

Errata in Vol. L.

- P. 174, line 4 from bottom, for "22" read "9."
P. 317, line 1 of the paper, for "1921" read "1923."
P. 323, line 18, for "73" read "373."
P. 404, line 13 from bottom, for "500" read "351."

INDEX TO VOLUME L.

INDEX TO NAMES.

A

- Adam, A. T.** Wire Drawing and the Cold Working of Steel (Review), 644.
- Adams, B. A.** Effect of air pollution on water, 353.
- Adkins, H.** See Bischof, F., and Adkins, H.
- d'Ainville, J. V.** L'Origine Tourbillonnaire de l'Atome et ses Conséquences (Review), 204.
- Alexander, J.** Colloid Chemistry (Review), 259.
- Allaire, H.** See Javillier, M., Allaire, H., and Groc, M.
- Allan, J.** The composition of coconut oil (Notes), 16.
- Allan, J.** See Armstrong, E. F., Allan, J., and Moore, C. W.
- Almy, L. H.** Method for the determination of hydrogen sulphide in proteinaceous food products, 349.
- Amberger, K., and Bauch, J.** The glycerides of cacao butter, 77.
- Ambler, H. R.** On the absorption of carbon monoxide. Part I. A critical comparison of some methods employed in gas analysis. Part II. Advantages of using hot reagent, 167.
- Anderegg, L. T., and Nelson, V. E.** Whole and skimmed milk powders as food. Observations on a new vitamin for reproduction, 351.
- Anderson, A. P., Howard, A., and Simonsen, J. L.** Cause of lathyrism, 576.
- Anderson, E., Sands, L., and Sturgis, N.** Some plant gums of the South Western United States, 635.
- André, E.** Simple and rapid method for the determination of acetyl values of fats, 302.
- André, E., and Guichard, F.** Murumuru, an American palm-kernel fat, 513.
- Armstrong, E. F.** (Committee with, as Chairman and Editor). Chemistry in the Twentieth Century. An Account of the Achievement and the Present State of Knowledge in Chemical Science (Review), 39.
- Armstrong, E. F., and Hilditch, T. P.** Constitution of natural unsaturated fatty acids, Part II. Some acids present in a South Georgian whale oil, 303.
- Armstrong, E. F., Allan, J., and Moore, C. W.** The fatty acid constituents of some natural fats. I. The oils from the coconut, 191.
- Armstrong, E. F., Allan, J., and Moore, C. W.** The fatty acid constituents of some natural fats. II. Palm kernel oil, 244.
- Arnaud, F. W.** County of Kent. Report of the County Analyst for the Fourth quarter, 1924, 287.
- Arnaud, F. W. F.** County of Kent, 400.
- Astruc, A., and Canals, E.** Rotary dialyser, 476.
- Atack, F. W.** The Chemists' Year Book, 1925 (Review), 421.
- Atkinson, H.** The volumetric determination of soluble sulphates by means of barium chloride and potassium stearate, 590.
- Aub, J. C., Reznikoff, P., and Smith, D. E.** Effect of lead on blood cells, 83.
- Austin, P. C.** Lithium arc spectrum for polarimetric use, 476.
- Azadian, A.** Lemon juice, 626.

B

- Bailey, L. H.** "Neutralising value" of monocalcium phosphate in baking powders, 408.
- Bailey, L. H.** See Hertwig, R., and Bailey, L. H.
- Bailey, O.** Determination of adrenaline in suprarenal powders by an application of the Denigès-Grimbert-Leclère reaction, 78.
- Baly, E. C. C.** Spectroscopy. Vol. I. (Review), 157.
- Banham, H. A. L., Haldane, J. S., and Savage, T.** Post-mortem presence of nitric oxide haemoglobin. Its medico-legal significance, 520.
- Bardach, B.** Unusual crystalline forms of calcium oxalate in urine deposits, 468.
- Bardet, J., and Toussaint, C.** Separation of cerium (hafnium) from zirconium, 419.
- Barrows, W. P.** See Jordan, L., and Barrows, W. P.
- Barthe, —.** Identification of egg yolk stains, 522.
- Bartlett, C. L.** See Mills, R. G., Bartlett, C. L., and Kessel, J. F.
- Bassett, H.** The Theory of Quantitative Analysis and its Practical Application (Review), 309.
- Bauch, J.** See Amberger, K., and Bauch, J.
- Baudisch, O., and Welo, L. A.** Ageing of natural mineral waters, 516.
- Baudisch, O.** See Welo, L. A., and Baudisch, O.

- Bayle, E., and Fabre, R.** Fluorescence as a criterion of purity in organic compounds, 256.
- Bayliss, W. M.** The Nature of Enzyme Action. (Monographs on Biochemistry, edited by Dr. R. H. A. Plimmer and Sir F. G. Hopkins), (Review), 479.
- Beale, J. F.** See Thresh, J. C., and Beale, J. F.
- Bell, R. W.** Effect of heat on the solubility of the calcium and phosphorus compounds in milk, 466.
- Benedict, F. G., and Fox, E. L.** The oxy-calorimeter for the determination of the energy values of fuels, foods, etc., 640.
- Benedict, S. R.** Determination of blood sugar, 414.
- Benedict, S. R.** Determination of uric acid in the blood, 415.
- Benesch, E.** Determination of the copper number of cellulose, 149.
- Benesch, E.** Fused bisulphate as a medium for high temperature baths, 419.
- Bennett, H. B.** Modified dichromate method for the determination of glycerol, 33.
- Bernhardt, H.** Determination of minute quantities of lead in organs. Alteration of dilute lead nitrate solutions, 574.
- Bertolo, P.** Detection of *Atractylis gummifera* in liquorice extract, 193.
- Bertolo, P.** Reactions of glycyrrhizin, 514.
- Bertozi, M.** See Bozza, G., and Bertozi, M.
- Bertrand, G.** Determination of manganese in agricultural soils, 85.
- Bertrand, G., and Macheboeuf, M.** Nickel and cobalt in the animal kingdom, 512.
- Bertrand, G., and Mokragnatz, M.** Nickel and cobalt in arable land, 84.
- Bertrand, G., and Mokragnatz, M.** Nickel and cobalt in vegetable products, 348.
- Bezssonoff, N.** The Jendrassik reaction for water-soluble vitamin B., 517.
- Bills, C. E.** Resistance of the antirachitic substance in cod liver oil to reagents, 410.
- Biltz, H.** Analysis of white metal, 473.
- Binder, K.** Potassium tripyrocatechol ferrate as indicator in acidimetry and alkalimetry, 305.
- Birtwell, C., Clibbens, D. A., and Ridge, B. P.** Value and interpretation of tests for oxycellulose and for the oxidising attack of cotton, 150.
- Bischof, F., and Adkins, H.** Organic reactions at the surface of titania. Adsorption of certain gases by titania, 253.
- Black, A.** See Steenbock, H., Nelson, M. T., and Black, A.
- Boedtker, E.** Lecithin in facts, 513.
- Boeseken, J.** The Configuration of the Saccharides (Review), 366.
- Bokorny, T.** Measurement of chemical action in micro-organisms, especially in yeast, 195.
- Bonnet, A.** See Meunier, L., and Bonnet, A.
- Bordas, François-Dainville, and Roussel, —.** Elimination of benzoic acid and benzoates from the system, 567.
- Bornet, L.** Colour reactions of cryogenine with the heavy metals, 34.
- Bornträger, A.** Detection of small quantities of lactic acid in fruit juices, 563.
- Borsook, H., and Wasteneys, H.** Enzymatic synthesis of protein. IV. Effect of concentration on peptic synthesis, 350.
- Borsook, H.** See Wasteneys, H., and Borsook, H.
- Bösche, H.** Detection of traces of manganese in iron alloys, 359.
- Bozza, G., and Bertozi, M.** Peroxidised lead anodes, 154.
- Brand, E.** See Sandberg, M., and Brand, E.
- Brekenfeld, —.** Anaerobic bacteria in meat foods and their connection with gastrointestinal disturbances, 80.
- Bridel, M.** Two new enzymes present in the emulsion of almonds, 628.
- Brinton, P. H. M. P.** See Stoppel, A. E., Sidener, R. M., and Brinton, P. H. M. P.
- Britton, H. T. S.** An electrometric study of the separation of the iodide, bromide, and chloride of silver, 601.
- Brown, R. J.** Effect of some inorganic salts on the polarisation of sugar solutions, 143.
- Browne, C. A.** Spontaneous decomposition of butter fat, 144.
- Bruère, P.** Rapid colorimetric testing of flour, 294.
- Bunbury, H. M.** The Destructive Distillation of Wood (Review), 159.
- Burgess, H. E.** Dyeing property of tomatoes (Notes), 131.
- Butironi, V. C.** Determination of sulphur in mixtures of raw or vulcanised rubber, 87.
- Büttgenbach, E.** Electrolytic determination of Cadmium, 252.

C

- Calcott, W. S., English, F. L., and Wilbur, O. C.** Analysis of acetic anhydride, 634.
- Calderwood, H. N.** Solubility of various wood tars in water, 357.
- Callan, T.** Detection and determination of small amounts of α -naphthol in β -naphthol, 250.
- Canals, E.** See Astruc, A., and Canals, E.
- Candy, H. C. H.** See Luff, A. P., and Candy, H. C. H.
- Canneri, G., and Fernandes, L.** Separation of rare earths from uranium. Alkali uranyl-salicylates, 35.
- Cantoni, O.** Determination of alkalis in silicates, 581.
- Carré, M. H.** Relation of pectose and pectin in apple tissue, 464.
- Carrick, C. W.** See Hauge, S. M., and Carrick, C. W.
- Cattelain, E.** Constitution and chemical properties of the alkaloids of the Calabar Bean, 193.
- Caulkin, H. A.** Bellier's modified test for arachis oil (Notes), 285.
- Cerasoli, E.** Copper sulphates in agriculture, 84.

- Chamberlin, D. S., and Newitt, D. M.** Apparatus for the accurate analysis of small quantities of gas, 475.
- Chapin, R. M.** Test for comparing detergent efficiencies of soaps, 355.
- Chapman, A. C.** Determination of hard and soft resins in hops, 144.
- Chelle, J. L.** Benzoic and salicylic acids in wines, 514.
- Chéramy, P.** See Maheu, J., and Chéramy, P.
- Chertmy, P.** Colorimetric determination of solutions of novocaine, 78.
- Christensen, L. M., and Fulmer, E. I.** Adjustment of P_H of culture media under sterile conditions, 630.
- Christiansen, J. A.** Burette for micro analysis of gas, 153.
- Christie, G. H., and Menzies, R. C.** Application of thallium compounds in organic chemistry: Titrations, 634.
- Clark, E.** Application of sodium hyposulphite (hydrophosphite) in organic analysis, 199.
- Clark, E. D.** See Fellers, C. R., Shostrom, O. E., and Clark, E. D.
- Clark, P. B.** See Dill, B. D., and Clark, P. B.
- Clibbens, D. A.** See Birtwell, C., Clibbens, D. A., and Ridge, B. P.
- Clifford, W. M.** Effect of halogen salts on salivary digestion, 466.
- Conant, J. B., and Fieser, L. F.** Method for determining methaemoglobin in the presence of its cleavage products, 196.
- Cook, D. H.** Temperature coefficients of enzymic activity and heat destruction of pancreatic and malt amylases, 569.
- Cooksey, T.** New South Wales Department of Public Health. Annual Report of the Government Analyst for the Year 1923, 73.
- Cooper, S. R.** See Nichols, M. L., and Cooper, S. R.
- Copeman, S. M.** Water-cress and body metabolism, 568.
- Couch, J. F.** Gramt's test for sparteine, 144.
- Cox, D. C.** Differential electro-titration, 581.
- Cox, H. E.** On certain new methods for the determination of small quantities of arsenic and its occurrence in urine and in flesh, 3.
- Cram, E. B.** See Hall, M. C., and Cram, E. B.
- Cranfield, H. T.** A case of prussic acid poisoning with linseed cake meal (Notes), 18.
- Cranfield, H. T.** See Willcox, J. S., and Cranfield, H. T.
- Cribb, C. H., and Still, A. L.** Zinc in tinned and bottled peas (Notes), 286.
- Cribb, C. H., and Still, A. L.** Zinc in tinned and coppered peas (Notes), 395.
- Croland, J.** Rapid methods for the analysis of paper, 357.
- Cross, R. B.** Ministry of Health. Circular 553. Sale of Foods and Drugs Acts, etc., 25.
- Crowther, E. M., and Martin, W. S.** Volumetric determination of total carbonic acid in dilute solutions of calcium hydrogen carbonate or in hard waters, 32.
- Curie, P.** Determination of radium in minerals containing tantalum, niobium and titanium, 152.
- Curtis, A. L.** Method of testing the "permeability-to-gas" of sands, 638.
- Cushny, A. R.** The Action and Uses in Medicine of Digitalis and its Allies (Review), 533.

D

- Dachnowski, A. P.** Examination of peat by the methods of foodstuffs analysis, 304.
- Daniels, A. L., and Hutton, M. K.** Mineral deficiencies of milk as shown by growth and fertility of white rats, 246.
- Davidsohn, J.** Determination of colophony, 356.
- Dawe, A.** See Simpkins, N., and Dawe, A.
- Deneke, H.** See Krauss, F., and Deneke, H.
- Denigès, G.** Identification of cystine by a colour reaction, 567.
- Denigès, G.** New method for the immediate detection and determination of cobalt by spectroscopy and chromoscopy, 419.
- Denigès, G.** Rapid microchemical identification of novocaine, 193.
- Denigès, G.** The alloxantin reaction for ferric iron, 199.
- Dennis, L. M.** See Johnson, E. B., and Dennis, L. M.
- Desgrez, A., and Vivario, R.** Determination of carbon in organic substances, 249.
- Desvergnès, L.** Detection of amino-nitro-phenols in urine, 197.
- Desvergnès, L.** Detection of organic cyanides in "Alliols," 348.
- Desvergnès, L.** Gravimetric determination of picric acid in a mixture of picric acid and trinitrometacresol, 250.
- Deuss, J. J. B.** Quercitin in tea leaves, 348.
- Dickson, W.** The quantitative determination of cotton, linen and wood fibres in paper pulp, 317.
- Dietzel, R., and Taüfel, K.** Application of ultra-violet spectroscopy to food chemistry, 308.
- Dill, D. B., and Clark, P. B.** Indole content of canned crustacea, 413.
- Ditmar, R.** Viscometry of highly viscous fluids (rubber solutions), 527.
- Domogalla, B. P., Juday, C., and Peterson, W. H.** Forms of nitrogen found in certain lake waters, 301.
- Domogalla, B. P.** See Peterson, W. H., Fred E. B., and Domogalla, B. P.
- Dow, O. D.** See Supplee, G. C., and Dow, O. D.
- Drakeley, T. J., and Nicol, H.** Absorption of oxygen by alkaline pyrogallol solutions, 636.
- Drakeley, T. J., and Nicol, H.** The absorption of oxygen and liberation of carbon monoxide by alkaline pyrogallol solutions, 578.
- Drost, J.** The chlorine-lactose ratio and determination of chlorine in milk, 624.
- Drummond, J. C.** The absorption of copper during the digestion of vegetables artificially coloured with copper salts, 481.

- Dubaquie, J.** Determination of benzoic acid in wine, 295.
Dunnicliff, H. B. The determination of sulphates in guncotton, 543.
Du Vigneaud, V. See Marvel, C. S., and Du Vigneaud, V.

E

- Eckstein, H. C.** Fatty acids in human subcutaneous fat, 517.
Elliott, G. Iron in tragacanth, 192.
Ellison, L. R. See Richmond, H. D., and Ellison, L. R.
Elsdon, G. D. County Borough of Salford. Annual Report of the Borough Analyst for 1924, 607.
Elsdon, G. D. Lemon cheese, 230.
Elsdon, G. D. The composition of lemon cheese (Notes), 499.

INDEX TO SUBJECTS.

A

- Absorbent:** Oxygen in gas analysis; New — for. L. F. Fiesher, 89.
- Absorption Spectra:** Irradiated cholesterol and phytosterol; Antirachitic value of. III. Evidence of chemical change as shown by —. A. F. Hess and M. Weinstock, 411.
- Abstracts of Papers published in other Journals:** 1925: 25, 76, 142, 190, 242, 294, 347, 406, 462, 512, 562, 624.
- Acetaldehyde:** Fruit and other parts of plants; Occurrence of — in the. C. Griebel, 295.
- Acetic Anhydride:** —; Analysis of. W. S. Calcott, F. L. English and O. C. Wilbur, 634.
- Acetone:** Spirits; Detection of — in. I. M. Kolthoff, 464.
- Acetyl Values:** Fats; Simple and rapid method for the determination of — of. E. André, 302.
- Acid or Base:** Standardised —; Buffer mixtures prepared without the use of. I. M. Kolthoff, 251.
- Acidimetric Standard:** *p*-Nitrobenzoic acid as an —; Use of. W. M. Thornton, junr., and D. Getz, 304.
- Acidimetry:** Indicator in — and alkalimetry; Potassium tripyrocatechol ferrate as. K. Binder, 305.
- Acidity:** Oil in olives; — of the. R. Marcille, 27.
- Acidosis:** —; Studies of. XXI. Colorimetric determination of P_H of urine, A. B. Hastings, J. Sendroy, junr. and W. Robson, 628.
- Acids:** Natural unsaturated fatty —; Constitution of, Part II. Some — present in a South Georgian whale oil. E. F. Armstrong and T. P. Hilditch, 303.
- Acids:** Whortleberries and tamarinds; — of. H. Kaiser, 29.
- Act:** Merchandise Marks —; Lysol and the (Legal Notes). 448.
- Act:** Ministry of Health. Milk and Dairies (Consolidation) —, 1915. [5 and 6 Geo. 5. Ch. 66.] Milk and Dairy Orders. 612.
- Acts:** Ministry of Health. Circular 553. Sale of Food and Drugs —, etc. R. B. Cross, 25.
- Acts:** New Zealand Department of Health. Regulations under the Sale of Foods and Drugs —, 1908. 30th June, 1924. 140.
- Address:** Retiring President; Annual — of the. 104.
- Adrenaline:** Denigès-Grimbert-Leclère reaction Determination of — in suprarenal powders by an application of the. O. Bailly, 78.
- Advisory Committee:** Fertilisers and Feeding Stuffs —; Report of the. 557.
- Advisory Committee:** Water; — on. Report on Measures for the Protection of Underground Water. 509.
- Agar-Agar:** Pectin and —; The adulteration of conserves, with special reference to. J. King, 371.
- Ageing:** Natural mineral waters; — of. O. Baudisch and L. A. Welo, 516.
- Aggregates:** Specific gravity of —; Apparatus for determining the. F. H. Tucker, 362.
- Agricultural Analysis: Abstracts:** 1925: 33, 84, 148, 522.
- Agricultural Soils:** Manganese in —; Determination of. G. Bertrand, 85.
- Agriculture:** Copper sulphate in —. E. Cerasoli, 84.
- Agriculture:** United States Department of —. Food Inspection Decisions 196 and 197. 562.
- Air:** Cheese; — made toxic by (Notes). A. J. Parker, 446.
- Air:** Chlorine in —; Continuous conductivity method of measuring small concentrations of. T. B. Hine, 96.
- Air Content:** Butter; — of. O. Rahn and W. Mohr, 294.
- Air Ministry:** Meteorological Office, —. Advisory Committee on Atmospheric Pollution Report on Observations in the Year Ending March 31st, 1924. 452.
- Air Movement:** Detection of —; An apparatus for the (Notes). R. C. Frederick, 399.
- Air Pollution:** Water; Effect of — on. B. A. Adams, 353.
- Air:** Products of combustion of coal gas and in —; The determination of oxides of nitrogen (except nitrous oxide) in small concentration in the. A. G. Francis and A. T. Parsons, 262.
- Albino Rat:** Chlorinated milk on the —; Effect of. J. W. Read, 518.
- Albumin:** Coagulation of —; The. M. A. Rakusin and A. Rosenfeld, 243.
- Alcohol:** Ethyl phthalate in ethyl —; Detection of. J. T. Raleigh and S. U. Marie, 192.
- Alcohol:** Free pentoses in plants; Occurrence of. Effect of extraction of the sugars with ammoniacal —. D. T. Englis and C. Hale, 199.

- Alcohol**: Industrial —; Sources of. 404.
- Alcohol**: Putrefying flesh by means of —; Detection of. Lüttge and Mertz, 190.
- Alcoholic Hydroxyl Group**: Colour reaction of the —. W. Parri, 86.
- Alcoholic Solution**: Lemon oil and sweet orange oil in —; Optical rotations produced by. W. W. Randall, 28.
- Alcohols**: Catalytic dehydrogenation of —; An apparatus for the. S. G. Willimott, 13.
- Aldehyde**: Blood; Nature of the variations of — in. R. Fabre, 147.
- Alfalfa**: Non-volatile organic acids of —. W. A. Turner and M. Hartman, 522.
- Algae**: Fat of — in relation to petroleum; The. J. Marcusson, 416.
- Aliphatic Amines**: Ammonia: New process for separating — from. P. Leone, 358.
- Alkali Metal Perchlorates**: Alkali metals by the use of perchloric acid; Separation and determination of the. II. Precise determination of the insoluble —. G. F. Smith and J. F. Ross, 254.
- Alkali Metals**: Perchloric acid || Separation and determination of the — by the use of. I. Solubilities of the perchlorates of the — in mixed organic solvents. G. F. Smith, 254.
- Alkali Metals**: Perchloric acid; Separation and determination of the — by the use of. II. Precise determination of the insoluble alkali metal perchlorates. G. F. Smith and J. F. Ross, 254.
- Alkali Metals**: Perchloric acid; Separation and determination of the — by the use of. III. Normal butyl alcohol and ethyl acetate as mixed solvents in the separation and determination of potassium, sodium, and lithium. G. F. Smith and J. F. Ross, 307.
- Alkali Uranyl Salicylates**: Rare earths from uranium; Separation of. —. G. Canneri and L. Fernandes, 35.
- Alkalimetry**: Indicator in acidimetry and —; Potassium tripyrocatechol ferrate as. K. Binder, 305.
- Alkaline Pyrogallol Solutions**: Absorption of oxygen and liberation of carbon monoxide by —; The. T. J. Drakeley and H. Nicol, 578.
- Alkaline Pyrogallol Solutions**: Oxygen by —; Absorption of. T. J. Drakeley and H. Nicol, 636.
- Alkalis**: Silicates; Determination of — in. O. Cantoni, 581.
- Alkaloid**: Transvaal 'Homeria pallida'; Poisonous — from the. M. Rindl, 85.
- Alkaloids**: Calabar bean; Constitution and chemical properties of the — of the. E. Cattelain, 193.
- Alkaloids**: Opium —; Picrates of the. C. W. Maplethorpe and N. Evers, 567.
- Alkaloids**: Viscera; The extraction of — from. R. Fabre, 247.
- "Alliols"**: Organic cyanides in —; Detection of. L. Desvergnès, 348.
- Alloxantin Reaction**: Ferric iron; The — for. G. Denigès, 199.
- Alloys**: Manganese in iron —; Detection of traces of. H. Bösche, 359.
- Alloys**: Spelter and —; Determination of cadmium in (Notes). W. R. Schoeller, 18.
- Alloys**: Tin in —; A new method for the separation and determination of. B. S. Evans, 330.
- Alloys**: Zinc in —; Electrolytic determination of. J. W. Springer, 200.
- Almonds**: Emulsin of —; Two new enzymes present in the. M. Bridel, 628.
- Aloes**: Cape —; The active constituents of. H. Kiefer, 566.
- Alumina**: Chrome leather; Determination of — in. D. Woodroffe, 86.
- Aluminium**: Manganese; Gravimetric determination of — and its separation from. B. Solaja, 360.
- Aluminium**: Reagent for —; New. L. P. Hammett and C. T. Sottery, 152.
- American Palm-Kernel Fat**: Murumuru, an —. E. André and F. Guichard, 513.
- Amicroscopic Colloids**: Ultra-centrifuge; Tue. A new instrument for the determination of the size of particles in —. T. Svedberg and H. Rinde, 95.
- Amines**: Ammonia: New process for separating aliphatic — from. P. Leone, 358.
- α -Amino Acids**: Constitution and taste of —; Relation between. A. Heiduschka and E. Komm, 515.
- Amino Acids**: Lake water; Occurrence of — and other organic nitrogen compounds in. W. H. Peterson, E. B. Fred and B. P. Domogalla, 301.
- Amino Acids**: Micro-organisms; Decomposition of proteins and — by. S. A. Waksman and S. Lomanitz, 410.
- Amino Acids**: Optical properties of some —; The. G. L. Keenan, 88.
- Amino-Nitrophenols**: Urine; Detection of — in. L. Desvergnès, 197.
- Ammonia**: Aliphatic amines from —; New process for separating. P. Leone, 358.
- Ammonia and Ammonium Sulphide Group**: metals of the —; Separation of. K. K. Järvinen, 359.
- Ammonia**: Methylamine in presence of excess of —; Detection of. P. A. Valton, 149.
- Ammonia**: Nitrate and — in nitrogenous materials; Determination of. O. M. Shedd, 33.
- Ammoniacal Alcohol**: Free pentoses in plants; Occurrence of. Effect of extraction of the sugars with —. D. T. Englis and C. Hale, 199.
- Ammoniacal Nitrogen**: Soils; Determination of the — in. W. McLean and G. W. Robinson, 33.
- Ammonium Sulphide Group**: Metals of the ammonia and —; Separation of. K. K. Järvinen, 359.
- Amylases**: Enzymic activity and heat destruction of pancreatic and malt —; Temperature coefficients of. D. H. Cook, 569.

