; The Technique of —. — in Relation to Growth and Differentiation. T. S. P. Strangeways, 614.
- Titrationen:** Konduktometrische —. I. M. Kolthoff, 607.
- Trade Names:** Chemical Synonyms and —. W. Gardner, 208.
- Urea:** The Chemistry of —; The Theory of its Constitution, and of the Origin, and Mode of its Formation in Living Organisms. E. A. Werner, 112.
- Vanadium Ores:** Mineral Resources, with Special Reference to the British Empire; Monographs on. —, 412.
- Vegetable Proteins:** —; The. T. B. Osborne, 359.
- Water Supplies:** Feed —; Boiler Chemistry and. J. H. Paul, 553.
- Waxes:** Oils, Fats, — and Resins. E. R. Bolton and R. G. Pelly, 303.
- Werner's Coordination Theory:** Inorganic Complex Compounds; The Chemistry of the. An Introduction to —. R. Schwarz, 552.
- X-Rays:** —. Their Origin, Dosage and Practical Application. W. E. Schall, 357.
- Year Book:** Chemist's —; The, 1924. F. W. Atack, 306.
- Rhamnus Purshiana:** Wood and bark of —; Cascara content of the. R. H. Clark and K. B. Gillie, 441.
- Rhodium:** Platinum; Separation of — from. E. Wichers, 545.
- Rice Husks:** Sharps; — in (Legal Notes), 429.
- Rice:** Wild —; Nutritive properties of. C. Kennedy, 342.
- Ring:** Scheibler's dessicator; A simple non-splash — for use with. S. C. Bradford, 497.
- Routine Examination:** Mojonnier Tester; The — of dairy . . . products with special reference to the. L. H. Lampitt, E. B. Hughes and M. Bogod, 413.
- Rubber Articles:** Analysis of —; Standard methods for the, 351.

- Rubber**: Total sulphur in — (Notes). F. H. Alcock, 579.
- Rubidium Creatinine Picrates**: Caesium and —. I. Greenwald and J. Gross, 346.
- Rutin**: Flowers of elder; — from the. C. E. Sando and J. U. Lloyd, 195.
- Rye and Wheat Flours**: Aqueous extract; Identification of — by means of their. R. Strohecker, 282.
- Rye Flour**: Wheat flour; Estimation of — in. J. König and F. Bartschat, 187.
- S**
- Saccharin**: Vinegar and products containing acetic acid; Detection of — and dulcin in. G. Reif, 92.
- Salad**: Dressing. A. E. Paul, 142.
- Sale of Food and Drugs Acts**: Ministry of Health. —. Public Health (Milk and Cream) Regulations, 1912 and 1917. Circular 462, 89.
- Salford**: County Borough of —. Annual Report of the Borough Analyst for 1922. G. D. Elsdon, 33.
- Salford**: County Borough of —. Annual Report of the Borough Analyst for 1923. G. D. Elsdon, 518.
- Salicylic Acid**: Caffeine and —; Molecular combination of. A. Regenbogen and N. Schoorl, 486.
- Salmon**: Canned —; Composition of. O. E. Shostrum, R. W. Clough and E. D. Clark, 233.
- Salted Fish**: Department of Scientific and Industrial Research. Food Investigation Board. Red discoloration (so-called "Pink") on dried —, 86.
- Salts**: Dissolved oxygen in the presence of iron —; Estimation of. A. M. Buswell and W. U. Gallager, 45.
- Salts**: Lacto-proteins by copper —; Precipitation of. A. J. J. Vandevelde, 289.
- Salts**: Metallic — by fish; Absorption of. A. Thomas, 190.
- Salts**: Mixed — by the freezing point method; Analysis of. H. E. Batsford, 109.
- Salts of Copper**: Toxicity of —. J. Efront, 447.
