

**Erratum in Vol. LI.**

P. 395, 11 lines from the bottom, for "chloroiridate" read "chloroiridite."

## INDEX TO VOLUME LI.

### INDEX TO NAMES.

#### A

- Adams, R.** See Vliet, E. B., and Adams, R.  
**Agde, G.** Fractional extraction of liquid fatty acids of linseed oil, 364.  
**Ahmann, C. F., and Hooker, C. D.** Determination of pectin, 307.  
**Albery, H. G.** See Benton, A. G., and Albery, H. G.  
**Alexander, F. W.** Simple portable photometer for gauging intensity of ultra-violet rays, 54.  
**Alfend, S.** See Mitchell, L. C., and Alfend, S.  
-- See also Smith, E. R., Alfend, S., and Mitchell L. A.  
**Alsberg, C. L.** See Dill, D. B., and Alsberg, C. L.  
**Alsberg, C. L., and Griffing, E. P.** Effects of fine grinding upon flour, 199.  
**Alsberg, C. L., Griffing, E. P., and Field, J.** Preparation of starch solution for use in iodimetric titrations, 371.  
**Anderegg, F. O., and Lutz, R. P.** Colloidal complications in the thiocyanate method of determining soil acidity, 48.  
**Anderson, R. S.** See Nelson, J. M., and Anderson, R. S.  
**André, E., and Canal, H.** Cuttlefish oil (*Todarus Sagittatus Lk.*), 473.  
-- Squalene and spinacene, 48.  
**André, E., and François, T.** Saturated aliphatic alcohols from sperm oil and spermaceti, 644.  
-- Sperm oil and whale oil and spermaceti, 200.  
**Angele, —.** "Boiling off" value of bleached cotton, 476.  
**Arbenz, E.** Detection of incipient putrefaction in meat and meat products, 250.  
**Ardagh, E. G. R., and Williams, J. G.** Accurate general iodimetric method for the determination of the carbonyl group in organic compounds, 102.  
**Arnall, F.** See Coleman, J. B., and Arnall, F.  
**Arnaud, F. W. F.** Kent County Analyst's Report for Fourth Quarter, 1925, 347.  
**Atack, F. W.** The Chemist's Year-Book (Review), 322.  
**Atkins, W. E. G., and Pantin, C. F. A.** Buffer mixture for the alkaline range of hydrogen ion concentration determinations, 317.  
**Atkinson, H.** The volumetric determination of sulphates by means of barium chloride and potassium stearate, 81.  
-- Titration of ammonium sulphate by the stearate method, 140.

- Aubert, M., and Aubrée, E.** Extension of the method of critical solution temperatures for the analysis of petroleum spirit, 269.  
**Aubrée, E.** See Aubert, M., and Aubrée, E.  
**Austen, W.** Identification of urine in water, 210.  
**Averill, H. P., and King, C. G.** Phytin content of foodstuffs, 252.

#### B

- Badger, C. H., and Sale, J. W.** Determination of acidity of highly coloured fruit-type products, 583.  
**Bagnall, D. J. T.** See Tankard, A. R., and Bagnall, D. J. T.  
**Bailey, C. H.** The Chemistry of Wheat Flour (Review), 114.  
**Bailey, L. H.** See Hertwig, R., and Bailey, L. H.  
**Baker, G. W.** Government Analyst's Annual Report of the Department of Health of Palestine for the year 1924, 300.  
**Bal, D. V.** Determination of nitrogen in heavy clay soils, 100.  
**Balthazard, —, and Philippe, M.** Cyanmethaeglobin and the determination of methaeglobin, 466.  
**Barbour, H. G., and Hamilton, W. F.** The falling drop method for the determination of specific gravity, 596.  
**Barnard, J. E.** Practical Photomicrography (Review), J. E. Barnard and F. V. Welch, 486.  
**Barthe, L., and Dufilho, E.** Determination of sodium, 479.  
**Bates, S. C.** The Synthesis of Benzene Derivatives (Review), 430.  
**Bauer, K. H.** Polymerised linseed oil, 422.  
**Bawden, A. T.** See Foulk, C. W., and Bawden, A. T.  
**Bayliss, J. R.** Turbidimeter for measurement of low turbidities, 270.  
**Beard, H. H., and Jersey, V.** Optical rotation of glucose and insulin solutions in contact with muscle tissue *in vitro*, 640.  
**Beath, O. A.** Natural occurrence of aconitic acid and its isomers, 525.  
**Becker, H.** See Stern, E., and Becker, H.  
**Bee, A. H., and Chaikoff, I. L.** Identification of acetaldehyde in normal blood and its quantitative study in blood of normal and diabetic dogs, 640.

- Behre, J. A.** See Benedict, S. R., Newton, E. B., and Behre, J. A.
- Behre, J. A., and Benedict, S. R.** Colorimetric method for the determination of acetone bodies in blood and urine, 639.
- Beister, —, Wood, —, and Wahlin, —.** Sweetness of sugars, 255.
- Benedict, S. R.** Determination of sugar in blood and normal urine, 467.  
— See also Behre, J. A., and Benedict, S. R.
- Benedict, S. R., Newton, E. B., and Behre, J. A.** New sulphur-containing compound (thiasine) in the blood, 257.
- Bennett, R. R., and Middleton, G.** Colour of compound tincture of cardamoms, 525.
- Benton, A. G., and Albery, H. G.** Stability of evaporated milk during sterilisation, 413.
- Berlin, H.** Occurrence of gentiobiose in the products of the commercial hydrolysis of corn starch, 635.
- Bernette, A.** See Dupont, G., Desalbres, L., and Bernette, A.
- Bernoulli, A. L.** Sliding-gauge colorimeter, and the determination of small amounts of ammonia, nitrites, lead and iron, 649.
- Berry, A. J.** The direct titration of thallous salts by potassium iodate, 137.
- Bessonoff, N.** Rapid preparation of monomolybdophosphotungstic acid as a reagent for polyphenols and vitamins, 358.
- Bickel, V. T., and French, H. E.**  $\alpha$ -Naphthyl isocyanate as a reagent for alcohols, 263.
- Bilham, P.** See Lampitt, L. H., Hughes, E. B., Bilham, P., and Fuller, C. H. F.
- Bills, C. E., and McDonald, F. G.** Antirachitic substances. IV. The polymerisation of cholesterol, 469.
- Binder, F.** See Vortmann, G., and Binder, F.
- Bischoff, M. A.** See Mellet, R., and Bischoff, M. A.
- Black, J. W.** Freshly ground coffee and "blown" tins, 403.
- Blackie, J. J.** Alkaloid content of belladonna root, 202.
- Bliss, E. A.** Anaerobic spore-bearing bacteria in milk, 589.
- Bliss, H., Duerden, J., Roberts, J. F., Blyth, J., Hirst, H., and King, A. T.** Examination of kemp fibres, 475.
- Blom, A. V.** The polarising microscope as a laboratory instrument, 111.
- Blunt, T. P.** The analysis of commercial lime, 625.
- Blyth, J.** See Bliss, H., Duerden, J., Roberts, J. F., Blyth, J., Hirst, H., and King, A. T.
- Bock, A.** Determination of chloride in commercial cyanides, 425.
- Böeseken, J., and Coops, J.** Dissociation constants of various acids in the presence of boric acid, 423.
- Bogue, R. H.** See Larch, W., and Bogue, R. H.
- Bolton, E. R., and Williams, K. A.** A test for Chinese wood (tung) oil, 335.
- Bonnet, A.** See Meunier, L., and Bonnet, A.
- Booer, J. R.** Solid hydrogen peroxide, 50.
- Boord, C. E.** See Church, W. H., Mack, E., and Boord, C. E.
- Booth, H. S., and Schreiber, N. E.** Determination of traces of mercury, 106.
- Booth, H. S., Schreiber, N. E., and Zwick, K. C.** Determination of traces of mercury in the presence of organic matter, 477.
- Bornträger, A.** Organic acids of tomatoes, 151.
- Bouffard, E.** See Ventre, J., and Bouffard, E.
- Boyer, S.** Gallium-in-quartz thermometer graduated to 1000° C., 110.
- Bradley, W. M.** See Foote, H. W., and Bradley, W. M.
- Bradt, W. E., and Lyons, R. E.** Determination of selenium in organic compounds, 643.
- Brady, O. L., and Elsmie, G. V.** The use of 2:4 dinitrophenylhydrazine as a reagent for aldehydes and ketones, 77.
- Brauer, K.** Detection of resins, especially in linseed oil varnishes, 422.  
— Typical reactions of phenols, 534.
- Briggs, D. G.** Practical Glass Manipulation (Review), 601.
- Bright, T. B.** Microscopical examination of cotton hairs, 593.
- Bromley, H. A., and De Waele, A.** The electro-metric determination of the acidity of writing inks, 567.
- Brown, D. J.** Method for the electrolytic separation of metals, 267.
- Brown, F. E., and Snyder, J. E.** Vanadium oxytrichloride as a solvent, 50.
- Brown, H.** Determination of uric acid in blood, 357.
- Browne, C. A.** The Life and Chemical Services of Frederick Accum (Review), 276.
- Browning, B. L.** See Schrenk, W. T., and Browning, B. L.
- Brubaker, H. W., Van Blarcom, H. S., and Walker, N. H.** Determination of iodine in natural waters, 471.
- Bruce, H. D.** Photometric method of measuring the covering power of paints, 371.
- Bruère, P.** Stable colorimetric scales for the measurement of  $P_u$  values, 424.
- Brukl, A., and Maxymowicz, W.** Separation and determination of tellurium, 369.
- Brüning, A.** See Juckenack, A., and Brüning, A.
- Budel, M., and Charaux, C.** Primeverose and rhamnigenol, the products of enzymic hydrolysis of rhamnicoside, 41.
- Bullock, K.** Chemical constituents of the oleo resin and fatty matter of Indian valerian root, 525.
- Burford, S. F.** A forerunner of *The Analyst*, 141.
- Burgess, G. K.** The organisation and work of the United States Bureau of Standards, 319.
- Burgess, M. J., and Wheeler, R. V.** The limits of inflammability of firedamp and air. (Safety in Mines Research Board Report, No. 15), 302.

## C

- Cammack, M. L.** See Sherman, H. C., and Cammack, M. L.
- Campbell, F. L.** Quantitative toxicological investigations on mandibulate insects, 313.

- Campbell, W. R., and Hanna, M. I.** Determination of fructose, sucrose and inulin, 582.
- Canal, H.** See André, E., and Canal, H.
- Candy, H. C. H.** Some newly-discovered Stanzas written by John Milton (Review), 222.  
— See also Luff, A. P., and Candy, H. C. H.
- Carlier, P.** See Delaville, M., and Carlier, P.
- Carlsson, V.** See Eddy, W. H., Kohman, E. F., and Carlsson, V.  
— See also Kohman, E. F., Eddy, W. H., Carlsson, V., and Halliday, N.
- Carman, G. G.** See Mitchell, H. H., and Carman, G. G.
- Carpenter, T. M., and Fox, E. L.** Gas analysis apparatus modified for determination of methane in metabolism experiments, 636.
- Carr, F. H.** Insulin and its manufacture, 597.
- Carré, M. H.** See Emmett, A. M., and Carré, M. H.
- Carrick, C. W.** See Hauge, S. M., and Carrick, C. W.
- Cartledge, G. H.** Inorganic Physical Chemistry (Review), 217.
- Casparis, P.** Adulteration of liquorice with masticogna, 465.
- Cattelain, E.** Determination of iodine by means of hydrazine sulphate, 647.  
— Hydrazine sulphate in iodimetry, 51.  
— Use of hydrazine sulphate for the preparation of ammoniacal cuprous chloride, 423.  
— Use of hydrazine sulphate for the standardisation of iodine solutions, 317.
- Celsi, S. A.** Fluorescence reaction of malic acid, 592.
- Chaikoff, I. L.** See Bee, A. H., and Chaikoff, I. L.
- Channon, H. J.** See Drummond, J. C., Channon, H. J., and Coward, K. H.
- Chanutin, A.** Fate of creatine when administered to man, 256.
- Chapman, A. C.** On the presence of compounds of arsenic in marine crustaceans and shell fish, 548.  
— The detection and determination of glycerin in tobacco, 382.  
— The Fungi Imperfecti, and a further plea for an Institute of Industrial Micro-Biology, 319.
- Chapman, A. C., and Linden, H.** On the presence of lead and other metallic impurities in marine crustaceans and shell fish, 563.
- Chapman, R. N.** Possibilities and limitations of chloropicrin as a fumigant for cereal products, 262.
- Charaux, C.** See Budel, M., and Charaux, C.
- Chastellain, F.** Determination of ammoniacal nitrogen in manures, 261.
- Chatterji, D. N.** Applicability of the mydriatic test to the detection of datura in decomposed viscera, 344.  
— Chemical Examiner's Report for the U.P. of Agra and Oudh for the year 1925, 349
- Chesny, H. H.** See Weatherby, L. S., and Chesny, H. H.
- Chilowsky, C., and Perrin, F.** Distinction between natural and artificial pearls, 53.
- Church, W. H., Mack, E., and Boord, C. E.** Anti-knock materials, 365.
- Clark, A. H.** The alkaloids of *Ceanothus Americanus*, 355.
- Clark, L. E.** See Ries, E. D., and Clark, L. E.
- Clark, P. B.** See Dill, D. B., and Clark, P. B.
- Clarke, S. G.** See Evans, B. S., and Clarke, S. G.
- Claus, R.** See Prescher, J., and Claus, R.
- Clifford, F. W.** The care and custody of books, 597.
- Clifford, W. M.** Effect of short periods of cold storage on beef and mutton, 303.
- Cocking, T., and Price, E. A.** Colour reactions of vitamin A, 529.
- Cole, S. W.** Practical Physiological Chemistry (Review), 273.
- Coleman, J. B., and Arnall, F.** The Preparation and Analysis of Organic Compounds (Review), 599.
- Collens, A. E.** Lime seed oil and oil cake, 510.
- Colombier, L.** Determination of essential oil of mustard in mustard flour, 308.
- Conrath, P.** See Reinitzer, B., and Conrath, P.
- Cook, W. C.** Effectiveness of aliphatic compounds in attracting flies, 314.
- Cooke, J. H.** See Smith, H. L., and Cooke, J. H.
- Coops, J.** See Böeseke, J., and Coops, J.
- Copaux, A.** See Copaux, H., and Copaux, A.
- Copaux, H., and Copaux, A.** Photo-electric determination of coloured gases, 111.
- Copaux, H., and Matignon, C.** Different states of beryllium oxide, 107.
- Corley, R. C., and Denis, W.** Determination of calcium in tissues, faeces and milk, 208.
- Cortner, R. A., and Hoffman, W. F.** On the presence of amines in the distillate from Kjeldahl-Gunning nitrogen determinations, 648.
- Cotton, A., and Descamps, R.** Photographic spectro-polarimeter for the ultra-violet, 164
- Couch, J. F.** Relative toxicity of the lupine alkaloids, 361.
- Coward, H. F., and Wheeler, R. V.** The Ignition of Firedamp. (Safety in Mines Research Board Report, No. 8), 302.
- Coward, K. H.** See Drummond, J. C., Channon, H. J., and Coward, K. H.
- Cox, H. E.** The occurrence of arsenic in apples, 132.  
— The Chemical Analysis of Foods (Review), 164.
- Creighton, M.** See Dutcher, R. A., Creighton, M., and Rothrock, H. A.
- Crummett, A.** Standardisation of methods for testing the fastness of dyes, 649.

## D

- Dale, H. H.** See Drummond, J. C., Hill, A. V., Dale, H. H., and Henderson, L. J.
- Davidson, A.** Intermediates for Dyestuffs (Review), 219.
- Dawson, E. R.** See Platt, B. S., and Dawson, E. R.
- Day, H. A.** See Pucher, G. W., and Day, H. A.
- Dean, E. W.** See Neusbaum, C. A., De Verter, P. L., and Dean, E. W.

- De Bord, G. G.** Effect of dehydration on the bacterial flora of eggs, 98.
- Dedlow, C., and Smith, D. T.** Determination of moisture in meat extract, 521.
- De La Pena, P.** See Strecker, W., and de la Pena, P.
- Delaville, M., and Carlier, P.** Determination of small amounts of potassium, 368.
- Denigès, G.** Action of concentrated hydrobromic and hydriodic acids on the cobalt ion. New reaction for nickel, 478.  
— Qualitative reaction for copper, 536.
- Denis, W.** See Corley, R. C., and Denis, W.
- De Ong, E. R.** See Gray, G. P., and De Ong, E. R.
- Desalbres, L.** See Depont, G., Desalbres, L., and Bernette, A.
- Descamps, R.** See Cotton, A. and Descamps, R.
- Desch, C. H.** The Growth of Crystals, 319.
- De Toni, G. M.** Colorimetric determination of cholesterol and lecithin in blood in connection with Folin and Wu's system of blood analysis, 639.
- Deuel, Jr., H. J., Waddell, S. S., and Mandel, J. A.** Determination of glucosan, 468.
- De Verter, P. L.** See Neusbaum, C. A., De Verter, P. L., and Dean, E. W.
- De Waele, A.** See Bromley, H. A., and De Waele, A.
- Diaz, F. O.** See Strecker, W., and Diaz, F. O.
- Diem, A.** See Eckart, H., and Diem, A.
- Dill, D. B., and Alsberg, C. L.** Preparation, solubility and specific rotation of wheat gliadin, 44.
- Dill, D. B., and Clark, P. B.** Formaldehyde in certain marine products, 304.  
— Tin corrosion and blackening in certain marine products, 413.
- Dingley, L. A.** Carbon tetrachloride poisoning, 419.
- Dixon, H. B.** Ignition of ether at low temperatures, 154.
- Dore, W. H.** Determination of galactonic acid in pectin, 151.
- Dorsey, G. E.** The colour of red formations, 363.
- Dott, D. B.** Alleged deterioration in Indian opium, 255.  
— Cotarnine hydrochloride, 92.  
— Iodeosin indicator in alkaloidal determinations, 255.
- Druce, J. G. F.** The discovery of eka- and divmanganese, 482.
- Drummond, J. C.** See Rosenheim, O., and Drummond, J. C.
- Drummond, J. C., Channon, H. J., and Coward, K. H.** Studies on the chemical nature of vitamin A, 312.
- Drummond, J. C., Hill, A. V., Dale, H. H., and Henderson, L. J.** Lectures on certain aspects of Biochemistry (Review), 431.
- Dubrisay, R.** Application of capillarity measurements to fatty acid mixtures, 111.
- Duclaux, J., and Jeantet, P.** Transparency of natural waters to ultra-violet rays, 112.
- Duclaux, M. J.** Adsorbing properties of cellulose compounds, 481.
- Duerden, J.** See Bliss, H., Duerden, J., Roberts, J. F., Blyth, J., Hirst, H., and King, A. T.
- Dufulho, E.** See Barthe, L., and Dufulho, E.
- Dugdale, C. M., and Munro, R. J.** Vitamins in heat-sterilised food, 359.
- Dupont, G., Desalbres, L., and Bernette, A.** Crystalline salts of abiestic acid. Determination of abiestic acid, 365.
- Dutcher, R. A., Creighton, M., and Rothrock, H. A.** Vitamin studies. XI. Inorganic blood phosphorus and bone ash in rats fed on normal, rachitic and irradiated rachitic diets, 206.
- Dyer, F. J., and Forbes, W. B.** Diphenylamine as an internal indicator for iron, 536.
- Dyson, G. M.** Industrial chemicals from the sea, 597.

## E

- Eagles, B. A.** See Hunter, G., and Eagles, B. A.
- Eckart, H.** Commercial apple juice and pectin products, 251.  
— Refractometry as an aid to the investigation of fruit juices, 40.
- Eckart, H., and Diem, A.** Determination of starch in pectin and apple juices by a sedimentometric method, 524.
- Edelman, D.** See Schroeder, W. F., and Edelman, D.
- Eder, R., and Kutter, F.** Acidimetric titration and composition of commercial lactic acid, 533.
- Eddy, W. H.** See Kohman, E. F., Eddy, W. H., Carlsson, V., and Halliday, N.
- Eddy, W. H., Kohman, E. F., and Carlsson, V.** Vitamins in canned foods. IV. Green peas, 207.
- Efimov, V. V.** Colorimetric method for the determination of oxygen, 213.
- Eggleston, J. A.** See Richmond, H. D., and Eggleston, J. A.
- Egloff, G., and Morell, J. C.** Determination of unsaturated, aromatic, naphthene, and paraffin hydrocarbons in motor fuels, 316.
- Ehrenstein, R.** Shea butter, 40.
- Elek, A., and Sobotka, H.** Kjeldahl-Pregl method applied to nitro-compounds, 214.
- Ellis, D.** Use of sulphur bacteria as indicators in the investigation of polluted water, 530.
- Ellis, N. R., and Hankins, O. G.** Soft pork studies. I. Formation of fat in the pig on a ration moderately low in fat, 153.
- Ellis, N. R., and Isbell, H. S.** Soft pork studies. II. Influence of the ration upon the composition of the body fat of hogs. III. Effect of fat in food upon individual fatty acids in the body fat, 524.
- Ellman, S.** Volumetric method of assaying mercuric iodide, mercuric chloride and some other mercury compounds, 42.
- Elmore, J. W.** Determination of strychnine in poisoned grains, 470.
- Elsdon, G. D.** Annual Report of the Borough Analyst for the County Borough of Salford for 1925, 570.  
— Jena sintered glass crucibles, 30.

- Elsdon, G. D., and Smith, P.** Determination of palm kernel oil and butter fat in margarine, 72.
- Elsmie, G. V.** See Brady, O. L., and Elmsie, G. V.
- Elvehjem, C. A., and Hart, E. B.** Quantitative methods for the determination of iron in biological materials, 258.
- Emmett, A. M., and Carré, M. H.** Modification of the calcium pectate method for the determination of pectin, 307.
- England, E. H.** See Richmond, H. D., and England, E. H.
- Enna, F. G. A.** Analysis of Prussian blue, 479.
- Ephraim, F.** A Textbook of Inorganic Chemistry (Review), 651.
- Erskine, A. M.** Aromatic hydrocarbon content of natural gas petroleum, 476.  
— Determination of aromatic hydrocarbons in light petroleum, 475.
- Estill, H. W., and Nugent, R. L.** New confirmatory test for aluminium, 161.
- Etzel, G., and King, C. G.** Seed and oil of *Johannesia Princeps*, 365.
- Evans, B. S.** A wet method for the determination of silver in lead, 79.  
— An apparatus for continuous percolation and for filtration in neutral atmospheres, 229.
- Evans, B. S., and Clarke, S. G.** An accurate method for the determination of mercury in solution, 224.
- Evers, N.** Determination of arsenic in chemicals by the electrolytic method, 526.  
— The Chemistry of Drugs (Review), 272.
- F**
- Fachini, S.** Detection of olive oil obtained by extraction with solvents, 416.  
— Reagent for oil extracted by carbon disulphide, and identification of olive oil extracted by solvents, 636.
- Fåhræus, R.** See Svedberg, T., and Fåhræus, R.
- Fearon, W. R.** Colour reactions associated with vitamin A, 311.
- Feigl, F., and Sucharipa, A.** Interaction of ammonia and mercurous salts, 51.
- Feliciano, R. T.** Illicit beverages, 415.
- Ferreri, G.** Determination of lead tetra-ethyl in motor fuels, 104.
- Ferrey, G. J. W.** Analysis and composition of commercial glycerophosphates, 526.
- Ferris, S. W.** See Hill, J. B., and Ferris, S. W.  
— See also Peterkin, A. G., and Ferris, S. W.
- Field, J.** See Alsberg, C. L., Griffing, E. P., and Field, J.
- Filandeau, G.** Fresh and preserved eggs, 197.
- Fiske, C. H., and Subbarow, Y.** Colorimetric determination of phosphorus, 205.
- Fitch, J. B.** See Titus, R. W., Hughes, J. S., Hinshaw, W. R., and Fitch, J. B.
- Flanzy, —.** See Semichon, L., and Flanzy, —.
- Flury, P.** Action of salts of mercury on the veronals, 92.
- Florentin, D.** Determination of soluble silica in cement, mortar and concrete, 480.
- Fodor, A., and Reifenberg, A.** Researches on the fermentation of dried tobacco. I. Methods for separating nicotine and ammonia, 98.
- Fogg, H. C.** See Rice, A. C., Fogg, H. C., and James, C.
- Folin, O.** Determination of sugar in blood and in normal urine, 309.
- Foot, H. W., and Bradley, W. M.** Determination of calcium by conversion of the oxalate into the carbonate, 269.
- Forbes, E. B., and Swift, R. W.** The iron content of meats, 303.
- Forbes, W. B.** Examination of commercial tannic acid, 200.  
— See also Dyer, F. J., and Forbes, W. B.
- Fosse, R.** Formation of urea and of a substance giving the same colour reaction as formaldehyde with hydrazine, on heating vegetable juices, 153.
- Foster, R. H. K.** Use of methyl salicylate in a flowmeter, 216.
- Foult, C. W., and Bawden, A. T.** New type of end-point in electrometric titration and its application to iodimetry, 539.
- Fourneau, E.** See Girard, A., and Fourneau, E.
- Fowweather, F. S.** Determination of iron in blood, tissues and urine, 309.
- Fox, E. L.** See Carpenter, T. M., and Fox, E. L.
- Francis, A. W.** Determination of unsaturated compounds in petroleum products, 534.
- François, T.** See André, E., and François, T.
- Fred, E. B.** See Pederson, C. S., Peterson, W. H., and Fred, E. B.
- Frederick, R. C.** The air tester, 397.  
— See also Shaw, T. B., and Frederick, R. C.
- French, H. E.** See Bickel, V. T., and French, H. E.
- French, H. E., and Wirtel, A. F.**  $\alpha$ -Naphthyl isocyanate as a reagent for phenols and aliphatic amines, 472.
- Freundlich, H.** Colloid and Capillary Chemistry (Review), 598.
- Frey, R. W.** See Veitch, F. P., Frey, R. W., and Leinbach, L. R.
- Fry, H. S., and Grote, I. W.** Standardisation of the Sandmeyer reaction, with special applications, 264.
- Fuller, C. H. F.** See Lampitt, L. H., Hughes, E. B., Bilham, P., and Fuller, C. H. F.
- Funck, A. D.** Colorimetric determination of molybdenum, 537.
- G**
- Gaetgens, W.** Methoden der Bakteriologischen Untersuchungen von Nahrungsmitteln (Review), 377.
- Garby, C. D.** Determination of biguanide, 533.

