

Errata

- Vol. XLVIII. 1923. P. 436, line 11, for "59.2 grms." read "69.28 grms."
Vol. XLIX. 1924. P. 265, lines 13 and 15, for "P × F" read "P + F."
P. 417, first footnote, for "1893, 18, 123" read "1918, 43, 123."
Vol. L. 1925. P. 59, line 18, for "23.5" read "0.235."
Vol. LI. 1926. P. 75, footnote. In both formulae for "23.5" read "0.235."
Vol. LIV. 1929. P. 485, third line from bottom. Throughout the abstract for "menthone" read "methone."
Vol. LV. 1930. Plate facing p. 262, the description of Fig. 2 should read "Film preparation of 'ropy' bread," as in the text on p. 261.
P. 300, Reverse the extraction apparatus.
P. 349, last abstract, for "cystine" read "cytisine" throughout the abstract.
P. 371, sixth line from bottom, for "iron" read "phosphorus."
P. 504, for the signature "A. J. Linsey" read "A. J. Lindsey."
P. 607, line 8 from the bottom, for the sentence commencing "A solution of 6 grms. of citric acid . . ." read "A solution of 2 grms. of citric acid in 10 c.c. of water is made slightly alkaline to phenolphthalein with sodium hydroxide solution, boiled, 4 grms. of citric acid added and the mixture added to the hot extract. . . ."

INDEX TO VOLUME LV.

INDEX TO NAMES.

A

- Abderhalden, E.** Handbuch der Biologischen Arbeitsmethoden. Part 315 (Review) 722.
Acree, S. F. and Fawcett, E. H. Isohydric indicators and pure water for accurate measurement of hydrogen ion concentrations and salt errors, 215.
Adkins, H. See MacCorquodale, D. W., Steenbock, H., and Adkins, H.
Agamennone, G. Determination of titanium dioxide in titanium white, 410.
Agcaoli, F. Sequidillas beans and oil, 139.
Ahmad, B. See Drummond, J. C., Ahmad, B., and Morton, R. A.
Ahmad, B., and Drummond, J. C. Relative vitamin A value of the body and liver oils of certain fish, 403.
Alber, H. Microchemical tests for glycerol, ethylineglycol and *d*-mannitol, 295.
Alimarin, I. P. Detection of traces of fluorine in rocks, 652.
Allen, N. Determination of small amounts of hydrogen peroxide and of ozone, 220.
Allen, W. F. Determination of caffeine in decaffeinated coffee, 519.
Amadeo, F. See Arreguine, V., and Amadeo, F.
Ambler, H. R. Sources of error in the determination of hydrogen in gases, 436.
— The determination of small quantities of oxygen in gases, 677.
Amelink, F. Microchemical identification of *Artemisia santonica*, 52.
Ames, O. C. See Pagel, H. A. and Ames, O. C.
Amos, A. J. See Kent-Jones, D. W. and Amos, A. J.

- Andrejew, P., and Gavrilow, A.** Colorimetric determination of turpentine in air, 63.
Andrew, R. L. The determination of minute amounts of iodine in soils and waters, 269.
Ansbacher, S. See Cherbuliez, E., and Ansbacher, S.
Arnaud, F. W. F., and Flint, J. W. The detection of oxalic acid, 501.
Arreguine, V., and Amadeo, F. Lead tetrachloride as a reagent for alkaloids. Microchemical characterisation of cocaine and strychnine, 519.
Arup, P. S. Review of a Text Book of Dairy Chemistry by E. R. Ling, 659.
Astrey, A., Mousseron, M., and Boisson, N. New micro-determination of calcium, 297.
Avent, A. G. Classification of cocoa butter and its substitutes by the freezing-point method, 477.

B

- Babko, A. K.** See Tananaeff, N. A., and Babko, A. K.
Bacharach, A. L. Vitamin A content of ghee, 589.
Bacharach, A. L. and Grinling, G. N. Presence of blue mineral colouring matter in "pure" gelatin, 566.
Bachem, A. See Boor, A. K., and Bachem, A.
Bachstetz, M. Constitution of orotic acid, 453.
Backer, H. J., and Klaassens, K. H. Determination of lanthanum, 650.
Bagchi, K. N. Annual Report of Chemical Analyst for Bihar and Orissa for the year 1929, 393.