- Salts**: Reducing agents; Titanous — as. E. Knecht, 494.
- Sand**: Cinnamon; — in (Legal Notes), 228.
- Santonin**: Indian "Artemisia" as a source of —, 39.
- Santonin**: Wormseed; Estimation of — in. O. P. A. Schaap, 345.
- Saponins**: Frothing agents; Evaluation of — as. L. Kofler, 239.
- Scheibler's Dessicator**: Non-splash ring for use with —; A simple. S. C. Bradford, 497.
- Schönbein's Reaction**: Copper; — applied to the micro-detection of. H. Imbert, R. Imbert and P. Pilgrain, 248.
- Scientific Glassware**: Standardisation of —; Joint Committee for the. Report No. 1. On Units of Volume, 479.
- Secondary Phosphate**: —; Direct estimation of. I. N. Kugelmass and C. Rothwell, 198.
- Seeds**: *Ipomoea hederacea* and other species of *Ipomoea*; Histological and chemical examination of the — of. H. L. Kassner, 285.
- Seeds**: Tung oil. Oil from the — of *Aleurites montana*. R. N. Parker, M. G. Rau, W. A. Robertson, and J. L. Simonsen, 399.
- Sensitive Reactions**: Copper; — for (Notes). R. Fleming, 275.
- Sensitive Reagent**: Ferrous salts; 2-4-dinitroso-resorcinol as a — for. M. Goldstück, 544.
- Serum**: Inorganic phosphorus in —; Modification of molybdc method for the estimation of. S. R. Benedict and R. C. Theis, 537.
- Serum**: Lead compounds in blood —; Solubility of various. L. T. Fairhall, 490.
- Sesame Oil**: Chemical composition of —. G. S. Jamieson and W. F. Baughman, 236.
- Sesame Oil**: Baudouin's test for —. C. O. Gravenhorst, 142.
- Shark Meal**: Urea in —; Significance of. D. B. Dill, 540.
- Sharps**: Rice husks in — (Legal Notes), 429.
- Shell Eggs**: Adulteration of — (Legal Notes), 520.
- Ships**: Food material; The hydrocyanic acid fumigation of — and its effect on. P. Buttenberg and H. Weiss, 533.
- Siam**: The Government Laboratory, Bangkok, —. First Report from November, 1917, to March 31, 1922, 88.
- Silicon**: Iron — alloys by their physical properties; Estimation of — in. T. D. Yensen, 300.
- Silver Dichromate**: Coal by — and sulphuric acid; Oxidation of. L. J. Simon, 245.
- Silver Nitrate**: Manganese by means of persulphate; Estimation of. K. Swoboda, 403.
- Silver**: —, copper, and bismuth by graduated Potentials; Rapid electro-analytical separation of. A. Lassieur, 297.
- Simultaneous Estimation**: Two halogens; — of. H. Jahn, 250.
- Soap**: Alkali or — in refined coconut oil; Limits for the detection of traces of. W. L. Brooke, 592.
- Soap**: Anhydrous — in lubricating grease; Estimation of. B. Joachim, 449.
- Soap Powder**: —; Analysis of. F. F. Flanders and A. D. Truitt, 105.
- Society of Public Analysts and other Analytical Chemists**: Proceedings of the: 1924: 1, 57, 113, 161, 209, 259, 311, 361, 413, 459, 501, 557.
- Soda Plumbite Test**: Gasoline; The — of. B. T. Brooks, 397.
- Sodamide**: Dehydrating agent; — as a. Preparation of indol, methyl-indol and its homologues. M. A. Verley, 535.
- Sodium Arsenate**: Poisoning by —; A case of. M. Bridel, 101.
- Sodium Bismuthate Method**: Manganese in water by the —; Estimation of. W. D. Collins and M. D. Foster, 395.