- Anaerobic Bacteria:** Gastro-intestinal disturbances; — in meat foods and their connection with. Brekenfeld, 80.
- Anaesthetic Antiseptic:** Butesin picrate, a new type of —. F. K. Thayer, 144.
- Analyst:** County Borough of Bolton. Annual Report of the Public — for 1924. H. Hurst, 501.
- Analytical Standardisation:** British Chemical Standards; Points arising from the — of. C. H. Ridsdale and N. D. Ridsdale, 425.
- Analytical Standardisation:** British Chemical Standards; Points arising from the — of (Notes). C. H. Ridsdale and N. D. Ridsdale, 500.
- Analytical Value:** Melting point of the insoluble volatile acids from fats; The — of the. G. Van B. Gilmour, 119.
- Analytical Work:** Iodine in —; Chloramine as a substitute for. A. Noll, 34.
- Aniline:** Double halogenides with pyridine, antipyrine, pyrazole or —; Identification of metals as. I. M. Kolthoff and H. Hamer, 90.
- Aniline:** Homologues; Titration of — and its D. O. Jones and H. R. Lee, 88.
- Aniline:** Toluidine; Colour test for — and. H. D. Murray, 149.
- Animal Kingdom:** Nickel and cobalt in the —. G. Bertrand and M. Macheboeuf, 512.
- Animals:** Bacilli pathogenic to man; Domesticated — as sources of. W. G. Savage, 572.
- Animals:** Enzyme action; Studies on. XXX. Comparative study of characteristic lipase actions of tissues of different — and of some human tissues. K. G. Falk, J. M. Noyes and K. Sugiura, 194.
- Animals:** Soils, plants, and —; Copper, manganese, zinc, nickel and cobalt as vital factors in. J. S. McHargue, 409.
- Annatto:** Milk; The detection of — in (Notes). A. D. Gardiner, 549.
- Annatto:** Milk; The detection of — in (Notes). H. Lowe, 335.
- Anode:** Rapid electrolysis; Economic — for. A. Lassieur, 96.
- Anodes:** Lead —; Peroxidised. G. Bozza and M. Bertozzi, 154.
- Anthelmintic:** Carbon trichloride as an —. M. C. Hall and E. B. Cram, 628.
- Anthracene:** Höchst test for the determination of —; The. F. H. Rhodes, M. L. Nichols and C. W. Morse, 525.
- Antimony:** —; Electrolytic determination of. A. Schleicher and L. Toussaint, 526.
- Antimony:** Potassium dichromate; Electro-metric titration of — and tin by. M. H. Fleysher, 94.
- Antipyrine:** Double halogenides with pyridine, —, pyrazole or aniline; Identification of metals as. I. M. Kolthoff and H. Hamer, 90.
- Antirachitic Properties:** Ultra-violet irradiation; — imparted to inert fluids and to green vegetables by. A. F. Hess and M. Weinstock, 146.
- Antirachitic Properties:** Ultra-violet irradiation; Further report on imparting — to inert substances by. A. F. Hess and M. Weinstock, 298.
- Antirachitic Substance:** Reagents; Resistance of the — in cod liver oil to. C. E. Bills, 410.
- Antirachitic Value:** Irradiated phytosterol and cholesterol; — of. A. F. Hess, M. Weinstock and F. D. Helman, 299.
- Antirachitic Value:** Irradiated cholesterol and phytosterol; — of. II. Further evidence of change in biological activity. A. F. Hess and M. Weinstock, 412.
- Antirachitic Value:** Irradiated cholesterol and phytosterol; — of. III. Evidence of chemical change as shown by absorption spectra. A. F. Hess and M. Weinstock, 411.
- Antiscorbatic Properties:** Eggs; — of. S. M. Hauge and C. W. Carrick, 411.
- Antiseptic:** Anaesthetic —; Butesin picrate a new type of. F. K. Thayer, 144.
- Antiseptic Effect:** Vapours of vegetable oils, essential oils, their constituents, and similar compounds; Semi-selective — of. O. Schöbl, 467.
- Antiseptic Power:** Chemical constitution and —. T. Sabalitschka, 31.
- Apparatus:** Air movement; An — for the detection of (Notes). R. C. Frederick, 399.
- Apparatus:** Alcohols; An — for the catalytic dehydrogenation of. S. G. Willimott, 13.
- Apparatus:** Continuous extraction —. A. Viehoever, 153.
- Apparatus:** Mercury; New — for distilling. J. Wetzel, 361.
- Apparatus:** Oxygen consumption of tissues; — for measuring the. A. E. Koehler, 300.
- Apparatus:** Small quantities of gas — for the accurate analysis of. D. S. Chamberlin and D. M. Newitt, 475.
- Apparatus:** Sublimation —. A. Gutbier and T. Payer, 38.
- Apparatus:** Viscometric determination of transition points; — for the. N. H. Harts-horne, 38.
- Apple Shipments:** Department of Scientific and Industrial Research. Food Investigation Board. Special Report No. 22. "Brown Heart in Australian —." 188.
- Apple Tissue:** Pectose and pectin in —; Relation of. M. H. Carré, 464.
- Apples:** Cider vinegar from dried —. U.S.A. Supreme Court Decision (Legal Notes). 185.
- Apples:** Department of Scientific and Industrial Research. Food Investigation Board. Special Report No. 21. The "gas" content and ventilation of refrigerated holds carrying —, 187.
- Approximate Determination:** Arichidonic acids; — of. L. G. Wesson, 578.
- Arable Land:** Nickel and cobalt in —. G. Bertrand and M. Mokragatz, 84.
- Arachidonic Acid:** Approximate determination of —. L. G. Wesson, 578.
- Arachis Oil:** Bellier's modified test for — (Notes). F. F. Shelley, 182.

- Arachis Oil:** Bellier's modified test for — (Notes). H. A. Caulkin, 285.
- Arachis Oil:** Bellier's modified test for — (Notes). H. D. Richmond and A. D. Powell, 285.
- Arachis Oil:** Olive oil; The detection of — in (Notes). A. D. Powell, 395.
- Arachis Oil:** Olive oil; The detection of — in (Notes). F. F. Shelley, 498.
- Argon:** Living cells; Presence of — in. A. Pictet, W. Scherrer and L. Helfer, 516.
- Arsenic Content:** Baking powder; The — of. S. Goy and A. Köhler, 197.
- Arsenic:** Germanite; Analysis of (Determination of germanium, —, gallium and molybdenum). F. W. Kriesel, 91.
- Arsenic:** Gutzeit method for the determination of — in body tissues; Electrolytic modifications of the. W. E. Lawson and W. O. Scott, 414.
- Arsenic:** Organic compounds; Determination of — in. G. Newberry, 469.
- Arsenic:** Small quantities of —; On certain new methods for the determination of, and its occurrence in urine and in fish. H. E. Cox, 3.
- Arsenobenzenes:** D. M. Index for —; The value of the. A. Valeur and L. Launoy, 193.
- Artificial Daylight Spectacles:** Laboratory; — for the. H. Weiss, 362.
- Ascarite:** —, a carbon dioxide absorbent, as its own dryer; Test of. F. W. Marsh, 417.
- Asparagus officinalis:** *Veratrum album* L. through confusion with —; Poisoning by. J. Maheu and P. Chéramy, 576.
- Atmospheric Pollution:** —; The Problem of. H. Osborne, 23.
- Atmospheric Pollution:** Meteorological Office, Air Ministry. Advisory Committee on —. Report on Observations in the Year Ending March 31st, 1924. 452.
- Atractylis gummifera:** Liquorice extract; Detection of — in. P. Bertolo, 193.
- Australian Apple Shipments:** Department of Scientific and Industrial Research. Food Investigation Board. Special Report No. 22. "Brown Heart in —." 188.
- Azo-Reaction:** —; New. F. M. Rowe, 249
- B**
- Bacilli:** Sources of — pathogenic to man; Domesticated animals as. W. G. Savage, 572.
- Bacillus:** Haemolytic proteus —; Study of a. B. S. Kline, 571.
- B. pyocyneus:** Red water-soluble pigment characteristic of —; Pyorubin, a. P. D. Meader, G. H. Robinson and V. Leonard, 573.
- Bacon Fat:** Palm kernel meal on the composition of —; The influence of. J. S. Willcox and H. T. Cranfield, 323.
- Bacteria:** Different H-ion concentrations on —; Germicidal action of. S. Sierakowski and F. Milejowska, 195.
- Bacteria:** Fruits and vegetables by — and other particulate matter. Resistance of —, protozoan cysts and helminth ova to common disinfection methods. R. G. Mills, C. L. Bartlett and J. F. Kessel, 571.
- Bacteria:** Mannitol-forming —; Fermentation products of certain. H. R. Stiles, W. H. Peterson and E. B. Fred, 519.
- Bacteria:** Meat foods; Anaerobic — in, and their connection with gastro-intestinal disturbances. Brekenfeld, 80.
- Bacterial Cultures:** Hydrogen sulphide in — and in certain canned foods; Determination of. C. R. Fellers, O. E. Shostrum and E. D. Clark, 81.
- Bacterial Flora:** Preserved eggs; — of. H. Popp, 631.
- Bacterial Flora:** Salt; — of. Rappin and Grosseron, 81.
- Bacterial Flora:** Vitamin B.; Effect of — on biological test for. V. G. Heller, C. H. McElroy and B. Garlock, 570.
- Bactericidal Power:** Chemical structure; — and. F. Ishiwara, 518.
- Bacteriological Cultures:** Silica-gel for —; Rapid method of preparation of. M. Souleyre, 629.
- Baking Powder:** Arsenic content of —; The. S. Goy and A. Köhler, 197.
- Baking Powder:** Fluorine in —; Volatilisation method for the determination of. J. K. * Morton, 29.
- Baking Powders:** Monocalcium phosphate in —; "Neutralising value of. L. H. Bailey, 408.
- Balances:** National Physical Laboratory. Metrology Department. Verification of Weights, Testing of —, Determination of Densities. 291.
- Barium Chloride:** Soluble sulphates by means of — and potassium stearate; The volumetric determination of. H. Atkinson, 590.
- Barks:** Yohimbine in — and galenic preparations of "Yohimbehe"; Determination of. Raymond-Hamet, 409.
- Bases:** Weak —; Qualitative test for. R. Robinson, 304.
- Baths:** Medium for high temperature —; Fused bisulphate as a. E. Benesch, 419.
- Bean:** Alkaloids of the Calabar —; Constitution and chemical properties of the. E. Cattelain, 193.
- Beans:** Soya —; The vitamin content of. C. Hornemann, 298.
- Beeswax:** Victorian —; Constants of. Graph for the investigation of beeswaxes (Notes). A. A. Weir, 445.
- Beeswaxes:** Victorian beeswax; Constants of. Graph for the investigation of — (Notes). A. A. Weir, 445.
- Bellier's Modified Test:** Arachis oil; — for (Notes). F. F. Shelley, 182.
- Bellier's Modified Test:** Arachis oil; — for (Notes). H. A. Caulkin, 285.
- Bellier's Modified Test:** Arachis oil; — for (Notes). H. D. Richmond and A. D. Powell, 285.

- Benzaldehyde:** Chlorine in — and cinnamic aldehyde; Determination of. T. H. Faust and T. Spängler, 636.
- Benzoates:** Benzoic acid and — from the system; Elimination of. Bordas, François-Dainville and Roussel, 567.
- Benzoic Acid:** Cordials, etc.; Colorimetric determination of — in. A. J. Jones, 563.
- Benzoic Acid:** Egg-yolk; Determination of — in. T. Grethe, 242.
- Benzoic Acid:** System; Elimination of — and benzoates from the. Bordas, François-Dainville and Roussel, 567.
- Benzoic Acid:** Wine; Determination of — in. J. Dubaquié, 295.
- Benzoic Acid:** Wines; Determination of — in. 514.
- Benzoic and Salicylic Acids:** Wines; — in, 514.
- Benzoperoxide:** Flour; Delicate test for —; (benzoyl peroxide) in. F. Kirchhof, 406.
- (Benzoyl Peroxide):** Benzoperoxide — in flour; Delicate test for. F. Kirchhof, 406.
- Benzoyl Peroxide:** Flour and dough and their products and in so-called "Improvers"; Detection of — in. S. Rothenfusser, 243.
- Billmann's Quinhydrone Electrode:** P_H value of dairy products by —; Measurement of. V. Lester, 37.
- Bill:** Dangerous Drugs —, 462.
- Biochemical, Bacteriological, etc., Abstracts:** 1925: 31, 78, 145, 194, 245, 297, 349, 409, 466, 515, 567, 627.
- Biological Activity:** Irradiated cholesterol and phytosterol; Antirachitic value of. II. Further evidence of change in —. A. F. Hess and M. Weinstock, 412.
- Biological Determination:** Insulin; — of. F. Wyss, 570.
- Biological Test:** Vitamin B; Effect of bacterial flora on — for. V. G. Heller, C. H. McElroy and B. Garlock, 570.
- Birmingham:** City of —. Annual Report of the City Analyst for 1924. J. F. Liverseege, 337.
- Birmingham:** City of —. City Analyst's Report for the First Quarter, 1925. J. F. Liverseege, 446.
- Birmingham:** City of —. Report of the City Analyst for the Third Quarter, 1924. J. F. Liverseege, 67.
- Birmingham:** City of —. Report of the City Analyst for the Fourth Quarter, 1924. J. F. Liverseege, 184.
- Birmingham:** City of —. Report of the City Analyst for the Second Quarter, 1925. J. F. Liverseege, 502.
- Birmingham:** City of —. Report of the City Analyst for the Third Quarter, 1925. J. F. Liverseege, 605.
- Bismuth:** Lead ores; Determination of — in. V. Hassreidter, 152.
- Bismuth:** Pyrogallol; Determination of — and its separation from lead by. F. Feigl and H. Ordelt, 252.
- Bismuth Subnitrate:** Oxalic acid in qualitative analysis by —; Elimination of. A. Keschan, 579.
- Bismuth Subnitrate:** Phosphoric acid in qualitative analysis by —; Elimination of. A. Keschan, 200.
- Bisulphate:** High temperature baths; Fused — as a medium for. E. Benesch, 419.
- Biuret Reaction:** Glycerol on the —; Interfering effect of. F. B. Seibert and E. R. Long, 470.
- Blackberry:** Non-Volatile acids of the —. E. K. Nelson, 191.
- Blood:** Aldehyde in —; Nature of the variations of. R. Fabre, 147.
- Blood:** Carbon monoxide in —; Normal occurrence of. M. Nicloux, 82.
- Blood Cells:** Lead on —; Effect of. J. C. Aub, P. Reznikoff and D. E. Smith, 83.
- Blood:** Cholesterol in whole — or — serum; Modification of Bloor's method for the determination of. G. E. Sackett, 412.
- Blood Films:** Stain for —; Useful. A. K. Gordon, 148.
- Blood:** Lecithin in —; Determination of. A. Grigaut, 195.
- Blood:** Lipoid phosphorus in — and — plasma; Method for the determination of. J. C. Whitehorn, 82.
- Blood Method:** Carbon monoxide by the —; Determination of. Absorption of the gas by haemoglobin in absence of oxygen. M. Nicloux, 417.
- Blood:** Poisonous gases in —; Detection of. E. Kohn-Abrest, 81.
- Blood Serum:** Bloor's method for the determination of cholesterol in whole blood or —; Modification of. G. E. Sackett, 412.
- Blood Serum:** Haemolysis; Influence of — and of sugars on. W. P. Kennedy, 467.
- Blood:** Sodium benzoate ingestion upon the composition of the — and urine, with especial reference to the possible synthesis of glycine in the body; Effect of. W. W. Swanson, 197.
- Blood Sugar:** —; Determination of. S. R. Benedict, 414.
- Blood Sugar:** Determination of —; Micro method for the. E. Komm, 568.
- Blood:** Uric acid in the —; Determination of. S. R. Benedict, 415.
- Bloor's Method:** Cholesterol in whole blood or blood serum; Modification of — for the determination of. G. E. Sackett, 412.
- Body Metabolism:** Water-cress and —. S. M. Copeman, 568.
- Body:** Possible synthesis of glycine in the —; Effect of sodium benzoate ingestion upon the composition of the blood and urine with especial reference to the. W. W. Swanson, 197.
- Body Tissues:** Arsenic in —; Electrolytic modification of the Gutzeit method for the determination of. W. E. Lawson and W. O. Scott, 414.

- Bolton:** County Borough of ——. Annual Report of the Public Analyst for 1924. H. Hurst, 501.
- Bondon Cheese:** Cream cheese; Sale of — as (Legal Notes). 553.
- Boric Acid Modifications:** Nitrogen; Comparison of the Gunning-Arnold and Winkler — of the Kjeldahl method for the determination of. K. S. Markley and R. M. Hann, 418.
- Boric Acid:** Osmosis; The passage of — through the skin by. L. Kahlenberg, 83.
- Boric Acid:** Shrimps; — in (Legal Notes), 552.
- Borough Analyst:** County Borough of Salford. Annual Report of the — for 1924. G. D. Elsdon, 607.
- Borough Analyst:** Stepney; Metropolitan Borough of. Annual Report of the — for 1924. D. Henville, 447.
- Bottled Peas:** Zinc in tinned and — (Notes). C. H. Cribb and A. L. Still, 286.
- Bovine Lymphatic Glands:** *Linguatula serrota* in —; Occurrence of. A. W. N. Pillers, 573.
- Brandy:** Cherry —; Methylated spirit as (Legal Notes), 70.
- British Chemical Standards:** Analytical standardisation of —; Points arising from the. C. H. Ridsdale and N. D. Ridsdale, 425.
- British Chemical Standards:** Analytical Standardisation of —; Points arising from the (Notes). C. H. Ridsdale and N. D. Ridsdale, 500.
- British:** Engineering Standards, 316.
- Bromide and Chloride of Silver:** Iodide, —; An electrometric study of the separation of the. H. T. S. Britton, 601.
- Bromide:** Chloride, —, or thiocyanate in presence of cyanide; Determination of. E. Schulek, 253.
- Bronzes:** Phosphorus in phosphor —; Determination of. L. Lindemann, 94.
- Brown Heart:** Department of Scientific and Industrial Research. Food Investigation Board. Special Report No. 22. " — in Australian Apple Shipments." 188.
- Buffer Mixtures:** Standardised acid or base; — prepared without the use of. I. M. Kolthoff, 251.
- Burette:** Micro analysis of gas; — for. J. A. Christiansen, 153.
- Butesin Picrate:** Anaesthetic antiseptic; —, a new type of. F. K. Thayer, 144.
- Butter:** Air content of —. O. Rahn and W. Mohr, 294.
- Butter:** Cacao —; The glycerides of. K. Amberger and J. Bauch, 77.
- Butter Fat:** —; Spontaneous decomposition of. C. A. Browne, 144.
- Butter Fat:** Determining —; A new method for. G. Van B. Gilmour, 272.
- Butter Fat:** Margarine; The determination of coconut oil and — in. G. D. Elsdon and P. Smith, 53.
- Butter Fat:** Sulphuric acid reaction of —; The. N. Sjørslev, 145.
- Butter:** Goats' —; The fat of (Notes). F. Knowles and J. C. Urquhart, 180.
- Butter:** Goats' —; The fat of. H. D. Richmond, 62.
- Butter:** Goats' —; The fat of (Notes). H. D. Richmond, 285.
- Butter:** Old —; Analytical notes on two samples of (Notes). F. T. Shutt, 64.
- Butyl Alcohol:** Alkali metals by the use of perchloric acid; Separation and determination of the. III. Normal — and ethyl acetate as mixed solvents in the separation and determination of potassium, sodium, and lithium. G. F. Smith and J. F. Ross, 307.

C

- Cacao Butter:** Glycerides of —; The. K. Amberger and J. Bauch, 77.
- Cacao Products:** Microscopical examination of —. V. A. Pease, 37.
- Cadmium:** Electrolytic determination of —. E. Büttgenbach, 252.
- Cadmium:** Ferrocyanide; Gravimetric determination of — as. G. Luff, 418.
- Cadmium:** Spelter and alloys; Determination of — in (Notes). W. R. Schoeller, 18.
- Cakes:** Sunflower and safflower. Distinctive features of the seeds and —. Vizern and Guillot, 408.
- Calabar Bean:** Alkaloids of the —; Constitution and chemical properties of the. E. Cattelain, 193.
- Calcined:** Magnesia (Legal Notes), 449.
- Calcium and Phosphorus Compounds:** Milk; Effect of heat on the solubility of the — in. R. W. Bell, 466.
- Calcium:** Cows' milk; Direct precipitation of — in. C. S. Rothwell, 562.
- Calcium Hydrogen Carbonate:** Total carbonic acid in dilute solutions of — or in hard waters; Volumetric determination of. E. M. Crowther and W. S. Martin, 32.
- Calcium:** Magnesium; Separation of — and. G. Luff, 252.
- Calcium Oxalate:** Urine deposits; Unusual crystalline forms of — in. B. Bardach, 468.
- Calomel Ointment:** Mercurous chloride; — deficient in (Legal Notes), 611.
- Calorimeter:** Energy values of fuels, foods, etc.; The oxy- — for the determination of the. F. G. Benedict and E. L. Fox, 640.
- Candelilla and other Vegetables Waxes:** —; Analysis of. A. Leys, 355.
- Cane Sugar:** Condensed milk; Determination of — in. K. Scheringa, 625.
- Canned Crustacea:** Indole content of —. D. B. Dill and P. B. Clark, 413.
- Canned Food:** Discoloration of —. A. E. Stevenson, 512.
- Canned Foods:** Hydrogen sulphide in bacterial cultures and in certain —; Determination of. C. R. Fellers, O. E. Shostrum and E. D. Clark, 81.

- Cape Aloes:** Active constituents of —; The. H. Kiefer, 566.
- Carbohydrates:** Glucose and other —; Direct method for the determination of. E. Knecht and E. Hibbert, 27.
- Carbohydrates:** Tannin and —; Nature of the reaction between. Part I. H. B. Stocks and C. V. Greenwood, 564.
- Carbon Dioxide Absorbent:** Ascarite, a —, as its own dryer; Test of. F. W. Marsh, 417.
- Carbon Dioxide:** Carbon monoxide; Determination of — and of. P. Lebeau and P. Marmasse, 472.
- Carbon Error:** Nickel and iron from complex oxalate electrolytes; The — in the quantitative deposition of. P. K. Frölich, 224.
- Carbon Error:** Nickel and iron from complex oxalate electrolytes; The — in the quantitative deposition of. (Notes). P. K. Frölich, 444.
- Carbon Monoxide:** Absorption of —; On the. Part I. A critical comparison of some methods employed in gas analysis. Part II. Advantages of using hot reagent. H. R. Ambler and T. C. Sutton, 167.
- Carbon Monoxide:** Alkaline pyrogallol solutions; The absorption of oxygen and liberation of — by. T. J. Drakeley and H. Nicol, 578.
- Carbon Monoxide:** Blood method; Determination of — by the. Absorption of the gas by haemoglobin in absence of oxygen. M. Nicloux, 417.
- Carbon Monoxide:** Blood; Normal occurrence of — in. M. Nicloux, 82.
- Carbon Monoxide:** Carbon dioxide and of — Determination of. P. Lebeau and P. Marmasse, 472.
- Carbon:** Organic compounds; Rapid method for determining — in. H. D. Wilde, junr., and H. L. Lochte, 198.
- Carbon:** Organic substances; Determination of — in. A. Desgrez and R. Vivario, 249.
- Carbon Residue Test:** Lubricating oils; The — for. W. M. Seaber, 354.
- Carbon Trichloride:** Anthelmintic; — as an. M. C. Hall and E. B. Cram, 628.
- Carbonic Acid:** Dilute solutions of calcium hydrogen carbonate or in hard waters; Volumetric determination of total — in. E. M. Crowther and W. S. Martin, 32.
- Castor Oil:** Free fatty acids in —; The increase of (Notes). W. Partridge, 284.
- Catalytic Dehydrogenation:** Alcohols; An apparatus for the — of. S. G. Willimott, 13.
- Catalytically Active and Inactive Forms:** Ferric oxide; — of. L. A. Welo and O. Baudisch, 569.
- Catechol Derivatives:** Pyrogallol and —; The influence of hydrogen ion concentration on the colorimetric determination of. S. Glasstone, 49.
- Cathode:** Electrolysis with the dropping mercury —; Applications of the method of. J. Heyrovsky, 94.
- Cells:** Argon in living —; Presence of. A. Pictet, W. Scherrer and L. Helfer, 516.
- Cells:** Lead on blood —; Effect of. J. C. Aub, P. Reznikoff and D. E. Smith, 83.
- Cellulose:** Copper number of —; Determination of the. E. Benesch, 149.
- Cellulose Materials:** Copper numbers of —; Determination of the. C. J. Staud and H. L. B. Gray, 471.
- Cellulose:** Wood; Modified method of determining — in. G. J. Ritter, 87.
- Celium:** Zirconium; Separation of — (hafnium) from. J. Bardet and C. Toussaint, 419.
- Cerium:** Potentiometric determination of —. O. Tomiček, 360.
- Cerium:** Reaction of —; Sensitive differential. L. Fernandes, 638.
- Characteristic Reaction:** Luminal (Gardenal); — for. F. Ranwez, 465.
- Charred Documents:** —; The Examination of. C. A. Mitchell, 174.
- Chaulmoogra Oil:** —; Investigation of. T. Hashimoto, 566.
- Cheese:** Air made toxic by — (Notes). A. J. Parker, 446.
- Cheese:** Bondon — as cream —; Sale of (Legal Notes), 553.
- Cheese:** "Cheshire" —; Dutch (Legal Notes), 290.
- Cheese:** "Cream Cheshire —" and "Cream —" (Legal Notes), 402.
- Chemical Action:** micro-organisms, especially in yeast; Measurement of — in. T. Bokorny, 195.
- Chemical Change:** Irradiated cholesterol and phytosterol; Antirachitic value of. III. Evidence of — as shown by absorption spectra. A. F. Hess and M. Weinstock, 411.
- Chemical Constitution:** Antiseptic power; — and. T. Sabalitschka, 31.
- Chemical Examiner:** Government of Madras. Report of the — for the Year 1924, 449.
- Chemical Standards:** Analytical standardisation of British —; Points arising from the. C. H. Ridsdale and N. D. Ridsdale, 425.
- Chemical Standards:** Analytical Standardisation of British —; Points arising from the (Notes). C. H. Ridsdale and N. D. Ridsdale, 500.
- Chemical Structure:** Bactericidal power and —. F. Ishiwaru, 518.
- Cherry Brandy:** Methylated spirit as — (Legal Notes), 70.
- "Cheshire" Cheese:** —; Dutch (Legal Notes), 290.
- Cheshire Cheese:** "Cream Cheese"; "Cream —" and (Legal Notes), 402.
- Chicory:** "French Coffee" with disclosure of — (Legal Notes), 290.
- Chinese Wood Oil:** Oxidation of —. F. H. Rhodes and T. T. Ling, 354.
- Chloramine:** Iodine in analytical work; — as a substitute for. A. Noll, 34.
- Chlorates:** Chloric acid and — by ferrous sulphate; The reduction of. C. O. Harvey, 538.

- Chloric Acid:** Ferrous sulphate; The reduction of — and chlorates by. C. O. Harvey, 538.
- Chloride:** —, bromide or thiocyanate in presence of cyanide; Determination of. E. Schulek, 253.
- Chloride of Silver:** Separation of the iodide, bromide, and —; An electrometric study of the. H. T. S. Britton, 601.
- Chlorinated Milk:** Albino rat; Effect of — on the. J. W. Read, 518.
- Chlorine:** Air; Continuous conductivity method of measuring small concentrations of — in. T. B. Hine, 96.
- Chlorine:** Benzaldehyde and cinnamic aldehyde; Determination of — in. T. H. Faust and T. Spängler, 636.
- Chlorine-Lactose Ratio:** Chlorine in milk; The — and determination of. J. Drost, 624.
- Chlorine:** Milk; The —-lactose ratio and determination of — in. J. Drost, 624.
- Chlorine:** Milk; The Rupp method for the detection of — in. J. T. Keister, 624.
- Chlrodyne:** —; Sale of (Legal Notes), 133.
- Chloroform:** — in — liniment; Determination of. T. M. Willgerodt, 627.
- Chloroform Liniment:** Chloroform in —; Determination of. T. M. Willgerodt, 627.
- Chocolate Eggs:** Mineral matter in — (Legal Notes), 238.
- Cholesterol:** Bloor's method for the determination of — in whole blood or blood serum; Modification of. G. E. Sackett, 412.
- Cholesterol:** Irradiated phytosterol and —; Antirachitic value of. A. F. Hess, M. Weinstock and F. D. Helman, 299.
- Cholesterol:** Irradiated — and phytosterol; Antirachitic value of. II. Further evidence of change in biological activity. A. F. Hess and M. Weinstock, 412.
- Cholesterol:** Irradiated — and phytosterol. III. Evidence of chemical change as shown by absorption spectra. A. F. Hess and M. Weinstock, 411.
- Chrome Leather:** Alumina in —; Determination of. D. Woodroffe, 86.
- Chromoscopy:** Cobalt by spectroscopy and —; New method for the immediate detection and determination of. G. Denigès, 419.
- Cider Vinegar:** Dried apples; — from U.S.A. Supreme Court Decision (Legal Notes), 185.
- Cinchonine:** Cutch and Gambier; — as a tannin precipitant with special reference to the analysis of. D. Hooper, 162.
- Cineol:** Colour test for —. E. J. Schorn, 192.
- Cinnamic Aldehyde:** Benzaldehyde and —; Determination of chlorine in. T. H. Faust and T. Spängler, 636.
- Citric from Tartaric Acid:** —; Differentiation of. W. Parri, 86.
- Citric-Soluble Phosphate:** Fertilisers; — in (Legal Notes), 401.
- Citrus *Vulgaris*:** Oil; Seeds of — as a source of. 462.
- Citrus:** Pectin. H. D. Poore, 347.
- City Analyst:** City of Birmingham. Annual Report of the — for 1924. J.F.Liverseege, 337.
- City Analyst:** City of Birmingham. Report of the — for the Third Quarter, 1924. J. F. Liverseege, 67.
- City Analyst:** City of Birmingham. Report of the — for the Fourth Quarter, 1924. J. F. Liverseege, 184.
- City Analyst:** City of Birmingham. Report of the — for the Second Quarter, 1925. J. F. Liverseege, 502.
- City Analyst:** City of Birmingham. Report of the — for the Third Quarter, 1925. J. F. Liverseege, 605.
- City and County of Kingston-upon-Hull:** —. Annual Report of the Public Analyst and Bacteriologist for 1924. A. R. Tankard, 551.
- City of Birmingham:** —. Annual Report of the City Analyst for 1924. J.F.Liverseege, 337.
- City of Birmingham:** —. City Analyst's Report for the First Quarter, 1925. J. F. Liverseege, 446.
- City of Birmingham:** —. Report of the City Analyst for the Third Quarter, 1924. J. F. Liverseege, 67.
- City of Birmingham:** —. Report of the City Analyst for the Fourth Quarter, 1924. J. F. Liverseege, 184.
- City of Birmingham:** —. Report of the City Analyst for the Second Quarter, 1925. J. F. Liverseege, 502.
- City of Birmingham:** —. Report of the City Analyst for the Third Quarter, 1925. J. F. Liverseege, 605.
- Cleavage Products:** Methaemoglobin in the presence of its —; Method for determining. J. B. Conant and L. F. Fieser, 196.
- Clerget Divisor:** Invert sugar and the —; Specific rotation of. F. W. Zerban, 294.
- Clerget Method:** — (Inversion coefficients). E. Saillard, 513.
- Coagulation:** Albumin; The — of. M. A. Rakusin and A. Rosenfeld, 243.
- Coal Gas:** Oxides of nitrogen (except nitrous oxide) in small concentration in the products of combustion of — and in air; The determination of. A. G. Francis and A. T. Parsons, 262.
- Cobalt:** Animal kingdom; Nickel and — in the. G. Bertrand and M. Macheboeuf, 512.
- Cobalt:** Copper, iron, and —; New qualitative tests for. M. L. Nichols and S. R. Cooper, 358.
- Cobalt:** Nickel; A new colorimetric method for the determination of — in the presence of. B. S. Evans, 389.
- Cobalt:** Nickel and — in arable land. G. Bertrand and M. Mokragatz, 84.
- Cobalt:** Nickel and — in vegetable products. G. Bertrand and M. Mokragatz, 348.
- Cobalt:** Nickel and other salts in neutral solution; Detection of — occurring separately or in presence of. S. J. Jindal, 305.
- Cobalt:** Spectroscopy and chromoscopy; New method for the immediate detection and determination of — by. G. Denigès, 419.
- Cobalt:** Vital factors in soils, plants and animals; Copper, manganese, zinc, nickel and — as. J. S. McHargue, 409.