- Bagnall, D. J. T.** See Tankard, A. R., and Bagnall, D. J. T.
- Bagnall, H. H.** Report of the City Analyst for Birmingham for the Third Quarter of 1929, 38; for the Fourth Quarter of 1929, 193; Annual Report for 1929, 446; for the Second Quarter of 1930, 569.
- Bahadur, M. A.** Report of the Acting Chemical Examiner for Madras for 1929, 693.
- Bailey, E. M.** Report of the Connecticut Agricultural Experimental Station for the year 1928, 129.
- Baird, J. C., and Prentice, J. H.** The changes with age of the hydrogen ion concentration of egg white and egg yolk, and of the refractive index of the egg white, 20.
- Baker, G. W.** Annual Report of the Government Analyst for Palestine for 1928, 48.
— Scientific evidence relating to fire-arms, with special reference to a recent murder trial, 738.
- Ballantyne, H.** Review of Law and Industry by G. S. W. Marlow, 303.
- Bamford, F.** Porphyrone test for Indian opium, 445.
— The fate of apomorphine after subcutaneous injection, 502.
- Banulescu, G.** Determination of molybdenum by means of *o*-hydroxyquinoline, 716.
- Barke, H. F.** Appointment as Public Analyst for the Borough of New Sarum (Salisbury City), 565.
- Barrenscheen, H. K., and Frey, M.** Identification of small amounts of bismuth in urine, 708.
- Basherov, S.** See Steenbock, H., and Associates.
- Bateman, F. C. L.** See Bennett, C. T., and Bateman, F. C. L.
- Bauer, O., and Deiss, E.** Sampling and analysis of alloys, 65.
- Baughman, W. F., and Jameson, G. S.** Determination of solid fatty acids in the original sample by the lead salt and alcohol method, 714.
- Baumann, K., and Kuhlmann, J.** Commercial nicotine-free, nicotine-poor and nicotine-harmless tobacco preparations, 142.
- Baver, L. D., and Rehling, C. J.** Use of barium sulphate for clarifying soil suspensions, with particular reference to colorimetric *pH* determinations, 645.
- Beauzumont, Y.** See Bertrand, G., and Beauzumont, Y.
- Becker, J. E., and McCollum, E. V.** Nature of dietary deficiencies of milk, 704.
- Begbie, R. S., and Gibson, H. J.** Occurrence of typhoid-paratyphoid bacilli in sewage, 593.
- Behr, L. D., Palmer, J. W., and Clarke, H. T.** Determination of bromides in biological material, 641.
- Belloc, G., Fabre, R., and Simmonet, H.** Biological study of sterols. Sterols of plankton, 587.
- Bennett, C. T., and Bateman, F. C. L.** Diastatic power of malt and malt extract, 763.
- Benoy, M. P.** Mineral content of the jujube or Chinese date, 200.
- Berg, R., and Teitelbaum, M.** Separation and determination of titanium by hydroxyquinoline, 596.
- Berry, A. J., and Durrant, P. J.** New adsorption indicators for argentometry, together with a comparison of their limits of sensitiveness, 613.
- Berry, H., and Gouzon, B.** Influence of the *pH* value on a colour reaction of adrenaline, 519.
- Bertram, S. H., and Van Meurs, W. A.** Apparatus for filtration in the warm of saturated solutions, 300.
- Bertrand, E.** Determination of cobalt in steel, 346
- Bertrand, G., and Beauzumont, Y.** Variations in the zinc content of animals with age. Influence of milk diet, 455.
- Bertrand, G., and Voronca-Spirt.** Presence and distribution of titanium in animals, 585.
- Bessey, G. E.** Modification of the glycerol method for determination of free lime, 651.
- Bey, L., and Fallebin, M.** A reaction of lead, 346.
- Bezssonoff, N.** Vitamin *A* and carotene, 340.
- Biber, W. A.** See Bogatsky, W. D., Biber, W. A., and Kischinewskaja, L. G.
- Bills, C. E.** See McDonald, F. G., and Bills, C. E.
- Bills, C. E., Massengale, O. N., and Prickett, P. S.** Factors determining the ergosterol content of yeast. I. Species, 522.
- Bills, C. E., and Wirick, A. M.** Feeding experiments with activated ergosterol, 342.
- Biltz, H.** Separation of lead and antimony, 648.
- Bishop, F.** See Mummery, W. R., and Bishop, F.
- Bitting, C. D.** See Picard, J., Peterson, E. G., and Bitting, C. D.
- Black, O. F., Eggleston, W. W., and Kelly, J. W.** Toxicity of *Bikukulla formosa* (Western bleeding heart), 525.
- Blair, R. W.** Annual Report of the Federated Malay States Institute for Medical Research for 1928, 580.
- Bléger, J.** See Sabetay, S., and Bléger, J.

- See also Crawford, M. E. F., Golding, J., Perry, E. O. V., and Zilva, S. S.

INDEX TO SUBJECTS.

A

- Aberdeen**: Report of the Public Analyst for the County of — for the year 1929. J. F. Tocher, 387.
- Absorption** spectra in relation to vitamin *A*. R. A. Morton, I. M. Heilbron and F. S. Spring, 401.
spectra of rat-liver oils; Transformation of carotene into vitamin *A*, as shown by a study of the —. N. S. Capper, 710.
spectra of sterols; Colour reaction and — in relation to structure. I. M. Heilbron and F. S. Spring, 402.
- Acetaldehyde** content of Bartlett pears; Relation of picking time to —. C. P. Harley, 151.
- Acetic Anhydride**: Determination of the purity of —. C. K. Rosenbaum and J. H. Walton, 645.
- Acetone** in the urine; Determination of isopropyl alcohol in presence of —. C. A. Cook and A. H. Smith, 144.
Volumetric determination of —. A. Meyer and S. Mathey, 714.
- Acetyl Value**: Determination of the — by thermometric titration. T. Somiya, 461.
of unsaturated fatty oils. S. Ueno and N. Kuzei, 646.
- Acetylmethylcarbinol** in the blood of the higher animals; Presence of 2:3-butylene-glycol and —. M. Lemoigne and P. Monguillon, 642.
- Acid** for submarine batteries, 755.
- Acid-base** balance in the ash of plants; Determination of the —. D. E. Frear, 767.
- Acid Lead Arsenate**: Composition of commercial — and its relation to arsenical injury. H. S. Swingle, 60.
- Acidity** in canned fruits. E. F. Kohman and N. H. Sanborn, 582.
in writing inks; Potentiometric determination of —. H. A. Bromley and L. W. Causer, 277.
of fruit products; Use of lead acetate in determining —. B. G. Hartmann and F. Hillig, 517.
of oils and fats determined by the quinhydrone electrode in non-aqueous solutions. H. Seltz and L. Silverman, 210.
- Acids**: organic-; *p*-Phenylphenacyl bromide as a reagent for identifying —. N. L. Drake and J. Bronitsky, 713.
organic-; Volumetric determination of certain — with ceric sulphate. H. H. Willard and P. Young, 210.
- Actinomycetes**: Molds, Yeasts and —. A. T. Henrici (Review), 774.
- Adrenaline**: Influence of the *pH* value on a colour reaction of —. H. Berry and B. Gouzon, 519.
- Adsorption** indicators for argentometry, together with a comparison of their limits of sensitiveness. A. J. Berry and P. J. Durrant, 613.
- Agar-bran** biscuits, 129.
- Agra and Oudh**. See **United Provinces**.
- Agricultural** analysis; Abstracts: 60, 151, 406, 645, 712, 767.
Analysts; Official appointments of —. 277, 566.
Chemists' Reports. See **Ceylon**.
Experiment Station, Connecticut. Report on Food Products and Drug Products for the year 1928, 129.
Produce (Grading and Marking) (Eggs) Regulations 1930, 635.
Produce (Grading and Marking), England. Ministry of Agriculture, Statutory Rules and Orders, 1930, No. 132, 698.
Produce (Grading and Marking) Regulations, 45, 328.
- Air**: combustible gases in human expired —; Traces of. T. R. Parsons, 585.
Fatalities due to vitiated — produced by oxidation of vegetable refuse. A. R. Tankard and D. J. T. Bagnall, 673.
turpentine in —; Colorimetric determination of. P. Andrejew and A. Gavrilow, 63.
- Alcohol**: Butyl —. See **Butyl Alcohol**.
in tarabakani liver oil; New —. M. Tsujimoto, 212.
Isoamyl —. See **Isoamyl Alcohol**.
Isobutyl —. See **Isobutyl Alcohol**.
Isopropyl —. See **Isopropyl Alcohol**.
Lead salt and — method for the determination of solid fatty acids in the original sample. W. F. Baughman and G. S. Jamieson, 714.
- Alcoholometry**: F. G. H. Tate (Review), 663.
- Alcohols**: Distinction of isoamyl, isobutyl and *n*-butyl — from one another, and from the lower — by means of ammonium cobalthiocyanate. H. Weber, 208.
Higher — and illipene in commercial illipé butter. M. Tsujimoto, 212.
higher fatty — in sperm whale oils; Quantitative determination of —. T. P. Hilditch and J. A. Lovren, 152.
- Aldehyde**-oxidation reactions for phenols, particularly the opium alkaloids. C. C. Fulton, 141.

