

**Errata** in Vol. LII.

- P. 272 line 9 from top, for 25 grms. of marble read 5 grms. of marble.  
P. 359 line 4 from bottom, for 1925 read 1924  
P. 459 line 14 from top, for 1926, 51, read 1927, 52.  
P. 459 line 17 from top, for Bagnal read Bagnall.  
P. 669 line 3 from bottom, for 1 read 2.  
P. 670 line 6 from bottom, for 1 read 2.  
P. 711 line 11 from bottom, for 106 read 206.

## INDEX TO VOLUME LII.

### INDEX TO NAMES.

#### A

- Adams, G.** See Nelson, V. E., Jones, R. L., Adams, G., and Anderegg, L. T.  
**Ahlbom, S.** Method of differentiating vegetable and animal charcoals, 657.  
**Allardyce, W. J.** Confirmatory test for aluminium, 613.  
**Almoradie, P. R.** Salts of linolenic hexabromide, 656.  
**Almy, L. H.** Decomposition of free and combined cystine, with special reference to certain effects produced by heating fish flesh, 718.  
**Aloy, J., and Valdiguié, A.** Detection of codeine and formaldehyde, 41.  
**Anderegg, L. T.** See Nelson, V. E., Jones, R. L., Adams, G., and Anderegg, L. T.  
**Anderson, R. J.** Properties of cholesterol obtained from different sources, 164.  
— See also Hess, A. F., and Anderson, R. J.  
— See also Shriner, R. L., Nabenhauer, F. P. and Anderson, R. J.  
**Anderson, R. J., Nabenhauer, F. B., and Shriner, R. L.** Distribution of dihydrositosterol in plant fats. 164.  
**Anderson, W. T., Jr.** See Macht, D. I., and Anderson, W. T., Jr.  
**André, E., and François, M. T.** Unsaturated aliphatic alcohols of sperm oil, 558.  
**Archbutt, L., and Deeley, R. M.** Lubrication and Lubricants. (Review), 562.  
**Armstrong, D., and Drakeley, T. J.** The determination of moisture in raw rubber, 338.  
**Armstrong, H. E.** Essays on the Art and Principles of Chemistry, (Review), 435.  
**Arnall, F., and Hodges, F. W.** Theoretical Organic Chemistry. Part I. (Review), 54.  
**Astrie, —, and Mousseron, M.** Formation and determination of essential oil of mustard in mustard flour, 353.  
**Atack, F. W.** The Chemists' Year Book, 1927 (Review), 498.  
**Atkin, W. R., and Burton, D.** Determination of magnesia hardness in water, 654.  
**Atkins, W. R. G., and Wilson, E. G.** Colorimetric determination of minute amounts of compounds of silicon, of phosphorus, and of arsenic, 249.  
— Phosphorus and arsenic compounds of seawater, 427.

- Axtmayer, J. H.** See Sherman, H. C., and Axtmayer, J. H.

#### B

- Bacharach, A. L.** See Jephcott, H., and Bacharach, A. L.  
**Bacharach, A. L., and Hartwell, G. A.** A note on technique in testing for vitamin B, 145.  
**Back, S.** The determination of carbon dioxide in carbonates, 76.  
**Bader, W.** See Burford, W. A., and Bader, W.  
**Bagnall, H. H.** Report of the City Analyst for Salford for the year 1926, 640.  
**Baker, G. W.** Palestine Government Analyst's Annual Report of Department of Health for 1925, 230.  
**Baker, L. C., and Marrian, G. F.** Determination of adrenaline, 651.  
**Balarew, D., and Desew, N.** Determination of manganese as pyrophosphate, 364.  
**Balch, R. T.** See Paine, H. S., and Balch, R. T.  
**Balderston, L.** Determination of nitrogen in leather, 491.  
**Balls, A. K.** Separation and determination of morphine, pseudomorphine and related substances, 162.  
**Baly, E. C. C.** Spectroscopy (Review), 732.  
**Bamford, T. G., and Harris, H.** The Metallurgist's Manual (Review), 500.  
**Barkenbus, C., and Zimmerman, A. J.** Kentucky coffee nut tree seed oil, 610.  
**Barnes, W. H.** See Maas, O., and Barnes, W. H.  
**Barry, T. H.** Arsenic in printing ink, 217.  
**Barry, T. H., Drummond, A. A., and Morrell, R. S.** Natural and Synthetic Resins (Review), 56.  
**Barth, L., and Massy, R.** Influence of insoluble matter on the Marsh test, 168.  
**Barthe, L., and Dufilho, E.** Determination of chlorine and sodium in milk of certain mammals, 715.  
— Elimination of sodium and chlorine in cow's milk, 287.  
**Batchelor, J. J.** Relative toxicity of benzol and its higher homologues, 426.  
**Baughman, W. F.** See Jamieson, G. S., Hann, R. M., and Baughman, W. F.

- Baum, F.** Determination of propionic acid in acetic acid and acetic anhydride, 607, 608.
- Bayliss, L. E.** Conductivity method for the determination of carbon dioxide, 557.
- Beadles, J. R.** See Mitchell, H. H., Beadles, J. R., and Keith, M. H.  
— See also Mitchell, H. H., Beadles, J. R., and Kruger, J. H.
- Beagall, Challenger, Martin and Sand.** Dye-stuffs and Coal-Tar Products (Review), 256.
- Bechdel, S. I., and Honeywell, H. E.** Relation between the vitamin *B* content of the "feed" eaten and that of the milk produced, 721.
- Belcot, C.** Volumetric method for the determination of magnesium in industrial waters, 45.
- Bennett, C. T., and Salamon, M. S.** A general method for the determination of aldehydes in essential oils, with particular reference to the determination of citronellal in Java citronella oil and citral in lemon oil, 693.
- Beregekoff, D.** See Vilella, J. R., and Beregekoff, D.
- Berg, R.** Determination of cadmium and aluminium by means of oxyquinoline, 611.  
— Determination of magnesium by means of oxyquinoline, 431.  
— Determination of zinc by means of oxyquinoline, 494.  
— New method for the determination and separation of metals by means of *o*-oxyquinoline, 302.
- Berthelot, J.** See Marie, C., and Berthelot, J.
- Berthelsen, K. C.** See Van Slyke, D. D., Hillier, A., and Berthelsen, K. C.
- Bertram, S. H.** Quantitative determination of the water-insoluble, higher, saturated fatty acids in fats and fatty acids, 489.
- Bertrand, G., and Macheboeuf, M.** Nickel and cobalt in the pancreas, 95.
- Bertrand, G., and Nakamura, H.** Physiological importance of nickel, 652.
- Bertrand, G., and Perietzeanu, J.** Sodium in plants, 488.
- Besson, H.** Polarimetric determination of tartaric acid, 489.
- Bigelow, W. D.** Bulging cans of loganberries, 638.
- Bisson, C. S., and Sewell, J. G.** Determination of cuprous oxide produced in sugar analysis, 289.
- Blair, J. S.** See Pinck, L. A., and Blair, J. S.
- Blair, R. W.** Report of Chemist of Federated Malay States Institute for Medical Research for year 1925, 158; for the year 1926, 593.
- Bodansky, M.** Introduction to Physiological Chemistry (Review), 664.
- Böhm, W.** Determination of small quantities of zinc in aluminium, 494.
- Bolton, E. R.** Annual Address of the President, 193.
- Bond, C. J.** Colour test for radio-sensitive substances, 719.
- Bone, W. A., and Townend, D. T. A.** Flame and Combustion in Gases (Review), 734.
- Bordas, F., and Desfemmes, A.** Distribution and transport of chlorides in the atmosphere, 730.
- Bosart, L. W., and Snoddy, A. O.** New glycerol tables for specific gravity and per cent. of glycerol, 434.
- Bossuyt, V.** See Fosse, R., and Bossuyt, V.
- Bowles, T. H.** See Fox, J. J., and Bowles, T. H.
- Boyd, T. A.** See Lovell, W. G., Coleman, J. D., and Boyd, T. A.
- Boyer, E. A.** Bacteriological study of ham souring, 98.  
— See also Kerr, R. D., Marsh, C. T. N., Schroeder, W. F., and Boyer, E. A.
- Brady, F. L., and McConnell, F. J.** The determination of free lime in hydraulic cement, 344.
- Braudo, K.** See Rakusin, M. A., and Braudo, K.
- Brekke, V.** See Outhouse, J., Macy, J. G., Brekke, V., and Graham, A.
- Brintzinger, H.** Rapid method for the separation of lead and silver, 363.
- Briskin, O. M.** See Dichno, M. A., and Briskin, O. M.
- Brown, B. E.** Determination of carbon and nitrogen on the same soil sample, 487.
- Browne, O. H., and Reid, E. E.** Reactions of lead tetra-ethyl, 299.
- Bruni, G., and Levi, T. G.** Nature of matured rubber, 11, 491.
- Bruson, H. A., Sebrell, L. B., and Calvert, W. C.** Reactions of rubber hydrocarbons with metallic halides, 728.
- Brydowna, W.** Action of tungsten hexachloride on phenyl magnesium iodide, 105.
- Büchner, C.** See Kreutz, A., and Büchner, C.
- Buchwald, K. W.** See Reinhard, M. C., and Buchwald, K. W.
- Buehrer, T. F., and Schupp, O. E.** Reaction between elementary phosphorus and potassium iodate and its utilisation in the volumetric determination of phosphorus, 171.
- Buften, W. H.** Characteristics of cider, 649.
- Bunker, H. J.** See Thaysen, A. C., and Bunker, H. J.
- Burford, S. F.** Report of the City Analyst for Leicester for the year 1926, 592.
- Burford, W. A., and Bader, W.** Determination of graphite and combined carbon in pig iron, 104.
- Burke, A. D.** See Heller, V. G., and Burke, A. D.
- Burtis, M. P.** See Quinn, E. J., Burtis, M. P., and Milner, E. W.
- Burton, D.** See Atkin, W. R., and Burton, D.
- Burton, J. I.** See McCandless, J. M., and Burton, J. I.
- Bywaters, H. W., Maggs, F. T., and Pool, C. J.** The determination of illipé butter in chocolate, 324.

## C

- Cady, L. L.** See Cone, W. H., and Cady, L. L.
- Caley, E. R.** The Stockholm papyrus, 615.
- Callan, T.** Determination of carbon dioxide in carbonates, 222.

- Callow, E. H.** The presence of formaldehyde in wood smoke and in smoked foodstuffs, 391.
- Calvert, W. C.** See Bruson, H. A., Sebrell, L. B., and Calvert, W. C.
- Calvery, H. O.** Chemistry of tea leaves. II Isolation of guanine nucleotide and cytosine nucleotide, 354.  
— Note on the enzyme uricase, 422.
- Calvery, H. O., and Jones, W.** The nitrogenous groups of nucleic acid, 420.
- Cameron, A. M., and Dow, W. T.** Application of Ridsdale's modification of Pemberton's method for the volumetric determination of phosphoric anhydride to fertilisers, 576.
- Cantzler, A., and Rothschild, S.** Determination of water in organic substances by means of calcium carbide, 606.
- Carpenter, T. M., and Fox, E. L.** Absence of stratification and rapidity of mixing of carbon dioxide in air samples, 493.
- Carter, G.** Alcoholic concentration in urine as a test of intoxication, 615.
- Carter, K. L.** See Clark, G. W., and Carter, K. L.
- Carter, R. M.** Separation and analysis of the volatile solvents and thinners of lacquers, 102.
- Cassar, H. A.** Determination of isopropyl alcohol in the presence of acetone and of methyl-ethyl ketone in the presence of secondary butyl alcohol, 725.
- Cattelain, E.** Sensitive reaction for benzoylacrylic acid and its use for characterising phenols, 360.
- Caulkin, H. A.** Optical rotation of honey, 418.
- Cave, H. W.** See Hughes, J. S., Fitch, J. B., Cave, H. W., and Riddell, W. H.
- Challenger, —.** See Beagall, Challenger, Martin, and Sand.
- Chapman, A. C.** The examination of foodstuffs for preservatives, 215.
- Chataway, H. D.** Fractionation of linseed oil at 293° C., 490.
- Chatterji, D. N.** Annual Report of the Chemical Examiner for the United Provinces of Agra and Oudh and the Central Provinces for the year 1926, 476.
- Church, M. B., Paine, H. S., and Hamilton, J.** Sugar-tolerant yeasts in chocolate-coated creams, 295.
- Ciochina, J.** Determination of alkalis in ores, clays, etc., 432.
- Clark, G. W., and Carter, K. L.** Factors involved in the reaction changes of human saliva, 551.
- Clark, P. B.** See Dill, D. B., and Clark, P. B.
- Clarke, S. G.** The separation of vanadium from tungsten, 466, 527.
- Clayton, W.** The flocculation of troublesome precipitates in analysis, 76.
- Clayton, W., and Gibbs, W. E.** Examination for halophilic micro-organisms, 395.
- Clibbens, D. A., and Ridge, B. P.** Analysis of cotton. Rate of oxycellulose formation, 361.
- Clifford, W. M.** Effect of halogen salts on peptic digestion, 550.
- Cockburn, T., and Love, M. McF.** The analysis of egg yolk preserved with glycerin, 143.
- Cocking, T. T.** Determination of cineole in camphor oil, 600.
- Cole, W. H.** The pyridine test as a quantitative method for the determination of minute amounts of chloroform, 94.
- Coleman, J. D.** See Lovell, W. G., Coleman, J. D., and Boyd, T. A.
- Collins, S. H.** Plant Products (Review), 108.
- Cone, W. H., and Cady, L. L.** Diphenylamine as a quantitative reagent for zinc, 739.
- Cooper, E. A., and Read, W. H.** Dissolved oxygen absorption test, 723.
- Corey, R. B., and Rogers, H. W.** Reaction of aluminon with hydroxides of scandium, gallium, indium, thallium, and germanium, 172.
- Cornec, E., and Klug, P.** Physico-chemical analysis by means of the boiling of saturated solutions, 660.
- Cotonio, M.** See Friedemann, T. E., Cotonio, M., and Shaffer, P. A.
- Coward, K. H.** Influence of light and heat on the formation of vitamin A in plant tissues, 355.  
— See also Steenbock, H., and Coward, K. H.
- Cox, H. E.** The occurrence of sulphur dioxide in malt vinegar, 397.
- Craven, V. C., and Kramer, M. M.** Vitamin C content of fresh and canned pear, 485.
- Cribb, C. H.** Method of applying the Gutzeit test for arsenic, 701.
- Crist, J. W.** See Dye, M., Medlock, O. C., and Crist, J. W.
- Cruz, A. O.** See Perkins, G. A., Cruz, A. O., and Reyes, M. O.
- Culpepper, C. W.** Behaviour of the anthocyanin pigments in canning, 648.
- Curtin, L. P.** Production of acid by wood-rotting fungi, 554.
- Curtis, F. E., and Wright, S.** The action of lobeline, 53.
- Curtiss, L. F.** Pyrex as a container for radium solutions, 615.

## D

- Dadlez, J.** Production of ozone by ultra-violet rays, 551.
- Dahle, C. D.** See Dutcher, R. A., Honeywell, H. E., and Dahle, C. D.
- Damon, S. R., and Leiter, L. W.** Infection by certain organisms of the salmonella group, 167.
- Danckwortt, P. W., and Pfau, E.** The use of the analytic quartz lamp for testing drugs, 707.
- Danet, R.** Colorimetric determination of phosphates in potable waters by the Denigès method, 427.
- Daniel, L.** Formic acid in commercial acetic acid, 549.
- Darling, E. R.** Inorganic Chemical Symbols and other useful Chemical Data (Review), 502.
- Davies, C., and Monro, A. D.** Solubility of cupric sulphide in alkali sulphides in presence of sulpharsenates, 659.
- De Boer, G. M.** X-ray investigation of the polymorphism of fatty acids, 368.

- Deeley, R. M.** See Archbutt, L., and Deeley, R. M.
- Deering, E. C.** See Schoeller, W. R., and Deering, E. C.
- Defossez, —.** See Morvillez, F., and Defossez, —.
- Delauney, E.** New method of quantitative analysis applicable to a mixture of rare earths, 614.
- De Long, W. A.** Effect of potassium iodide in the Shaffer-Hartmann micro sugar reagent, 350.
- Denigès, G.** Volumetric determination of molybdenum, 250.
- Denis, W., and Reed, L.** Methods for the determination of some of the non-protein sulphur compounds of blood, 96.  
— Nephelometric methods for the determination of some sulphur compounds in urine. W. Denis and L. Reed, 95.  
— The action of blood on sulphides, 298.
- Dennis, L. M.** Poisoning by mercury vapour, 44.
- Desew, N.** See Balarew, D., and Desew, N.
- Desfemmes, A.** See Bordas, F., and Desfemmes, A.
- De Visser, W.** The Calender Effect and Shrinking Effect of Unvulcanised Rubber (Review), 256.
- De Wildeman, E.** Caffeine in "Yocco," 94.
- Dichno, M. A., and Briskin, O. M.** Evaluation of acid cream, 235.
- Dick, J.** See Spacu, G., and Dick, J.
- Dickens, F., Dodds, E. C., Lawson, W., and Maclagan, N. F.** Purification and properties of insulin, 553.
- Dickhart, W. H.** Behaviour of fish oils with uranium nitrate and pyrogallol, 725.
- Diemair, W.** See Rüdiger, M., and Diemair, W.
- Dienert, F., and Etrillard, P.** Action of free chlorine on microbes, 722.
- Dietrich, H. E.** See Henderson, W. F., and Dietrich, H. E.
- Dietzel, R., and Rosenbaum, E.** Determination of the hydrogen ion concentration of wine by means of the quinhydrone electrode, 600.
- Dill, D. B., and Clark, P. B.** Formaldehyde in fish, 222.
- Dinslage, E., and Ludorff, W.** Indian tea-fungus, 605.
- Dinslage, E., and Windhausen, O.** Freshness of eggs, 90.
- Dittmar, H. R.** See Walton, J. H., and Dittmar, H. R.
- Dixon, H. B.** Ignition points of gases in nitrous oxide, 614.
- Dixon, W. E.** The tobacco habit, 662.
- Dodd, A. S.** The natural occurrence of boron compounds in cacao and cacao products, 459.
- Dodds, E. C.** See Dickens, F., Dodds, E. C., Lawson, W., and Maclagan, N. F.
- Dovey, E. R.** Rapid determination of opium in stomach contents, 26.
- Dow, O. D.** See Supplee, G. C., and Dow, O. D.
- Dow, W. T.** See Cameron, A. M., and Dow, W. T.
- Dowell, J. H.** New measuring micrometer, 51.
- Drake-Law, H.** Determination of sulphur dioxide in foodstuffs, 352.
- Drakeley, T. J.** See Armstrong, D., and Drakeley, T. J.
- Druart, C. E.** Wulff method of determining the  $P_n$  value, 657.
- Drummond, A. A.** See Barry, T. H., Drummond, A. A., and Morrell, R. S.
- Dubaquié, J.** Sulphur dioxide and the behaviour of bottled white wines, 40.
- Dubsky, J. V., and Okáč, A.** Reactions of dye-stuffs with nitrous acid, 491.
- Dufilho, E.** See Barthe, L., and Dufilho, E.
- Dunbar, B. A., and Wells, C. F.** Fatty oil of sweet clover seed, 47.
- Dunn, M. S., and Hollombe, B. S.** Iodine value of a commercial California sardine oil, 483.
- Dunnicliff, H. B., and Lal, K.** The determination of free mercury in commercial products, 329.
- Dutcher, R. A., Honeywell, H. E., and Dahle, C. D.** Vitamin A in evaporated milks made by vacuum and aeration methods, 720.
- Dye, M., Medlock, O. C., and Crist, J. W.** Association of vitamin A with greenness in plant tissue. I. Relative vitamin A content of head and leaf lettuce, 552.

## E

- Eagle, H. S.** On the nature of the urine sugars, 165.
- Eagles, B. A.** See Hunter, G., and Eagles, B. A.
- Eaton, E. O.** Determination of cocaine, 650.
- Eaton, E. P., and West, E. S.** Volumetric determination of alkoxy groups in organic compounds. Modification of the Zeisel procedure, 725.
- Eckford, M. O.** Thermophilic bacteria in milk, 426.
- Eckmann, J. R.** Determination of sulphur trioxide in the presence of sulphur dioxide, 658.
- Eckstein, H. C.** The cholesterol content of hair, wool and feathers, 422.
- Eder, R., and Schneider, W.** Determination of cantharidine in cantharides, 40.  
— Determination of podophyllin, 238.  
— Determination of santonin in santonica, 40.
- Eegriwe, E.** Detection of nitrite, nitrate and sulphite, 106.
- Eliot, C.** Bacterial flora of the market oyster, 98.
- Ellis, G. W.** Determination of carbonyl in aldehydes and ketones, 428.
- Elsdon, G. D.** Annual Report of the County Analyst for Lancaster for 1926, 409.  
— Edible Oils and Fats: Their Substitutes and Adulterants (Review), 61.
- Elsdon, G. D., and Smith, P.** A short method for the determination of butter fat, 317.  
— The determination of butter fat in margarine, 63.  
— The examination of mixtures of coconut oil and palm kernel oil, 63.
- Elsdon, G. D., and Stubbs, J. R.** The immersion refractometer and its value in milk analysis, 193.