- Sodium Chloride:** International Union of Pure and Applied Chemistry. Suggested Standards for Hydrochloric Acid, — and Zinc, 280.
- Sodium Hydroxide Solution:** Polonium in — by various substances; Mechanical separation of. J. Escher-Desrivieres, 405.
- Sodium Hypobromite:** Ammonia by means of —; The estimation of. M. B. Donald, 375.
- Sodium:** Micro-estimation of —; Volumetric. H. Müller, 107.
- Sodium Peroxide:** —; Analysis of. E. Boss-hard and E. Furrer, 353.
- Sodium Sulphocinate:** Official method of tannin analysis; Behaviour of — in the. U. J. Thuan and L. Favre, 451.
- Sodium Trichloroacetate:** Sugar estimations; Effect of — on. D. Stiven, 283.
- Soil:** Bacteria in —; Determination of the number of. C. L. Whittles, 489.
- Soil-Point Method:** Water-supplying power of a soil in the field; — for directly estimating the. F. Hardy, 102.
- Soil Salts:** Standardisation values of electrodes used in moisture estimations; Effect of movement of — on the. T. Deighton, 103.
- Soil:** Water-supplying power of a — in the field; —-point method for directly estimating the. F. Hardy, 102.
- Soils:** Humic matter in mineral —; Colorimetric estimation of. T. Eden, 491.
- Soils:** Nitrates in — by the phenol-disulphonic acid method; Estimation of. H. J. Harper, 193.
- Soils:** Potassium in —; The perchlorate method for the estimation of. H. J. Page, 192.
- Solanine Content:** Potatoes; The — of. A. Bömer and H. Mattis, 284.
- Solanine Content:** Potatoes; The — of the 1922 crop of. C. Griebel, 486.
- Solanine:** Potatoes containing a large amount of —. E. Schowalter and W. Hartmann, 394.
- Solid and Liquid Fatty Acids:** —; Quantitative separation of. D. Holde, M. Selim and W. Bleyberg, 448.
- Solidification:** Paraffin wax; Determination of the rate of — of. K. Fricke, 546.
- Soluble Aluminium:** Filtered waters; — and the haemotoxyn test in. W. D. Hatfield, 243.
- Solutions:** Emission spectra of —; Colloidal poles for observing the. J. Errara, 606.
- Solutions of Resins, etc.** Simple viscometer for —; A. K. Albert, 252.
- Solutions:** Sugar products; Clarification of — in the analysis of. L. Eynon and J. H. Lane, 90.
- Solvent Recovery:** Extraction and —; Apparatus for. S. A. de Lacy, 220.
- Solvents:** Hanus iodine values of cottonseed and coconut oils; Influence of various — on the. H. J. Bankston and F. C. Vilbrandt, 449.
- South African Oils:** Vitamin A content of —. E. M. Delf, 291.
- Soxhlet's Apparatus:** Flask for use with —; New (Notes). R. C. Frederick, 474.
- Soya Bean Oil:** —; Composition of. E. S. Wallis and G. H. Burrows, 533.
- Specific Test:** Tannins; An apparently — for. A. H. Ware, 467.
- Spectra:** Solutions; Colloidal poles for observing the emission — of. J. Errara, 606.
- Spectrophotometric Determination:** P<sub>H</sub> value and the apparent dissociation constants of indicators; — of. W. C. Holmes, 253.
- Spectroscope:** Phenols by means of the —; Identification of. S. Palkin and H. Wales, 407.
- Spectroscopic Identification:** Mercury; — of. Naoum, 348.
- Spelter:** Cadmium in — and zinc ores; Effect of. C. E. Barrs, 248.
- Spinach:** Iron content of —. A. Lichtin, 390.
- Spinach:** —; Preserved. L. Gobert, 342.
- Spirits:** Dilution; Sale of — with notice of (Legal Notes), 581.
- Spirits:** Dilution; — sold with notice of (Legal Notes), 229.
- Spirits:** Strength of — kept exposed to the air; The rate of loss of (Notes). H. Lowe, 135.
- Spring Water:** Unusual composition; — of (Notes). R. T. Thomson and J. Sorley, 82.
- Standard:** Iodimetric —; Potassium permanganate as an. J. M. Hendel, 247.
- Standard:** Manganese; Estimation of. Manganous oxalate as a —. R. W. Coltman, 404.
- Standard Methods:** Rubber articles; — for the analysis of. 351.
- Standard Substance:** Titrations; Oxalic acid as a — for. W. D. Treadwell and H. Johner, 349.
- Standardisation:** Scientific Glassware; Joint Committee for the — of. Report No. 1. On Units of Volume, 479.
- Standardisation:** Disinfectants; Possible discordant factor in the — of. Walker and Weiss, 41.
- Standardisation:** Plea for —; The. M. S. Salamon, 169.
- Standardisation Values:** Soil salts on the — of electrodes used in moisture estimations; Effect of movement of. T. Deighton, 103.
- Standards:** International Union of Pure and Applied Chemistry. Suggested — for Hydrochloric Acid, Sodium Chloride and Zinc, 280.
- Stannic Sulphide:** Tin precipitated as —; The carrying down of cobalt and nickel by. V. Auger and L. Odinot, 198.
- Starch:** Picric acid; Estimation of — and sugars by the use of. M. R. Coe and G. L. Bidwell, 234.
- Starch:** Potted meats; Polarimetric estimation of — in. A. Doring, 389.
- Starch:** —; Estimation of. W. Thomas, 438.
- Starches:** Wheat —; Viscosimetric study of. O. S. Rask and C. L. Alsberg, 341.
- Stearic Acid Content:** Butter fat; The — of (Notes). C. A. Mitchell, 515.