- Aldehydes:** Action of — on wheaten bread. L. Karásconyi, 135.
Reaction of aromatic —. M. V. Jonescu, 344.
- Aliphatic compounds;** Tests of various — as fumigants. R. C. Roark and R. T. Cotton, 407.
- Alkali Chloride** converted into oxalate. N. A. Tananaeff and N. A. Lasarkevitch, 652.
- Alkali Metals:** Separation and identification of the — and alkaline earth metals by means of *iso*-amyl alcohol. H. Yagoda, 649.
- Alkaline Earth Metals:** Separation and identification of the alkali and — by means of *iso*-amyl alcohol. H. Yagoda, 649.
- Alkalinity** in commercial lime; Determination of available —. C. M. Jovellanos, 220.
- Alkaloidal titrations;** Determination of quinine, cinchonine and cinchonidine with the quinhydrone electrode, and the choice of end-points in —. E. B. R. Prideaux and F. T. Winfield, 561.
- Alkaloids:** Ephedra —. T. and H. Smith, 142.
Lead tetrachloride as a reagent for —. Microchemical characterisation of cocaine and strychnine. V. Arreguine and F. Amadeo, 519.
Micro-detection of —. G. D. Lander, 474.
Opium —. 141.
Potentiometric determination of — by means of potassium iodomercurate. L. Maricq, 284.
- Allanblackia Stuhlmannii** seeds and oil from Tanganyika, 201.
- Allen's Organic Analysis.** Vol. VII. (Review), 73.
- Alloy Steels:** Iodimetric determination of vanadium in ferrovanadium and —. W. Werz, 769.
molybdenum in —; Determination of. W. Hertz, 411.
- Alloys:** nickel-cobalt —; Investigation of. 93.
Sampling and analysis of —. O. Bauer and E. Deiss, 65.
tin-lead —; Iron kettles tinned with. J. T. Dunn and H. C. L. Bloxam, 34.
- Alum** in potato crisps. 685.
- Alumina** in borosilicates; Determination of —. O. W. Krasnowsky, 154.
- Aluminium:** Cerium sulphate as a confirmatory reagent in the detection of —. H. Yagoda and H. M. Partridge, 716.
Gravimetric determination of — by means of potassium cyanate. B. J. F. Dorrington and A. M. Ward, 625.
in chrome calf leathers; Determination of —. H. B. Merrill and R. G. Henrich, 647.
Macro determination of —. 299.
Micro-determination of —. A. Pichler, 298.
Separation of indium from —. 219.
Separation of iron and — by Chancel's method. P. L. L. Robinson and W. E. Scott, 154.
Separation of thallium from —. 409.
- Aluminium Chloride:** free hydrochloric acid in presence of ferric chloride and —; Determination of. K. Küchler, 597.
- American cherry kernel oil.** G. S. Jamieson and S. I. Gertler, 761.
- Amino-Naphthol-Sulphonic Acids:** Use of isomeric — for colorimetric determination of phosphate. Béla Vásárhelya, 350.
- Aminosäureanhydride:** Die Rolle der Zyklischen — in der Neueren Strukturchemie der Proteine (Review). E. Klarmann, 71.
- Ammonia** in flesh; Determination of saline — and detection of incipient putrefaction. B. Glassmann and F. Rochwarger, 281.
Sensitive test for —. K. G. Makris, 715.
- Ammoniated Quinine** tablets, 505.
tincture. 447.
- Ammonium Cobalthiocyanate** as means of distinguishing isoamyl, isobutyl and *n*-butyl alcohols from one another, from the lower alcohols and from amyl and butyl acetates. H. Weber, 208.
- Ammonium Glycyrhizates:** (Commercial glyzines). A. Bonis, 140.
- Ammonium Oxalate** in systematic qualitative analysis; Application of —. M. O. Charmandarjan, 153.
- Ammonium Salts:** Absorption of carbon monoxide by cuprous —. W. Gump and I. Ernst, 464.
- Amyl Acetate:** Distinction of isoamyl, isobutyl and *n*-butyl alcohols from butyl and — by means of ammonium cobalthiocyanate. H. Weber, 208.
- Amylase** in milk; Test for —. P. Weinstein, 582.
of honey; Stability of —. 671
- Anaerobic** bacteria causing black-rot of eggs. R. M. Bohart, 206.
- Anaesthetics:** Use of the antimony and antimony trioxide electrode for determining the dissociation constants of certain local — and related compounds. F. Fenwick and E. Gilman, 52.
- Analysis** by deputy under Sale of Food and Drugs Act, 1926. 39, 40.
Capillary —. Identification of small amounts of formaldehyde with dimethyl-hydroresorcinol. L. Kofler and H. Hilbäck, 528.
Inorganic —. *See Inorganic analysis.*
Metallurgical —; Select Methods of. (Review), W. A. Naish and J. E. Clennell, 158.
Organic —. *See Organic analysis.*
Qualitative —. *See Qualitative Analysis.*
Quantitative —. *See Quantitative Analysis.*
Volumetric —. I. Theoretical Foundations. I. M. Kolthoff. 2nd Ed. (Review), 660.
- Analytical Methods;** Activities of Standing Committee on Uniformity of —. 240.
First Report of Sub-Committee on Determination of Arsenic, Lead and other Poisonous Metals in Food Colouring Materials. 102.
Sixth Report of the Essential Oil Sub-Committee: Determination of citral in lemon oil. 109.
Seventh Report of Essential Oil Sub-Committee: Determination of Solubilities, 386.
Milk Products Sub-Committee Report No. 2: Determination of sucrose in sweetened condensed milk. 111.

Analytical—*continued.*

Processes : a Physico Chemical Interpretation. (Review), T. B. Smith, 156.