- Elvehjem, C. A., Herrin, R. C., and Hart, E. B.** Iron in nutrition. III. Effects of diet on the iron content of milk, 166.
- Elvehjem, C. A., and Peterson, W. H.** Iron content of animal tissues, 650.
- Elzas, M., and Lansberg, L. M.** Pyramidon as a reagent for blood, 167.
- Enklaar, C. J.** New reaction for eugenol, 299.
- Estill, H. W., and McCollum, E. V.** Separation of a substance from oils which inhibits the destruction of vitamin *A* by ferrous sulphate, 720.
- Etrillard, P.** See Dienert, F., and Etrillard, P.
- Etzel, G.** See King, C. G., and Etzel, G.
- Evans, B. S.** An improved method for the volumetric determination of tin, 590.  
— New processes for the determination of traces of certain impurities in lead, 565.
- Evans, T. R.** The films responsible for oxidation tints on metals, 662.
- Evers, H. H., and Strafford, N.** Analysis of mixtures of the isomeric toluidines, 302.
- Evers, N.** Colour test for ergot alkaloids, 601.
- F**
- Fabre, R.** Cholesteryl allophanate and its use in biochemistry, 163.
- Falciola, P.** New reagent for cobalt, 172.
- Färber, E.** Simplified determination of molybdenum in steel and iron, 303.
- Fearon, W. R.** Colour test for cyanic acid, 46.
- Feigl, F.** Detection of magnesium by diphenylcarbazine, 730.
- Feist, K.** Effect of poisons on the larvae of flies, 243.
- Felstead, S. T.** Sir Richard Muir: A Memoir of a Public Prosecutor (Review), 375.
- Ferguson, L.** See Schumacher, E. F., and Ferguson, L.
- Ferris, S. W.** See Henderson, L. M., and Ferris, S. W.
- Fialkow, J.** Determination of the iodine value in aqueous emulsion, 246.
- Fichter, F., and Tschudin, W. F.** Determination of bromate in potassium chlorate, 366.
- Fierz-David, H. E.** Künstliche Organische Farbstoffe (Review), 372.
- Finnemore, H.** The Essential Oils (Review), 111.
- Finter, F. B.** An Introduction to Physical Chemistry (Review), 175.
- Fitch, J. B.** See Hughes, J. S., Fitch, J. B., Cave, H. W., and Riddell, W. H.
- Fitter, H. R.** Determination of antimony in white metals, etc., 729.
- Fleck, L. C.** See Hawley, L. F., and Fleck, L. C.
- Florence, G.** Trichloracetates of the alkaloids. Use of trichloroacetic acid in toxicology, 655.
- Florence, M. G.** Alkaloid trichloracetates. II. Separation of alkaloids from viscera, 723.
- Fluch, P.** Acidimetric determination of nickel as the nickeldicyandiamidine salt, 48.
- Foa, M.** Substitution of centrifugation for filtration and calcination in the gravimetric determination of tin and lead in their alloys, 364.
- Föllen, R.** See Von der Heide, C., and Föllen, R.
- Fonrobert, E., and Pistor, K.** Detection of resins by Brauer's method, 247.
- Forster, R. B., and Keyworth, C. M.** Arylamine salts of the naphthalenesulphonic acids. III. Separation of Crocein, Schäffer, R and G. acids and their arylamine salts, 169.
- Forsyth, J. C.** See Wright, A. M., and Forsyth, J. C.
- Fosse, R.** Allantoic acid in the green parts of *phaseolus vulgaris*, 92.
- Fosse, R., and Bossuyt, V.** Determination of allantoic acid as xanthylurea, 558.
- Foster, L. D.** Determination of New Zealand bran and pollard, 656.
- Foulger, J. H.** Colorimetric determination of silicon in tissues by Isaac's method, 240.
- Fournier, M.** See Lyon, R., Fron, G., and Fournier, M.
- Fox, E. L.** See Carpenter, T. M., and Fox, E. L.
- Fox, J. J., and Bowles, T. H.** Analysis of Pigments, Paints and Varnishes (Review), 110.
- François, M. T.** See André, E., and François, M. T.
- François, M., and Normand, C.** Micrographic detection of tartaric acid in officinal preparations, 161.
- Frankland, P. F.** Carbon monoxide poisoning of bacteria in the absence of haemoglobin, 295.
- Fred, E. B.** See Priem, L. A., Peterson, W. H., and Fred, E. B.  
— See also Wilson, P. W., Peterson, W. H., and Fred, E. B.
- Frederick, R. C.** A modification of the Haldane general air analysis apparatus, 340.  
— A simple colorimeter, 469.  
— Hempel gas analysis apparatus without absorption bulbs and its use in the examination of commercial oxygen, 400.
- French, A.** See Sullivan, F. W., McGill, W. J., and French, A.
- Frey, R. W.** Nitrogen in leather, 47.
- Friedemann, T. E., Cotonio, M., and Shaffer, P. A.** Determination of lactic acid, 418.
- Frischer, M.** See Margosches, B. M., and Frischer, M.
- Froidevaux, J.** Specific characteristics of "regenerated" preserved peas, 91.
- Fron, G.** Differentiation of green and mature woods, 611.  
— See also Lyon, R., Fron, G., and Fournier, M.
- Fuhrmann, F.** Die Chemie der Nahrungs- und Genussmittel (Review), 499.
- Furman, N. H.** See Kolthoff, I. M., and Furman, N. H.
- G**
- Gaddum, J. H.** Determination of phosphorus in blood, 241.

## INDEX TO SUBJECTS.

## A

**Aberdeen:** County of ———. Annual Report of the County Analyst for 1926. J. F. Tocher, 470.

**Absorption:** Dissolved oxygen — test. E. A. Cooper and W. H. Read, 723.

**Abstracts of Papers published in other Journals:** 36, 89, 159, 235, 287, 350, 417, 480, 548, 596, 647, 715.

**Acetaldehyde** in very dilute solutions; Quantitative determination of ——. S. L. Langedijk, 358.

**Acetic Acid:** Formic acid in commercial ——. L. Daniel, 549.  
propionic acid in —; Determination of. F. Baum, 607, 608.

**Acetic Anhydride:** propionic acid in acetic acid and —; Determination of. F. Baum, 608.

**Acetone:** Determination of — by mercurimetry. 100.  
Faught test for —. H. J. Schaeffer, 169.  
in ethyl alcohol; Detection of —. 100.  
isopropyl alcohol in presence of —; Determination of. H. A. Cassar, 725.

**Acetylene** in well-water polluted with illuminating gas; Detection of —. 654.

**Acetylmethyl Carbinol:** Production of — by *Clostridium acetobutylicum*. P. W. Wilson, W. H. Peterson and E. B. Fred, 655.

**Acid:** Production of — by wood-rotting fungi. L. P. Curtin, 554.

**Acid Values** of fats and oils; Isopropyl alcohol as substitute for ethyl alcohol in determining —. H. A. Schuette and M. P. Smith, 101.

**Acidimetric** determination of magnesium, zinc, aluminium and copper in presence of oxyquinoline. F. L. Hahn and E. Hartleb, 495.  
determination of nickel as the nickeldicyanidamide salt. P. Fluch, 48.

**Acidity** of milk; Relation of the hydrogen ion concentration to the titratable —. P. F. Sharp and T. J. McInerney, 715.

**Acids:** Amino —. See **Amino Acids**.  
earth-; Digallic acid as a reagent for —. W. R. Schoeller, 702.  
Fatty —. See **Fatty Acids**.  
in parsley seed oil. T. P. Hilditch and E. E. Jones, 429.  
Non-volatile — of the pear, quince, apple, loganberry, blueberry, cranberry, lemon and pomegranate. E. K. Nelson, 418.

**Acids**—continued.

of the oleic series; Some ill-defined —. I. Hypogaecic acid. T. P. Hilditch and N. I. Vidyarthi, 429. II. Acids in parsley seed oil. T. P. Hilditch and E. E. Jones, 429.

**Acridness** of cruciferous seeds and oil cakes; Toxicity and —. G. Jørgensen, 44.

**Adrenaline:** Determination of —. L. C. Baker and G. F. Marrian, 651.

**Adulteration:** Madras Prevention of — Act, 1918. 156.

**Agricultural** analysis. Abstracts, 244, 298, 487, 555, 656

**Agriculture:** United States Department of ——. See **United States**.

**Air** analysis apparatus; Modification of the Haldane general —. R. C. Frederick, 340.  
ethyl iodide in water, blood and —; Method for determining minute amounts of. I. Starr, junr., and C. J. Gamble, 168.  
nitric oxide in —; Determination of traces of. E. Kohn-Abrest, 248.  
samples; Absence of stratification and rapidity of mixing of carbon dioxide in —. T. M. Carpenter and E. L. Fox, 493.  
Stability of titanous sulphate solutions in —. H. Wilkinson and A. G. Tyler, 363.

**Air Ministry:** See **Meteorological Office**.

**Albumin:** Determination of — by mercurimetry. 100.

**Albuminoid Nitrogen** determination in waters. 130.

**Alcohol adulterants;** Detection of —. J. M. Haley, 100.  
Ethyl —. See **Ethyl Alcohol**.  
in chloroform; Tests for —. 540.  
in Palestine; Denaturing of alcoholic liquors and —. 230.  
Isopropyl —. See **Isopropyl Alcohol**.

**Alcoholic** concentration in urine as a test of intoxication. G. Carter, 615.  
fermentation; Action of certain organic substances on —. E. Mameli, 99.

**Alcohols:** Unsaturated aliphatic — of sperm oil. E. André and M. T. François, 558.

**Aldehydes:** carbonyl in ketones and —; Determination of. G. W. Ellis, 428.  
in essential oils; General method for determining —, with particular reference to the determination of citronellal in Java citronella oil and citral in lemon oil. C. T. Bennett and M. S. Salamon, 693.

**Aldose** sugars. See **Sugars, Aldose**.

- Aliphatic** alcohols of sperm oil; Unsaturated ——. E. André and M. T. François, 558.
- Alkali Sulphides**: Solubility of cupric sulphide in — in presence of sulpharsenates. C. Davies and A. D. Monro, 659.
- Alkalimetric** titrations; Potassium bi-iodate as a standard substance in iodimetric and ——. I. M. Kolthoff and L. H. van Berk, 48.
- Alkalis** in ores, clays, etc.; Determination of ——. J. Ciocchina, 432.
- Alkaloid** of pepper; Volatile ——. A. Pictet and R. Pictet, 649.
- Alkaloid Trichloracetates**: Separation of alkaloids from viscera. M. G. Florence, 723.
- Alkaloidal** hydroferrocyanides and their analytical uses. M. Gadreau, 601.
- Alkaloids**: Determination of — by mercurimetry. 100.
- ergot —; Colour test for. N. Evers, 601.
- Errors in analysis of — caused by presence of fatty acid or soap. H. R. Watkins and S. Palkin, 290.
- in ethyl alcohol; Detection of ——. 101.
- in old viscera; Detection of ——. J. Magnin, J. S. Ubeda and B. Golod, 357.
- Lead chloride for clearing organic liquids in toxicological research for ——. J. Magnin, 356.
- Separation of — from viscera. M. G. Florence, 723.
- Trichloracetates of the —. Use of trichloroacetic acid in toxicology. G. Florence, 655.
- Alkoxy Groups** in organic compounds; Volumetric determination of —. Modification of the Zeisel procedure. E. P. Eaton and E. S. West, 725.
- Allantoic Acid**: Determination of — as xanthylurea. R. Fosse and V. Bossuyt, 558.
- in the green parts of *Phaseolus vulgaris*. R. Fosse, 92.
- Allen's Commercial Organic Analysis**. Vol. V. (Review), 615.
- Allfood** with radium. (Legal Notes), 642.
- Allotropy**: A. Smits, 53.
- Alloys** of Iron Research Committee. 414.
- phosphorus in —; Determination of. B. Salkin, 305.
- Polishing and etching lead, tin and some of their — for microscopic examination. J. R. Vilella and D. Beregekoff, 732.
- Substitution of centrifugation for filtration and calcination in the gravimetric determination of tin and lead in their —. M. Foß, 364.
- Alumina**: Precipitation of — by ammonia. L. Murawleff and O. Krassnowsky, 105.
- Aluminium**: Confirmatory test for —. W. J. Allardyce, 613.
- Determination of cadmium and — by means of oxyquinoline. R. Berg, 611.
- in presence of oxyquinoline; Acidimetric determination of —. F. L. Hahn and E. Hartleb, 495.
- Aluminium**—*continued*.
- Oxyquinoline as reagent for magnesium, zinc and —. F. L. Hahn and K. Vieweg, 431.
- zinc in —; Determination of small quantities of. W. Böhm, 494.
- Aluminon**: Reaction of — with hydroxides of scandium, gallium, indium, thallium and germanium. R. B. Corey and H. W. Rogers, 172.
- Amides**: Iodine as a differential reagent between ammonium salts, amines and —. J. A. Sanchez, 363.
- Amidoazobenzene**: Reactions of — with nitrous acid. 492.
- Amines**: Iodine as a differential reagent between ammonium salts, amides and —. J. A. Sanchez, 363.
- Amino Acids** in foodstuffs; Determination of —. J. Tillmans and J. Kiesgen, 417.
- Ammonia** content of cold-storage eggs. H. C. Lythzoe, 596.
- Conversion of saccharin into —. 381.
- in tobacco, 22.
- liquor; Determination of phenol in — and other solutions. R. D. Williams, 360.
- Precipitation of alumina by —. L. Murawleff and O. Krassnowsky, 105.
- process for determining saccharin. A. F. Lerrigo and A. L. Williams, 377.
- Ammonium Salts**: Iodine as a differential reagent between —, amines and amides. J. A. Sanchez, 363.
- Anaesthetic** ethers; Reactions of — with potassium hydroxide and with mercury, and the test for foreign odours. E. Mallinckrodt, junr., 718.
- Anaesthetics**: Colour reaction for some —, and its application to determination of procaine. E. R. Riegel and J. F. Williams, 41.
- Analysis**: capillary—; Use of the analytic quartz lamp in —. 709.
- Organic —. *See Organic Analysis*.
- Physico-chemical — by means of the boiling of saturated solutions. E. Cornec and P. Klug, 660.
- Quantitative —. *See Quantitative Analysis*.
- Standard Methods of —. Bibliographies. I. Leather and Tanning Materials, 83. II. Beer and Brewing Materials, 235. III. Petroleum and Petroleum Products, 347.
- Volumetric —. *See Volumetric Analysis*.
- Analytical Investigation Scheme**. 186.
- Methods; Standing Committee on the Uniformity of —. Essential Oil Sub-Committee, 186, 276, 530. Milk Products Sub-Committee, 402.
- Animal** charcoal; Method of differentiating vegetable and —. S. Ahlbom, 657.
- nitrogenous manures; Detection and determination of nitrogen-bearing chemicals added to vegetable or —. H. C. Moore and R. White, 298.
- tissues; Iron content of —. C. A. Elvehjem and W. H. Peterson, 650.

- Aniseed Oil**: Simple and rapid reaction to distinguish — from star anise oil. W. P. H. v. d. D. Mareeuw, 300.
- Anthocyanin pigments** in canning; Behaviour of —. C. W. Culpepper, 648.
- Antimonic Ion**: Iodimetric determination of the —. A. Travers and Jouot, 303.
- Antimony** in lead; Determination of traces of —. 565.  
in white metals, etc; Determination of —. H. R. Fitter, 729.
- Antimony Trichloride** as a possible quantitative reagent for vitamin A; Study of —. F. Wokes and S. G. Willimott, 515.  
Purification of —. 517.
- Antiscorbutic factor** precipitated from lemon juice. S. S. Zilva, 425.  
factor present in lemon juice; Solubilities of the —. E. B. Vedder and W. E. Lawson, 424.  
fraction of lemon juice. V. S. S. Zilva, 552.
- Aphrogen**: 42.
- Apomorphine**: New colour reaction for —. 41.
- Apparatus**: Abstracts: 49, 107, 173, 252, 306, 366, 434, 497, 614, 660, 731.
- Apple** and fruit jams; Analysis of —. C. F. Muttelet, 598.  
in jams: Detection of —. C. F. Muttelet, 160.  
matter in raspberry jam: A question of warranty. (Legal Notes), 533.  
Non-volatile acids of the —. E. K. Nelson, 418.
- Apples**: Bitter pit in —. A review of the problem. (Food Investigation Board Report No. 28). 80.  
Composition of fresh —. 351.  
Fungal attack on —. 542.
- Applied Chemistry**: Society of Chemical Industry Reports on the Progress of —. (Review). 369.
- Apricot pulp**; Composition of —. 352.
- Aquo-Ammonocarbonic Acids**: New reactions of the mixed —. L. A. Pinck and J. S. Blair, 248.
- Argentometric** determination of iodide in presence of chloride. I. M. Kolthoff, 305.  
halogen titrations; Accuracy of —. I. M. Kolthoff and L. H. van Berk, 304.
- Arsenic**: Colorimetric determination of minute amounts of compounds of silicon, of phosphorus and of —. W. R. G. Atkins and E. G. Wilson, 249.  
compounds and phosphorus compounds of sea-water. W. R. G. Atkins and E. G. Wilson, 427.  
Distribution of — among colours. 219.  
Gutzeit test for —; Method of applying. C. H. Cribb, 701.  
in food colouring materials. 503, 529.  
in fruit; Occurrence of — as a result of treatment with protecting agents. L. Lendrich and F. Mayer, 237.  
in lead; Determination of traces of —. 566.  
in printing ink. T. H. Barry, 217; R. S. Morrell and C. I. Smyth, 339.
- Arsenic—continued.**  
Source of — hitherto unsuspected. R. E. Remington, 487.  
uniform stains in the Gutzeit test for —; Production of. J. R. Stubbs, 699.
- Arsenic Pentoxide**: Determination of — as magnesium ammonium arsenate. W. M. McNabb, 494.
- Arylamine Salts** of the naphthalene-sulphonic acids. III. Separation of Crocein, Schäffer, R. and G. acids and their —. R. B. Forster and C. M. Keyworth, 169.
- Asphalt** content of mineral oils; Determination of —. J. Marcusson, 300.
- Aspirin**: Free salicylic acid in —. 232.
- Asthma** cigarettes. 473.
- Atmosphere**: chlorides in the —; Distribution and transport of. F. Bordas and A. Desfemmes, 730.  
Water vapour in the —. H. Kohler, 368.
- Atmospheric deposit recorder**; A new —. 155.  
pollution; Advisory Committee on —. Report for year ending March 31st, 1926. 155.  
pollution during the Coal Strike, 1926. 79.  
pollution; Smoke and —. 477.
- Atomic weights**; Committee on —. Annual Report for 1926. 287.
- Aurantia** in foodstuffs; Detection of —. 585.
- Aurine** in foodstuffs; Detection of —. 585.
- Australian essential oils** and their pure constituents; Germicidal values of —. 295.

## B

- Bacilli**: salmonella group of —; Use of certain carbohydrates and glucosides in the differentiation of members of. F. Wokes and J. H. Irwin, 604.
- Bacillus Botulinus**: Food poisoning due to —. 122.
- Bacillus Coli**: Action of neon light on —. 98.  
Contamination of mineral water with —. (Legal Notes), 412.  
in water; Characterisation of —. 117.
- Bacillus Pneumococcus**: Action of neon light on —. 98.
- Bacillus Pyocyanus**: Action of neon light on —. 98.
- Bacon**: Formaldehyde in —. 394.
- Bacteria**: Action of neon light on —. A. Philibert and J. Risler, 97.  
Carbon monoxide poisoning of — in absence of haemoglobin. 295.  
in milk; Thermophilic —. M. O. Eckford, 426.  
Pathogenic — and mixed enzymes of milk. C. Gorini, 486.
- Bacterial flora** of the market oyster. C. Eliot, 98.  
flora; Studies of commercial sauerkraut with special reference to changes in — during fermentation at low temperatures. L. A. Priem, W. H. Peterson and E. B. Fred, 356.

- Bacterial**—*continued*.  
 nutrition; Studies in —. III. Phosphates and the growth of streptococci. H. R. Whitehead, 243.
- Bactericidal** action of selenium and tellurium compounds. N. M. Strover and B. S. Hopkins, 356.
- Bacteriological** abstracts: 42, 95, 167, 243, 294, 356, 426, 486, 554, 604, 655, 722.  
 examination of food and water; Recent advances in —. W. G. Savage, 117.  
 study of ham souring. E. A. Boyer, 98.
- Bacteriophage**: Experimental researches on the nature of the —. C. Prausnitz, 615.
- Bacterium Pruni** in milk; Identification of some of the products formed by —. S. L. Jodidi, 486.  
 Production of certain enzymes by —. S. L. Jodidi, 722.
- Baking Powder**: Standard for —. (Legal Notes), 706.
- Barium**: Separation of radium and mesothorium I from — by ionic migration. J. Kendall, E. R. Jette and W. West, 106.
- Barium Chromate**: Fractional precipitation of radium and —. L. M. Henderson and F. C. Kracek, 303.
- Barium Ion**: Micro-titration of chromic ion and —. R. F. le Guyon, 365.
- Barley**: Iodine absorption value of —. 89.  
 Sulphur dioxide in pearl —. (Legal Notes), 476. (Preservatives Regulations), 416.
- Bean meal**; Iodine absorption value of —. 89.
- Beef**: Freezing of —. 541.
- Beer**: Bibliography of standard methods of analysing —. 235.  
 Sulphur dioxide in —. N.C.B., 717.  
 Vitamin content of —. A. Scheunert and M. Schieblich, 722.
- Beeswax**: Bulgarian honey and —. J. Zoneff, 598.  
 Colouring matter of — and composition of propolis. G. F. Jaubert, 418.
- Benzene** in ethyl alcohol; Detection of —. 101.
- Benzidine**: Reaction of — with nitrous acid. 492.
- Benzoated** lard. 79.
- Benzocaine**: New colour reaction for —. 41.
- Benzoic Acid** in egg-yolk; Determination of —. E. Waltzinger, 90.  
 in foodstuffs; Determination of —. G. W. Monier-Williams, 237, 572. Public Health Report, No. 39. G. W. Monier-Williams, 153, 229.
- Benzol**: Relative toxicity of — and its higher homologues. J. J. Batchelor, 426.
- Benzoylacrylic Acid**: Sensitive reaction for — and its use for characterising phenols. E. Cattelain, 360.
- Beri-Beri**: Vitamin B extract for treatment of —. 158.
- Berthelot Centenary**: Address presented by the Society of Public Analysts, 620.
- Bibliographies**: Standard Methods of Analysis. I. Leather and Tanning Materials, 83. II. Beer and Brewing Materials, 235. III. Petroleum and Petroleum Products, 347.
- Biochemical** abstracts: 42, 95, 163, 239, 291, 354, 420, 483, 550, 603, 650, 719.
- Biochemistry**: Cholesteryl allophanate and its use in —. R. Fabre, 163.  
 Practical Organic and —. (Review). R. H. A. Plimmer, 107.  
 Recent Advances in —. (Review), J. Pryde, 58.
- Birmingham**: City of —. Report of the City Analyst, J. F. Liverseege, for Third Quarter, 1926, 77. Fourth Quarter, 1926, 223. Annual Report for 1926, 280. First Quarter, 1927, 473. Second Quarter of 1927, 531.
- Bismuth**: Determination of —. G. G. Reissaus, 250.  
 in lead; Determination of traces of —. 571.  
 Sensitive test for —. H. Kubina and J. Plichta, 659.  
 Volumetric determination of —. W. Streckler and A. Herrmann, 659.
- Bitter Pit** in apples. A review of the problem. (Food Investigation Board Report, No. 28.) 80.
- Black**: Carbon —. See **Carbon Black**.
- Black Currant** and orange and quinine wines. (Legal Notes), 283.  
 pulp; Composition of —. 352.
- Black Currants**: Composition of fresh —. 351.
- Black Rot** of sweet potatoes in storage; Infection and temperature relations of —. J. I. Lauritzen, 99.
- Bleaching** agents: Action of improvers and — on flour. (Ministry of Health Report), 226. preparations; Determination of available chlorine in —. J. Hausner, 433.
- Bloater**: Formaldehyde in —. 394.
- Blood**: Action of — on sulphides. W. Denis and L. Reed, 298.  
 ethyl iodide in air, water and —; Method for determining minute amounts of. I. Starr, junr. and C. J. Gamble, 168.  
 Gasometric determination of small amounts of carbon monoxide in —, and its application to — volume studies. D. D. Van Slyke and F. S. Robschheit-Robbins, 291.  
 Hydrogen ions in — determined with the Duboscq colorimeter. J. F. McClendon, S. Russell and E. Tracy, 43.  
 iron in —; Micro-determination of. F. H. Smirk, 291.  
 lactic acid in —; Determination of. E. Ronzoni and Z. Wallen-Lawrence, 603.  
 non-protein sulphur compounds of —; Methods for determining some. W. Denis and L. Reed, 96.  
 phosphorus in —; Determination of. J. H. Gaddum, 241.  
 Pyramidon as a reagent for —. M. Elzas and L. M. Lansberg, 167.  
 Reducing non-sugars and true sugar in human —. M. Somogyi, 719.

**Blood**—*continued.*

Separation of alkaloids from ——. M. G. Florence, 723.  
 serum; Determination of total base in — by means of gasometric micro method for determining iodates and sulphates. D. D. Van Slyke, A. Hiller and K. C. Berthelsen, 651.

**Blood Sausage** with artificially coloured skin. T. Merl, 93.

**Blueberry**: Non-volatile acids of the ——. E. K. Nelson, 418.

**Boa Constrictor** fat. R. H. Kerr, 610.

**Body** oil from sperm whale. Y. Toyama, 726.

**Bones**: Identification of ——. 539.

**Boric Acid**: Determination of ——. 464, 465. in coffee. W. Partridge, 401.  
 Natural occurrence of ——. 459.

**Borneo** tallow in cacao butter; Detection of ——. 452, 454.

**Bornstein** reaction for saccharin. 377.

**Boron** compounds in cacao and cacao products; Natural occurrence of ——. A. S. Dodd, 459.

**Bran**: New Zealand pollard and —; Determination of. L. D. Foster, 656.

**Brandy**: vanillin in wine distillates, — and artificial —; Occurrence of. G. Reif, 717.

**Brassica Juncea** seeds; Toxicity of ——. 44.

**Brauer's Method** for detecting resins. E. Fonrobert and K. Pistor, 247.

**Bread**: Average composition of white, brown and standard ——. 703.

**Brewing** and Malting; A Standard Manual of — and Laboratory Companion. (Review) J. Ross-Mackenzie, 370.

materials; Bibliography of standard methods of analysing ——. 235.