- Cocaine**: System; Elimination of — from the. M. Walrand, 521.
- Coconut**: Fatty acid constituents of some natural fats; The. I. The oils from the —. E. F. Armstrong, J. Allan and C. W. Moore, 191.
- Coconut Oil**: Composition of —; The (Notes). J. Allan, 16.
- Coconut Oil**: Margarine; The determination of — and butter fat in. G. D. Elsdon and P. Smith, 53.
- Cod Liver Oil**: Antirachitic substance in — to reagents; Resistance of the. C. E. Bills, 410.
- Cod Liver Oils**: Vitamin potency of —. A. D. Holmes, 80.
- Coffee**: Chicory; "French —" with disclosure of (Legal Notes), 290.
- Colloid Membrane Ultra-Filter**: —; A. Physico-chemical analysis of solutions. E. Fouard, 201.
- Colloidal Kaolin**: —; Properties of. W. J. Pope and R. T. M. Haines, 349.
- Colloids**: Ultra-centrifuge; The. A new instrument for the determination of the size of particles in amicroscopic —. T. Svedberg and H. Rinde, 95.
- Colophony**: —; Determination of. J. Davidsohn, 356.
- Colorimetric Methods**: Small amounts of iron by —; The determination of. W. B. Walker, 279.
- Colorimetric Testing**: Flour; Rapid — of. P. Bruère, 294.
- Colour Reaction**: Alcoholic hydroxyl group; — of the. W. Parri, 86.
- Colour Reaction**: Cystine by a —; Identification of. G. Denigès, 567.
- Colour Reaction**: Ergot; — of. W. P. H. van den Driessen Mareeuw, 515.
- Colour Reaction**: Magnesium; Sensitive — for F. L. Hahn, H. Wolf and S. Jager, 35.
- Colour Reactions**: Cryogenine with the heavy metals; — of. L. Bornet, 34.
- Colour Test**: Aniline and toluidine; — for. H. D. Murray, 149.
- Colour Test**: Cineol; — for. E. J. Schorn, 192.
- Colour Test**: Grignard reagent; Quantitative — for the. H. Gilman and F. Schulze, 523.
- Colouring Matters**: Italian Regulations on —. 189.
- Colouring Matters**: Ministry of Health. Use of Preservatives and — in Food, 134.
- Colours**: Vegetable —; Fluorescence of. L. Meunier and A. Bonnet, 641.
- Complex Oxalate Electrolytes**: Quantitative deposition of nickel and iron from —; The carbon error in the. P. K. Frölich, 224.
- Complex Oxalate Electrolytes**: Quantitative deposition of nickel and iron from —; The carbon error in the (Notes). P. K. Frölich, 444.
- Concentration**: Protein; Enzymatic synthesis of. IV. Effect of — on peptic synthesis. H. Borsook and H. Wasteneys, 350.
- Concord Grape**: Strawberry, pineapple, raspberry, and —; Non-Volatile acids of the. E. K. Nelson, 295.
- Condensed and Desiccated Milk**: milk, —; A contribution to the analysis of. H. Hurst, 438.
- Condensed Milk**: Cane sugar in —; Determination of. K. Scheringa, 625.
- Condensed Milk**: Fat in —; Determination of (Notes). J. McCrae, 236.
- Condensed Milk Regulations**: —; Summons under the (Legal Notes), 289.
- Condensed Milk**: Sucrose in —; Polarimetric determination of. G. Jörgensen, 143.
- Condensed Milks**: Fat in —; The determination of (Notes). R. W. Sutton, 17.
- Conductivity Method**: Chlorine in air; Continuous — of measuring small concentrations of. T. B. Hine, 96.
- Conserves**: Pectin and agar-agar; The adulteration of —, with special reference to. J. King, 371.
- Constant-Level Regulating**: Device. R. L. Stehle, 362.
- Continuous Extraction**: Apparatus. A. Viehoever, 153.
- Convention**: Dangerous Drugs —, 188.
- Cooking Utensils**: Ministry of Health. Solubility of Glazes and Enamels Used in —. Reports on Public Health and Medical Subjects. G. W. Monier-Williams, 133.
- Copper**: —, iron, and cobalt; New qualitative tests for. M. L. Nichols and S. R. Cooper, 358.
- Copper**: Iron pyrites; Determination of — in. T. Heczko, 579.
- Copper**: Mercury; Separation of — from. G. Spacu, 580.
- Copper Number**: Cellulose; Determination of the — of. E. Benesch, 149.
- Copper Numbers**: Cellulose materials; Determination of the — of. C. J. Staud and H. L. B. Gray, 471.
- Copper Oxide**: Combustion with —; Gasometric determinations by means of. J. Svěda, 90.
- Copper Pipes**: Water upon —; Action of. J. C. Thresh, 248.
- Copper**: Reducing agent in the determination of iron; — as a. J. M. Hendel, 91.
- Copper Salts**: Vegetables artificially coloured with —; The absorption of copper during the digestion of. J. C. Drummond, 481.
- Copper**: Sensitive tests for —. G. Spacu, 580.
- Copper Sulphate**: Agriculture; — in. E. Cerasoli, 84.
- Copper**: Vegetables artificially coloured with — salts; The absorption of — during the digestion of. J. C. Drummond, 481.
- Copper**: Vital factors in soils, plants and animals; —, manganese, zinc, nickel and cobalt as. J. S. McHargue, 409.
- Copper**: Water on —; Action of. H. Henstock, 352.
- Copper**: Wine; Determination of — and zinc in. C. Von der Heide, 296.

- Cordials:** Benzoic acid in —, etc.; Colorimetric determination of. A. J. Jones, 563.
- Cotton, Linen and Wood Fibres:** paper pulp; The quantitative determination of — in. W. Dickson, 317.
- Cotton Seed Oil Test:** Halphen's — (Notes). F. F. Shelley, 132.
- Cotton:** Tests for oxycellulose and for the oxidising attack of —; Value and interpretation of. C. Birtwell, D. A. Clibbens, and B. P. Ridge, 150.
- County Analyst:** County of Kent. Report of the — for the Fourth Quarter, 1924. F. W. Arnaud, 287.
- County Borough of Salford:** —. Annual Report of the Borough Analyst for 1924. G. D. Elsdon, 607.
- County of Kent:** —. Report of the County Analyst for the Fourth Quarter, 1924. F. W. Arnaud, 287.
- Court:** Expert Witnesses in —; The presence of, 241.
- Cows' Milk:** Calcium in —; Direct precipitation of. C. S. Rothwell, 562.
- Cream Cheese:** Bondon cheese as —; Sale of (Legal Notes), 553.
- Cream Cheese:** "Cream Cheshire cheese" and — (Legal Notes), 402.
- Creatinine:** Jaffe's reaction for —; Chemistry of. II. Effect of substitution in the — molecule and a possible formula for the red tautomeride. I. Greenwald, 350.
- (Cresol Red):** Indicator — by serum in the spectrophotometric determination of the P_H ; The adsorption of. E. F. Hirsch, 256.
- Cresol Red:** Salt error of —. W. D. Ramage and R. C. Miller, 354.
- Critical Tables:** International —; The, 292.
- Crustacea:** Canned —; Indole content of. D. B. Dill and P. B. Clark, 413.
- Cryogenine:** Heavy metals; Colour reactions of — with the. L. Bornet, 34.
- Cryostat:** Temperatures extending to -180°C .; A — for. J. E. Walters and A. G. Loomis, 582.
- Crystalline Digallic Acid:** Precipitant; — as a (Notes). M. Nierenstein, 604.
- Crystalline Forms:** Calcium oxalate in urine deposits; Unusual — of. B. Bardach, 468.
- Crystallised Lecithins:** Natural —; Isolation of. H. H. Escher, 625.
- Crystallose:** *P*-sulphamino-benzoic acid in saccharin and —; Detection and determination of. I. M. Kolthoff, 465.
- Culture Media:** P_H of — under sterile conditions; Adjustment of. L. M. Christensen and E. I. Fulmer, 630.
- Cultures:** Silica-gel for bacteriological —; Rapid method of preparation of. M. Souleyre, 629.
- Cupferron:** Tantalum and niobium by —, and their separation from iron; Precipitation of. H. Pied, 36.
- Custard:** Egg; — without (Legal Notes), 19.
- Cutch:** Cinchonine as a tannin precipitant with special reference to the analysis of — and Gambier. D. Hooper, 162.
- Cyanamide:** —; Determination of. L. A. Pink, 357.
- Cyanide:** Chloride, bromide, or thiocyanate in presence of —; Determination of. E. Schulek, 253.
- Cyanides:** "Alliols"; Detection of organic — in. L. Desvergnès, 348.
- Cystine:** Colour reaction; Identification of — by a. G. Denigès, 567.
- Cysts:** Bacteria and other particulate matter; Penetration of fruits and vegetables by. Resistance of bacteria, protozoan — and helminth ova to common disinfection methods. R. G. Mills, C. L. Bartlett and J. F. Kessel, 571.

D

- D.M. Index:** Arsenobenzenes; The value of the — for. A. Valeur and L. Launoy, 193.
- Dairy:** Food Commissioner; Minnesota State — and. Twentieth Biennial Report, 1924. 511.
- Dairy Products:** P_H value of — by Büllmann's quinhydrone electrode; Measurement of. V. Lester, 37.
- Dangerous Drugs:** Bill. 462.
- Daylight-Spectacles:** — (Notes). H. Weisz, 605.
- Decay:** Wood; The diagnosis of — in. E. E. Hubert, 299.
- Dehydrothio-*p*-Toluidine Sulphonic Acid:** —; Analysis of. H. R. Lee and D. O. Jones, 88.
- Denigès-Grimbert-Leclère Reaction:** Adrenaline in suprarenal powders by an application of the —; Determination of. O. Bailly, 78.
- Densities:** National Physical Laboratory. Metrology Department. Verification of weights Testing of Balances, Determination of —. 291.
- Department of Health:** Government of Palestine. Annual Report of the — for the Year, 1923. 22.
- Department of Health:** New Zealand —. Regulations under the Sale of Foods and Drugs Acts, 1908. 30th June, 1924. 140.
- Department of Public Health:** New South Wales. —. Annual Report of the Government Analyst for the Year 1923. T. Cooksey, 73.
- Department of Scientific and Industrial Research:** —. Food Investigation Board. Special Report No. 21. The "gas" content and ventilation of refrigerated holds carrying apples. 187.
- Department of Scientific and Industrial Research:** —. Food Investigation Board. Special Report No. 22. "Brown Heart in Australian Apple Shipments." 188.
- Department of Scientific and Industrial Research:** —. Report of the Food Investigation Board for the Year 1923. 71.
- Desiccated Milk:** Milk, condensed and —; A contribution to the analysis of. H. Hurst, 438.
- Detergent Efficiencies:** Soaps; Test for comparing — of. R. M. Chapin, 355.

- Device:** Regulating —; Constant-Level. R. L. Stehle, 362.
- Devitrification:** Laboratory silica ware; Elimination of surface — on. F. C. Vilbrandt, 527.
- Dextran:** Wines and its consequences; Presence of — in. A. Vasseur, 296.
- Dextrose and Fructose Ratio:** Honey; The — in. A. Gronover and E. Wohnlich, 191.
- Dialyser:** Rotary —. A. Astruc and E. Canals, 476.
- Diastatic Activity:** Saliva; Influence of different substances on the — of. H. Walker, 466.
- Diastatic Power:** Polarimetric method; Effect of hydrogen ion concentration on the determination of — by the. H. C. Gore, 143.
- Dichromate Method:** Glycerol; Modified — for the determination of. H. B. Bennett, 33.
- Diethylphthalate:** —; Detection of. S. Levinson, 626.
- Diethylphthalate:** Tests for —; Studies of. H. Leffmann and M. Trumper, 626.
- Differential:** Electro-titration. D. C. Cox, 581.
- Differential Reaction:** Cerium; Sensitive — of. L. Fernandes, 638.
- Digallic Acid:** Precipitant; Crystalline — as a (Notes). M. Nierenstein, 604.
- Digestibility:** Proteins and mineral constituents of milk; Influence of Pasteurisation on the — of the. E. F. Terroine and H. Spindler, 245.
- Dihydroxystearic Acid:** Oleic acid as —; Determination of. A. Lapworth and E. N. Mottram, 470.
- Diligence:** "Reasonable —"; The Question of (Legal Notes), 337.
- Dilute Mineral Acid:** Monosaccharides by means of —; Condensation of. P. A. Levene and R. Upts, 463.
- Dilution:** Whisky with notice of —; Sale of (Legal Notes), 133.
- Discoloration:** Canned food; — of. A. E. Stevenson, 512.
- Disinfection Methods:** Fruits and vegetables by bacteria and other particulate matter; Penetration of Resistance of bacteria, protozoan cysts and Helminth ova to common —. R. G. Mills, C. L. Bartlett and J. F. Kessel, 571.
- Dissolved Oxygen:** —; Determination of. J. N. Friend, 248.
- Documents:** Artificially aged — (Notes). O. A. Mendelsohn, 287.
- Documents:** Charred —; The examination of. C. A. Mitchell, 174.
- Domesticated Animals:** Bacilli pathogenic to man; — as sources of. W. G. Savage, 572.
- Dominion Laboratory:** New Zealand. Fifty-Seventh Annual Report of the —. 340.
- Double Halogenides:** Metals as — with pyridine, antipyrine, pyrazole or aniline; Identification of. I. M. Kolthoff and H. Hamer, 90.
- Dough:** Flour and — and their products and in so-called "improvers"; Detection of benzoyl peroxide in. S. Rothenfusser, 243.
- Dried Milk:** Ministry of Health. —. Statutory Rules and Orders, 1923, No. 1323. Public Health, England, 343.
- Dropping Mercury Cathode:** Electrolysis with the —; Applications of the method of. J. Heyrovsky, 94.
- Drugs:** Bill; Dangerous —. 462.
- Drugs:** Convention; Dangerous —. 188.
- Drugs:** Tannin; Identification by chemical methods of — containing. A. H. Ware, 564.
- Drunkeness:** Methylated spirit; — from (Legal Notes), 504.
- Dryer:** Carbon dioxide absorbent, as its own —; Test of Ascarite, a. F. W. Marsh, 417.
- Dutch:** "Cheshire" cheese (Legal Notes), 290.
- Dyed:** Oranges (Notes). J. F. Liversedge, 183.
- Dyeing Property:** tomatoes; — of (Notes). H. E. Burgess, 131.
- Dyes:** Shoe —; Poisoning by. C. W. Muehlberger, 468.

E

- Earths:** Rare — from uranium; Separation of. Alkali uranylalicylates. G. Canneri and L. Fernandes, 35.
- Earths:** Zirconium and the tervalent rare —; Separation of thorium from. L. Fernandes, 253.
- Egg:** Custard without — (Legal Notes), 19.
- Egg-Yolk:** Benzoic acid in —; Determination of. T. Grethe, 242.
- Egg Yolk:** Fluorine in —. H. Ulex, 625.
- Egg Yolk:** Solvents; Separation of — into fractions by. M. A. Rakusin and G. Pekar-skaja, 242.
- Egg Yolk Stains:** —; Identification of. Barthe, 522.
- Eggs:** Antiscorbutic properties of —. S. M. Hauge and C. W. Carrick, 411.
- Eggs:** Preserved —; Bacterial flora of. H. Popp, 631.
- Eggs:** Shells of — on keeping; Modifications in the transparency of the. A. M. Leroy, 25.
- Eggs:** Total solids in —; Rapid routine method for the determination of. R. Hertwig and L. H. Bailey, 406.
- Eggs:** Vitamin-A content of fresh —. J. C. Murphy and D. B. Jones, 298.
- Electric Furnaces:** Mercury poisoning from —. L. Jordan and W. P. Barrows, 84.
- Electro-Titration:** Differential —. D. C. Cox, 581.
- Electrode:** Oxidations or reductions; Porous — for. M. Knobel, 527.
- Electrode:** P_H value of dairy products by Biilmann's quinhydrone —; Measurement of. V. Lester, 37.
- Electrolysis:** Dropping mercury cathode; Applications of the method of — with the. J. Heyrovsky, 94.
- Electrolysis:** Rapid —; Economic anode for. A. Lassieur, 96.

- Electrolytes:** Nickel and iron from complex oxalate —; The carbon error in the quantitative deposition of. P. K. Frölich, 224.
- Electrolytes:** Nickel and iron from Complex oxalate —; The carbon error in the quantitative deposition of (Notes). P. K. Frölich, 444.
- Electrolytic Hydrogen:** Oxygen and nitrogen in commercial —; Determination of. W. Steuer, 525.
- Electrolytic Modification:** Arsenic in body tissues; — of the Gutzeit method for the determination of. W. E. Lawson and W. O. Scott, 414.
- Electrolytic Separation:** Lead and tin; — of. A. Lassieur, 35.
- Electrometric Method:** Hydrogen ion concentration; A modified — for the determination of. S. Glasstone, 323.
- Electrometric Study:** Iodide, bromide, and chloride of silver; An — of the separation of the. H. T. S. Britton, 601.
- Electrometric Titration:** Antimony and tin by potassium dichromate; — of. M. H. Fleysher, 94.
- Electrometric Titration:** Hydrazine and its salts; — of. E. C. Gilbert, 94.
- Emmenagogue Pills:** Misbranding of — (Legal Notes), 238.
- Emulsin of Almonds:** Enzymes present in the —; Two new. M. Bridel, 628.
- Emulsions:** Size of particles in —; Method for the determination of the distribution of. E. O. Kraemer and A. J. Stamm, 95.
- Enamels:** Ministry of Health. Solubility of Glazes and — Used in Cooking Utensils. Reports on Public Health and Medical Subjects. G. W. Monier-Williams, 133.
- Energy Values:** Foods, fuels, etc.; The oxy-calorimeter for the determination of the — of. F. G. Benedict and E. L. Fox, 640.
- Engineering Standards:** —; British, 316.
- Enzymatic Synthesis:** Protein; — of. IV. Effect of concentration on peptic synthesis. H. Borsook and H. Wasteneys, 350.
- Enzymatic Synthesis:** Protein; — of. V. Note on the synthesising action of trypsin. H. Wasteneys and H. Borsook, 351.
- Enzyme Action:** —; Studies on. XXX. Comparative study of characteristic lipase actions of tissues of different animals and of some human tissues. K. G. Falk, H. M. Noyes and K. Sugiura, 194.
- Enzymes:** Emulsin of almonds; Two new — present in the. M. Bridel, 628.
- Enzymic Activity:** Pancreatic and malt amylases; Temperature coefficients of — and heat destruction of. D. H. Cook, 569.
- Epidemic:** Ice cream; An — of scarlet fever spread by. G. H. Ramisey, 574.
- Ergot:** Colour reaction of —. W. P. H. van den Driessen Mareeuw, 515.
- Ergot of Rye:** Therapeutic value of extract of —. A. Goris and A. Liot, 193.
- Errata:** 1925—202, 425, 426, 428, 541, 582 and 588.
- Error:** Cresol red; Salt — of. W. D. Ramage and R. C. Miller, 354.
- Essential Oils:** Phenols in —; New method for the rapid determination of. L. Reti, 302.
- Essential Oils:** Vapours of vegetable oils, —, their constituents, and similar compounds; Semi-selective antiseptic effect of. O. Schöbl, 467.
- Ether:** Commercial —; Toxic action of. E. Remy and F. Neuhart, 198.
- Ethyl Acetate:** Alkali metals by the use of perchloric acid; Separation and determination of the. III. Normal butyl alcohol and — as mixed solvents in the separation and determination of potassium, sodium, and lithium. G. F. Smith and J. F. Ross, 307.
- Ethyl Alcohol:** Ethyl phthalate in —; Detection of. J. T. Raleigh and S. U. Marie, 192.
- Ethyl Phthalate:** Ethyl alcohol; Detection of — in. J. T. Raleigh and S. U. Marie, 192.
- Excreta:** Rats on a diet low in this factor; Vitamin B in — of. W. D. Salmon, 628.
- Expert Witnesses:** Court; The Presence of — in, 241.
- Explosion Method:** Peroxide fusions; — for. W. F. Muehlberg, 473.

F

- Faecal Pollution:** Test for lactose fermenters as an indicator of — of waters; Fallacy of the. O. Schöbl and J. Ramirez, 630.
- False Santonics:** True and —. T. E. Wallis and E. J. Mowat, 566.
- Fat:** Condensed milk; Determination of — in (Notes). J. McCrae, 236.
- Fat:** Condensed milks; The determination of — in (Notes). R. W. Sutton, 17.
- Fat:** Goats' butter; The — of. H. D. Richmond, 62.
- Fat:** Goats' butter; The — of (Notes) H. D. Richmond, 285.
- Fat:** Goats' butter; The — of (Notes). F. Knowles and J. C. Urquhart, 180.
- Fat:** Petroleum; The — of algae in relation to. J. Marcusson, 416.
- Fat-Soluble Vitamins:** —. XX. Modified technique for the determination of Vitamin A. H. Steenbock, M. T. Nelson, and A. Black, 78.
- Fat-Soluble Vitamins:** —. XXI. Observations bearing on the alleged induction of growth-promoting properties in air by irradiation with ultra-violet light. E. M. Nelson and H. Steenbock, 194.
- Fats:** Acetyl values of —; Simple and rapid method for the determination of. E. André, 302.
- Fats and Oils:** Rancidity in —; Detection of. T. von Fellenberg, 245.

- Fats:** Insoluble volatile acids from —; The analytical value of the melting point of the. G. Van B. Gilmour, 119.
- Fats:** Lecithin in —. E. Boedtker, 513.
- Fats:** Natural —; The fatty acid constituents of some. II. Palm kernel oil. E. F. Armstrong, J. Allan and C. W. Moore, 244.
- Fats:** Oils and —; Volumetric determination of certain unsaturated constituents of. H. P. Kaufmann, 577.
- Fats:** Oxidation; Measurement of the susceptibility of — to. G. R. Greenbank and G. E. Holm, 463.
- Fats:** Rancidity of —; The. H. E. Fierz-David, 244.
- Fats:** Vitamin A in other —; Inactivating action of some — on. L. S. Fridericia, 146.
- Fatty Acid Constituents:** Natural fats; The — of some. I. The oils from the coconut. E. F. Armstrong, J. Allan and C. W. Moore, 191.
- Fatty Acid Constituents:** Some natural fats; The — of. II. Palm kernel oil. E. F. Armstrong, J. Allan and C. W. Moore, 244.
- Fatty Acid Series:** Insecticidal properties of the —. E. H. Siegler and C. H. Popenoe, 303.
- Fatty Acids:** Caster oil; The increase of free — in (Notes). W. Partridge, 284.
- Fatty Acids:** Human subcutaneous fat; — in. H. C. Eckstein, 517.
- Fatty Acids:** Natural unsaturated —; Constitution of, Part II. Some acids present in a South Georgian whale oil. E. F. Armstrong and T. P. Hilditch, 303.
- Fatty Acids:** Unsaturated —; X-ray method of following the oxidation of. J. J. Tillat, 641.
- Fehling's Solution:** Reducing sugars; Preparation of — for the volumetric determination of. J. H. Lane and L. Eynon, 244.
- Fermentation Products:** Mannitol-forming bacteria; — of certain. H. R. Stiles, W. H. Peterson and E. B. Fred, 519.
- Fermenters:** Faecal pollution of waters; Fallacy of the test for lactose — as an indicator of. O. Schöbl and J. Ramirez, 630.
- Ferric Casse:** Wines; Characterisation and evaluation of — in. P. Malzevin and J. C. Essner, 77.
- Ferric Citrate Precipitation Test:** Tannins; Modifications of the — for (Notes). A. H. Ware, 335.
- Ferric Iron:** Alloxantin reaction for —; The. G. Denigès, 199.
- Ferric Oxide:** Catalytically active and inactive forms of —. L. A. Welo and O. Baudisch, 569.
- Ferric Oxide:** Insoluble silicates; Determination of — in. O. Hackl, 526.
- Ferrocyanide:** Cadmium as —; Gravimetric determination of. G. Luff, 418.
- Ferrous sulphate:** Chloric acid and chlorates by —; The reduction of. C. O. Harvey, 538.
- Ferrous Tartrate Reagent:** Mitchell's — in qualitative analysis; The use of. A. H. Ware, 127.
- Ferrovandium:** Vanadium in —; Determination of. Koch, 418.
- Fertilisers and Feeding Stuffs Advisory Committee:** Report of the —, 557.
- Fertilisers:** Citric-Soluble phosphate in — (Legal Notes), 401.
- Fever:** Ice-cream; Paratyphoid — traced to. G. P. Kinloch, 632.
- Fig Tree (Gondang) Wax:** —. A. J. Ultee, 87.
- Films:** Blood —; Useful stain for. A. K. Gordon, 148.
- Filter Apparatus:** Glass —. P. H. Prausnitz, 440.
- Fish:** Fresh fried —; Composition of. K. Kobert, 142.
- Fish:** Urine and in —; On certain new methods for the determination of small quantities of arsenic, and its occurrence in. H. E. Cox, 3.
- Flesh:** Alcohol; Detection of putrefying — by means of. Lüttge and Mertz, 190.
- Flies:** Food poisoning traced to —; An outbreak of, 556.
- Flour:** Benzoperoxide (benzoyl peroxide) in —; Delicate test for. F. Kirchhof, 406.
- Flour:** Benzoyl peroxide in — and dough and their products and in so-called "improvers"; Detection of. S. Rothenfusser, 243.
- Flour:** Colorimetric testing of —; Rapid. P. Bruère, 294.
- Flowmeter:** Stopcock orifice —. J. Sharp, 475.
- Fluids:** Ultra-violet irradiation; Antirachitic properties imparted to inert — and to green vegetables by. A. F. Hess and M. Weinstock, 146.
- Fluorescence:** Purity in organic compounds; — as a criterion of. E. Bayle and R. Fabre, 256.
- Fluorescence:** Vegetable colours; — of L. Meunier and A. Bonnet, 641.
- Fluorine:** Baking powder; Volatilisation method for the determination of — in. J. K. Morton, 29.
- Fluorine:** Egg yolk; — in. H. Ulex, 625.
- Fluorine:** Small quantities of —; Detection and determination of. R. J. Meyer and W. Schulz, 637.
- Food and Drugs Analysis: Abstracts, 1925—** 25, 76, 142, 190, 242, 294, 347, 406, 462, 512, 562, 624.
- Food:** Canned —; Discoloration of. A. E. Stevenson, 512.
- Food Chemistry:** Ultra-violet spectroscopy to —; Application of. R. Dietzel and K. Täufel, 308.
- Food Commissioner:** Minnesota State Dairy and —. Twentieth Biennial Report, 1924, 511.
- Food Inspection Decisions:** United States Department of Agriculture. — 196 and 197, 562.
- Food Investigation Board:** Department of Scientific and Industrial Research. Report of the — for 1923, 71.