Animal materials; Determination of manganese in

— J. T. Skinner and W. H. Peterson, 640.
oils; Thiocyanogen values of marine —, Y. Toyama and T. Tsuchiya, 292.

sterols; Application of the Liebermann and Burchard reaction to the differentiation of vegetable and —. R. Meesemaecker and H. Griffon, 588.

Animals: Acetylmethylcarbinol and 2:3-butylene-glycol in the blood of the higher —, M. Lemoigne and P. Monguillon, 642.

titanium in —; Presence and distribution of. G. Bertrand and Veronca-Spirt, 585.

Variations in the zinc content of — with age. Influence of milk diet. G. Bertrand and Y. Beauzemont, 455.

Anti-Beri-Beri vitamin content; Colorimetric method for the assay of rice for —, J. P. Spruyt, 460.**Antimony** and antimony trioxide electrode used for determining the dissociation constants of certain local anaesthetics and related compounds. F. Fenwick and E. Gilman, 52.

in foil-wrapped cheeses; Occurrence of tin and —. C. H. Manley, 191.

in lead bullion. 314.

Separation of lead and —. H. Biltz, 648.

Antimony Trichloride colour reaction for vitamin

A; Study of the —. E. R. Norris and A. E. Church, 204. II. Dilution curve of

cod-liver oil with —. E. R. Norris and A. E. Church, 458.

colour test for cod-liver oil; Variations in results obtained by different observers with —. N. Evers, 287.

colour test; Permanence of vitamin *A* in cod liver oil as shown by the —. N. Evers, 287.

reaction of cod-liver oils. J. C. Drummond, 458.

Some liver oils yielding a strong colour reaction with —. S. and S. Schmidt-Nielsen, 286.

Antimony Trioxide: Use of antimony and —

electrode for determining the dissociation constants of certain local anaesthetics and related compounds. F. Fenwick and E. Gilman, 52.

Antineuritic vitamin; Jansen and Donath

procedure for isolating —. R. R. Williams, R. E. Waterman and S. Gurin, 590.

Antirachitic activation of some derivatives of

ergosterol and cholesterol. D. W. Mac-Corquodale, H. Steenbock and H. Adkins, 587.

activity in irradiated milk. 56.

potency of milk; Irradiation of milk for increasing the —. D. Nabarro and J. O. Hickman, 206.

value of cows' milk as modified by exposure of the cow to sunlight and to radiations from a quartz mercury vapour lamp. H. Steenbock and Associates, 457.

Antirachitic—*continued.*

value of irradiated yeast. S. K. Kon and M. Mayzner, 400.

vitamin *D*; Standard for —. (Medical Research Council). 692.

Antiscorbic fraction of lemon juice. VIII. S. S. Zilva, 289.

vitamin in apples. M. F. Bracewell, E. Hoyle and S. S. Zilva, 766.

Apomorphine: Fate of — after subcutaneous injection. F. Bamford, 502.**Apparatus**: Abstracts: 223, 300, 351, 416, 468, 530, 600, 656, 773.**Apples**: Agricultural Produce (Grading and Marking) (—) Regulations, 1929. 45.

Antiscorbic vitamin in —. M. F. Bracewell, E. Hoyle and S. S. Zilva, 766.

Grading and Marking Regulations. 45.

Senescence in —. 509.

Wastage in imported —. 634.

Applied Chemistry: Annual Reports on the Progress of —. Vol. XIV. 532.

Catalytic Processes in —. (Review), T. P. Hilditch, 68.

Appointments: Official —. 277, 383, 565.**Arabinogalacturonic Acid** derived from orange pectin. J. R. Bowman and R. B. McKinnis, 336.**Arachidonic Acid** in lard. J. B. Brown and E. M. Deck, 335.**Arachin**: Properties of — and conarachin and the proportionate occurrence of these proteins in the arachis nut. D. B. Jones and M. J. Horn, 395.**Arachis Nut**: Properties of arachin and conarachin and the proportionate occurrence of these proteins in the —. D. B. Jones and M. J. Horn, 395.**Arachis Oil**: Detection and determination of sesame oil when mixed with other edible oils, with particular reference to —. E. H. Bunce, 567.

mixtures; Determination of the molecular weights of the higher saturated fatty acids and its use in determining lignoceric acid in hardened —. J. Grossfeld, 138.

Argentometry: New adsorption indicators for —, together with a comparison of their limits of sensitiveness. A. J. Berry and P. J. Durrant, 613.**Arginase** method for determining arginine and its use in the analysis of proteins. A. Hunter and J. A. Dauphinee, 203.**Arginine**: Arginase method for determining — and its use in the analysis of proteins. A. Hunter and J. A. Dauphinee, 203.**Aromatic aldehydes**; Reaction of —. M. V. Jonescu, 344.

hydrocarbons. *See Hydrocarbons.*

Arsenic apparatus; Modified Gutzeit —. A. J. Lindsey, 503.

Colorimetric determination of —. A. Polijakow and N. Kolokolow, 216.

content of Baden wines. E. Remy and F. Richter, 282.

Arsenic—continued.

- content of the well water of Choussy, at La Bourboule, and fixation of the arsenic by organisms. R. Clogne, A. Courtois and Cazala, 456.
- determination of minute quantities of —; New type of mercury cathode cell for. T. Callan and R. T. Parry Jones, 90.
- in food colouring materials; First Report of Sub-Committee on determination of —. 102.
- in writing materials. G. Kappeller, 771.
- Arsenical injury**; Composition of commercial acid lead arsenate and its relation to —. H. S. Swingle, 60.
- Arsenophotungstic Acid**: Detection and determination of cobalt by —. A. Liebersohn, 294.
- Arsinic Acids**: Titrimetric determination of primary —. H. King and G. V. Rutherford, 717.
- Artemisia Santonica**: Microchemical identification of —. F. Amelink, 52.
- Artificial Cream Act**: Action by private individuals under the —. 43.
- Cream sandwiches and the —. (Legal Notes), 689.
- Ascaridole** in chenopodium oil; Determination of —. T. T. Cocking and F. C. Hymas, 180.
- Ash** of plants; Determination of the acid-base balance in —. D. E. Frear, 767.
- Asphaltene**: Determination of —. F. J. Nellensteyn and N. M. Roodenburg, 768.
- Asphyxiation** by wet rubber. 754.
- Assaying**: Magnesite: its application in —. R. J. B. Kethel, 658.
- Atmospheric Corrosion of Metals**. 232.
- pollution; Investigation of —. Report of Dept. of Scientific and Industrial Research on observations in the year ending, March 31st, 1928. 450; year ending March 31st, 1929, 755.
- Pollution of Metals. 232.