- Steel:** Vanadium in —; The volumetric estimation of (Notes). A. F. Etheridge, 83.
- Sterilised Milk:** Lactic acid organisms in —; Influence of the bactericidal power of raw milk on. P. Maze, 348.
- Sterols:** Unsaturated from saturated —; Separation of. R. J. Anderson and F. P. Nabenhauer, 543.
- Stirrer:** Laboratory —. C. E. Waters, 355.
- Stock Cultures:** Micro-organisms; Preservation of — of. A. C. Thaysen, 446.
- Strength:** Spirits kept exposed to the air; The rate of loss of — of (Notes). H. Lowe, 135.
- Strychnine Nitrate:** Brucine in —. Reck, 237.
- Substances:** Polonium in sodium hydroxide solution by various —; Mechanical separation of. J. Escher-Desrivières, 405.
- Sucrose:** Heating; Changes in the optical activity of — produced by. M. A. Rakusin and A. N. Nesmejanow, 591.
- Sucrose:** Reducing sugars and —; Estimation of. W. Thomas and R. A. Dutcher, 437.
- Sudan Milk:** Freezing point of —; The. A. F. Joseph and F. J. Martin, 420.
- Suet:** Shredded — (Legal Notes), 183.
- Sugar:** Blood; Estimation of — in the. R. V. Stanford and A. H. M. Wheatley, 291.
- Sugar Estimations:** Sodium trichloroacetate on —; Effect of. D. Stiven, 283.
- Sugar:** Fehling's solution with methylene blue as internal indicator; Estimation of — in urine by means of. J. H. Lane and L. Eynon, 366.
- Sugar Products:** Iodimetric method to the analysis of —; The application of the. C. L. Hinton and T. Macara, 2.
- Sugar Products:** Solutions in the analysis of —; Clarification of. L. Eynon and J. H. Lane, 90.
- Sugar:** Reagent for boric acid estimations; Invert — as a (Notes). G. Van B. Gilmour, 576.
- Sugars:** Cupro-potassium solution; Estimation of reducing — by means of. L. Maquenne, 90.
- Sugars:** Maltose in presence of other reducing — by means of Barfoed's solution; Estimation of. P. Nottin, 485.
- Sugars:** Picric acid method for the estimation of —; Modifications of the. J. J. Willaman and F. R. Davison, 591.
- Sugars:** Raffinose in —; Estimation of. Proportion of raffinose in molasses. E. Saillard, 437.
- Sugars:** Starch and — by the use of picric acid; Estimation of. M. R. Coe and G. L. Bidwell, 234.
- Sugars:** Sucrose; Estimation of reducing — and. W. Thomas and R. A. Dutcher, 437.
- Sugars:** —; Rapid analysis of. Purification and concentration of enzyme solutions. F. W. Reynolds, 188.
- Sulphide:** Zinc as —; Precipitation of. O. Hackl, 352.
- Sulphides:** Platinum and copper as —; Precipitation of. R. Doht, 402.
- Sulphites:** Raw meat; Rate of disappearance of — in. F. H. Campbell, 532.
- Sulpho-Chromic Oxidation:** Organic substances and coals in presence of catalysts; — of. D. Florentin, 244.
- Sulphonitric and Sulphonitrous Acids:** —; Estimation of. A. Glaire, 199.
- Sulphonitric and Sulphonitrous Acids:** —; Estimation of. A. Graire, 108.
- Sulphonitrous and Sulphonitric Acids:** —; Estimation of. A. Glaire, 199.
- Sulphonitrous and Sulphonitric Acids:** —; Estimation of. A. Graire, 108.
- Sulphur:** Alkali and alkaline-earth hydroxides; Reaction of — with. H. V. Tartar and C. Z. Draves, 250.
- Sulphur:** Bromine on methyl esters of phenol-sulphonic acids; Action of. Estimation of — in phenolsulphonic esters and salts. L. J. Simon and M. Frèrejacque, 296.
- Sulphur Compounds:** Dry lime sulphur; Estimation of the — in. C. P. Jones, 45.
- Sulphur:** Coal; Estimation of — in. H. Bahr, 454.
- Sulphur:** Pyrites Ores; Methods for the Determination of — and Moisture in. As approved by the Swedish Government Testing Institute and by the Norwegian Government Analysis Committee, 528.
- Sulphur:** Rubber; Total — in (Notes). F. H. Alcock, 579.
- Sulphur:** — compounds in dry lime —; Estimation of the. C. P. Jones, 45.
- Sulphuric Acid:** Iodate and —; Estimation of glycerol by oxidation with. R. Strebinger and J. Streit, 398.
- Sulphuric Acid:** Silver dichromate and — Oxidation of coal by. L. J. Simon, 245.
- Sunlight:** Vitamins of milk; Influence of diet and — on. E. M. Luce, 595.
- Swedish Commission:** Arsenical poisoning; The — on. Petré, 102.
- Swedish Government Testing Institute:** Sulphur and Moisture in Pyrites Ores; Methods for the Determination of. As approved by the — and by the Norwegian Government Analysis Committee, 528.
- Sweet Birch:** Methyl salicylate glucoside in the bark of the —; True nature of the. M. Bridel, 285.
- Sweet Spirit of Nitre:** Ethyl nitrite; — deficient in (Legal Notes), 277.
- Tables:** Public Health (Condensed Milk) Regulations. — for testing "Equivalent Pints" Declaration (Notes). R. E. Essery, 178.
- Tablets:** Chocolate-coated — and pills; Chocolate in. E. S. Rose, 485.
- Tablets:** Compound castor oil — (Legal Notes), 381.
- Talc:** Dyed —; Dhol mixed with (Notes), A. A. Kloot, 514.
- Tannase:** Hydrolysis of gallotannin by —; The quantitative estimation of the degree of. W. N. Nicholson and D. Rhind, 505.
- Tannin Analysis:** Sodium sulphocinate in the official method of —; Behaviour of. U. J. Thuan and L. Favre, 451.