## INDEX TO SUBJECTS.

## A

**Abietic Acid:** Crystalline salts of ——. Determination of ——. G. Dupont, L. Desalbres and A. Bernette, 365.

**Absorption bands of cholesterol.** Spectroscopic observations on cod liver oil. II. ——. F. W. Schlutz and M. R. Ziegler, 586.

**Absorptive power of charcoals;** Determination of ——. Surun, 481.

**Abstracts of Papers published in other Journals:** 38, 90, 150, 197, 249, 303, 351, 413, 464, 521, 581, 634.

**Accum, Frederick:** Life and Chemical Services of ——. (Review), C. A. Browne, 276.

**Acetaldehyde:** in normal blood, and its quantitative study in blood of normal and diabetic dogs. A. H. Bee and I. L. Chaikoff, 640.

**Acetic Acid:** glacial; Analysis of ——. H. D. Richmond and E. H. England, 283.

glacial; Determination of the strength of ——. C. O. Harvey, 238.

glacial; Effect of propionic acid on ——. 284.

**Acetic Anhydride:** Analysis of ——. H. D. Richmond and J. A. Eggleston, 281.

Gasometric method for determining ——. E. L. Whitford, 103.

Use of —— in Zeisel's method for determining methoxy groups. M. Nierenstein, 456.

**Acetone** bodies in blood and urine; Colorimetric method for determining ——. J. A. Behre and S. R. Benedict, 639.

Determination of —— by means of hydroxylamine hydrochloride. M. Marasco, 472.

extracts of tanning materials; Fluorescence of ——. L. Meunier and A. Jamet, 481.

in chloroform. 19.

method of preparing myoalbumin; its principal properties. M. Piettre, 45.

**Acid** in wool; Determination of alkali and ——. H. R. Hirst and A. T. King, 212.

soils; Aluminium and ——. J. Line, 532.

**Acidimetric** titration and composition of commercial lactic acid. R. Eder and F. Kutter, 533.

**Acidity** of highly coloured fruit-type products; Determination of ——. C. H. Badger and J. W. Sale, 583.

of soil; Colloidal complications in the thiocyanate method of determining the ——. F. O. Anderegg and R. P. Lutz, 48.

of writing inks; Electrometric determination of the ——. H. A. Bromley and A. de Waele, 567.

Revision of words denoting ——. 193, 195.

**Acids:** Amino ——. *See* **Amino-Acids.**

Combination of proteins, amino-acids, etc. (in milk) with —— and alkalis, and their combining weights. L. J. Harris, 39.

Dissociation constants of various —— in presence of boric acid. J. Böseken and J. Coops, 423.

earth-; Precipitation of —— by sodium compounds. (Investigations into the analytical chemistry of tantalum, niobium and their mineral associates. VI.) W. R. Schoeller and C. Jahn, 613.

Fatty ——. *See* **Fatty Acids.**

Iodimetric titration of ——. I. M. Kolthoff, 477.

organic; Detection and determination of lactic acid in presence of other ——. E. K. Nelson, 591.

organic —— in urine; Titration of. W. W. Palmer, 418.

organic —— of tomatoes. A. Borntträger, 151.

oxidising ——; Potentiometric titration of some. M. L. Malaprade, 271.

oxygenated —— derived from non-metals or metals of a similar character; Names of. 192, 195.

**Aconitic Acid** and its isomers; Natural occurrence of ——. O. A. Beath, 525.

**Aconitine:** Methyl red as indicator for ——. 316.

**Adsorbing** properties of cellulose compounds. M. J. Duclaux, 481.

**Adulterated** food in restaurants. (Legal Notes.) 630.

**Agar-Agar:** Boron compound in ——. 564.

**Aggregation:** Stages of ——; Changes in the state of matter in their dependence upon Pressure and Temperature. (Review), G. Tammann, 489.

**Agricultural analysis:** Abstracts. 47, 100, 156, 211, 261, 314, 363, 419, 532.

Education Association Sub-Committee's Report and recommendations on mechanical analysis of soils, 211.

Experiment Station; Connecticut ——. Report on Food Products and Drug Products for 1924. 87.

**Agriculture:** United States Department of ——. Food Inspection Decisions. No. 198: Wine vinegar, grape vinegar and malt vinegar, 579; No. 199: Gluten flour, self-raising, "Diabetic food," and Canned Pea grades, 580; No. 200: Milk and its Products, 580; No. 201: Glucose, mixing glucose, Confectioner's glucose, 581.

- Agriot Cherries**: Refractometric investigation of juice of —. 41.
- Air**: carbon monoxide in blood and —; Pyrotannic acid method for determining. R. R. Sayers and W. P. Yant, 99.  
chlorine in —; Colorimetric method for determining free. L. E. Porter, 476.  
currents; Influence of cooling power and of variability of — on sensations of air movements. 191.  
currents; Measurement of variations in the velocity and temperatures of —. 190.  
inflammability of firedamp and —; Limits of. (Safety in Mines Research Board Report No. 15.) M. J. Burgess and R. V. Wheeler, 302.  
oxidation of titanous sulphate solution. Vanadous sulphate, a new and powerful reducing agent. A. S. Russell, 267.  
Oxygen and carbon dioxide limits in respiratory —. A. Grögli, 256.  
smoke pollution of city —; Measuring the. J. S. Owens, 2.  
sulphur dioxide in presence of excess of —; Determination of. E. D. Ries and L. E. Clark, 477.  
tester. R. C. Frederick, 397.
- Alabaster** in ancient Egypt. 446.
- Albumin** in ancient Egypt; Sources of —. H. S. Shrewsbury, 624.
- Albuminoid Ammonia** in sewages and effluents; Method for the combined determination of oxygen absorbed and —. J. W. Haigh Johnson, 345.
- Alcohol** in chloroform; Determination of ethyl chloride and —. C. Newcomb, 19.  
in distilled spirits; Rapid determination of — and of colour in whiskey. J. F. Williams, 583.  
Methyl —. See **Methyl Alcohol**.  
Power — production from sugar beet. (Report to Minister of Agriculture), 463.  
-soluble protein isolated from polished rice. W. F. Hoffman, 205.
- Alcoholic** beverages; Detection of methyl alcohol in —. F. R. Georgia and R. Morales, 252.  
intoxication; A chemical test for —. H. W. Southgate, 208.
- Alcohols**: Anthraquinone- $\beta$ -carboxylic acid chloride as a reagent for —. T. Reichstein, 643.  
in aqueous and cottonseed oil solutions; Refractometric determination of esters and —. J. C. Munch, 314.  
 $\alpha$ -Naphthyl isocyanate as a reagent for —. V. T. Bickel and H. E. French, 263.  
Saturated aliphatic — from sperm oil and spermaceti. E. André and T. François, 644.
- Aldehyde** in ether; Determination of —. E. P. Phelps and A. W. Rowe, 308.
- Aldehydes**: 2:4 dinitrophenylhydrazine as a reagent for ketones and —; Use of. O. L. Brady and G. V. Elsmie, 77.  
in glacial acetic acid. 285.
- Alfalfa**: nitrogenous constituents of the juice of the — plant; Some. VI. Asparagine and amino acids in —. H. B. Vickery, 100.
- Algae**: Arsenic in marine —. 548.
- Alimentary** pastes; Determination of unsaponifiable matter in wheat flour, — and eggs. R. Hertwig and L. H. Bailey, 306.
- Aliphatic** alcohols; Saturated — from sperm oil and spermaceti. E. André and T. François, 644.  
amines;  $\alpha$ -Naphthyl isocyanate as a reagent for phenols and —. H. E. French and A. F. Wirtel, 472.  
compounds; Effectiveness of — in attracting flies. W. C. Cook, 314.
- Alkali**: Examination of cacao butter for — and alkaline earth. J. Prescher and R. Claus, 199.  
in wool; Determination of acid and —. H. R. Hirst and A. T. King, 212.
- Alkaline** copper solution (Fehling reagent); Standard —. M. G. Pegurier, 91.  
range of hydrogen ion concentration determinations; Buffer mixture for —. W. R. G. Atkins and C. F. A. Pantin, 317.
- Alkaline Earth**: Examination of cacao butter for alkali and —. J. Prescher and R. Claus, 199.
- Alkalis**: Combination of proteins, amino-acids, etc. (in milk), with acids and —, and their combining weights. L. J. Harris, 39.
- Alkaloid** content of belladonna root. J. J. Blackie, 202.
- Alkaloidal** determinations; Iodeosin indicator in —. D. B. Dott, 255.  
titrations; Indicators for —. H. Wales, 316.
- Alkaloids** in opium; Determination of sugar, oily substances and total —. J. N. Rakshit, 491.  
of *Ceanothus Americanus*. A. H. Clark, 355.  
of the tropine group; Changes undergone by — in putrefying organic media. M. Magnette, 419.  
lupine —; Relative toxicity of. J. F. Couch, 361.
- Allen's** Commercial Organic Analysis. Vol. IV. (Review), 320.
- Alloy Steel**: cerium in —; Determination of. K. Swoboda and R. Horny, 215.
- Alloys**: boron —; Analysis of. N. Tschischewski, 424.
- Almonds**: Ground — and the Merchandise Marks Act. (Legal Notes), 187.
- Aluminium**: aluminium oxide in —; Determination of. W. H. Withey and H. E. Millar, 425.  
and acid soils. J. Line, 532.  
cobalt aluminate test for —; Improvement of the. C. Otto, 478.  
in certain non-ferrous materials; Rapid detection of small amounts of —. G. E. F. Lundell and H. B. Knowles, 214.  
new confirmatory test for —. H. W. Estill and R. L. Nugent, 161.

- Aluminium**—*continued*.  
 precipitates; Co-precipitation of magnesium with —. A. Lassieur, 368.  
 Separation of zirconium from iron and —. R. Lessing, 161.
- Aluminium Oxide** in aluminium; Determination of —. W. H. Withey and H. E. Millar, 425.
- “Aluminon”**: Reaction of — with hydroxides of beryllium, rare earths, zirconium and thorium. A. R. Middleton, 537.
- American wormseed oil**. A. Hogstad, Junr., 356.
- Amines**: aliphatic;  $\alpha$ -Naphthyl isocyanate as a reagent for phenols and —. H. E. French and A. F. Wirtel, 472.  
 in the distillate from Kjeldahl-Gunning nitrogen determinations; On the presence of —. R. A. Cortner and W. F. Hoffman, 648.
- Amino Acids**: Formaldehyde titration of certain —. S. L. Jodidi, 263.  
 in alfalfa; Asparagine and —. H. B. Vickery, 100.  
 in milk; Combination of proteins and —, with acids and alkalis, and their combining weights. L. J. Harris, 39.
- Ammonia**: albuminoid-; Method for the combined determination of oxygen absorbed and — in sewages and effluents. J. W. Haigh Johnson, 345.  
 and mercurous salts; Interaction of —. F. Feigl and A. Sucharipa, 51.  
 in grape must; Influence of sugar on the determination of —. J. Ventre and E. Bouffard, 352, 353.  
 separation of nicotine and —; Methods for the. (Researches on the fermentation of dried tobacco. I.) A. Fodor and A. Reifenberg, 98.  
 Sliding-gauge colorimeter, and determination of small amounts of nitrites, lead, iron and —. A. L. Bernoulli, 649.
- Ammonium Sulphate**: Titration of — by the stearate method. H. Atkinson, 140.
- Anaerobic spore-bearing bacteria** in milk. E. A. Bliss, 589.
- Anaesthetics**: local-; Relationship between hydrogen ion concentration and chemical constitution in certain —. E. B. Vliet and R. Adams, 527.
- Analysis**: Errors of judgment in chemical —. J. F. Tocher, 338.  
 Inorganic —. *See* **Inorganic analysis**.  
 microchemical; New metallic pyrocatechol compounds and their use in —. A. Martini, 646.  
 Organic —. *See* **Organic analysis**.  
 Preparation of butter samples for —. L. C. Mitchell and S. Alfend, 40.  
 Qualitative organic —; Introduction to. (Review), H. Staudinger, 488.  
 Volumetric —. *See* **Volumetric Analysis**.
- Analyst**: The —; A forerunner of. S. F. Burford, 141.
- Analyst's certificate**; Alleged insufficiency of —. (Legal Notes: Arsenic in apples), 408.
- Analytical balance** without rider. A. Wirth, 482.
- Aniline poisoning**; A case of —. J. Inkster, 641.
- Animal foods**; Biological value of the nitrogen of mixtures of patent white flour and —. H. H. Mitchell and G. G. Carman, 358.  
 organism; Electrolytic method for investigating the circulation of gold in the —. S. Lomholt, 97.  
 organs or excreta; Determination of bismuth in —. 159.  
 poisoning cases. 410.  
 tissues; Determination of small amounts of lead in —. R. Nakaseko and I. Nakano, 46.  
 tissues; Nitrates in vegetable and —. E. Kohn-Abrest and S. Kawakibi, 585.
- Animals**: arsenic in —; Occurrence of. 549.  
 Toxic action of saffrafr oil and safrol on —. G. A. Mallinson, 46.
- Aniseed Oil**: Colour reaction distinguishing between — and star anise oil. W. v. d. D. Mareeuw, 254.
- Ankylostoma duodenale**: Carbon tetrachloride for treating —. 260.
- Anthraquinone- $\beta$ -Carboxylic Acid Chloride** as a reagent for alcohols, etc. T. Reichstein, 643.
- Anthraquinone- $\beta$ -Sulphonic Acid**: Oxygen absorption by — in alkaline solution. T. K. Kruse, 214.
- Antineuritic substances**; Differentiation between the water-soluble growth-promoting and —. S. M. Hauge and C. W. Carrick, 586.
- Anti-Knock materials**. W. H. Church, E. Mack and C. E. Boord, 365.
- Antirachitic factor** of cod liver oil; Effect of storage on the — when mixed with ground grains. E. B. Hart, H. Steenbock and S. Lepkovsky, 94.  
 substances. IV. The polymerisation of cholesterol. C. E. Bills and F. G. McDonald, 469.  
 value of irradiated cholesterol. II. Separation into an active and inactive fraction. A. F. Hess, M. Weinstock and E. Sherman, 638.  
 vitamin; Relation between amount of ultraviolet light received by hens and amount of — in eggs produced. J. S. Hughes, L. F. Payne, R. W. Titus and J. M. Moore, 207.
- Antiseptic phenol** from betel leaves; Aseptosol: a new —. J. McLang, 356.
- Apparatus**: Abstracts. 53, 110, 164, 216, 318, 371, 427, 480, 539, 596, 649.
- Apple juice** and pectin products; Commercial —. H. Eckart, 251.  
 juices; Determination of starch in pectin and — by a sedimentric method. H. Eckart and A. Diem, 524.  
 pulp in jam; Detection of —. W. Part-ridge, 346.

- Apples:** Arsenic in —; Alleged insufficiency of analyst's certificate. (Legal Notes), 408.  
 arsenic in Canadian sprayed —. Examination for. F. T. Shutt, 291.  
 arsenic in —; Occurrence of. H. E. Cox, 132.  
 arsenic in —. (Parliamentary Notes), 244.  
 arsenic in —; Prosecutions for. (Legal Notes), 83.  
 arsenical —; Inspector's right of selection. (Legal Notes), 242.  
 Arsenical —. (Legal Notes), 574.  
 Contamination of — by arsenic. (Ministry of Health Circular No. 659), 38.  
 in cold storage; Functional diseases of —. (Food Investigation Board Report No. 23), 85.  
 Preservation of — in storage. 143.
- Applied Chemistry:** (Review), C. K. Tinkler and H. Masters, 543.  
 Dictionary of —. Vol. VI. S-Acid to Tetryl. (Review), E. Thorpe, 374.  
 Society of Chemical Industry Reports on the Progress of —. (Review), Vol. X., 603.
- Arachis Oil:** Thiocyanogen absorption of —. 264.
- Arcoline:** Methyl red as indicator for —. 316.
- Arginine:** Direct determination of — in the analysis of proteins. VII. R. H. A. Plimmer and J. L. Rosedale, 309.  
 Separation of histidine and —. H. B. Vickery and C. S. Leavenworth, 418.
- Argon** in blood. L. Hackspill, A. P. Rollet, and M. Nicloux, 357.
- Armenian bole;** Arsenious oxide in —. 413.
- Aromatic hydrocarbons.** See **Hydrocarbons.**
- Arrowroot:** Sweet potato starch in cornflour and —. J. R. Stubbs, 400.
- Arsenic compounds** in marine crustaceans and shell fish; On the presence of —. A. C. Chapman, 548.  
 Contamination of apples by —. (Ministry of Health Circular No. 659), 38.  
 determinations; Effect of cellulose on —. T. J. Ward, 457.  
 "Gulf sickness" and the — theory. A. Juckenack and A. Brüning, 531.  
 in animals. 549.  
 in apples. (Parliamentary Notes), 244.  
 in apples; Alleged insufficiency of analyst's certificate. (Legal Notes.) 408.  
 in apples; Occurrence of —. H. E. Cox, 132.  
 in apples; Prosecutions for —. (Legal Notes), 83.  
 in Canadian sprayed apples; Examination for —. F. T. Shutt, 291.  
 in chemicals; Determination of — by the electrolytic method. N. Evers, 526.  
 in fish. 549, 556.  
 in marine algae. 548.  
 in organic compounds; Determination of —. H. Ter Meulen, 421.  
 in plants. 549.  
 in sea-water. 555.
- Arsenic—continued.**  
 in tartar emetic; Lead and —. E. Griffiths Jones, 201.  
 Mercuric bromide paper for use in the Gutzeit test for —. G. Kemmerer and H. H. Schrenk, 478.
- Arsenic Acid:** Iodimetric determination of —. B. Ormont, 269.
- Arsenical apples;** Inspector's right of selection. (Legal Notes), 242.  
 apples. (Legal Notes), 574.
- Artichokes:** Analysis of Jerusalem —. R. F. Jackson, C. G. Silsbee and M. J. Proffitt, 304.
- Artificial daylight shades;** Dyes for —. 597.  
 diets; Use of commercial dextrin in —. L. Randoin and R. Lecocq, 638.  
 silk; Miscellaneous reactions for —. 213.  
 "wools": Misuse of terms. 244.
- Ascaridole** in chenopodium oil; Determination of —. H. Paget, 170.
- Aseptosol:** A new antiseptic phenol from betel leaves. J. McLang, 356.
- Asparagine** in alfalfa; Amino acids and —. H. B. Vickery, 100.
- Aspirin** tablets; Examination of —. 183.
- Associazione Italiana Di Chimica:** Address of the Society of Public Analysts to the —. 280.
- Assyrians:** Chemistry of the Ancient — (Review), R. C. Thompson, 112.
- Atmosphere:** Polluted — a factor in the deterioration of bookbinding leather. F. P. Veitch, R. W. Frey and L. R. Leinbach, 373.
- Atmospheres:** Apparatus for continuous percolation and for filtration in neutral —. B. S. Evans, 229.
- Atmospheric** dusts; Comparative tests of instruments for determining —. (U.S.A. Public Health Bulletin No. 144), 36.  
 pollution; Advisory Committee on —. (Meteorological Office, Air Ministry). Report on Observations in the year ending March 31st, 1925. 86.  
 pollution in London. 412.
- Atomic** number 61: Illinium; The element of —. J. A. Harris, L. F. Yntema and B. S. Hopkins, 372.
- Atropine:** Methyl red as indicator for —. 316.
- Australia:** Dugong oil from —. 150.
- Avgotarachon:** C. Pyriki, 198.

## B

- Bacillus:** typhoid; Action of — on milk. C. Gorini, 641.
- Bacteria** in milk; Anaerobic spore-bearing —. E. A. Bliss, 589.  
 lactic acid produced by pure and mixed cultures of —; Forms of. C. S. Pederson W. H. Peterson and E. B. Fred, 361.  
 sulphur — as indicators in the investigation of polluted water; Use of. D. Ellis, 530.

- Bacterial** activity in milk; Stimulation of —. C. Gorini, 530.  
contamination of milk. 245.  
count of whole milk in relation to that of cream and skim milk separated from it. C. S. Leete, 208.  
flora of eggs; Effect of dehydration on the —. G. G. De Bord, 98.
- Bacteriological** abstracts; 44, 93, 153, 203, 255, 309, 357, 418, 466, 527, 585, 636.  
Examination of Foods; Methods of —. (Review), W. Gaetgens, 377.
- Baker's Itch**: (Parliamentary Notes), 244.
- Baking Powder**: Impurity in —. 626.
- Bakteriologischen** Untersuchungen von Nahrungsmitteln; Methoden der —. (Review), W. Gaetgens, 377.
- Balance**: Analytical — without rider. A. Wirth, 482.  
Guichard's hydrostatic compensation —. 596.
- Banana** flour. E. A. Ullán, 634.
- Barbitone** group; Scheduling of veronal and the —. (Dangerous Drugs Act), 248.
- Barium Chloride**: Volumetric determination of sulphates by means of potassium stearate and —. H. Atkinson, 81.
- Barium Sulphate**: Influence of citrates on the precipitation of —. M. L. Nichols and O. J. Thies, Junr, 216.
- Bases** of the diphenyl series; Gravimetric method for determining the — and a new complex salt of these —. W. Herzog, 592.
- Basic Slag**: fluorine in —; Determination of. R. G. Warren, C. T. Gimingham and H. J. Page, 101.  
New method of evaluating — and mineral phosphates. E. Vanstone, 47.
- Basicity**: Revision of words denoting —. 193, 195.
- Baumé** hydrometer readings; Temperature corrections of —. C. F. Snyder, 427.
- B.D.H.** Book of Standards. (Review), 373.
- Bean**: velvet —; Water-soluble vitamin content of. W. D. Salmon and E. R. Miller, 260.
- Beef**: Effect of short periods of cold storage on mutton and —. W. M. Clifford, 303.  
plasma; Concentrations of certain constituents in normal —. C. S. Robinson and C. F. Huffman, 257.
- Beeswax**: Data used in graph for —. A. A. Weir, 181; M. S. Salamon, 293.
- Beet**: sugar —; Power alcohol production from. (Report to Minister of Agriculture), 463.
- Belladonna** root; Alkaloid content of —. J. J. Blackie, 202.
- Benedict** method for sugar in blood and cerebrospinal fluid; Comparison of the Folin-Wu and the new —. J. D. Lyttle and J. E. Hearn, 466.
- Benzene** Derivatives; Synthesis of —. (Review), S. C. Bates, 430.  
Solubility of vitamin B in —. R. R. Williams and R. E. Waterman, 470.
- Benzidine** as a reagent for living plants. C. Roupert, 259.
- Benzoic Acid**: Elimination of — as hippuric acid in rabbits. W. H. Griffith, 528.  
Volatility of —. A. F. Lerrigo, 405.
- Benzoylmethylglyoxime** as a precipitant for palladium. J. Hanus, A. Jilek, and J. Lukas, 109.
- Beryllium**: Reaction of "aluminon" with hydroxides of rare earths, zirconium, thorium and —. A. R. Middleton, 537.
- Beryllium Oxide**: Different states of —. H. Copaux and C. Matignon, 107.
- Betel** leaves; Aseptosol: A new antiseptic phenol from —. J. McLang, 356.
- Beverages**: Illicit —. R. T. Feliciano, 416.  
methyl alcohol in alcoholic —; Detection of. F. R. Georgia and R. Morales, 252.
- Bifluorides**: Analysis of —. E. C. Roper and E. B. R. Prideaux, 370.
- Biguamide**: Determination of —. C. D. Garby, 533.
- Bilberries**: Refractometric investigation of juice of —. 41.
- Bio-Assay** of drugs. J. C. Munch, 42.
- Biochemical** abstracts; 44, 93, 153, 203, 255, 309, 357, 418, 466, 527, 585, 636.
- Biochemistry**: Lectures on certain aspects of —. J. C. Drummond, A. V. Hill, H. H. Dale and L. J. Henderson. (Review), 431.
- Biological** materials; Quantitative methods for determining iron in —. C. A. Elvehjem and E. B. Hart, 258.  
testing of therapeutic substances. 196.  
value of the nitrogen of mixtures of patent white flour and animal foods. H. H. Mitchell and G. G. Carman, 358.
- Biology**: Students of Medicine and —; Practical Physical and Colloid Chemistry for. (Review), L. Michaelis, 221.
- Birmingham**: City of —. Annual Report of the City Analyst for 1925, 294. Quarterly Reports: Fourth quarter, 1925, 182; First quarter, 1926, 346; Second quarter, 1926, 512.
- Bismuth**: detection and determination of —; Sensitive reaction for. A. Girard and E. Fourneau, 51, 159.  
in urine; Determination of small quantities of —. C. A. Hill, 97.  
iron in —; Determination of small quantities of. 506.  
Sensitive method for the detection, separation and determination of —. A. Girard and E. Fourneau, 51, 159.  
Separation and determination of — by hydrolysis. L. Moser and W. Maxymowicz, 161.  
Separation of tellurium from —. 369.
- Bismuthate** method for determining manganese. B. Park, 425.
- Bitumen**: Use of — in ancient Egypt, 445.
- Blackberries**: Refractometric investigation of juice of —. 41.
- Blacks** and Pitches. (Review), H. M. Langton, 168.