B

- Bacteria**: Anaerobic — causing black-rot in eggs. R. M. Bohart, 206.
- aerobic non-sporulating — producing gas from lactose; Significance in oysters and water of. C. A. Perry, 58.
- Bacterial Metabolism**. (Monographs on biochemistry). (Review), M. Stephenson, 355.
- Bacteriological analysis**; Abstracts. 57, 206, 455, 523, 593, 711.
- test for pasteurised food: The heat resistance curve. C. Duke, 14.
- Bacteriology** of wheat and flour; Preliminary studies in —. D. W. Kent-Jones and A. J. Amos, 248.
- Bacterium C**: Standardisation of the strength of — used in the Chapman biological method for determining the preservative power of hops. A. Chaston Chapman, 57.
- Baden wines**; Composition of —. E. Remy and F. Richter, 282.
- Bake-apple Berry**: 129.
- Banana** seeds; Occurrence of crystalline globulin in —. G. L. Keenan and J. D. Wildman, 637.
- Bananas**: Wastage in imported —. 634.
- Barbituric Acid** compounds; Microscopic detection of —. L. van Itallie and A. J. Steenhauer, 717.
- Barium**: Microchemical test for — with sodium tungstate. G. Denigès, 156.
- Micro-separation of calcium and —. R. Strebing, 298.
- Barium Sulphate**: Use of — for clarifying soil suspensions, with particular reference to colorimetric pH determinations. L. D. Bayer and C. J. Rehling, 645.
- Barley**: "Commercially pure —, as grown." (Legal Notes), 687.
- Barytes** in cheese. (Legal Notes), 194.
- Bases**: guanidine — in blood; Colorimetric determination of. J. J. Pfiffner and V. C. Myers, 521.
- Batteries**: Acid for submarine —. 755.
- Baumé Gravity Tables** for Turpentine. W. P. Smith and F. P. Veitch, 604.
- Beef**: Agricultural Produce (Grading and Marking). (—) Regulations, 1929. 45.
- extract as a source of vitamin C. R. Hoagland and G. G. Snider, 593.
- Grading and Marking Regulations. 45.
- liver; Neutral fat of —. W. R. Bloor and R. H. Snider, 518.
- suet; Labelling of —. 388.
- Beer**: Preservation of —. R. de Fazi, 137.
- Beers**: Chemical and physical properties of bright lager —. E. Remy, 518.
- Bees**: Toxicity of pyrethrum vapours to honey —. J. M. Ginsburg, 596.
- Beet Sugar** factories effluent. 510.
- Benzenometer**: W. Vaubel, 225.
- Benzoic Acid**: Detection and determination of —. J. C. Harral, 445.
- Berberine**: Microchemistry of —. M. Wagenaar, 222.
- Berkshire**: Appointment of Deputy Agricultural Analyst for —. 566.
- Beryllium** in steel; Determination of —. F. Spindeck, 347.
- Preparation of pure —. 514.
- Beverages**: copper and lead in —; Determination of minute amounts of. F. W. Richardson, 323.
- Bezssonoff's Reagent**: Use of — for detecting vitamin C in Baden wines. E. Remy and F. Richter, 282.
- Bihar and Orissa**: Annual Report of Chemical Analyst for — for 1929. K. N. Bagchi, 393.
- Annual Report of Public Analyst for Mining Settlements of — for 1929. B. K. Mandal, 632.
- Bikukulla Formosa**: Toxicity of —. O. F. Black, W. W. Eggleston and J. W. Kelly, 525.

- Biochemical analysis**; Abstracts: 53, 143, 203, 285, 337, 399, 455, 520, 585, 640, 704, 764.
- Biochemistry**: Course in Practical —. A. T. Cameron and F. T. White, 232.
 Monographs on —. Bacterial Metabolism. (Review), M. Stephenson, 355.
 Outlines of —. (Review), R. A. Gortner, 227.
 Textbook of —. A. T. Cameron, 2nd Ed. 232.
- Biological fluids**; Colorimetric method for quantitative determination of nitrates and nitrites in —. M. Whelan, 337.
 liquids; Colorimetric method for determining sulphur and sulphate in —. K. Lang, 203.
 material; Colorimetric determination of manganese in —. M. B. Richards, 554.
 material; Determination of bromides in —. L. D. Behr, J. W. Palmer and H. T. Clarke, 641.
 Methods; Handbook of —. Part 315. E. Abderhalden (Review), 722.
 oxidations; Indophenol reaction in —. D. C. Harrison, 146.
 study of sterols. Sterols of plankton. G. Belloc, R. Fabre and H. Simmonet, 587.
 tissues; Mountants for —. W. Marshall, 416.
- Biologischen Arbeitsmethoden**; Handbuch der —. Part 315. E. Abderhalden (Review), 722.
- Biology**: Plant —. An Outline of the Principles underlying Plant Activity and Structure. H. Godwin (Review), 778.
- Birkenhead**: Appointment of Agricultural Analyst for County Borough of —. 566.
- Birmingham**: Appointment of Additional Public Analyst for County Borough of —. 383.
 Report of the City Analyst for — for the Third Quarter of 1929. H. H. Bagnall, 38; for the Fourth Quarter of 1929, 193; Annual Report for the year 1929, 446; for the Second Quarter of 1930, 569.
- Bismuth** in lead bullion; Rapid determination of copper and — by internal electrolysis. E. M. Collin, 312.
 in lead ores; Determination of — by internal electrolysis. E. M. Collin, 680
 in urine; Identification of small amounts of —. H. K. Barrenscheen* and M. Frey, 708.
 lozenges; Compound —. 570.
 Quantitative separation of lead and —. H. Funk and J. Weinzierl, 715.
 tablets; Sale of —. A question of warranty. (Legal Notes), F. C. Bullock, 752.
- Bituminous road-surfaces**; Extraction apparatus for —. F. J. Nellensteyn, 300.
- Black-Rot** of eggs; Anaerobic bacteria causing —. R. M. Bohart, 206.
- Bleaching** of flour with chlorine and nitric oxide; Detection of —. J. Kulman, 281.
- Bleistiftschrift**: Atlas der —. S. Türkel (Review), 603.
- Blood**: Acetylmethylcarbinol and 2 : 3-butylene-glycol in the — of higher animals. M. Lemoigne and P. Monguillon, 642.
- Blood—continued.**
 analysis; Unlaked — as a basis for —. O. Folin, 337.
 fat; Titration method for —. J. L. Stoddard and P. E. Drury, 53.
 groups; Medico-legal significance of —. F. Schiff, 59.
 guanidine bases in —; Colorimetric determination of. J. J. Piffner and V. C. Myers, 521.
 iodine in —; Micro-colorimetric method for the quantitative determination of. R. G. Turner, 707.
 Microchemical, microspectroscopical and quantitative examination of —. M. Wagenaar, 405.
 silver in organs and —; Micro-determination of. L. Pincussen and W. Roman, 350.
 stains; Alumina cream as means of obtaining clear extracts of —. 49.
 Unlaked — as a basis for — analysis. O. Folin, 337.
 urea nitrogen; Determination of — by direct Nesslerisation. J. M. Looney, 642.
- Bombay mace** substituted for ground mace. 193.
- Bondon milk** cheese. 686.
- Bone**: Influence of light conditions on constituents of —. 390.
- Borate**: Reaction of sugars and —. II. Optical activity of sugars in borax solution and the configuration of mutarotatory isomers. M. Levy and E. A. Doisy, 50.
- Borax** honey. 389.
 in ground ginger. 39.
 Modification of the B. P. method of titrating —. 29.
 solution; Optical activity of sugars in —; and the configuration of mutarotatory isomers. M. Levy and E. A. Doisy, 50.
- Boric Acid** in caviare. (Legal Notes), 40.
 Indicators for determining —. 26.
 Modification of B.P. method of titrating —. 29.
 Modification of R. T. Thomson's method for —. 30.
 solution; Aids to the titration of —. 23.
- Borneo Tallow**: Component glycerides of —. T. P. Hilditch and J. Priestman, 396.
 in cocoa butter; Detection of —. 9.
- Boron** compounds in food and drugs; Study of the methods of determining —. Part III. Conditions required for quantitative titration. A. S. Dodd, 23.
- Borosilicates**: alumina in —; Determination of. O. W. Krasnowsky, 154.
- Brazil Nut Oil**: H. A. Schuette, R. W. Thomas and M. Duthey, 762.
- Bread**: H. Snyder. (Review), 725.
 Action of aldehydes on wheaten —. L. Karásonyi, 135.
 corncockle in flour and —; Detection of. R. Fischer and E. Riedl, 699.
 White and brown —. • R. McCarrison, 56.
- Bristol**: Report of the City and County Analyst for — for the year 1929. E. Russell, 685.