- Food Investigation Board:** Department of Scientific and Industrial Research. —. Special Report No. 21. The "gas" content and ventilation of refrigerated holds carrying apples, 187.
- Food Investigation Board:** Department of Scientific and Industrial Research. —. Special Report No. 22. "Brown Heart in Australian Apple Shipments," 188.
- Food:** Ministry of Health: Milk and Dairies (Consolidation Act), 1915, Circular 612; Preservatives, etc., in — — Statutory Rules and Orders, 1925, 775; Public Health (Preservatives, etc., in —) Regulations 1925, Circular 606, 453.
- Food:** Ministry of Health. Use of Preservatives and Colouring Matters in —, 134.
- Food Poisoning:** Flies; An outbreak of — traced to, 556.
- Food Poisoning:** Medical Research Council; ——A Study of 100 Recent Outbreaks, 341.
- Food Poisoning:** Medical Research Council. Investigation of the Salmonella Group, with Special Reference to —, 239.
- Food Products:** Hydrogen sulphide in proteinaceous —; Method for the determination of. L. H. Almy, 349.
- Food:** Whole and skimmed milk powders as —. Observations on a new vitamin for reproduction, L. T. Anderegg and V. E. Nelson, 351.
- Foods:** Bacterial cultures and certain canned —; Determination of hydrogen sulphide in. C. R. Fellers, O. E. Shostrum and E. D. Clark, 81.
- Foods:** Energy values of fuels, —, etc.; The oxy-calorimeter for the determination of the. F. G. Benedict and E. L. Fox, 640.
- Foods:** Meat —; Anaerobic bacteria in, and their connection with gastro-intestinal disturbances. Brekenfeld, 80.
- Foods:** Sulphur dioxide in —; Determination of. K. K. Järvinen, 513.
- Foodstuffs Analysis:** Peat by the methods of —; Examination of. A. P. Dachnowski, 304.
- Foodstuffs:** Glass particles in —; The occurrence of. A. R. Tankard, 393.
- Forensic Chemistry:** Toxicology and —. 74.
- Formaldehyde:** Serum proteins; Mechanism of the interaction of — and. R. R. Henley, 350.
- Formula:** Jaffe's reaction for creatinine; Chemistry of. II. Effect of substitution in the creatinine molecule and a possible — for the red tautomeride. I. Greenwald, 350.
- Free Fatty Acids:** Castor oil; The increase of — in (Notes). W. Partridge, 284.
- "French Coffee":** Chicory; — with disclosure of (Legal Notes), 290.
- Fried Fish:** Fresh —; Composition of. K. Kobert, 142.
- Fructose:** Hydrolysis of sucrose by invertase from honey; Influence of glucose and — on the rate of. J. M. Nelson and C. T. Sottery, 76.
- Fruit:** Acetaldehyde in the — and other parts of plants; Occurrence of. C. Griebel, 295.
- Fruit Jelly:** Pectin in — (Legal Notes), 503.
- Fruit Juices:** Lactic acid in —; Detection of small quantities of. A. Bornträger, 563.
- Fruit Products:** Fruits and —; Pectin in. H. J. Wichmann, 28.
- Fruits:** Bacteria and other particulate matter; Penetration of — and vegetables by. Resistance of bacteria, protozoan cysts and helminth ova to common disinfection methods. R. G. Mills, C. L. Bartlett and J. F. Kessel, 571.
- Fruits:** Fruit products; Pectin in — and. H. J. Wichmann, 28.
- Fuel Research Board:** —. Report for Period Ended 31st December, 1924. 621.
- Fuels:** Energy values of —, foods, etc.; The Oxy-Calorimeter for the determination of the: F. G. Benedict and E. L. Fox, 640.
- Furfural:** Pentose metabolism; Studies on. I. Colorimetric method for the determination of —. 34.
- Furnaces:** Electric —; Mercury poisoning from. L. Jordan and W. P. Barrows, 84.
- Fused Bisulphate:** Medium for high temperature baths; — as a. E. Benesch, 419.

G

- Galenic Preparations:** Yohimbine in barks and — of *Yohimbehe*; Determination of. Raymond-Hamet, 409.
- Gallium:** Germanite; Analysis of (Determination of germanium, arsenic, —, and molybdenum). F. W. Kriesel, 91.
- Gallotannin:** Yeast on —; Action of. M. Nierenstein, C. W. Spiers and A. C. Hadley, 417.
- Gambier:** Cinchonine as a tannin precipitant with special reference to the analysis of cutch and —. D. Hooper, 162.
- (Gardenal):** Luminal —; Characteristic reaction for. F. Ranwez, 465.
- Gas:** Accurate analysis of small quantities of —; Apparatus for the. D. S. Chamberlin and D. M. Newitt, 475.
- Gas Analysis:** Carbon monoxide; On the absorption of. Part I. A critical comparison of some methods employed in —. Part II. Advantages of using hot reagent. H. R. Ambler and T. C. Sutton, 167.
- Gas Analysis:** Oxygen in —; New absorbent for. L. F. Fiesher, 89.
- "Gas" Content:** Department of Scientific and Industrial Research. Food Investigation Board. Special Report No. 21. The — and ventilation of refrigerated holds carrying apples. 187.
- Gas:** Micro analysis of; — Burette for. J. A. Christiansen, 153.
- Gas:** Oxides of nitrogen (except nitrous oxide) in small concentration in the products of combustion of coal — and in air; The determination of. A. G. Francis and A. T. Parsons, 262.

- Gases:** Blood; Detection of poisonous — in. E. Kohn-Abrest, 81.
- Gases:** Organic reactions at the surface of titania. Adsorption of certain — by titania. F. Bischof and H. Adkins, 253.
- Gasometric Determinations:** Combustion with copper oxide; — by means of. J. Svěda, 90.
- Gastro - Intestinal Disturbances:** Anaerobic bacteria and their connection with —. Brekenfeld, 80.
- Gelatin-Forming Substance:** Total protein in sausages; Ratio of — to. O. Luning and S. Gerö, 347.
- Germanite:** —; Analysis of. (Determination of germanium, arsenic, gallium and molybdenum). F. W. Kriesel, 91.
- Germanium:** Germanite; Analysis. of (Determination of —, arsenic, gallium, and molybdenum). F. W. Kriesel, 91.
- Germanium:** —; Determination of. E. B. Johnson and L. M. Dennis, 252.
- Germicidal Action:** Bacteria; — of different H-ion concentrations on. S. Sierakowski and F. Milejkowska, 195.
- Glands:** *Linguatula serrata* in bovine lymphatic —; Occurrence of. A. W. N. Pillers, 573.
- Glands:** Thyroxin in thyroid — and preparations; Determination of. T. A. Redonnet, 465.
- Glass Filter:** Apparatus. P. H. Prausnitz, 440.
- Glass Particles:** Foodstuffs; The occurrence of — in. A. R. Tankard, 393.
- Glazes:** Ministry of Health. Solubility of — and Enamels Used in Cooking Utensils. Reports on Public Health and Medical Subjects. G. W. Monier-Williams, 133.
- Glucose:** Carbohydrates; Direct method for the determination of — and other. E. Knecht and E. Hibbert, 27.
- Glucose:** Hydrolysis of sucrose by invertase from honey; Influence of — and fructose on the rate of. J. M. Nelson and C. T. Sottery, 76.
- Glucose:** Maltose in the presence of —; Determination of. M. P. Nottin, 190.
- Glucosides:** Navel orange; — of the. J. A. Hall, 295.
- Glycerides:** Cacao butter; The — of. K. Amberger and J. Bauch, 77.
- Glycerol:** Biuret reaction; Interfering effect of — on the. F. B. Seibert and E. R. Long, 470.
- Glycerol:** Dichromate method for the determination of —; Modified. H. B. Bennett, 33.
- Glycine:** Body; Effect of sodium benzoate upon the composition of the blood and urine, with especial reference to the possible synthesis of — in the. W. W. Swanson, 197.
- Glycogen:** —; Studies on, Part I. The nature of yeast —, its preparation, estimation, and rôle in yeast metabolism, A. R. Ling, D. R. Nanji and F. J. Paton, 407.
- Glycuronic Acid:** Urine; Quantitative determination of menthol — in, A. J. Quick, 32.
- Glycyrrhizin:** —; Reactions of. P. Bertolo, 514.
- Glyoxylic Acid:** Hydrazine and xanthidrol; Identification of — by means of. R. Fosse and A. Hieulle, 524.
- Goats' Butter:** Fat of —; The. H. D. Richmond, 62.
- Goats' Butter:** Fat of —; The (Notes). F. Knowles and J. C. Urquhart, 180.
- Goats' Butter:** Fat of —; The (Notes). H. D. Richmond, 285.
- (Gondang) Wax:** Fig tree —. A. J. Ultee, 87.
- Government Analyst:** New South Wales. Department of Public Health. Annual Report of the — for the Year 1923. T. Cooksey, 73.
- Government Analyst:** Queensland. Report of the — for the Year Ended June 30, 1924. J. B. Henderson, 20.
- Government Chemist:** Government Laboratory; Report of the — upon the Work of the. For the Year Ending March 31st, 1925, 504.
- Government Laboratory:** Government Chemist upon the Work of the —; Report of the. For the Year Ending March 31st, 1925, 504.
- Government of Madras:** —. Report of the Chemical Examiner for the Year 1924, 449.
- Government of Palestine:** —. Annual Report of the Department of Health for the Year 1923, 22.
- Grant's Test:** Sparteine; — for. J. F. Couch, 144.
- Grape:** Strawberry, pineapple, raspberry, and Concord —; Non-Volatile acids of the. E. K. Nelson, 295.
- Green Growth:** Oysters; The — on. G. Ranson, 145.
- Green Vegetables:** Inert fluids and to — by ultra-violet irradiation; Antirachitic properties imparted to. A. F. Hess and M. Weinstock, 146.
- Grignard Reagent:** Colour test for the —; Quantitative. H. Gilman and F. Schulze, 523.
- Growth-Promoting Properties:** Fat-Soluble vitamins. XXI. Observations bearing on the alleged induction of — in air by irradiation with ultra-violet light. E. M. Nelson and H. Steenbock, 194.
- Gum:** Tragacanth. W. Peyer, 30.
- Gums:** Plant — of the South Western United States; Some. E. Anderson, L. Sands and N. Sturgis, 635.
- Guncotton:** Sulphates in —; The determination of. H. B. Dunncliff, 543.
- Gunning-Arnold and Winkler Boric Acid Modifications:** Kjeldahl method for the determination of nitrogen; Comparison of the — of the. K. S. Markley and R. M. Hann, 418.
- Gutzeit Method:** Arsenic in body tissues; Electrolytic modification of the — for the determination of. W. E. Lawson and W. O. Scott, 414.

H

H-ion Concentrations: Bacteria; Germicidal action of different — on. S. Sierakowski and F. Milejkowska, 195.

- Haematoporphyrin**: Sulphonal poisoning. Localisation of sulphonal and ——. R. Fabre and H. Simonnet, 575.
- Haemoglobin**: Carbon monoxide by the blood method; Determination of. Absorption of the gas by — in absence of oxygen. M.— Nicloux, 417.
- Haemoglobin**: Nitric oxide —; Post-mortem presence of. Its medico-legal significance. H. A. L. Banham, J. S. Haldane and T. Savage, 520.
- Haemolysis**: Blood serum and of sugars on —; Influence of. W. P. Kennedy, 467.
- Haemolytic Proteus Bacillus**: —; Study of a. B. S. Kline, 571.
- (Hafnium)**: Celtium — from zirconium; Separation of. J. Bardet and C. Toussaint, 419.
- Hafnium**: Phosphates of zirconium and —; Solubilities of the. G. Hevesy and K. Kimura, 637.
- Halogen Salts**: Salivary digestion; Effect of — on. W. M. Clifford, 466.
A. W. Schorger, 471.
- Halogenides**: Metals as double — with pyridine, antipyrine, pyrazole or aniline; Identification of. I. M. Kolthoff and H. Hamer, 90.
- Halphen's**: Cotton seed oil test (Notes), F. F. Shelley, 132.
- Hammersmith Borough Council**: —. Annual Report of the Public Analyst for 1924. P. A. E. Richards, 237.
- Hard and Soft Resins**: Hops; Determination of — in. A. C. Chapman, 144.
- Hard Waters**: Dilute solutions of calcium hydrogen carbonate or in —; Volumetric determination of total carbonic acid in. E. M. Crowther and W. S. Martin, 32.
- Heat Destruction**: Enzymic activity and — of pancreatic and malt amylases; Temperature coefficients of. D. H. Cook, 569.
- Heat**: Solubility of the calcium and phosphorus compounds in milk; Effect of — on the. R. W. Bell, 466.
- Heavy Metals**: Cryogenine with the —; Colour reactions of. L. Bornet, 34.
- Helix Pomatia, L.**: Snail —; Nutritive value of the. L. Leger, 76.
- Helminth Ova**: Bacteria and other particulate matter; Penetration of fruits and vegetables by. Resistance of bacteria, protozoan cysts and — to common disinfection methods. R. G. Mills, C. L. Bartlett and J. F. Kessel, 571.
- "Hesperidin"**: Plants; The — of certain. O. A. Oesterle and G. Wander, 627.
- High Temperature Baths**: Medium for —; Fused bisulphate as a. E. Benesch, 419.
- Histological Reaction**: Proteins; New — for. M. Romieu, 245.
- Höchst Test**: Anthracene; The — for the determination of. F. H. Rhodes, M. L. Nichols and C. W. Morse, 525.
- Homeria Pallida**: Transvaal —; Poisonous alkaloid from the. M. Rindl, 85.
- Homologues**: Aniline and its —; Titration of. D. O. Jones and H. R. Lee, 88.
- Honey**: Dextrose and fructose ratio in —; The. A. Gronover and E. Wohnlich, 191.
- Honey**: Hydrolysis of sucrose by invertase from honey; Influence of glucose and fructose on the rate of. J. M. Nelson and C. T. Sottery, 76.
- Honey**: Noors —; The problem of. C. F. Juritz, 347.
- Hops**: Hard and soft resins in —; Determination of. A. C. Chapman, 144.
- Human Subcutaneous Fat**: Fatty acids in —. H. C. Eckstein, 517.
- Human Tissues**: Enzyme action; Studies on. XXX. Comparative study of characteristic lipase actions of tissues of different animals and of some —. K. G. Falk, H. M. Noyes and K. Sugiura, 194.
- Humification**: Soil organic matter; Determination of the degree of — of. G. W. Robinson and J. O. Jones, 148.
- Hydrazine**: Glyoxylic acid by means of — and xanthydrol; Identification of. R. Fosse and A. Hieulle, 524.
- Hydrazine**: Salts; Electrometric titration of — and its. E. C. Gilbert, 94.
- Hydrochloric Acid Solution**: Selenium and tellurium by sulphur dioxide in —; Separation of. V. Lenher and C. H. Kao, 255.
- Hydrocyanic Acid**: Poisoning; Detection of — in cases of. G. Magnin, 300.
- Hydrogen Ion Concentration**: Diastatic power by the polarimetric method; Effect of — on the determination of. H. C. Gore, 143.
- Hydrogen Ion Concentration**: Modified electrometric method for the determination of —; A. S. Glasstone, 327.
- Hydrogen Ion Concentration**: Pyrogallol and catechol derivatives; The influence of — on the colorimetric determination of. S. Glasstone, 49.
- Hydrogen**: Oxygen and nitrogen in commercial electrolytic —; Determination of. W. Steuer, 525.
- Hydrogen Sulphide**: Bacterial cultures and in certain canned foods; Determination of — in. C. R. Fellers, O. E. Shostrom and E. D. Clark, 81.
- Hydrogen Sulphide**: Proteinaceous food products; Method for the determination of — in. L. H. Almy, 349.
- Hydrogen Sulphide**: Toxicology of —. H. W. Haggard, 519.
- Hydrogen Sulphide**: Zinc and nickel by —; Separation of. A. Kling and A. Lassieur, 200.
- Hydrolysis**: Proteins; Methods for the determination of the products of the — of. J. Froidevaux, 297.
- (Hydrosulphite)**: Sodium hyposulphite — in organic analysis; Application of. E. Clark, 199.
- Hydroxyl Group**: Alcoholic —; Colour reaction of the. W. Parri, 86.

I

- Ice Cream**: Paratyphoid fever traced to —. G. P. Kinloch, 632.
- Ice Cream**: Scarlet fever spread by —; An epidemic of. G. H. Ramsey, 574.
- Ice**: Purity of —; The. O. V. Hubay, 631.
- Imitation**: Vanilla essence (Notes). J. C. MacLaurin, 548.
- "Improvers"**: Benzoyl peroxide in flour and dough and their products and in so-called —; Detection of. S. Rothenfusser, 243.
- Inactivating Action**: Vitamin A in other fats; — of some fats on. L. S. Fridericia, 146.
- Index**: Arsenobenzenes; The value of the D.M. — for. A. Valeur and L. Launoy, 193.
- Indicator**: Acidimetry and alkalimetry; Potassium tripyrocatechol ferrate as — in. K. Binder, 305.
- Indicator (Cresol Red)**: Serum in the spectrophotometric determination of the P_H ; The adsorption of — by. E. F. Hirsch, 256.
- Iodole Content**: Canned crustacea; — of. D. B. Dill and P. B. Clark, 413.
- Indole**: Tryptophane by the vanillin and hydrochloric acid reaction; Colorimetric determination of. Quantitative separation from — and skatole. I. Kraus, 246.
- Industrial Alcohol**: Sources of —. 404.
- Inert Fluids**: Ultra-violet irradiation; Antirachitic properties imparted to — and to green vegetables by. A. F. Hess and M. Weinstock, 146.
- Inert Substances**: Antirachitic properties to — by ultra-violet irradiation; Further report on imparting. A. F. Hess and M. Weinstock, 298.
- Ink**: —; Analysis of. B. Walther, 151.
- Inorganic Analysis, Abstracts**: 1925: 34, 89, 151, 199, 251, 304, 358, 417, 472, 525, 578, 636.
- Inorganic Salts**: Sugar solutions; Effect of some — on the polarisation of. R. J. Brown, 143.
- Insecticidal Properties**: Fatty acid series; — of the. E. H. Siegler and C. H. Popenoe, 303.
- Insoluble Alkali Metal Perchlorates**: Alkali metals by the use of perchloric acid; Separation and determination of the. II. Precise determination of the —. G. F. Smith and J. F. Ross, 254.
- Insoluble Silicates**: Ferric oxide in —; Determination of. O. Hackl, 526.
- Insoluble Volatile Acids**: Fats; The analytical value of the melting point of the — from. G. Van B. Gilmour, 119.
- Inspector**: Impeding an — (Legal Notes), 70.
- Institute of Chemistry of Great Britain and Ireland**: 1925: 160.
- Institute of Chemistry**: —. Forty-Seventh Annual General Meeting, 2nd March, 1925, 189.
- Insulin**: Biological determination of —. F. Wyss, 570.
- Insulin**: Trypsin on —; The action of. D. A. Scott, 351.
- International Critical Tables**: —; The. 292.
- "Invalid Wine"**: Sale of an — (Legal Notes). 403.
- (Inversion Coefficients)**: Clerget method —. E. Saillard, 513.
- Invert Sugar**: Clerget divisor; Specific rotation of — and the. F. W. Zerban, 294.
- Invertase**: Hydrolysis of sucrose by — from honey; Influence of glucose and fructose on the rate of. J. M. Nelson and C. T. Sottery, 76.
- Iodate**: Iodide or —; Determination of small amounts of iodine as. N. A. Lange and L. A. Ward, 307.
- Iodide, Bromide, and Chloride of Silver**: Separation of the —; An electrometric study of the. H. T. S. Britton, 601.
- Iodide**: Iodine as — or iodate; Determination of small amounts of. N. A. Lange and L. A. Ward, 307.
- Iodine**: Iodide or iodate; Determination of small amounts of — as. N. A. Lange and L. A. Ward, 307.
- Iodine**: Substitute for — in analytical work; Chloramine as a. A. Noll, 34.
- Iodine Values**: —; Rapid determination of. L. W. Winkler, 523.
- Iron Alloys**: Manganese in —; Detection of traces of. H. Bösch, 359.
- Iron Cacodylate**: Toxicity of —. P. Musucci and G. A. Slothower, 632.
- Iron**: Colorimetric methods; The determination of small amounts of — by. W. B. Walker, 279.
- Iron**: Copper, —, and cobalt; New qualitative tests for. M. L. Nichols and S. R. Cooper, 358.
- Iron Filings**: Tea; — in (Legal Notes), 553.
- Iron**: Nickel and — from complex oxalate electrolytes; The carbon error in the quantitative deposition of. P. K. Frölich, 224.
- Iron**: Nickel and — from complex oxalate electrolytes; The carbon error in the quantitative deposition of (Notes). P. K. Frölich, 444.
- Iron Pyrites**: Copper in —; Determination of. T. Heczko, 579.
- Iron**: Reducing agent in the determination of —; Copper as a. J. M. Hendel, 91.
- Iron**: Tantalum and niobium by —; Precipitation of, and their separation from —. H. Pied, 36.
- Iron**: Tragacanth; — in. G. Elliott, 192.
- Iron**: Zirconium from —; Separation of. P. Wenger and M. Müller, 637.
- Irradiated Cholesterol and Phytosterol**: Antirachitic value of —. II. Further evidence of change in biological activity. A. F. Hess and M. Weinstock, 412.
- Irradiated Cholesterol and Physterol**: Antirachitic value of —. III. Evidence of chemical change as shown by absorption spectra. A. F. Hess and M. Weinstock, 411.
- Irradiated Phytosterol and Cholesterol**: Antirachitic value of —. A. F. Hess, M. Weinstock and F. D. Helman, 299.
- Italian Regulations**: Colouring Matters; — on. 189.

J

- Jaffe's Reaction:** Creatinine; Chemistry of — for. II. Effect of substitution in the creatinine molecule and a possible formula for the red tautomeride. I. Greenwald, 350.
- Japanese:** Saffron. E. Skarnitzl, 31.
- Jelly:** Fruit —; Pectin in (Legal Notes), 503.
- Jendrassik Reaction:** Water-soluble Vitamin B.; Critical study of the — for. V. E. Levine, 79.
- Jendrassik Reaction:** Water-soluble Vitamin B.; The — for. N. Bezssonoff, 517.
- Juice:** Lemon —. A. Azadian, 626.
- Juice:** Valencia orange —; Volatile constituents of. J. A. Hall and C. P. Wilson, 626.
- Juices:** Lactic acid in fruit —; Detection of small quantities of. A. Bornträger, 563.

K

- Kaolin:** Colloidal —; Properties of. W. J. Pope and R. T. M. Haines, 349.
- Kent:** County of —. F. W. F. Arnaud, 400.
- Kidney Pills:** Misbranding of — (Legal Notes), 504.
- Kingston-upon-Hull:** City and County of —. Annual Report of the Public Analyst and Bacteriologist for 1924. A. R. Tankard, 551.
- Kjeldahl Apparatus:** Splash-head for —; New (Notes), H. Lowe, 605.
- Kjeldahl Method:** Gunning-Arnold and Winkler boric acid modifications of the — for the determination of nitrogen; Comparison of the. K. S. Markley and R. M. Hann, 418.
- Kreis Test:** Rancidity and the —. T. W. Jones, 77.

L

- Laboratory:** Artificial daylight spectacles for the —. H. Weiss, 362.
- Lactic Acid:** Fruit juices; Detection of small quantities of — in. A. Bornträger, 563.
- Lactose Fermenters:** Faecal pollution of waters; Fallacy of the test for — as an indicator of. O. Schöbl and J. Ramirez, 630.
- Lake Water:** Amino acids and other organic nitrogen compounds in —; Occurrence of. W. H. Peterson, E. B. Fred and B. P. Domogalla, 301.
- Lake Waters:** Nitrogen found in certain —; Forms of. B. P. Domogalla, C. Juday and W. H. Peterson, 301.
- Land:** Arable —; Nickel and cobalt in. G. Bertrand and M. Mokragatz, 84.
- Lathyrism:** —; Cause of. A. P. Anderson, A. Howard and J. L. Simonsen, 576.
- Lead Anodes:** Peroxidised —. G. Bozza and M. Bertozzi, 154.
- Lead:** Bismuth and its separation from — by pyrogallol; Determination of. F. Feigl and H. Ordelt, 252.
- Lead:** Blood cells; Effect of — on. J. C. Aub, P. Reznikoff and D. E. Smith, 83.
- Lead:** —; Determination of. W. W. Scott, 473.
- Lead:** —; The determination of (Notes). C. E. Richards, 398.
- Lead:** Litharge; Determination of metallic — in. C. Mayr, 151.
- Lead Nitrate Solutions:** Lead in organs; Determination of minute quantities of. Alteration of dilute —. H. Bernhardt, 574.
- Lead Ores:** Bismuth in —; Determination of. V. Hassreidter, 152.
- Lead:** Organs; Determination of minute quantities of — in. Alteration of dilute — nitrate solutions. H. Bernhardt, 574.
- Lead:** Pb₃O₄ in red —; Volumetric determination of. E. F. Figg, 199.
- Lead:** Petrol; Determination of — in. T. von Fellenberg, 352.
- Lead Tetraethyl:** Poisoning; —. H. Leffmann, 84.
- Lead:** Tin; Electrolytic separation of — and. A. Lassieur, 35.
- Leather:** Alumina in chrome —; Determination of. D. Woodroffe, 86.
- Leaves:** Tea —; Quercitin in. J. J. B. Deuss, 348.
- Lecithin:** Blood; Determination of — in. A. Grigaut, 195.
- Lecithin:** Fats; — in. E. Boedtker, 513.
- Lecithins:** Natural crystallised —; Isolation of. H. H. Escher, 625.
- Legal Notes:** 1925: 19, 68, 132, 184, 288, 337, 401, 448, 503, 552, 608.
- Lemon Cheese:** —; The composition of (Notes). G. D. Elsdon, 499.
- Lemon Cheese:** Composition of —; The (Notes). T. R. Hodgson, 396.
- Lemon:** Cheese. G. D. Elsdon, 230.
- Lemon:** Juice. A. Azadian, 626.
- Lemon Oil:** — and sweet orange oil in alcoholic solution; Optical rotations produced by. W. W. Randall, 28.
- Lighting Unit:** Spectroscope —; A simple and self-contained. R. C. Frederick and E. R. Webster, 234.
- Linen and Wood Fibres:** Cotton, — in paper pulp; The quantitative determination of. W. Dickson, 317.
- Linguatula Serrata:** Bovine lymphatic glands; Occurrence of — in. A. W. N. Pillers, 573.
- Liniment:** Chloroform in chloroform —; Determination of. T. M. Willgerodt, 627.
- Linseed Cake Meal:** Prussic acid poisoning with —; A case of (Notes). H. T. Cranfield, 18.
- Lipase Actions:** Enzyme action; Studies on. XXX. Comparative study of characteristic — of tissues of different animals and of some human tissues. K. G. Falk, H. M. Noyes and K. Sugiura, 194.
- Lipase:** Papain —. M. Sandberg and E. Brand, 410.
- Lipoid Phosphorus:** Blood and plasma; Method for the determination of — in. J. C. Whitehorn, 82.