- Bleached cotton**; "Boiling off" value of —. Angele, 476.  
writing; Deciphering chemically — by means of dyes. R. Mellet and A. Bischoff, 100.
- Blood**: Acetaldehyde in normal — and its quantitative study in — of normal and diabetic dogs. A. H. Bee and I. L. Chaikoff, 640.  
acetone bodies in urine and —; Colorimetric method for determining. J. A. Behre and S. R. Benedict, 639.  
analysis; Colorimetric determination of cholesterol and lecithin in blood in connection with Folin and Wu's system of —. G. M. De Toni, 639.  
Argon in —. L. Hackspill, A. P. Rollet and M. Nicloux, 357.  
carbon monoxide in air and —; Pyrotannic acid method for determining. R. R. Sayers and W. P. Yant, 99.  
glutathione in the corpuscles of mammalian —; Presence of. H. F. Holden, 95.  
in urine; Detection of —. G. Poiret and A. Lambert, 642.  
iron in tissues, urine and —; Determination of. F. S. Fowweather, 309.  
Isolation of a new substance from — and its bearing on present methods for determining uric acid. G. Hunter and B. A. Eagles, 95.  
phosphorus; Inorganic — in rats fed on normal, rachitic and irradiated rachitic diets. R. A. Dutcher, M. Creighton and H. A. Rothrock, 206.  
pigment; Reaction of potassium ferricyanide with the —. M. Nicloux and J. Roche, 95.  
stains; Detection of —. 411.  
sugar in — and cerebrospinal fluid; Comparison of the Folin-Wu and the new Benedict method for. J. D. Lyttle and J. E. Hearn, 466.  
sugar in — and in normal urine; Determination of. O. Folin, 309; S. R. Benedict, 467.  
Thiasine (new sulphur-containing compound) in the —. S. R. Benedict, E. B. Newton and J. A. Behre, 257.  
uric acid in —; Determination of. H. Brown, 357.
- Blood Sugar** values; Correction of Folin-Wu —. B. L. Oser and W. G. Karr, 258.
- "Blowing"**; Effect of — on the composition of certain fatty oils. C. H. Thomson, 177.  
of canned fruit due to chemical action. G. W. Monier-Williams, 402.
- "Blown"** tins; Freshly ground coffee and —. J. W. Black, 403.
- Blubber Oil** from the dugong. 150.
- Body fat** of hogs; Influence of the ration upon the composition of the —. Effect of fat in food upon individual fatty acids in the —. N. R. Ellis and H. S. Isbell, 524.
- "Boiling Off"** value of bleached cotton. Angele, 476.
- Boiling Point** of petroleum products; Relation between some other properties and the —. J. B. Hill and S. W. Ferris, 105.
- Bole**: Arsenious oxide in Armenian —. 413.
- Bombs**: Determination of the heating value of coals in monel metal —. J. C. Geniesse and E. J. Soop, 110.
- Bömer's** melting-point method; Influence of fatty acids on —. F. J. F. Muschter and R. Smid, 464.
- Bone Ash** in rats fed on normal, rachitic and irradiated rachitic diets. R. A. Dutcher, M. Creighton and H. A. Rothrock, 206.
- Bookbinding** leather; Polluted atmosphere a factor in the deterioration of —. F. P. Veitch, R. W. Frey, and L. R. Leinbach, 373.
- Books**: Care and custody of —. F. W. Clifford, 597.
- Borax**: titration of —; Use of glucose syrup in the. L. S. Weatherby and H. H. Chesny, 538.
- Boric Acid** determinations; Invert sugar as a reagent for —. J. A. M. Van Liempt, 293; G. van B. Gilmour, 404.  
Dissociation constants of various acids in presence of —. J. Böeseken and J. Coops, 423.  
in potted meat. (Legal Notes), 299.  
in sausages; Label an insufficient declaration. (Legal Notes), 408.
- Borneol** in spruce turpentine. A. S. Wheeler and C. R. Harris, 49.
- Boron** alloys; Analysis of —. N. Tschischewski, 424.
- Bread**: age of —; Determination of. J. P. Peper, 251.  
total solids of —; Determination of. R. Hertwig and L. H. Bailey, 38.
- Brom-cresol Purple Test** for detecting alkaline milk. I. F. Proctor and A. T. R. Mattick, 197.
- Bromides** of linseed and some other drying oils; Further notes on the crystalline —. H. Toms, 387.
- Bromophenol Blue** as indicator for alkaloidal titrations. 316.
- Bronze** used in ancient Egypt. 439.
- Brown Heart** in apples in cold storage. 85.
- Brucine**: Methyl red as indicator for —. 316.
- Buffer** mixture for the alkaline range of hydrogen ion concentration determinations. W. R. G. Atkins and C. F. A. Pantin, 317.  
solutions; Methyl orange error in the determination of  $P_{H_2}$  values by comparison with Clark's —. I. M. Kolthoff, 423.
- Buffers**: glucose in presence of phosphate —; Determination of. M. B. Visscher, 521.
- Building Works**: Rubber and its uses in —. (Review), H. P. Stevens, 434.
- Burrell** methane indicator; Detection of petroleum vapour with the —. G. W. Jones and W. P. Yant, 104.

- Butter:** Cacao —. See **Cacao Butter**.  
 "Cooking" — in Trinidad. 462.  
 Excess water in —. A legal defence. (Legal Notes), 574.  
 Excess water in — and a label warranty. (Legal Notes), 348.  
 Excess water in —. Case dismissed on legal grounds. (Legal Notes), 629.  
 fat in margarine; Determination of palm kernel oil and —. G. D. Elsdon and P. Smith, 72.  
 fat in milk; Relationship between casein and —. 609.  
 fat in milk; Relationship between non-fatty solids and —. 611.  
 fat in milk; Relationship between yield, solids not-fat, total solids and —. 608.  
 samples; Preparation of — for analysis. L. C. Mitchell and S. Alfend, 40.  
 Shea —. R. Ehrenstein, 40.
- Butyric Acid Value:** Determination of milk fat by means of the —. J. Grossfeld, 416.
- C**
- Cacao butter;** Examination of — for alkali and alkaline earth. J. Prescher and R. Claus, 199.  
 butter; Thiocyanogen absorption of —. 264.
- Cade Oil.** R. Huerre, 417.  
 Polarimetric examination of —. R. Massy, 466.
- Cadmium** in presence of copper; Detection of —. R. Meurice, 367; G. M. Karns, 646.
- Caesium:** Analytical chemistry of rubidium and —. W. Strecker and F. O. Diaz, 162.
- Caffeine-free** and natural coffees. J. Pritzker and R. Jungkuz, 355.  
 Yocco, a new drug containing —. E. Perrot and A. Rouhier, 465.
- Cake:** oil-; Refractometric determination of fat in oil seeds and —. H. Zander, 592.
- Calcium:** Determination of — by conversion of the oxalate into the carbonate. H. W. Foote and W. M. Bradley, 269.  
 in tissues, faeces and milk; Determination of —. R. C. Corley and W. Denis, 208.
- Calcium Carbide** method for determining moisture; Gasometric —. W. A. Jakowenko, 106.
- Calcium Carbonate:** Determination of calcium by conversion of the oxalate into —. H. W. Foote and W. M. Bradley, 269.
- Calcium Lactate** tablets; Examination of —. 184.
- Calcium Oxalate:** Determination of calcium by conversion of the — into the carbonate. H. W. Foote and W. M. Bradley, 269.
- Calcium Pectate** method for determining pectin; Modification of —. A. M. Emmett and M. H. Carré, 307.
- Calibration** of collodion membranes; Investigations into the standardisation and —. I. C. Lundsgaard and S. A. Holbil, 428.  
 of the kata thermometer. 191.
- Canada:** Report of the Dominion Chemist for the year ending March 31st, 1925. 519.
- Canadian** sprayed apples; Examination of — for arsenic. F. T. Shutt, 291.
- Candlenut Oil:** Crystalline bromides of —. 389.
- Canned foods;** Chlorinated drinking water and its use in the preparation of —. H. Serger, 362.  
 foods; Vitamins in —. IV. Green Peas. W. H. Eddy, E. F. Kohman and V. Carlsson, 207.  
 fruit; "Blowing" of — due to chemical action. G. W. Monier-Williams, 402.  
 tomatoes; Adulteration and misbranding of — United States *v.* A. J. Lewis. (Legal Notes), 34.  
 peaches; Vitamins in —. E. F. Kohman, W. H. Eddy, V. Carlsson and N. Halliday, 260.
- Capillarity** measurements; Application of — to fatty acid mixtures. R. Dubrisay, 111.
- Capillary Chemistry;** Colloid and —. (Review), H. Freundlich, 598.
- Carbohydrate** metabolism in health and disease. H. MacLean, 429.
- Carbolic Acid:** lysol "free from —;" Sale of. (Legal Notes), 571.
- Carbon:** Assimilation of — by green plants. Photosynthesis. (Review), W. Stiles, 326.  
 in organic compounds; New micro method for determining —. H. L. Lochte, 364.
- Carbon Dioxide** in carbonates; New and simple method for determining —. J. R. I. Hepburn, 622.  
 limits in respiratory air; Oxygen and —. A. Grögli, 256.
- Carbon Disulphide** in gas (small volumes); Determination of traces of —. W. J. Huff, 156.  
 Reagent for oil extracted by —, and identification of olive oil extracted by solvents. S. Fachini, 636.  
 Sensitive reaction for —. P. Saccardi, 636.
- Carbon Monoxide:** Absorption of — by cuprous chloride solution. L. Moser and F. Hanika, 266.  
 in blood and air; Pyrotannic acid method for determining —. R. R. Sayers and W. P. Yant, 99.
- Carbon Tetrachloride** as a reagent for phenols; Use of —. G. E. Trease and H. Tingey, 534.  
 poisoning. L. A. Dingley, 419.  
 Toxicity of —. M. Khalil, 260.
- Carbonates:** carbon dioxide in —; New and simple method of determining. J. R. I. Hepburn, 622.
- Carbonyl Group** in organic compounds; Accurate general iodimetric method for determining the —. E. G. R. Ardagh and J. G. Williams, 102.
- Cardamoms:** Colour of compound tincture of —. R. R. Bennett and G. Middleton, 525.

- Casein** in milk; Relation between butter fat and —. 609.  
in milk; Relation between lactation period and —. 610.  
**Iron** in — determined by the ferro-cyanide method. 511.
- Catalytic** activity of dust particles. F. O. Rice 539.
- Catawba** grape juice. B. G. Hartmann, 151.
- Cattle**: flesh of emaciated —; Chemical study of. R. Hoagland and W. C. Powick, 249.
- Ceanothus Americanus**: Alkaloids of —. A. H. Clark, 355.
- Cellulose** compounds; Adsorbing properties of —. M. J. Duclaux, 481.  
Effect of — on arsenic determinations. T. J. Ward, 457.  
Ester Varnishes. (Review), F. Sproxton, 166.
- Cement**: Portland —; Determination of uncombined lime in. W. Larch and R. H. Bogue, 480.  
silica in —, mortar, and concrete; Determination of soluble. D. Florentin, 480.
- Centrifuging** in volumetric analysis. R. F. Le Guyon, 536.
- Cephaline**; Methyl red as indicator for —. 316.
- Cerbera Odallum** poisoning. 410.
- Cereal** products; Possibilities and limitations of chloropicrin as a fumigant for —. R. N. Chapman, 262.
- Cerebrospinal Fluid**: sugar in blood and —; Comparison of the Folin-Wu and the new Benedict method for. J. D. Lyttle and J. E. Hearn, 466.
- Cerium** in alloy steel; Determination of —. K. Swoboda and R. Horny, 215.
- Chalk**; French —. 182.
- Chamomile** (mayweed) and a taint in milk. F. Procter, 527.
- Charcoals**: absorptive powers of —; Determination of. Surun, 481.  
Identification of "Norit" and other wood —. H. G. Tanner, 50.
- Chaulmoogra Group**: Oils of the —. 90.
- Chaulmoogric Acid**: Oxidation of — by permanganate. G. A. Perkins, 465.
- Chemical** analysis; Errors of judgment in —. J. F. Tocher, 338.  
constitution of certain local anaesthetics; Relationship between hydrogen ion concentration and —. E. B. Vliet and R. Adams, 527.  
nomenclature; Revision of inorganic —. M. Delépine, 192, 194.  
reactions and volumetric titrations in Wood's light. R. Mellet and M. A. Bischoff, 480.  
Services and Life of Frederick Accum. (Review), C. A. Browne, 276.  
Synonyms and Trade Names. (Review), W. Gardner, 654.
- Chemicals**: Arsenic in — determined by the electrolytic method. N. Evers, 526.  
from the sea; Industrial —. G. M. Dyson, 597.
- Chemistry**: Applied —. See **Applied Chemistry**.
- Chemistry**—continued.  
Colloid —. See **Colloid Chemistry**.  
Dairy —. See **Dairy Chemistry**.  
in Industry. (Review), H. E. Howe, 489.

Three centuries of —. Phases in the growth of a Science. (Review), I. Masson, 325.
- Chemists**: Forgotten —. E. F. Smith, 319.  
Year-Book. (Review), F. W. Atack, 322.
- Chenopodium Oil**: ascaridole in —; Determination of. H. Paget, 170.
- Cherries**: Refractometric investigation of juice of agriot —. 41.
- Chicken** and ham roll. (Legal Notes), 514.
- Chinese** wood (tung) oil; A test for —. E. R. Bolton and K. A. Williams, 335.  
wood (tung) oil; Thiocyanogen absorption method of determining the composition of —. H. P. Kaufmann, 473.
- Chlorates**: Determination of perchlorates and —. K. Scharrer, 370.
- Chloride** in commercial cyanides; Determination of —. A. Bock, 425.
- Chlorinated** drinking water and its use in the preparation of canned foods. H. Serger, 362.  
in air; Colorimetric method for determining free —. L. E. Porter, 476.  
in bleached flour. A. Seidenberg, 150.  
Water sterilisation by gaseous —. (Review), 545.
- Chloroform**: Acetone in —. 22.  
alcohol and ethyl chloride in —; Determination of. C. Newcomb, 19.  
Ethyl carbonate in —. 23.
- Chloropicrin** as a fumigant for cereal products; Possibilities and limitations of —. R. N. Chapman, 262.
- Cholesterol**: Absorption bands of —. Spectroscopic observations on cod liver oil. II. —. F. W. Schlutz and M. R. Ziegler, 586.  
Antirachitic value of irradiated —. II. Separation into an active and inactive fraction. A. F. Hess, M. Weinstock and E. Sherman, 638.  
Identification and determination of — and certain other compounds. (Identification of hydrogenated oils.) J. V. Steinle and L. Kahlenberg, 310.

**Cholesterol**—*continued*.

- in blood; Colorimetric determination of lecithin and — in connection with Folin and Wu's system of blood analysis. G. M. De Toni, 639.
- Polymerisation of —. (Antirachitic substances. IV.) C. E. Bills and F. G. McDonald, 469.
- Choline** and nicotinic acid. (Simpler constituents of yeast.) H. B. Vickery, 468.
- Chromium**: Volumetric determination of —. B. Reinitzer and P. Conrath, 367.
- Cinchonidine**: Bromocresol purple as indicator for —. 316.
- Cinchonine**: Bromocresol purple as indicator for —. 316.
- Citrate** in mixtures; Test to show the absence of tartrate or —. J. B. Peterson, 49.
- Citrates**: Influence of — on the precipitation of barium sulphate. M. L. Nichols and O. J. Thies, Junr., 216.
- Citric Acid** in tobacco; Determination of malic acid and —. H. Rundshagen, 645.
- Clark's Buffer Solutions**: Methyl orange error in the determination of  $P_H$  values by comparison with —. I. M. Kolthoff, 423.
- Clay** soils; Determination of nitrogen in heavy —. D. V. Bal, 101.
- used in ancient Egypt. 441.
- Cleaning Fluid**: Liability for damage by a secret —. (Legal Notes), 185.
- Cloth**: Glycerin in yarn or —. 646.
- glycerol in cotton — and sized yarns; Detection and determination of. G. Smith, 265.
- Clothing**: Influence of — on the rate of cooling of the human body, 191.
- Cloves**: moisture in —; Determination of. P. May, 253.
- water in —; Determination of. 152.
- Coals**: Heating value of — determined in monel metal bombs. J. C. Geniesse and E. J. Soop, 110.
- Cobalt** ion; Action of concentrated hydrobromic and hydriodic acids on the —. New reaction for nickel. G. Denigès, 478.
- Cobalt Aluminate** test for aluminium; Improvement of the —. C. Otto, 478.
- Cobalt Chloride** as indicator for water. 412.
- Cobaltinitrite** method of determining potassium, 451.
- Cocaine**: Methyl red as indicator for —. 316.
- Coconut Oil**: Thiocyanogen absorption of —. 264.
- Cockles**: Arsenic in —. 552.
- Lead in —. 564.
- Cod Liver Oil**: accessory food factor content of —; Effect of high temperatures on the. H. W. Southgate, 94.
- Effect of storage on the antirachitic factor of —, when mixed with ground grains. E. B. Hart, H. Steenbock, and S. Lepkovsky, 94.
- Influence of feeding with — on the deposition of lime compounds in the shell of hens' eggs. 520.

**Cod Liver Oil**—*continued*.

- Spectroscopic observations on —. II. Absorption bands of cholesterol. F. W. Schlutz and M. R. Ziegler, 586.
- vitamin potency of cold-pressed —; Effect of. A. D. Holmes and M. G. Pigott, 207.
- Codeine**: Methyl red as indicator for —. 316.
- Coffee**: Freshly-ground — and "blown" tins. T. B. Shaw and R. C. Frederick, 308; J. W. Black, 403.
- Coffees**: Natural and caffeine-free —. J. Pritzker and R. Jungkunz, 355.
- Cold Storage** and food preservatives. (Parliamentary Notes), 189.
- Effect of short periods of — on beef and mutton. W. M. Clifford, 303.
- Functional diseases of apples in —. (Food Investigation Board Report No. 23), 85.
- Collodion** membranes; Investigation into the standardisation and calibration of —. I. C. Lundsgaard and S. A. Holbil, 428.
- Colloid Chemistry**: Capillary and —. (Review) H. Freundlich, 598.
- Laboratory Manual of Elementary —. (Review), E. Hatschek, 112.
- Practical Physical and — for Students of Medicine and Biology. (Review), L. Michaeles, 221.
- Colloidal** complications in the thiocyanate method of determining soil acidity. F. O. Anderegg and R. P. Lutz, 48.
- Colloides**: Introduction à l'Etude des —. (Etat colloidal et ses applications). (Review) W. Kopaczewski, 323.
- Colloids**: Introduction to the study of —. (Review), W. Kopaczewski, 323.
- Physics and Chemistry of —; An Introduction to the. (Review), E. Hatschek, 112.
- Colorimeter**: Eastman universal —. 540.
- Sliding-gauge —, and determination of small amounts of ammonia, nitrites, lead and iron. A. L. Bernoulli, 649.
- Colorimetric** scales for measuring  $P_H$  values; Stable —. P. Bruère, 424.
- Colour** in whiskey; Rapid determination of alcohol in distilled spirits and of —. J. F. Williams, 583.
- Colouring Matters** in wines; Behaviour of gelatin towards —. A. Kickton and F. Mayer, 353.
- Combustion** apparatus for detecting and measuring small quantities of petrol vapour; Portable —. C. A. Neusbaum, P. L. De Verter and E. W. Dean, 211.
- Compounds**: Inorganic —. *See Inorganic Compounds.*
- Organic —. *See Organic Compounds.*
- revised nomenclature for complex — and water in —. 193, 195.
- Concentration** of liquid soaps; Determination of the — by the immersion refractometer. L. F. Hoyt and A. Verwiebe, 427.
- Concrete**: silica in —, cement and mortar; Determination of soluble. D. Florentin, 480.

- Condensed Milk** Regulations; Case under the — (Legal Notes), 459.  
sucrose in sweetened —; Polarimetric determination of. P. Honegger, 496.
- Coniferyl** reaction of resins. F. Reinitzer, 644.
- Connecticut Agricultural Experiment Station:** Report on Food Products and Drug Products for 1924, 87.
- Constant** for oils and fats; The thiocyanogen value—a new —. H. P. Kaufmann, 157.
- Constants:** Dissociation — of various acids in the presence of boric acid. J. Böeseken and J. Coops, 423.
- Containers:** glazed earthenware —; Use of. C. J. Stock, 82.
- Continuous** percolation; An apparatus for — and for filtration in neutral atmospheres. B. S. Evans, 229.
- Cooking Vessel** metals; Solubility of — and determination of the dissolved metals. K. K. Järvinen, 43.
- Cooling** of the human body; Influence of temperature, air velocity and clothing on —. 191.
- Copper:** cadmium in presence of —; Detection of. R. Meurice, 367; G. M. Karns, 646.  
Gravimetric determination of — as cuprous iodide. I. M. Kolthoff and H. A. Kuylymann, 367, 424.  
in foodstuffs; Determination of —. L. H. Lampitt, E. B. Hughes, P. Bilham, and C. H. F. Fuller, 327.  
in uranium ores; Volumetric determination of uranium, vanadium, iron and —. A. S. Russell, 268.  
Qualitative reaction for —. G. Denigès, 536.  
Separation of tellurium from —. 369.  
solution; Standard alkaline — (Fehling reagent.) M. G. Pegurier, 91.  
used in ancient Egypt, 439.
- Corn:** (Maize): Relation of protein content to specific gravity, 519.  
starch (Maize); Unsaturated fatty acids associated with —. T. C. Taylor and L. Lehrman, 464.  
starch; Occurrence of gentiobiose in the products of the commercial hydrolysis of —. H. Berlin, 635.
- Cornflour:** Sweet potato starch in arrowroot and —. J. R. Stubbs, 400.
- Corpuscles** of mammalian blood; Presence of glutathione in the —. H. F. Holden, 95.
- Correlation** of variables; Methods of measuring —. 608.
- Corrosive Sublimates:** Solubility of — in ether. F. Richard, 636.
- Cosmetic** from Tutankhamen tomb. 448.
- Cosmetics:** Perfumes, — and Soaps, with especial reference to Synthetics. (Review), W. A. Poucher, 275.
- Cotarnine:** Bromocresol purple as indicator for —. 316.
- Cotarnine Hydrochloride:** D. B. Dott, 92.
- Cotton:** "Boiling off" value of bleached —. Angele, 476.
- Cotton**—continued.  
cloth; Detection and determination of glycerol in sized yarns and —. G. Smith, 265.  
Differentiation of kapok and —. A. Lejeune, 265.  
hairs; Microscopical examination of —. T. B. Bright, 593.  
materials; Determination of deliquescent substances in sized —. S. M. Neale, 645.  
mercerised —; Test for. H. Menzell, 422.
- Cottonseed Oil:** Changes in — on blowing. 177.  
solutions; Refractometric determination of alcohols and esters in aqueous and —. J. C. Munch, 314.
- Coumarin** content of sweet clover; Nutritive value and —. 519.
- Cow:** "appeal to the —" cases; Composition of milk in. J. F. Liverseege, 295.
- Cows:** tuberculous; Effect of Pasteurisation on the infectivity of the milk of —. R. G. White, 156.
- Crabs:** Arsenic in —. 554.  
Lead and copper in —. 564.
- Cranberries:** Refractometric investigation of juice of —. 41.
- Crawfish:** Arsenic in —. 555.
- Cream:** Rate of rising of —. 406.  
Relation between bacterial count of whole milk and that of — and skim milk separated from it. C. S. Leete, 208.
- Creatine:** Fate of — when administered to man. A. Chanutin, 256.  
Identification of —. R. J. Williams and P. A. Lasselle, 198.
- Critical tables;** International—of numerical, date of physics, chemistry and technology (Review), 482.  
temperature of solution for the analysis of petroleum spirit; Extension of the method of —. M. Aubert and E. Aubrée, 269.
- Crucibles:** Jena sintered glass —. G. D. Elsdon, 30.
- Crustaceans:** arsenic compounds in marine — and shell fish; On the presence of. A. C. Chapman, 548.  
lead and other metallic impurities in marine — and shell fish; On the presence of. A. C. Chapman and H. Linden, 563.
- Cryptostigia Grandiflora** poisoning. 410.
- Crystalline** bromides of linseed and some other drying oils; Further notes on the —. H. Toms, 387.  
salts of abietic acid. G. Dupont, L. Desalbres and A. Bernette, 365.
- Crystallisation** of the enzyme urease; Isolation and —. J. B. Sumner, 587, 637.
- Crystals:** Growth of —. C. H. Desch, 319.
- Cultures** of bacteria; Forms of lactic acid produced by pure and mixed —. C. S. Pederson, W. H. Peterson and E. B. Fred, 361.
- Cuprous Chloride:** hydrazine sulphate for preparing ammoniacal —; Use of. E. Cattelain, 423.