- Tannin Analysis:** Varying hydrogen ion concentration on —; Effects of. W. R. Atkin, 493.
- Tannin:** Plant tissues; Estimation of — in. P. Menaul, 193.
- Tannin:** Drugs containing —; Identification and classification by chemical methods of. I. Application of the goldbeater's skin test. C. J. Jordan and A. H. Ware, 442.
- Tannin:** Drugs containing —; New classificatory tests for. A. H. Ware, 442.
- Tanning Materials:** Colour measurement of —. T. Blackadder, 51.
- Tannins:** Catechol —; An attempt to extend Mitchell's colorimetric method to the estimation of. P. H. Price, 361.
- Tannins:** Gold-beater's skin test for —; The. P. H. Price, 25.
- Tannins:** Reagent for the estimation of — and their derivatives; Osmium tetroxide as a. C. A. Mitchell, 162.
- Tannins:** Reagent for the gold-beaters' test for —; Osmium tetroxide as a (Notes). P. H. Price, 336.
- Tannins:** Specific test for —; An apparently. A. H. Ware, 467.
- Tans:** Reagent for catechol —; Nitrosomethylurethane as a. W. Vogel and C. Schüller, 400.
- Tar:** Cancer-producing factor in —; On the. E. L. Kennaway, 242.
- Tars:** Low temperature —; New reaction for. F. Schulz and J. Prunet, 398.
- "Tasajo":** —; Composition of. A. Bickel and J. A. Collazo, 187.
- Taste:** Alkyl-chloro-malonamides. The influence of homology on —. A. W. Dox and B. Houston, 345.
- Tea:** Extract from —; Estimation of the. R. E. Andrew, 141.
- Textile Fibres:** Bacterial decay of —. A. C. Thaysen and H. J. Bunker, 292.
- Thiocyanate:** Bromimetric estimation of —. A. Kurtenacker and H. Kubina, 540.
- Thiosinamine:** —; Iodimetric estimation of. Morvillez and R. Meesemaeker, 94.
- Thiosulphate Precipitation:** Copper; The — of. Drawe, 495.
- Thyme Oils:** Thymol and carvacrol in —; Estimation of. C. E. Sage and W. G. Dalton, 602.
- Thymol:** Thyme oils; Estimation of — and carvacrol in. C. E. Sage and W. G. Dalton, 602.
- Tin and Antimony Oxides:** —; Solution of. E. Stelling, 298.
- Tin:** Canned foods; Apparatus for the estimation of — in. E. J. B. Willey, 234.
- Tin:** Cobalt and nickel by — precipitated as stannic sulphide; The carrying down of. V. Auger and L. Odinot, 198.
- Tin:** Copper and — in copper — alloys; The estimation of. A. T. Etheridge, 371.
- Tin:** Lead in the presence of — and antimony; Estimation of. E. Stelling, 453.
- Tin:** —; Volumetric estimation of. J. G. F. Druce, 402.
- Tinted White Wines:** Charcoals used for the decolorisation of —; Evaluation of. X. Rocques, 235.
- Tissue:** Insulin from the cod fish. Direct application of picric acid to the islet —. H. W. Dudley, 597.
- Tissue:** Nitrogenous constituents of plant —; Effects of the method of desiccation on the. K. P. Link and E. R. Schule, 600.
- Tissues:** Beef —; Enzyme actions of. K. G. Falk, H. M. Noyes and K. Sugiura, 238.
- Tissues:** Tannin in plant —; Estimation of. P. Menaul, 193.
- Titanium:** —; Volumetric estimation of. G. E. F. Lundell and H. B. Knowles, 153.
- Titanous Chloride:** Iron ores by means of —; Volumetric assay of. L. Brandt, 352.
- Titanous Salts:** Reducing agents; — as. E. Knecht, 494.
- Titration:** Standard substance for —; Oxalic acid as a. W. D. Treadwell and H. Johner, 349.
- Tobacco:** Quality of —; Chemical factors determining the. V. Graham and R. H. Carr, 247.
- Tobacco:** Smoking —; *Cannabis indica* in. H. Henstock, 40.
- Tomatoes:** Fresh and canned English —; Antiscorbutic value of. E. M. Delf, 594.
- Toxicity:** Arsenobenzenes; Composition and — of the. Estimation of arsenic in these products. M. de Myttenaere, 43.
- Toxicity:** Cottonseed and its gossypol content; — of. E. W. Schwartze and C. L. Alsborg, 540.
- Toxicity:** Hydrocyanic acid; — of a polymer of. C. Bedel, 539.
- Toxicity:** Salts of copper; — of. J. Effront, 447.
- Toxicological and Forensic: Abstracts:** 1924: 43, 101, 192, 243, 293, 348, 394, 447, 490, 538, 599.
- Toxicological Detection:** Nitric acid; — of minute quantities of. C. Ghigliotto, 44.
- Toxicological Tests:** Phosphorus; Failure of the — for. Fr. Bartschat, 293.
- Toxicology:** Mercuric chloride poisoning; A case of. Limit of sensitiveness of the test for mercury in —. A. Sartori, 348.
- Trichloroacetic Acid:** Antipyrine with —; Reaction of. L. Debucquet, 487.
- Trimyristin:** Milk; Separation of — from. M. Piettre and C. Roeland, 437.
- Trypsin:** Leathers; Action of — on various. A. W. Thomas and F. L. Seymour-Jones, 196.
- Tryptophan Content:** Caseinogen; — of. H. Onslow, 289.
- Tung Oil:** Japanese —; Characteristics of. I. Miura, 542.
- Tung Oil:** —. Oil from the seeds of *Aleurites montana*. R. N. Parker, M. G. Rau, W. A. Robertson, and J. L. Simonsen, 399.
- Tungsten:** Low-grade ores; Estimation of — in. E. Jünger, 298.
- Tungstic Acid Precipitation:** Protein; The relation of PH value to — of. A. T. Merrill, 443.