- Liquorice Extract:** *Atractylis gummifera* in —; Detection of. P. Bertolo, 193.
- Litharge:** Metallic lead in —; Determination of. C. Mayr, 151.
- Lithium:** Alkali metals by the use of perchloric acid; Separation and determination of the. III. Normal butyl alcohol and ethyl acetate as mixed solvents in the separation and determination of potassium, sodium, and —. G. F. Smith and J. F. Ross, 307.
- Lithium Arc Spectrum:** Polarimetric use; — for. P. C. Austin, 476.
- London:** Milk in the City of —; Examination of. 554.
- London:** Rat virus in —; Use of. 555.
- Low-Temperature Thermometer:** —; Simple. W. A. Noyes, 526.
- Lubricating Oils:** Carbon residue test for —; The. W. M. Seaber, 354.
- Luminal:** — (Gardenal); Characteristic reaction for. F. Ranwez, 465.
- Lymphatic Glands:** Bovine —; Occurrence of *Lingu n'la serrata* in. A. W. N. Pillers, 573.
- Lysol:** Merchandise Marks Act; — and the (Legal Notes), 448.
- M**
- Madras:** Government of —. Report of the Chemical Examiner for the Year 1924. 449.
- Magnesia:** Calcined — (Legal Notes), 449.
- Magnesium:** Calcium and —; Separation of. G. Luff, 252.
- Magnesium:** Colour reaction for —; Sensitive. F. L. Hahn, H. Wolf and S. Jager, 35.
- Malt Amylases:** Pancreatic and —; Temperature coefficients of enzymic activity and heat destruction of. D. H. Cook, 569.
- Maltose:** Glucose; Determination of — in the presence of. M. P. Nottin, 190.
- Man:** Bacilli pathogenic to —; Domesticated animals as sources of. W. G. Savage, 572.
- Manganese:** Agricultural soils; Determination of — in. G. Bertrand, 85.
- Manganese:** Aluminium and its separation from —; Gravimetric determination of. B. Solaja, 360.
- Manganese:** Iron alloys; Detection of traces of — in. H. Bösche, 359.
- Manganese:** Vital factors in soils, plants, and animals; Copper, —, zinc nickel and cobalt as. J. S. McHargue, 409.
- Mannitol-Forming Bacteria:** Fermentation products of certain —. H. R. Stiles, W. H. Peterson and E. B. Fred, 519.
- Margarine:** Coconut oil and butter fat in —; The determination of. G. D. Elsdon and P. Smith, 53.
- Margarine:** Labelling of — (Legal Notes), 19.
- Meat Foods:** Anaerobic bacteria in — and their connection with gastro-intestinal disturbances. Brekenfeld, 80.
- Media:** P_H of culture — under sterile conditions; Adjustment of. L. M. Christensen and E. I. Fulmer, 630.
- Medical Research Council:** —. Food Poisoning.—A Study of 100 Recent Outbreaks. 341.
- Medical Research Council:** —. Investigation of the Salmonella Group, with Special Reference to Food Poisoning. (W. G. Savage and P. B. White), 239.
- Medical Subjects:** Ministry of Health. Solubility of Glazes and Enamels Used in Cooking Utensils. Reports on Public Health and —. G. W. Monier-Williams, 133.
- Medicine:** Phosphoric acid in prescribed —; Excess of (Legal Notes), 552.
- Medicine:** Quinine in prescribed —; Excess of (Legal Notes), 184.
- Medico-Legal Significance:** Nitric oxide haemoglobin; Post-mortem presence of. Its —. H. A. L. Banham, J. S. Haldane and T. Savage, 520.
- Melting Point:** Insoluble volatile acids from fats; The analytical value of the — of the. G. Van B. Gilmour, 119.
- Menthol Glycuronic Acid:** Urine; Quantitative determination of — in. A. J. Quick, 32.
- Merchandise Marks Act:** Lysol and the — (Legal Notes), 448.
- Mercurous Chloride:** Calomel ointment deficient in — (Legal Notes), 611.
- Mercury:** Copper from —; Separation of. G. Spacu, 580.
- Mercury:** Distilling —; New apparatus for. J. Wetzel, 361.
- Mercury:** —; Volumetric determination of. E. Rupp and K. Müller, 579.
- Mercury Poisoning:** Electric furnaces; — from. L. Jordan and W. P. Barrows, 84.
- Metabolism:** Body —; Water-cress and. S. M. Copeman, 568.
- Metabolism:** Glycogen; Studies on, Part I. The nature of yeast glycogen, its preparation, estimation, and rôle in yeast —. A. R. Ling, D. R. Nanji and F. J. Paton, 407.
- Metabolism:** Pentose —; Studies on. I. Colorimetric method for the determination of furfural. 34.
- Metal:** White —; Analysis of. H. Biltz, 473.
- Metallic Lead:** Litharge; Determination of — in. C. Mayr, 151.
- Metals:** Ammonia and ammonium sulphide group; Separation of — of the. K. K. Järvinen, 359.
- Metals:** Cryogenine with the heavy —; Colour reactions of. L. Bornet, 34.
- Metals:** Perchloric acid; Separation and determination of the alkali — by the use of. I. Solubilities of the perchlorates of the alkali — in mixed organic solvents. G. F. Smith, 254.
- Metals:** Perchloric acid; Separation and determination of the alkali — by the use of. II. Precise determination of the insoluble alkali metal perchlorates. G. F. Smith and J. F. Ross, 254.
- Metals:** Perchloric acid; Separation and determination of the alkali — by the use of. III. Normal butyl alcohol and ethyl acetate as mixed solvents in the separation and determination of potassium, sodium, and lithium. G. F. Smith and J. F. Ross, 307.

- Metals:** Pyridine, antipyrine, pyrazole or aniline; Identification of — as double halogenides with. I. M. Kolthoff and H. Hamer, 90.
- Meteorological Office:** —, Air Ministry. Advisory Committee on Atmospheric Pollution. Report on Observations in the Year Ending March 31st, 1924, 452.
- Methaemoglobin:** Cleavage products; Method for determining — in the presence of its. J. B. Conant and L. F. Fieser, 196.
- Methanol:** Synthetic —; Toxic action of. R. Hunt, 576.
- Methoxyl:** Micro-Determination of —. J. C. Smith, 302.
- Methylamine:** Ammonia; Detection of — in presence of excess of. P. A. Valton, 149.
- Methylated Spirit:** Cherry brandy; — as (Legal Notes), 70.
- Methylated Spirit:** Drunkenness from — (Legal Notes), 504.
- Methylene Blue:** —; Iodimetric determination of. T. Sabalitschka and W. Erdmann, 471.
- Methylene Blue:** Thiazine red; Preparation of polychrome — and. F. Proeschler and A. P. Krueger, 299.
- Methylhexaline:** Textile oils; Detection of — in. J. Marcussen, 524.
- Metrology Department:** National Physical Laboratory. —. Verification of Weight Testing of Balances, Determination of Densities, 291.
- Micro Analysis:** Gas; Burette for — of. J. A. Christiansen, 153.
- Micro Method:** Blood sugar; — for the determination of. E. Komm, 568
- Microchemical Identification:** Novocaine; Rapid — of. G. Denigès, 193.
- Microchemical Test:** Nucleic acid of the thymonucleic acid type; — for. R. Feulgen and H. Rossenbeck, 81.
- Micro-Determination:** Methoxyl; — of. J. C. Smith, 302.
- Micro-Organisms:** Decomposing oysters; — in. A. C. Hunter and B. A. Linden, 631.
- Micro-Organisms:** Proteins and amino acids by —; Decomposition of. S. A. Waksman and S. Lomanitz, 410.
- Micro-Organisms:** Yeast; Measurement of chemical action in —, especially in. T. Bokorny, 195.
- Microscopical Examination:** Cacao products; — of. V. A. Pease, 37.
- Milk:** Albino rat; Effect of chlorinated — on the. J. W. Read, 518.
- Milk and Dairies (Consolidation Act):** Ministry of Health. —, 1915. Circular 612; Preservatives, etc., in Food—Statutory Rules and Orders, 1925, 775; Public Health (Preservatives, etc., in Food) Regulations 1925, Circular 606, 453.
- Milk and Dairies (Consolidation) Act:** Ministry of Health. —, 1915. (5 and 6 Geo. 5. Ch. 66.) Milk and Dairy Orders, 612.
- Milk and Dairy Orders:** Ministry of Health. Milk and Dairies (Consolidation) Act, 1915. (5 and 6 Geo. 5. Ch. 66). —. 612.
- Milk:** Annatto in —; The detection of (Notes). A. D. Gardiner, 549.
- Milk:** Annatto in —; The detection of (Notes), H. Lowe, 335.
- Milk:** Calcium and phosphorus compounds in —; Effect of heat on the solubility of the. R. W. Bell, 466.
- Milk:** Cane sugar in condensed —; Determination of. K. Scheringa, 625.
- Milk:** Chlorine in —; The chlorine-lactose ratio and determination of. J. Drost, 624.
- Milk:** Chlorine in —; The Rupp method for the detection of. J. T. Keister, 624.
- Milk:** City of London; Examination of — in the, 554.
- Milk:** Cows' —; Direct precipitation of calcium in. C. S. Rothwell, 562.
- Milk:** Fat in condensed —; Determination of (Notes). J. McCrae, 236.
- Milk:** Growth and fertility of white rats; Mineral deficiencies of — as shown by. A. L. Daniels and M. K. Hutton, 246.
- Milk:** — "as it came from the cow" (Legal Notes), 20.
- Milk:** —, condensed and desiccated —; A contribution to the analysis of. H. Hurst, 438.
- Milk:** — sugar in —; Determination of (Notes). H. D. Richmond and L. R. Ellison, 17.
- Milk:** Ministry of Health. Dried —. Statutory Rules and Orders, 1923, No. 1323. Public Health, England, 343.
- Milk of Sulphur:** — (Legal Notes), 503.
- Milk:** Oxidation; Reproductive potency of dry — as affected by. G. C. Supplee and O. D. Dow, 245.
- Milk Powders:** Food; Whole and skimmed — as. Observations on a new vitamin for reproduction. L. T. Anderegg and V. E. Nelson, 351.
- Milk:** Proteins and mineral constituents of —; Influence of Pasteurisation on the digestibility of the. E. F. Terroine and H. Spindler, 245.
- Milk:** Punctured cooler; Watered — and a (Legal Notes), 610.
- Milk Regulations:** Condensed —; Summons under the (Legal Notes), 289.
- Milk:** Sucrose in condensed —; Polarimetric determination of. G. Jørgensen, 143.
- Milk Sugar:** Milk; Determination of — in (Notes). H. D. Richmond and L. R. Ellison, 17.
- Milk:** Turnip flavour of —. Orla-Jensen, 519.
- Milk:** Unstirred — (Legal Notes), 288.
- Milk:** Watered —: Related cases taken under two Acts (Legal Notes), 608.
- Milks:** Fat in condensed —; The determination of (Notes). R. W. Sutton, 17.
- Milkweed:** Seed hairs of the —; The. A. W. Schorger, 471.

- Mineral Acid:** Monosaccharides by means of dilute —; Condensation of. P. A. Levene and R. Ulpts, 463.
- Mineral Constituents:** Digestibility of the proteins and — of milk; Influence of Pasteurisation on the. E. F. Terroine and H. Spindler, 245.
- Mineral Deficiencies:** Growth and fertility of white rats; — of milk as shown by. A. L. Daniels and M. K. Hutton, 246.
- Mineral Matter:** Chocolate eggs; — in (Legal Notes), 238.
- Mineral Waters:** Natural —; Ageing of. O. Baudisch and L. A. Welo, 516.
- Minerals:** Radium in — containing tantalum, niobium and titanium; Determination of. P. Curie, 152.
- Ministry of Health:** —. Circular 553. Sale of Food and Drugs Acts, etc., R. B. Cross, 25.
- Ministry of Health:** —. Draft Rules and Orders, 1925. Public Health, England, 135.
- Ministry of Health:** —. Dried Milk. Statutory Rules and Orders, 1923, No. 1323. Public Health, England, 343.
- Ministry of Health:** —; Milk and Dairies (Consolidation Act), 1915, Circular 612; Preservatives, etc., in Food—Statutory Rules and Orders, 1925, 775; Public Health (Preservatives, etc., in Food) Regulations 1925, Circular 606. 453.
- Ministry of Health:** —: Milk and Dairies Consolidation Act, 1915. (5 and 6 Geo. 5. Ch. 66.) Milk and Dairy Orders, 612.
- Ministry of Health:** —. Sixth Annual Report, 1924-1925. 507.
- Ministry of Health:** —. Solubility of Glazes and Enamels Used in Cooking Utensils. Reports on Public Health and Medical Subjects G. W. Monier-Williams, 133.
- Ministry of Health:** —. Use of Preservatives and Colouring Matters in Food. 134.
- Minnesota State Dairy:** Food Commissioner; — and. Twentieth Biennial Report, 1924. 511.
- Misbranding:** Emmenagogue pills; — of (Legal Notes), 238.
- Misbranding:** Kidney pills; — of (Legal Notes), 504.
- Mitchell's Ferrous Tartrate Reagent:** Qualitative Analysis; The use of — in. A. H. Ware, 127.
- Molecular Weights:** —; New method for the determination of. G. Rastelli, 640.
- Molecule:** Jaffe's reaction for creatine; Chemistry of. II. Effect of substitution in the creatinine — and a possible formula for the red tautomeride. I. Greenwald, 350.
- Molybdenum:** Germanite; Analysis of (Determination of germanium, arsenic, gallium, and —). F. W. Kriesel, 91.
- Molybdenum:** Steel; Determination of — in. O. L. Maag and C. H. McCollam, 360.
- Molybdenum:** Tungsten and —; Toxicity of compounds of. T. Karantassis, 576.
- Molybdenum:** Tungsten; Tungsten; Separation of — from. I. Koppel, 36.
- Molybdenum:** Vanadium; Separation of — from. A. E. Stoppel, C. F. Sidener and P. H. M. P. Brinton, 418.
- Monocalcium Phosphate:** Baking powders; "Neutralising value" of — in. L. H. Bailey, 408.
- Monosaccharides:** Dilute mineral acid; Condensation of — by means of. P. A. Levene and R. Ulpts, 463.
- Murumuru:** Palm-kernel fat; —, an American. E. André and F. Guichard, 513.
- Muscle:** Shrimp; Nitrogen distribution in — of. D. B. Jones, O. Moeller and C. E. F. Gersdorff, 568.

N

- α -Naphthol:** β -naphthol; Detection and determination of small amounts of — in. T. Callan, 250.
- β -Naphthol:** α -naphthol in —; Detection and determination of small amounts of. T. Callan, 250.
- National Physical Laboratory:** —. Metrology Department. Verification of Weights, Testing of Balances, Determination of Densities. 291.
- Natural Fats:** Fatty acids constituents of some —. II. Palm kernel oil. E. F. Armstrong, J. Allan and C. W. Moore, 244.
- Natural Fats:** Fatty acid constituents of some —; The. I. The oils from the coconut. E. F. Armstrong, J. Allan and C. W. Moore, 191.
- Natural Mineral Waters:** Ageing of —. O. Baudisch and L. A. Welo, 516.
- Natural Unsaturated Fatty Acids:** —. Constitution of. Part II. Some acids present in a South Georgian whale oil. E. F. Armstrong and T. P. Hilditch, 303.
- Natural Waters:** Phenols in polluted —; Determination of minute amounts of. L. R. Vorce, 469.
- Navel Orange:** Glucosides of the —. J. A. Hall, 295.
- Nessler Solution:** —; Preparation of (Notes). H. D. Richmond, 336.
- Nessler's Solution:** —; Preparation of (Notes). H. D. Richmond, 67.
- Nessler's Solution:** —; Preparation of (Notes). R. C. Frederick, 183.
- Neutral Solution:** Nickel and other salts in —; Detection of cobalt occurring separately or in presence of, S. J. Jindal, 305.
- "Neutralising Value":** Monocalcium phosphate in baking powders; — of. L. H. Bailey, 408.
- New South Wales:** —. Department of Public Health. Annual Report of the Government Analyst for the Year 1923. T. Cooksey, 73.

- New Zealand Department of Health:** —. Regulations under the Sale of Foods and Drugs Acts, 1908. 30th June, 1924. 140.
- New Zealand:** —. Fifty-Seventh Annual Report of the Dominion Laboratory. 340.
- Nickel and other Salts:** Cobalt occurring separately or in presence of — in neutral solution; Detection of. S. J. Jindal, 305.
- Nickel:** Animal kingdom; — and cobalt in the G. Bertrand and M. Macheboeuf, 512.
- Nickel:** Arable land; — and cobalt in. G. Bertrand and M. Mokragatz, 84.
- Nickel:** Cobalt in the presence of —; A new colorimetric method for the determination of. B. S. Evans, 389.
- Nickel:** Complex oxalate electrolytes; The carbon error in the quantitative deposition of. — and iron from. P. K. Frölich, 224.
- Nickel:** Quantitative deposition of — and iron from complex oxalate electrolytes; The carbon error in the (Notes). P. K. Frölich, 444.
- Nickel:** Soils, plants, and animals; Copper, manganese, zinc, — and cobalt as vital factors in. J. S. McHargue, 409.
- Nickel:** Vegetable products; — and cobalt in. G. Bertrand and M. Mokragatz, 348.
- Nickel:** Zinc and — by hydrogen sulphide; Separation of. A. Kling and A. Lassieur, 200.
- Niobium:** Minerals containing tantalum, — and titanium; Determination of radium in. P. Curie, 152.
- Niobium:** Tantalum and — by "cupferron," and their separation from iron; Precipitation of. H. Pied, 36.
- Niobium:** Tantalum, —, and their mineral associates; Investigations into the analytical chemistry of. IV. A new method for the separation of tantalum from —. V. The detection and determination of tantalum in — compounds. A. R. Powell and W. R. Schoeller, 485.
- Nitrate:** Nitrogenous materials; Determination of — and ammonia in. O. M. Shedd, 33.
- Nitrates:** — and nitrites; New reactions of S. Vági, 308.
- Nitrates:** Organic reagent for the detection of — and perchlorates; New. C. S. Marvel and V. du Vigneaud, 93.
- Nitrates:** Sulphuric acid; Detection of nitric acid and — in. J. Wilson, 581.
- Nitric Acid:** Nitrites or —; The detection of plant phenols by the use of. A. H. Ware, 384.
- Nitric Acid:** Sulphuric acid; Detection of — and nitrates in. J. Wilson, 581.
- Nitric Oxide Haemoglobin:** Post-mortem presence of —. Its medico-legal significance. H. A. L. Banham, J. S. Haldane and T. Savage, 520.
- Nitrites:** Nitrates and —; New reactions of. S. Vági, 308.
- Nitrites:** Plant phenols by the use of — or nitric acid; The detection of. A. H. Ware, 384.
- Nitrobenzene:** Poisoning by —; A case of. R. Frossard, 415.
- p-Nitrobenzoic Acid:** Acidimetric standard; Use of. W. M. Thornton, Junr. and D. Getz, 304.
- Nitrogen:** Commercial electrolytic hydrogen; Determination of oxygen and — in. W. Steuer, 525.
- Nitrogen Compounds:** Amino acids and other organic — in lake water; Occurrence of. W. H. Peterson, E. B. Fred and B. P. Domogalla, 301.
- Nitrogen Distribution:** Muscle of shrimp; — in. D. B. Jones, O. Moeller and C. E. F. Gersdorff, 568.
- Nitrogen:** Kjeldahl method for the determination of —; Comparison of the Gunning-Arnold and Winkler modifications of the. K. S. Markley and R. M. Hann, 418.
- Nitrogen:** Lake waters; Forms of — found in certain. B. P. Domogalla, C. Juday and W. H. Peterson, 301.
- Nitrogen:** Protein —; Determination of small amounts of. E. R. Main and A. P. Locke, 413.
- Nitrogen:** Soils; Determination of the ammoniacal — in. W. McLean and G. W. Robinson, 33.
- Nitrogenous Groups:** Plant nucleic acid; The — of. W. Jones and M. E. Perkins, 194.
- Nitrogenous Materials:** Nitrate and ammonia in —; Determination of. O. M. Shedd, 33.
- Nitrous Oxide:** Oxides of nitrogen (except —) in small concentration in the products of combustion of coal gas and in air; The determination of. A. G. Francis and A. T. Parsons, 262.
- Non-Volatile Acids:** Blackberry; — of the. E. K. Nelson, 191.
- Non-Volatile Acids:** Strawberry, pineapple, raspberry, and Concord grape; — of the. E. K. Nelson, 295.
- Non-Volatile Organic Acids:** Alfalfa; — of. W. A. Turner and M. Hartman, 522.
- Noors Honey:** Problem of —; The. C. F. Juritz, 347.
- Notes:** 1925: 16, 64, 130, 180, 236, 284, 335, 395, 444, 498, 548, 604.
- Notes from the Reports of Public Analysts:** 1925: 67, 184, 237, 287, 337, 400, 446, 501, 551, 606.
- Novocaine:** Microchemical identification of —; Rapid. G. Denigès, 193.
- Novocaine:** Solutions of —; Colorimetric determination of. P. Chertmy, 78.
- Nucleic Acid:** Plant —; The nitrogenous groups of. W. Jones and M. E. Perkins, 194.
- Nucleic Acid:** Thymonucleic acid type; Microchemical test for — of the. R. Feulgen and H. Rossenbeck, 81.
- Nutritive Value:** Snail (*Helix pomatia*, L.); — of the. L. Leger, 76.

- Olive Oil:** Arachis oil in —; The detection of (Notes). A. D. Powell, 395.
- Olive Oil:** Arachis oil in —; The detection of (Notes). F. F. Shelley, 498.
- Olive Oils:** Turpentine oil; Application of Wood's Light to the examination of — and. Frehse, 361.
- Olives:** Oil in —; Acidity of the. R. Marcille, 27.
- Opium Alkaloids:** Picrates of the —. C. W. Maplethorpe and N. Evers, 567.
- Opium:** Paregoric without — (Legal Notes), 554.
- Optical Properties:** Amino acids; The — of some. G. L. Keenan, 88.
- Optical Rotations:** Lemon oil and sweet orange oil in alcoholic solution; — produced by. W. W. Randall, 28.
- Orange Juice:** Valencia —; Volatile constituents of. J. A. Hall and C. P. Wilson, 626.
- Orange:** Navel —; Glucosides of the. J. A. Hall, 295.
- Orange Oil:** Lemon oil and sweet — in alcoholic solution; Optical rotations produced by. W. W. Randall, 28.
- Orange:** Protein in the edible portion of —; A. A. H. Smith, 247.
- Oranges:** Dyed — (Notes). J. F. Liverseege, 183.
- Ores:** Bismuth in lead —; Determination of. V. Hassreidter, 152.
- Organic Acids:** Alfalfa; Non-volatile — of. W. A. Turner and M. Hartman, 522.
- Organic Analysis, Abstracts:** 1925: 33, 86, 149, 198, 249, 302, 354, 416, 469, 523, 577, 634.
- Organic Analysis:** Sodium hyposulphite (hydrosulphite) in —; Application of. E. Clark, 199.
- Organic Analysis:** Wet method; Elementary — by a. G. Vortmann, 469.
- Organic Chemistry:** Thallium compounds in —; Application of: Titrations. G. H. Christie and R. C. Menzies, 634.
- Organic Compounds:** Arsenic in —; Determination of. G. Newberry, 469.
- Organic Compounds:** Carbon in —; Rapid method for determining. H. D. Wilde, jun., and H. L. Lochte, 198.
- Organic Compounds:** Purity in —; Fluorescence as a criterion of. E. Bayle and R. Fabre, 256.
- Organic Cyanides:** "Alliols"; Detection of — in. L. Desvergnés, 348.
- Organic Matter:** Humification of soil —; Determination of the degree of. G. W. Robinson and J. O. Jones, 148.
- Organic Matter:** "perhydrol" and its application to toxicology; Destruction of — by. G. Magnin, 300.
- Organic Nitrogen Compounds:** Amino acids and other — in lake water; Occurrence of. W. H. Peterson, E. B. Fred and B. P. Domogalla, 301.
- Organic Reactions:** Titania; — at the surface of. Adsorption of certain gases by titania. F. Bischof and H. Adkins, 253.
- Organic Reagent:** Nitrates and perchlorates; New — for the detection of. C. S. Marvel and V. du Vigneaud, 93.
- Organic Solvents:** Alkali metals by the use of perchloric acid; Separation and determination of the. I. Solubilities of the perchlorates of the alkali metals in mixed —. G. F. Smith, 254.
- Organic Substances:** Carbon in —; Determination of. A. Desgrez and R. Vivario, 249.
- Organic Thiocyanogen Substitution Products:** —; Preparation of. H. P. Kaufmann, 634.
- Organo-Therapeutic Powders:** Analysing —; New principle for. M. Javillier, H. Allaire and M. Groc, 409.
- Organs:** Lead in —; Determination of minute quantities of. Alteration of dilute lead nitrate solutions. H. Bernhardt, 574.
- Osmosis:** Boric acid through the skin by —. The passage of. L. Kahlenberg, 83.
- Ova:** Fruits and vegetables by bacteria and other particulate matter; Penetration of Resistance of bacteria, protozoan cysts and helminth — to common disinfection methods. R. G. Mills, C. L. Bartlett and J. F. Kessel, 571.
- Oxalate Electrolytes:** Nickel and iron from complex —; The carbon error in the quantitative deposition of (Notes). P. K. Fröhlich, 444.
- Oxalate Electrolytes:** Quantitative deposition of nickel and iron from complex —; The carbon error in the. P. K. Fröhlich, 224.
- Oxalic Acid:** Bismuth subnitrate; Elimination of — in qualitative analysis by. A. Keschan, 579.
- Oxidation:** Chinese wood oil; — of. F. H. Rhodes, and T. T. Ling, 354.
- Oxidation:** Dry milk as affected by —; Reproductive potency of. G. C. Supplee and O. D. Dow, 245.