- Cuprous Chloride**—*continued*.  
solution; Absorption of carbon monoxide by —. L. Moser and F. Hanika, 266.
- Cuprous Iodide**; Gravimetric determination of copper as —. I. M. Kolthoff and H. A. Kuyllman, 367, 424.
- Curing** of meats; Use of sodium nitrite in —. W. L. Lewis, R. S. Vose and C. D. Lowry, 90.
- Currants**; Refractometric investigation of juice of —. 41.
- Curing** of meats; Use of sodium nitrite in —. W. L. Lewis, R. S. Vose and C. D. Lowry, 1926. 90.
- Cuttlefish Oil**: (*Todarus Sagittatus*, Lk.) E. André and H. Canal, 473.
- Cyanides**: chloride in commercial —; Determination of. A. Bock, 425.
- Cyanmethaemoglobin** and the determination of methaemoglobin. Balthazard and M. Philippe, 466.
- Cyclopaedia** of Perfumery; Parry's —. (Review), E. J. Parry, 117.
- Cystine**: Feeding experiments as means of determining —. H. C. Sherman and E. Woods, 154.  
in proteins; Colorimetric determination of tyrosine, tryptophane and —. II. J. M. Looney, 588.  
in urine; Determination of —. H. B. Lewis and R. H. Wilson, 589.
- D**
- Dahlia** tubers; Analysis of —, and preparation of laevulose. R. F. Jackson, C. G. Silsbee and M. J. Proffitt, 304.
- Dairy** chemistry; Tests on volumetric glassware used in —. (National Physical Laboratory Report), 249.
- Dangerous** Drugs Act. W. Wilcox, 319.  
Drugs Act, 1920; Scheduling of veronal and the barbitone group. 248.
- Datura** in decomposed viscera; Applicability of the mydriatic test to the detection of —. D. N. Chatterji, 344.
- Daylight**: artificial — shades; Dyes for. 597.
- Deciphering** chemically bleached writing by means of dyes. R. Mellet and A. Bischoff, 100.
- Dehydration**: Effect of — on the bacterial flora of eggs. G. G. De Bord, 98.
- Delcosine**: Bromophenol blue as indicator for —. 316.
- Deliquescent** substances in sized cotton materials; Determination of —. S. M. Neale, 645.
- Delphinus Delphis Lin.**: Head oils of the dolphin (—). H. Marcelet, 473.
- Dermatitis** due to the external use of methylated spirit. P. B. Mumford, 47.
- Deville and Stas** method of separating iridium from iron. 392.
- Dextrin** in artificial diets; Use of commercial —. L. Randoïn and R. Lecocq, 638.
- Diabetic** dogs; Quantitative study of acetaldehyde in blood of normal and —. A. H. Bee and I. L. Chaikoff, 640.  
food. U. S. Food Inspection Decision No. 199. 580.
- Diacetyl Morphine**: Methyl red as indicator for —. 316.
- Diallylbarbituric Acid**: Action of salts of mercury on —. P. Fleury, 92.
- Diazotisation**: Nitrogen tetroxide as a reagent for —. B. Houston and T. B. Johnson, 102.
- Dictionary** of Applied Chemistry. Vol. VI. S-Acid to Tetryl. (Review), E. Thorpe, 374.
- Dietetic** food; Yogurt as a medicine and —. T. Stathopoulo, 414.
- Diets**: artificial-; Use of commercial dextrin in —. L. Randoïn and R. Lecocq, 638.  
rachitic, irradiated rachitic, and normal —; Inorganic blood phosphorus and bone ash in rats fed on. R. A. Dutcher, M. Creighton and H. A. Rothrock, 206.
- Digitalis**: Suggested standard for —. 196.
- Dihydroxyacetone** test for detecting glycerin in tobacco. 385.
- 2:4 **Dinitrophenylhydrazine** as a reagent for aldehydes and ketones; Use of —. O. L. Brady and G. V. Elmslie, 77.
- 2:4 **Dinitrophenylhydrazones**: Preparation of —. 78.
- Diphenyl** series; Gravimetric method for determining the bases of the — and a new complex salt of these bases. W. Herzog, 592.
- Diphenylamine** as internal indicator for iron. F. J. Dyer and W. B. Forbes, 536.
- Disinfectants**: Relative effectiveness of —. H. Lüers and F. Weinfurter, 259.
- Dissociation Constants** of various acids in presence of boric acid. J. Böeseken and J. Coops, 423.
- Distillates**: titration of Kjeldahl —; Use of the potassium iodide and iodate method for —. H. F. Wilson and F. Mattingley, 569.
- Distillation**: Industrial —; Principles and Practice of. (Review). E. Hausbrand, 58.  
test for heavy petroleum oils; Vacuum —. A. G. Peterkin and S. W. Ferris, 104.  
Wood —; Technology of. (Review), M. Klar, 59.
- Distilled** spirits; Rapid determination of alcohol in —, and of colour in whiskey. J. F. Williams, 583.
- Disulphides**: Colour reaction for —. E. Walker, 317.
- Dogs**: acetaldehyde in blood of normal and diabetic —; Quantitative study of. A. H. Bee and I. L. Chaikoff, 640.
- Dolphin**: Head oils of the — (*Delphinus Delphis Lin.*) H. Marcelet, 473.
- Drinking Water**: See **Water**.
- Drug** containing caffeine; Yocco, a new —. E. Perrot and A. Rouhier, 465.  
products; Report of Connecticut Agricultural Experiment Station on Food Products and — for 1924. 87.

- Drug**—*continued*.  
 tablets; Examination of —. J. F. Liverseege, 182.
- Drugs**: Bio-assay of —. J. C. Munch, 42.  
 Chemistry of —. (Review), N. Evers, 272.  
 Dangerous — Act. See **Dangerous Drugs Act**.
- Drying** Oils; Chemistry of —. (Review), R. S. Morrell, 432.  
 oils; Further notes on the crystalline bromides of linseed and some other —. H. Toms, 387.
- Dublin Bay Prawns**: Arsenic in —. 553.
- Dugong Oil** from Australia. 150.
- Durham**: Report of Public Analyst for —. (Use of glazed earthenware containers.) C. J. Stock, 82.
- Dust**: atmospheric —; Comparative tests of instruments for determining. (U.S.A. Public Health Bulletin No. 144), 36.  
 counter; Aitken's —. 4.  
 counter; Owens' jet —. 13.  
 Electrical precipitation as a means of measuring suspended —. 4.  
 particles; Catalytic activity of —. F. O. Rice, 539.
- Dvi-Manganese**: Discovery of eka- and —. J. G. F. Druce, 482.
- Dyes**: Deciphering chemically bleached writing by means of —. R. Mellet and A. Bischoff, 100.  
 fastness of —; Standardisation methods for testing. A. Crummett, 649.  
 for artificial daylight shades, 597.
- Dyestuffs**: Behaviour of different starches towards iodine and —. J. Hübner and K. Venkataraman, 351.  
 industry; Growth of the —. R. E. Rose, 597.  
 Intermediates for —. (Review), A. Davidson, 219.
- E**
- Earth acids**; Precipitation of — by sodium compounds. (Investigations into the analytical chemistry of tantalum, niobium and their mineral associates. VI.) W. R. Schoeller and C. Jahn, 613.  
 Alkaline —. See **Alkaline Earth**.  
 from "salt licks"; Examination of —. 411.
- Earthenware** containers; Use of glazed —. C. J. Stock, 82.
- Eastman** universal colorimeter. 540.
- Efluentes**: dissolved oxygen in —; Determination of. E. R. Trotman, 362.  
 organic nitrogen in sewage — etc.; Modification of Kjeldahl method for determining. J. W. H. Johnson, 405.  
 oxygen absorbed and albuminoid ammonia in sewages and —; Method for the combined determination of. J. W. H. Johnson, 345.
- Egg custard**. (Legal Notes), 188.  
 powder. (Legal Notes), 299.  
 shells; Influence of feeding with cod liver oil on the deposition of lime compounds in —. 520.
- Eggs**: bacterial flora of —; Effect of dehydration on the. G. G. De Bord, 98.  
 Effect of low temperatures on hens' —. T. Moran, 39.  
 fat-soluble vitamin content of — preserved by different methods; Variations in. I. A. Manville, 359.  
 Fresh and preserved —. G. Filandeau, 197.  
 imported; Sale of — as new-laid —. (Legal Notes), 298.  
 in cold storage; Preservation of —. 143.  
 new laid —; Sale of imported — as. (Legal Notes), 298.  
 Not of the nature, substance and quality. (Legal Notes), 141.  
 Relation between amount of ultra-violet light received by hens and amount of antirachitic vitamin in — produced. J. S. Hughes, L. F. Payne, R. W. Titus and J. M. Moore, 207.  
 Storage of —. (Food Investigation Board Report No. 26), 247.  
 unsaponifiable matter in —, wheat flour and alimentary pastes; Determination of. R. Hertwig and L. H. Bailey, 306.  
 Unsound —. A Magistrate's powers. (Legal Notes), 572.  
 vitamin contents of —; Effect of chemical preservation upon the stability of the. E. Tso, 312.
- Egypt**: albumin in ancient —; Sources of. H. S. Shrewsbury, 624.
- Egyptian** materials; Problems in connection with ancient —. A. Lucas, 435.
- Eka-Manganese**: Discovery of dvi- and —. J. G. F. Druce, 482.
- Elaeostearin**: Thiocyanogen absorption of —. 265.
- Electrical** precipitation as a means of measuring suspended dust. 4.
- Electrolytic** method of determining arsenic in chemicals. N. Evers, 526.  
 method of determining copper in foodstuffs, following quinisol separation. 332.  
 method of investigating the circulation of gold in the animal organism. S. Lomholt, 97.  
 separation of metals; Method for —. D. J. Brown, 267.  
 separations by graded potentials. A. Lassieur, 597.
- Electrometric** determination of tellurium. W. T. Schrenk and B. L. Browning, 162.  
 determination of the acidity of writing inks. H. A. Bromley and A. de Waele, 567.  
 method for determining the  $P_n$  value of gastric contents; Comparison of the colorimetric and —. G. Kahn and J. Stokes, Junr., 528.  
 titration; New type of end-point in — and its application to iodimetry. C. W. Foulk and A. T. Bawden, 539.

**Emetine**: Methyl red as indicator for —. 316.  
**End-Point**: New type of — in electrometric titration and its application to iodimetry. C. W. Foulk and A. T. Bawden, 539.  
**Energy Values** of feeding stuffs; Computation of the net —. M. Kriss, 156.  
**Engineering** problems in refrigeration. 144.  
**Enzyme** urease; Isolation and crystallisation of —. J. B. Sumner, 587.  
**Enzymic** hydrolysis of rhamnucoside; Primverose and rhamnucogenol, the products of —. M. Budel and C. Charaux, 41.  
**Ergot**: Biological testing of —. 196.  
**Erucic Acid**: Direct identification of rapeseed oil by isolation of —. A. W. Thomas and M. Mattikow, 315.  
**Escallops**: Arsenic in —. 551.  
**Essential Oil** in spice; Determination of the —. C. Griebel, 584.  
 of mustard in mustard flour; Determination of —. L. Colombier, 308.  
**Ester**: Cellulose — Varnishes. (Review), F. Sproxtton, 166.  
**Esters** in aqueous and cottonseed oil solutions; Refractometric determination of alcohols and —. J. C. Munch, 314.  
**Ether**: aldehyde in —; Determination of. E. P. Phelps and A. W. Rowe, 308.  
 Ignition of — at low temperatures. H. B. Dixon, 154.  
 Solubility of corrosive sublimate in —. F. Richard, 636.  
**Ethyl Carbonate** in chloroform. 24.  
**Ethyl Chloride** in chloroform; Determination of alcohol and —. C. Newcomb, 19.  
**Ethyl Hexabromostearate**: Preparation of — from linseed oil. 388.  
**Ethyl Hydrocupreine**: Bromocresol purple as indicator for —. 316.  
**Ethyl Morphine**: Methyl red as indicator for —. 316.  
**Evaporated Milk**: *See Milk*.  
**Exposed for Sale**: Meaning of the words "—" (Legal Notes), 348.  
**Extract**: meat-; Determination of moisture in —. C. Dedlow and D. T. Smith, 521.  
**Extraction** of liquid fatty acids of linseed oil; Fractional —. G. Agde, 364.

## F

**Fabrics**: Textile — of ancient Egypt. 446.  
**Faeces**: calcium in —, tissues and milk; Determination of. R. G. Corley and W. Denis, 208.  
**Faience** used in ancient Egypt. 436.  
**Falling Drop** method for determining specific gravity. H. G. Barbour and W. F. Hamilton, 596.  
**Fastness** of dyes; Standardisation of methods for testing the —. A. Crummett, 649.  
**Fat** in food; Effect of — upon individual fatty acids in the body —. N. R. Ellis and H. S. Isbell, 524.

**Fat**—*continued*.  
 in oil seeds and oil cake; Refractometric determination of —. H. Zander, 592.  
 in the pig on a ration moderately low in —; Formation of. N. R. Ellis and O. G. Hankins, 153.  
 milk —; New distinguishing value for. J. Kuhlmann and J. Grossfeld, 305.  
 of hogs; Influence of the ration upon the composition of the body —. N. R. Ellis and H. S. Isbell, 524.  
 rancid —; Inactivation of vitamin A by. W. C. Powick, 259.  
**Fat-Soluble Vitamin**: *See Vitamin*.  
**Fatal Dose** of strychnine; Proof of —. V. Mount, 531.  
**Fats**: Chemistry of oils and —. 143.  
**Fats**: decomposition of oils and —; Evidence of. J. Stamm, 416.  
 Deterioration of oils and — and its detection. J. Pritzker and R. Jungkunz, 635.  
 Thiocyanogen absorption of oils and —. H. P. Kaufmann, 264.  
 Thiocyanogen value—a new constant for oils and —. H. P. Kaufmann, 157.  
 used in ancient Egypt. 442, 447, 448.  
**Fatty Acid** mixtures; Application of capillarity measurements to —. R. Dubrisay, 111.  
**Fatty Acids** in the body fat of hogs; Effect of fat in food upon individual —. N. R. Ellis and H. S. Isbell, 524.  
 Influence of — on Bömer's melting-point method. F. J. F. Muschter and R. Smid, 464.  
 of linseed oil; Fractional extraction of liquid —. G. Agde, 364.  
 of shark liver oil. M. Tsujimoto, 49.  
 Unsaturated — associated with corn (maize) starch. T. C. Taylor and L. Lehman, 464.  
**Fatty Oils**: *See Oils*: fatty.  
**Feeding** experiments; Determination of cystine by means of —. H. C. Sherman and E. Woods, 154.  
 with cod liver oil; Influence of — on the deposition of lime compounds in the shell of hens' eggs, 520.  
**Feeding Stuffs**: energy values of —; Computation of the net. M. Kriss, 156.  
**Fehling's Solution**: Determination of reducing sugars by means of —. H. L. Hind, 352.  
 Standard alkaline copper solution (—). M. G. Pegurier, 91.  
**Fermentation** of dried tobacco; Researches on —. I. Methods for separating nicotine and ammonia. A. Fodor and A. Reifenberg, 98.  
 vinegar; Detection of tannin in —. G. Reif, 41.  
 with specific micro-organisms; Effect of — on the vitamin C content of orange and tomato juice. S. Lepkovsky and E. B. Hart, 155.  
**Ferric Iron**: Colorimetric determination of — by means of pyramidon. H. W. van Urk, 594.

- Ferrocyanide** method of determining copper in foodstuffs, 328.  
method of determining iron colorimetrically. W. R. Mummery, 511.
- Fibres:** kemp-; Examination of —. H. Bliss, J. Duerden, J. F. Roberts, J. Blyth, H. Hirst and A. T. King, 475.
- Filtration** in neutral atmospheres; Apparatus for continuous percolation and —. B. S. Evans, 229.
- Firedamp:** Ignition of —. (Safety in Mines Research Board Report No. 8) H. F. Coward and R. V. Wheeler, 302.  
inflammability of air and —; Limits of. (Safety in Mines Research Board Report No. 15) M. J. Burgess and R. V. Wheeler, 302.
- Fisetin:** Fluorescence of —. L. Meunier and A. Bonnet, 54.
- Fish:** Arsenic in —. 549.  
formaldehyde in —; Examination for. A. R. Tankard and D. J. T. Bagnall, 565.  
Handling and transport of —. E. Griffiths and C. Heron (Food Investigation Board Report No. 25), 350.  
Preservation of —. 143.
- Fish Pastes:** Starch in —. 571.
- Flask** for recovering volatile liquids. M. Nierenstein, 569.
- Flax wax.** W. Honneyman, 535.
- Flesh** of emaciated cattle; Chemical study of —. R. Hoagland and W. C. Powick, 249.
- Flies:** Effectiveness of aliphatic compounds in attracting —. W. C. Cook, 314.
- Flint** implements in ancient Egypt. 436, 447, 448.
- Flour:** Biological value of the nitrogen of mixtures of patent white — and animal foods. H. H. Mitchell and G. G. Carman, 358.  
Chlorine in bleached —. A. Seidenberg, 150.  
Effects of fine grinding upon —. C. L. Alsberg and E. P. Griffing, 199.  
Gluten —, self-raising. (U.S. Food Inspection Decision No. 199), 580.  
mustard —; Determination of essential oil of mustard in. L. Colombier, 308.  
Plantain (banana) —. E. A. Ullán, 634.  
self-raising; Rapid sorting test for small quantities of tartaric acid in —. A. F. Lerrigo, 180.  
unsaponifiable matter in wheat —, alimentary pastes and eggs; Determination of. R. Hertwig and L. H. Bailey, 306.  
Wheat-; The Chemistry of —. (Review), C. H. Bailey, 114.
- Flowers of Sulphur:** (Legal Notes), 239.
- Flowmeter:** Use of methyl salicylate in a —. R. H. K. Foster, 216.
- Fluorescence** of acetone extracts of tanning materials. L. Meunier and A. Jamet, 481.  
of fisetin. L. Meunier and A. Bonnet, 54.  
reaction of malic acid. S. A. Celsi, 592.
- Fluorides** and fluosilicates as scheduled poisons. 313.
- Fluorine:** Determination of —. F. G. Hawley, 426.  
in basig slag; Determination of —. R. G. Warren, C. T. Gimingham and H. J. Page, 101.
- Fluosilicates** and fluorides as scheduled poisons. 313.  
as insecticides. S. Marcovitch, 420.
- Foam** meter; A —. H. E. Williams, 318.
- Folin-Wu** blood sugar values; Correction of —. B. L. Oser and W. G. Karr, 258.  
method for sugar in blood and cerebro-spinal fluid Comparison of the new Benedict and —. J. D. Lyttle and J. E. Hearn, 466.  
method of blood analysis; Colorimetric determination of cholesterol and lecithin in blood in connection with —. G. M. De Toni, 639.
- Food:** Adulterated — in restaurants. (Legal Notes), 630.  
dietetic-; Yogurt as a medicine and —. T. Stathopoulos, 414.  
factor content of cod liver oil; Effect of high temperatures on the accessory —. H. W. Southgate, 94.  
Inspection Decisions of U.S. Dept. of Agriculture. See **United States**.  
of hogs; Effect of fat in — upon individual fatty acids in the body fat. N. R. Ellis and H. S. Isbell, 524.  
preservatives; Cold storage and —. (Parliamentary Notes), 189.  
Preservatives in —. Public Health Regulations. Draft Rules and Orders. 578.  
Preservatives Regulations; Postponement of —. (Ministry of Health Notice), 351.  
preservatives; Some aspects of the new regulations on —. C. A. Mitchell, 372.  
products; Report of Connecticut Agricultural Experiment Station on Drug products and — for 1924. 87.  
products; Separation of formic acid in — by distillation with xylene. J. K. Morton and G. C. Spencer, 415.  
Vitamins in heat-sterilised —. C. M. Dugdale and R. J. Munro, 359.
- Food and Drugs Analysis:** Abstracts. 38, 90, 150, 197, 249, 303, 351, 413, 464, 521, 581, 634.
- Food Investigation Board Reports:** Annual Report for the year 1924. 142.  
On functional diseases of apples in cold storage (No. 23). 85.  
On the handling and transport of fish (No. 25). E. Griffiths and C. Heron, 350.  
On the measurement of humidity in closed spaces (No. 8). 35.  
On the storage of eggs (No. 26). 247.
- Foods:** Animal —. See **Animal Foods**.  
Bacterial Examination of —; Methods for. (Review), W. Gaehtgens, 377.

**Foods**—*continued.*

- canned —; Chlorinated drinking water and its use in the preparation of. H. Serger, 362.  
 canned —; Vitamins in. IV. Green peas. W. H. Eddy, E. F. Kohmann and V. Carlsson, 207.  
 Chemical Analysis of —; The. (Review), H. E. Cox, 164.  
 Glass fragments in —. 626.  
 made from yeast. E. Stern and H. Becker, 250.  
 Use of ultra-violet light in the examination of —. Popp, 540.
- Foodstuffs:** copper in —; Determination of. L. H. Lampitt, E. B. Hughes, P. Bilham and C. H. F. Fuller, 327.  
 Phytin content of —. H. P. Averill and C. G. King, 252.  
 sulphites in —; Simple method of testing for. A. E. Parkes, 620.
- Forensic** abstracts. 46, 99, 208, 260, 313, 361, 419, 470, 531, 590.
- Formaldehyde:** Formation of urea and of a substance giving the same colour reaction as — with hydrazine, on heating vegetable juices. R. Fosse, 153.  
 in certain marine products. D. B. Dill and P. B. Clark, 304.  
 in fish; Examination for —. A. R. Tankard and D. J. T. Bagnall, 565.  
 in formalin tablets; Determination of —. I. M. Kolthoff, 254.  
 in sausages. (Legal Notes), 630.  
 titration of certain amino-acids. S. L. Jodidi, 263.
- Formalin** tablets; Determination of formaldehyde in —. I. M. Kolthoff, 254.
- Formic Acid** in food products; Separation of — by distillation with xylene. J. K. Morton and G. C. Spencer, 415.
- Formulae:** Writing and indexing of chemical —. 192, 194, 195.
- Fractional** extraction of liquid fatty acids of linseed oil. G. Agde, 364.
- Freezing:** Theory of —. 143.
- French** chalk. 182.
- Fresh-Water** crustaceans and fish; Arsenic in —. 558.
- Frost** injury to apples in cold storage. 85.
- Fructose:** Determination of sucrose, inulin and —. W. R. Campbell and M. I. Hanna, 582.  
 retardation of invertase action; Glucose and —. J. M. Nelson and R. S. Anderson, 588.
- Fruit:** canned-; "Blowing" of — due to chemical action. G. W. Monier-Williams, 402.  
 juices; Refractometry as an aid to the investigation of —. H. Eckart, 40.  
 Preservation of —. 143.
- Fruit-Type Products:** acidity of highly coloured —; Determination of. C. H. Badger and J. W. Sale, 583.
- Fruits:** Ripeness of — estimated by determinations of their specific gravities. 520.