**British** wines; Duty on ——. (Statutory Rules and Orders, 1927, No. 728.) 714

**Bromate** in potassium chlorate; Determination of ——. F. Fichter and W. F. Tschudin, 366.

**Bromination** of cresols. Y. Oshima and T. Takahashi, 727.

**Bromine** in organic compounds; Modified combustion method for determining ——. F. L. Smith, 357.

**Bronze** "disease." 82.

**Buffalo** milk standards in India. 157.

**Bulgarian** honey and beeswax. J. Zoneff, 598.

**Butesin**: New colour reaction for ——. 41.

**Butter** analysis; Relations of the Manley and Reichert figures for ——. H. S. Shrewsbury, 388.

Constants of Irish ——. (Legal Notes,) 411.  
 fat; Detection of coconut and palm kernel oils in ——. 69.

fat in chocolate. 327.

fat in margarine; Determination of ——. G. D. Elsdon and P. Smith, 63.

fat in milk; Causes of variation in the proportion of ——. J. F. Tocher, 174.

fat in milk from single cows and herds of cows; Daily variations in ——. 470.

**Butter**—*continued.*

fat; New value for determination of ——. F. v. Morgenstern, 236.

fat; Short method for determining ——. G. D. Elsdon and P. Smith, 317.  
 standards in India. 157.

**Buttermilk**: Cultured ——. U.S.A. Food Inspection Decision No. 210, 547.

**Butters**: sorting of margarines and —; Rapid method for. C. H. Manley, 67.

**Butyl Alcohol**: methylethyl ketone in presence of secondary —; Determination of. A. Cassar, 725.

**Butyn**: New colour reaction for ——. 41.

## C

**Cabbage**: calcium and phosphorus in —; Water-soluble content of. W. H. and C. B. Peterson, 93.

**Cacao** and cacao products; Natural occurrence of boron compounds in ——. A. S. Dodd, 459.

beans; Boron compounds as natural constituents of ——. 462.

butter; Analysis of mixtures of illipé and — by means of the "turbidity temperature" method, 326.

butter substitutes and their detection. A. W. Knapp, J. E. Moss and A. Melley, 452.  
 products; Method of determining milk proteins in ——. H. C. Waterman and H. A. Lepper, 350.

**Cadmium** as a coating metal for domestic utensils. A. Gronover and E. Wöhrlich, 605.

Determination of aluminium and — by means of oxyquinoline. R. Berg, 611.

**Cadmium Salts**: microchemical reactions for —; New highly sensitive. A. Martini, 493.

**Caffeine** content of coffee extracts and their physiological action. H. Jesser, 237.

Determination of ——. S. Gobert, 162.  
 in black tea; Determination of ——. W. Stüber, 238.

in "Yocco." E. de Wildeman, 94.

**Cajuput Oil**: cineole in —; Estimation of. 276.

**Caking** index of coal. 595.

**Calcination**: Substitution of centrifugation for filtration and — in the gravimetric determination of tin and lead in their alloys. M. Foà, 364.

**Calcium** in cabbage; Water-soluble content of phosphorus and ——. W. H. and C. B. Peterson, 93.

in human milk; Direct precipitation of ——. C. S. Rothwell, 716.

Volumetric determination of ——. F. L. Hahn and G. Weiler, 172.

**Calcium Carbide** as a means of determining water in organic substances. A. Cantzler and S. Rothschild, 606.

**Calcium Cyanide**: Stability of ——. 32.

- Calcium Phosphate**: Flour containing acid —. (Legal Notes), 30.
- Calender** Effect and Shrinking Effect of Unvulcanised Rubber. (Review), W. de Visser, 256.
- California** sardine oil; Iodine value of a commercial —. M. S. Dunn and B. S. Hollombe, 483.
- Calorific** value of coal. 595.
- Camphor Oil**: cineole in —; Determination of. T. T. Cocking, 600.
- Canada**: Government of —. Report of the Dominion Chemist, F. T. Shutt, for the year ending March 31, 1926. 537.
- Canned** cranberries; Discoloration of —. F. W. Morse, 548.
- foods; Bacteriological examination of —. 123.
- loganberries. 478.
- pears; Vitamin C content of fresh and —. V. C. Craven and M. M. Kramer, 485.
- Canning**: anthocyanin pigments in —; Behaviour of. C. W. Culpepper, 648.
- Cans**: Bulging — of loganberries. W. D. Bigelow, 638.
- Cantharides**: cantharidine in —; Determination of. R. Eder and W. Schneider, 40.
- Cantharidine** in cantharides; Determination of —. R. Eder and W. Schneider, 40.
- Capillary** analysis; Use of the analytic quartz lamp in —. 709.
- Caramel**: sulphur dioxide in —; Determination of. 352.
- Carbazotic Acid** in foodstuffs; Detection of —. 585.
- Carbethoxy-Cyanoguanidine**: 248.
- Carbohydrates** in cereal products; Influence of peptic digestion in determining total —. B. G. Hartmann and F. Hillig, 160.
- reaction between tannin and —; Nature of. H. B. Stocks and C. V. Greenwood, 170.
- Use of certain — and glucosides in the differentiation of members of the salmonella group of bacilli. F. Wokes and J. H. Irwin, 604.
- Carbolic Acid** in commercial cresol; Detection of —. A. J. Ware, 483.
- New specific test for distinguishing —, the cresols and certain other phenols. A. H. Ware, 335.
- Carbon** and nitrogen on the same soil sample; Determination of —. B. E. Brown, 487.
- in dilute organic liquids; Determination of —. O. Kauffmann Cosla, 45.
- in pig iron; Determination of graphite and combined —. W. A. Burford and W. Bader, 104.
- Carbon Black** test for comparing the deflocculating power of soaps. R. M. Chapin, 102.
- Carbon Dioxide**: Absence of stratification and rapidity of mixing of — in air samples. T. M. Carpenter and E. L. Fox, 493.
- Conductivity method for determining —. L. E. Bayliss, 557.
- formed by the action of urease; Determination of urea by gasometric measurement of —. D. D. Van Slyke, 551.
- Carbon Dioxide** in carbonates; Determination of —. S. Back, 76. L. H. Trace and C. O. Harvey, 76. T. Callan, 222. J. R. I. Hepburn, 276.
- in fermenting mixtures; Determination of —. A. L. Raymond and H. M. Winegarden, 557.
- Carbon Disulphide**: Purification of —. 540.
- Carbon Monoxide** in blood; Gasometric determination of small amounts of —; and its application to blood volume studies. D. D. van Slyke and F. S. Robschheit-Robbins, 291.
- in well-water polluted with illuminating gas; Detection of —. 654.
- poisoning in forensic cases. D. J. A. Kerr, 296.
- poisoning of bacteria in absence of haemoglobin. P. F. Frankland, 295.
- Carbonates**: carbon dioxide in —; Determination of. S. Back, 76. L. H. Trace and C. O. Harvey, 76. T. Callan, 222. J. R. I. Hepburn, 276.
- Carbonyl** in aldehydes and ketones; Determination of —. G. W. Ellis, 428.
- Carrageen** precipitates; Titration values of —. 266.
- Carrotin**: Extraction of — from flour. 446.
- Casein** in milk; Determination of — by approximately iso-electric precipitation. H. C. Waterman, 548.
- Reaction between tannin and —. H. B. Stocks, 170.
- Casings** for sausages; Cellulose —. W. F. Henderson and H. E. Dietrich, 37.
- Castor Oil** in fatty mixtures; Detection of —. Vizera and Guillot, 161.
- Cathode**: mercury dropping —; Electrolytic analysis with the. J. Heyrovsky, 731.
- Caustic Soda**: strengths of commercial soda ash and —; Methods of expressing. 529.
- Cedar** wood; Oil from Port Orford —. F. H. Thurber and L. J. Roll, 490.
- Cellulose**: Microbiology of —, Hemicellulose, Pectin and Gums. (Review), A. C. Thaysen and H. J. Bunker, 500.
- sausage casings. W. F. Henderson and H. E. Dietrich, 37.
- wood —; A hydrolysis number determination for. L. F. Hawley and L. C. Fleck, 611.
- Cement**: lime in hydraulic —; Determination of free. F. L. Brady and F. J. McConnell, 344.
- Centrifugation**: Substitution of — for filtration and calcination in the gravimetric determination of tin and lead in their alloys. M. Foà, 364.
- Centrophorus Granulosus**: Oil of —. A. C. Chapman, 622.
- Cereal** products; Influence of peptic digestion in determining total carbohydrates in —. B. G. Hartmann and F. Hillig, 160.
- Cerium**: Determination of —. T. Lindeman and M. Hafstad, 365.
- Ceteleic Acid**: Constitution of —. 726.

- Charcoal**: Differentiation of animal and vegetable ——. S. Ahlbom, 657.
- Chatham Islands**: Peat and peat wax from ——. 727.
- Chaulmoogra** group of oils; Characteristics of ——. G. A. Perkins, A. O. Cruz and M. O. Reyes, 548.
- Cheese**: disodium phosphate in process ——; Determination of added. I. M. Williams, 648.  
Fat in Cheshire ——. (Legal Notes), 151.  
standards in India. 157.
- Chemical Annual**; Nostrand's ——. (Review), 617.  
Constants; Annual Tables of ——. (Review) 54.  
Constants; Physical and ——. (Review), G. W. C. Kaye and T. H. Laby. 53.  
Symbols; Inorganic —— and other useful Chemical Data. (Review), E. R. Darling, 502.  
The Making of a ——. (Review), E. J. Lewis and G. King, 662.
- Chemie der Nahrungs- und Genussmittel**. (Review), F. Fuhrmann, 499.
- Chemistry**: Applied ——. See **Applied Chemistry**.  
Colloid ——. See **Colloid Chemistry**.  
Essays on the Art and Principles of ——. (Review), H. E. Armstrong, 435.  
Inorganic ——. See **Inorganic Chemistry**.  
Laundry ——. (Review), A. Harvey, 62.  
of Dyeing. (Review), J. K. Wood, 255.  
of the Oil Industries. (Review), J. E. Southcombe, 312.  
of Writing and Printing Inks. (Review), W. B. Gamble, 313.  
Organic ——. See **Organic Chemistry**.  
Physical ——. See **Physical Chemistry**.  
Physiological. See **Physiological Chemistry**.  
Theoretical ——; A Comprehensive Treatise on Inorganic and. Vol. VII. (Review), J. W. Mellor, 309.  
Thermodynamics and ——. (Review), F. H. Macdougall, 560.
- Chemists' Year Book, 1927**. (Review), F. W. Attack, 498.
- Cherry-Laurel** distillate; Alleged reaction of ——. F. Morvillez and Defossez, 239.
- Cheshire Cheese**: Fat in ——. (Legal Notes), 151.
- Chili Saltpetre**: Perchlorate in —— determined by means of nitron. A. Vürtheim, 251.
- Chimie Inorganique**: Cours de ——. (Review), F. Swarts, 369.
- Chloramine**: Reaction of —— with fats. B. M. Margosches and M. Frischer, 609.
- Chloramine-T**: Determination of aldose sugars by means of —— with special reference to the analysis of milk products. C. L. Hinton and T. Macara, 668.
- Chloride**: iodide in presence of ——; Argentometric determination of. I. M. Kolthoff, 305.
- Chlorides** in the atmosphere; Distribution and transport of ——. F. Bordas and A. Desfemmes, 730.
- Chlorine**: Action of free —— on microbes. F. Dienert and P. Etrillard, 722.  
in bleaching preparations; Determination of available ——. J. Hausner, 433.  
in cow's milk; Elimination of sodium and ——. L. Barthe and E. Dufilho, 287.  
in foodstuffs; Determination of sodium, potassium and ——. A. D. Husband and W. Godden, 72.  
in milk; Determination of ——. A. D. Husband and W. Godden, 288.  
in milk of certain mammals; Determination of sodium and ——. L. Barthe and E. Dufilho, 715.  
Manganese interference in the *o*-tolidine test for available ——. E. S. Hopkins, 496.
- Chloroform**: alcohol in ——; Tests for. 540.  
Pyridine test as a quantitative method for determining minute amounts of ——. W. H. Cole, 94.
- Chloropicrin**: phosgene from ——; Preparation of. S. Secareano, 491.
- Chocolate** as source of protein in the diet; Value of cocoa and ——. H. H. Mitchell, J. R. Beadles and M. H. Keith, 95.  
Boron compounds as natural constituents of ——. 461.  
Butter fat in ——. 327.  
-coated creams; Sugar-tolerant yeasts in ——. M. B. Church, H. S. Paine and J. Hamilton, 295.  
-coated fondant creams; Prevention of "bursting" in ——. H. S. Paine, V. Birchner and J. Hamilton, 295.  
Dutch-Process cocoa and ——. "Alkalisied cocoa and ——. Food Inspection Decision, No. 202 of U.S. Dept. of Agriculture. 88.  
illipé butter in ——; Determination of. H. W. Bywaters, F. T. Mags and C. J. Pool, 324.  
Milk fat in milk —— determined by means of a modified xylene number. C. A. Greenleaf, 647.
- Chocolates**: milk ——; Analysis of some commercial. 328.
- Cholesterol** content of hair, wool and feathers. H. C. Eckstein, 422.  
Influence of intense X-ray and  $\gamma$ -ray radiations on ——. M. C. Reinhard and K. W. Buchwald, 485.  
Influence of irradiation upon oxidation products of ——. F. W. Schlutz, M. R. Ziegler and M. Morse, 423.  
obtained from different sources; Properties of ——. R. J. Anderson, 164.  
Relation of —— to vitamin D. O. Rosenheim and T. A. Webster, 293.
- Cholesteryl Allophanate** and its use in biochemistry. R. Fabre, 163.
- Chondrin**: Comparative characterisation of gluten and ——. M. A. Rakusin and K. Braudo, 240.
- Chromic Ion**: Micro-titration of barium ion and ——. R. F. le Guyon, 365.
- Chromium**: Volumetric determination of ——. E. Müller and W. Messe, 49.

- Cider**: Characteristics of ——. W. H. Bufton, 649.
- Cigarettes**: Asthma ——. 473.
- Cineole** in camphor oil; Determination of ——. T. T. Cocking, 600.  
in essential oils; Estimation of. 276.
- Citral** in lemon oil; Determination of ——. C. T. Bennett and M. S. Salamon, 693.
- Citric Acid**: Application of the Stahre reaction to the accurate determination of ——. B. G. Hartmann and F. Hillig, 549.  
New pyrogenic reaction for tartaric, malic and ——. J. A. Sanchez, 358.
- Citronella Oil**: citronellal in Java ——.; Determination of. C. T. Bennett and M. S. Salamon, 693.
- Citronellal** in Java citronella oil; Determination of ——. C. T. Bennett and M. S. Salamon, 693.
- Citrus** fruits; Vitamins, oxidising enzymes and reactions in ripe ——. 242.
- Clay**: Japanese acid — (Japanese Fuller's earth); Acidity of. K. Kobayashi, 559.
- Clays**: alkalis in ores, —, etc.; Determination of. J. Ciochina, 432.  
Colour reaction of the Japanese acid — with liver oils and vitamin A on the market. K. Kobayashi and K. Yamamoto, 553.
- Clerget-Invertase Hydrolysis Constants** of sucrose and raffinose. H. S. Paine and R. T. Balch, 350.
- Clostridium Acetobutylicum**: Production of acetylmethyl carbinol by ——. P. W. Wilson, W. H. Peterson and E. B. Fred, 655.
- Coal** analysis; Methods of ——. (Fuel Research Board Report), 345, 594.  
and Allied Subjects. Compendium II. (Review), N. Simpkin, F. S. Sinnatt and Associates, 179.  
Caking index of ——. 595.  
dust; Laboratory methods of determining the inflammability of ——. (Safety in Mines Research Board Report No. 31.) A. L. Godbert, 713.
- Coal Gas**: Separation of individual saturated and unsaturated hydrocarbons in — by fractional distillation. F. E. Grey and W. P. Yant, 359.
- Coal Tar** colours in foodstuffs; Detection of prohibited ——. J. R. Nicholls, 585.  
Products; Dyestuffs and ——. (Review), Beagall, Challenger, Martin and Sand, 256.
- Coating** metal for domestic utensils; Cadmium as a ——. A. Gronover and E. Wohnlich, 605.
- Cobalt**: Determination of ——. G. Spacu and J. Dick, 430.  
in the pancreas; Nickel and ——. G. Bertrand and M. Macheboeuf, 95.  
New reagent for ——. P. Falciola, 172.
- Cocaine**: Determination of ——. E. O. Eaton, 650.
- Cocoa** as source of protein in the diet; Value of chocolate and ——. H. H. Mitchell, J. R. Beadles and M. H. Keith, 95.
- Cocoa—continued.**  
Boron compounds as natural constituents of ——. 461.  
Dutch-process chocolate and ——. "Alkalised chocolate and ——. Food Inspection Decision No. 202 of U.S. Dept. of Agriculture. 88.
- Coconut Oil**: Distillation of — at very low pressures. H. I. Waterman and J. A. Nijholt, 420.  
in butter fat; Detection of ——. 69.  
mixtures of palm kernel oil and —; Examination of. G. D. Elsdon and P. Smith, 63.  
Reichert and Polenske values of ——. 64.  
Values for ——. 319.
- Cod Liver Oil** as food. Observations on the existence of vitamin E. V. E. Nelson, R. L. Jones, G. Adams and L. T. Anderegg, 604.  
Fatty acids of ——. Y. Toyama, 245.  
Growth-promoting property of irradiated fat in the diet, of direct irradiation and of ——. H. Goldblatt and A. R. Moritz, 97.
- Codeine**: Detection of formaldehyde and ——. J. Aloy and A. Valdiguié, 41.
- Coffee** beans; Boric acid in ——. 463.  
Boric acid in ——. W. Partridge, 401.  
extracts; Caffeine content of — and their physiological action. H. Jesser, 237.  
malt and grain —; Maltol reaction for distinguishing between. T. Merl, 93.  
nut tree seed oil; Kentucky ——. C. Barkenbus and A. J. Zimmerman, 610.
- Coin**: Composition of a counterfeit ——. G. C. Matthews, 639.
- Coins**: Examination of counterfeit ——. 232.
- Cold Storage** eggs; Ammonia content of ——. H. C. Lythzoe, 596.
- Coliform** organisms in water; High and low ratio types of ——. 117.
- Colliery By-Products**: Pollution of a river with ——. Mawston v. Pease and Partners. (Legal Notes), 475.
- Colloid** solutions; Use of the analytic quartz lamp in testing ——. 710.
- Colloid Chemistry**: Practical ——. (Review), W. Ostwald, 174.
- Colocynth** pulp; Adulteration of ——. (Legal Notes), 342.
- Colorimeter**: A simple ——. R. C. Frederick, 469.  
correction curves; Note on ——. S. L. Wright, junr., 97.  
Duboscq — for determining hydrogen ions in blood. J. F. McClendon, S. Russell and E. Tracy, 43.  
for determining the colour of flour. 445.  
Trichromatic — suitable for standardisation work. J. Guild, 50.
- Colour** of flour; A numerical expression for ——. D. W. Kent-Jones and C. W. Herd, 443.
- Colouring** materials for foods; Arsenic, lead, etc. in ——. 503, 529.  
materials for foods; Sub-Committee on ——. 503, 529.

- Colouring Matter** in beeswax; Origin of — and composition of propolis. G. F. Jaubert, 418.  
of sandal wood; Detection of dyeing with —. L. Soep, 696.
- Colouring Matters: Artificial Organic** —. (Review), H. E. Fierz-David, 372.
- Colours:** Distribution of arsenic among —. 219.  
in food. U.S.A. Food Inspection Decision, No. 209, 547.  
in foodstuffs; Detection of prohibited vegetable and coal tar —. J. R. Nicholls, 585.
- Combustion:** Flame and — in Gases. (Review), W. A. Bone and D. T. A. Townend, 734.  
method for determining bromine in organic compounds; Modified —. F. L. Smith, 357.
- Compounds:** Organic —. *See Organic Compounds.*
- Condensed Milk:** fat in —; Determination of. 406.  
Ministry of Health Regulations. 537.  
sucrose in sweetened —; Polarimetric determination of. H. D. Richmond, 525.  
Sugars in — determined by chloramine and polarimetric methods. 688.  
Sweetened —. U.S.A. Food Inspection Decision No. 207. 547.  
total solids of —; Determination of. 403.
- Conductivity** method for determining carbon dioxide. L. E. Bayliss, 557.
- Connective Tissue** content of meat; Relation of — to its protein value in nutrition. H. H. Mitchell, J. R. Beadles and J. H. Kruger, 483.
- Constants:** Annual Tables of — and Numerical Data: Chemical, Physical and Technological. (Review), Vol. V. 54. Electrical, Magnetic, Electro-chemical, Engineering and Metallurgical. 175.  
Clerget-invertase hydrolysis — of sucrose and raffinose. H. S. Paine and R. T. Balch, 350.  
of Fatty Oils; Relations between the —. (Review), J. Lund, 438.  
Physical — of essential oils. 530.  
Physical and Chemical —. (Review), G. W. C. Kaye and T. H. Laby, 53.
- Copper:** Determination of —. G. Spacu and J. Dick, 494.  
in presence of oxyquinoline; Acidimetric determination of —. F. L. Hahn and E. Hartleb, 495.  
Industrial contamination of food with —. C. G. King and G. Etzel, 723.  
Volumetric method for —. D. Köszei, 250.
- Copying Ink** pencils; Strokes made with —. 582.
- Corn** cockle; Feeding experiments with —. A. Smetham, 273.  
starch; Hydrolysis of — by commercial pancreatin. J. H. Walton and H. R. Dittmar, 42.
- Cornflour:** The term " —." 75.
- Correction** curves; Note on colorimeter —. S. L. Wright, Junr., 97.
- Cosmetics:** Perfumes, — and Soaps, with Especial Reference to Synthetics. Vol. II. (Review), W. A. Poucher, 109.
- Cotton:** Analysis of —. Rate of oxycellulose formation. D. A. Clibbens and B. P. Ridge, 361.
- Coumarin:** Microchemistry of —. C. van Zijp, 657.
- Counterfeit** coin; Composition of a —. G. C. Matthews, 639.
- Cranberries:** Discoloration of canned —. F. W. Morse, 548.
- Cranberry:** Non-volatile acids of the —. E. K. Nelson, 418.
- Cream:** Butter fat in —. 703.  
Evaluation of acid —. M. A. Dichno and O. M. Briskin, 235.  
hydrogen ion concentration of milk, whey and —; Colorimetric determination of. P. F. Sharp and T. J. McInerney, 36.
- Cream Ices** and ice cream. 704.
- Creams:** chocolate-coated —; Sugar-tolerant yeasts in. M. B. Church, H. S. Paine and J. Hamilton, 295.  
chocolate-coated fondant —; Prevention of "bursting" in. H. S. Paine, V. Birchner and J. Hamilton, 295.
- Cresol:** carbolic acid in commercial —; Detection of. A. H. Ware, 483.
- Cresols:** Bromination of —. Y. Oshima and T. Takahashi, 727.  
New specific tests for distinguishing carbolic acid, the — and certain other phenols. A. H. Ware, 335.
- p*-**Cresol:** New method of separating — from its isomerides and a study of its boiling point. H. D. Gibbs, 301.
- Crocein Acid:** Separation of Schäffer, R and G acids and — and their arylamine salts. R. B. Forster and C. M. Keyworth, 169.
- Cruciferous** seeds and oil cakes; Acridness and toxicity of —. G. Jørgensen, 44.
- Cupric Sulphide:** Solubility of — in alkali sulphides in presence of sulpharsenates. C. Davies and A. D. Monro, 659.
- Cuprous Oxide** produced in sugar analysis; Determination of —. C. S. Bisson and J. G. Sewell, 289.
- Curing** of meat; Use of sodium nitrite in the —. R. D. Kerr, C. T. N. Marsh, W. F. Schroeder and E. A. Boyer, 37.
- Cyanates:** Determination of —, with an application to potassium cyanate. J. Leboucq, 489.
- Cyanic Acid:** Colour test for —. W. R. Fearon, 46.
- Cyanide:** Determination of lead as —. S. Grundt, 559.
- Cystine:** Colorimetric determination of glutathione and —. G. Hunter and B. A. Eagles, 292.