- Oxidation:** Fats to —; Measurement of the susceptibility of. G. R. Greenbank and G. E. Holm, 463.
- Oxidations:** Electrode-for — or reductions; Porous. M. Knobel, 527.
- Oxides of Nitrogen:** Products of combustion of coal gas and in air; The determination of — (except nitrous oxide) in small concentration in the. A. G. Francis and A. T. Parsons, 262.
- Oxidising Attack:** Tests for oxycellulose and for the — of cotton; Value and interpretation of. C. Birtwell, D. A. Clibbens and B. P. Ridge, 150.
- Oxy-Calorimeter:** Energy values of fuels, foods, etc.; The — for the determination of the. F. G. Benedict and E. L. Fox, 640.
- Oxycellulose:** Oxidising attack of cotton; Value and interpretation of tests for — and for the. C. Birtwell, D. A. Clibbens, and B. P. Ridge, 150.
- Oxygen:** Absorbent for — in gas analysis; New. L. F. Fiesher, 89.
- Oxygen:** Alkaline pyrogallol solutions; Absorption of — by. T. J. Drakely and H. Nicol, 636.
- Oxygen:** Alkaline pyrogallol solutions; The absorption of — and liberation of carbon monoxide by. T. J. Drakeley and H. Nicol, 578.
- Oxygen:** Carbon monoxide by the blood method; Determination of. Absorption of the gas by haemoglobin in absence of —. M. Nicloux, 417.
- Oxygen:** Commercial electrolytic hydrogen; Determination of — and nitrogen in. W. Steuer, 525.
- Oxygen Consumption:** Tissues; Apparatus for measuring the — of. A. E. Koehler, 300.
- Oxygen Content:** Commercial oxygen; Determination of the — of. B. Neumann and W. Steuer, 472.
- Oxygen:** Dissolved —; Determination of. J. N. Friend, 248.
- Oxygen:** —content of commercial —; Determination of the. B. Neumann and W. Steuer, 472.
- Oxygen:** Winkler method; Determination of dissolved — by the. E. J. Theriault, 632.
- Oysters:** Decomposing —; Micro-organisms in. A. C. Hunter and B. A. Linden, 631.
- Oysters:** Green growth on —; The. G. Ranson, 145.
- P**
- PH:** Acidosis; Studies of. XXI. Colorimetric determination of — of urine. A. B. Hastings, J. Sendroy, jun., and W. Robson, 628.
- PH:** Culture media under sterile conditions; Adjustment of — of. L. M. Christensen and E. I. Fulmer, 630.
- PH:** Spectrophotometric determination of —. F. Vlès, 201.
- PH:** Spectrophotometric determination of the —; The adsorption of indicator (resol red) by serum in the. E. F. Hirsch, 256.
- PH Value:** Dairy products by Biilmann's quinhedrone electrode; Measurement of — of. V. Lester, 37.
- PH Values:** Solutions; Colorimetric determination of the — of. E. Richard, 304.
- Paint:** White lead —; Adulteration of (Legal Notes), 132.
- Palestine:** Government of —. Annual Report of the Department of Health for the Year 1923. 22.
- Palladium:** Platinum; Separation of — from. F. Krauss and H. Deneke, 580.
- Palm-Kernel Fat:** American —; Murumuru, an. E. André and F. Guichard, 513.
- Palm Kernel Meal:** Bacon fat; The influence of — on the composition of. J. S. Willcox and H. T. Cranfield, 323.
- Palm Kernel Oil:** Fatty acid constituents of some natural fats; The. II. —. E. F. Armstrong, J. Allan and C. W. Moore, 244.
- Pancreatic and Malt Amylases:** Enzymic activity and heat destruction of —; Temperature coefficients of. D. H. Cook, 569.
- Papain:** Lipase. M. Sandberg and E. Brand, 410.
- Paper:** Analysis of —; Rapid methods for the. J. Croland, 357.
- Paper Pulp:** Cotton, linen and wood fibres in —; The quantitative determination of. W. Dickson, 317.
- Paraffin Wax:** Rubber goods; Determination of — in. J. Lagerqirst, 251.
- Paratyphoid Fever:** Ice-cream; — traced to. G. P. Kinloch, 632.
- Paregoric:** Opium; — without (Legal Notes), 554.
- Paris Green:** —; Sale of, 406.
- Particles:** Emulsions; Method for the determination of the distribution of size of — in. E. O. Kraemer and A. J. Stamm, 95.
- Particles:** Ultra-centrifuge; The. A new instrument for the determination of the size of — in amicroscopic colloids. T. Svedberg and H. Rinde, 95.
- Pasteurisation:** Proteins and mineral constituents of milk; Influence of — on the digestibility of the. E. F. Terroine and H. Spindler, 245.
- Pb₃O₄:** Red lead; Volumetric determination of — in. E. F. Figg, 199.
- Pearls:** Interior of —; New method for examining the. B. Szilard, 202.
- Peas:** Tinned and bottled —; Zinc in (Notes). C. H. Cribb and A. L. Still, 286.
- Peas:** Tinned and coppered —; Zinc in (Notes). C. H. Cribb and A. L. Still, 395.
- Peat:** Foodstuffs analysis; Examination of — by the methods of. A. P. Dachnowski, 304.
- Pectin:** Citrus —. H. D. Poore, 347.
- Pectin:** Conserves, with special reference to — and agar-agar; The adulteration of. J. King, 371.
- Pectin:** Fruit jelly; — in (Legal Notes), 503.

- Pectin:** Fruits and fruit products; — in. H. J. Wichmann, 28.
- Pectin Liquefaction:** Rosaceous fruit; — during ripening of. C. Griebel, 297.
- Pectin:** Pectose and — in apple tissue; Relation of. M. H. Carré, 464.
- Pectose:** Apple tissue; Relation of — and pectin in. M. H. Carré, 464.
- Pentosans:** —; Determination of. F. W. Klingstedt, 416.
- Pentose Metabolism:** —; Studies on. I. Colorimetric method for the determination of furfural, 34.
- Pentoses:** Plants; Occurrence of free — in. Effect of extraction of the sugars with ammoniacal alcohol. D. T. Englis and C. Hale, 199.
- Peptic Synthesis:** Protein; Enzymatic synthesis of. IV. Effect of concentration on —. H. Borsook and H. Wasteneys, 350.
- Perchlorates:** Alkali metals by the use of perchloric acid; Separation and determination of the. II. Precise determination of the insoluble alkali metal —. G. F. Smith and J. F. Ross, 254.
- Perchlorates:** Nitrates and —; New Organic reagent for the detection of. C. S. Marvel and V. du Vigneaud, 93.
- Perchlorates of the Alkali Metals:** Alkali metals by the use of perchloric acid; Separation and determination of the. I. Solubilities of the — in mixed organic solvents. G. F. Smith, 254.
- Perchloric Acid:** Alkali metals by the use of —; Separation and determination of the. I. Solubilities of the perchlorates of the alkali metals in mixed organic solvents. G. F. Smith, 254.
- Perchloric Acid:** Alkali metals by the use of —; Separation and determination of the. II. Precise determination of the insoluble alkali metal perchlorates. G. F. Smith and J. F. Ross, 254.
- Perchloric Acid:** Alkali metals by the use of —; Separation and determination of the. III. Normal butyl alcohol and ethyl acetate as mixed solvents in the separation and determination of potassium, sodium, and lithium. G. F. Smith and J. F. Ross, 307.
- "Perhydrol":** Toxicology; Destruction of organic matter by — and its application to. G. Magnin, 300.
- "Permeability-to-Gas":** Sands; Method of testing the — of. A. L. Curtis, 638.
- Peroxide Fusions:** Explosion method for —. W. F. Muehlberg, 473.
- Peroxidised:** Lead anodes. G. Bozza and M. Bertozzi, 154.
- Petrol:** Lead in —; Determination of. T. von Fellenberg, 352.
- Petroleum:** Fat of algae in relation to —; The. J. Marcusson, 416.
- Phenol Red:** Proteins; The combination of — and. A. Grollman, 412.
- Phenols:** Essential oils; New methods for the rapid determination of — in. L. Reti, 302.
- Phenols:** Nitrates or nitric acid; The detection of plant — by the use of. A. H. Ware, 384.
- Phenols:** Polluted natural waters; Determination of minute amounts of — in. L. R. Vorce, 469.
- Phenols:** Tar oils; Determination of — in. J. J. Morgan and M. H. Meighan, 471.
- Phloroglucinol test:** Tea by the —; Identification of. C. J. Stracke, 297.
- Phosphate:** Fertilisers; Citric-soluble — in (Legal Notes), 401.
- Phosphates:** Zirconium and hafnium; Solubilities of the — of. G. Hevesy and K. Kimura, 637.
- Phosphor Bronzes:** Phosphorus in —; Determination of. L. Lindemann, 94.
- Phosphoric Acid:** Bismuth subnitrate; Elimination of — in qualitative analysis by. A. Keschan, 200.
- Phosphoric Acid:** Prescribed medicine; Excess of — in (Legal Notes), 552.
- Phosphorus Compounds:** Solubility of the calcium and — in milk; Effect of heat on the. R. W. Bell, 466.
- Phosphorus:** Lipoid — in blood and plasma; Method for the determination of. J. C. Whitehorn, 82.
- Phosphorus:** Phosphor bronzes; Determination of — in. L. Lindemann, 94.
- Physical Methods, Apparatus, Etc. Abstracts:** 1925: 37, 95, 153, 201, 256, 308, 361, 419, 475, 526, 581, 638.
- Physico-Chemical Analysis:** Ultra-filter; A collodion membrane. — of solutions. E. Fourd, 201.
- Phytosterol:** Irradiated — and cholesterol; Antirachitic value of. A. F. Hess, M. Weinstock and F. D. Helman, 299.
- Phytosterol:** Irradiated cholesterol and —; Antirachitic value of. II. Further evidence of change in biological activity. A. F. Hess and M. Weinstock, 412.
- Phytosterol:** Irradiated cholesterol and —; Antirachitic value of. III. Evidence of chemical change as shown by absorption spectra. A. F. Hess and M. Weinstock, 411.
- Picrates:** Opium alkaloids; — of the. C. W. Maplethorpe and N. Evers, 567.
- Picric Acid:** Mixture of — and trinitro-metacresol; Gravimetric determination of — in a. L. Desvergnés, 250.
- Pigment:** Red water-soluble — characteristic of *B. pyocyaneus*; Pyorubin, a. P. D. Meader, G. H. Robinson and V. Leonard, 573.
- Pills:** Emmenagogue —; Misbranding of (Legal Notes), 238.
- Pills:** Misbranding of kidney — (Legal Notes), 504.
- Pineapple:** Strawberry, —, raspberry, and Concord grape; Non-Volatile acids of the. E. K. Nelson, 295.
- Pipes:** Water upon copper —; Action of. J. C. Thresh, 248.
- Plant Gums:** South Western United States; Some — of the. E. Anderson, L. Sands and N. Sturgis, 635.

- Plant Nucleic Acid:** Nitrogenous groups of — ; The. W. Jones and M. E. Perkins, 194.
- Plant Phenols:** Nitrites or nitric acid; The detection of — by the use of. A. H. Ware, 384.
- Plants:** Acetaldehyde in the fruit and other parts of — ; Occurrence of. C. Griebel, 295.
- Plants:** Free pentoses in — ; Occurrence of Effect of extraction of the sugars with ammoniacal alcohol. D. T. Englis and C. Hale, 199.
- Plants:** "Hesperidin" of certain — ; The. O. A. Oesterle and G. Wander, 627.
- Plants:** Vital factors in soils, —, and animals; Copper, manganese, zinc, nickel and cobalt as. J. S. McHargue, 409.
- Plasma:** Lipoid phosphorus in blood and — ; Method for the determination of. J. C. Whitehorn, 82.
- Platinum:** Palladium from — ; Separation of. F. Krauss and H. Deneke, 580.
- Poisoning:** *Asparagus officinalis*; — by *Veratrum album* L., through confusion with J. Maheu and P. Chéramy, 576.
- Poisoning:** Electric furnaces; Mercury — from. L. Jordan and W. P. Barrows, 84.
- Poisoning:** Flies; An outbreak of food — traced to, 556.
- Poisoning:** Hydrocyanic acid in cases of — ; Detection of. G. Magnin, 300.
- Poisoning:** Lead tetraethyl —. H. Leffmann, 84.
- Poisoning:** Linseed cake meal; A case of prussic acid — with (Notes). H. T. Cranfield, 18.
- Poisoning:** Medical Research Council. Food — A Study of 100 Recent Out-breaks, 341.
- Poisoning:** Medical Research Council. Investigation of the Salmonella Group, with Special Reference to Food —. 239.
- Poisoning:** Nitrobenzene; A case of — by. R. Frossard, 415.
- Poisoning:** Sulphonal —. Localisation of sulphonal and haematoporphyrin. R. Fabre and H. Simonnet, 575.
- Poisonous Alkaloid:** Transvaal *Homeria pallida*; — from the. M. Rindl, 85.
- Poisonous Gases:** Blood; Detection of — in. E. Kohn-Abrest, 81.
- Poisons Schedule:** — ; Additions to. 291.
- Poisoning:** Shoe dyes; — by. C. W. Muehlberger, 468.
- Polarimetric Method:** Diastatic power by the — ; Effect of hydrogen ion concentration on the determination of. H. C. Gore, 143.
- Polarimetric use:** Lithium arc spectrum for —. P. C. Austin, 476.
- Polarisation:** Inorganic salts on the — of sugar solutions; Effect of some. R. J. Brown, 143.
- Polluted Natural Waters:** Phenols in — ; Determination of minute amounts of. L. R. Vorce, 469.
- Pollution:** Atmospheric — ; The Problem of. H. Osborne, 23.
- Pollution:** Meteorological Office, Air Ministry. Advisory Committee on Atmospheric —. Report on Observations in the Year Ending March 31st, 1924. 452.
- Pollution:** Shell-fish; Detection of — in. J. W. H. Eyre, 80.
- Polychrome Methylene Blue:** Thiazine red; Preparation of — and. F. Proescher and A. P. Krueger, 299.
- Polysulphide Sulphur:** Spray materials; Determination of — in. W. Goodwin and H. Martin, 148.
- Porous Electrode:** Oxidations or reductions; — for. M. Knobel, 527.
- Post-Mortem Presence:** Nitric oxide haemoglobin; — of. Its medico-legal significance. H. A. L. Banham, J. S. Haldane and T. Savage, 520.
- Potassium:** Alkali metals by the use of perchloric acid; Separation and determination of the. III. Normal butyl alcohol and ethyl acetate as mixed solvents in the separation and determination of —, sodium, and lithium. G. F. Smith and J. F. Ross, 307.
- Potassium Dichromate:** Antimony and tin by — ; Electrometric titration of. M. H. Fleyscher, 94.
- Potassium Stearate:** Soluble sulphates by means of barium chloride and — ; The volumetric determination of. H. Atkinson, 590.
- Potassium Tripyrocatechol Ferrate:** Indicator in acidimetry and alkalimetry; — as. K. Binder, 305.
- Potentiometric Determination:** Cerium; — of. O. Tomiček, 360.
- Powders:** Organo-therapeutic — ; New principle for analysing. M. Javillier, H. Allaire, and M. Groc, 409.
- Powders:** Suprarenal — by an application of the Denigès-Grimbert-Leclère reaction; Determination of adrenaline in. O. Bailly, 78.
- Precipitant:** Digallic acid as a — ; Crystalline (Notes). M. Nierenstein, 604.
- Preservatives:** Ministry of Health; Milk and Dairies (Consolidation Act), 1915, Circular 612; —, etc., in Food-Statutory Rules and Orders, 1925, 775; Public Health (—, etc., in Food) Regulations 1925, Circular 606. 453.
- Preservatives:** Ministry of Health. Use of — and Colouring Matters in Food, 134.
- Preserved Eggs:** Bacterial flora of —. H. Popp, 631.
- President:** Retiring — ; Annual Address of the. 104.
- Protein:** Enzymatic synthesis of —. IV. Effect of concentration on peptic synthesis. H. Borsook and H. Wasteneys, 350.
- Protein:** Enzymatic synthesis of —. V. Note on the synthesising action of trypsin. H. Wasteneys and H. Borsook, 351.
- Protein Nitrogen:** Small amounts of — ; Determination of. E. R. Main and A. P. Locke, 413.
- Protein:** Orange; A — in the edible portion of. A. H. Smith, 247.

- Protein:** Sausages; Ratio of gelatin-forming substance to total — in. O. Luning and S. Gerö, 347.
- Protein:** Urinary —; Nature of. A. Hynd, 627.
- Proteinaceous Food Products:** Hydrogen sulphide in —; Method for the determination of. L. H. Almy, 349.
- Proteins:** Formaldehyde and serum —; Mechanism of the interaction of. R. R. Henley, 350.
- Proteins:** Histological reaction for —; New. M. Romieu, 245.
- Proteins:** Hydrolysis of —; Methods for the determination of the products of the. J. Froidevaux, 297.
- Proteins:** Micro-organisms; Decomposition of — and amino acids by. S. A. Waksman and S. Lomanitz, 410.
- Proteins:** Pasteurisation on the digestibility of the — and mineral constituents of milk; Influence of. E. F. Terroine and H. Spindler, 245.
- Proteins:** Phenol red and —; The combination of. A. Grollman, 412.
- Proteus Bacillus:** Haemolytic —; Study of a. B. S. Kline, 571.
- Protozoan Cysts:** Fruits and vegetables by bacteria and other particulate matter; Penetration of. Resistance of bacteria, — and helminth ova to common disinfection methods. R. G. Mills, C. L. Bartlett and J. F. Kessel, 571.
- Prussic Acid Poisoning:** Linseed cake meal; A case of — with (Notes). H. T. Cranfield, 18.
- Ptomaines:** Toxicological work; Two — met with in. L. van Itallie and A. J. Steenhauer, 415.
- Public Analyst and Bacteriologist:** City and County of Kingston-upon-Hull. Annual Report of the — for 1924. A. R. Tankard, 551.
- Public Analyst:** County Borough of Bolton. Annual Report of the — for 1924. H. Hurst, 501.
- Public Analyst:** Hammersmith Borough Council. Annual Report of the — for 1924. P. A. E. Richards, 237.
- Public Health:** Ministry of Health. Dried Milk. Statutory Rules and Orders, 1923. No. 1323. —, England. 343.
- Public Health:** Ministry of Health. Solubility of Glazes and Enamels Used in Cooking Utensils. Reports on — and Medical Subjects. G. W. Monier-Williams, 133.
- Public Health Regulations:** Ministry of Health: Milk and Dairies (Consolidation Act), 1915, Circular 612; Preservatives, etc., in Food—Statutory Rules and Orders, 1925, 775; — (Preservatives, etc., in Food) 1925, Circular 606. 453.
- Publications Received:** 1925: 48, 160, 208, 316, 588.
- Purity:** Ice; The — of. O. v. Hubay, 631.
- Purity:** Organic compounds; Fluorescence as a criterion of — in. E. Bayle and R. Fabre, 256.
- Putrefying Flesh:** Alcohol; Detection of — by means of. Lüttge and Mertz, 190.
- Pyorubin:** Red water-soluble pigment characteristic of *B. pyocyaneus*; — a. P. D. Meader, G. H. Robinson and V. Leonard, 573.
- Pyrazole:** Metals as double halogenides with pyridine, antipyrine, — or aniline; Identification of. I. M. Kolthoff and H. Hamer, 90.
- Pyridine:** Metals as double halogenides with —, antipyrine, pyrazole or aniline; Identification of. I. M. Kolthoff and H. Hamer, 90.
- Pyrites:** Copper in iron —; Determination of. T. Heczko, 579.
- Pyrogallol and Catechol Derivatives:** Hydrogen ion concentration on the colorimetric determination of —; The influence of. S. Glasstone, 49.
- Pyrogallol:** Bismuth and its separation from lead by —; Determination of. F. Feigl and H. Ordelt, 252.
- Pyrogallol Solutions:** Absorption of oxygen and liberation of carbon monoxide by alkaline —; The. T. J. Drakeley and H. Nicol, 578.
- Pyrogallol Solutions:** Oxygen by alkaline —; Absorption of. T. J. Drakeley and H. Nicol, 636.

Q

- Qualitative Analysis:** Mitchell's ferrous tartrate reagent in —; The use of. A. H. Ware, 127.
- Qualitative Analysis:** Oxalic acid in — by bismuth subnitrate; Elimination of. A. Keschan, 579.
- Qualitative Analysis:** Phosphoric acid in — by bismuth subnitrate; Elimination of. A. Keschan, 200.
- Qualitative Test:** Weak bases; — for. R. Robinson, 304.
- Qualitative Tests:** Copper, iron and cobalt; New — for. M. L. Nichols and S. R. Cooper, 358.
- Quantitative Colour Test:** Grignard reagent; — for the. H. Gilman and F. Schulze, 523.
- Queensland:** —. Report of the Government Analyst for the Year Ended June 30, 1924. J. B. Henderson, 20.
- Quercitin:** Tea leaves; — in. J. J. B. Deuss, 348.
- Quinhydrone Electrode:** Dairy products by Biilmann's —; Measurement of P_H value of. V. Lester, 37.
- Quinine:** Prescribed medicine; Excess of — in (Legal Notes). 184.

R

- Radium:** Tantalum, niobium and titanium; Determination of — in minerals containing P. Curie, 152.
- Rancidity:** Fat and oils; Detection of — in. T. von Fellenberg, 245.

- Rancidity:** Fats; The — of. H. E. Fierz-David, 244.
- Rancidity:** Kreis test; — and the. T. W. Jones, 77.
- Rare Earths:** Thorium from zirconium and the trivalent —; Separation of. L. Fernandes, 253.
- Rare Earths:** Uranium; Separation of — from. Alkali uranyl-salicylates. G. Canneri and L. Fernandes, 35.
- Raspberry:** Strawberry, pineapple, —, and Concord grape; Non-Volatile acids of the. E. K. Nelson, 295.
- Rat:** Chlorinated milk on the albino —; Effect of. J. W. Read, 518.
- Rat Virus:** London; Use of — in. 555.
- Rats:** Excreta of — on a diet low in this factor; Vitamin B in. W. D. Salmon, 628.
- Rats:** Growth and fertility of white —; Mineral deficiencies of milk as shown by. A. L. Daniels and M. K. Hutton, 246.
- Raw or Vulcanised Rubber:** Sulphur in mixtures of —; Determination of. V. C. Butironi, 87.
- Reactions:** Nitrates and nitrites; New — of. S. Vági, 308.
- Reagent:** Aluminium; New — for. L. P. Hammett and C. T. Sottery, 152.
- Reagent:** Carbon monoxide; On the absorption of. Part I. A critical comparison of some methods employed in gas analysis. Part II. Advantages of using hot —. H. R. Ambler and T. C. Sutton, 167.
- Reagent:** Nitrates and perchlorates; New organic — for the detection of. C. S. Marvel and V. du Vigneaud, 93.
- Reagent:** Qualitative analysis; The use of Mitchell's ferrous tartrate — in. A. H. Ware, 127.
- Reagents:** Antirachitic substance in cod liver oil to —; Resistance of the. C. E. Bills, 410.
- Red Lead:** Pb_3O_4 in —; Volumetric determination of. E. F. Figg, 199.
- Red Tautomeride:** Creatinine; Chemistry of Jaffe's reaction for. II. Effect of substitution in the creatinine molecule and a possible formula for the —. I. Greenwald, 350.
- Red Water-Soluble Pigment:** Pyorubin, a — characteristic of *B. pyocyaneus*. P. D. Meader, G. H. Robinson and V. Leonard, 573.
- Reducing Agent:** Iron; Copper as a — in the determination of. J. M. Hendel, 91.
- Reducing Powers:** Sugars; Relative — of. A. W. Rowe and B. S. Wiener, 407.
- Reducing Substances:** Different vinegars; — in. G. Reif, 191.
- Reducing Sugars:** Fehling's solution for the volumetric determination of —; Preparation of. J. H. Lane and L. Eynon, 244.
- Reductions:** Oxidations or —; Porous electrode for. M. Knobel, 527.
- Refrigerated Holds:** Department of Scientific and Industrial Research. Food Investigation Board. Special Report No. 21. The "gas" content and ventilation of — carrying apples. 187.
- Regulations:** Colouring Matters; Italian — on 189.
- Report:** City and County of Kingston-upon-Hull. Annual — of the Public Analyst and Bacteriologist for 1924. A. R. Tankard, 551.
- Report:** City of Birmingham. Annual — of the City Analyst for 1924. J. F. Liversseege, 337.
- Report:** City of Birmingham. City Analyst's — for the First Quarter, 1925. J. F. Liversseege, 446.
- Report:** City of Birmingham. — of the City Analyst for the Third Quarter, 1924. J. F. Liversseege, 67.
- Report:** City of Birmingham. — of the City Analyst for the Fourth Quarter, 1924. J. F. Liversseege, 184.
- Report:** City of Birmingham. — of the City Analyst for the Second Quarter, 1925. J. F. Liversseege, 502.
- Report:** City of Birmingham. — of the City Analyst for the Third Quarter, 1925. J. F. Liversseege, 605.
- Report:** County Borough of Bolton. Annual — of the Public Analyst for 1924. H. Hurst, 501.
- Report:** County Borough of Salford. Annual — of the Borough Analyst for 1924. G. D. Elsdon, 607.
- Report:** County of Kent. — of the County Analyst for the Fourth Quarter, 1924. F. W. Arnaud, 287.
- Report:** Department of Scientific and Industrial Research. Food Investigation Board. Special — No. 21. The "gas" content and ventilation of refrigerated holds carrying apples, 187.
- Report:** Department of Scientific and Industrial Research. Food Investigation Board. Special — No. 22. "Brown Heart in Australian Apple Shipments." 188.
- Report:** Department of Scientific and Industrial Research. — of the Food Investigation Board for 1923. 71.
- Report:** Fertilisers and Feeding Stuffs Advisory Committee; — of the. 557.
- Report:** Fuel Research Board. — for Period Ended 31st December, 1924. 621.
- Report:** Government Chemist upon the work of the Government Laboratory; — of the. For the Year Ending March 31st, 1925, 504.
- Report:** Government of Madras. — of the Chemical Examiner for the Year 1924. 449.
- Report:** Government of Palestine. Annual — of the Department of Health for the Year 1923. 22.
- Report:** Hammersmith Borough Council. Annual — of the Public Analyst for 1924. P. A. E. Richards, 237.
- Report:** Meteorological Office, Air Ministry. Advisory Committee on Atmospheric Pollution. — on Observations in the Year Ending March 31st, 1924. 452.
- Report:** Ministry of Health. Sixth Annual —, 1924-1925. 507.