- Fuels:** motor-; Determination of lead tetraethyl in —. G. Ferreri, 104.  
 motor-; Determination of unsaturated aromatic, naphthene and paraffin hydrocarbons in —. G. Egloff and J. C. Morell, 316.
- Fumigant** for cereal products; Possibilities and limitations of chloropicrin as a —. R. N. Chapman, 262.
- Fungi:** Edible and Poisonous —. (Review), Ministry of Agriculture and Fisheries Publication No. 54. 604.  
 Haemolysins of —. V. Pettinari, 260.  
 imperfecti, and a further plea for an Institute of Industrial Micro-Biology. A. C. Chapman, 319.  
 oxidase in various —; Presence of an unknown. J. Wolff, 206.

**G**

- Galactonic Acid** in pectin; Determination of —. W. H. Dore, 151.
- Gallium-in-Quartz** thermometer graduated to 1000 °C. S. Boyer, 110.
- Gardenal:** Action of salts of mercury on —. P. Fleury, 92.
- Gas** analysis apparatus modified for determination of methane in metabolism experiments. T. M. Carpenter and E. L. Fox, 636.  
 carbon disulphide in small volumes of —. Determination of traces of. W. J. Huff, 156.  
 petroleum; Aromatic hydrocarbon content of natural —. A. M. Erskine, 476.  
 Water- —. See **Water-Gas.**
- Gaseous** mixtures; Determination of hydrocyanic acid in —. G. E. Seil, 471.  
 mixtures; Determination of small quantities of hydrogen in —. P. Lebeau and P. Marmasse, 366.
- Gases:** Photo-electric determination of coloured —. H. and A. Copaux, 111.
- Gasometric** calcium carbide method for determining moisture. W. A. Jakowenko, 106.  
 method for determining acetic anhydride. E. L. Whitford, 103.
- Gastric** contents; Comparison of the electro-metric and colorimetric methods of determining the  $P_H$  value of —. G. Kahn and J. Stokes, Junr., 528.
- Gelatin:** Behaviour of — towards colouring matters in wines. A. Kickton and F. Mayer, 353.
- Gentiobiose** in the products of the commercial hydrolysis of corn starch. H. Berlin, 635.
- Germination:** Age of wheat determined from temperature of —. O. Munerati, 261.
- Gesellschaft Deutscher Metallhütten und Bergleute:** Mitteilungen des Chemiker-Fachausschusses der —. Vols. I. and II. (Review), 324.
- Gilchrist** fusion process of determining iron in iridium. 392.
- Gillespie** approximate method of determining hydrogen ion concentration; Modification of —. J. McCrae, 287.

- Glacial Acetic Acid**: Analysis of —. H. D. Richmond and E. H. England, 283.  
Effect of propionic acid on —. 284.  
strength of —; Determination of the. C. O. Harvey, 238.
- Gland**: pituitary-; Aqueous extract of the posterior lobe of the —. 196.  
thyroid-; Method for determining iodine in —. F. A. Pickworth, 92.
- Glass crucibles**; Jena sintered —. G. D. Elsdon, 30.  
fragments in foods. 626.  
Manipulation; Practical —. (Review), D. G. Briggs, 601.  
used in ancient Egypt. 437, 447.
- Glassware** used for dairy chemistry; Tests on volumetric —. (National Physical Laboratory Report), 249.
- Glazed earthenware containers**; Use of —. C. J. Stock, 82.
- Gliadin**: Preparation, solubility and specific rotation of wheat —. D. B. Dill and C. L. Alsberg, 44.
- Glucosan**: Determination of —. H. J. Deuel, Junr., S. S. Waddell and J. A. Mandel, 468.
- Glucose** in presence of phosphate buffers; Determination of —. M. B. Visscher, 521.  
retardation of invertase action; Fructose and —. J. M. Nelson and R. S. Anderson, 588.  
solutions; Optical rotation of insulin and — in contact with muscle tissue *in vitro*. H. H. Beard and V. Jersey, 640.  
syrup; Use of — in the titration of borax. L. S. Weatherby and H. H. Chesny, 538.  
U.S. Food Inspection Decision No. 201. 581.
- Glucoses**: Oxidation of methylated —. H. Sobotka, 522.
- Glue**: water content of liquid —; Determination of. W. A. Kingman, 212.
- Glutathione** in the corpuscles of mammalian blood; Presence of —. H. F. Holden, 95.
- Glycerin** in tobacco; Detection and determination of —. A. C. Chapman, 382.  
in yarn or cloth. 646.
- Glycerol** in cotton cloth and sized yarns; Detection and determination of —. G. Smith, 265.
- Glycerophosphates**: Analysis and composition of commercial —. G. J. W. Ferrey, 526.
- Glycogen**: Experimental work on —. 143.
- Goitre** "cure"; Sulphuric acid as —. (Legal Notes), 460.
- Gold** in the animal organism; Electrolytic method for investigating the circulation of —. S. Lomholt, 97.  
Separation of tellurium from —. 369.  
used in ancient Egypt. 440.
- Government Chemists' Reports**: See **Agra and Oudh, Canada, Federated Malay States, Madras, Palestine, Queensland, Siam, Trinidad and Tobago**.  
See also **Government Laboratory**.
- Government Laboratory**: Report of the Government Chemist upon the work of the — for the year ending March 31st, 1926, 517.
- Grain**: strychnine in poisoned —; Determination of. J. W. Elmore, 470.
- Grains**: Effect of storage on the antirachitic factor of cod liver oil when mixed with ground —. E. B. Hart, H. Steenbock and S. Lepkovsky, 94.
- Grape juice**; Catawba —. B. G. Hartmann, 151.  
must; Influence of sugar on the determination of ammonia in —. J. Ventre and E. Bouffard, 352, 353.  
pectins and their influence on wines. L. Semichon and Flanzly, 523.
- Grape Fruit**: Artificially coloured —. (Legal Notes), 186.
- Gregory's Powder**. J. F. Liverseege, 295.
- Grinding**: Effects of fine — upon flour. C. L. Alsberg and E. P. Griffing, 199.
- Ground Almonds**: See **Almonds**.
- Growth-promoting** and anti-neuritic substances; Differentiation between the water-soluble —. S. M. Hauge and C. W. Carrick, 586.
- "**Gulf Sickness**" and the arsenic theory. A. Juckenack and A. Brüning, 531.
- Gutzeit Test** for arsenic; Mercuric bromide paper for use in —. G. Kemmerer and H. H. Schrenk, 478.
- Gypsum** used in ancient Egypt. 441.

## H

- Haemolysins** of fungi. V. Pettinari, 260.
- Hafnium**: Attempted separation of — and zirconium by ionic migration. J. Kendall and W. West, 647.
- Hair**: Colour of mummy —. 446.
- Hairs**: cotton —; Microscopical examination of. T. B. Bright, 593.
- Halogen** in organic compounds; Determination of —. C. F. van Duin, 421.
- Halogens**: Iodimetric determination of the —. P. L. Hibbard, 538.  
Micro-analytical determination of sulphur and —. A. Récsei, 647.
- Ham**: Chicken and — roll. (Legal Notes), 515.
- Hams**: marrow of fresh and cured —; Composition of. W. F. Schroeder and D. Edelman, 249.
- Hashish**: Physiological action of —. Wierzchowski, 643.
- Head Oils** of the dolphin (*Delphinus Delphis Lin.*) H. Marcelet, 473.
- Heating** value of coals in monel metal bombs; Determination of the —. J. C. Geniesse and E. J. Soop, 110.
- Helium**: Solidification of —. W. H. Keesom, 429.
- Hemp**: Indian — poisoning. 410.

- Hens**: eggs of —; Effect of low temperatures on. T. Moran, 39.  
Relation between amount of ultra-violet light received by — and amount of antirachitic vitamin in eggs produced. J. S. Hughes, L. F. Payne, R. W. Titus and J. M. Moore, 207.
- Hexosamines** and mucoproteins. (Review), P. A. Levene, 57.
- Hippuric Acid**: Determination of — and elimination of benzoic acid as — in rabbits. W. H. Griffith, 528.
- Histidine** content of a number of proteins. M. T. Hanke, 204.  
in protein; Quantitative determination of tyrosine and —. M. T. Hanke, 204.  
Separation of arginine and —. H. B. Vickery and C. S. Leavenworth, 418.
- Hogs**: body fat of —; Influence of the ration upon the composition of. N. R. Ellis and H. S. Isbell, 524.
- Homatropine**: Methyl red as indicator for —. 316.
- Honey**: sugars in —. Determination of. F. Lucius, 581.
- Hull**: See **Kingston-upon-Hull**.
- Human** body; Influence of temperature, air velocity and clothing on the rate of cooling of the —. 191.  
poisoning cases. 409.
- Humidity** in closed spaces; Measurement of —. (Food Investigation Board Report), 35.
- Hydrazine**: Formation of urea and of a substance giving the same colour reaction as formaldehyde with —, on heating vegetable juices. R. Fosse, 153.
- Hydrazine Sulphate**: Determination of iodine by means of —. E. Cattelain, 647.  
for preparing ammoniacal cuprous chloride; Use of —. E. Cattelain, 423.  
for the standardisation of iodine solutions; Use of —. E. Cattelain, 317.  
in iodimetry. E. Cattelain, 51.
- Hydriodic Acid**: Action of concentrated hydrobromic and — on the cobalt ion. New reaction for nickel. G. Denigès, 478.
- Hydrobromic Acid**: Action of concentrated hydriodic and — on the cobalt ion. New reaction for nickel. G. Denigès, 478.
- Hydrocarbons**: Aromatic — content of natural gas petroleum. A. M. Erskine, 476.  
aromatic — in light petroleum; Determination of. A. M. Erskine, 475.  
in motor fuels; Determination of unsaturated, aromatic, naphthene and paraffin —. G. Egloff and J. C. Morell, 316.
- Hydrochloric Acid**: Note on —. 506.
- Hydrocyanic Acid**: Determination of strength of liquid — by specific gravity. M. Walker and C. J. Martin, 202.  
in gaseous mixtures; Determination of —. G. E. Seil, 471.
- Hydrofluoric Acid**: Note on —. 506.
- Hydrogen** in gaseous mixtures; Determination of small quantities of —. P. Lebeau and P. Marmasse, 366.
- Hydrogen Ion Concentration**: Colorimetric Determination of —. Use of Colour Indicators. (Review), I. M. Kolthoff, 218.  
determinations; Buffer mixture for the alkaline range of —. W. R. G. Atkins and C. F. A. Pantin, 317.  
Modification of the Gillespie approximate method of determining —. J. McCrae, 287.  
of certain local anaesthetics; Relationship between the chemical constitution and —. E. B. Vliet and R. Adams, 527.
- Hydrogen Peroxide**: Solid —. J. R. Booer, 50.
- Hydrogenase**: Investigation of —. J. Gruss, 531.
- Hydrogenated Oils**: Identification of —. Identification and determination of cholesterol and certain other compounds. J. V. Steinle and L. Kahlenberg, 310.
- Hydrolysis** of corn starch; Occurrence of gentiobiose in the products of the commercial —. H. Berlin, 635.  
of rhamnucoside; Primeverose and rhamnogonol, the products of enzymic —. M. Budel and C. Charaux, 41.  
Separation and determination of bismuth by —. L. Moser and W. Maxymowicz, 161.
- Hydrometer** readings; Temperature corrections of Baumé —. C. F. Snyder, 427.
- Hydrostatic Compensation**: Weighing by —. M. Guichard, 596.
- Hydroxides** of beryllium, rare earths, zirconium and thorium; Reaction of "aluminon" with —. A. R. Middleton, 537.
- Hydroxylamine**: Colorimetric method for determining —. G. W. Pucher and H. A. Day, 266.
- Hydroxylamine Hydrochloride**: Determination of acetone by means of —. M. Marasco, 472.
- Hygrometers** for measuring humidity in closed spaces. 35.
- Hyoescyamine**: Methyl red as indicator for —. 316.
- Hypochlorite** solutions; Solubility of ruthenium in — and an attempt to utilise the reaction for determining the metal. J. L. Howe and F. N. Mercer, 109.
- Hypophosphites**: Volumetric determination of —. D. Köszei, 426; I. M. Kolthoff, 595.

## I

- Ice Cream**: Adulteration and misbranding of —. (Legal Notes), 516.  
Salford Analyst's Report on —. 569.
- Illinium**: The element of atomic number 61. J. A. Harris, L. F. Yntema and B. S. Hopkins, 372.
- Immersion Refractometer**: Determination of the concentration of liquid soaps by the —. L. F. Hoyt and A. Verwiebe, 427.
- Inactivation** of vitamin A by rancid fat. W. C. Powick, 259.

- Indian hemp poisoning.** 410.  
 opium; Alleged deterioration of —. D. B. Dott, 255.  
 valerian root; Chemical constituents of the oleo resin and fatty matter of —. K. Bullock, 525.
- Indiarubber:** Allen's Commercial Organic Analysis, Vol. IV. 320.
- Indicateurs** Colorés; L'emploi des —. Détermination colorimétrique de la Concentration des Ions Hydrogène. (Review), I. M. Kolthoff, 218.
- Indicator:** Burrell methane —; Detection of petroleum vapour with the. G. W. Jones and W. P. Yant, 104.  
 Cobalt chloride as — for water. 412.  
 Diphenylamine as an internal — for iron. F. J. Dyer and W. B. Forbes, 536.  
 Iodeosin — in alkaloidal determinations. D. B. Dott, 255.
- Indicators** for alkaloidal titrations. H. Wales, 316.  
 in the investigation of polluted water; Use of sulphur bacteria as —. D. Ellis, 530.  
 The Use of Coloured —. Colorimetric Determination of Hydrogen Ion Concentrations. (Review), I. M. Kolthoff, 218.
- Industrial Chemistry.** (Review), A. Rogers, 601.  
 Distillation; Principles and Practice of —. (Review), E. Hausbrand, 58.
- Industry:** Chemistry in —. (Review), H. Howe, 489.
- Infectivity** of the milk of tuberculous cows; Effect of Pasteurisation on the —. R. G. White, 156.
- Ink** Manufacture. (Review), S. Lehner, 544.
- Inks:** writing-; Electrometric determination of the acidity of —. H. A. Bromley and A. de Waele, 567.
- Inorganic** analysis; Abstracts. 50, 106, 158, 213, 266, 317, 366, 423, 476, 536, 594, 646.  
 blood phosphorous and bone ash in rats fed on normal, rachitic and irradiated rachitic diets. R. A. Dutcher, M. Creighton and H. A. Rothrock, 206.  
 chemical nomenclature; Revision of —. M. Delépine, 192, 194.  
 Chemistry; A Comprehensive Treatise on Theoretical and —. Vol. VI. (Review), J. W. Mellor, 113.  
 Chemistry; A Textbook of —. (Review), F. Ephraim, 651.  
 Chemistry; Recent advances in Physical and —. (Review), A. W. Stewart, 541.  
 Chemistry; Report of the Committee on Nomenclature in —. Washington Meeting, 634.  
 compounds; Determination of mercury in organic and —. H. Ter Meulen, 422.  
 Physical Chemistry. (Review), G. H. Cartledge, 217.
- Insecticides:** Arsenical — and contamination of apples, 134.  
 Fluosilicates as —. S. Marcovitch, 420.  
 petroleum —; Relation between effectiveness and composition of. G. P. Gray and E. R. de Ong, 211.
- Insects:** Quantitative toxicological investigations on mandibulate —. F. L. Campbell, 313.
- Inspector's** right of selection; Arsenical apples. (Legal Notes), 242.
- Insulin** and its manufacture. F. H. Carr, 597.  
 chemical properties of —; Further investigation of. D. A. Scott, 96.  
 solutions; Optical rotation of glucose and — in contact with muscle tissue *in vitro*. H. H. Beard and V. Jersey, 640.
- Intermediates** for Dyestuffs. (Review), A. Davidson, 219.
- International** critical tables of numerical data of physics, chemistry and technology. (Review), 482.
- Intoxication:** alcoholic; A chemical test for —. H. W. Southgate, 208.
- Inulin:** Determination of fructose, sucrose and —. W. R. Campbell and M. I. Hanna, 582.
- Invert Sugar:** See **Sugar:** invert.
- Invertase** action; Glucose and fructose retardation of —. J. M. Nelson and R. S. Anderson, 588.
- Iodate:** Interference of — in the nitrite test. C. F. Hickethier and A. Jacobucci, 48.  
 methods; Volumetric —. (Review), G. S. Jamieson, 542.
- Iodeosin** indicator in alkaloidal determinations. D. B. Dott, 255.
- Iodimetric** determination of arsenic acid. B. Ormont, 269.  
 determination of the halogens. P. L. Hibbard, 538.  
 method for determining the carbonyl group in organic compounds; Accurate general —. E. G. R. Ardagh and J. G. Williams, 102.  
 titration of acids. I. M. Kolthoff, 477.  
 titrations; Preparation of starch solution for use in —. C. L. Alsberg, E. P. Griffing and J. Field, 371.
- Iodimetry:** Hydrazine sulphate in —. E. Cattelain, 51.  
 New type of end-point in electrometric titration and its application to —. C. W. Foulk and A. T. Eawden, 539.
- Iodine:** Behaviour of different starches towards dyestuffs and —. J. Hübner and K. Venkataraman, 351.  
 Determination of — by means of hydrazine sulphate. E. Cattelain, 647.  
 in natural waters; Determination of —. H. W. Brubaker, H. S. Van Blarcom and N. H. Walker, 471.  
 in thyroid gland; Method for determining —. F. A. Pickworth, 92.  
 in water-gas; Occurrence of —. H. Mohorčič, 51.  
 solutions; Use of hydrazine sulphate for the standardisation of —. E. Cattelain, 317.
- Ionic Migration:** Attempted separation of hafnium and zirconium by —. J. Kendall and W. West, 647.

- Ions** Hydrogènes ; Détermination colorimétrique de la concentration des ——. L'emploi des indicateurs colorés. (Review), I. M. Kolt-hoff, 218.
- Iridium** : Separation of — from iron. W. R. Schoeller, 392, 455.
- Iron** and iron oxides ; Analysis of materials containing a mixture of metallic ——. H. C. M. Ingeberg, 107.
- Colorimetric determination of — by the ferrocyanide method. W. R. Mummery, 511.
- content of meats. E. B. Forbes and R. W. Swift, 303.
- Determination of very small quantities of ——. H. L. Smith and J. H. Cooke, 503.
- Diphenylamine as an internal indicator for ——. F. J. Dyer and W. B. Forbes, 536.
- ferric ; Colorimetric determination of — by means of pyramidon. H. W. van Urk, 594.
- in biological materials ; Quantitative methods for determining ——. C. A. Elvehjem and E. B. Hart, 258.
- in blood, tissues and urine ; Determination of ——. F. S. Fowweather, 309.
- in tea ; Metallic ——. (Legal Notes), 573.
- in uranium ores ; Volumetric determination of uranium, vanadium, copper and ——. A. S. Russell, 268.
- Separation of iridium from ——. W. R. Schoeller, 392, 455.
- Separation of mercury from ——. G. Spacu, 51.
- Separation of zirconium from — and alu-minium. R. Lessing, 161.
- Sliding-gauge colorimeter, and determination of small amounts of ammonia, nitrites, lead and ——. A. L. Bernoulli, 649.
- sulphur in —; Determination of. K. K. Järvinen, 595.
- Iron Oxides** : Analysis of materials containing a mixture of metallic iron and ——. H. C. M. Ingeberg, 107.
- Irradiated** rachitic diets ; See **Diets**.
- Isomers** : aconitic acid and its —; Natural occurrence of. O. A. Beath, 525.
- Isopropylalyl Acid** : Action of salts of mercury on —. P. Fleury, 92.
- J**
- Jam** : apple pulp in —; Detection of. W. Partridge, 346.
- Availability of warranty. Forster v. Star Tea Co. (Legal Notes), 628.
- containing glucose. 570.
- Jena** sintered glass crucibles. G. D. Elsdon, 30.
- Jerusalem Artichokes** : Analysis of — and preparation of laevulose. R. F. Jackson, C. G. Silsbee and M. J. Proffitt, 304.
- Johannisia Princeps** : Seed and oil of —. G. Etzel and C. G. King, 365.
- Juice** : apple — and pectin products ; Com-mercial. H. Eckart, 251.
- Catawba grape —. B. G. Hartman, 151.
- of the alfalfa plant ; Some nitrogenous con-stituents of the —. VI. Asparagine and amino acids in alfalfa. H. B. Vickery, 100.
- marking nut —; Experiments on the detection of. 410.
- orange —; Preservation of vitamin C in dried. G. J. Humphrey, 586.
- orange and tomato —; Effect of fer-mentation with specific micro-organisms on the vitamin C content of. S. Lepkovsky and E. B. Hart, 155.
- Juices** : apple-; Determination of starch in pectin and — by a sedimentic method. H. Eckart and A. Diem, 524.
- Fruit —. See **Fruit**.
- vegetable-; Formation of urea and of a sub-stance giving the same colour reaction as formaldehyde with hydrazine, on heating —. R. Fosse, 153.
- K**
- Kapok** : Differentiation of cotton and —. A. Lejeune, 265.
- Kapok Oil**. 465.
- Kata** thermometer ; Calibration of —. 191.
- Kemp** fibres ; Examination of —. H. Bliss, J. Duerden, J. F. Roberts, J. Blyth, H. Hirst and A. T. King, 475.
- Kent** : County of —. Report of County Analyst for Fourth Quarter, 1925, 347 ; for First Quarter, 1926, 406.
- Ketones** : 2:4 dinitrophenylhydrazine as a reagent for aldehydes and —; Use of. O. L. Brady and G. V. Elsmie, 77.
- in glacial acetic acid, 285.
- Kingston-upon-Hull** : City and County of —? Annual Report of the Public Analyst for 1925. A. R. Tankard, 625.
- Kjeldahl** distillates ; Use of potassium iodide and iodate method for titration —. H. F. Wilson and F. Mattingley, 569.
- method for determining organic nitrogen in sewage effluents, etc. ; Modification of —. J. W. H. Johnson, 405.
- Kjeldahl-Gunning** nitrogen determinations ; On the presence of amines in the distillate from —. R. A. Cortner and W. F. Hoffman, 648.
- Kjeldahl-Pregl Method** applied to nitro-com-pounds. A. Elek and H. Sobotka, 214.
- L**
- Laboratory** Book of Mineral Oil Testing. (Review), J. A. Hicks, 217.
- instrument ; The polarising microscope as a —. A. V. Blom, 111.
- Manual of Elementary Colloid Chemistry. (Review), E. Hatschek, 112.
- Lactation** : Relationship between casein and period of —. 610.