**Cystine**—*continued*.

Decomposition of free and combined —, with special reference to certain effects produced by heating fish flesh. L. J. Almy, 718.

**Cytosine Nucleotide** : Isolation of guanine nucleotide and — from tea leaves. H. O. Calvery, 354.

**D**

**Damsons** : Composition of fresh —. 351.

**Deflocculating** power of soaps ; Comparison of the — by carbon black test. R. M. Chapin, 102.

**Dehydrating** agents for gases ; Use of anhydrous perchlorates as —. G. F. Smith, 307.

**Dehydration** of volatile liquids ; Apparatus for —. P. Loriette, 107.

**Denigès** method for colorimetric determination of phosphates in potable waters. R. Danet, 427.

**Deodorisers** : Perspiration —. 531.

**Department of Scientific and Industrial Research** : Determination of free lime in hydraulic cement. Building Research Paper No. 4. F. L. Brady and F. J. McConnell, 344.

**Dermatitis** : Sugar —. (Legal Notes), 283.

**Devarda's** method ; Inaccuracies of the — when applied to plant materials. E. R. Ranker, 556.

**Dextrose** : Oxidation of — by chloramine and iodide. 670.

**Dicarbethoxy-Guanidine** : 248.

**Diethylphthalate** in ethyl alcohol ; Detection of —. 101.

**Diets** rich in fat ; Growth experiments on —. H. Levine and A. H. Smith, 293.

**Differential** potentiometric titration ; Method for —. D. A. MacInnes and P. T. Jones, 50.

**Digallic Acid** as a reagent for earth acids. W. R. Schoeller, 702.

**Digestion** : Effect of halogen salts on peptic —. W. M. Clifford, 550.

Influence of peptic — in determining total carbohydrates in cereal products. B. G. Hartmann and F. Hillig, 160.

**Digitalis Purpurea** : Oil from seeds of —. I. S. Mellanoff, 718.

**Digitonin** : Properties, isolation and quantitative determination of —. I. S. Mellanoff, 550.

**Dihydrostosterol** in plant fats ; Distribution of —. R. J. Anderson, F. B. Nabenhauer and R. L. Shriner, 164.

**Dinitrocresol** in foodstuffs ; Detection of —. 585.

**Diphenylamine** as quantitative reagent for zinc. W. H. Cone and L. L. Cady, 730.

**Diphenylamine Sulphate** : Spectrophotometric determination of nitrites and nitrates by —. E. Tassilly and R. Savoie, 107.

**Diphenylcarbazine** : Detection of magnesium by —. F. Feigl, 730.

**Dirt** in milk. 409, 702.

**Disinfectants** : Testing of — by the Rideal-Walker method. Q. Moore, 98.

**Disodium Phosphate** in process cheese ; Determination of added —. I. M. Williams, 648.

**Distillation** : fractional-; Separation of individual saturated and unsaturated hydrocarbons in coal gas by —. P. E. Grey and W. P. Yant, 359.

**Dorton Spa** and its water. C. A. Mitchell, 174.

**Dripping** : Meaning of the term " —." (Legal Notes), 592.

**Dropping-Cathode** : Electrolytic analysis with the mercury —. J. Heyrovsky, 731.

**Drugs** : analytic quartz lamp for testing — ; Use of. P. W. Danckwortt and E. Pfau, 707.

Effect of polarised light on the pharmacological properties of some —. D. I. Macht and W. T. Anderson, junr. 602.

**Duboscq** colorimeter ; Determination of hydrogen ions in blood by means of —. J. F. McClendon, S. Russell and E. Tracy, 43.

**Dust** counter ; Jet —. 155.

**Dutch-Process** chocolate and cocoa. Food Inspection Decision No. 202 of U.S. Dept. of Agriculture. 88.

**Dye** : food — ; Proposed new. H. Johnson and P. Staub, 353.

**Dyeing** : Chemistry of —. (Review), J. K. Wood, 255.

of Textile Fibres. (Review), R. S. Horsfall and L. G. Lawrie, 664.

with the colouring matter of sandal wood ; Detection of —. L. Soep, 696.

**Dyestuffs** and Coal-Tar Products. (Review), Beagall, Challenger, Martin and Sand, 256. Behaviour of different starches towards iodine and —. Part II. J. Huebner and K. Venkataraman, 37.

Reactions of — with nitrous acid. J. V. Dubsy and A. Okáč, 491.

Testing of — for fastness to washing. S. R. Trotman, 497.

**E**

**Earth** acids ; Digallic acid as a reagent for —. W. R. Schoeller, 702.

**Eberth's Bacillus** : Action of neon light on —. 98.

**Edible Oils and Fats** : *See Oils* : edible, and *Fats* : edible.

**Effluents** : analysis of waters, sewages and — ; Critical review of methods of. J. W. H. Johnson, 128.

**Egg** alimentary pastes. 547. noodles. 547.

preserving ; Effect of common salt on lime water used for —. J. Miller, 457.

substitute ; Adulteration and misbranding of —. (Legal Notes), 152.

substitute powder, 532. (Legal Notes), 536. yolk ; Determination of benzoic acid in —.

E. Waltzinger, 90.

**Egg**—*continued.*

- yolk preserved with glycerin; Analysis of ——. T. Cockburn and M. McF. Love, 143.
- yolks; Effect of waste pimento pepper on the colour of ——. W. A. Morgan and J. G. Woodroof, 653.
- Eggs**: Ammonia content of cold-storage ——. H. C. Lythzoe, 596.
- Freshness of ——. E. Dinslage and O. Windhausen, 90.
- Egypt**: marking ink in ——. Alleged use of. C. A. Mitchell, 27.
- Egyptian Materials**; Ancient ——. (Review), A. Lucas, 59.
- Elaïdic Acid** and oleic acid in presence of each other; Determination of ——. J. P. K. Van der Steur, 609.
- Electrical** resistance of wood as a measure of its moisture content. A. J. Stamm, 732.
- Electricity**: Constants and Numerical Data; Annual Tables of ——. (Review), 175.
- Electrochemistry**: Constants and Numerical Data; Annual Tables of ——. (Review), 175.
- Electrode**: Quinhydrone —— as means of determining the hydrogen ion concentration of wine. R. Dietzel and E. Rosenbaum, 600.
- Electrolytic** analysis with the mercury dropping cathode. J. Heyrovsky, 731.
- determination of nickel in the presence of iron; Two sources of error in the ——. C. Marie and J. Berthelot, 48.
- iron; Determination of the titre of potassium permanganate solution by means of ——. L. Moser and W. Schöninger, 250.
- method for determining sodium and potassium. J. L. Stoddard, 660.
- Electrometric** determination of zinc by ferrocyanide. G. G. Reisaus, 106.
- Emulsifier**: Simple laboratory ——. R. C. Smith, 366.
- Emulsion**: iodine value in aqueous ——. Determination of. J. Fialkow, 246.
- Engineering**: Constants and Numerical Data; Annual Tables of ——. (Review), 175.
- Engravings**: Cleaning of ——. 81.
- Enzyme** uricase; Note on the ——. H. O. Calvery, 422.
- Enzymes** of milk; Pathogenic bacteria and mixed ——. C. Gorini, 486.
- of pineapples; Effect of ethylene on ——. L. O. Regeimbal and R. B. Harvey, 354.
- Production of certain —— by *Bacterium pruni*. S. L. Jodidi, 722.
- Epinephrine**: New colour reaction for ——. 41.
- Ergosterol**: vitamin *D* from ——. Photochemical production of. O. Rosenheim and T. A. Webster, 652.
- Ergot** alkaloids; Colour test for ——. N. Evers, 601.
- of rye; Identification and determination of ——. A. Tschirch, 238.
- Essential Oil** of mustard in mustard flour; Formation and determination of ——. Astric and M. Mousseron, 353.

**Essential Oil**—*continued.*

- Sub-Committee of the Standing Committee on Uniformity of Analytical Methods: Report on the estimation of cineole in ——. 276.
- Physical Constants. 530.
- Essential Oils**: aldehydes in ——. General method of determining, with particular reference to the determination of citronellal in Java citronella oil and citral in lemon oil. C. T. Bennett and M. S. Salamon, 693.
- cineole in ——. Estimation of. 276.
- Germicidal value of Australian —— and their pure constituents. 295.
- The ——. (Review), H. Finnemore, 111.
- Esters**: ethyl —— prepared from hydnocarpus oil; Analytical values of. 33.
- Etching** and polishing lead, tin, and some of their alloys for microscopic examination. J. R. Vilella and D. Beregekoff, 732.
- Ethers**: Reactions of anaesthetic —— with potassium hydroxide and with mercury, and the test for foreign odours. E. Mallinckrodt, Junr., 718.
- Ethyl Alcohol**: Isopropyl alcohol as substitute for —— in determining the acid values of fats and oils. H. A. Schuette and M. P. Smith, 101.
- methanol in ——. Determination of. F. S. Mortimer, 482.
- Ethyl Esters** of hydnocarpus oil; Analytical values of, 33.
- Ethyl Iodide** in air, water and blood; Method for determining minute amounts of ——. I. Starr, Junr. and C. J. Gamble, 168.
- Ethyl Phthalate** test. H. Wales, 161.
- Ethylene**: Action of —— on pure starch. H. E. Rea and R. D. Mullinix, 597.
- Effect of —— on the enzymes of pineapples. L. O. Regeimbal and R. B. Harvey, 354.
- Ignition point of —— in nitrous oxide. 614.
- Eucalyptus Oil**: cineole in ——. Estimation of. 276.
- Eugenol**: New reaction for ——. C. J. Enklaar, 299.

## F

- Fastness** to washing; Testing of dyestuffs for ——. S. R. Trotman, 497.
- Fat**: Boa constrictor ——. R. H. Kerr, 610.
- Butter ——. See **Butter Fat**.
- Formation of —— by yeast. 541.
- Growth experiments on diets rich in ——. H. Levine and A. H. Smith, 293.
- Growth-promoting property of irradiated —— in the diet, of direct irradiation and of cod liver oil. H. Goldblatt and A. R. Moritz, 97.
- in Cheshire cheese. (Legal Notes), 151.
- in condensed milk; Determination of ——. 406.
- in malted milk; Determination of ——. E. S. Rose, 92.
- Milk ——. See **Milk Fat**.
- Fat-Soluble** vitamins. See **Vitamins**.

- Fats** : acid values of oils and —; Isopropyl alcohol as substitute for ethyl alcohol in determining. H. A. Schuette and M. P. Smith, 101.  
 edible-; Solidification points of —. T. Meyer, 236.  
 Edible Oils and —: Their Substitutes and Adulterants. (Review), G. D. Elsdon, 61.  
 fatty acids in —; Quantitative determination of the water-insoluble, higher saturated. S. H. Bertram, 489.  
 plant —; Distribution of dihydrostosterol in. R. J. Anderson, F. B. Nabenhauer and R. L. Shriner, 164.  
 Reaction of chloramine with —. B. M. Margosches and M. Frischer, 609.
- Fatty Acids** : Errors in analysis of alkaloids caused by presence of soap or —. H. R. Watkins and S. Palkin, 290.  
 in fats and fatty acids; Quantitative determination of the water-insoluble, higher, saturated —. S. H. Bertram, 489.  
 of cod liver oil. Y. Toyama, 245.  
 of maize starch; Removal of combined —. T. C. Taylor and J. H. Wertz, 480.  
 Separation of —. A. H. Lewis, 245.  
 Titre of —. 453.  
 X-ray investigation of the polymorphism of —. G. M. de Boer, 368.
- Fatty Mixtures** : castor oil in —; Detection of. Vizen and Guillot, 161.
- Fatty Oil** of sweet clover seed. B. A. Dunbar and C. F. Wells, 47.
- Fatty Oils** : Constants of —; Relation between the. (Review), J. Lund, 438.
- Faught Test** for acetone. H. J. Schaeffer, 169.
- Fearon's Colour Reaction** : Nature of — and its non-specificity for vitamin A. O. Rosenheim and T. A. Webster, 242.
- Feathers** : Cholesterol content of hair, wool and —. H. C. Eckstein, 422.
- Federated Malay States** : Report of the Chemist for the year 1925. R. W. Blair, 158; for the year 1926, 593.
- Feeding** experiments with corn cockle. A. Smetham, 273.
- Fermentation** : alcoholic —; Action of certain organic substances on. E. Mameli, 99.  
 at low temperatures; Studies of commercial sauerkraut with special reference to changes in the bacterial flora during —. L. A. Priem, W. H. Peterson and E. B. Fred, 356.
- Fermenting** mixtures; Determination of carbon dioxide in —. A. L. Raymond and H. M. Winegarden, 557.
- Ferrocyanide** : Electrometric determination of zinc by —. G. G. Reisaus, 106.
- Ferrous Iron** in silicates; Determination of —. L. A. Sarver, 496.
- Ferrous Sulphate** : destruction of vitamin A by —; Separation from oils of a substance which inhibits the. H. W. Estill and E. V. McCollum, 720.  
 Dried —. J. F. Liversege, 239.
- Fertilisers** : Application of Ridsdale's modification of Pemberton's method for volumetric determination of phosphoric anhydride to —. A. M. Cameron and W. T. Dow, 576.  
 Artificial —. (Review), P. Parrish and A. Ogilvie, 436.
- Fibres** : Textile —; Dyeing of. (Review), R. S. Horsfall and L. G. Lawrie, 664.  
 textile —; X-ray examination and structure of. G. R. Levi, 615.
- Films** responsible for oxidation tints on metals. T. R. Evans, 662.
- Filtration** : Substitution of centrifugation for — and calcination in the gravimetric determination of tin and lead in their alloys. M. Foà, 364.
- Fish** flesh; Decomposition of free and combined cystine, with special reference to certain effects produced by heating —. L. H. Almy, 718.  
 Formaldehyde in —. D. B. Dill and P. B. Clark, 222.
- Fish Oils** : Behaviour of — with uranium nitrate and pyrogallol. W. H. Dickhart, 725.
- Fishes** : death of — in polluted waters; Importance of the various factors responsible for. H. S. Pruthi, 427.
- Flaked Maize** : Composition of —. H. E. Woodman and J. Stewart, 244.
- Flame** and Combustion in Gases. (Review), W. A. Bone and D. T. A. Townend, 734.
- Flash Points** of blends of lubricating oils; Calculation of —. E. W. Thiele, 307.
- Flavour** in grapes and grape juices; Distribution of volatile —. J. W. Sale and J. B. Wilson, 39.
- Flesh** : putrefaction of —; Chemical and physico-chemical changes accompanying the beginning of. J. Tillmans, P. Hirsch and A. Kuhn, 289.
- Flies** : Effect of poisons on the larvae of —. K. Feist, 243.
- Flint** surfaces; Microscopical examination of —. J. R. Moir, 367.
- "Flit"** : (cockroach control); Analysis of —. 538.
- Flocculation** of troublesome precipitates in analysis. W. Clayton, 76.
- Flora** : Bacterial — of the market oyster. C. Eliot, 98.
- Flour** : colour of —; Numerical expression for the. D. W. Kent-Jones and C. W. Herd, 443.  
 containing acid calcium phosphate. (Legal Notes), 30.  
 Rice — in shredded suet. (Legal Notes), 281.  
 treatment of — with chemical substances; Report of Departmental Committee on. (Ministry of Health), 226.  
 U.S. Food Inspection Decision No. 204. 348.  
 washing of gluten from —; Some observations on the. D. W. Kent-Jones and C. W. Herd, 439.

- Flours:** Colour reactions of ——. A. Piedallu, 38.  
Differentiation of — by the iodine absorption and the rapidity of sedimentation. N. A. Trofimuk, 89.
- Fluorides:** Determination of soluble ——. F. L. Hahn, 106.
- Fly salts;** Analysis of ——. 538.
- Foam-producing materials;** Value of saponins as ——. 42.
- Food:** bacteriological examination of water and —; Recent advances in. W. G. Savage, 117.  
Cod liver oil as —. Observations on the existence of vitamin E. V. E. Nelson, R. L. Jones, G. Adams and L. T. Anderegg, 604.  
colouring materials; Arsenic, lead, etc., in ——. 503.  
Colouring Matters Sub-Committee Notice, 503, 529.  
Colours in —. U.S.A. Food Inspection Decision No. 209. 547.  
dye; Proposed new —. H. Johnson and P. Staub, 353.  
Glass contamination of ——. 703.  
Industrial contamination of — with copper. C. G. King and G. Etzel, 723.  
Inspection Decisions of U.S. Dept. of Agriculture. *See* **United States of America**.  
poisoning. 122.

by certain organisms of the salmonella group. S. R. Damon and L. W. Leiter, 167.
- Ink**: marking — in ancient Egypt; Alleged use of. C. A. Mitchell, 27.  
printing-; Arsenic in —. T. H. Barry, 217.  
Strokes made with artist's black —, 583;  
with printing —, 583; with stamping —, 582; with writing —, 583.
- Inks**: Differentiation between strokes made with graphite pencils and iron gall —. 581.  
printing-; Arsenic in —. R. S. Morrell and C. I. Smyth, 339.  
Printing-; Chemistry and Manufacture of Writing and —. (Review), W. B. Gamble, 313.  
Writing-; Chemistry and Manufacture of Printing and —. (Review), W. B. Gamble, 313.
- Inorganic** analysis; Abstracts: 47, 104, 171, 248, 302, 363, 430, 492, 558, 611, 657, 729.  
Chemical Symbols and other useful Chemical Data. (Review), E. R. Darling, 502.  
Chemistry: A Comprehensive Treatise on Theoretical and —. Vol. VII. (Review), J. W. Mellor, 309.

**Inorganic**—*continued.*

Chemistry; Course of ——. (Review), F. Swarts, 369.

**Insect Powder:** Adulteration and misbranding of ——. (Legal Notes), 152.

**Insecticides:** Analysis of ——. 538.  
nicotine in ——. Determination of. 25.

**Insulin:** Purification and properties of ——. F. Dickens, E. C. Dodds, W. Lawson and N. F. Maclagan, 553.

**Intoxication:** Alcoholic concentration in urine as a test of ——. G. Carter, 615.

**Iodates:** Gasometric micro method for determining sulphates and ——, and its application to determination of total base in blood serum. D. D. van Slyke, A. Hiller and K. C. Berthelsen, 631.

**Iodide** in presence of chloride; Argentometric determination of ——. I. M. Kolthoff, 305.

**Iodides:** Determination of soluble ——. J. F. Spencer and M. I. Smith, 270.

**Iodimetric** determination of the antimonite ion. A. Travers and Joutot, 303.

**Iodimetric** determination of vanadium. J. B. Ramsey, 432.

**Iodimetric** titrations; Potassium bi-iodate as a standard substance in alkalimetric and ——. I. M. Kolthoff and L. H. van Berk, 48.

**Iodine** absorption; Differentiation of flours by the —— and by rapidity of sedimentation. N. A. Trofimuk, 89.

as a differential reagent between ammonium salts, amines and amides. J. A. Sanchez, 363.

Behaviour of different starches towards dye-stuffs and ——. Part II. J. Huebner and K. Venkataraman, 37.

in soils; Determination of ——. 539.

**Iodine Value** in aqueous emulsion; Determination of ——. J. Fialkow, 246.

of a commercial California sardine oil. M. S. Dunn and B. S. Hollombe, 483.

of paprika oil. L. C. Mitchell, 161.

**Iodophile** reaction. Histochemical reaction of lecithins. M. Romieu, 421.

**Ionic** migration; Separation of radium and mesothorium I from barium by ——. J. Kendall, E. R. Jette and W. West, 106.

**Ionimetric Acidity:** Measurement of the —— by the inversion of sucrose. Application to complex media. V. Vincent, 249.

**Irish** butter; Constants of ——. (Legal Notes), 411.

moss mucilage and a method for its determination. P. Haas and B. Russell-Wells, 265.

**Iron** alloys; Work for Research Committee on ——. 414.

content of animal tissues. C. A. Elvehjem and W. H. Peterson, 650.

content of milk; Effects of diet on the ——. C. A. Elvehjem, R. C. Herrin and E. B. Hart, 166.

Dried sulphate of ——. 223; J. F. Liverseege, 239.

**Iron**—*continued.*

electrolytic; Determination of the titre of potassium permanganate solution by means of ——. L. Moser and W. Schöniger, 250.

ferrous —— in silicates; Determination of. L. A. Sarver, 496.

graphite and combined carbon in pig ——; Determination of. W. A. Burford and W. Bader, 104.

in blood; Micro-determination of ——. F. H. Smirk, 291.

in nutrition. III. Effects of diet on iron content of milk. C. A. Elvehjem, R. C. Herrin and E. B. Hart, 166.

in tissues; Quantitative determination of ——. R. P. Kennedy, 603.

molybdenum in steel and ——; Simplified determination of. E. Färber, 303.

museum objects; Cleaning and restoration of ——. 82.

nickel in presence of ——; Two sources of error in determining. C. Marie and J. Berthelot, 48.

-pills. 224. J. F. Liverseege, 239.

Thioglycolic acid as colour test for ——. E. Lyons, 613.

fat; Growth-promoting property of —— in the diet, of direct irradiation and of cod liver oil. H. Goldblatt and A. R. Moritz, 97.

milk; Vitamin A potency of ——. G. C. Supple and O. D. Dow, 720.

**Irradiation:** Growth-promoting property of irradiated fat in the diet, of direct —— and of cod liver oil. H. Goldblatt and A. R. Moritz, 97.

Influence of —— upon oxidation products of cholesterol. F. W. Schlutz, M. R. Ziegler and M. Morse, 423.

Ultra-violet ——. See **Ultra-Violet.**

**Isaac** method for colorimetric determination of silicon in tissues. J. H. Foulger, 240.

**Iso-Electric** precipitation; Determination of casein in milk by an approximately ——. H. C. Waterman, 548.

**Isomeric** toluidines; Analysis of mixtures of the ——. H. H. Evers and N. Strafford, 302.

**Isomerides:** Separation of *p*-cresol from its ——. H. D. Gibbs, 301.

**Isopropyl Alcohol** as substitute for ethyl alcohol in determining the acid values of fats and oils. H. A. Schuette and M. P. Smith, 101.  
in presence of acetone; Determination of ——. H. A. Cassar, 725.

## J

**Jam:** Apple matter in raspberry ——. A question of warranty. (Legal Notes) 533.

Raspberry —— deficient in raspberry fruit. (Legal Notes), 283.

Raspberry ——, with declaration of added fruit juice. (Legal Notes), 535.

**Jams:** apple in —; Detection of. C. F. Muttelet, 160.  
 "fruit and apple" —; Analysis of. C. F. Muttelet, 598.

**Japanese acid clay** (Japanese Fuller's earth); Acidity of —. K. Kobayashi, 559.  
 acid clays; Colour reaction of the — with liver oils and vitamin A on the market. K. Kobayashi and K. Yamamoto, 553.

**Java citronella oil;** Determination of citronellal in —. C. T. Bennett and M. S. Salamon, 693.

**Juice:** fruit-; Raspberry jam, with declaration of added —. (Legal Notes), 535.  
 grape-; Distribution of volatile flavour in grapes and —. J. W. Sale and J. B. Wilson, 39.  
 Lemon —. See **Lemon Juice**.