- Report:** Minnesota State Dairy and Food Commissioner Twentieth Biennial —, 1924. 511.
- Report:** New South Wales. Department of Public Health. Annual — of the Government Analyst for the Year 1923. T. Cooksey, 73.
- Report:** New Zealand. Fifty-seventh Annual — of the Dominion Laboratory. 340.
- Report:** Queensland. — of the Government Analyst for the Year Ended June 30, 1924. J. B. Henderson, 20.
- Report:** Stepney; Metropolitan Borough of. Annual — of the Borough Analyst for 1924. D. Henville, 447.
- Report:** Water; Advisory Committee on. — on Measures for the Protection of Underground Water, 509.
- Reports:** Ministry of Health. Solubility of Glazes and Enamels Used in Cooking Utensils. — on Public Health and Medical Subjects. G. W. Monier-Williams. 133.
- Reproductive Potency:** Dry milk as affected by oxidation; — of. G. C. Supplee and O. D. Dow, 245.
- Research Board:** Fuel —. Report for Period Ended 31st December, 1924. 621.
- Resin Acids:** —; Determination of. R. Jungkunz, 357.
- Resins:** Hops; Determination of hard and soft — in. A. C. Chapman, 144.
- Review of Books:**
- Acids:** — and Alkalis; Vol. IV. of the Manufacture of. G. Lunge, 534.
- Agricultural Chemists:** Association of Official —; Official and Tentative Methods of Analysis of the, 529.
- Alkalis:** Acids and —; Vol. IV. of the Manufacture of. G. Lunge, 534.
- Allen's:** Commercial Organic Analysis. Vol. 2. Fixed Oils, Fats and Waxes. Edited by S. S. Sadtler, E. C. Lathrop and C. A. Mitchell, 156.
- Allen's:** Commercial Organic Analyses. Vol. III, 527.
- Analysis:** Quantitative — and its Practical Application; The Theory of. H. Bassett, 309.
- Anatomy:** S. P. E. Tracts. No. IX. The Language of —. W. C. Morton. No. XV. The Split Infinitive. H. W. Fowler, 536.
- Annual Tables:** Constants and Numerical Data; — of: Chemical, Physical and Technological. Vol. 5, 476.
- Antiquities:** —: Their Restoration and Preservation. A. Lucas, 102.
- Applied Chemistry:** Progress of —; Reports of the. Vol. IX., 477.
- Atome:** d'Elément Chimique et d' —; Les Notions Fondamentales. G. Urbain, 641.
- l'Atome:** L'Origine Tourbillonnaire de — et ses Conséquences. J. V. D'Ainville, 204.
- Biochemistry:** Fats; The (Monographs on —). J. B. Leathes and H. S. Raper, 583.
- Reviews of Books—continued:**
- Bituminous:** Substances. P. E. Spielman, 257.
- Boiler Feed:** Water. N. Simpkins and A. Dawe, 367.
- Ceramic Materials:** Clays and Other —; The Chemistry and Physics of. A. B. Searle, 45.
- Chemical Age Dictionary:** Chemical Terms; — of, 315.
- Chemical Analysis:** Inorganic and Organic Substances; A Systematic Course of Qualitative — of. H. W. Schimpf, 98.
- Chemical Reactions:** Common Elements; Charts of the — of the. J. A. Timm, 257.
- Chemical Science:** Twentieth Century; Chem- in the. An Account of the Achievement and the Present State of Knowledge in —. E. F. Armstrong (as Chairman and Editor), 39.
- Chemical Synonyms:** Trade Names; Com- panion to the First Edition of — and. W. Gardner, 588.
- Chemical Terms:** Dictionary of —; The "Chemical Age." 315.
- Chemistry:** Applied —; Reports of the Progress of. Vol. IX., 477.
- Chemistry:** Clays and Other Ceramic Materials; The — and Physics of. A. B. Searle, 45.
- Chemistry:** Colloid —; The Foundations of. A Selection of Early Papers Bearing on the Subject. E. Hatschek, 478.
- Chemistry:** Colloidal —; The Elements of. H. Freundlich, 158.
- Chemistry:** Early —; The Story of. J. M. Stillman, 362.
- Chemistry:** Inorganic —; Modern. J. W. Mellor, 530.
- Chemistry:** Literature of —; An Intro- duction to the. F. A. Mason, 421.
- Chemistry:** Man; — in the Service of. A. Findlay, 259.
- Chemistry:** Medical Students; A Manual of — for. A. P. Luff and H. C. H. Candy, 643.
- Chemistry:** Micro-Methods; Practical — by. E. C. Grey, 423.
- Chemistry:** Physical —; A System of. W. C. M. Lewis, 586.
- Chemistry:** Twentieth Century; — in the. An Account of the Achievement and the Present State of Knowledge in Chemical Science. E. F. Armstrong (as Chairman and Editor), 39.
- Chemists:** German-English Dictionary for —; A. A. M. Patterson, 260.
- Chemists:** Methods of Analysis of the Asso- ciation of Official Agricultural —; Official and Tentative, 529.
- Chemists':** Year Book; The —. F. W. Atack, 421.
- Clays:** Ceramic Materials; The Chemistry and Physics of — and Other. A. B. Searle, 45.

Reviews of Books—continued :

- Coal Tar:** Constituents of —; The. P. E. Spielman, 206.
- Cold Working:** Steel; Wire Drawing and the — of. A. T. Adam, 644.
- Colloid Chemistry:** Foundations of —; The. A Selection of Early Papers Bearing on the Subject. E. Hatschek, 478.
- Colloid:** Chemistry. J. Alexander, 259.
- Colloidal Chemistry:** Elements of —; The. H. Freundlich, 158.
- Common Elements:** Chemical Reactions of the —; Charts of the. J. A. Timm, 257.
- Compositors:** University Press, Oxford; Rules for — and Readers at the. H. Hart, 535.
- Concentration:** Sulphuric Acid; The — of. J. W. Parkes, 99.
- Constants:** Annual Tables of — and Numerical Data: Chemical, Physical and Technological. Volume 5. 576.
- (Contact Process):** Sulphuric —; The Manufacture of. F. D. Miles. Vol. IV. of the Manufacture of Acids and Alkalis. By G. Lunge, 534.
- Dairy Analysis:** Laboratory Book of —; The. H. D. Richmond, 422.
- Destructive Distillation:** Wood; The — of. H. M. Bunbury, 159.
- Detergent Industry:** Soap and —, Including Glycerol Manufacture; The Modern. Vol. I. Theory and Practice of Soap-making. G. Martin, 100.
- Dictionary:** Chemical Terms; The "Chemical Age" — of. 315.
- Dictionary:** Chemists; A German-English — for. A. M. Patterson, 260.
- Digitalis:** Allies; The Action and Uses in Medicine of — and its. A. R. Cushny, 533.
- Early Chemistry:** —; The Story of. J. M. Stillman, 362.
- Élément Chimique:** Les Notions Fondamentales d'— et d'Atome. G. Urbain, 641.
- Elements:** Chemical Reactions of the Common —; Charts of the. J. A. Timm, 257.
- Engineers:** Metallurgy for —; A Course of. F. C. Thompson, 587.
- Enzyme Action:** Nature of —; The. (Monographs on Biochemistry, edited by Dr. R. H. A. Plimmer and Sir F. G. Hopkins). W. M. Bayliss, 479.
- Extra Pharmacopoeia:** Martindale and Westcott: The — of. W. H. Martindale and W. W. Westcott, 98.
- Fats:** —; The (Monographs on Biochemistry. J. B. Leathes and H. S. Raper, 583.
- Fixed Oils, Fats and Waxes:** Allen's Commercial Organic Analysis. Vol. 2. —. Edited by S. S. Sadtler, E. C. Lathrop and C. A. Mitchell, 156.
- Food:** Scientific Preservation of —; The. T. M. Rector, 365.
- Forensic:** Medicine. S. Smith, 368.
- Gases:** Specific Heats of —; The. J. R. Partington and W. G. Shilling, 158.

Reviews of Books—continued :

- Gaz Nobles:** L'Hydrogène et les —. J. J. Van Laar, 420.
- German-English Dictionary:** Chemists; A — for. A. M. Patterson, 260.
- Glycerol Manufacture:** Soap and Detergent Industry, Including —; The Modern. Vol. I. Theory and Practice of Soap-Making, G. Martin, 100.
- Handbook:** Volumetric Analysis; A Systematic — of. F. Sutton, 42.
- Heats:** Gases; The Specific — of. J. R. Partington and W. G. Shilling, 158.
- L'Hydrogène:** Gaz Nobles; — et les. J. J. Van Laar, 420.
- Inorganic and Organic Substances:** Qualitative Chemical Analysis of —; A Systematic Course of. H. W. Schimpf, 98.
- Inorganic and Theoretical Chemistry:** Comprehensive Treatise on —; A. Vol. 5. J. W. Mellor, 154.
- Inorganic Chemistry:** —; Modern. J. W. Mellor, 530.
- Laboratory Book:** Dairy Analysis; The — of. H. D. Richmond, 422.
- Literature:** Chemistry; An Introduction to the — of. F. A. Mason, 421.
- Man:** Service of —; Chemistry in the. A. Findlay, 259.
- Manual of Chemistry:** Medical Students; A for. A. P. Luff and H. C. H. Candy, 643.
- Medical Students:** Chemistry for —; A Manual of. A. P. Luff and H. C. H. Candy, 643.
- Medicaments:** Organic — and Their Preparation. E. Fourneau, 532.
- Medicine:** Digitalis and its Allies; The Action and Uses in — of. A. R. Cushny, 533.
- Medicine:** Forensic —. S. Smith, 368.
- Medicine:** Students of —; Physical Chemistry for. A. Findlay, 313.
- Metallurgy:** Engineers; A Course of — for. F. C. Thompson, 587.
- Metallurgy:** —. An Elementary Text-Book. E. L. Rhead, 207.
- Micro-Analysis:** Organic —; Quantitative. F. Pregl, 96.
- Mikrochemisches:** Praktikum. F. Emich, 41.
- Micro-Methods:** Practical Chemistry by —. E. C. Grey, 423.
- Numerical Data:** Constants and —; Chemical, Physical and Technological; Annual Tables of. Vol. 5. 476.
- Official Agricultural Chemists:** Association of —; Official and Tentative Methods of Analysis of the. 529.
- Official and Tentative Methods of Analysis:** Official Agricultural Chemists; — of the Association of. 529.
- Organic Analysis:** Commercial —; Allen's Vol. 2. Fixed Oils, Fats and Waxes. Edited by S. S. Sadtler, E. C. Lathrop and C. A. Mitchell, 156.

Reviews of Books—continued:

- Organic Analysis:** Allen's Commercial —. Vol. III. 527.
- Organic Analysis:** Qualitative —. An Elementary Course in the Identification of Organic Compounds. O. Kamm, 44.
- Organic Compounds:** Qualitative Organic Analysis. An Elementary Course in the Identification of —. O. Kamm, 44.
- Organic Compounds:** Synthetic —. S. P. Schotz, 258.
- Organic Medicaments:** Preparation; — and Their. E. Fourneau, 532.
- Organic Micro-Analysis:** —; Quantitative. F. Pregl, 96.
- Organic Research:** —; Introduction to. E. E. Reid, 314.
- Organic Substances:** Qualitative Chemical Analysis of Inorganic and —; A Systematic Course of. H. W. Schimpf, 98.
- l'Origine Tourbillonnaire:** l'Atome et ses Conséquences; — de. J. V. D'Ainville, 204.
- Pharmacopœia:** Extra —; The. Revised by W. H. Martindale and W. W. Westcott, 585.
- Pharmacopœia:** Martindale and Westcott; The Extra — of. Vol. I. W. H. Martindale and W. W. Westcott, 98.
- Physical Chemistry:** Students of Medicine; — for. A. Findlay, 313.
- Physical Chemistry:** System of —; A. W. C. M. Lewis, 586.
- Physico-Chemical:** Evolution. C. E. Guye, 582.
- Physics:** Clays and Other Ceramic Materials; The Chemistry and — of. A. B. Searle, 45.
- Qualitative Chemical Analysis:** Inorganic and Organic Substances; A Systematic Course of — of. H. W. Schimpf, 98.
- Qualitative Organic Analysis:** —. An Elementary Course in the Identification of Organic Compounds. O. Kamm, 44.
- Quantitative Analysis:** Practical Application; The Theory of — and its. H. Bassett, 309.
- Quantitative Organic:** Micro-Analysis. F. Pregl, 96.
- Quantum Theory:** System of Physical Chemistry; A. Vol. III. —. W. C. Mc. C. Lewis, 202.
- Physical Chemistry:** System of —; A. Vol. III. Quantum Theory. W. C. McC. Lewis, 202.
- Practical Chemistry:** Micro-Methods; —. by. E. C. Grey, 423.
- Preservation:** Food; The Scientific — of. T. M. Rector, 365.
- Readers:** Compositors and — at the University Press, Oxford; Rules for. H. Hart, 535.
- Reduction Methods:** Volumetric Analysis; New — in. E. Knecht and E. Hibbert, 257.
- Reports:** Applied Chemistry; — of the Progress of. Vol. IX., 477.

Reviews of Books—continued:

- Research:** Organic —; Introduction to. E. E. Reid, 314.
- Rules:** Compositors and Readers at the University Press, Oxford; — for. H. Hart, 535.
- Saccharides:** Configuration of the —; The. J. Boeseken, 366.
- Soap and Detergent Industry:** Modern —, Including Glycerol Manufacture; The. Vol. 1. Theory and Practice of Soap-Making. G. Martin, 100.
- Soap-Making:** Modern Soap and Detergent Industry, Including Glycerol Manufacture; The. Vol. 1. Theory and Practice of —. G. Martin, 100.
- S.P.E. Tracts:** —. No. IX. The Language of Anatomy. W. C. Morton. No. XV. The Split Infinitive. H. W. Fowler, 536.
- Specific Heats:** Gases; The — of. J. R. Partington and W. G. Shilling, 158.
- Spectroscopy:** —. Vol. 1. E. C. C. Baly, 157.
- Split Infinitive:** S. P. E. Tracts. No. IX. The Language of Anatomy. W. C. Morton. No. XV. The —. H. W. Fowler, 536.
- Steel:** Cold Working of —; Wire Drawing and the. A. T. Adam, 644.
- Students of Medicine:** Physical Chemistry for —. A. Findlay, 313.
- Sulphuric Acid:** Concentration of —; The. J. W. Parkes, 99.
- Sulphuric:** — (Contact Process); The Manufacture of. F. D. Miles. Vol. IV. of the Manufacture of Acids and Alkalis. By G. Lunge, 534.
- Symétrie:** Ses Applications; Le Principe de — et. F. M. Jaeger, 642.
- Synthetic:** Organic Compounds. S. P. Schotz, 258.
- Systematic Course:** Inorganic and Organic Substances; A — of Qualitative Chemical Analysis of. H. W. Schimpf, 98.
- Systematic Handbook:** Volumetric Analysis; A — of. F. Sutton, 42.
- Tables:** Constants and Numerical Data; Annual — of; Chemical, Physical and Technological. Volume 5, 476.
- Tar:** Coal —; The Constituents of. P. E. Spielman, 206.
- Technical:** Writing. T. A. Rickard, 46.
- Text-Book:** Metallurgy. An Elementary —. E. L. Rhead, 207.
- Theoretical Chemistry:** Inorganic and —; A Comprehensive Treatise on. Vol. 5. J. W. Mellor, 154.
- Tracts:** S. P. E. —. No. IX. The Language of Anatomy: W. C. Morton. No. XV. The Split Infinitive. H. W. Fowler, 536.
- Trade Names:** Chemical Synonyms and —; Companion to the First Edition of. W. Gardner, 588.
- Twentieth Century:** Chemistry in the —. An Account of the Achievement and the Present State of Knowledge in Chemical Science. E. F. Armstrong (as Chairman and Editor), 39.

Reviews of Books—continued:

- University Press:** Compositors and Readers at the —, Oxford; Rules for. H. Hart, 535.
- Volumetric Analysis:** Reduction Methods in —; New. E. Knecht and E. Hibbert, 257.
- Volumetric Analysis:** Systematic Handbook of —; A. F. Sutton, 42.
- Water:** Boiler Feed —. N. Simpkins and A. Dawe, 367.
- Water Supplies:** Waters and —; The Examination of. J. C. Thresh and J. F. Beale, 310.
- Waters:** — and Water Supplies; The Examination of. J. C. Thresh and J. F. Beale, 310.
- Wire Drawing:** Steel; — and the Cold Working of. A. T. Adam, 644.
- Wood:** Destructive Distillation of —; The. H. M. Bunbury, 159.
- Writing:** Technical —. T. A. Rickard, 46.
- Year Book:** Chemists' —; The. F. W. Attack, 421.
- Rosaceous Fruit:** Pectin liquefaction during ripening of —. C. Griebel, 297.
- Rotary:** Dialyser. A. Astruc and E. Canals, 476.
- Rotations:** Lemon oil and sweet orange oil in alcoholic solution; Optical — produced by. W. W. Randall, 28.
- Rubber Goods:** Paraffin wax in —; Determination of. J. Lagerqirst, 251.
- Rubber:** Raw or vulcanised —; Determination of sulphur in mixtures of. V. C. Butironi, 87.
- (Rubber Solutions):** Highly viscous fluids —; Viscometry of. R. Ditmar, 527.
- Rubber:** Stopcaps (Notes). H. P. Stevens, 131.
- Rules and Orders:** Ministry of Health. Draft —, 1925. Public Health, England, 135.
- Rupp Method:** Chlorine in milk; The — for the detection of. J. T. Keister, 624.
- Rye:** Extract of ergot of —; Therapeutic value of. A. Goris and A. Liot, 193.
- S**
- Saccharin:** *p*-sulphamino-benzoic acid in — and crystallose; Detection and determination of. I. M. Kolthoff, 465.
- Safflower:** Sunflower and —. Distinctive features of the seeds and cakes. Vizern and Guillot, 408.
- Saffron:** Japanese —. E. Skarnitzl, 31.
- Sale of Food and Drugs Acts:** Ministry of Health Circular 553. —, etc. R. B. Cross, 25.
- Sale of Foods and Drugs Acts:** New Zealand Department of Health. Regulations under the —, 1908. 30th June, 1924. 140.
- Salford:** County Borough of —. Annual Report of the Borough Analyst for 1924. G. D. Elsdon, 607.
- Salicylic and Benzoic Acids:** Wines; — in. 514.
- Saliva:** Diastatic activity of —; Influence of different substances on the. H. Walker, 466.
- Salivary Digestion:** Halogen salts on —; Effect of. W. M. Clifford, 466.
- Salmonella Group:** Medical Research Council. Investigation of the —, with Special Reference to Food Poisoning. 239.
- Salt:** Bacterial flora of —. Rappin and Grosseron, 81.
- Salt Error:** Cresol red; — of. W. D. Ramage and R. C. Miller, 354.
- Salts:** Halogen — on salivary digestion; Effect of. W. M. Clifford, 466.
- Salts:** Hydrazine and its —; Electro-metric titration of. E. C. Gilbert, 94.
- Salts:** Polarisation of sugar solutions; Effect of some inorganic — on the. R. J. Brown, 143.
- Samples:** —; Mixing of (Legal Notes), 71.
- Sands:** "Permeability-to-gas" of —; Method of testing the. A. L. Curtis, 638.
- Santonicas:** True and false —. T. E. Wallis and E. J. Mowat, 566.
- Sapindus mukorossi utilis** (Trabuti): Saponins. III. The sapogenin occurring in *Sapindus saponaria* L. and —. W. A. Jacobs, 467.
- Sapindus saponaria** L.: Saponins. III. The sapogenin occurring in — and *Sapindus mukorossi utilis* (Trabuti). W. A. Jacobs, 467.
- Sapogenin:** Saponins. I. The — obtained from soapnuts. W. A. Jacobs, 352.
- Sapogenin:** Saponins. III. The — occurring in *Sapindus saponaria* L. and *Sapindus mukorossi utilis* (Trabuti). W. A. Jacobs, 467.
- Saponins:** Research work on —; Recent. L. Kofler, 31.
- Saponins:** —. I. The sapogenin obtained from soapnuts. W. A. Jacobs, 352.
- Saponins:** —. III. The sapogenin occurring in *Sapindus saponaria* L. and *Sapindus mukorossi utilis* (Trabuti). W. A. Jacobs, 467.
- Sausages:** Total protein in —; Ratio of gelatin-forming substance to. O. Luning and S. Gerö, 347.
- Scarlet Fever:** Ice cream; An epidemic of — spread by. G. H. Ramsey, 574.
- Schedule:** Poisons —; Additions to. 291.
- Seals:** Safeguarding of —; The (Notes). B. S. Evans, 130.
- Seals:** Safe-guarding of —; The (Notes). B. S. Evans, 398.
- Seals:** Safeguarding of —; The (Notes). T. R. Hodgeson, 236.
- Seed Hairs:** Milkweed; The — of the. A. W. Schorger, 471.
- Seeds:** Oil; — of *Citrullus vulgaris* as a source of. 462.
- Seeds:** Sunflower and safflower. Distinctive features of the — and cakes. Vizern and Guillot, 408.

- Selenium**: Sulphur dioxide in hydrochloric acid solution; Separation of — and tellurium by. V. Lenher and C. H. Kao, 255.
- Semi-Selective Antiseptic Effect**: Vegetable oils, essential oils, their constituents, and similar compounds; — of vapours of. O. Schöbl, 467.
- Sensitive Colour Reaction**: Magnesium; — for. F. L. Hahn, H. Wolf and S. Jager, 35.
- Sensitive Differential Reaction**: Cerium; — of. L. Fernandes, 638.
- Sensitive Tests**: Copper; — for. G. Spacu, 580.
- Serum**: Blood — and of sugars on haemolysis; Influence of. W. P. Kennedy, 467.
- Serum**: Cholesterol in whole blood or blood — Modification of Bloor's method for the determination of. G. E. Sackett, 412.
- Serum**: Indicator (cresol red) by — in the spectrophotometric determination of the P_H ; The adsorption of. E. F. Hirsch, 256.
- Serum Proteins**: Formaldehyde and —; Mechanism of the interaction of. R. R. Henley, 350.
- Serum**: Sodium in small amounts of —; Iodimetric method for the determination of. B. Kramer and I. Gittleman, 147.
- Shell-Fish**: Pollution in —; Detection of. J. W. H. Eyre, 80.
- Shells**: Transparency of the — of eggs on keeping; Modifications in the. A. M. Leroy, 25.
- "Sherry"**: Term —; Connotation of the (Legal Notes), 338.
- Shoe Dyes**: Poisoning by —. C. W. Muehlberger, 468.
- Shrimp**: Muscle of —; Nitrogen distribution in. D. B. Jones, O. Moeller and C. E. F. Gersdorff, 568.
- Shrimps**: Bad —; Knowledge precludes "prejudice" (Legal Notes), 290.
- Shrimps**: Boric acid in — (Legal Notes), 552.
- Silage Analysis**: —; Methods employed in. H. E. Woodman, 522.
- Silica-Gel**: Bacteriological cultures; Rapid method of preparation of — for. M. Souleyre, 629.
- Silica Ware**: Surface devitrification on laboratory —; Elimination of. F. C. Vilbrandt, 527.
- Silicates**: Alkalis in —; Determination of. O. Cantoni, 581.
- Silicates**: Ferric oxide in insoluble —; Determination of. O. Hackl, 526.
- Silk**: Ultra-violet rays; Study of the secretion of — by means of. A. Policard and A. Paillot, 582.
- Silver**: Iodide, bromide and chloride of —; An electrometric study of the separation of the. H. T. S. Britton, 601.
- Skatole**: Tryptophane by the vanillin and hydrochloric acid reaction; Colorimetric determination of. Quantitative separation from indole and —. I. Kraus, 246.
- Skimmed Milk Powders**: Food; Whole and — as. Observations on a new vitamin for reproduction. L. T. Anderegg and V. E. Nelson, 351.
- Skin**: Boric acid through the — by osmosis; The passage of. L. Kahlenberg, 83.
- Snail**: Nutritive value of the — (*Helix pomatia* L.). L. Leger, 76.
- Soapnuts**: Saponins. I. The sapogenin obtained from —. W. A. Jacobs, 352.
- Soaps**: Detergent efficiencies of —; Test for comparing. R. M. Chapin, 355.
- Society of Public Analysts and other Analytical Chemists, Proceedings of the**: 1925: 1, 49, 103, 161, 209, 261, 317, 369, 425, 481.
- Sodium**: Alkali metals by the use of perchloric acid; Separation and determination of the. III. Normal butyl alcohol and ethyl acetate as mixed solvents in the separation and determination of potassium, —, and lithium. G. F. Smith and J. F. Ross, 307.
- Sodium Benzoate Ingestion**: Blood and urine; Effect of — upon the composition of the, with especial reference to the possible synthesis of glycine in the body. W. W. Swanson, 197.
- Sodium Dithionate**: —; Examination of. F. M. Litterscheid and H. Löwenheim, 36.
- Sodium Hyposulphite**: — (Hydrosulphite) in organic analysis; Application of. E. Clark, 199.
- Sodium**: Serum; Iodimetric method for the determination of — in small amounts of. B. Kramer and I. Gittleman, 147.
- Soft Resins**: Hard and — in hops; Determination of. A. C. Chapman, 144.
- Soil Organic Matter**: Humification of —; Determination of the degree of. G. W. Robinson and J. O. Jones, 148.
- Soils**: Ammoniacal nitrogen in —; Determination of the. W. McLean and G. W. Robinson, 33.
- Soils**: Manganese in agricultural —; Determination of. G. Bertrand, 85.
- Soils**: Vital factors in —, plants, and animals; Copper, manganese, zinc, nickel and cobalt as. J. S. McHargue, 409.
- Solids**: Eggs; Rapid routine method for the determination of total — in. R. Hertwig and L. H. Bailey, 406.
- Solubilities**: Alkali metals by the use of perchloric acid; Separation and determination of the. I. — of the perchlorates of the alkali metals in mixed organic solvents. G. F. Smith, 254.
- Solubilities**: Phosphates of zirconium and hafnium; — of the. G. Hevesy and K. Kimura, 637.
- Soluble Sulphates**: Barium chloride and potassium stearate; The volumetric determination of — by means of. H. Atkinson, 590.
- Solutions**: Collodion membrane ultra-filter; A. Physico-chemical analysis of —. E. Fouard, 201.
- Solutions**: Novocaine; Colorimetric determination of — of. P. Chertmy, 78.
- Solutions**: P_H values of —; Colorimetric determination of the. E. Richard, 304.

- Solvents:** Alkali metals by the use of perchloric acid; Separation and determination of the. I. Solubilities of the perchlorates of the alkali metals in mixed organic ——. G. F. Smith, 254.
- Solvents:** Alkali metals by the use of perchloric acid; Separation and determination of the. III. Normal butyl alcohol and ethyl acetate as mixed — in the separation and determination of potassium, sodium, and lithium. G. F. Smith and J. F. Ross, 307.
- Solvents:** Egg-yolk into fractions by —; Separation of. M. A. Rakusin and G. Pekar-skaja, 242.
- South Georgian Whale Oil:** Natural unsaturated fatty acids; Constitution of, Part. II. Some acids present in a ——. E. F. Armstrong and T. P. Hilditch, 303.
- South Western United States:** Plant gums of the —; Some. E. Anderson, L. Sands and N. Sturgis, 635.
- Soya Beans:** Vitamin content of —; The. C. Hornemann, 298.
- Sparteine:** Grant's test for —. J. F. Couch, 144.
- Specific Gravity:** Aggregates; Apparatus for determining the — of. F. H. Tucker, 362.
- Specific Rotation:** Clerget divisor; — of invert sugar and the. F. W. Zerban, 294.
- Spectacles:** Daylight — (Notes). H. Weisz, 605.
- Spectacles:** Laboratory; Artificial daylight — for the. H. Weiss, 362.
- Spectrophotometric Determination:** Indicator (cresol red) by serum in the — of the P_H ; The adsorption of. E. F. Hirsch, 256.
- Spectrophotometric Determination:** P_H ; — of. F. Vlès, 201.
- Spectroscope Lighting Unit:** Simple and self-contained —; A. R. C. Frederick and E. R. Webster, 234.
- Spectroscopy:** Cobalt by — and chromoscopy; New method for the immediate detection and determination of. G. Denigès, 419.
- Spectroscopy:** Food chemistry; Application of ultra-violet — to. R. Dietzel and K. Täufel, 308.
- Spectrum:** Polarimetric use; Lithium arc — for. P. C. Austin, 476.
- Spelter:** Cadmium in — and alloys; Determination of (Notes). W. R. Schoeller, 18.
- Spirit:** Strength of — kept in open bottles; Loss of (Notes). J. McCrae and J. Hawken, 66.
- Spirits:** Acetone in —; Detection of. I. M. Kolthoff, 464.
- Splash-Head:** Kjeldahl apparatus; New — for (Notes). H. Lowe, 605.
- Spontaneous Decomposition:** Butter fat; — of. C. A. Browne, 144.
- Spray Materials:** Polysulphide sulphur in —; Determination of. W. Goodwin and H. Martin, 148.
- Stain:** Blood films; Useful — for. A. K. Gordon, 148.
- Stains:** Egg yolk —; Identification of. Barthe, 522.
- Standard:** *p*-Nitrobenzoic acid as an acidimetric —; Use of. W. M. Thornton, jun., and D. Getz, 304.
- Standardisation:** British Chemical Standards; Points arising from the Analytical — of. C. H. Ridsdale and N. D. Ridsdale, 425.
- Standardisation:** British Chemical Standards; Points arising from the Analytical — of (Notes). C. H. Ridsdale and N. D. Ridsdale, 500.
- Standardised Acid or Base:** Buffer mixtures prepared without the use of —. I. M. Kolthoff, 251.
- Stannic Hydrides:** Stannous and —. W. Vaubel and H. von Mairhofen-Aulenbach, 575.
- Stannous Hydrides:** Stannic and —. W. Vaubel and H. von Mairhofen-Aulenbach, 575.
- Statutory Rules and Orders:** Ministry of Health. Dried Milk. —, 1923, No. 1323. Public Health, England, 343.
- Statutory Rules and Orders:** Ministry of Health; Milk and Dairies (Consolidation Act), 1915, Circular 612; Preservatives, etc., in Food —, 1925, 775; Public Health (Preservatives, etc., in Food) Regulations 1925, Circular 606, 453.
- Steel:** Molybdenum in —; Determination of. O. L. Maag and C. H. McCollam, 360.
- Stepney:** Metropolitan Borough of —. Annual Report of the Borough Analyst for 1924. D. Henville, 447.
- Sterile Conditions:** P_H of culture media under —; Adjustment of. L. M. Christensen and E. I. Fulmer, 630.
- Stopcaps:** Rubber — (Notes). H. P. Stevens, 131.
- Stopcock Orifice:** Flowmeter. J. Sharp, 475.
- Strawberry:** —, pineapple, raspberry and Concord grape; Non-Volatile acids of the. E. K. Nelson, 295.
- Strength:** Spirit kept in open bottles; Loss of — of (Notes). J. McCrae and J. Hawken, 66.
- Subcutaneous Fat:** Human —; Fatty acids in. H. C. Eckstein, 517.
- Sublimation:** Apparatus. A. Gutbier and T. Payer, 38.
- Substances:** Saliva; Influence of different — on the diastatic activity of. H. Walker, 466.
- Substitution Products:** Organic thiocyanogen —; Preparation of. H. P. Kaufmann, 634.
- Sucrose:** Condensed milk; Polarimetric determination of — in. G. Jörgensen, 143.
- Sucrose:** Glucose and fructose on the rate of hydrolysis of — by invertase from honey; Influence of. J. M. Nelson and C. T. Sottery, 76.
- Sucrose:** Sugars; Colorimetric determination of — in the presence of other. H. Riffart and C. Pyriki, 26.
- Sugar:** Blood —; Determination of. S. R. Benedict, 414.
- Sugar:** Blood —; Micro-method for the determination of. E. Komm, 568.
- Sugar:** Cane — in condensed milk; Determination of. K. Schering, 625.