**Turbidity Method:** Binary mixtures; Analysis of. Volumetric ——. C. D. Bogin, 299.

**Turpentine:** Benzene in petroleum spirit and oil of ——. Estimation of. J. Pritzker and R. Jungkunz, 450.

## U

**United States Department of Agriculture:** ——. Food Inspection Decisions 193, 194, 195: 590.

**Units of Volume:** Standardisation of Scientific Glassware; Joint Committee for the. Report No. 1. On ——. 479.

**Urea:** Cyanamide in the form of xanthyl- ——. Gravimetric estimation of. R. Fosse, P. Hagene and R. Dubois, 492.

**Urea:** Shark meal; Significance of ——. in. D. B. Dill, 540.

**Uric Acid:** Poultry excreta; Estimation of ——. in. H. E. Woodman, 492.

**Urine:** Ammonia in ——. Application of Permutit to the separation and estimation of. A. Kolb, 488.

**Urine:** Bile acids in ——. C. L. A. Schmidt and J. A. Merrill, 148.

**Urine:** Ketonic compounds and of  $\beta$ -hydroxybutyric acid in diabetic ——. Estimation of. H. Bierry and L. Moquet, 244.

**Urine:** Lead in potable waters, and in ——. The estimation of. J. C. Thresh, 124.

**Urine:** Lead; Rapid method of testing ——. for. L. T. Fairhall, 490.

**Urine:** Sugar in ——. by means of Fehling's solution with methylene blue as internal indicator; Estimation of. J. H. Lane and L. Eynon, 366.