## K

**Kastle** reaction for saccharin. 378.

**Keller** method of determining nicotine in tobacco, 16; modification of —, 23.

**Kentucky coffee nut tree seed oil.** C. Barkenbus and A. J. Zimmerman, 610.

**Ketones:** carbonyl in aldehydes and —; Determination of. G. W. Ellis, 428.

**Kingston-upon-Hull:** City and County of —. Report of the Public Analyst, A. R. Tankard, for the year 1926, 702.

**Kipper:** Formaldehyde in —, 394.

**Kissling** method of determining nicotine in tobacco, 19.

## L

**Laboratory Companion;** Standard Manual of Brewing and Malting and —. (Review). J. Ross-Mackenzie, 370.  
 emulsifier; Simple —. R. C. Smith, 366.

**Lacquer:** pigments in —; Separation and analysis of. F. H. Hopkins, 103.  
 volatile solvents and thinners of —; Separation and analysis of. R. M. Carter, 102.

**Lactic Acid:** Determination of —. T. E. Friedemann, M. Cotonio and P. A. Shaffer, 418.  
 in blood; Determination of —. E. Ronzoni and Z. Wallen-Lawrence, 603.  
 in presence of other organic acids; Detection of —. F. G. Germuth, 610.

**Lactose** in milk serum; Determination of —, 680.  
 Oxidation of — by chloramine and iodide, 671.

**Laevulose:** Oxidation of — by means of chloramine and iodide, 674.

**Lamp:** analytic quartz — for testing drugs; Use of. P. W. Danckwortt and E. Pfau, 707.

**Lancaster:** Report of County Analyst for the year 1925. W. C. Williams, 28; for 1926, G. D. Elsdon, 409.

**Lard:** Benzoated —, 79.

**Larvae** of flies; Effect of poisons on —. K. Feist, 243.

**Laundry Chemistry.** (Review), A. Harvey, 62.

**Lead:** antimony in —; Determination of traces of, 565.  
 arsenic in —; Determination of traces of, 566.  
 bismuth in —. Determination of traces of, 571.  
 Determination of — as cyanide. S. Grundt, 559.  
 impurities in —; New processes for the determination of traces of certain. B. S. Evans, 565.  
 in food colouring materials, 503, 529.  
 in fruit as a result of treatment with protecting agents. L. Lendrich and F. Mayer, 237.  
 metallic — in metallurgical products and pigments; Determination of. D. H. McIntosh, 104.  
 museum objects made of —. Preservative of, 82.  
 Polishing and etching —, tin, and some of their alloys for microscopic examination. J. R. Vilella and D. Beregekoff, 732.  
 poisoning; Mechanism and incidence of industrial —, 53.  
 Rapid method for separating silver and —. H. Brintzinger, 363.  
 Substitution of centrifugation for filtration and calcination in the gravimetric determination of tin and — and their alloys. M. Foà, 364.  
 sulphur in —; Determination of traces of, 571.  
 tin in —; Determination of traces of, 568.

**Lead Chloride** for clearing organic liquids in toxicological research for alkaloids. J. Magnin, 356.

**Lead Tetra-Ethyl:** Reactions of —. O. H. Browne and E. E. Reid, 299.

**Leather** analysis. G. Powarmin and I. Schischiroff, 47.  
 Bibliography of Standard Method of Analysis for — and Tanning Materials, 83.  
 Nitrogen in —. R. W. Frey, 47. L. Balderston, 491.

**Lecithin:** Histochemical reaction of —. Iodophile reaction. M. Romieu, 421.

**Legal Cases:** Bowker *v.* Woodroffe. Bowker *v.* Premier Drug Co. Ltd. (Standard for meat and malt wine), 80.  
 Bowker *v.* Woodroffe. (Extract of meat and malt wine), 341.  
 Mawston *v.* Pease and Partners. (Pollution of a river with colliery by-products), 475.  
 Robinson *v.* Sturdy. (Prussic acid in linseed meal), 30.

**Legal Notes:** 29, 80, 151, 224, 281, 340, 411, 474, 533, 592, 642, 705.

**Leicester:** Report of the City Analyst for the year 1926. S. F. Burford, 592.

**Lemon juice;** Antiscorbatic fraction of —. V. S. S. Zilva, 552.

- Lemon**—*continued*.  
 juice; Precipitation of the antiscorbutic factor from ——. S. S. Zilva, 425.  
 juice; Solubilities of the antiscorbutic factor present in ——. E. B. Vedder and W. E. Lawson, 424.  
 Non-volatile acids of the ——. E. K. Nelson, 418.
- Lemon Cheese**: Queensland regulations for ——. 31.
- Lemon Oil**: citral in ——. Determination of. C. T. Bennett and M. S. Salamon, 693.
- Leprosy**: Analytical values of ethyl esters prepared from hydnocarpus oil for treatment of ——. 33.
- Lettuce**: vitamin *A* content of head and leaf ——. Relative. M. Dye, O. C. Medlock and J. W. Crist, 552.
- Leys** reaction for saccharin. 381.
- Light**: Action of neon — on bacteria. A. Philibert and J. Risler, 97.  
 Effect of heat and — on the formation of vitamin *A* in plant tissues. K. H. Coward, 355.
- Lighting** gas; Direct determination of nitrogen in heating and ——. W. Steuer, 47.
- Lime** in hydraulic cement; Determination of free ——. Building Research Paper No. 4. F. L. Brady and F. J. McConnell, 344.
- Lime Water** used for egg preserving; Effect of common salt on ——. J. Miller, 457.
- Linolenic Bromide**: Reduction of linolic and — and rebromination of the free acids. F. L. Smith and A. P. West, 359.
- Linolenic Hexabromide**: Salts of ——. P. R. Almoradic, 656.  
 Salts of — from lumbang oil. G. A. Imperial and A. P. West, 247.
- $\alpha$ -Linolic Acid Tetrabromide**: Salts of ——. A. T. Oreta and A. P. West, 608.
- Linolic Bromide**: Reduction of linolenic and — and rebromination of the free acids. F. L. Smith and A. P. West, 359.
- Linolic Tetrabromides** from Philippine lumbang oil; An odiferous oil and two new ——. S. Santiago and A. P. West, 300.
- Linseed** meal; Prussic acid in ——. (Legal Notes), 30.
- Linseed Oil**: Fractionation of — at 293° C. H. D. Chataway, 490.
- Lipoid-Protein Ratio**: Relation of the magnesium in the ash and the — to the quality of wheats. B. Sullivan and C. Near, 244.
- Liquids**: carbon in dilute organic —; Determination of. O. Kauffmann-Cosla, 45.  
 dehydration of volatile —; Apparatus for. P. Loriette, 107.  
 organic-; Lead chloride for clearing — in toxicological research for alkaloids. J. Magnin, 356.
- Liver Oils**: Colour reaction of the Japanese acid clays with — and vitamin *A* on the market. K. Kobayashi and K. Yamamoto, 553.
- Lobeline**: Action of —. F. R. Curtis and S. Wright, 53.
- Loganberry**: Non-volatile acids of the ——. E. K. Nelson, 418.
- Loganberries**: Bulging cans of ——. W. D. Bigelow, 638.  
 Canned ——. 478.
- London**: City of ——. Report of the Medical Officer for the year 1926. W. J. Howarth, 477.
- Low-Temperature** thermostat; Automatic ——. O. Maas and W. H. Barnes, 252.
- Lubricants**: Lubrication and ——. (Review), L. Archbutt and R. M. Deeley, 562.
- Lubricating** oils; Calculation of flash points of blends of ——. E. W. Thiele, 307.
- Lubrication** and Lubricants. (Review), L. Archbutt and R. M. Deeley, 562.
- Lumbang Oil**: An odiferous oil and two new linolic tetrabromides from Philippine ——. S. Santiago and A. P. West, 300.  
 Salts of linolenic hexabromide from ——. G. A. Imperial and A. P. West, 247.

## M

- Madras**: Food standards for ——. H. Hawley, 156.  
 Government of ——. Report of the Chemical Examiner, C. Newcomb, for the year 1926, 538.
- Magnesia** hardness in water; Determination of ——. W. R. Atkin and D. Burton, 654.
- Magnesium**: Colour reaction for ——. W. J. Petraschenj, 559.  
 Detection of — by diphenylcarbazide. F. Feigl, 730.  
 Determination of — by means of oxyquinoline. R. Berg, 431.  
 in industrial waters; Volumetric method for determining —. C. Belcot, 45.  
 in magnesium chloride solutions; Volumetric determination of —. J. E. W. Rhodes, 365.  
 in presence of oxyquinoline; Acidimetric determination of —. F. L. Hahn, and E. Hartleb, 495.  
 Oxyquinoline as reagent for zinc, aluminium and —. F. L. Hahn and K. Vieweg, 431.  
 Relation of the — in the ash and the lipid-protein ratio to the quality of wheats. B. Sullivan and C. Near, 244.  
 Schlagdenhaufen's reaction for —. A. Hamy, 251.  
 Specific colour reaction for — and a colorimetric method for determining traces of —. I. M. Kolthoff, 430.
- Magnesium Ammonium Arsenate**: Determination of arsenic pentoxide as —. W. M. McNabb, 494.
- Magnesium Chloride** solutions; Volumetric determination of magnesium in —. J. E. W. Rhodes, 365.
- Magnetism**: Constants and Numerical Data; Annual Tables of —. (Review), 175.
- Maize**: Composition of flaked —. H. E. Woodman and J. Stewart, 244.

- Maize**—*continued*.  
 starch; Glycogen and —. 541.  
 starch; Hydrolysis of — by commercial pancreatin. J. H. Walton and H. R. Dittmar, 42.  
 starch; Properties of —. Removal of combined fatty acids. T. C. Taylor and J. H. Wernitz, 480.  
 wax; Composition of —. R. L. Shriner, F. P. Nabenhauer, and R. J. Anderson, 420.
- Malachite Green**: Volumetric analysis of — with titanous sulphate and titanous chloride solutions. H. Wilkinson and A. G. Tyler, 362.
- Malic Acid**: New pyrogenic reaction for tartaric, citric and —. J. A. Sanchez, 358.
- Malt** coffee and grain coffee; Maltol reaction for distinguishing between —. T. Merl, 93.  
 meat and — wine; Extract of. (Legal Notes: Bowker v. Woodroffe), 341.  
 meat and — wine; Standard for. Bowker v. Woodroffe. Bowker v. Premier (Legal Notes), 80.  
 vinegar; Occurrence of sulphur dioxide in —. H. E. Cox, 397.
- Malted milk**; Determination of fat in —. E. S. Rose, 92.
- Malting**: A Standard Manual of Brewing and — and Laboratory Companion. (Review), J. Ross-Mackenzie, 370.
- Maltol** reaction; Possibility of distinguishing between malt coffee and grain coffee by the —. T. Merl, 93.
- Manchester Yellow** in foodstuffs; Detection of —, 585.
- Manganese**: Determination of — as pyrophosphate. D. Balarew and N. Desew, 364.  
 in steel; Determination of — by the Proctor-Smith reaction in presence of phosphoric acid. B. C. Mukerjee, 689.  
 interference in the *o*-tolidine test for available chlorine. E. S. Hopkins, 496.
- Manley** figures for butter analysis; Relations of the Reichert and —. H. S. Shrewsbury, 388.
- Manures**: nitrogen-bearing chemicals added to animal or vegetable nitrogenous —; Detection and determination of. H. C. More and R. White, 298.
- Margarine**: butter fat in —; Determination of. G. D. Elsdon and P. Smith, 63.  
 Values for commercial —, 319.
- Margarines**: sorting of butters and —; Rapid method for. C. H. Manley, 67.
- Marking Ink** in Ancient Egypt; Alleged use of —. C. A. Mitchell, 27.
- Marsh Test**: Influence of insoluble matter on the —. L. Barth and R. Massy, 168.
- Martius Yellow** in foodstuffs; Detection of —, 585.
- Marzipan** and its substitutes. O. Keller, 716.  
 substitutes; Polarimetric determination of starch in —. A. Gronover and E. Wohnlich, 481.
- Massanalyse**: Theoretischen Grundlagen der —. (Review), J. M. Kolthoff, 663.
- Meal**: linseed —; Prussic acid in. (Legal Notes), 39.
- Measuring** micrometer; New —. J. H. Dowell, 51.
- Meat**: connective tissue in —; Determination of amount of. H. H. Mitchell, R. L. Zimmerman and T. S. Hamilton, 160.  
 curing of —; Use of sodium nitrite in the. R. D. Kerr, C. T. N. Marsh, W. F. Schroeder, and E. A. Boyer, 37.  
 products and meats. U.S. Food Inspection Decision No. 205, 348.  
 Relation of connective tissues content of — to its protein value in nutrition. H. H. Mitchell, J. R. Beadles, and J. H. Kruger, 483.  
 sulphur dioxide in cooked —; Determination of. 353.
- Meat and Malt Wine**: Extract of —. (Legal Notes: Bowker v. Woodroffe), 341.  
 Standard for —. Bowker v. Woodroffe. Bowker v. Premier Drug Co., Ltd. (Legal Notes), 80.
- Meats** and meat products. U.S. Food Inspection Decision No. 205, 348.
- Medical Trials**; Some Famous —. (Review), L. A. Parry, 665.
- Medical Officer of Health** for the City of London. Annual Report for the year 1926. W. J. Howarth, 477.
- Medical Research Institute, Malay States**: Report of the Chemist for the year 1925. R. W. Blair, 158.
- Membranes**: diffusion of gases and vapours through —; Apparatus for measuring. E. E. Schumacher and L. Ferguson, 253.
- Mercuric Salicylate**: mercury in —; Determination of. A. F. Murray, 163.
- Mercurimetry**: New methods for volumetric determinations. A. I. Jonsco-Matiu, 100.
- Mercury** dropping-cathode; Electrolytic analysis with the —. J. Heyrovsky, 731.  
 in commercial products; Determination of free —. H. B. Dunningcliff and K. Lal, 329.  
 in mercury salicylate; Determination of —. A. F. Murray, 163.  
 Reactions of anaesthetic ethers with potassium hydroxide and with mercury, and the test for foreign odours. E. Mallinckrodt, Junr., 718.  
 vapour; Methods for determining —. B. W. Nordlander, 357.  
 vapour; Poisoning by —. L. M. Dennis, 44.  
 vapour; Selenium sulphide—a new detector for —. B. W. Nordlander, 357.
- Mercury Fulminate**: mercury in —; Determination of. 332.
- Mesothorium I**: Separation of radium and — from barium by ionic migration. J. Kendall, E. R. Jette and W. West, 106.
- Metabolism**: Studies in pentose —. II. Micro method for determining pentoses and pentosans. G. E. Youngburg, 484.

- Metacetaldehyde** poisoning; A case of —. W. H. Willcox and C. A. Mitchell, 528.
- Metallic halides**; Reactions of rubber hydrocarbons with —. H. A. Bruson, L. B. Sebrell and W. C. Calvert, 728.
- Metallurgical products and pigments**; Determination of metallic lead in —. D. H. McIntosh, 104.
- Metallurgist's Manual**. (Review), T. G. Bramform and H. Harris, 501.
- Metallurgy**: Constants and Numerical Data; Annual Tables of —. (Review), 175.
- Metals**: New method for separating and determining — by means of *o*-oxyquinoline. R. Berg, 302.
- oxidation tints on —; Films responsible for. T. R. Evans, 662.
- Meteorological Office**: Air Ministry. Report of Advisory Committee on Atmospheric Pollution for year ending March 31st, 1926. 155.
- Methanol** in ethyl alcohol; Detection of —. 100.
- in presence of ethyl alcohol; Determination of —. F. S. Mortimer, 482.
- tests for —; Comparison of sensitiveness of. J. O. Wright, 482.
- Methoxytriphenylcarbinols** as one-colour indicators; Use of —. I. M. Kolthoff, 430.
- Methylethyl Ketone** in presence of secondary butyl alcohol; Determination of —. H. A. Cassar, 725.
- Meyer Apparatus**: Improved — for vapour-density determinations. A. Tian, 107.
- Micro-Chemistry** of coumarin. C. Van Zijp, 657.
- Micro-Determination** of iron in blood. F. H. Smirk, 291.
- Micro-Kjeldahl** determination of nitrogen; Gasometric —. D. D. Van Slyke, 171.
- Micro-Method** for determining iodates and sulphates and its application to determination of total base in blood serum; Gasometric —. D. D. Van Slyke, A. Hiller and K. C. Berthelsen, 651.
- for determining pentoses and pentosans. G. E. Youngburg, 484.
- for determining the Hausmann numbers of proteins. K. V. Thimann, 239.
- Micro-Mounting** of mould fungi. 295.
- Micro-Organisms**: halophilic —; Examination for. W. Clayton and W. E. Gibbs, 395.
- Micro Sugar Reagent**: Effect of potassium iodide in the Shaffer-Hartmann —. W. A. de Long, 350.
- Micro-Titration** of chromic and barium ions. R. F. le Guyon, 365.
- Microbes**: Action of free chlorine on —. F. Dienert and P. Etrillard, 722.
- Microbiology** of Cellulose, Hemicellulose, Pectin and Gums. (Review), A. C. Thaysen and H. J. Bunker, 500.
- Microchemical reactions** for cadmium salts; New highly sensitive —. A. Martini, 493.
- Micrographic** detection of tartaric acid in official preparations. M. François and C. Normand, 161.
- Micrometer**: New measuring —. J. H. Dowell, 51.
- Mikrobin** in wine. C. von der Heide and R. Föllen, 600.
- Milk analysis**; The immersion refractometer and its value in —. G. D. Elsdon and J. R. Stubbs, 193.
- bacterium pruni* in —; Identification of some of the products formed by. S. L. Jodidi, 486.
- Buffalo — standards in India. 157.
- butter fat in —; Causes of variation in the proportion of. J. F. Tocher, 174.
- Byre samples of —. Variations in proportions of butter fat in milk from single cows and herds of cows. 470.
- calcium in human — direct precipitation of. C. S. Rothwell, 716.
- Casein in —; Determined by an approximately iso-electric precipitation. H. C. Waterman, 548.
- chlorine and sodium in — of certain mammals; Determination of. L. Barthe and E. Dufilho, 715.
- chlorine in —; Determination of. A. D. Husband and W. Godden, 288.
- chocolate; Determination of milk fat in — by means of a modified xylene number. C. A. Greenleaf, 647.
- chocolates; Analysis of commercial —. 328.
- clean — production; Laboratory methods for judging the extent of. 121.
- Condensed —. See **Condensed Milk**.
- Dirt in —. 409.
- Dirt in Madras —. 157.
- Dirty sediment in —. 702.
- Dried —. Ministry of Health Regulations. 537.
- fat in malted —; Determination of. E. S. Rose, 91.
- fat in milk chocolate; Determination of — by means of a modified xylene number. C. A. Greenleaf, 647.
- hydrogen ion concentration of whey, cream and —; Colorimetric determination of. P. F. Sharp and T. J. McInerney, 36.
- iron content of —; Effects of diet on. C. A. Elvehjem, R. C. Herrin and E. B. Hart, 166.
- irradiated-; Vitamin A potency of —. G. C. Supplee and O. D. Dow, 720.
- pasteurisation; Standards for —. C. E. North and W. H. Park, 294.
- Pathogenic bacteria and mixed enzymes of —. C. Gorini, 486.
- products; Determination of aldose sugars by means of chloramine-T, with special reference to the analysis of —. C. L. Hinton and T. Macara, 668.
- Products Sub-Committee to the Standing Committee on Uniformity of Analytical Methods. Report No. 1. 402.

**Milk**—*continued.*

- proteins in cacao products; Method for determining —. H. C. Waterman and H. A. Lepper, 350.
- Relation between the vitamin *B* content of the "feed" eaten and that of the — produced. S. I. Bechdel and H. E. Honeywell, 721.
- Relation of the hydrogen ion concentration to the titratable acidity of —. P. F. Sharp and T. J. McInerney, 715.
- Sampling of —. 472.
- Separation of alkaloids from —. M. G. Florence, 723.
- serum; Action of chloramine-T on —. 677.
- serum; Determination of lactose in —. 680.
- sodium and chlorine in cow's —; Elimination of. L. Barthe and E. Dufilho, 287.
- solids-not-fat in —; Effect of three milkings per day on. 78.
- standards in India. 157.
- Streptococci in —. 120.
- sweetened-; Determination of sucrose in —. 682.
- Thermophilic bacteria in —. M. O. Eckford, 426.
- tubercle bacilli in —; Detection of. 119.
- vitamin *A* and *B* content of cow's —; Note on the. J. Outhouse, I. G. Macy, V. Brekke and A. Graham, 425.
- vitamin *C* content of —; Relation between the vitamin *C* content of a cow's ration and the —. J. S. Hughes, J. B. Fitch, H. W. Cave and W. H. Riddell, 166.
- Milk and Dairies Order**, 1926; Circular 757. 154.
- Milks**: evaporated; Vitamin *A* in — made by vacuum and aeration methods. R. A. Dutcher, H. E. Honeywell and C. D. Dable, 720.
- Microscopic** examination; Polishing and etching lead, tin, and some of their alloys for —. J. R. Vilella and D. Beregekoff, 732.
- Millet**: Iodine absorption value of —. 89.
- Millon** test (phenol tests). H. D. Gibbs, 169.
- Mineral Water**: Contamination of — with *B. coli*. (Legal Notes), 412.
- Natural occurrence of boron compounds in —. 459.
- Mineral Oils**: asphalt content of —; Determination of. J. Marcusson, 300.
- Ministry of Health Orders, Reports, etc.** Condensed Milk. Dried Milk. 537.
- Determination of benzoic acid in foodstuffs. Report No. 39. G. W. Monier-Williams, 153, 229.
- Determination of sulphur dioxide in foods. Report No. 43. G. W. Monier-Williams, 343, 415.
- Milk and Dairies Order, 1926. Circular 757. 154.
- Occurrence of glass fragments in foods packed in glass containers. No. 37. G. L. Hancock, 284.
- Preservatives, etc. in Food. Public Health Amendment Regulations, 1926. No. 1557. 33.

**Ministry of Health Orders, etc.**—*continued.*

- Preservatives in Food. Public Health Provisional Regulations, 1927. 285; Circular 782, 286.
- Sale of Food and Drugs Act. Annual Report for 1926-27 and abstract of Report of Public Analysts for 1926, 712.
- Sale of Food and Drugs Acts Memorandum. Circular 762. 84.
- Statutory Rules and Orders, 1927. No. 577. Public Health, England, Amendment Regulations. 479.
- Sulphur dioxide in pearl barley. (Letter regarding Preservatives Regulations), 416.
- Treatment of flour with chemical substances; Report of Departmental Committee on —. 226.
- Mixtures**: fatty-; Detection of castor oil in —. Vizern and Guillot, 161.
- Mobilometer**: Applications of a —. H. A. Gardner and A. W. Van Heuckeroth, 497.
- Moisture** content of wood; Electrical resistance of wood as a measure of —. A. J. Stamm, 732.
- Determination of — by the volatile solvent method. J. M. Jones and T. McLachlan, 383.
- in raw rubber; Determination of —. D. Armstrong and T. J. Drakeley, 338.
- Molybdenum**: Detection of — by thiocyanate. F. C. Krauskopf and C. E. Swartz, 105.
- in iron and steel; Simplified determination of —. E. Färber, 303.
- Volumetric determination of —. G. Denigès, 250.
- Morphine**: New colour reaction for —. 41.
- Separation and determination of —, pseudomorphine and related substances. A. K. Balls, 162.
- Moss**: Irish — mucilage and a method for its determination. P. Haas and B. Russell-Wells, 265.
- Motor** fuels; Laboratory method of determining the starting properties of —. W. G. Lovell, J. D. Coleman and T. A. Boyd, 306.
- Mould** fungi; Micro-mounting of —. 295.
- growth in hams. 541.
- stains; Removal of — from prints and pictures. 81.
- Muir, Sir Richard**: A Memoir of a Public Prosecutor. (Review). S. T. Felstead, 375.
- Museum** objects; Cleaning and restoration of —. Third Report upon Investigations conducted at the British Museum. 81.
- Mustard** flour; Formation and determination of essential oil of mustard in —. Astric and M. Mousseron, 353.