- British Cast Iron Research Association:** Report No. 72. Recommended methods for sampling and analysis of foundry products. 198.
- Broccoli:** Agricultural Produce (Grading and Marking) (—) Regulations, 1929. 45.
- Bromides** in biological material; Determination of —. L. D. Behr, J. W. Palmer and H. T. Clarke, 641.
- Bromine:** Simple micro analytical separation of chlorine and —. L. Moser, 413.
- Brucine:** Microchemistry of —. M. Wagenaar 222.
- Buckinghamshire:** Appointment of Deputy Agricultural Analyst for —. 566.
- Buffer:** Diethylbarbiturate —. L. Michaelis, 464.
- Bull Frog:** Fatty oil of the —. S. Tasaki and J. Yamamoto, 645.
- oil. Y. Iwamoto and M. Kisegawa, 409.
- Bullets:** Examination of —. 579.
- X-ray photography for examining —. 740.
- Burnley:** Appointment of Agricultural Analyst for County Borough of —. 566.
- Appointment of Public Analyst for County Borough of —. 383.
- Butea Frondosa:** Oil from seeds of —. M. C. Tummin Katti and B. L. Manjunath, 283.
- Butyl Acetate:** Distinction of isoamyl, isobutyl and *n*-butyl alcohols from amyl and — by means of ammonium cobalthiocyanate. H. Weber, 208.
- n*-Butyl Alcohol:** Distinction of — from isoamyl and isobutyl alcohols, from the lower alcohols and from amyl and butyl acetates by means of ammonium cobalthiocyanate. H. Weber, 208.
- 2: 3-Butylene-glycol** in the blood of the higher animals; Presence of acetylmethylcarbinol and —. M. Lemoigne and P. Monguillon, 642.
- Butter** fat; Examination of — for admixed carcase fats. 84.
- Fatty acids of nutmeg —. G. Collin and T. P. Hilditch, 335.
- Influence of salts associated with common salt on —. F. E. Budagian and W. P. Pawlow, 283.
- Irvingia —. G. Collin and T. P. Hilditch, 336.
- Rancid —. (Legal Notes), 633.
- Variations in the component fatty acids of — due to changes in seasonal and feeding conditions. T. P. Hilditch and J. J. Sleight-holme, 702.
- Vitamin A of —. R. A. Morton and I. M. Heilbron, 710.
- Byre** samples of milk. 387.
- C**
- Cacao:** Sterols of —. H. Labbé, H. de Balsac and R. Lerat, 51.
- Cadmium** in spelter and zinc ores; Determination of copper and — by rapid internal electrolysis. E. M. Collin, 495.
- Cadmium**—*continued.*
New reagent for —. Evrard, 66.
Rapid gravimetric determination of — as oxalate. J. Dick, 66.
Specific test for —. F. Pavelka and E. Kolmer, 599.
- Caffeine:** Adsorption of — by active charcoal, particularly from coffee infusions. F. Sartorius and W. Ottemeyer, 140.
Coffee deprived of —. 129.
in coffee; Micro-determination of —. A. C. Röttinger, 348.
in decaffeinated coffee; Determination of —. W. F. Allen, 519.
- Cake:** Warranties as to cattle —. (Legal Notes), 447.
- Calamine** ointment; Compound —. 570.
- Calcium:** micro-determination of —; New. A. Astrey, M. Mousseron and N. Boisson, 297.
Micro-determination of magnesium with *o*-oxyquinoline, and its separation from —. R. Strebinger and W. Reif, 297.
Micro-separation of barium and —. R. Strebinger, 298.
- Calcium Hydride:** Gasometric determination of water (moisture) by means of —. O. Notevarp, 344.
- Calcium Nitride:** total nitrogen in —; Determination of. W. Lepper, 528.
- Calculi:** Analysis of small urinary —. C. Newcomb, 399.
- Calorimeter** for specific heat determinations. 512.
- Calotropis Gigantea:** Tests for madar juice (—) and for snake venom. D. N. Chatterji, 683.
- Camberwell:** Appointment of Public Analyst for Metropolitan Borough of —. 383.
- Camphorated Oil:** 389.
- Canada:** Report of the Dominion Chemist for the year ending March 31, 1929. F. Shutt, 389.
- Canadian** preserved fruits and jams; Analyses of —. 392.
- Cancer-Producing** substances; Further experiments on —. E. L. Kennaway, 460.
tars and oils and related substances; Spectra of —. I. Hieger, 460.
- Cane-Sugar** Manufacturers and their Chemists; Handbook for —. 7th Ed. G. L. Spencer (Review), 419.
- Canned** fruits; Acidity and corrosion in —. E. F. Köhman and N. H. Sanborn, 582.
- Capillary** analysis. Identification of small amounts of formaldehyde with dimethylhydro-resorcinol. L. Kofler and H. Hilbck, 528.
- Capsicum:** Bio-assay of —. J. C. Munch, 638.
- Carbolic Acid** in pharmaceutical preparations; Determination of —. J. Rae, 398.
in soils; Occurrence of elementary —. G. W. Robinson and W. McLean, 712.
in steel; Micro-determination of —. 772.
-nitrogen ratio of soil organic matter. W. McLean, 712.