- Sugar:** Invert — and the Clerget divisor; Specific rotation of. F. W. Zerban, 294.
- Sugar:** Milk; Determination of milk — in (Notes). H. D. Richmond and L. R. Ellison, 17.
- Sugar Solutions:** Polarisation of —; Effect of some inorganic salts on the. R. J. Brown, 143.
- Sugars:** Blood serum and of — on haemolysis; Influence of. W. P. Kennedy, 467.
- Sugars:** Free pentoses in plants; Occurrence of. Effect of extraction of the — with ammoniacal alcohol. D. T. Englis and C. Hale, 199.
- Sugars:** Reducing powers of —; Relative. A. W. Rowe and B. S. Wiener, 407.
- Sugars:** Reducing —; Preparation of Fehling's solution for the volumetric determination of. J. H. Lane and L. Eynon, 244.
- Sugars:** Sucrose in the presence of other —; Colorimetric determination of. H. Riffart and C. Pyriki, 26.
- p-Sulphamino-Benzoic Acid:** Saccharin and crystalline; Detection and determination of — in. I. M. Klothoff, 465.
- Sulphates:** Barium chloride and potassium stearate; The volumetric determination of soluble — by means of. H. Atkinson, 590.
- Sulphates:** Guncotton; The determination of — in. H. B. Dunicliff, 543.
- Sulphonal:** Poisoning; —. Localisation of — and haematoporphyrin. R. Fabre and H. Simonnet, 575.
- Sulphonal Poisoning:** — Localisation of sulphonal and haematoporphyrin. R. Fabre and H. Simonnet, 575.
- Sulphonic Acid:** Dehydrothio-*p*-toluidine —; Analysis of. H. R. Lee and D. O. Jones, 88.
- Sulphur Dioxide:** Foods; Determination of — in. K. K. Järvinen, 513.
- Sulphur Dioxide:** Selenium and tellurium by — in hydrochloric acid solution; Separation of. V. Lenher and C. H. Kao, 255.
- Sulphur:** Milk of — (Legal Notes). 503.
- Sulphur:** Mixtures of raw or vulcanised rubber; Determination of — in. V. C. Butironi, 87.
- Sulphur:** Spray materials; Determination of polysulphide — in. W. Goodwin and H. Martin, 148.
- Sulphur:** —; Rapid examination of. F. Kühl, 153.
- Sulphuric Acid:** Nitric acid and nitrates in —; Detection of. J. Wilson, 581.
- Sulphuric Acid Reaction:** Butter fat; The — of. N. Sjörslev, 145.
- Sunflower:** Safflower; — and. Distinctive features of the seeds and cakes. Vizern and Guillot, 408.
- Suprarenal Powders:** Adrenaline in — by an application of the Denigès-Grimbert-Leclère reaction; Determination of. O. Bailly, 78.
- Surface Devitrification:** Laboratory silica ware; Elimination of — on. F. C. Vilbrandt, 527.
- Sweet Orange Oil:** Lemon oil and — in alcoholic solution; Optical rotations produced by. W. W. Randall, 28.
- Synthesising Action:** Protein; Enzymatic synthesis of. V. Note on the — of trypsin. H. Wasteneys and H. Borsook, 351.
- Synthetic Methanol:** Toxic action of —. R. Hunt, 576.
- System:** Benzoic acid and benzoates from the —; Elimination of. Bordas, François-Dainville and Roussel, 567.

T

- Tables:** International Critical —; The. 292.
- Tamarinds:** Whortleberries and —; Acids of. H. Kaiser, 29.
- Tannin Analysis:** Official method of —; New simplification in the. A. Jamet, 87.
- Tannin:** Carbohydrates; Nature of the reaction between — and. Part 1. H. B. Stocks and C. V. Greenwood, 564.
- Tannin:** Drugs containing —; Identification by chemical methods of. A. H. Ware, 564.
- Tannin Precipitant:** Cutch and Gambier; Cinchonine as a — with special reference to the analysis of. D. Hooper, 162.
- Tannins:** Ferric citrate precipitation test for —; Modifications of the (Notes), A. H. Ware, 335.
- Tantalum:** Iron; Precipitation of — and niobium by "cupferron," and their separation from —. H. Pied, 36.
- Tantalum:** Radium in minerals containing —, niobium and titanium; Determination of. P. Curie, 152.
- Tantalum:** —, niobium, and their mineral associates; Investigation into the analytical chemistry of. IV. A new method for the separation of — from niobium. V. The detection and determination of — in niobium compounds. A. R. Powell and W. R. Schoeller, 485.
- Tar Oils:** Phenols in —; Determination of. J. J. Morgan and M. H. Meighan, 471.
- Tars:** Wood — in water; Solubility of various. H. N. Calderwood, 357.
- Tartaric Acid:** Citric from —; Differentiation of. W. Parri, 86.
- Tartaric Acid:** —; Determination of. K. Täufel and C. Wagner, 577.
- Taste:** α -Amino acids; Relation between constitution and — of. A. Heiduschka and E. Komm, 515.
- Taste:** Experimental verification; A theory of — and its. P. Lazarev, 515.
- Tautomeride:** Jaffe's reaction for creatinine; Chemistry of. II. Effect of substitution in the creatinine molecule and a possible formula for the red —. I. Greenwald, 350.
- Tea:** Iron filings in — (Legal Notes). 553.
- Tea Leaves:** Quercetin in —. J. J. B. Deuss, 348.
- Tea:** Phloroglucinol test; Identification of — by the. C. J. Stracke, 297.
- Tellurium:** Selenium and — by sulphur dioxide in hydrochloric acid solution; Separation of. V. Lenher and C. H. Kao, 255.

- Temperature coefficients:** Pancreatic and malt amylases; — of enzymic activity and heat destruction of. D. H. Cook, 569.
- Temperatures:** Cryostat for — extending to $-180^{\circ}\text{C}.$; A. J. E. Walters and A. G. Loomis, 582.
- Tervalent Rare Earths:** Zirconium and the —; Separation of thorium from. L. Fernandes, 253.
- Tests:** Oxycellulose and for the oxidising attack of cotton; Value and interpretation of — for. C. Birtwell, D. A. Clibbens, and B. P. Ridge, 150.
- Textile Oils:** Methylhexaline in —; Detection of. J. Marcusson, 524.
- Thallium Compounds:** Organic chemistry; Application of — in: Titrations. G. H. Christie and R. C. Menzies, 634.
- Therapeutic Value:** Ergot of rye; — of extract of. A. Goris and A. Liot, 193.
- Thermometer:** Low-temperature —; Simple. W. A. Noyes, 526.
- Thiazine Red:** Polychrome methylene blue and —; Preparation of. F. Proescher and A. P. Krueger, 299.
- Thiocyanate:** Chloride, bromide, or — in presence of cyanide; Determination of. E. Schulek, 253.
- Thiocyanogen Substitution Products:** Organic —; Preparation of. H. P. Kaufmann, 634.
- Thorium:** Zirconium and the trivalent rare earths; Separation of — from. L. Fernandes, 253.
- Thymonucleic Acid Type:** Nucleic acid of the —; Microchemical test for. R. Feulgen and H. Rossenbeck, 81.
- Thyroid Glands and Preparations:** Thyroxin in —; Determination of. T. A. Redonnet, 465.
- Thyroxin:** Thyroid glands and preparations; Determination of — in. T. A. Redonnet, 465.
- Tin:** Alloys; A new method for the separation and determination of — in. B. S. Evans, 330.
- Tin:** Antimony and — by potassium dichromate; Electrometric titration of. M. H. Fleysher, 94.
- Tin:** Lead and —; Electrolytic separation of. A. Lassieur, 35.
- Tinned and Bottled Peas:** Zinc in — (Notes). C. H. Cribb and A. L. Still, 286.
- Tinned and Coppered Peas:** Zinc in — (Notes). C. H. Cribb and A. L. Still, 395.
- Tissue:** Pectose and pectin in apple —; Relation of. M. H. Carré, 464.
- Tissues:** Enzyme action; Studies on. XXX. Comparative study of characteristic lipase actions of — of different animals and of some human —. F. G. Falk, H. M. Noyes and K. Sugiura, 194.
- Tissues:** Gutzeit method for the determination of arsenic in body —; Electrolytic modification of the. W. E. Lawson and W. O. Scott, 414.
- Tissues:** Oxygen consumption of —; Apparatus for measuring the. A. E. Koehler, 300.
- Titania:** Organic reactions at the surface of —. Adsorption of certain gases by —. F. Bischof and H. Adkins, 253.
- Titanium:** Radium in minerals containing tantalum, niobium and —; Determination of. P. Curie, 152.
- Toluidine:** Aniline and —; Colour test for. H. D. Murray, 149.
- Tomatoes:** Dyeing property of — (Notes). H. E. Burgess, 131.
- Total Solids:** Eggs; Rapid routine method for the determination of — in. R. Hertwig and L. H. Bailey, 406.
- Toxic Action:** Commercial ether; — of. E. Remy and F. Neuhart, 198.
- Toxic Action:** Synthetic methanol; — of. R. Hunt, 576.
- Toxicity:** Iron cacodylate; — of. P. Musucci and G. A. Slothower, 632.
- Toxicity:** Tungsten and molybdenum; — of compounds of. T. Karantassis, 576.
- Toxicological, Forensic, etc., Abstracts:** 1925: 83, 197, 247, 300, 352, 415, 468, 519, 574, 632.
- Toxicological Work:** Two ptomaines met with in —. L. van Itallie and A. J. Steenhauer, 415.
- Toxicology:** Forensic Chemistry; — and, 74.
- Toxicology:** Hydrogen sulphide; — of. H. W. Haggard, 519.
- Toxicology:** Organic matter by "perhydrol" and its application to —; Destruction of. G. Magnin, 300.
- Trade Description:** False — (Legal Notes), 68.
- Tragacanth:** Gum —. W. Peyer, 30.
- Tragacanth:** Iron in —. G. Elliott, 192.
- Transition Points:** Viscometric determination of —; Apparatus for the. N. H. Hartshorne, 38.
- Transparency:** Eggs on keeping; Modifications in the — of the shells of. A. M. Leroy, 25.
- Transvaal *Homeria pallida*:** Poisonous alkaloid from the —. M. Rindl, 85.
- Trinitrometaresol:** Picric acid in a mixture of picric acid and —; Gravimetric determination of. L. Desvergues, 250.
- Trypsin:** Enzymatic synthesis of protein. V. Note on the synthesising action of —. H. Wasteneys and H. Borsook, 351.
- Trypsin:** Insulin; The action of — on. D. A. Scott, 351.
- Tryptophane:** Vanillin and hydrochloric acid reaction; Colorimetric determination of — by the. Quantitative separation from indole and skatole. I. Kraus, 246.
- Tungsten:** Molybdenum from —; Separation of. I. Koppel, 36.
- Tungsten:** Molybdenum; Toxicity of compounds of — and. T. Karantassis, 576.
- Turnip Flavour:** Milk; — of. Orla-Jensen, 519.
- Turpentine Oil:** Olive oils and —; Application of Wood's Light to the examination of. Frehse, 361.
- Turpentine:** Substitute (Legal Notes), 185.

U

- Ultra-Centrifuge:** —; The. A. new instrument for the determination of the size of particles in amicroscopic colloids. T. Svedberg and H. Rinde, 95.
- Ultra-Filter:** Colloidion membrane —; A. Physico-chemical analysis of solutions. E. Fouard, 201.
- Ultra-Violet Irradiation:** Antirachitic properties to inert substances by —; Further report on imparting. A. F. Hess and M. Weinstock, 298.
- Ultra-Violet Irradiation:** Inert fluids and to green vegetables by —; Antirachitic properties imparted to. A. F. Hess and M. Weinstock, 146.
- Ultra-Violet Light:** Fat-Soluble vitamins. XXI. Observations bearing on the alleged induction of growth-promoting properties in air by irradiation with —. E. M. Nelson, and H. Steenbock, 194.
- Ultra-Violet Rays:** Secretion of silk by means of —; Study of the. A. Policard and A. Paillot, 582.
- Ultra-Violet Spectroscopy:** Food chemistry; Application of — to. R. Dietzel and K. Täufel, 308.
- United States Department of Agriculture:** —. Food Inspection Decisions 196 and 197. 562.
- United States:** Plant gums of the South Western —; Some. E. Anderson, L. Sands and N. Sturgis, 635.
- Unsaturated Constituents:** Oils and fats; Volumetric determination of certain — of. H. P. Kaufmann, 577.
- Unsaturated Fatty Acids:** Natural —; Constitution of. Part II. Some acids present in a South Georgian whale oil. E. F. Armstrong and T. P. Hilditch, 303.
- Unsaturated Fatty Acids:** Oxidation of —; X-Ray method of following the. J. J. Tillat, 641.
- Uranium:** Cacodylate. E. Isnard, 581.
- Uranium:** Rare earths from —; Separation of. Alkali uranylalicylates. G. Canneri and L. Fernandes, 35.
- Uranylalicylates:** Rare earths from uranium; Separation of. Alkali —. G. Canneri and L. Fernandes, 35.
- Uric Acid:** Blood; Determination of — in the. S. R. Benedict, 415.
- Urinary Protein:** —; Nature of. A. Hynd, 627.
- Urine:** Acidosis; Studies of. XXI. Colorimetric determination of P_H of. —. A. B. Hastings, J. Sendroy, Junr., and W. Robson, 628.
- Urine:** Amino-nitrophenols in —; Detection of. L. Desvergnès, 197.
- Urine Deposits:** Calcium oxalate in —; Unusual crystalline forms of. B. Bardach, 468.
- Urine:** Menthol glycuronic acid in —; Quantitative determination of. A. J. Quick, 32.
- Urine:** Small quantities of arsenic, and its occurrence in — and in fish; On certain new methods for the determination of. H. E. Cox, 3.
- Urine:** Sodium benzoate ingestion upon the composition of the blood and —; Effect of, with especial reference to the possible synthesis of glycine in the body. W. W. Swanson, 197.

V

- Valencia Orange Juice:** Volatile constituents of —. J. A. Hall and C. P. Wilson, 626.
- Vanadium:** Ferrovandium; Determination of — in. Koch, 418.
- Vanadium:** Molybdenum from —; Separation of. A. E. Stoppel, C. F. Sidener and P. H. M. P. Brinton, 418.
- Vanadium:** —; Determination of. W. Hartmann, 306.
- Vanilla Essence:** Imitation — (Notes). J. S. Maclaurin, 548.
- Vanillin and Hydrochloric Acid Reaction:** Tryptophane by the —; Colorimetric determination of. Quantitative separation from indole and skatole. I. Kraus, 246.
- Vapours:** Vegetable oils, essential oils, their constituents, and similar compounds; Semi-selective antiseptic effect of — of. O. Schöbl, 467.
- Vegetable Colours:** Fluorescence of —. L. Meunier and A. Bonnet, 641.
- Vegetable Oils:** Vapours of —, essential oils, their constituents, and similar compounds; Semi-selective antiseptic effect of. O. Schöbl, 467.
- Vegetable Products:** Nickel and cobalt in —. G. Bertrand and M. Mokrgnatz, 348.
- Vegetable Waxes:** Candelilla and other —; Analysis of. A. Leys, 355.
- Vegetables:** Bacteria and other particulate matter; Penetration of fruits and — by. Resistance of bacteria, protozoan cysts and helminth ova to common disinfection methods. R. G. Mills, C. L. Bartlett and J. F. Kessel, 571.
- Vegetables:** Copper salts; The absorption of copper during the digestion of — artificially coloured with. J. C. Drummond, 481.
- Vegetables:** Inert fluids and to green — by ultra-violet irradiation; Antirachitic properties imparted to. A. F. Hess and M. Weinstock, 146.
- Ventilation Conditions:** —; The investigation of. R. C. Frederick, 213.
- Ventilation:** Department of Scientific and Industrial Research. Food Investigation Board. Special Report No. 21. The "gas" content and — of refrigerated holds carrying apples. 187
- Veratrum album L.: Asparagus officinalis;** Poisoning by —, through confusion with. J. Maheu and P. Chéramy, 576.
- Victorian Beeswax:** Constants of —. Graph for the investigation of beeswaxes (Notes). A. A. Weir, 445.

Vinegar: Dried apples; Cider — from. U.S.A. Supreme Court Decision (Legal Notes). 185.

Vinegars: Different —; Reducing substances in. G. Reif, 191.

Virus: Rat — in London; Use of. 555.

Viscera: Alkaloids from —; Extraction of. R. Fabre, 247.

Viscometric Determination: Transition points; Apparatus for the — of. N. H. Hartshorne, 38.

Viscometry: Highly viscous fluids (rubber solutions); — of. R. Ditmar, 527.

Viscous Fluids: Highly — (rubber solutions); Viscometry of. R. Ditmar, 527.

Vital Factors: Soils, plants and animals; Copper manganese, zinc, nickel and cobalt as — in. J. S. McHargue, 409.

Vitamin A.: Fat-soluble vitamins. XX. Modified technique for the determination of —. H. Steenbock, M. T. Nelson and A. Black, 78.

Vitamin-A. Content: Fresh eggs; — of. J. C. Murphy and D. B. Jones, 298.

Vitamin A.: Fats; Inactivating action of some fats on — in other. L. S. Fridericia, 146.

Vitamin B.: Biological test for —; Effect of bacterial flora on. V. G. Heller, C. H. McElroy and B. Garlock, 570.

Vitamin B.: Jendrassik reaction for water-soluble —; Critical study of the. V. E. Levine, 79.

Vitamin B.: Rats on a diet low in this factor; — in excreta of. W. D. Salmon, 628.

Vitamin B.: —; Concentration of. II. P. A. Levene and B. J. C. van der Hoeven, 629.

Vitamin B.: Water-soluble —; The Jendrassik reaction for. N. Bezssonoff, 517.

Vitamin Content: Soya beans; The — of. C. Hornemann, 298.

Vitamin: Food; Whole and skimmed milk powders as. Observations on a new — for reproduction. L. T. Anderegg and V. E. Nelson, 351.

Vitamin Potency: Cod liver oils; — of. A. D. Holmes, 80.

Vitamins: Fat-Soluble —. XX. Modified technique for the determination of Vitamin A. H. Steenbock, M. T. Nelson and A. Black, 78.

Vitamins: Fat-Soluble —. XXI. Observations bearing on the alleged induction of growth promoting properties in air by irradiation with ultra-violet light. E. M. Nelson and H. Steenbock, 194.

Volatile Acids: Melting point of the insoluble — from fats; The analytical value of the. G. Van B. Gilmour, 119.

Volatile Constituents: Valencia orange juice; — of. J. A. Hall and C. P. Wilson, 626.

Volatilisation Method: Fluorine in baking powder; — for the determination of. J. K. Morton, 29.

Vulcanised Rubber: Sulphur in mixtures of raw or —; Determination of. V. C. Butironi, 87.

W

Water: Advisory Committee on —. Report on Measures for the Protection of Underground —. 509.

Water: Air pollution on —; Effect of. B. A. Adams, 353.

Water: Amino acids and other organic nitrogen compounds in lake —; Occurrence of. W. H. Peterson, E. B. Fred and B. P. Domogalla, 301.

Water Analysis, Abstracts: 1925: 32, 248, 301, 352, 469, 632.

Water: Copper; Action of — on. H. Henstock, 352.

Water: Copper pipes; Action of — upon. J. C. Thresh, 248.

Water-cress: Body metabolism; — and. S. M. Copeman, 568.

Water-Soluble Pigment: *B. pyocyaneus*; Pyorubin, a red — characteristic of. P. D. Meader, G. H. Robinson and V. Leonard, 573.

Water-Soluble Vitamin B.: Jendrassik reaction for —; Critical study of the. V. E. Levine, 79.

Water-Soluble Vitamin B.: Jendrassik reaction for —; The. N. Bezssonoff, 517.

Water: Wood tars in —; Solubility of various. H. N. Calderwood, 357.

Watered Milk: Punctured cooler; — and a (Legal Notes). 610.

Watered Milk: —; Related cases taken under two Acts (Legal Notes). 608.

Waters: Faecal pollution of —; Fallacy of the test for lactose fermenters as an indicator of. O. Schöbl and J. Ramirez, 630.

Waters: Natural Mineral —; Ageing of. O. Baudisch and L. A. Welo, 516.

Waters: Nitrogen found in certain lake —; Forms of. B. P. Domogalla, C. Juday and W. H. Peterson, 301.

Waters: Phenols in polluted natural —; Determination of minute amounts of. L. R. Vorce, 469.

Waters: Total carbonic acid in dilute solutions of calcium hydrogen carbonate or in hard —; Volumetric determination of. E. M. Crowther and W. S. Martin, 32.

Wax: Fig tree (Gondang) —. A. J. Ultee, 87.

Waxes: Candelilla and other vegetable —; Analysis of. A. Leys, 355.

Weak Bases: Qualitative test for —. R. Robinson, 304.

Weights: Molecular —; New method for the determination of. G. Rastelli, 640.

Weights: National Physical Laboratory. Metrology Department. Verification of —, Testing of Balances, Determination of Densities. 291.

Wet Method: Organic analysis by a —; Elementary. G. Vortmann, 469.

Whale Oil: Natural unsaturated fatty acids; Constitution of, Part II. Some acids present in a South Georgian —. E. F. Armstrong and T. P. Hilditch, 303.

- Whiskey**: Dilution; Sale of — with notice of (Legal Notes), 133.
- White Lead Paint**: —; Adulteration of (Legal Notes), 132.
- White Metal**: —; Analysis of. H. Biltz, 473.
- White Rats**: Growth and fertility of —; Mineral deficiencies of milk as shown by. A. L. Daniels and M. K. Hutton, 246.
- Whole and Skimmed Milk Powders**: Food; — as. Observations on a new vitamin for reproduction. L. T. Anderegg and V. E. Nelson, 351.
- Whortleberries**: Tamarinds; Acids of — and. H. Kaiser, 29.
- Wine**: Benzoic acids in —; Determination of. J. Dubaquis, 295.
- Wine**: Copper and zinc in —; Determination of. C. Von der Heide, 296.
- Wine**: "Invalid" —; Sale of an (Legal Notes), 403.
- Wines**: Benzoic acid in —; Determination of. 514.
- Wines**: Benzoic and salicylic acids in —. 514.
- Wines**: Dextran in — and its consequences; Presence of. A. Vasseur, 296.
- Wines**: Ferric casse in —; Characterisation and evaluation of. P. Malzevin and J. C. Essner, 77.
- Winkler Boric Acid Modifications**: Gunning-Arnold and — of the Kjeldahl method for the determination of nitrogen; Comparison of the K. S. Markley and R. M. Hann, 418.
- Winkler Method**: Dissolved oxygen by the —; Determination of. E. J. Theriault, 632.
- Witnesses**: Expert — in Court; The Presence of. 241.
- Wood**: Cellulose in —; Modified method of determining. G. J. Ritter, 87.
- Wood**: Decay in —; The diagnosis of. E. E. Hubert, 299.
- Wood Fibres**: Cotton, linen and — in paper pulp; The quantitative determination of. W. Dickson, 317.
- Wood Tars**: Water; Solubility of various — in. H. N. Calderwood, 357.
- Wood's Light**: Olive oils and turpentine oil; Application of — to the examination of. Fröhse, 361.
- X**
- X-Ray Method**: Oxidation of unsaturated fatty acids; — of following the. J. J. Tillat, 641.
- Xanthrydrol**: Glyoxylic acid by means of hydrozine and —; Identification of. R. F. and A. Hieulle, 524.
- Y**
- Yeast**: Chemical action in micro-organisms especially in —; Measurement of. Bokorny, 195.
- Yeast**: Gallotannin; Action of — on. Nierenstein, C. W. Spiers and A. C. Ha 417.
- Yeast Glycogen**: Glycogen; Studies on, P. The nature of —, its preparation, estimation and rôle in yeast metabolism. A. R. I. D. R. Nanji and F. J. Paton, 407.
- Yeast Metabolism**: Glycogen; Studies on, P. The Nature of yeast glycogen, its preparation, estimation, and rôle in —. A. R. I. D. R. Nanji and F. J. Paton, 407.
- "Yohimbehe"**: Yohimbine in barks and galenic preparations of —; Determination. Raymond-Hamet, 409.
- Yohimbine**: Barks and galenic preparations "Yohimbehe"; Determination of —. Raymond-Hamet, 409.
- Yolk**: Egg —; Fluorine in. H. Ulex, 625.
- Z**
- Zinc**: Alloys; Electrolytic determination of — in. J. W. Springer, 200.
- Zinc-Nickel Group**: —; Qualitative separation of the. Lemarchands, 151.
- Zinc**: Tinned and bottled peas; — in (Notes) C. H. Cribb and A. L. Still, 286.
- Zinc**: Tinned and coppered peas; — in (Notes). C. H. Cribb and A. L. Still, 395.
- Zinc**: Vital factors in soils, plants, and animals. Copper, manganese, —, nickel and cobalt as J. S. McHargue, 409.
- Zinc**: Wine; Determination of copper and — in. C. Von der Heide, 296.
- Zinc**: — and nickel by hydrogen sulphide. Separation of. A. Kling and A. Lassieur, 200.
- Zirconium**: Celtium (hafnium) from — Separation of. J. Bardet and C. Toussaint 419.
- Zirconium**: Iron; Separation of — from. F. Wenger and M. Müller, 637.
- Zirconium**: Phosphates of — and hafnium. Solubilities of the. G. Hevesy and K. Kimura 637.
- Zirconium**: Tervalent rare earths; Separation of thorium from — and the. L. Fernandez 253.