- Lactic Acid:** Acidimetric titration and composition of commercial —. R. Eder and F. Kutter, 533.  
in presence of other organic acids; Detection and determination of —. E. K. Nelson, 591.  
produced by pure and mixed cultures of bacteria; Forms of —. C. S. Pederson, W. H. Peterson and E. B. Fred, 361.
- Laevulose:** Preparation of —. Analysis of Jerusalem artichokes and dahlia tubers. R. F. Jackson, C. G. Silsbee, and M. J. Profitt, 304.
- Lead:** Absence of mirror formation in Vortmann's method of separating silver and —. G. Vortmann, 456.  
in animal tissues; Determination of small amounts of —. R. Nakaseko and I. Nakano, 46.  
in marine crustaceans and shell fish; On the presence of — and other metallic impurities. A. C. Chapman and H. Linden, 563.  
in tartar emetic; Arsenic and —. E. Griffiths-Jones, 201.  
Separation of silver from —. G. Vortmann and O. Hecht, 158.  
Separation of tellurium from —. 369.  
silver in —; Wet method for determination of. B. S. Evans, 79.  
Sliding-gauge colorimeter, and determination of small amounts of ammonia, nitrites, iron and —. A. L. Bernoulli, 649.
- Lead Tetra-Ethyl** in motor fuels; Determination of —. G. Ferreri, 104.  
Poisoning by —. C. Norris and A. O. Gettler, 209.  
Proposed regulations for the manufacture and use of —. 313.  
Report of Committee on —. 210.
- Leather:** Polluted atmosphere a factor in the deterioration of bookbinding —. F. P. Veitch, R. W. Frey and L. R. Leinbach, 373.
- Lecithin** in blood; Colorimetric determination of cholesterol and — in connection with Folin and Wu's system of blood analysis. G. M. De Toni, 639.
- Legal Cases:** Anglo-Celtic Shipping Co. v. Elliott and Jeffery and Others. (Liability for damage by a secret cleaning fluid), 185.  
Forster v. Star Tea Co. (Jam: Availability of warranty), 628.  
Rex v. Hale U.D.C. (*ex parte* Wright), (Prohibition of milk supply by Local Authority), 241.  
Rex v. Robinson Brothers, Ltd. (Flowers of Sulphur), 239.  
Sharp v. Sparkes. (Sale of Medicated Wine without a licence), 627.  
United States v. A. J. Lewis. (Adulteration and misbranding of canned tomatoes), 34.
- Legal Notes:** 32, 83, 140, 185, 239, 298, 348, 408, 458, 514, 571, 627.
- Lemon Cheese:** A defective certificate. (Legal Notes), 84; S. E. Melling, 243.
- Lignin** in woods; Distribution of —. G. J. Ritter, 50.
- Lime:** Analysis of commercial —. T. P. Blunt, 625.  
compounds in the shell of hens' eggs; Influence of feeding with cod liver oil on the deposition of —. 520.  
in Portland cement; Determination of uncombined —. W. Larch and R. H. Bogue, 480.
- Lime Pip Oil:** S. C. Marshall and M. S. Salamon, 237.
- Lime Seed Oil** and oil cake. A. E. Collens, 510.
- Linseed Oil:** crystalline bromides of —; Further notes on the. H. Toms, 387.  
Fractional extraction of liquid fatty acids of —. G. Agde, 364.  
Polymerised —. K. H. Bauer, 422.  
varnishes; Detection of resins in —. K. Brauer, 422.
- Lipase:** pancreatic —; Factors influencing the action of. B. S. Platt and E. R. Dawson, 96.
- Liquids:** volatile —; Flask for recovery of. M. Nierenstein, 569.
- Liquorice:** Adulteration of — with masticogna. P. Casparis, 465.
- Lobsters:** Arsenic in —. 552.  
Lead and copper in —. 564.
- London:** City of —. Report of the Medical Officer of Health for the year 1925. W. J. Howarth, 412.
- Lucinal:** Action of salts of mercury on —. P. Fleury, 92.
- Luminal:** Characteristic reactions of —. F. Ranwez, 203.
- Lupine alkaloids;** Relative toxicity of the —. J. F. Couch, 361.
- Lysol** "free from carbolic acid;" Sale of —. (Legal Notes), 571.

## M

- Madras:** Government of —. Report of the Chemical Examiner for the year 1925. C. Newcomb, 409.
- Magnesia:** calcined; Action of — in preventing solution of soluble matter in rhubarb. 295.
- Magnesium:** Co-precipitation of — with aluminium precipitates. A. Lassieur, 368.
- Magnesium Ammonium Phosphate:** Determination of phosphoric acid as —. G. Jørgensen, 61.
- Maize:** Relation of protein content to specific gravity, 519.  
starch (corn); Unsaturated fatty acids associated with —. T. C. Taylor and L. Lehrman, 464.
- Malic Acid:** Fluorescence reaction of —. S. A. Celsi, 592.  
in tobacco; Determination of citric acid and —. H. Rundshagen, 645.
- Malt:** meat and — wine; Non-alcoholic. (Legal notes), 514.
- Mammalian blood;** Presence of glutathione in the corpuscles of —. H. F. Holden, 95.

- Mandibulate Insects:** Quantitative toxicological investigations on ——. F. L. Campbell, 313.
- Manganese:** Bismuthate method for determining ——. B. Park, 425.  
compounds; Poisoning by ——. H. Handovsky and others, 362.  
Discovery of eka- and divi ——. J. G. F. Druce, 482.
- Manganese Salts:** Effect of zirconium, titanium and — on nutrition. Richet, Garner and Goodbody, 98.
- Manures:** ammoniacal nitrogen in —; Determination of. F. Chastellain, 261.  
and Soils; The Science of —. (Review), J. A. Murray, 115.
- Margarine:** butter fat and palm kernel oil in —; Determination of. G. D. Elsdon and P. Smith, 72.  
Mineral oil in —. An invoice warra ty. (Legal Notes), 459.  
palm kernel oil and butter fat in —; Determination of. G. D. Elsdon and P. Smith, 72.
- Marine crustaceans and shell fish;** On the presence of compounds of arsenic in —. A. C. Chapman, 548.  
crustaceans and shell fish; On the presence of lead and other metallic impurities in —. A. C. Chapman and H. Linden, 563.  
products; Formaldehyde in certain —. D. B. Dill and P. B. Clark, 304.  
products; Tin corrosion and blackening in certain —. D. B. Dill and P. B. Clark, 413.
- Marking Nut juice;** Experiments on the detection of —. 410.
- Marrow** of fresh and cured hams; Composition of —. W. F. Schroeder and D. Edelman, 249.
- Masticogna:** Adulteration of liquorice with —. P. Casparis, 465.
- Matches:** White phosphorus in —. 412.
- Mauritius:** Tobacco from Palestine, Nigeria and —. 482.
- Mayweed** (chamomile) and a taint in milk. F. Procter, 527.
- Meat extract;** Meat wine deficient in —. (Legal Notes), 460.  
extracts; Determination of moisture in —. C. Dedlow and D. T. Smith, 521.  
incipient putrefaction in —; Detection of. E. Arbenz, 250; R. Herzner and O. Mann, 634.  
potted; Boric acid in —. (Legal Notes), 299.  
Preservation of —, 143.  
products; Detection of incipient putrefaction in meat and —. E. Arbenz, 250.  
wine deficient in meat extract. (Legal Notes), 460.
- Meat and Malt Wine:** Non-alcoholic —. (Legal Notes), 514.
- Meat Pastes:** Starch in —. 571.
- Meats:** Iron content of —. E. B. Forbes and R. W. Swift, 303.
- Meats—continued.**  
sodium nitrite for curing —; Use of. W. L. Lewis, R. S. Vose and C. D. Lowry, 90.
- Mechanical analysis** of New Zealand soils. R. E. R. Grimmett, 420.  
analysis of soils. Report and recommendations of Argicultural Education Association Sub-Committee, 211.
- Medical aspect** of tobacco; An address on the —. H. Rolleston, 319.
- Medical Officer of Health** for the City of London; Report of — for the year 1925. W. J. Howarth, 412.
- Medical Research Council's Reports:** Further studies of the salmonella group. No. 103. 632.  
Methods of investigating ventilation and its effects. 190.
- Medicated Wine:** Sale of — without a license. (Legal Notes), 186; Sharp *v.* Sparkes. (Legal Notes), 627.
- Medicine:** Students of Biology and —; Practical Physical and Colloid Chemistry for. (Review), L. Michaelis, 221.  
Yogurt as a dietetic food and —. T. Stathopoulo, 414.
- Melting-Point apparatus;** New —. J. R. Hosking and W. F. Short, 270.  
method; Influence of fatty acids on Bömer's —. F. J. F. Muschter and R. Smid, 464.
- Membranes:** collodion-; Investigations into the standardisation and calibration of —. I. C. Lundsgaard and S. A. Holbil, 428.  
nickel — for ultra-filtration; Preparation of. J. Manning, 428.
- Mental Efficiency:** The smoking habit and —. J. R. Earp, 319.
- Mercerisation:** Test for —. R. W. Kinkead, 366.
- Mercerised cotton;** Test for —. H. Mennell, 422.
- Merchandise Marks Act:** Ground almonds and the —. (Legal Notes), 187.
- Mercuric Bromide** paper for use in the Gutzeit test for arsenic. G. Kemmerer and H. H. Schrenk, 478.
- Mercuric Chloride:** Volumetric method of assaying mercuric iodide, —, and some other mercury compounds. S. Ellman, 42.
- Mercuric Iodide:** Addendum on the determination of —. 234.  
Analysis of —. J. Sandilands, 255.  
ointment; Analysis of red —. 293.  
Volumetric method of assaying —, mercuric chloride and some other mercury compounds. S. Ellman, 42.
- Mercuric Salts:** Clearing of sugar solutions (wines) by —. L. Semichon and Flanzly, 352.
- Mercurous Salts** and ammonia; Interaction of —. F. Feigl and A. Sucharipa, 51.
- Mercury compounds;** Volumetric method of assaying mercuric iodide, mercuric chloride and some other —. S. Ellman, 42.

**Mercury**—*continued*.

- Determination of traces of —. H. S. Booth and N. E. Schreiber, 106.
- in organic and inorganic compounds; Determination of —. H. Ter Meulen, 422.
- in presence of organic matter; Determination of traces of —. H. S. Booth, N. E. Schreiber and K. C. Zwick, 477.
- in solution; Accurate method for determining —. B. S. Evans and S. G. Clarke, 224.
- Separation of — from iron. G. Spacu, 51.
- Separation of tellurium from —. 369.
- Mercury Salts**: Action of — on the veronals. P. Fleury, 92.
- Metabolism**: Carbohydrate — in health and disease. H. MacLean, 429.
- experiments; Gas analysis apparatus modified for determination of methane in —. T. M. Carpenter and E. L. Fox, 636.
- Metallic impurities** in marine crustaceans and shell fish; On the presence of lead and other —. A. C. Chapman and H. Linden, 563.
- pyrocatechol compounds; New — and their use in microchemical analysis. A. Martini, 646.
- Metals**: electrolytic separation of —; Method for. D. J. Brown, 267.
- in use in ancient Egypt. 438, 447.
- non-ferrous; Methods for analyses of —. G.D.M.B. Committee's Report. (Review), 324.
- of cooking vessels; Solubility of — and determination of the dissolved —. K. K. Järvinen, 43.
- platinum —; Qualitative separation of. S. C. Ogburn, 647.
- Meter**: Foam —. H. E. Williams, 318.
- Methaemoglobin**: Cyanmethaemoglobin and the determination of —. Balthazard and M. Philippe, 466.
- Methane**: Gas analysis apparatus for determination of — in metabolism experiments. T. M. Carpenter and E. L. Fox, 636.
- indicator; Detection of petroleum vapour with the Burrell —. G. W. Jones and W. P. Yant, 104.
- Methoxy Group**: Use of acetic anhydride in Zeisel's method for determining —. M. Nierenstein, 456.
- Methyl Alcohol** in alcoholic beverages; Detection of —. F. R. Georgia and R. Morales, 252.
- Toxicology of —. O. Windhausen, 590.
- water in —; Determination of small quantities of. M. M. Rising and J. S. Hicks, 472.
- Methyl Orange** error in the determination of  $P_n$  values by comparison with Clark's buffer solutions. I. M. Kolthoff, 423.
- Methyl Red** as indicator for alkaloidal titrations, 316.
- Methyl Salicylate**: Use of — in a flowmeter. R. H. K. Foster, 216.
- Methylated glucoses**; Oxidation of —. H. Sobotka, 522.
- Methylated Spirit**: Dermatitis due to the external use of —. P. B. Mumford, 47.
- Regulations (1925), 89.
- Micro-Analytical** determination of sulphur and halogens. A. Récei, 647.
- Micro-Biology**: Institute of Industrial —; The Fungi Imperfecti, and a further plea for an. A. C. Chapman, 319.
- Micro-Method** for determining carbon in organic compounds; A new —. H. L. Lochte, 364.
- for determining total solids; A new —. A. C. Rottinge, 363.
- Micro-Organisms**: Effect of fermentation with specific — on the vitamin C content of orange and tomato juice. S. Lepkovsky and E. B. Hart, 155.
- Microchemical** analysis; New metallic pyrocatechol compounds and their use in —. A. Martini, 646.
- Microscope**: Polarising — as a laboratory instrument. A. V. Blom, 111.
- Microscopical** examination of cotton hairs. T. B. Bright, 593.
- Milk**: Action of typhoid bacillus on —. C. Gorini, 641.
- Alkaline — and its detection by the bromocresol purple test. I. F. Proctor and A. T. R. Mattick, 197.
- Anaerobic spore-bearing bacteria in —. E. A. Bliss, 589.
- and its Products. U.S. Food Inspection Decision No. 200. 580.
- "Apparent ropiness" (thread formation) in — due to surface influence. A. T. R. Mattick, 527.
- bacterial activity in —; Stimulation of. C. Gorini, 530.
- Bacterial contamination of —. 245.
- Bacterial count of whole — in relation to that of cream and skim — separated from it. C. S. Leete, 208.
- calcium in —, tissues and faeces; Determination of. R. C. Corley and W. Denis, 208.
- Certified —. (Parliamentary Notes). 189.
- Combination of proteins, amino-acids, etc. (in —), with acids and alkalis, and their combining weights. L. J. Harris, 39.
- Composition of — in "Appeal to the Cow" cases. J. F. Liversedge, 295.
- composition of —; Notes on variations in the. J. F. Tocher, 606.
- Condensed —. *See* **Condensed Milk**.
- Destruction of vitamin A in — by ultra-violet light. R. W. Titus, J. S. Hughes, W. R. Hinshaw and J. B. Fitch, 530.
- evaporated; Stability of — during sterilisation. A. G. Benton and H. G. Albery, 413.
- fat; Determination of — by means of the "butyric acid value." J. Grossfeld, 416.
- fat; New distinguishing value for —. J. Kuhlmann and J. Grossfeld, 305.
- Imported —. Public Health Regulations. No. 820. 576.

**Milk**—*continued.*

- of tuberculous cows; Effect of Pasteurisation on the infectivity of —. R. G. White, 156  
 Pasteurised —. (Parliamentary Notes), 189.  
 Secretion of nitrates with —. H. Krause, 255.  
 sediment in —; Note on the filtration method of measuring. A. R. Tankard, 31.  
 Stale — and the reductase test. (Legal Notes), 458.  
 supply; Prohibition of — by Local Authority. (Legal Notes), 241.  
 taint in —; Chamomile (mayweed) and a. F. Procter, 527.  
 Tuberculin tested —. (Parliamentary Notes), 244.  
 Variations in the composition of —. J. F. Tocher, 146.

**Milk and Dairies Order, 1926:** 197.

Statutory Rules and Orders, 1926, No. 821. Ministry of Health. 577.

**Milk Sugar:** Influence of — on polarimetric values. 497.**Milton, John:** Some newly-discovered Stanzas written by —. (Review), H. C. H. Candy, 222.**Mineral oil in margarine:** An invoice warranty. (Legal Notes), 459.

oil testing; Laboratory book of —. (Review), J. A. Hicks, 217.  
 phosphates; New method of evaluating basic slags and —. E. Vanstone, 47.

**Mines Department:** See **Safety in Mines Research Board.****Ministry of Health Orders, Reports, Etc.** Contamination of apples by arsenic. Circular 659. 38.

Imported Milk. Public Health Statutory Rules and Orders, 1926, No. 820. 576.  
 Milk and Dairies Order, 1926. Circular No. 821. 577.

Postponement of food preservatives regulations. 351.

Preservatives in Food. Public Health Regulations. Draft Rules and Orders, 1926. 578.

Sale of Food and Drugs Act. Annual Report of — for 1925-1926 and Abstract of Reports of Public Analysts for 1925. 575.

**Mirror** formation in Vortmann's method of separating silver and lead; Absence of —. G. Vortmann, 456.**Miscometer:** An apparatus for obtaining composite samples. J. Houston, 453.**Mitrogynine:** A new alkaloid from *M. Speciosa*. 463.**Mitroveresine:** A new alkaloid from *M. diversifolia*. 463.**Mixtures:** citrate or tartrate in —; Test to show the absence of. J. B. Peterson, 49.  
 containing protein; Method for determining tyramine in —. M. T. Hanke, 204.

gaseous-; Determination of hydrocyanic acid in —. G. E. Seil, 471.

**Mixtures**—*continued.*

gaseous-; Determination of small quantities of hydrogen in —. P. Lebeau and P. Marmasse, 366.

**Moisture:** Gasometric calcium carbide method for determining —. W. A. Jakowenko, 106.

in cloves; Determination of —. P. May, 253.

in meat extract; Determination of —. C. Dedlow and D. T. Smith, 521.

**Molecular** weight of proteins; New method for determining the —. T. Svedberg and R. Fähræus, 216.**Molybdenum:** Colorimetric determination of —. A. D. Funck, 537.

in ores; Determination of —. W. Hartmann, 108.

**Molybdic Acid:** Constitution of dissolved —. A. Travers and Malaprade, 538.**Monel** metal bombs; Determination of the heating value of coals in —. J. C. Geniesse and E. J. Soop, 110.**Monomolybdophosphotungstic Acid** as a reagent for polyphenols and vitamins; Rapid preparation of —. N. Bezssonoff, 358.**Morphine:** Methyl red as indicator for —. 316.**Mortar:** silica in —, cement and concrete; Determination of soluble. D. Florentin, 480.

used in ancient Egypt. 441.

**Motor** fuels; Determination of lead tetraethyl in —. G. Ferreri, 104.

fuels; Determination of unsaturated, aromatic, naphthene and paraffin hydrocarbons in —. G. Egloff and J. C. Morell, 316.

**Mucoproteins:** Hexosamines and —. (Review), P. A. Levene, 57.**Mummy** hair; Colour of —. 446.**Muscle** tissue *in vitro*; Optical rotation of glucose and insulin solutions in contact with —. H. H. Beard and V. Jersey, 640.**Musk:** Natural —. A. Wagner, 593.**Mussels:** Arsenic in —. 552.

Lead in —. 564.

**Mustard:** essential oil of — in mustard flour; Determination of. L. Colombier, 308.

flour; Determination of essential oil of mustard in —. L. Colombier, 308.

**Mustard Seed:** Differentiation of ravisson rape seed and black —. Vizern and Guillot, 262.**Mutton:** Effect of short periods of cold storage on beef and —. W. M. Clifford, 303.**Mydriatic** test; Applicability of — to the detection of datura in decomposed viscera. D. N. Chatterji, 344.**Myoalbumin:** Acetone method of preparing —; its principal properties. M. Piettre, 45.

## N

**Nahrungsmitteln:** Methoden der Bakteriologischen Untersuchungen von —. (Review), W. Gaetgens, 377.

- Na-** **thene** hydrocarbons in motor fuels; Determination of unsaturated, aromatic, paraffin and ——. G. Egloff and J. C. Morrell, 316.
- $\alpha$ -Naphthyl Isocyanate** as a reagent for alcohols. V. T. Bickel and H. E. French, 263.  
as a reagent for phenols and aliphatic amines. H. E. French and A. F. Wirtel, 472.
- $\alpha$ -Naphthylurethane** test for detecting glycerin in tobacco. 385.
- Narceine**: Bromophenol blue as indicator for ——. 316.
- Narotine**: Bromophenol blue as indicator for ——. 316.
- Nasavusavu**: The hot springs of ——. C. H. Wright, 235.
- National Physical Laboratory**: Tests on volumetric glassware used in dairy chemistry. 249.
- New Zealand**: Annual Report of the Dominion Analyst for 1924. J. S. Maclaurin, 630.  
soils; Mechanical analysis of ——. R. E. R. Grimmett, 420.
- Nickel**: Alleged determination of — as dioxide. L. Moser and W. Maxymowicz, 52.  
Colorimetric determination of ——. A. P. Rollet, 537.  
membranes for ultra-filtration; Preparation of ——. J. Manning, 428.  
New reaction for ——. Action of concentrated hydrobromic and hydriodic acids on the cobalt ion. G. Denigès, 478.
- Nicotine** in tobacco; Determination of ——. H. Rundshagen, 153.  
Methyl red as indicator for ——. 316.  
separation of ammonia and ——. Methods for the. (Researches on the fermentation of dried tobacco. I.) A. Fodor and A. Reifenberg, 98.
- Nicotinic Acid** and choline. (Simpler constituents of yeast.) H. B. Vickery, 468.
- Nigeria**: Tobacco from Palestine, Mauritius and ——. 482.
- Niobium**: analytical chemistry of tantalum, — and their mineral associates; Investigations into the. VI. The precipitation of the earth acids by sodium compounds. W. R. Schoeller and C. Jahn, 613.  
Separation of tantalum and ——. G. W. Sears, 215.
- Nitrates**: Colour reaction of saponin with ——. C. A. Mitchell, 181.  
in animal and vegetable tissues. E. Kohn-Abrest and S. Kawakibi, 585.  
Quantitative colorimetric determination of ——. L. W. Haase, 426.  
Secretion of — with milk. H. Krause, 255.
- Nitric Acid** free from iron; Preparation of ——. 505.
- Nitrite** method of separation of iron from the platinum metals. 392.  
test; Interference of iodate in the ——. C. F. Hickethier and A. Jacobucci, 48.
- Nitrites**: Sliding-gauge colorimeter, and determination of small amounts of ammonia, lead, iron and ——. A. L. Bernoulli, 649.
- Nitro-Compounds**: Determination of — by reduction with titanous chloride. I. M. Kolthoff and C. Robinson, 263.  
Kjeldahl-Pregl method applied to ——. A. Elek and H. Sobotka, 214.
- Nitrogen**: ammoniacal — in manures; Determination of. F. Chastellain, 261.  
compounds in rain and snow. 520.  
determinations; On the presence of amines in the distillate from Kjeldahl-Gunning ——. R. A. Cortner and W. F. Hoffman, 648.  
in heavy clay soils; Determination of ——. D. V. Bal, 101.  
of mixtures of patent white flour and animal foods; Biological value of ——. H. H. Mitchell and G. G. Carman, 358.  
organic — in sewage effluents, etc.; Modification of Kjeldahl method for determining. J. W. H. Johnson, 405.  
organic —; Rapid method for determining. G. Jaramillo, 590.
- Nitrogen Tetroxide** as a reagent for diazotisation. B. Houston and T. B. Johnson, 102.
- Nitrogenous** constituents of the juice of the alfalfa plant; Some ——. VI. Asparagine and amino acids in alfalfa. H. B. Vickery, 100.  
constituents of yeast; Simpler ——. I. Choline and nicotinic acid. H. B. Vickery, 468.
- Nomenclature** in inorganic chemistry; Report of the Committee on ——. Washington Meeting. 634.
- Non-Alcoholic** meat and malt wine. (Legal Notes), 514.
- Non-Fatty Solids** in milk; Relationship between butter fat and ——. 611.
- Non-Ferrous** materials; Rapid detection of small amounts of aluminium in certain ——. G. E. F. Lundell and H. B. Knowles, 214.  
metals; Methods for analyses of ——. G.D.M.B. Committee Report. (Review), 324.
- Norit** and other wood charcoals; Identification of ——. H. G. Tanner, 50.
- Notes**: 31, 79, 140, 180, 237, 293, 345, 402, 456, 510, 569, 624.
- Nutrition**: Effect of zirconium, titanium and manganese salts on ——. Richet, Gardner and Goodbody, 98.

O

**Obituary Notices:**

- Bodmer, Richard. 381.  
Broadbent, J. J. 547.  
Harrison, Sir John Burchmore. 120, 223.

**Odour** intensity and — quality. J. Missenden. 203.

Perception of ——. H. Nicol, 373.