- Carbolic Acid**—*continued*.
Semi-micro combustion method for determining hydrogen and ——. W. M. Lauer and F. J. Dobrovolsky, 467.
- Carbon Monoxide**: Absorption of — by cuprous ammonium salts. W. Gump and I. Ernst, 464.
haemoglobin; Spectrographic study of —. A. K. Boor and A. Bachem, 405.
- Carbonates**: Microchemical tests for —. F. Feigl and P. Krumholz, 655.
- Carbonisation**: Assay of coal for — purposes (Part III). Fuel Research Paper No. 24. J. G. King and L. J. Edgcombe, 279.
- Carboxyl Group**: Detection and determination of the — by distillation with zinc dust in a stream of hydrogen. A. W. van der Haar, 61.
- Cardiac glucosides**; Examination of samples of —. 196.
- Carotene**: Alleged contamination of — by vitamin A. N. S. Capper, 459.
and vitamin A. Transformation of — into vitamin A, as shown by a study of the absorption spectra of rat-liver oils. N. S. Capper, 710.
Method of purifying — and the vitaminic activity of the purified product. M. Javillier and L. Emerique, 588.
Oxygen equivalent determined with potassium permanganate in pyridine solution. J. H. C. Smith and H. A. Spoehr, 340.
Relation of — to vitamin A. E. M. Hume and I. Smedley-Maclean, 288.
relation of — to vitamin A; Further observations on the. J. C. Drummond, B. Ahmad and R. A. Morton, 643.
Vitamin A and —. N. Bezsonoff, 340.
Vitamin A and —. II. Vitamin A activity of red palm oil —. III. Absence of vitamin D from —. IV. Effect of various modifications upon vitamin A activity of —. T. Moore, 288. V. Absence of the liver oil vitamin A from —. VI. Conversion of — into vitamin A *in vivo*. T. Moore, 588.
Vitaminic activity of —. M. Javillier and L. Emerique, 341.
- Carrots** in marmalade; Detection of —. A. Hanak, 582.
- Cartridge Cases**: Scientific examination of —. 740.
- Casein** in vitamin tests. 197.
- Caseins**: Solubility method of classifying acid —. W. R. Mummery and F. Bishop, 367.
- Cassia**: Oil of —. Naumann *v.* Radermacher. (Legal Notes), 571.
- Cast Iron**: British — Research Association Report No. 72; Recommended methods for sampling and analysis of foundry products, 198.
- Catalase** reaction of milk. P. Weinstein, 581.
- Catalytic** Processes in Applied Chemistry. (Review), T. P. Hilditch. 68.
- Cathode**: mercury-; Electrolytic cell for use with the —. A. F. Melaven, 416.
- Cathode Cell**: New type of mercury — for determining minute quantities of arsenic. T. Callan and R. T. Parry Jones, 90.
- Cattle** cake; Warranties as to —. (Legal Notes), 447.
cod-liver oil. (Legal Notes), 194.
Drinking waters for —. T. McLachlan, 372.
- Caviare**: Boric acid in —. (Legal Notes), 40.
- Cell**: Electrolytic — for use with the mercury cathode. A. D. Melaven, 416.
- Cells** of plants; Detection of nickel in —. A. Martini, 456.
- Cellulose** fibres; Method for determining the degree of purity of —. M. Freiburger, 462.
- Cellulose Formate**: Analysis of — by oxidation. G. Tocco and A. Nyssens, 408.
- Cement** works; Damage caused by fumes and smoke from —. (Legal Notes), 449.
- Centrifuge** tube with removable cap. A. Friedrich, 351.
- Ceric Ion**: Indicators for the reaction between ferrous ion and —. N. H. Furman and J. H. Wallace, Jr., 527.
- Ceric Sulphate** for volumetric determination of certain organic acids. H. H. Willard and P. Young, 210.
Hydroquinone determined with —. N. H. Furman and J. H. Wallace, Jr. 408.
Volumetric determination of mercurous mercury with —. H. H. Willard and P. Young, 295.
Volumetric determination of tellurous acid with —. H. H. Willard and P. Young, 295.
Volumetric determination of thallium with —. H. H. Willard and P. Young, 217.
- Cerium**: Separation of thallium from —. 410.
- Cerium Sulphate** as a confirmatory reagent in the detection of aluminium. H. Yagoda and H. M. Partridge, 716.
- Ceylon**: Report of the Agricultural Chemist, A. W. R. Joachim, for the year 1928. 128.
Report of the Government Analyst for — for 1929. C. J. Symons, 578.
- Chalking** of paintwork; Determination of degree of —. R. Kempf, 295.
- Chancel Method** of separating iron and aluminium. P. L. L. Robinson and W. E. Scott, 154.
- Chapman** biological method for determining the preservative power of hops; Standardisation of the strength of the organism used in —. A. Chaston Chapman, 57.
- Charcoal**: Adsorption of insulin on —. H. Jensen and A. De Lawder, 586.
Use of active — for the adsorption of caffeine, particularly from coffee infusions. F. Sartorius and W. Ottmeyer, 140.
- Cheddar** cheese. (Legal Notes), 127.
- Cheese**: antimony and tin in foil-wrapped —; Occurrence of. C. H. Manley, 191.
Barytes in —. (Legal Notes). 194.
Biological test for pasteurised —. 14.
Bondon milk —. 686.
Cheddar —. (Legal Notes), 127.