## N

- Nahrungs- und Genussmittel**: Die Chemie der —. (Review). F. Fuhrmann, 499.
- Naphthalene-Sulphonic Acids**: Arylamine salts of the —. III. Separation of Crocein, Schäffer, R. and G acids and their arylamine salts. R. B. Forster and C. M. Keyworth, 169.

- Naphthol Yellow** in foodstuffs; Detection of ——. 585.
- National Physical Laboratory:** Annual Report for 1927. 413.
- Neon light:** Action of — on bacteria. A. Philibert and J. Risler, 97.
- Nephelometric** methods for determining some sulphur compounds in urine. W. Denis and L. Reed, 95.
- New Zealand** Amending Regulations under Sale of Food and Drugs Act, 1908. 233. Annual Report of the Dominion Analyst for 1925. J. S. Maclaurin, 347. bran and pollard; Determination of ——. L. D. Foster, 656.
- Nickel:** Acidimetric determination of — as the nickeldicyandiamidine salt. P. Fluch, 48. in presence of iron; Two sources of error in the electrolytic determination of ——. C. Marie and J. Berthelot, 48. in the pancreas; Cobalt and ——. G. Bertrand and M. Macheboeuf, 95. Physiological importance of ——. G. Bertrand and H. Nakamura, 652. Rapid determination of ——. G. Spacu and J. Dick, 660.
- Nickeldicyandiamidine Salt:** Acidimetric determination of nickel as the ——. P. Fluch, 48.
- Nicotine** in insecticides, 25. in tobacco and tobacco smoke; Determination of ——. B. Pfyl and O. Schmitt, 728. in tobacco; Determination of ——. R. R. T. Young, 15. in tobacco; Fractional extraction of ——. 23.
- Niobium:** analytical chemistry of tantalum, — and their mineral associates; Investigations into the. VII. Precipitation of tungstic acid by tannin. VIII. Separation of tungsten from tantalum and niobium. W. R. Schoeller and C. Jahn, 504. IX. Separation of titanium from tantalum and niobium. W. R. Schoeller and E. C. Deering, 625.
- Nitrate:** Detection of nitrite, — and sulphite. E. Eegriwe, 106.
- Nitrates:** New and sensitive test for — applicable in presence of nitrites. A. H. Ware, 332. Spectrophotometric determination of nitrites and — by diphenylamine sulphate. E. Tassilly and R. Savoïre, 107.
- Nitrations:** Use of nitrogen tetroxide in place of nitric acid in organic ——. L. A. Pinck, 724.
- Nitric Acid** tests (phenol tests). H. D. Gibbs, 169. Use of nitrogen tetroxide in place of — in organic nitrations. L. A. Pinck, 724.
- Nitric Oxide** in air; Determination of traces of ——. E. Kohn-Abrest, 248.
- Nitrite:** Detection of —, nitrate and sulphite. E. Eegriwe, 106.
- Nitrites:** New and sensitive test for nitrates applicable in presence of ——. A. H. Ware, 332.
- Nitrites—continued.**  
Spectrophotometric determination of nitrates and — by diphenylamine sulphate. E. Tassilly and R. Savoïre, 107.
- Nitrogen:** Albuminoid — determinations in waters. 130. and carbon on the same soil sample; Determination of ——. B. E. Brown, 487. -bearing chemicals added to animal or vegetable nitrogenous manures; Detection and determination of ——. H. C. Moore and R. White, 298. Gasometric micro-Kjeldahl determination of ——. D. D. Van Slyke, 171. in leather. R. W. Frey, 47. in leather; Determination of ——. L. Balderston, 491. in lighting and heating gas; Direct determination of ——. W. Steuer, 47. in plants and soil extracts; Modification of the salicylic-thiosulphate method for determining total ——. E. R. Ranker, 555. Organic — determination in waters. 132.
- Nitrogen Tetroxide:** Use of — in place of nitric acid in organic nitrations. L. A. Pinck, 724.
- Nitrogenous** groups of nucleic acid. H. O. Calvery and W. Jones, 420.
- Nitron** as means of determining perchlorate in Chili saltpetre. A. Vürtheim, 251.
- Nitrous Acid:** Reactions of dyestuffs with ——. J. V. Dubsky and A. Okác, 491.
- Nitrous Oxide:** Ignition points of gases in ——. H. B. Dixon, 614.
- Non-Protein** sulphur compounds of blood; Methods for determining some ——. W. Denis and L. Reed, 96.
- Non-Volatile Acids** of the pear, quince, apple, loganberry, blueberry, cranberry, lemon and pomegranate. E. K. Nelson, 418.
- Noodles:** Egg and water ——. 547.
- Nostrand's** Chemical Annual. (Review), 617.
- Notes:** 27, 76, 149, 222, 273, 338, 469, 525, 590, 638, 699.
- Nucleic Acid:** Nitrogenous groups of ——. H. O. Calvery and W. Jones, 420. pentose in yeast — and its derivatives; Micro-determination of. W. S. Hoffman, 421.
- Numerical Data:** Annual Tables of Constants and ——. Electrical, Magnetic, Electrochemical, Engineering and Metallurgical. (Review), 175.
- Nutrition:** bacterial —; Studies in. III. Phosphates and the growth of streptococci. H. R. Whitehead, 243. Iron in ——. III. Effects of diet on iron content of milk. C. A. Elvehjem, R. C. Herrion and E. B. Hart, 166. Relation of the connective tissue content of meat to its protein value in ——. H. H. Mitchell, J. R. Beadles and J. H. Kruger, 483.
- Nutritive** value of a protein; Effect of heat and oxidation on ——. H. Goldblatt and A. R. Moritz, 292.

## O

- Oats:** Iodine absorption value of ——. 89.  
Sale of mixed grain as Sussex ——. (Legal Notes), 224.
- Obituary Notices:**  
Burgess, Herbert Edward, 667.  
Burrell, Benjamin Arthur, 439, 621.  
Crossley, Arthur William, 182, 316.  
Harvey, Thomas Featherstone, 667.  
Leebody, John Robinson, 503.  
Pakes, Reginald Charles, 620.  
Tilden, Sir William, 1, 113.  
Webster, John, 116.
- Official preparations;** Micrographic detection of tartaric acid in ——. M. François and C. Normand, 161.
- Oil Analysis.** (Review), A. Gill, 617.  
An odiferous — and two new linolic tetra-bromides from Philippine lumbang oil. S. Santiago and A. P. West, 300.  
Body — from sperm whale. Y. Toyama, 726.  
cakes; Toxicity and acridness of cruciferous seeds and ——. G. Jørgensen, 44.  
from seeds of *Digitalis purpurea*. I. S. Mellanoff, 718.  
Industries; Chemistry of the —. (Review), J. E. Southcombe, 312.  
of *Centrophorus Granulosus*. A. C. Chapman, 622.  
of sweet clover seed; Fatty ——. B. A. Dunbar and C. F. Wells, 47.
- Oils:** acid values of fats and —; Isopropyl alcohol as substitute for ethyl alcohol in determining. H. A. Schuette and M. P. Smith, 101.  
Edible — and Fats: Their Substitutes and Adulterants. (Review) G. D. Elsdon, 61.  
Essential —. See **Essential Oils**.  
Fatty —. See **Fatty Oils**.  
hardening of — by hydrogenation; Theory of the. H. P. Kaufmann and E. Hansen-Schmidt, 246.  
Liver —. See **Liver Oils**.  
lubricating-; Calculation of flash points of blends of —. E. W. Thiele, 307.  
Mineral —. See **Mineral Oils**.  
of the Chaulmoogra group; Characteristics of some —. G. A. Perkins, A. O. Cruz and M. O. Reyes, 548.  
Petroleum —. See **Petroleum Oils**.  
Quantitative determination of mixtures of two and three — by means of their separation temperatures with different solvents. J. D. Jansen and W. Schut, 49.  
Separation from — of a substance which inhibits the destruction of vitamin A by ferrous sulphate. H. W. Estill and E. V. McCollum, 720.  
turbine —; Evaluation of. T. H. Rogers and C. E. Miller, 301.  
Values for mixtures of —. 320.
- Ointment:** mercury in an —; Determination of. 331.
- Oleander poisoning.** 33.  
Tests for yellow —. 539.
- Oleic series;** Some ill-defined acids of the —. I. Hypogaecic acid. T. P. Hilditch and N. L. Vidyarthi, 429. II. Acids in parsley seed oil. T. P. Hilditch and E. E. Jones, 429.
- Oleic Acid** and elaidic acid in presence of each other; Determination of —. J. P. K. Van der Steur, 609.
- Olive Oil:** Tunisian —; Chemical composition of. G. S. Jamieson, R. M. Hann and W. F. Baughman, 290.
- Opium** in stomach contents; Rapid determination of —. E. R. Dovey, 26.  
smoke; Chemistry of —. 33.
- Optical rotation** of honey. H. A. Caulkin, 418.
- Orange** and quinine wines; Blackcurrant and —. (Legal Notes), 283.
- Oranges:** Composition of fresh —. 351.
- Ores:** alkalis in clays, — etc.; Determination of. J. Cochina, 432.  
sulphur in —; Determination of. K. K. Järvinen, 730.
- Organic acids;** Detection of lactic acid in presence of other —. F. G. Germuth, 610.  
analysis; Abstracts: 45, 100, 168, 245, 299, 357, 428, 489, 557, 606, 656, 724.  
Analysis; Allen's Commercial —. Vol. V. (Review), 615.  
Chemical Analysis, Qualitative and Quantitative; A Student's Manual of —. (Review), J. F. Thorpe and M. A. Whiteley, 312.  
Chemistry; Practical Bio-Chemistry and —. (Review), R. H. A. Plimmer, 107.  
Chemistry; Recent Advances in —. (Review), A. W. Stewart, 734.  
Chemistry; Theoretical —. Part I. (Review), F. Arnall and F. W. Hodges, 54.  
Colouring Matters; Artificial —. (Review), H. Pierz-David, 372.  
compounds; Modified combustion method for determining bromine in —. F. L. Smith, 357.  
compounds; Quantitative estimation of selenium in —. E. H. Shaw, Junr., and E. E. Reid, 724.  
compounds; Volumetric determination of hydroxyl groups in sugars and other —. V. L. Peterson and E. S. West, 607.  
compounds; Volumetric determination of alkoxy groups in —. Modification of the Zeisel procedure. E. P. Eaton and E. S. West, 725.  
liquids; Determination of carbon in dilute —. O. Kauffmann-Cosla, 45.  
liquids; Lead chloride for clearing — in toxicological research for alkaloids. J. Magnin, 356.  
matter in soils; Determination of — by means of hydrogen peroxide. W. O. Robinson, 488.  
nitrations; Use of nitrogen tetroxide in place of nitric acid in —. L. A. Pinck, 724.  
nitrogen determination in waters. 132.

**Organic**—*continued*.

- substances; Action of certain — on alcoholic fermentation. E. Mameli, 99.
- substances; Determination of water in — by means of calcium carbide. A. Cantzler and S. Rothschild, 606.
- Orthoform**: New colour reaction for —. 41.
- Ox** viscera; Edible —. 159.
- Oxidation**: Effect of heat and — on the nutritive value of a protein. H. Goldblatt and A. R. Moritz, 292.
- products of cholesterol; Influence of irradiation upon —. F. W. Schlutz, M. R. Ziegler and M. Morse, 423.
- tints on metals; Films responsible for —. T. R. Evans, 662.
- Oxy-Aluminoid** test for waters, sewages and effluents. 130.
- Oxycellulose** formation; Rate of —. Analysis of cotton. D. A. Clibbens and B. P. Ridge, 361.
- Oxygen** absorption of well-water polluted with illuminating gas. 654.
- Dissolved — absorption test. E. A. Cooper and W. H. Read, 723.
- Hempel gas analysis apparatus without absorption bulbs and its use in the examination of commercial —. R. C. Frederick, 400.
- Oxyquinoline**: Acidimetric determination of magnesium, zinc, aluminium and copper in presence of —. F. L. Hahn and E. Hartleb, 495.
- as a means of determining cadmium and aluminium. R. Berg, 611.
- as means of determining magnesium. R. Berg, 431.
- as means of determining zinc. R. Berg, 494.
- as reagent for magnesium, zinc and aluminium. F. L. Hahn and K. Vieweg, 431.
- o-**Oxyquinoline** as means of separating and determining metals. R. Berg, 302.
- Oyster**: Bacterial flora of the market —. C. Eliot, 98.
- Ozone**: Production of — by ultra-violet rays. J. Dadlez, 551.

**P**

- Paints**: Analysis of —, Pigments and Varnishes (Review), J. J. Fox and T. H. Bowles, 110.
- Palestine**: Government of —. Annual Report of Public Health Department for 1925. G. W. Baker, 230.
- Palm-Kernel** oil; Examination of mixtures of coconut oil and —. G. D. Elsdon and P. Smith, 63.
- oil in butter fat; Detection of —. 69.
- oil; Reichert and Polenske values of —. 64.
- oil; Values for —. 319.
- Pancreas**: Nickel and cobalt in the —. G. Bertrand and M. Macheboeuf, 95.
- Pancreatin**: Hydrolysis of corn (maize) starch by means of commercial —. J. H. Walton and H. R. Dittmar, 42.
- Paper Mill Chemist**. (Review), H. P. Stevens, 373.
- Papers**: reagent-; Sensitiveness of some — towards gaseous hydrogen phosphide. M. Wilmet, 487.
- Paprika Oil**: Iodine value of —. L. C. Mitchell, 161.
- Papyrus**: The Stockholm —. E. R. Caley, 615.
- Paraffin** wax in crude wax; Determination of —. L. M. Henderson and S. W. Ferris, 301.
- wax; Solubility of — in petroleum oils. F. W. Sullivan, W. J. McGill and A. French, 727.
- Parliamentary Notes**: Sale of Food and Drugs Bill, 1927. 225.
- Parsley Seed Oil**: Acids in —. T. P. Hilditch and E. E. Jones, 429.
- Particles**: Method of measuring size of —. P. Lukirsky and M. Kosman, 173.
- Pastes**: Alimentary —. U.S.A. Food Inspection Decision No. 206, 546.
- Pasteurisation**: Standards for milk —. C. E. North and W. H. Park, 294.
- Pastry**: starch in —; Polarimetric determination of. J. Grossfeld, 420.
- Pathogenic** bacteria and mixed enzymes of milk. C. Gorini, 486.
- Pea** meal; Iodine absorption value of —. 89.
- Peat**: Non-volatile acids of the —. E. K. Nelson, 418.
- Vitamin C content of fresh and canned —. V. C. Craven and M. M. Kramer, 485.
- Pearl Barley**: Sulphur dioxide in —. (Preservative Regulations), 416.
- Peas**: "Regenerated" preserved —; Specific characteristics of. J. Froidevaux, 91.
- Peat** and peat wax from Chatham Islands. 727.
- Pectin**: Microbiology of Cellulose, Hemicellulose, Pectin and Gums. (Review), A. C. Thaysen and H. J. Bunker, 500.
- Pemberton** method for volumetric determination of phosphoric anhydride; Application of Ridsdale's modification of — to fertilisers. A. M. Cameron and W. T. Dow, 576.
- Pencils**: Strokes made with coloured —, 582; with copying ink —, 582; with graphite —, 581.
- Pentosans**: Micro-method for determining pentoses and —. G. E. Youngburg, 484.
- Pentose** in yeast nucleic acid and its derivatives; Micro-determination of —. W. S. Hoffman, 421.
- metabolism; Studies on —. II. Micro method for determining pentoses and pentosans. G. E. Youngburg, 484.
- Pentoses**: Micro method for determining —. G. E. Youngburg, 484.
- Pepper**: Pimento-; Effect of waste — on the colour of egg yolks. W. A. Morgau and J. G. Woodroof, 653.
- Volatile alkaloid of —. A. Pictet and R. Pictet, 649.
- Peppermint** essence. (Legal Notes), 282.

- Peptic digestion**; Effect of halogen salts on ——. W. M. Clifford, 550.  
 digestion; Influence of — in the determination of total carbohydrates in cereal products. B. G. Hartmann and F. Hillig, 160.
- Perchlorate** in Chili saltpetre; Determination of — by means of nitron. A. Vürtheim, 251.
- Perchlorates**: anhydrous — as dehydrating agents for gases; Use of. G. F. Smith, 307.
- Perfumes**: Cosmetics and Soaps, with Especial Reference to Synthetics. Vol. II. (Review), W. A. Poucher, 109.
- Perspiration** deodorisers. 531.
- Petroleum** and petroleum products; Bibliography of standard methods of analysing ——. 347.  
 hydrocarbons; Action of sulphur monochloride on ——. E. Lorand, 490.  
 oils; Solubility of paraffin wax in ——. F. W. Sullivan, W. J. McGill and A. French, 727.  
 products; Rapid method of determining sulphur in certain ——. E. S. Squire, 101.
- P<sub>H</sub>** indicators; Coloured — to identify green or dry woods. R. Legendre, 361.  
 value; Sources of error in the colorimetric determination of ——. J. W. Schlegel and A. H. Stueber, 492.  
 value; Wulff method of determining the ——. C. E. Druart, 657.
- Pharmacological** properties of some drugs; Effect of polarised light on ——. D. I. Macht and W. T. Anderson, junr., 602.
- Phaseolus Vulgaris**: Allantoic acid in the green parts of ——. R. Fosse, 92.
- Phenol** in ammonia liquor and other solutions; Determination of ——. R. D. Williams, 360.  
 in ethyl alcohol; Detection of ——. 101.  
 in water polluted with illuminating gas; Detection of ——. 654.  
 tests. II. Nitrous acid tests. Millon and similar tests. Spectrophotometric investigations. H. D. Gibbs, 169. III. The indophenol test. H. D. Gibbs, 360.
- Phenols**: New specific tests for distinguishing carbolic acid, the cresols and certain other phenols. A. H. Ware, 335.  
 Sensitive reaction for benzoylacrylic acid and its use for characterising ——. E. Cattelain, 360.
- Phenyl Magnesium Iodide**: Action of tungsten hexachloride on ——. W. Brydowna, 105.
- Philippine** lumbang oil; An odiferous oil and two new linolic tetrabromides from ——. S. Santiago and A. P. West, 300.
- Phosgene** from chloropicrin; Preparation of ——. S. Secareano, 491.
- Phosphates** and the growth of streptococci. (Studies in bacterial nutrition. III), H. R. Whitehead, 243.  
 in potable waters; Colorimetric determination of — by the Denigès method. R. Danet, 427.
- Phosphine** in gases; Rapid determination of ——. M. Wilmet, 558.  
 Reaction of — with nitrous acid. 492.
- Phosphoric Acid**: Determination of manganese in steel by the Proctor-Smith reaction in presence of ——. B. C. Mukerjee, 689.  
 Sources of error in determining ——. J. M. McCandless and J. I. Burton, 305.
- Phosphoric Anhydride**: Application of Ridsdale's modification of Pemberton's method for volumetric determination of — to fertilisers. A. M. Cameron and W. T. Dow, 576.
- Phosphorus**: Colorimetric determination of minute amounts of compounds of silicon, of — and of arsenic. W. R. G. Atkins and E. G. Wilson, 249.  
 compounds and arsenic compounds of seawater. W. R. G. Atkins and E. G. Wilson, 427.  
 in alloys; Determination of ——. B. Salkin, 305.  
 in blood; Determination of ——. J. H. Gaddum, 241.  
 in cabbage; Water-soluble content of calcium and ——. W. H. and C. B. Peterson, 93.  
 Reaction between elementary — and potassium iodate and its utilisation in the volumetric determination of ——. T. F. Buehrer and O. E. Schupp, 171.  
 yellow — in red —; Determination of very small amounts of. R. H. Kray, 605.
- Photochemical** production of vitamin D from ergosterol. O. Rosenheim and T. A. Webster, 652.
- Photomicrography**: Handbook of ——. (Review), H. L. Hind and H. B. Randles, 561.
- Physical Chemistry**: An introduction to — (Review), F. B. Finter, 175.
- Physical Constants**: Annual Tables of ——. (Review), 54.  
 Chemical and ——. (Review), G. W. C. Kaye and T. H. Laby, 53.  
 of essential oils. (Report of Essential Oil Sub-Committee). 530.
- Physical Laboratory**: Report of the National — for 1927. 413.
- Physical Methods**: Abstracts: 49, 107, 173, 252, 306, 366, 434, 497, 614, 660, 731.
- Physico-Chemical** analysis by means of the boiling of saturated solutions. E. Cornec and P. Klug, 660.
- Physico-Engineering** investigations. 543.
- Physiological Chemistry**; Introduction to ——. (Review), M. Bodansky, 664.  
 importance of nickel. G. Bertrand and H. Nakamura, 652.
- Picric Acid** in foodstuffs; Detection of ——. 585.
- Pictures**: Cleaning and restoration of ——. 81.
- Pigments**: Analysis of —, Paints and Varnishes. (Review), J. J. Fox and T. H. Bowles, 110.  
 anthocyanin — in canning; Behaviour of. C. W. Culpepper, 648.  
 in lacquer; Separation and analysis of ——. F. H. Hopkins, 103.

**Pigments**—*continued*.

- metallurgical — and products; Determination of metallic lead in. D. H. McIntosh, 104.
- Pills**: Iron —. 224; J. F. Liverseege, 239.
- Pimento** pepper; Effect of waste — on the colour of egg yolks. W. A. Morgan and J. G. Woodroof, 653.
- Pine Needle** extract. M. Klostermann and H. Quast, 248.
- Pineapples**: Effect of ethylene on the enzymes of —. L. O. Regeimbal and R. B. Harvey, 354.
- Plant fats**; Distribution of dihydrositosterol in —. R. J. Anderson, F. B. Nabenhauer and R. L. Shriner, 164.
- Growth; Soil Condition and —. (Review), Sir E. J. Russell, 257.
- materials; Inaccuracies of the Devarda method when applied to —. E. R. Ranker, 556.
- Products. (Review), S. H. Collins, 108.
- species; Value of stomatal numbers for distinguishing —. H. A. Timmerman, 291.
- tissue; Association of vitamin *A* with greenness in —. M. Dye, O. C. Medlock and J. W. Crist, 552.
- tissues; Influence of light and heat on the formation of vitamin *A* in —. K. H. Coward, 355.
- tissues other than leaves; Quantitative studies of vitamins *A*, *B* and *C* in green —. E. J. Quinn, M. P. Burtis and E. W. Milner, 354.
- Plants**: nitrogen in soil extracts and —; Modification of the salicylic-thiosulphate method for determining total. E. R. Ranker, 555.
- Sodium in —. G. Bertrand and J. Perietzeanu, 488.
- Plum pulp**; Composition of —. 352.
- Plums**: Composition of fresh —. 351.
- Podophyllin**: Determination of —. R. Eder and W. Schneider, 238.
- Podophyllum**: assay of —; Comparison of several processes for the. L. E. Warren, 549.
- Poison**: Hydrogen sulphide as a —. W. P. Yant and R. R. Sayers, 368.
- Poisoning** and suspected poisoning; Cases of —. G. R. Lynch, 174.
- by mercury vapour. L. M. Dennis, 44.
- Carbon monoxide — of bacteria in absence of haemoglobin. P. F. Frankland, 295.
- Carbon monoxide — in forensic cases. D. J. A. Kerr, 296.
- Food —. 122.
- lead-; Mechanism and incidence of industrial —. 53.
- metacetaldehyde —; A case of. W. H. Willcox and C. A. Mitchell, 528.
- Oleander —. 33.
- Sodium selenite as cause of —. F. Riechen, 487.
- Treatment of —. E. B. Leech, 174.
- Poisons**: Effect of — on the larvae of flies. K. Feist, 243.
- Polarimetric** determination of starch in marzipan substitutes. A. Gronover and E. Wohllich, 481.
- determination of starch in pastry. J. Grossfeld, 420.
- determination of sucrose in sweetened condensed milk. H. D. Richmond, 525.
- determination of tartaric acid. H. Besson, 489.
- work; Sodium flame for —. T. McLachlan and A. W. Middleton, 639.
- Polarised Light**: Effect of — on the pharmacological properties of some drugs. D. I. Macht and W. T. Anderson, junr., 602.
- Polishing** and etching lead, tin, and some of their alloys for microscopic examination. J. R. Vilella and D. Beregekoff, 732.
- Pollard**: New Zealand bran and —; Determination of. L. D. Foster, 656.
- Polluted Waters**: *See Waters*.
- Pollution**: Atmospheric —. *See Atmospheric Pollution*.
- of a river with colliery by-products. Mawston v. Pease and Partners. (Legal Notes), 475.
- with illuminating gas; Testing of well-water for —. Regenstein, 654.
- Polymorphism** of fatty acids; X-ray investigation of —. G. M. de Boer, 368.
- Pomegranate**: Non-volatile acids of the —. E. K. Nelson, 418.
- Porosity**: Apparent specific gravity and —. Comparison of various methods. G. M. Nave, 367.
- Port**: Labelling of wine as "Spanish —." (Legal Notes), 705.
- on wine label. (Legal Notes), 706.
- Port Orford** cedar wood; Oil from —. F. H. Thurber and L. J. Roll, 490.
- Portsmouth**: City of —. Report of the Public Analyst, R. P. Page, for the year 1926. 704.
- Potassium**: Electrolytic method for determining sodium and —. J. L. Stoddard, 660.
- in foodstuffs; Determination of sodium, chlorine and —. A. D. Husband and W. Godden, 72.
- in potassium iodide; Determination of —. F. S. Hawkins and J. R. Partington, 614.
- Potassium Bi-Iodate** as a standard substance in alkalimetric and iodimetric titrations. I. M. Kolthoff and L. H. van Berk, 48.
- Potassium Bromate**: Potentiometric titration of tin with —. K. Sandved, 2.
- Potassium Chlorate**: bromate in —; Determination of. F. Fichter and W. F. Tschudin, 366.
- Potassium Cyanate**: Determination of cyanates, with an application to —. J. Leboucq, 489.
- Potassium Hydroxide**: Reactions of anaesthetic ethers with — and with mercury, and the test for foreign odours. E. Mallinckrodt, jun., 718.