**Odours** and the sense of smell. J. H. Kenneth, 372.

- Oxidation:** Air — of titanous sulphate solution. Vanadous sulphate, a new and powerful reducing agent. A. S. Russell, 267.  
of chaulmoogric acid by permanganate. G. A. Perkins, 465.  
of methylated glucoses. H. Sobotka, 522.
- Oxidising acids;** Potentiometric titration of some —. M. L. Malaprade, 271.
- Oxygen** absorbed in sewages and effluents; Method for the combined determination of albuminoid ammonia and —. J. W. H. Johnson, 345.  
absorption by anthraquinone- $\beta$ -sulphonic acid in alkaline solution. T. K. Kruse, 214.  
Colorimetric method for determining —. V. V. Efimov, 213.  
dissolved — in effluents; Determination of. E. R. Trotman, 362.  
limits in respiratory air; Carbon dioxide and —. A. Grögli, 256.
- Oxygenated acids** derived from non-metals; Names of —. 192, 195.
- Oysters:** Arsenic in —. 551.
- P**
- Paints:** covering power of —; Photometric method of measuring the. H. D. Bruce, 371.
- Palestine:** Government of —. Annual Report of the Dept. of Health for the year 1924. G. W. Baker, 300.  
Tobacco from Nigeria, Mauritius and —. 482.
- Palladium:** Adsorption of — in platinum ore analysis. 394.  
Benzoylmethylglyoxime as a precipitant for —. J. Hanus, A. Jilek and J. Lukas, 109.
- Palmitodistearin:** Identification of  $\alpha$ - — in presence of  $\beta$ - —. F. J. F. Muschter and G. Visser, 353.
- Palm Kernel** oil in margarine; Determination of butter fat and —. G. D. Elsdon and P. Smith, 72.
- Pancreatic** lipase; Factors influencing the action of —. B. S. Platt and E. R. Dawson, 96.
- Para Rubber** seed oil; Crystalline bromides of —. 390.
- Paraffin** hydrocarbons in motor fuels; Determination of unsaturated, aromatic, naphthene and —. G. Egloff and J. C. Morell, 316.  
wax. L. D. Wyant and L. G. Marsh, 105.
- Parliamentary Notes:** 189, 245, 300.
- Pastes:** unsaponifiable matter in alimentary —, wheat flour and eggs; Determination of. R. Hertwig and L. H. Bailey, 306.
- Pasteurisation:** Effect of — on the infectivity of the milk of tuberculous cows. R. G. White, 156.
- Pasteurised Milk:** See Milk: Pasteurised.
- Peaches:** Vitamins in canned —. E. F. Kohmann, W. H. Eddy, V. Carlsson and N. Halliday, 260.
- Pearls:** Detection of artificial —. P. Szilard, 53.  
Distinction between natural and artificial —. C. Chilowsky and F. Perrin, 53.
- Peas:** preserved; Composition of — in relation to their diameter. E. Lasausse, 199.  
"Regenerated" preserved — and preserved green —; Differentiation of. C. F. Muttelet, 150.
- Vitamins in canned foods.** IV. Green —. W. H. Eddy, E. F. Kohman and V. Carlsson, 207.
- Peats:** pharmacology of springs and —; Observations on. Prof. Zörkendörfer, 482.
- Pectic Acids:** E. K. Nelson, 582.
- Pectin:** calcium pectate method of determining —; Modification of. A. M. Emmett and M. H. Carré, 307.  
Determination of —. C. F. Ahmann and H. D. Hooker, 307.  
galactonic acid in —; Determination of. W. H. Dore, 151.  
products; Commercial apple juice and —. H. Eckart, 251.  
Starch in — and apple juice determined by a sedimentic method. H. Eckart and A. Diem, 524.
- Pectins:** Grape — and their influence on wines. L. Semichon and Flanzky, 523.
- Pepper:** added pepper shells in —; Detection of. E. R. Smith, S. Alfend and L. C. Mitchell, 584.
- Percolation:** Apparatus for continuous — and for filtration in neutral atmospheres. B. S. Evans, 229.
- Perchlorates:** Determination of chlorates and —. K. Scharrer, 370.
- Perchloric Acid:** Determination of —. O. Loebich, 371.  
method of determining potassium. 451.
- Perfumery:** Parry's Cyclopaedia of —. (Review), E. J. Parry, 117.
- Perfumes:** Cosmetics, Soaps and —, with especial reference to Synthetics. (Review), W. A. Poucher, 275.
- Perilla** oil; Crystalline bromides of —. 389.  
seed and oil. 593.
- Periwinkles:** Arsenic in —. 552.  
Lead in —. 564.
- Permanganate:** Oxidation of chaulmoogric acid by —. G. A. Perkins, 465.
- Petrol** vapour; Portable combustion apparatus for detecting and measuring small quantities of —. C. A. Neusbaum, P. L. De Verter and E. W. Dean, 211.
- Petroleum:** Aromatic hydrocarbon content of natural gas —. A. M. Erskine, 476.  
aromatic hydrocarbons in light —; Determination of. A. M. Erskine, 475.  
insecticides; Relation between effectiveness and composition of —. G. P. Gray and E. R. de Ong, 211.  
oils; Vacuum distillation test for heavy —. A. G. Peterkin and S. W. Ferris, 104.  
products; Determination of unsaturated compounds in —. A. W. Francis, 534.

**Petroleum**—*continued*.

- products; Relation between boiling point and some other properties of —. J. B. Hill and S. W. Ferris, 105.
- spirit; Extension of the method of critical solution temperatures for the analysis of —. M. Aubert and E. Aubrée, 269.
- vapour; Detection of — with the Burrell methane indicator. G. W. Jones and W. P. Yant, 104.
- P<sub>n</sub>** test of water or unbuffered solutions; Colorimetric —. H. T. Stern, 100.
- value of gastric contents; Comparison of the electrometric and colorimetric methods of determining —. G. Kahn and J. Stokes, *Junr.*, 528.
- values; Methyl orange error in the determination of — by comparison with Clark's buffer solutions. I. M. Kolthoff, 423.
- values; Stable colorimetric scales for measuring —. P. Bruère, 424.
- Pharmacognosy**; Practical —. (Review), T. E. Wallis, 56.
- Pharmacology** of springs and peats; Observations on —. Prof. Zörkendörfer, 482.
- Phenol**: Aseptosol: A new antiseptic — from betel leaves. J. McLang, 356.
- Phenols**: carbon tetrachloride as a reagent for —; Use of. G. E. Trease and H. Tingey, 534.
- $\alpha$ -Naphthyl isocyanate as a reagent for aliphatic amines and —. H. E. French and A. F. Wirtel, 472.
- Typical reactions of —. K. Brauer, 534.
- Phenylarsonic Acid** as a precipitant for zirconium and thorium. A. C. Rice, H. C. Fogg and C. James, 318.
- Phosphate** buffers; Determination of glucose in presence of —. M. B. Visscher, 521.
- Phosphates**: determination of —; Rapid method for. R. F. Le Guyon and R. M. May, 48.
- mineral-; New method of evaluating basic slags and —. E. Vanstone, 47.
- Thomas —; Phosphoric acid in. 70.
- Phosphoric Acid**: Determination of — as magnesium ammonium phosphate. G. Jørgensen, 61.
- in soils; Colorimetric determination of —. A. Nemeč, 532.
- in Thomas phosphates. 70.
- Phosphorus**: Colorimetric determination of —. C. H. Fiske and Y. Subbarow, 205.
- Inorganic blood — in rats fed on normal, rachitic and irradiated rachitic diets. R. A. Dutcher, M. Creighton and H. A. Rothrock, 206.

- Poisoning**: aniline —; A case of. J. Inkster, 641.
- Animal** — cases. 410.
- by lead tetra-ethyl. C. Norris and A. O. Gettler, 209.
- by manganese compounds. H. Handovsky and others. 362.
- by picrotoxin. 410.
- by sodium nitrite; Fatal —. L. Musso, 641.
- by sodium silicofluoride; Cases of —. Lührig, 99.
- Carbon tetrachloride —. L. A. Dingley, 419.
- Human — cases. 409.
- Poisonous Fungi**; Edible and —. (Review), Ministry of Agriculture and Fisheries Publication No. 54. 604.
- Poisons**: Fluorides and fluosilicates as scheduled —. 313.
- Polarimetric** determination of sucrose in sweetened condensed milk. P. Honegger, 496.
- examination of oil of cade. R. Massy, 466.
- Polarising microscope** as a laboratory instrument. A. V. Blom, 111.
- Polluted atmosphere** a factor in the deterioration of bookbinding leather. F. P. Veitch, R. W. Frey and L. R. Leinbach, 373.
- water. *See* **Water**.
- Pollution**: Atmospheric —. *See* **Atmospheric Pollution**.
- smoke — of city air; Measuring the. J. S. Owens, 2.
- Polymerisation** of cholesterol. (Antirachitic substances. IV.) C. E. Bills and F. G. McDonald, 469.
- Polymerised linseed oil**. K. H. Bauer, 423.
- Polyphenols**: mono-molybdophosphotungstic acid as a reagent for vitamins and —; Rapid preparation of. N. Bezssonoff, 358.
- Poppyseed Oil**: Thiocyanogen absorption of —. 264.
- Pork**: Soft — studies. I. Formation of fat in the pig on a ration moderately low in fat. N. R. Ellis and O. G. Hankins, 153; II. Influence of the ration upon the composition of the body fat of hogs; III. Effect of fat in food upon individual fatty acids in the body fat. N. R. Ellis and H. S. Isbell, 524.
- “**Port**” and “**Sherry**”; Uses of the terms —. (Legal Notes), 32..
- Portland Cement**. *See* **Cement**.
- Portsmouth**: Borough of —; Annual Report of Public Analyst for 1924. R. P. Page, 32; for 1925, 457.
- Portuguese oysters**; Arsenic in —. 551.
- Potassium**: Determination of — by the cobaltinitrite method. 451.
- Determination of — by the perchloric acid method. 451.
- Determination of small amounts of —. M. Delaville and P. Carlier, 368.
- in presence and absence of sulphates; Determination of —. M. A. Hamid, 450.
- Potassium**—*continued*.
- sodium in presence of —; Detection of. J. Meyerfeld, 52.
- Volumetric determination of —. R. Meurice, 368.
- Potassium Bifluoride**: Analysis of —. 370.
- Potassium Ferricyanide**: Reaction of — with the blood pigment. M. Nicloux and J. Roche, 95.
- Potassium Iodate**: Direct titration of thallos salts by —. A. J. Berry, 137.
- potassium iodide and — method for the titration of Kjeldahl distillates; Use of. H. F. Wilson and F. Mattingley, 569.
- Potassium Iodide** and iodate method for titrating Kjeldahl distillates; Use of —. H. F. Wilson and F. Mattingley, 569.
- Potassium Stearate**: Volumetric determination of sulphates by means of barium chloride and —. H. Atkinson, 81.
- Potato**: Sweet —. *See* **Sweet Potato**.
- Potatoes**: specific gravity, total solids and starch content of —; Correlation between, 520.
- Potentials**: Electrolytic separations by graded —. A. Lassieur, 597.
- Potentiometric** titration of some oxidising acids. M. L. Malaprade, 271.
- Potted Meat**: Boric acid in —. (Legal Notes), 299.
- Pottery**: Ancient Egyptian —. 444.
- Powder**: Egg —. (Legal Notes), 299.
- Power** alcohol production from sugar beet (Report to Minister of Agriculture), 463.
- Prawns**: Arsenic in —. 553, 554.
- Lead in —. 564.
- Preservation** of eggs; Effect of chemical — upon the stability of their vitamin contents. E. Tso, 312.
- of vitamin C in dried orange juice. G. J. Humphrey, 586.
- Preservatives**: food —; Cold storage and. (Parliamentary Notes), 189.
- Food —; Some aspects of the new regulations on. C. A. Mitchell, 372.
- in food. Public Health Regulations. Draft Rules and Orders, 1926. 578.
- in Food Regulations; Postponement of —. (Ministry of Health Notice), 351.
- Preserved eggs**; Fresh and —. G. Filandeau, 197.
- peas; Composition of — in relation to their diameter. E. Lasausse, 199.
- peas; Differentiation of “regenerated” — and green —. C. F. Muttelet, 150.
- President**: Annual address of the —. (G. Rudd Thompson), 120.
- Pressure**: Changes in the state of Matter in their dependence upon Temperature and —. The States of Aggregation. (Review), G. Tammann, 489.
- Primeverose** and rhamnigenol, the products of enzymic hydrolysis of rhamnoside. M. Budel and C. Charaux, 41.

**Propionic Acid**: Effect of — on glacial acetic acid. 284.

**Protein**: Alcohol-soluble — isolated from polished rice. W. F. Hoffman, 205.

-containing mixtures; Method for determining tyramine in —. M. T. Hanke, 204.

content of corn (maize); Relation of — to specific gravity, 519.

histidine in —; Quantitative determination of. M. T. Hanke, 204.

tyrosine in —; Quantitative determination of. M. T. Hanke, 204.

**Proteins**: Analysis of —. VII. Direct determination of arginine. R. H. A. Plimmer and J. L. Rosedale, 309.

Chemistry of — and its Economic Applications. (Review), D. Jordan Lloyd, 429.

Histidine content of a number of —. M. T. Hanke, 204.

in milk; Combination of amino-acids and —, with acids and alkalis, and their combining weights. L. J. Harris, 39.

molecular weight of —; New method of determining the. T. Svedberg and R. Fähræus, 216.

silver —; Official titles of. J. W. E. Harrison, 585.

Tyrosine content of a number of —. M. T. Hanke, 204.

**Prussian Blue**: Analysis of —. F. G. A. Enna, 479.

**Public Analysts**: Notes from the reports of —. See **Birmingham, Durham, Kent, Kingston-upon-Hull, Ministry of Health, Portsmouth, Salford and Stepney.**

Society of —. See **Society of Public Analysts.**

**Public Health Bulletins (U.S.A.)**, No. 144.

Comparative tests of instruments for determining atmospheric dusts. 36.

(Imported Milk) Regulations, 1926. 197.

(Imported Milk) Regulations, No. 820. Ministry of Health. 576.

(Preservatives in Food) Regulations. Draft Rules and Orders, 1926. 578.

**Publications Received**: 60, 118.

**Pulp**: apple — in jam; Detection of. W. Partridge, 346.

**Putrefaction** in meat and meat products; Detection of incipient —. E. Arbenz, 250.

in meat; Detection of incipient —. R. Herzner and O. Mann, 634.

**Putrefying** organic media; Changes undergone by alkaloids of the tropine group in —. M. Magnette, 419.

**Pyramidon**: Colorimetric determination of ferric iron by means of —. H. W. van Urk, 594.

**Pyrocatechol** compounds; New metallic — and their use in microchemical analysis. A. Martini, 646.

**Pyrotannic Acid** method for determining carbon monoxide in blood and in air. R. R. Sayers and W. P. Yant, 99.

## Q

**Qualitative** Organic Analysis; Introduction to —. (Review), H. Staudinger, 488.

Organic Chemical Analysis; A Student's Manual of Quantitative and —. (Review), J. F. Thorpe and M. A. Whiteley, 55.

**Quantitative** Chemical Analysis: A Student's Manual of Qualitative and —. (Review), J. F. Thorpe and M. A. Whiteley, 55.

**Queensland**: Government Analyst's Report for 1925. 245.

**Quinidine**: Bromocresol purple as indicator for —. 316.

**Quinine**: Bromocresol purple as indicator for —. 316.

**Quinosol** method of determining copper in food-stuffs; Gravimetric —. 330.

## R

**Rabbits**: Determination of hippuric acid and elimination of benzoic acid as hippuric acid in —. W. H. Griffith, 528.

**Rachitic** and irradiated rachitic diets; Inorganic blood phosphorus and bone ash in rats fed on normal, —. R. A. Dutcher, M. Creighton and H. A. Rothrock, 206.

**Rain**: Nitrogen compounds in snow and —. 520.

**Rapeseed Oil**: direct identification of — by isolation of erucic acid; Method for. A. W. Thomas and M. Mattikow, 315.

**Rare Earths**: Reaction of "aluminum" with hydroxides of beryllium, zirconium, thorium and —. A. R. Middleton, 537.

**Raspberries**: Refractometric investigation of juice of —. 41.

**Rats** fed on normal, rachitic and irradiated rachitic diets; Inorganic blood phosphorus and bone ash in —. R. A. Dutcher, M. Creighton and H. A. Rothrock, 206.

**Ravison Rape Seed**: Differentiation of — and black mustard seed. Vizern and Guillot, 262.

**Rays**: Ultra-violet —. See **Ultra-Violet.**

**Reactions**: Chemical — and volumetric titrations in Wood's light. R. Mellet and M. A. Bischoff, 480.

**Reagent** for alcohols; Anthraquinone- $\beta$ -carboxylic acid chloride as a —. T. Reichstein, 643.

for alcohols;  $\alpha$ -Naphthyl isocyanate as a —. T. Bickel and H. E. French, 263.

for aldehydes and ketones; Use of 2:4 dinitrophenylhydrazine as a. O. L. Brady and G. V. Elsmie, 77.

for boric acid determinations; Invert sugar as a —. J. A. M. Van Liempt, 293; G. van B. Gilmour, 404.

for diazotisation; Nitrogen tetroxide as a —. B. Houston and T. B. Johnson, 102.

for living plants; Benzidine as a —. C. Ruppert, 259.

- Reagent**—*continued*.  
 for oil extracted by carbon disulphide, and identification of olive oil extracted by solvents. S. Fachini, 636.  
 for phenols and aliphatic amines;  $\alpha$ -Naphthyl isocyanate as a ——. H. E. French and A. F. Wirtel, 472.  
 for polyphenols and vitamins; Rapid preparation of mono-molybdophosphotungstic acid as a ——. N. Bezssonoff, 358.
- Red formations**; The colour of ——. G. E. Dorsey, 363.
- Reducing agent**; Vanadous sulphate, a new and powerful ——. A. S. Russell, 267.  
 sugars; *See Sugars*; reducing.
- Reductase test**; Stale milk and the ——. (Legal Notes), 458.
- Refractometer**; immersion-; Determination of the concentration of liquid soaps by the ——. L. F. Hoyt and A. Verwiebe, 427.
- Refractometric** determination of alcohols and esters in aqueous and in cottonseed oil solutions. J. C. Munch, 314.  
 determination of fat in oil seeds and oil cake. H. Zander, 592.
- Refractometry** as an aid to the investigation of fruit juices. H. Eckart, 40.
- Refrigeration**; Engineering problems in ——. 144.
- Research**; Department of Scientific and Industrial ——. *See Food Investigation Board*.
- Resin**; oleo — of Indian valerian root; Chemical constituents of the fatty matter and. K. Bullock, 525.
- Resinous materials**; Ancient Egyptian ——. 444.
- Resins**; Allen's Commercial Organic Analysis Vol. IV. 320.  
 Conferyl reaction of ——. F. Reinitzer, 644.  
 Detection of —, especially in linseed oil varnishes. K. Brauer, 422.
- Respiratory air**; Oxygen and carbon dioxide limits in ——. A. Grögli, 256.
- Restaurants**; Adulterated food in ——. (Legal Notes), 630.
- Reviews of Books**; The titles of books have been treated in the same way as the titles of papers and abstracts, and will be found in the General Subject Index and Authors' Index. 55, 112, 164, 217, 272, 320, 373, 429, 482, 541, 598, 650.
- Revis and Payne** method of determining sucrose in sweetened condensed milk; Modification of ——. 496.
- Rhamnigenol** and primeverose, the products of enzymic hydrolysis of rhamnicoside. M. Budel and C. Charaux, 41.
- Rhamnicoside**; Primeverose and rhamnigenol, the products of enzymic hydrolysis of ——. M. Budel and C. Charaux, 41.
- Rhodium**; Adsorption of — in platinum ore analysis. 394.
- Rhubarb**; Action of calcined magnesia in preventing solution of soluble matter in ——. 295.
- Rice**; Alcohol-soluble protein isolated from polished ——. W. F. Hoffman, 205.
- Rice Oil**; Chemical composition of ——. G. S. Jamieson, 583.
- Rider**; Analytical balance without ——. A. Wirth, 482.
- Ropiness**; " Apparent ——" (thread formation) in milk due to surface influence. A. T. R. Mattick, 527.
- Rubber** and its uses in Building Works. (Review), H. P. Stevens, 434.  
 Manufacture; Chemistry of ——. (Review), L. E. Weber, 433.  
 seed oil; Crystalline bromides of Para —. 390.  
 Synthetic ——. (Review), S. P. Schotz, 653.
- Rubidium**; Analytical chemistry of caesium and ——. W. Strecker and F. O. Diaz, 162.
- Ruthenium**; Study of ——. IX. Solubility of — in hypochlorite solutions, and an attempt to utilise the reaction for the determination of the metal. J. L. Howe and F. N. Mercer, 109.

- Starch** content of potatoes; Correlation between specific gravity, total solids and —. 520.
- corn-; Occurrence of gentiobiose in the products of the commercial hydrolysis of —. H. Berlin, 635.
- in pectin and apple juices; Determination of — by a sedimentic method. H. Eckart and A. Diem, 524.
- solution for use in iodimetric titrations; Preparation of —. C. L. Alsberg, E. P. Griffing and J. Field, 371.
- Sweet potato — in cornflour and arrowroot. J. R. Stubbs, 400.
- Unsaturated fatty acids associated with corn (maize) —. T. C. Taylor and L. Lehrman, 464.

- Starches:** Behaviour of different — towards dyestuffs and iodine. J. Hübner and K. Venkataraman, 351.
- Stearate** method of titrating ammonium sulphate. H. Atkinson, 140.
- Steel:** alloy-; Determination of cerium in —. K. Swoboda and R. Horny, 215.
- Stepney:** Metropolitan Borough of —. Annual Report of the Borough Analyst for 1925. 513.
- Sterilisation** of Water by Gaseous Chlorine. (Review), 545.
- Stability of evaporated milk during —. A. G. Benton and H. G. Albery, 413.
- Stone** used in ancient Egypt. 446.
- Storage:** Effect of — on the antirachitic factor of cod liver oil, when mixed with ground grains. E. B. Hart, H. Steenbock and S. Lepkovsky, 94.
- of eggs. (Food Investigation Board Report, No. 26), 247.
- of vitamin *A*; Quantitative study of —. H. C. Sherman and M. L. Cammack, 360.
- Strophanthus:** Suggested standard for —. 196.
- Strychnine** in poisoned grains; Determination of —. J. W. Elmore, 470.
- Methyl red as indicator for —. 316.
- Proof of fatal dose of —. V. Mount, 531.
- Students:** Manual of organic chemical analysis, qualitative and quantitative, for —. (Review), J. F. Thorpe and M. A. Whiteley, 55.
- of Medicine and Biology; Practical Physical and Colloid Chemistry for —. (Review), L. Michaelis, 221.
- Sucrose:** Determination of fructose, inulin and —. W. R. Campbell and M. I. Hanna, 582.
- in sweetened condensed milk; Polarimetric determination of —. P. Honegger, 496.
- Sugar-beet:** Power alcohol production from —. (Report to Minister of Agriculture), 463.
- blood — values; Correction of Folin-Wu. B. L. Oser and W. G. Karr, 258.
- in blood and cerebrospinal fluid; Comparison of the Folin-Wu and the new Benedict method for —. J. D. Lyttle and J. E. Hearn, 466.
- in blood and in normal urine; Determination of —. O. Folin, 309.
- in blood and normal urine; Determination of —. S. R. Benedict, 467.
- Influence of — on the determination of ammonia in grape must. J. Ventre and E. Bouffard, 352, 353.
- in opium; Determination of total alkaloids, oily substances and —. J. N. Rakshit, 491.
- in sweetened condensed milk; Calculation of —. 498.
- in urine; A more specific reagent for determination of —. J. B. Sumner, 45.
- Invert — as a reagent for boric acid determinations. J. A. M. van Liempt, 293; G. van B. Gilmour, 404.
- Sugar**—*continued.*
- solutions; Measurement and significance of the surface tension of —. P. Honig 427.
- solutions (wines); Clearing of — by mercuric salts. L. Semichon and Flanzy, 352.
- Sugars** in honey; Determination of —. F. Lucius, 581.
- Oxidation products of — in their order of degree of oxidation. 522.
- reducing-; Determination of — by means of Fehling's solution. H. L. Hind, 352.
- Sweetness of —. Beister, Wood and Wahlin, 255.
- Sulphates:** potassium in presence and absence of —; Determination of. M. A. Hamid, 450.
- Volumetric determination of — by means of barium chloride and potassium stearate. H. Atkinson, 81.
- Sulphites** in foodstuffs; Simple method of testing for —. A. E. Parkes, 620.
- Sulphur** bacteria as indicators in the investigation of polluted water; Use of —. D. Ellis, 530.
- compounds; Revised nomenclature for inorganic —. 194, 195.
- containing compound (thiasine) in the blood; New —. S. R. Benedict, E. B. Newton, and J. A. Behre, 257.
- Flowers of —. (Legal Notes), 239.
- in iron; Determination of —. K. K. Järvinen, 595.
- Micro-analytical determination of halogens and —. A. Récei, 647.
- Sulphur Dioxide** in presence of excess of air; Determination of —. E. D. Ries and L. E. Clark, 477.
- Sulphuric Acid** as "goitre cure." (Legal Notes) 460.
- Sulphurous Acid** in sausages. (Legal Notes), 409.
- Surface** Chemistry. (Review), E. K. Rideal, 598.
- influence: "Apparent ropiness" (thread formation) in milk due to —. A. T. R. Mattick, 527.
- tension of sugar solutions; Measurement and significance of the —. P. Honig, 427.
- Sweet Clover:** Coumarin content and nutritive value of —. 519.
- Sweet Potato** starch in cornflour and arrowroot. J. R. Stubbs, 400.
- Sweetness** of sugars. Beister, Wood and Wahlin, 255.
- Sweets:** Sulphur dioxide as bleaching agent in —. 571.
- Synonyms:** Chemical — and Trade Names. (Review), W. Gardner, 654.
- Syntheses:** Organic —. Vol. IV. (Review), O. Kamm, 55; Vol. V., C. S. Marvel, 378; Vol. VI., H. Gilman, 653.
- Synthesis** of benzene derivatives. (Review), S. C. Bates, 430.
- Synthetic** Organic Chemistry; Use of Solvents in —. (Review), D. W. McArdle, 274.
- Rubber. (Review), S. P. Schotz, 653.