## V

**Valeric Acid:** Marine animal oils. Identity of phocoenic acid with ——. E. André, 533.

**Valeric and Phocoenic Acids:** ——. Identity of. E. André, 296.

**Valerian Root:** Aromatic drugs; Assay of ——. and certain other. K. Bullock, 443.

**Vanadium:** Steel; The volumetric estimation of ——. in (Notes). A. F. Etheridge, 83.

**Vanilla Extracts:** Lead number of ——. C. A. Clemens, 534.

**Vernine:** Coffee plant; ——. in green leaves and berries of the. T. de A. Camargo, 189.

**Vinegar:** Saccharin and dulcin in ——. and products containing acetic acid; Detection of. G. Reif, 92.

**Viscera:** Putrefaction of ——. Total reduction of nitrates and chlorates during. C. Ghigliotto, 395.

**Viscometer:** Solutions of resins, etc.; A simple ——. for. K. Albert, 252.

**Viscosimetric Study:** Wheat starches; ——. of. O. S. Rask and C. I. Alsberg, 341.

**Viscosity:** Heterogeneous systems such as paints; Measurement of the ——. of. H. Wolff, 547.

**Vitamin A:** Anti-rachitic factor; Differentiation of ——. from the. E. Lesné and M. Vagliano, 99.

**Vitamin A Content:** South African oils; ——. of. E. M. Delf, 291.

**Vitamin A:** Frozen pork; Presence of ——. in. A. M. Wright, 98.

**Vitamin A Potency:** Cod liver oil; Effect of storage of livers on the ——. of. A. D. Holmes, 240.

**Vitamin A Potency:** Hake liver oil; The ——. of. A. D. Holmes, 291.

**Vitamin:** Animals; Yeast growth-promoting ——. tested for its effects on. J. Deas, 596.

**Vitamin B:** Age; Destruction of ——. by. G. M. Findlay, 190.

**Vitamin B:** Heat; Quantitative study of the destruction of ——. by. H. C. Sherman and M. R. Grose, 42.

**Vitamin B:** Rat-growth method for studying ——. Investigation and application of the. H. C. Sherman and A. Spohn, 42.

**Vitamin B:** Two methods for studying ——. H. C. Sherman and H. Edgeworth, 43.

**Vitamin C:** Canned foods; ——. in. W. H. Eddy and E. F. Kohman, 146.

**Vitamin C:** Colour reaction for ——. Alleged. H. D. Kay and S. S. Zilva, 191.

**Vitamin:** Copper in the destruction of anti-scorbutic ——. Catalytic action of. A. F. Hess and N. Weinstock, 535.

**Vitamins:** Fat-soluble ——. XIV. H. Steenbock, E. B. Hart, J. H. Jones, and A. Black, 97.

**Vitamins:** Fat-soluble ——. XV. R. M. Bethke, H. Steenbock and M. T. Nelson, 97.

**Vitamins:** Fat-soluble ——. XVI. H. Steenbock, J. H. Jones and E. B. Hart, 147.

**Vitamins:** Manganese with ——. Association of. J. S. McHargue, 445.

**Vitamins:** Milk; Influence of diet and sunlight on ——. of. E. M. Luce, 595.

**Volatile Organic Substances:** Analysis of ——. by combustion in an open tube; Method of. E. Carriere and C. Leenhardt, 601.

**Volumetric Analysis:** Aldehyde-bisulphite reaction in ——. Application of the. A. Kurtenacker, 405.

**Volumetric Analysis:** Antimony chloride in ——. F. Feigl and O. Schummer, 494.

**Volumetric Glassware:** ——. Tests on. Classes A and B. The National Physical Laboratory, Teddington, Middlesex. Metrology Department. Sept. 1924, 477.