- Potassium Iodate**: Reaction between elementary phosphorus and — and its utilisation in the volumetric determination of phosphorus. T. F. Buehrer and O. E. Schupp, 171.
- Potassium Iodide**: Effect of — in the Shaffer-Hartmann micro sugar reagent. W. A. de Long, 350.  
potassium in —; Determination of. F. S. Hawkins and J. R. Partington, 614.
- Potassium Permanganate** solution; Determination of the titre of — by means of electrolytic iron. L. Moser and W. Schöniger, 250.
- Potatoes**: starch in —; Determination of. G. Rankoff, 419.
- Potentiometric** titration; Method for differential —. D. A. MacInnes and P. T. Jones, 50.  
titration of tin with potassium bromate. K. Sandved, 2.  
Titration. (Review), I. M. Kolthoff and N. H. Furman, 253.
- Precipitates**: Flocculation of troublesome — in analysis. W. Clayton, 76.
- Preservatives**: Examination of foodstuffs for —: A caution. A. C. Chapman, 215.  
in food. Public Health Amendment Regulations, 1926. No. 1557. 33.  
in food. Public Health Provisional Regulations 1927, 285. Circular 782, 286.
- Preserved** peas; Specific characteristics of "regenerated" —. J. Froidevaux, 91.
- President**: Annual Address of the —. (E. R. Bolton), 183.
- Prickly-Pear** honey. 31.
- Primuline**: Reaction of — with nitrous acid. 492.
- Printing** ink; Arsenic in —. T. H. Barry, 217. R. S. Morrell and C. I. Smyth, 339.  
ink; Strokes made with —. 583.  
Inks; Chemistry and Manufacture of Writing and —. (Review), W. B. Gamble 313.
- Prints**: Cleaning of discoloured —. 81.
- Procaine**: Colour reaction for — and some other local anaesthetics, and its application to determination of —. E. R. Riegel and J. F. Williams, 41.
- Proctor-Smith Reaction**: Determination of manganese in steel by the — in presence of phosphoric acid. B. C. Mukerjee, 689.
- Proof**: The Problem of —. (Review), A. S. Osborn, 180.
- Propaësin**: New colour reaction for —. 41.
- Propionic Acid** in acetic acid and acetic anhydride; Determination of —. F. Baum, 607, 608.
- Propolis**: Composition of —, and origin of colouring matter of beeswax. G. F. Jaubert, 418.
- Propylene**: Ignition point of — in nitrous oxide. 614.
- Protein** in diet; Value of cocoa and chocolate as source of —. H. H. Mitchell, J. R. Beadles, and M. H. Keith, 95.  
nutritive value of a —; Effect of heat and oxidation on. H. Goldblatt and A. R. Moritz, 292.
- Protein**—*continued*.  
value of meat in nutrition; Relation of connective tissue content of meat to the —. H. H. Mitchell, J. R. Beadles and J. H. Kruger, 483.
- Proteins**: Hausmann numbers of —; Micro-method of determining. K. V. Thimann, 239.  
milk — in cacao products; Method for determining. H. C. Waterman and H. A. Lepper, 350.
- Protosynthesis**: (Review), H. A. Spoehr, 176.
- Prussic Acid** in linseed meal. (Legal Notes), 30.
- Pseudomorphine**: Separation and determination of morphine, — and related substances. A. K. Balls, 162.
- Public Analysts**: Notes from the Reports of —. See **Aberdeen, Birmingham, Kingston-upon-Hull, Lancaster, Leicester, Portsmouth, Salford**.  
Society of —. See **Society of Public Analysts**.  
Varying conditions of appointment of —. 187.
- Public Health** Amendment Regulations 1927. (Ministry of Health Statutory Rules and Orders, 1927. No. 277.) 479.  
(Preservatives in Food) Provisional Regulations, 1927. 285; Circular 782, 286.  
(Preservatives in Food) Amendment Regulations, 1926, No. 1557. 33.
- Publications Received**: 62, 314, 376, 564, 666.
- Pulp**: fruit —. See **Fruit Pulp**.
- Putrefaction** of flesh; Chemical and physico-chemical changes accompanying the beginning of —. J. Tillmans, P. Hirsch and A. Kuhn, 289.
- Pyramidon** as a reagent for blood. M. Elzas and L. M. Lansberg, 167.
- Pyrex** as a container for radium solutions. L. F. Curtiss, 615.
- Pyridine** test as a quantitative method for determining minute amounts of chloroform. W. H. Cole, 94.
- Pyrogallol**: Behaviour of fish oils with uranium nitrate and —. W. H. Dickhart, 725.
- Pyrogenic** reaction for malic, tartaric and citric acid; New —. J. A. Sanchez, 358.
- Pyrophosphate**: Determination of manganese as —. D. Balarew and N. Desew, 364.

## Q

- Qualitative** Organic Chemical Analysis; A Student's Manual of —. (Review), J. F. Thorpe and M. A. Whiteley, 312.
- Quantitative** analysis; New method of — applicable to a mixture of the rare earths. E. Delauney, 614.  
analysis; Student precision in —. T. F. Buehrer and O. E. Schupp, Junr., 53.  
Organic Chemical Analysis; A Student's Manual of —. (Review), J. F. Thorpe and M. A. Whiteley, 312.

**Quartz lamp:** Use of the analytic — for testing drugs. P. W. Danckwortt and E. Pfau, 707.

**Queensland:** Report of the Government Analyst for the year ending June 30th, 1926. J. B. Henderson, 31.

**Quince:** Non-volatile acids of the ——. E. K. Nelson, 418.

**Quinhydrone** electrode as means of determining the hydrogen ion concentration of wine. R. Dietzel and E. Rosenbaum, 600.

**Quinine:** Black currant and orange and — wines. (Legal Notes), 283.

## R

**R Acid:** Separation of Crocein, Schäffer and G acids and — and their arylamine salts. R. B. Forster and C. M. Keyworth, 169.

**Radio-Sensitive** substances; Colour test for ——. C. J. Bond, 719.

**Radium:** Allfood with ——. (Legal Notes), 642. Separation of mesothorium I and — from barium by ionic migration. J. Kendall, E. R. Jette and W. West, 106. solutions; Pyrex as a container for ——. L. F. Curtiss, 615.

**Radium Chromate:** Fractional precipitation of barium and ——. L. M. Henderson and F. C. Kracek, 303.

**Raffinose:** Clerget-invertase hydrolysis constants of sucrose and ——. H. S. Paine and R. T. Balch, 350.

**Rare Earths:** New method of quantitative analysis applicable to a mixture of the ——. E. Delauney, 614.

**Raspberry** jam; Apple matter in ——. A question of warranty. (Legal Notes), 533. jam deficient in — fruit. (Legal Notes), 283. jam, with declaration of added fruit juice. (Legal Notes), 535. pulp; Composition of ——. 352.

**Raspberries:** Composition of fresh ——. 351.

**$\gamma$ -Ray radiations;** Influence of intense X-ray and — on cholesterol. M. C. Reinhard and K. W. Buchwald, 485.

**Rays:** Ultra-violet ——. See **Ultra Violet Rays**. See also **X-Rays**.

**Reagent** for blood; Pyramidon as a ——. M. Elzas and L. M. Lansberg, 167. for differentiating between ammonium salts, amines and amides; Iodine as a ——. J. A. Sanchez, 363. for earth acids; Digallic acid as ——. W. R. Schoeller, 702. for zinc; Diphenylamine as a quantitative ——. W. H. Cone and L. L. Cady, 730. papers; Sensitiveness of some — towards gaseous hydrogen phosphide. M. Wilmet, 487. Shaffer-Hartmann micro sugar —; Effect of potassium iodide in the. W. A. de Long, 350.

**Red Currant** pulp; Composition of ——. 352.

**Red Currants:** Composition of fresh ——. 351.

**Red Phosphorus:** yellow phosphorus in —; Determination of very small amounts of. R. H. Kray, 605.

**Reducing** sugars. See **Sugars**.

**Refractometer:** Immersion — and its value in milk analysis. G. D. Elsdon and J. R. Stubbs, 193.

**Reichert** figures for butter analysis; Relations of the Manley and ——. H. S. Shrewsbury, 388.

**Resins:** Detection of — by Brauer's method. E. Fonrobert and K. Pistor, 247. Natural and Synthetic —. (Review), T. H. Barry, A. A. Drummond and R. S. Morrell, 56.

**Reviews of Books:** The titles of books have been treated in the same way as the titles of papers and abstracts, and will be found in the General Subject Index and Authors' Index. 53, 107, 174, 253, 308, 368, 435, 497, 560, 615, 662, 732.

**Rhodamine:** Reactions of — with nitrous acid. 492.

**Rice** flour in shredded suet. (Legal Notes), 281. Iodine absorption value of —. 89. U.S.A. Food Inspection Decision No. 208, 547.

**Rideal-Walker** method of testing disinfectants. Q. Moore, 98.

**Ridsdale** modification of Pemberton's method for volumetric determination of phosphoric anhydride; Application of — to fertilisers. A. M. Cameron and W. T. Dow, 576.

**River:** Pollution of a — with colliery by-products. Mawston v. Pease and Partners. (Legal Notes), 475.

**Roach** powder; Analysis of mysterious —. 538.

**Rose Flower** wax. H. Prophète, 102.

**Rosolic Acid** in foodstuffs; Detection of —. 585.

**Rubber:** hydrocarbon in raw —, gutta-percha and allied substances; Determination of. A. R. Kemp, 362. hydrocarbons; Reactions of — with metallic halides. H. A. Bruson, L. B. Sebrill and W. C. Calvert, 728. moisture in raw —; Determination of. D. Armstrong and T. J. Drakeley, 338. Nature of matured —. II. G. Bruni and T. G. Levi, 491. Unvulcanised; Calender Effect and Shrinking Effect of —. (Review), W. de Visser, 256.

**Rye:** ergot of —; Identification and determination of. A. Tschirch, 238. Iodine absorption value of —. 89.

## S

**Saccharin:** Conversion of — into ammonia. 381. Determination of —, colorimetrically and by the ammonia process. A. F. Lerrigo and A. L. Williams, 377. Distribution coefficients of —. 383. in grape flavour. (Legal Notes), 642.

- Safety in Mines Research Board:** Laboratory methods of determining the inflammability of coal dust. (Paper No. 31). A. L. Godbert, 713.
- Saffron** substitute in foodstuffs; Detection of —, 585.
- Sale of Food and Drugs Acts:** Administration of, — 187.  
Bill to amend —, 225.  
Correspondence. Circular 762. 84.  
Composition and Description of Food and Drugs. Memo. 36, Foods. 84.  
Extracts from Report of the Ministry of Health for 1926-27 and abstract of Reports of Public Analysts for 1926. 712.  
New Zealand Amending Regulations under —, 233.
- Salford:** City of —. Annual Report of the City Analyst for 1926. H. H. Bagnall, 640.
- Salicylic-Thiosulphate** method for determining total nitrogen in plants and soil extracts; Modification of —. E. R. Ranker, 555.
- Saligenin:** New colour reaction for —, 41.
- Saliva:** Factors involved in the reaction changes of human —. G. W. Clark and K. L. Carter, 551.
- Salmonella** group; Food poisoning due to —, 122.  
group of bacilli; Use of certain carbohydrates and glucosides in the differentiation of members of —. F. Wokes and J. H. Irwin, 604.  
group; Infection by certain organisms of the —. S. R. Damon and L. W. Leiter, 167.
- Salt:** Boric acid as natural constituent of common —, 460.  
Effect of common — on lime water used for egg preserving. J. Miller, 457.
- Saltpetre:** Perchlorate in Chili — determined by means of nitron. A. Vürtheim, 251.
- Salts** of linolenic hexabromide from lumbago oil. G. A. Imperial and A. P. West, 247.
- Samples:** Standard —. Dept. of Commerce U.S.A. Bureau of Standards, Bulletin No. 25. 661.
- Sandal Wood:** dyeing with the colouring matter of —; Detection of. L. Soep, 696.
- Santonica:** santonin in —; Determination of. Eder and W. Schmeiter, 40.
- Santonin** in santonica; Determination of —. Eder and W. Schmeiter, 40.
- Saponins** as foam-producing materials; Value of —, 42.
- Sardine Oil:** Iodine value of a commercial California —. M. S. Dunn and B. S. Hollombe, 483.
- Sauerkraut:** Studies of commercial — with special reference to changes in the bacterial flora during fermentation at low temperature L. A. Priem, W. H. Peterson and E. B. Fred, 356.
- Sausage:** Blood — with artificially coloured skin. T. Merl, 93.  
casings; Cellulose —. W. F. Henderson and H. E. Dietrich, 37.
- Scandium:** Reaction of aluminon with hydroxides of gallium, indium, thallium, germanium and —. R. B. Corey and H. W. Rogers, 172.
- Schäffer Acid:** Separation of Crocein, R. and G. acids and — and their arylamine salts. R. B. Foster and C. M. Keyworth, 169.
- Schlagdenhaufen** reaction for magnesium. A. Hamy, 251.
- Schmidt** reaction for saccharin. 379.
- Scientific** articles not abstracted; References to —, 53, 174, 368, 615, 661.
- Scientific and Industrial Research Dept.:** Report of the Food Investigation Board for the years 1925 and 1926. 541.  
Report of the National Physical Laboratory for 1927. 413.  
Report of the Stone Preservation Committee. 645.
- See also* **Food Investigation Board.**
- Sedimentation:** Differentiation of flours by the iodine absorption and rapidity of —. N. A. Trofimuk, 89.
- Seeds** of *Digitalis purpurea*; Oil from —. I. S. Mellanoff, 718.  
Toxicity and acridness of cruciferous — and oil cakes. G. Jørgensen, 44.
- Selenium** compounds; Fungicidal and bactericidal action of tellurium and —. N. M. Strover and B. S. Hopkins, 356.  
in organic compounds; Quantitative estimation of —. E. H. Shaw, Junr., and E. E. Reid, 724.  
Volumetric separation of tellurium and —. Z. Littman, 365; L. Moser, 658.
- Selenium Sulphide:** a new detector for mercury vapour. B. W. Nordlander, 357.
- Seminal** stains; Identification of —. S. Mallannah, 399.
- Semni:** Adulterated —. 230.
- Sera:** Alleged differentiation of human — as to sex. R. R. Hyde and E. I. Parsons, 167.
- Serological** Methods in the Investigation of Foodstuffs. (Review), P. Manteufel, 308.
- Serum:** blood-; Determination of total base in — by means of gasometric micro method for determining iodates and sulphates. D. D. Van Slyke, A. Hiller, and K. C. Berthelsen, 651.  
milk-; Action of chloramine-T on —. 677.  
milk-; Determination of lactose in —. 680.
- Sewages:** analysis of waters, — and effluents; Critical review of methods of. J. W. H. Johnson, 128.
- Sex:** Alleged differentiation of human sera as to —. R. R. Hyde and E. I. Parsons, 167.
- Shaffer-Hartmann** micro sugar reagent; Effect of potassium iodide in the —. W. A. de Long, 350.
- Sheep** viscera; Edible —. 159.
- Shrinking** Effect and Calender Effect of Unvulcanised Rubber. (Review) W. de Visser, 256.

- Siam**: Third Report of the Government Laboratory. A. Marcan, 32.
- Silicates**: ferrous iron in ———; Determination of. L. A. Sarver, 496.
- Silicon**: Colorimetric determination of minute amounts of compounds of ———, of phosphorous and of arsenic. W. R. G. Atkins and E. G. Wilson, 249.  
in tissues; Colorimetric determination of ——— by Isaac's method. J. H. Foulger, 240.
- Silver** alloys; Methods for cleaning ———. 81.  
Rapid method of separating lead and ———. H. Brintzinger, 363.
- Smoke** and atmospheric pollution. 477.  
Formaldehyde in wood ——— and smoked foodstuffs. E. H. Callow, 391.  
opium ———; Chemistry of. 33.
- Smoked** foodstuffs; Formaldehyde in wood smoke and ———. E. H. Callow, 391.
- Soap**: Errors in analysis of alkaloids caused by presence of fatty acid or ———. H. R. Watkins and S. Palkin, 290.
- Soaps** deflocculating power of ———; Carbon black test for comparing. R. M. Chapin, 102.  
Perfumes, Cosmetics and ———, with Especial Reference to Synthetics. Vol. II. (Review), W. A. Poucher, 109.
- Society of Chemical Industry**. Annual Reports on the Progress of Applied Chemistry. (Review), 369.
- Society of Public Analysts and other Analytical Chemists**: Address presented by the ——— on the occasion of the Berthelot Centenary, 620.  
Analytical Investigation Scheme; 186.  
North of England Section of ———. 182.  
Presidential Address (E. R. Bolton), 183.  
Proceedings of the ———. 1, 63, 113, 181, 259, 315, 377, 439, 503, 565, 619, 667.
- Soda Ash**: strengths of commercial caustic soda and ———; Methods of expressing. 529.
- Sodium**: Electrolytic method for determining potassium and ———. J. L. Stoddard, 660.  
flame for polarimetric work. T. McLachlan and A. W. Middleton, 639.  
in cow's milk; Elimination of chlorine and ———. L. Barthe and E. Dufilho, 287.  
in foodstuffs; Determination of potassium, chlorine and ———. A. D. Husband and W. Godden, 72.  
in milk of certain mammals; Determination of chlorine and ———. L. Barthe and E. Dufilho, 715.  
in plants. G. Bertrand and J. Perietzeanu, 488.  
Specific reaction for ———. I. M. Kolthoff, 304.
- Sodium Benzoate**: Analysis of sodium salicylate and ———. D. Henville, 149.
- Sodium Nitrite**: Analysis of ———. F. A. Höeg, 433.  
in the curing of meat; Use of ———. R. D. Kerr, C. T. N. Marsh, W. F. Schroeder and E. A. Boyer, 37.
- Sodium Salicylate**: Analysis of sodium benzoate and ———. D. Henville, 149.
- Sodium Selenite** as cause of poisoning. F. Riechen, 487.
- Soil** Condition and Plant Growth (Review). Sir E. J. Russell, 257.  
Determination of carbon and nitrogen on the same sample of ———. B. E. Brown, 487.  
extracts; Modification of the salicylic-thiosulphate method for determining total nitrogen in plants and ———. E. R. Ranker, 555.  
hydrogen ion concentration of ———; Accuracy of the various methods of measuring. C. Olsen and L. Jinderström-Lang, 556.
- Soils**: iodine in ———; Determination of. 539.  
Organic matter in ——— determined by means of hydrogen peroxide. W. O. Robinson, 488.
- Solidification** points of edible fats. T. Meyer, 236.
- Solids**: total ——— of condensed milk; Determination of. 403.
- Solids-not-Fat** in milk; Effect of three milkings per day on ———. 78.
- Solutions**: highly coloured or turbid ———; Simplified colorimetric method for measuring the hydrogen ion concentration of small quantities of. Rossée and von Morgenstern, 363.  
Physico-chemical analysis by means of the boiling of saturated ———. E. Cornec and P. Klug, 660.
- Solvent**: Volatile ——— method for determining moisture. J. M. Jones and T. McLachlan, 383.
- Solvents** of lacquers; Separation and analysis of the volatile thinners and ———. R. M. Carter, 102.
- Souring**: Bacteriological study of ham ———. E. A. Boyer, 98.
- Specific Gravity**: Apparent ——— and porosity. A comparison of various methods. G. M. Nave, 367.
- Spectrophotometric** determination of nitrites and nitrates by diphenylamine sulphate. E. Tassilly and R. Savoie, 107.  
investigations (phenol tests). H. D. Gibbs, 169.
- Spectroscopical** detection of fruit wine in wine. O. E. Kalberer, 482.
- Spectroscopy**: (Review), E. C. C. Baly, 732.
- Sperm Oil**: Unsaturated aliphatic alcohols of ———. E. André and M. T. François, 558.
- Sperm Whale**: Body oil from ———. Y. Toyama, 726.
- Spinach**: Vitamins A and D of ———. S. G. Willimott and F. Wokes, 652.
- Spumagen**: 42.
- Stahre** reaction; Application of the ——— to the accurate determination of citric acid. B. G. Hartmann and F. Hillig, 549.
- Stains**: seminal ———; Identification of. S. Mallannah, 399.
- Stamping** ink; Strokes made with ———. 582.
- Standard** for baking powder. (Legal Notes), 706.

- Standard**—*continued*.  
for meat and malt wine. Bowker *v.* Woodroffe. Bowker *v.* Premier Drug Co. Ltd. (Legal Notes), 80.

in beer. N. C. B., 717.  
in dried fruit; Determination of —. P. May, 271, 526; J. Miller, 338.  
in foods; Determination of —. Ministry of Health Report No. 43. G. W. Monier-Williams, 343, 415.  
in foodstuffs; Determination of —. H. Drake-Law, 352.  
in malt vinegar; Occurrence of —. H. E. Cox, 397.  
in pearl barley. (Legal Notes), 476. (Preservatives Regulations), 416.  
in sugar factory products; Determination of —. J. P. Ogilvie, 92.  
sulphur trioxide in presence of —; Determination of. J. R. Eckmann, 658.
- Sulphur Monochloride:** Action of — on petroleum hydrocarbons. E. Lorand, 490.
- Sulphur Trioxide** in presence of sulphur dioxide; Determination of —. J. R. Eckmann, 658.
- Sunlight:** Strength of — tests. 641.
- Sussex Oats:** Sale of mixed grain as —. (Legal Notes), 224.
- Sweet Clover** seed; Fatty oil of —. B. A. Dunbar and C. F. Wells, 47.
- Sweet Potatoes** in storage; Infection and temperature relations of black rot of —. J. I. Lauritzen, 99.
- Symbols:** Inorganic Chemical — and other useful Chemical Data. (Review). E. R. Darling, 502.
- Synthetic Resins;** Natural and —. (Review). T. H. Barry, A. A. Drummond and R. S. Morrell, 56.
- Synthetics:** Perfumes, Cosmetics and Soaps, with Especial Reference to —. Vol. II. (Review), W. A. Poucher, 109.