- Synthetics**: Perfumes, Cosmetics and Soaps, with especial reference to the ——. (Review), W. A. Poucher, 275.
- Syrup**: glucose-; Use of — in the titration of borax. L. S. Weatherby and H. H. Chesny, 538.
- T**
- Tablets**: drug —; Examination of. J. F. Liverseege, 182.  
formalin —; Determination of formaldehyde in. I. M. Kolthoff, 254.
- Talc**: Purified —. 182.
- Tannic Acid**: Examination of commercial —. W. B. Forbes, 200.
- Tannin** in fermentation vinegar; Detection of —. G. Reif, 41.  
in Kaw Nun oak. 463.
- Tanning materials**; Fluorescence of acetone extracts of —. L. Meunier and A. Jamet, 481.
- Tannins** for wine making. F. Levallois, 200.
- Tantalum**: analytical chemistry of niobium, — and their mineral associates; Investigations into the. VI. The precipitation of the earth acids by sodium compounds. W. R. Schoeller and C. Jahn, 613.  
Separation of niobium and —. G. W. Sears, 215.
- Tartar Emetic**: Lead and arsenic in —. E. Griffiths-Jones, 201.
- Tartaric Acid** in self-raising flour; Rapid sorting test for small quantities of —. A. F. Lerrigo, 180.
- Tartrate** in mixtures; Test to show the absence of citrate or —. J. B. Peterson, 49.
- Tea**: Metallic iron in —. (Legal Notes), 573.
- Technology**: International critical tables of numerical data of —. (Review), 482.
- Tellurium**: Electrometric determination of —. W. T. Schrenk and B. L. Browning, 162.  
Separation and determination of —. A. Brukl and W. Maxymowicz, 369.  
Volumetric determination of selenium and —. W. T. Schrenk and B. L. Browning, 647.
- Temperature**: Changes in the state of matter in their dependence upon Pressure and —. The States of Aggregation. (Review), G. Tammann, 489.  
corrections of Baumé hydrometer readings. C. F. Snyder, 427.  
of air currents; Measurement of variations in —. 190.
- Temperatures**: critical — of solutions for the analysis of petroleum spirit; Extension of the method of. M. Aubert and E. Aubrée, 269.  
Effect of high — on the accessory food factor content of cod liver oil. H. W. Southgate, 94.  
Effect of low — on hens' eggs. T. Moran, 39.  
Ignition of ether at low —. H. B. Dixon, 153.
- Textile fabrics** of ancient Egypt. 446.
- Thallium**: Determination of —. W. Strecker and P. de la Pena, 160; F. Mach and W. Lepper, 367.
- Thallous Salts**: Direct titration of — by potassium iodate. A. J. Berry, 137.
- Thebaine**: Methyl red as indicator for —. 316.
- Therapeutic substances**; Biological testing of —. 196.
- Thermometer**: Calibration of kata —. 191.  
Gallium-in-quartz — graduated to 1000°C. S. Boyer, 110.
- Thiasine** in the blood; New sulphur-containing compound (—). S. R. Benedict, E. B. Newton and J. A. Behre, 257.
- Thiocyanate** method of determining soil acidity; Colloidal complications in the —. F. O. Anderegg and R. P. Lutz, 48.
- Thiocyanates** free from iron; Preparation of —. 505.
- Thiocyanogen** absorption of oils and fats. H. P. Kaufmann, 264.  
value; The —. A new constant of oils and fats. H. P. Kaufmann, 157.
- Thomas Phosphates**: Phosphoric acid in —. 70.
- Thorium**: Phenylarsonic acid as a precipitant for zirconium and —. A. C. Rice, H. C. Fogg and C. James, 318.  
Reaction of "aluminum" with hydroxides of beryllium, rare earths, zirconium and —. A. R. Middleton, 537.
- Thyroid Gland**: iodine in —; Method for determining. F. A. Pickworth, 92.
- Tin** corrosion and blackening in certain marine products. D. B. Dill and P. B. Clark, 413.
- Tinct. Limonis, Fortis**, B.P.C. Vitamin content of —. S. G. Willimott and F. Wokes, 530.
- Tincture** of cardamoms; Colour of compound —. R. R. Bennett and G. Middleton, 525.
- Tins**: "blown" —; Freshly-ground coffee and. T. B. Shaw and R. C. Frederick, 308; J. W. Black, 403.
- Tissue**: Muscle —. See **Muscle**.
- Tissues**: animal-; Determination of small amounts of lead in —. R. Nakaseko and I. Nakano, 46.  
animal-; Nitrates in vegetable and —. E. Kohn-Abrest and S. Kawakibi, 585.  
calcium in —, faeces and milk; Determination of. R. C. Corley and W. Denis, 208.  
iron in blood, —, and urine; Determination of. F. S. Fowweather, 309.  
vegetable-; Nitrates in animal and —. E. Kohn-Abrest and S. Kawakibi, 585.
- Titanium Salts**: Effect of zirconium, manganese and — on nutrition. Richet, Gardner and Goodbody, 98.
- Titanous Chloride**: Determination of nitro-compounds by reduction with —. I. M. Kolthoff and C. Robinson, 263.
- Titanous Sulphate** solution; Air oxidation of —. Vanadous sulphate, a new and powerful reducing agent. A. S. Russell, 267.

- Titration:** Acidimetric — and composition of commercial lactic acid. R. Eder and F. Kutter, 533.  
 electrometric-; New type of end-point in — and its applicability to iodimetry. C. W. Foulk and A. T. Bawden, 539.  
 Formaldehyde — of certain amino-acids. S. L. Jodidi, 263.  
 of Kjeldahl distillates; Use of the potassium iodide and iodate method for —. H. F. Wilson and F. Mattingley, 569.
- Titration:** Indicators for alkaloidal —. H. Wales, 316.  
 iodimetric; Preparation of starch solution for use in —. C. L. Alsberg, E. P. Griffing and J. Field, 371.  
 Volumetric — and chemical reactions in Wood's light. R. Mellet and M. A. Bischoff, 480.
- Tobacco:** citric acid and malic acid in —; Determination of. H. Rundshagen, 645.  
 fermentation of dried —; Researches on. I. Methods for separating nicotine and ammonia. A. Fodor and A. Reifenberg, 98.  
 from Palestine, Nigeria and Mauritius. 482.  
 glycerin in —; Detection and determination of. A. C. Chapman, 382.  
 medical aspect of —; An address on the. H. Rolleston, 319.  
 nicotine in —; Determination of. H. Rundshagen, 153.  
 The smoking habit and mental efficiency. J. R. Earp, 319.
- Todarus Sagittatus, Lk.** Cuttlefish oil (—). E. André and H. Canal, 473.
- Toffee:** Sulphur dioxide as bleaching agent in —. 571.
- Tomato juice:** Effect of fermentation with specific micro-organisms on the vitamin C content of orange and —. S. Lepkovsky and E. B. Hart, 155.
- Tomatoes:** canned —; Adulteration and misbranding of. United States v. A. J. Lewis. (Legal Notes), 34.  
 Organic acids of —. A. Bornträger, 151.
- Total Alkaloids** in opium; Determination of —. J. N. Rakshit, 491.
- Total Solids:** Determination of —. A new micro-method. A. C. Rottinge, 363.  
 in milk; Relationship between yield, butter fat, solids-not-fat and —. 608.  
 in potatoes; Correlation between the specific gravity, starch content and —. 520.
- Toxic** action of saffras oil and safrol on animals. G. A. Mallinson, 46.
- Toxicity** of carbon tetrachloride. M. Khalil, 260.  
 of the lupine alkaloids; Relative —. J. F. Couch, 361.
- Toxicological** abstracts. 46, 99, 208, 260, 313, 361, 419, 470, 531, 590, 641.  
 investigations on mandibulate insects; Quantitative —. F. L. Campbell, 313.
- Toxicology** of methyl alcohol. O. Windhausen, 590.
- Trade Names;** Chemical Synonyms and —. (Review), W. Gardner, 654.
- Transparency** of natural waters to ultra-violet rays. J. Duclaux and P. Jeantet, 112.
- Trinidad and Tobago:** Report of the Government Analyst for the year 1925. H. Shrewsbury, 462.
- Tropine Group** of alkaloids; Changes undergone by — in putrefying organic media. M. Magnette, 419.
- Tryptophane** in proteins; Colorimetric determination of tyrosine, cystine and —. II. J. M. Looney, 588.
- Tuberculin**-tested milk. (Parliamentary Notes), 244.
- Tuberculous** cows. *See* Cows.
- Tubers:** Analysis of dahlia — and preparation of laevulose. R. F. Jackson, C. G. Silsbee and M. J. Proffitt, 304.
- Tung Oil:** A test for Chinese wood oil (—). E. R. Bolton and K. A. Williams, 335.  
 Thiocyanogen absorption method of determining the composition of Chinese wood oil (—). H. P. Kaufmann, 473.
- Turbidimeter** for measurement of low turbidities. J. R. Bayliss, 270.
- Turbidities:** Turbidimeter for measurement of low —. J. R. Bayliss, 270.
- Turpentine:** Borneol in spruce —. A. S. Wheeler and C. R. Harris, 49.
- Tutankhamen Tomb:** Cosmetic from —. 448.
- Typhoid bacillus;** Action of — on milk. C. Gorini, 641.
- Tyramine** in protein-containing mixtures; Method for determining —. M. T. Hanke, 204.
- Tyrosine** content of a number of proteins. M. T. Hanke, 204.  
 in protein; Quantitative determination of histidine and —. M. T. Hanke, 204.  
 in proteins; Colorimetric determination of tryptophane, cystine and —. II. J. M. Looney, 588.

## U

- Ultra-Filtration:** nickel membranes for —. Preparation of. J. Manning, 428.
- Ultra-Violet** light; Destruction of vitamin A in milk by —. R. W. Titus, J. S. Hughes, W. R. Hinshaw and J. B. Fitch, 530.  
 light received by hens; Relation between the amount of — and the amount of antirachitic vitamin in eggs produced. J. S. Hughes, L. F. Payne, R. W. Titus and J. M. Moore, 207.  
 light; Use of — in the examination of foods. Popp, 540.  
 Photographic spectro-polarimeter for the —. A. Cotton and R. Descamps, 164.  
 rays; Simple portable photometer for gauging intensity of —. F. W. Alexander, 54.  
 rays; Transparency of natural waters to —. J. Duclaux and P. Jeantet, 112.

- United Provinces of Agra and Oudh:** Annual Report of the Chemical Examiner for the year 1925. 349.
- United States of America** Bureau of Standards; Organisation and work of the —. G. K. Burgess, 319.
- Department of Argiculture. Food Inspection Decisions. No. 198: Wine vinegar, grape vinegar and malt vinegar. 579; No. 199: Gluten flour, self-raising, "diabetic" food, and canned pea grades, 580; No. 200. Milk and its Products, 580; No. 201: Glucose, Mixing glucose, Confectioner's glucose. 581.
- Public Health Bulletin, No. 144. Comparative tests of instruments for determining atmospheric dusts. 36.
- Unaponifiable** matter in wheat flour, alimentary pastes and eggs; Determination of —. R. Hertwig and L. H. Bailey, 306.
- Unsaturated** compounds in petroleum products; Determination of —. A. W. Francis, 534.
- fatty acids associated with corn (maize) starch. T. C. Taylor and L. Lehrman, 464.
- hydrocarbons in motor fuels; Determination of aromatic, naphthene, paraffin and —. G. Egloff and J. C. Morell, 316.
- Uranium:** Determination of —. G. E. F. Lundell and H. B. Knowles, 52.
- in uranium ores; Volumetric determination of vanadium, copper, iron and —. A. S. Russell, 268.
- ores; Volumetric determination of uranium, vanadium, copper and iron in —. A. S. Russell, 268.
- Uranous Sulphate** in volumetric analysis; Use of —. G. Vortmann and F. Binder, 158.
- Urea:** Formation of — and of a substance giving the same colour reaction as formaldehyde with hydrazine, on heating vegetable juices. R. Fosse, 153.
- Quantitative determination of minute amounts of —. J. T. Wearn and A. N. Richards, 154.
- Urease:** Isolation and crystallisation of the enzyme —. J. B. Sumner, 587.
- Recrystallisation of —. J. B. Sumner, 636.
- Uric Acid** in blood; Determination of —. H. Brown, 357.
- Isolation of a new substance from blood and its bearing on present methods for determining —. G. Hunter and B. A. Eagles, 95.
- Urine:** acetone bodies in blood and —; Colorimetric method for determining. J. A. Behre and S. R. Benedict, 639.
- bismuth in —; Determination of small quantities of. C. A. Hill, 97.
- blood in —; Detection of. G. Poirot and A. Lambert, 642.
- cystine in —; Determination of. H. B. Lewis and R. H. Wilson, 589.
- in water; Identification of —. W. Austen, 210.
- iron in blood, tissues and —; Determination of. F. S. Fowweather, 309.
- Urine—continued.**
- Organic acids in —. W. W. Palmer, 418.
- sugar in —; A more specific reagent for determining. J. B. Sumner, 45.
- sugar in blood and in normal —; Determination of. O. Folin, 309.
- sugar in normal — and blood; Determination of. S. R. Benedict, 467.

## V

- Vacuum** distillation test for heavy petroleum oils. A. G. Peterkin and S. W. Ferris, 104.
- Valerian** root; Chemical constituents of the oleo resin and fatty matter of Indian —. K. Bullock, 525.
- Vanadium:** Colorimetric determination of —. J. Meyer and A. Pawletta, 595.
- in uranium ores; Volumetric determination of uranium, copper, iron and —. A. S. Russell, 268.
- Vanadium Oxytrichloride** as a solvent. F. E. Brown and J. E. Snyder, 50.
- Vanadous Sulphate:** A new and powerful reducing agent. Air oxidation of titanous sulphate solution. A. S. Russell, 267.
- Vanilla** extract; Piperonal in —. C. B. Gnadinger, 417.
- oleoresins; Analysis of commercial —. J. B. Wilson and J. W. Sale, 253.
- Vapour:** petrol-; Portable combustion apparatus for detecting and measuring small quantities of —. C. A. Neusbaum, P. L. D. Verter and E. W. Dean, 211.
- petroleum-; Detection of — with the Burrell methane indicator. G. W. Jones and W. P. Yant, 104.
- Varnish** used in ancient Egypt. 442.
- Varnishes:** Cellulose Ester —. (Review), F. Sproxtton, 166.
- resins in linseed oil —; Detection of. K. Brauer, 422.
- Vegetable** juices; Formation of urea and of a substance giving the same colour reaction as formaldehyde with hydrazine, on heating —. R. Fosse, 153.
- tissues; Nitrates in animal and —. E. Kohn-Abrest and S. Kawakibi, 585.
- Vegetables:** Preservation of —. 143.
- Velvet Bean:** Water-soluble vitamin content of —. W. D. Salmon and E. R. Miller, 260.
- Ventilation:** Methods of investigation — and its effects. (Medical Research Council Reports), 190.
- Veronal:** Action of salts of mercury on —. P. Fleury, 92.
- Scheduling of — and the barbitone group. (Dangerous Drugs Act), 248.
- Vessel:** Solubility of cooking — metals and determination of the dissolved metals. K. K. Järvinen, 43.
- Vinegar:** tannin in fermentation —; Detection of. G. Reif, 41.
- Wine —, grape — and malt —. U.S. Food Inspection Decision No. 198. 579.

- Viscera**: *datura* in decomposed —; Applicability of the mydriatic test to the detection of —. D. N. Chatterji, 344.
- Vitamin**: antirachitic; Relation between amount of ultra-violet light received by hens and amount of — in eggs produced. J. S. Hughes, L. F. Payne, R. W. Titus and J. M. Moore, 207.
- content of Tinct. Limonis Fort., B.P.C. S. G. Willimott and F. Wokes, 530.
- contents of eggs; Effect of chemical preservation upon the stability of the —. E. Tso, 312.
- fat-soluble — content of eggs preserved by different methods; Variations in —. I. A. Manville, 359.
- potency of cold-pressed cod-liver oils; Effect of —. A. D. Holmes and M. G. Pigott, 207.
- studies. XI. Inorganic blood phosphorus and bone ash in rats fed on normal, rachitic and irradiated rachitic diets. R. A. Dutcher M. Creighton and H. A. Rothrock, 206.
- Water-soluble — content of the velvet bean. W. D. Salmon and E. R. Miller, 260.
- Vitamin A**: chemical nature of —; Studies on the —. J. C. Drummond, H. J. Channon and K. H. Coward, 312.
- Colour reactions associated with —. W. R. Fearon, 311.
- Colour reactions of —. T. Cocking and E. A. Price, 529.
- Delicate colour reaction for the presence of —. O. Rosenheim and J. C. Drummond, 93.
- Inactivation of — by rancid fat. W. C. Powick, 259.
- in milk; Destruction of — by ultra-violet light. R. W. Titus, J. S. Hughes, W. R. Hinshaw and J. B. Fitch, 530.
- in "oleo oil" and oleostearine. R. Hoagland and G. G. Snider, 311.
- storage of —; Quantitative study of. H. C. Sherman and M. L. Cammack, 360.
- Vitamin B** from wheat germ; Observations on the extraction of —. E. V. McCollum and H. D. Kruse, 360.
- Solubility of — in benzene. R. R. Williams and R. E. Waterman, 470.
- Vitamin C** content of orange and tomato juice; Effect of fermentation with specific micro-organisms on the —. S. Lepkovsky and E. B. Hart, 155.
- in dried orange juice; Preservation of —. G. J. Humphrey, 586.
- Vitamins** in canned food. IV. Green peas. W. H. Eddy, E. F. Kohman and V. Carlsson, 207.
- in canned peaches. E. F. Kohman, W. H. Eddy, V. Carlsson and N. Halliday, 260.
- in heat-sterilised food. C. M. Dugdale and R. J. Munro, 359.
- mono-molybdophosphotungstic acid as a reagent for polyphenols and —; Rapid preparation of. N. Bezssonoff, 358.
- Vitamins**—*continued*.
- water-soluble — of yeast extracts of varied origin; Differences in. L. Randoin and R. Lecocq, 469.
- Volatile** liquids; Flask for recovery of —. M. Nierenstein, 569.
- Volumetric Analysis**: Centrifuging in —. R. F. Le Guyon, 536.
- Use of uranous sulphate in —. G. Vortmann and F. Binder, 158.
- Vortmann's** method of separating silver and lead; Absence of mirror formation in —. G. Vortmann, 456.

## W

- Water** analysis; Abstracts. 48, 100, 210, 362, 471.
- analysis; Application of Evans' apparatus for filtration to —. 233.
- Cobalt chloride as indicator for —. 412.
- Colorimetric  $P_{H_2}$  test of — or unbuffered solutions. H. T. Stern, 100.
- content of liquid glue; Determination of —. W. A. Kingman, 212.
- drinking-; Chlorinated — and its use in the preparation of canned foods. H. Serger, 362.
- in apples; Excess —. A legal defence. (Legal Notes), 574.
- in butter; Excess — and a label warranty. (Legal Notes), 348.
- in butter; Excess —. Case dismissed on legal grounds. (Legal Notes), 629.
- in cloves; Determination of —. 152.
- in compounds; Revision of nomenclature. 193, 195.
- in methyl alcohol; Determination of small quantities of —. M. M. Rising and J. S. Hicks, 472.
- polluted-; Use of sulphur bacteria as indicators in the investigation of —. D. Ellis, 530.
- Sterilisation by Gaseous Chlorine. (Review), 545.
- urine in —; Identification of. W. Austen, 210.
- Water-Gas**: iodine in —; Occurrence of. H. Mohorčič, 51.
- Water-Soluble** growth-promoting and anti-neuritic substances; Differentiation between the —. S. M. Hauge and C. W. Carrick, 586.
- vitamin. See **Vitamin**.
- Waters**: aerated — in Jerusalem; Silicate deposits in. 301.
- iodine in natural —; Determination of. H. W. Brubaker, H. S. Van Blarcom and N. H. Walker, 471.
- natural-; Transparency of — to ultra-violet rays. J. Duclaux and P. Jeantet, 112.
- Wax**: Flax —. W. Honneyman, 535.
- in opium; Determination of —. 494.
- Paraffin —. L. D. Wyant and L. G. Marsh, 105.

- Weighing** by hydrostatic compensation. M. Guichard, 596.
- Whale Oil** and sperm oil and spermaceti. E. André and T. François, 200.  
Changes in — on blowing, 177.
- Wheat**: Age of — determined from temperature of germination. O. Munerati, 261.  
flour. *See* **Flour**.  
germ; Observations on the extraction of vitamin *B* from —. E. V. McCollum and H. D. Kruse, 360.  
gliadin; Preparation, solubility and specific rotation of —. D. B. Dill and C. L. Alsberg, 44.
- Whelks**: Arsenic in —. 552.  
Lead and copper in —. 564.
- Whiskey**: colour in —; Rapid determination of alcohol in distilled spirits and of. J. F. Williams, 583.
- White Phosphorus** in matches. 412.
- Wincarnis**: Sale of — without a licence. Sharp *v.* Sparkes. (Legal Notes), 627.
- Wine** making; Tannins for —. F. Levallois, 200.  
Meat — deficient in meat extract. (Legal Notes), 460.  
medicated-; Sale of — without a licence. (Legal Notes), 186.  
medicated-; Sale of — without a licence. Sharp *v.* Sparkes. (Legal Notes), 627.  
Non-alcoholic meat and malt —. (Legal Notes), 514.
- Wines**: Clearing of sugar solutions (—) by mercuric salts. L. Semichon and Flanzky, 352.  
colouring matters in —; Behaviour of gelatin towards. A. Kickton and F. Mayer, 353.  
Grape pectins and their influence on —. L. Semichon and Flanzky, 523.
- Wood** charcoals; Identification of "Norit" and other —. H. G. Tanner, 50.  
Distillation; Technology of —. (Review), M. Klar, 59.  
lignin in —; Distribution of. G. J. Ritter, 50.  
oil; A test for Chinese — (tung oil). E. R. Bolton and K. A. Williams, 335.  
oil; Thiocyanogen absorption method of determining the composition of Chinese —. H. P. Kaufmann, 473.
- Wood's Light**: Chemical reactions and volumetric reactions in —. R. Mellet and M. A. Bischoff, 480.
- Wool**: alkali and acid in —; Determination of. H. R. Hirst and A. T. King, 212.  
"Artificial —": Misuse of terms. 244.
- Wormseed Oil**: American —. A. Hogstad, Junr., 356.
- Worstall's** test for tung oil; Modification of —. 336.
- Writing**: Deciphering chemically bleached — by means of dyes. R. Mellet and A. Bischoff, 100.
- Writing Inks**: acidity of —; Electrometric determination of. H. A. Bromley and A. de Waele, 567.

## X

- Xanthin**: Reaction for —. G. Schweitzer, 466.
- Xylene**: Separation of formic acid in food products by distillation with —. J. K. Morton and G. C. Spencer, 415.

## Y

- Yarn**: Glycerin in cloth or —. 646.
- Yarns**: glycerol in cotton cloth and sized —; Detection and determination of. G. Smith, 265.
- Year-Book**: The Chemist's —. (Review), F. W. Atack, 322.
- Yeast** extracts of varied origin; Differences in water-soluble vitamins of —. L. Randoin and R. Lecocq, 469.  
Foods made from —. E. Stern and H. Becker, 250.  
nitrogenous constituents of —; Simpler. I. Choline and nicotinic acid. H. B. Vickery, 468.
- Yeasts**: Serological differentiation of —. F. Ottensooser, 638.
- Yocco**: A new caffeine-containing drug. E. Perrot and A. Rouhier, 465.
- Yogurt** as a dietetic food and medicine. T. Stathopoulos, 414.
- Yohimbine**: Methyl red as indicator for —. 316.

## Z

- Zeisel** method of determining methoxy groups; Use of acetic anhydride in —. M. Nierenstein, 456.
- Zinc Oxide**: iron in —; Determination of small quantities of. 506.
- Zirconium**: Attempted separation of hafnium and — by ionic migration. J. Kendall and W. West, 647.  
Phenylarsonic acid as a precipitant for thorium and —. A. C. Rice, H. C. Fogg and C. James, 318.  
Reaction of "aluminon" with hydroxides of beryllium, rare earths, thorium and —. A. R. Middleton, 537.  
Separation of — from iron and aluminium. R. Lessing, 161.
- Zirconium Salts**: Effect of titanium, manganese and — on nutrition. Richet, Gardner and Goodbody, 98.