**Volumetric Method:** Ammonium salts; New ——. for estimating. M. V. Auger, 250.

**Volumetric Method:** Organic analysis by a ——. J. Lindner, 600.

## W

**Warranty:** Notification of ——. (Legal Notes), 338.

**Wash-Bottle:** Continuous flow ——. New. A. G. Nasini, 548.

- Water Analysis: Abstracts:** 1924: 45, 104, 243, 395, 491, 539.
- Waterbath:** Constant level in a —; Device for maintaining a. R. Brooks, 548.
- Water:** Dissolved air in small quantities of—; Estimation of. H. G. Becker and W. E. Abbott, 104.
- Water Jacket:** Leak in a —; Device for stopping a (Notes). R. C. Frederick, 135.
- Water:** Lead and copper in —; Colorimetric estimation of. C. Pyriki, 491.
- Water:** Manganese in — by the sodium bis-muthate method; Estimation of. W. D. Collins and M. D. Foster, 395.
- Water:** Mixtures of ether, alcohol and —; Estimation of — in. R. K. Newman, 541.
- Water:** Nitrate in — by the Frerichs' method; Estimation of. A. Massink, 539.
- Water of Constitution:** Hydraulic limes; Estimation of water by hydration, —, and carbon dioxide in. J. A. Muller and E. Peytral, 251.
- Water of Hydration:** Hydraulic limes; Estimation of —, water of constitution, and carbon dioxide in. J. A. Muller and E. Peytral, 251.
- Water Samples:** Anaerobes from —. P. D. Meader and E. A. Bliss, 100.
- Water:** Spring — of unusual composition (Notes). R. T. Thomson and J. Sorley, 82.
- Water-Supplying Power:** Soil in the field; Soil-point method for directly estimating the — of a. F. Hardy, 102.
- Waters:** Haemotoxylin test in filtered —; Soluble aluminium and the. W. D. Hatfield, 243.
- Waters:** Lead in potable —, and in urine; The estimation of. J. C. Thresh, 124.
- Waters:** Storage on artificially polluted —; Effects of. R. C. Frederick, 63.
- Wax:** Cotton; Estimation of fat, — and resin in. P. H. Clifford, L. Higginbotham and R. G. Fargher, 350.
- Whale Oil:** —; Composition of. C. H. Milligan, C. A. Knuth and A. S. Richardson, 149.
- Wheat and Rye Flours:** Aqueous extract; Identification of — by means of their. R. Strohecker, 282.
- Wheat Bran:** Proteins of —. D. B. Jones and C. E. F. Gersdorff, 90.
- Wheat Endosperm:** Phytosterols of —; The R. J. Anderson and F. P. Nabenhauer, 449.
- Wheat Flour:** Rye flour in —; Estimation of. J. König and F. Bartschat, 187.
- Wheat:** Moisture in — and flour; Estimation of. H. Snyder and B. Sullivan, 436.
- Wheat Starches:** Viscosimetric study of —. O. S. Rask and C. L. Alsberg, 341.
- Whey:** Milk- —; Proteins of. Their separation by the acetone method. M. Piettre, 139.
- White Pigments:** Paints; Microchemistry of — and inert bodies as they occur mixed in. H. Green, 451.
- White Wines:** Decolorisation of tinted —; Evaluation of charcoals used for the. X. Rocques, 235.
- Wild Rice:** Nutritive properties of —. C. Kennedy, 342.
- Wine:** Beef and malt —; The composition of. G. D. Elsdon, 210.
- Wine:** Cyanogen in —; Detection and estimation of small quantities of. F. Mach and M. Fischler, 438.
- Wine:** Essential oil of mustard as preservative for —; Use of P. Malvezin and G. Bidart, 140.
- Wine:** Fruit wines (cider or perry) in ordinary —; Detection of. F. Schaffer, 235.
- Wine Industry:** Mustard flour and oil in the —. J. C. Delage, 94.
- Wine:** Potassium ferrocyanide; The fining of — with. H. Bosselmann, 342.
- Wines:** Charcoals used for the decolorisation of tinted white —; Evaluation of. X. Rocques, 235.
- Wines:** Distilled —; Hydrocyanic acid in. O. Reichard, 439.
- Wines:** Ministry of Health. Report on the composition of commoner British — and cordials, 387.
- Wood:** Cellulose in — by the chlorination method; Estimation of. G. J. Ritter and L. C. Fleck, 196.
- Wood:** Chemistry of —. Relation between methoxyl and lignin in —. G. J. Ritter, 106.
- Wood Pulp:** Lignin in —; Quantitative estimation of. H. Wenzl, 543.
- Wood:** *Rhamnus Purshiana*; Cascara content of the — and bark of. R. H. Clark and K. B. Gillie, 441.
- Woods:** Durability and chemical composition of —; Relation between the. L. F. Hawley, L. C. Fleck and C. A. Richards, 450.
- Wool:** Colour reactions of —; Some. Meunier and Rey, 296.
- World's Dairy Congress:** Report on the —. J. Golding, 259.
- Wormseed:** Santonin in —; Estimation of. O. P. A. Schaap, 345.

## X

- X-Ray Examination:** Barium sulphate administered for —; Poisoning by. E. Dinslage and Fr. Bartschat, 293.
- Xanthydrol:** Dulcin by means of —; Estimation of. G. Reif, 396.
- Xanthyl-Urea:** Cyanamide in the form of —; Gravimetric estimation of. R. Fosse, P. Hagene and R. Dubois, 492.

## Y

- Yeast Growth-Promoting Vitamin:** Animals; — tested for its effects on. J. Deas, 596.
- Yeast Nucleic Acid:** Magnesium compound; Preparation of — as a. E. J. Baumann, 536.

**Yttrium:** Gadolinite; Separation of — from the other elements of. L. Rolla, V. Cuttica and L. Fernandes, 604.

### Z

**Zinc:** Beverages and other food with —; Contamination of. J. W. Sale and C. H. Badger, 192.

**Zinc:** Cadmium from —; Separation of. K. Chalpuny and K. Breisch, 401.

**Zinc:** Electrolytic deposition from alkaline solutions; Separation of — by. K. Breisch, 403.

**Zinc:** International Union of Pure and Applied Chemistry. Suggested Standards for Hydrochloric Acid, Sodium Chloride and —, 280.

**Zinc:** Iron and aluminium; Separation of — from. E. G. R. Ardagh and G. R. Bongard, 249.

**Zinc:** Molybdenum as indicator in the volumetric estimation of —; Use of. L. Fernandes, 496.

**Zinc Ores:** —; Analysis of. Use of powdered magnesium for the removal of copper and lead. E. G. R. Ardagh and G. R. Bongard, 249.

**Zinc Ores:** Cadmium in spelter and —; Estimation of. C. E. Barrs, 248.

**Zinc:** Sulphide; Precipitation of — as. O. Hackl, 352.

**Zirconium:** Fluorine; Colour reaction for the detection of — and. J. H. de Boer, 497.