## T

- Tannin:** gallic acid in absence of —; Determination of. M. Hirsch, 656.  
Precipitation of tungstic acid by —. W. R. Schoeller and C. Jahn, 504.  
reaction between carbohydrates and —; Nature of. H. B. Stocks and C. V. Greenwood, 170.  
Reaction between casein and —. H. B. Stocks, 170.
- Tanning** materials; Bibliography of standard methods of analysis for leather and —. 83.
- Tannins:** Gelatin precipitation test for —. A. E. Jones, 275.
- Tantalum:** analytical chemistry of —, niobium and their mineral associates; Investigations into the. VII. Precipitation of tungstic acid by tannin. VIII. Separation of tungsten from tantalum and niobium. W. R. Schoeller and C. Jahn, 504. IX. Separation of titanium from tantalum and niobium. W. R. Schoeller and E. C. Deering, 625.
- Tartaric Acid** in official preparations; Micrographic detection of —. M. François and C. Normand, 161.  
New pyrogenic reaction for malic, citric and —. J. A. Sanchez, 358.  
Polarimetric determination of —. H. Besson, 489.
- Tarugi and Lenci** reaction for saccharin. 381.
- Tea:** caffeine in black —; Determination of. W. Stüber, 238.  
fungus; Indian —. E. Dinslage and W. Ludorff, 605.  
leaves; Chemistry of —. II. Isolation of guanine nucleotide and cytosine nucleotide. H. O. Calvery, 354.
- Technological** Constants; Annual Tables of —. (Review), 54.
- Tellurium** compounds; Fungicidal and bactericidal action of selenium and —. N. M. Strover and B. S. Hopkins, 356.  
Volumetric separation of selenium and —. Z. Littman, 365. L. Moser, 658.
- Temperature** and infection relations of black rot of sweet potatoes in storage. J. I. Lauritzen, 99.

- Tentage:** Treatment of —. 233.
- Terpin Hydrate** in terpin hydrate elixir; Determination of —. A. G. Murray, 550.
- Textile** Fibres; Dyeing of —. (Review), R. S. Horsfall and L. G. Lawrie, 664.  
fibres; X-ray examination and structure of —. G. R. Levi, 615.
- Textiles:** museum objects in —; Restoration of. 82.
- Thallium:** Reaction of aluminon with hydroxides of scandium, gallium, indium, germanium and —. R. B. Corey and H. W. Rogers, 172.
- Therapeutic** Substances. Statutory Rules and Orders, 1927. No. 486. 543.
- Thermodynamics** and Chemistry. (Review), F. H. Macdougall, 560.
- Thermophilic** bacteria in milk. M. O. Eckford, 426.
- Thermostat:** Automatic low-temperature —. O. Maas and W. H. Barnes, 252.
- Thinners** of lacquers; Separation and analysis of the volatile solvents and —. R. M. Carter, 102.
- Thiocyanate:** Detection of molybdenum by —. F. C. Krauskopf and C. E. Swartz, 105.
- Thiocyanates** in well-water polluted with illuminating gas; Detection of —. 654.
- Thioglycolic Acid** as colour test for iron. E. Lyons, 613.
- Thymol:** New and specific tests for —. 336.
- Tin** in lead; Determination of traces of —. 538.  
Polishing and etching lead, —, and some of their alloys for microscopic examination. J. R. Vilella and D. Beregekoff, 732.  
Potentiometric titration of — with potassium bromate. K. Sandved, 2.  
Substitution of centrifugation for filtration and calcination in the gravimetric determination of — and lead in their alloys. M. Foà, 364.  
volumetric determination of —; Improved method for. B. S. Evans, 590.
- Tissue:** connective — in meat; Determination of amount of. H. H. Mitchell, R. L. Zimmerman and T. S. Hamilton, 160.  
plant; Association of vitamin A with greenness in —. Relative vitamin A content of head and leaf lettuce. M. Dye, O. C. Medlock and J. W. Crist, 552.
- Tissues:** animal; Iron content of —. C. A. Elvehjem and W. H. Peterson, 650.  
iron in —; Quantitative determination of. R. P. Kennedy, 603.  
Plant —. See **Plant Tissues**.  
silicon in —; Isaac's method for colorimetric determination of. J. H. Foulger, 240.
- Titaniferous** Substances. Titanium: With Special Reference to the Analysis of —. (Review), W. M. Thornton, junr., 736.
- Titanium:** Separation of — from tantalum and niobium. W. R. Schoeller and E. C. Deering, 625.
- Titanium**—*continued*.  
With Special Reference to the Analysis of Titaniferous Substances. (Review), W. M. Thornton, junr., 736.
- Titanous Chloride** solution; Volumetric analysis of malachite green with titanous sulphide and —. H. Wilkinson and A. G. Tyler, 362.
- Titanous Sulphate** solutions; Stability of — in air. H. Wilkinson and A. G. Tyler, 363.
- Titanous Sulphide** solution; Volumetric analysis of malachite green with titanous chloride and —. H. Wilkinson and A. G. Tyler, 362.
- Titration:** differential potentiometric —; Method for. D. A. MacInnes and P. T. Jones, 50.  
Micro —. See **Micro-Titration**.  
Potentiometric — of tin with potassium bromate. K. Sandved, 2.
- Titrations:** alkalimetric and iodimetric; Potassium biiodate as a standard substance in —. I. M. Kolthoff and L. H. van Berk, 48.  
argentometric halogen —; Accuracy of I. M. Kolthoff and L. H. van Berk, 304.  
Potentiometric —. (Review), I. M. Kolthoff and N. H. Furman, 253.
- Tobacco:** Ammonia in —. 22.  
Composition and quality of various kinds of —. 24.  
habit; The —. W. E. Dixon, 662.  
nicotine in — and — smoke; Determination of. B. Pfyfl and O. Schmitt, 728.  
nicotine in —; Determination of. R. R. T. Young, 15.  
nicotine in —; Fractional extraction of, 23.
- o-Tolidine** test for available chlorine; Manganese interference in the —. E. S. Hopkins, 496.
- Toluidines:** Analysis of mixtures of the isomeric —. H. H. Ekers and N. Strafford, 302.
- Toth** method of determining nicotine in tobacco, 18.
- Toxicity** of benzol and its higher homologues; Relative —. J. J. Batchelor, 426.  
of cruciferous seeds and oil cakes; Acridness and —. G. Jørgensen, 44.  
of zinc. V. G. Heller and A. D. Burke, 554.
- Toxicological** abstracts: 44, 167, 243, 296, 356, 426, 487, 554, 605, 655, 723.  
research for alkaloids; Use of lead chloride for clearing organic liquids in —. J. Magnin, 356.
- Toxicology:** Use of trichloroacetic acid in —. G. Florence, 655.
- Trials:** Some Famous Medical —. (Review), L. A. Parry, 665.
- Trichloroacetates** of the alkaloids. Use of trichloroacetic acid in toxicology. G. Florence, 655.
- Trichloroacetic Acid:** Use of — in toxicology. G. Florence, 655.
- Trichromatic** colorimeter suitable for standardisation work. J. Guild, 50.
- Tubercle** bacilli in milk; Detection of —. 117.

**Tungsten**: Separation of — from tantalum and niobium. W. R. Schoeller and C. Jahn, 504.

Separation of vanadium from —. S. G. Clarke, 466, 527.

Treatise on its Metallurgy Properties and Applications. (Review), C. J. Smithells, 55.

**Tungsten Hexachloride**: Action of — on phenyl magnesium iodide. W. Brydowna, 105.

**Tungstic Acid**: Precipitation of — by tannin. W. R. Schoeller and C. Jahn, 504.

**Tunisian olive oil**; Chemical composition of —. G. S. Jamieson, R. M. Hann, and W. F. Baughman, 290.

**Turbidity**: Microscopical examination of — as means of detecting fruit wine in wine. A. Widmer and O. E. Kalberer, 481.

Temperature method of analysing mixtures of cacao and illipé butters, 326.

**Turbine oils**; Evaluation of —. T. H. Rogers and C. E. Miller, 301.

**Tutocaine**: New colour reaction for —. 41.

## U

**Ultra-Violet irradiation**; Activation of sterol fractions by —. A. F. Hess and R. J. Anderson, 653.

rays; Production of ozone by —. J. Dadlez, 551.

**United Provinces of Agra and Oudh**: Report of the Chemical Examiner for the year 1926. D. N. Chatterji, 476.

**United States of America** Bureau of Standards, Bulletin No. 25—Standard Samples. 661.

Department of Agriculture. Food Inspection Decisions. No. 202. Dutch-Process Chocolate and Cocoa, "Alkalised Chocolate, and Cocoa." 88; No. 203. Fruits and Vegetables. 88; No. 204. Flour, 348; No. 205. Meats and the principal Meat Products, 348; No. 206. Alimentary Pastes, 546; No. 207. Sweetened Condensed Milk, 547; No. 208; Rice, 547. No. 209; Colours in Food, 547; No. 210, Cultured Buttermilk, 547.

**Uranium Nitrate**: Behaviour of fish oils with — and pyrogallol. W. H. Dickhart, 725.

**Urea**: Determination of — by gasometric measurement of the carbon dioxide formed by the action of urease. D. D. Van Slyke, 551.

**Urease**: Determination of urea by gasometric measurement of the carbon dioxide formed by the action of —. D. D. Van Slyke, 551.

**Uricase**: Note on the enzyme —. H. O. Calvery, 422.

**Urine**: Alcoholic concentration in — as a test of intoxication. G. Carter, 615.

sugars; On the nature of the —. H. S. Eagle, 165.

sulphur compounds in —; Nephelometric methods for determining some. W. Denis and L. Reed, 95.

**Utensils**: Cadmium as a coating metal for domestic —. A. Gronover and E. Wohnlich, 605.

## V

**Vanadium**: Iodimetric determination of —. J. B. Ramsey, 432.

Separation of — from tungsten. S. G. Clarke, 466, 527.

**Vanilla essence**; Alcoholic strength of —. 31.

**Vanillin**: Derivatives of — and some of their reactions. L. C. Raiford and G. C. Hilman, 483.

in wine distillates, brandy and artificial brandy; Occurrence of —. G. Reif, 717.

**Vapour density determinations**; Improved Meyer apparatus for —. A. Tian, 107.

mercury —; Methods for determining. B. W. Nordlander, 357.

mercury —; Selenium sulphide, a new detector for. B. W. Nordlander, 357.

Water — in the atmosphere. H. Kohler, 368.

**Vapours**: diffusion of gases and — through membranes; Apparatus for measuring. E. E. Schumacher and L. Ferguson, 253.

**Varnishes**: Analysis of —, Pigments and Paints. (Review), J. J. Fox and T. H. Bowles, 110.

**Vegetable charcoal**; Method of differentiating animal and —. S. Ahlbom, 657.

colours in foodstuffs; Detection of the prohibited —. J. R. Nicholls, 585.

nitrogenous manures; Detection and determination of nitrogen-bearing chemicals added to animal or —. H. C. Moore and R. White, 298.

**Vegetables**: Boric acid as natural constituent of —. 459. 460.

Fruits and —. Food Inspection Decision No. 203 of the U. S. Dept. of Agriculture. 88.

**Victoria Yellow** in foodstuffs; Detection of —, 585.

**Vinegar**: Adulteration and misbranding of —. (Legal Notes), 151.

containing formic acid; "Vinegar essence" and —. A. Kreutz and C. Büchner, 93.

"essence" containing formic acid. A. Kreutz and C. Büchner, 93.

furfural in —; On the presence and detection of. L. H. Lampitt, E. B. Hughes and L. H. Trace, 257.

Its Manufacture and Examination. (Review), C. A. Mitchell, 178.

sulphur dioxide in malt —; Occurrence of. H. E. Cox, 397.

Table —. (Legal Notes), 29.

**Viscera**: alkaloids in old —; Detection of. J. Magnin, J. S. Ubeda and B. Golod, 357.

Edible —. A. M. Wright and J. C. Forsyth, 159.

Separation of alkaloids from —. M. G. Florence, 723.

- Vitamin** content of beer. A. Scheunert and M. Schieblich, 722.  
 content of grapes and grape wines. A. Merjanian, 96.
- Vitamin A**: Antimony trichloride as a possible quantitative reagent for ——. F. Wokes and S. G. Willimott, 515.  
 Association of — with greenness in plant tissue. M. Dye, O. C. Medlock and J. W. Crist, 552.  
 Colour reaction of the Japanese acid clays with liver oils and — on the market. K. Kobayashi and K. Yamamoto, 553.  
 colour tests for —; Effects of various agents on. S. G. Willimott, T. Moore and F. Wokes, 241.  
 Colour tests suggested for ——. O. Rosenheim and T. A. Webster, 44.  
 content of cow's milk. J. Outhouse, I. G. Macy, V. Brekke and A. Graham, 425.  
 content of head and leaf lettuce. M. Dye, O. C. Medlock and J. W. Crist, 552.  
 destruction of — by ferrous sulphate; Separation from oils of a substance which inhibits the. H. W. Estill and E. V. McCollum, 720.  
 Fearon's colour reaction and its non-specificity for ——. O. Rosenheim and T. A. Webster, 242.  
 in evaporated milks made by vacuum and aeration methods. R. A. Dutcher, H. E. Honeywell and C. D. Dahle, 720.  
 in plant tissue; Influence of light and heat on the formation of ——. K. H. Coward, 355.  
 of spinach. S. G. Willimott and F. Wokes, 652.  
 potency of irradiated milk. G. C. Supplee and O. D. Dow, 720.  
 Quantitative determination of ——. H. Steenbock and K. H. Coward, 355.  
 Quantitative differentiation from vitamin D. H. C. Sherman and M. C. Hessler, 425.  
 Sterol colour reactions in their relation to ——. O. Rosenheim, 423.
- Vitamin B** complex; Two active factors in the ——. W. D. Salmon, 485.  
 content of cow's milk. J. Outhouse, I. G. Macy, V. Brekke and A. Graham, 425.  
 content of the "feed" eaten and that of the milk produced; Relation between ——. S. I. Bechdel and H. E. Honeywell, 721.  
 extract for treatment of beri-beri. 158.  
 Quantitative study of the problem of the multiple nature of ——. H. C. Sherman and J. H. Axtmayer, 721.  
 technique in testing for —; Note on. A. L. Bacharach and G. A. Hartwell, 145.
- Vitamin C** content of a cow's ration and the — content of its milk. J. S. Hughes, J. B. Fitch, H. W. Cave and W. H. Riddell, 166.  
 content of fresh and canned pear. V. C. Craven and M. M. Kramer, 485.
- Vitamin D** from ergosterol; Photochemical production of ——. O. Rosenheim and T. A. Webster, 652.
- Vitamin D**—continued.  
 of spinach. S. G. Willimott and F. Wokes, 652.  
 Parent substance of ——. O. Rosenheim and T. A. Webster, 424.  
 Quantitative differentiation from vitamin A. H. C. Sherman and M. C. Hessler, 425.  
 Rapid and reliable test for ——. H. Jephcott and A. L. Bacharach, 243.  
 Relation of cholesterol to ——. O. Rosenheim and T. A. Webster, 293.
- Vitamin E**: Cod liver oil as food. Observations on the existence of ——. V. E. Nelson, R. L. Jones, G. Adams and L. T. Anderegg, 604.
- Vitamins**: Fat-soluble ——. XXVII. Quantitative determination of vitamin A. H. Steenbock and K. H. Coward, 355.  
 fat-soluble-; Resistance of — to hydrogenation. L. Randoïn and R. Lecoq, 96.  
 of grape-fruit rind. S. G. Willimott and F. Wokes, 241.
- Vitamins A, B, and C** in green plant tissues other than leaves; Quantitative studies of ——. E. J. Quinn, M. P. Burtis, and E. W. Milner, 354.
- Volatile** flavour in grapes and grape juices; Distribution of ——. J. W. Sale and J. B. Wilson, 39.  
 liquids; Apparatus for the dehydration of ——. P. Loriette, 107.
- Volumetric** determinations; Mercurimetry: a new method of ——. A. L. Jonescu-Matiu, 100.
- Volumetric Analysis**: Essentials of ——. (Review), H. W. Schimpf, 368.  
 (Review), C. H. Hampshire, 311.  
 Theoretical Foundations of ——. (Review), I. M. Kolthoff, 663.

## W

- Warranty**: Applicability of ——. (Legal Notes), 474.
- Washing**: Testing of dyestuffs for fastness to ——. S. R. Trotman, 497.
- Water** analysis: Abstracts, 45, 427, 654, 723.  
 bacteriological examination of food and —; Recent advances in. W. G. Savage, 117.  
 determination; Automatic apparatus for ——. R. Kattwinkel, 173.  
 Dorton Spa and its ——. C. A. Mitchell, 174.  
 ethyl iodide in air, blood and —; Method for determining minute amounts of. I. Starr, junr., and C. J. Gamble, 168.  
 in organic substances; Determination of — by means of calcium carbide. A. Cantzler and S. Rothschild, 606.  
 magnesia hardness in —; Determination of. W. R. Atkin and D. Burton, 654.  
 mineral-; Contamination of — with *B. coli*. (Legal Notes), 412.  
 vapour in the atmosphere. H. Kohler, 368.  
 well-; Testing of — for pollution with illuminating gas. Regenstein, 654.

- Water-Soluble** content of calcium and phosphorus in cabbage. W. H. and C. B. Peterson, 93.
- Waters**: analysis of —, sewages and effluents; Critical review of methods of. J. W. H. Johnson, 128.
- death of fishes in polluted —; Importance of factors responsible for. H. S. Pruthi, 427.
- magnesium in industrial —; Volumetric method of determining. C. Belcot, 45.
- Phosphates in potable — determined colorimetrically by Denigès method. R. Danet, 427.
- Wax**: maize —; Composition of. R. L. Shriner, F. P. Nabenhauer and R. J. Anderson, 420.
- paraffin — in crude —; Determination of. L. M. Henderson and S. W. Ferris, 301.
- Peat — from Chatham Islands. 727.
- Rose flower —. H. Prophète, 102.
- Weights**: atomic —; Annual Report of Committee on, for 1926. 287.
- Well-Water**: Testing of — for pollution with illuminating gas. Regenstein, 654.
- Wheat**: Iodine absorption value of —. 89.
- Relation of the magnesium in the ash and the lipid-protein ratio to the quality of —. B. Sullivan and C. Near, 244.
- Whey**: hydrogen ion concentration of milk, cream and —; Colorimetric determination of. P. F. Sharp and T. J. McInerney, 36.
- Whisky**: Rate of evaporation of Scotch —. 280.
- White Metals**: Antimony in —; Determination of. H. R. Fitter, 729.
- White Wines**: Sulphur dioxide and the behaviour of bottled —. J. Dubaquić, 40.
- Wine** distillates; Occurrence of vanillin in —, brandy and artificial brandy. G. Reif, 717.
- fruit — in grape —; Method for detecting. K. Müller, E. Vogt and O. Raesch, 599; M. Rüdiger, and W. Diemair, 599.
- fruit- — in grape —; Detection of other. T. Röttgen, 39.
- Fruit wine in — detected by means of a microscopical examination of the turbidity. A. Widmer and O. E. Kalberer, 481.
- fruit wine in —; Spectroscopical detection of. O. E. Kalberer, 482.
- grape-; Detection of other fruit wine in —. T. Röttgen, 39.
- Hydrogen ion concentration of — determined by means of the quinhydrone electrode. R. Dietzel and E. Rosenbaum, 600.
- label; "Port" on —. (Legal Notes), 706.
- Labelling of — as "Spanish Port." (Legal Notes), 705.
- meat and malt —; Extract of. (Legal Notes: Bowker v. Woodroffe), 341.
- meat and malt —; Standard for. Bowker v. Woodroffe. Bowker v. Premier Drug Co., Ltd. (Legal Notes). 80.
- Mikrobin" in —. C. von der Heide and R. Föllén, 600.
- Wine**—*continued*.
- Vitamin content of grapes and grape —. A. Merjanian, 96.
- Wines**: Black currant and orange and quinine —. (Legal Notes), 283.
- British-; Duty on —. (Statutory Rules and Orders, 1927, No. 728. 714.
- white-; Sulphur dioxide and the behaviour of bottled —. J. Dubaquić, 40.
- Wood** cellulose; A hydrolysis number determination for —. L. F. Hawley and L. C. Fleck, 611.
- Coloured P<sub>n</sub> indicators to identify green or dry —. R. Legendre, 361.
- Distinction of old from green —. R. Lyon, G. Fron and M. Fournier, 361.
- Electrical resistance of — as a measure of its moisture content. A. J. Stamm, 732.
- museum objects made of —. Preservation of. 82.
- rotting fungi; Production of acid by —. L. P. Curtin, 554.
- smoke; Formaldehyde in — and in smoked foodstuffs. E. H. Callow, 391.
- Woods**: Differentiation of green and mature —. G. Fron, 611.
- Wool**: Cholesterol content of hair, feathers and —. H. C. Eckstein, 422.
- fineness of —; New method for determining. J. A. F. Roberts, 170.
- Standardisation of —. Henseler, 103.
- Writing Inks**; Chemistry and Manufacture of Printing and —. (Review), W. B. Gamble, 313.
- inks; Strokes made with —, 583.
- on wax or metals made legible. 81.
- Sequence of strokes in —. C. A. Mitchell and T. J. Ward, 580.
- Wulff** method of determining the P<sub>n</sub> value. C. E. Druart, 657.

## X

- Xanthylurea**: Determination of allantoinic acid as —. R. Fosse and V. Bossuyt, 558.
- X-Ray** examination and structure of textile fibres. G. R. Levi, 615.
- radiation; Influence of intense  $\gamma$ -ray and — on cholesterol. M. C. Reinhard and K. W. Buchwald, 485.
- X-Rays** investigation of the polymorphism of fatty acids. G. M. de Boer, 368.
- Xylene** number; Determination of milk fat in milk chocolate by means of a modified —. C. A. Greenleaf, 647.

## Y

- Year Book**: The Chemists' —, 1927. (Review), F. W. Atack, 498.
- Yeast**: Formation of fat by —. 541.
- nucleic acid and its derivatives; Micro-determination of —. W. S. Hoffman, 421.

- Yeasts:** Sugar-tolerant — in chocolate-coated creams. M. B. Church, H. S. Paine and J. Hamilton, 295.
- Yellow Coralline** in foodstuffs; Detection of —. 585.
- Yellow Oleander:** Tests for —. 539.
- Yellow Phosphorus** in red phosphorus; Determination of very small amounts of —. R. H. Kray, 605.
- Yocco:** Caffeine in —. E. de Wildeman, 94.
- Z**
- Zeisel** method for determining alkoxy groups; Modification of —. E. P. Eaton and E. S. West, 725.
- Zinc:** Determination of — by means of oxyquinoline. R. Berg, 494.  
Diphenylamine as a quantitative reagent for —. W. H. Cone and L. L. Cady, 730.  
Electrometric determination of — by ferrocyanide. G. G. Reisaus, 106.  
in aluminium; Determination of small quantities of —. W. Böhm, 494.  
in presence of oxyquinoline; Acidimetric determination of —. F. L. Hahn and E. Hartleb, 495.  
Oxyquinoline as reagent for magnesium, aluminium and —. F. L. Hahn and K. Vieweg, 431.  
Toxicity of —. V. G. Heller and A. D. Burke, 554.
- Zoomaric Acid:** Composition of —. Y. Toyama, 727.