- Cheese**—*continued*.
 fat in Gruyère —; Percentage of. P. Sajous, 701.
 Foil-wrapped —. 751.
 Labelling of —. 43.
- Chemical Affinity**. (Review), L. J. Hudleston, 72.
 Dictionary. (Review), J. W. D. Hackh, 231.
 Microscopy; Handbook of —. Vol. I. E. M. Chamot and C. W. Mason (Review), 470.
- Chemistry**: Applied —. *See Applied Chemistry*.
 Dairy —; Textbook of. E. R. Ling, (Review), 659.
 in Daily Life. (Review), S. Glasstone, 157.
 of the Colloidal State. J. C. Ware. (Review), 471.
 Inorganic —. *See Inorganic Chemistry*.
 Organic —. *See Organic Chemistry*.
 Pharmaceutical — for Students of Pharmacy and Pharmacists; A Textbook of Inorganic. C. H. Rogers (Review), 602.
 Spirit of —. A. Findlay, 604.
 Surface —; An Introduction to. 2nd Ed. E. K. Rideal. (Review), 601.
 Theoretical and Inorganic —; Comprehensive Treatise on. Vol. X. J. W. Mellor (Review), 773.
- Chenopodium Oil**: ascaridole in —; Determination of. T. T. Cocking and F. C. Hymas, 180.
- Chestnut tannin**; Reaction for — with nitrous acid. P. Zijdnev, 293.
- Chestnut Wood** extract in a mixture of other tanning extracts; Detection and determination of —. F. F. Marshall, 64.
- Cherry kernel oil**; American —. G. S. Jamieson and S. I. Gertler, 761.
- Chicory** agglomerates and their adulteration. L. Gobert, 201.
- Chimica Applicata**: Dizionario di Merceologia e di —. 5th Ed. Vols. I and II. (Review), G. V. Villavecchia, 357.
- Chinese date**; Mineral content of the jujube (—). M. P. Benoy, 200.
 liquorice root. New substance in —. P. A. Houseman and C. K. Swift, 51.
 vegetable (stillingia) tallow; Component glycerides of —. T. P. Hilditch and J. Priestman, 761.
 wood (tung) oil; Composition and polymerisation of —. E. R. Bolton and K. A. Williams, 360, 366.
- Chloral** in syrup of —; Determination of. G. Meillère, 284.
- Chlorine**: bleaching of flour with nitric oxide and —; Detection of. J. Kulman, 281.
 in flour; Detection of small quantities of —. D. W. Kent-Jones and C. W. Herd, 394.
 Simple micro analytical separation of bromine and —. L. Moser, 413.
 Sterilisation of sea water by means of —. D. R. Wood and E. T. Illing, 125.
- Chocolate**: fat in —; Determination of. C. E. Wiseman, 684.
- Cholesterol** as a measure of egg yolk in milk products. L. M. Lampert, 394.
 Micro method for determining — by oxidation of the digitonide. R. Okey, 654.
 Preparation and antirachitic activation of some derivatives of ergosterol and —. D. W. MacCorquodale, H. Steenbock and H. Adkins, 587.
- Choussy** well water; Arsenic content of —. R. Clogne, A. Courtois and Cazala, 456.
- Chromate** in presence of organic matter; Iodimetric determination of —. F. Feigl, K. Klanfer, and L. Weidenfeld, 348.
 Precipitation of small amounts of lead as —. B. Jones, 318.
- Chrome** calf leathers; Determination of chromium, iron, and aluminium in —. H. B. Merrill and R. G. Henrich, 647.
- Chromium**: Gravimetric determination of — by means of potassium cyanate. B. J. F. Dorrington and A. M. Ward, 625.
 in chrome calf leathers; Determination of —. H. B. Merrill and R. G. Henrich, 647.
 in high-speed tool steel; Rapid determination of —. W. Brüggemann, 155.
 in steel; Micro-determination of —. 772.
 Separation of indium from —. 220.
 Separation of thallium from —. 409.
- Chrysalis Oil**: Composition of —. W. Kimura, 645.
- Chrysarobin**, chrysophanic acid and sulphur. 704.
- Chrysoidine** as indicator for argentometry. 614.
- Chrysophanic Acid**, chrysarobin and sulphur. 704.
- Cinchona** alkaloids in the urine; Detection of some —. 640.
- Cinchonidine**: Determination of — with the quinhydrone electrode, and the choice of end-points in alkaloidal titrations. E. B. R. Prideaux and F. T. Winfield, 561.
- Cinchonine**: Determination of — with the quinhydrone electrode, and the choice of end-points in alkaloidal titrations. E. B. R. Prideaux and F. T. Winfield, 561.
 method of analysing the dyeing tannins. Y. Uyeda, 646.
- Citral** in lemon oil. (Essential Oil Sub-Committee Report No. 6), 109.
- Citric Acid** in fruits and fruit products; Determination of —. B. G. Hartmann and F. Hillig, 396.
- Citronellal**: Determination of —. H. I. Waterman and E. B. Elsbach, 64.
- Clinical Medicine**; Chemical Methods in —. G. A. Harrison, 604.
- Coal**: Assay of — for carbonisation purposes (Part III). Correlation with coal gas manufacture. J. G. King and L. J. Edgcombe, 279.
 Moisture and combined water in —. S. Iki, 215.
 X-ray examination of coke and —. C. N. Kemp, 223.
- Coal Tar** disinfectants; Variation of phenol coefficients of — with different test organisms. B. G. Philbrick, 594.

- Cobalt**: Cobalt thiocyanate reaction for detecting thiocyanate and ——. I. M. Kolthoff, 529.
 Detection and determination of — by arsenophosphotungstic acid. A. Lieberman, 294.
 in potassium cobaltinitrite; Volumetric determination of ——. A. A. Wassilieff, 67.
 in steel; Determination of ——. E. Bertrand, 346.
 Quantitative analysis of mixtures of nickel and ——. S. Glasstone and J. C. Speakman, 93.
 salts; Separation and determination of nickel and ——. F. G. Germuth, 347.
 Separation of indium from ——. 219.
- Cobalt Thiocyanate** reaction for the detection of cobalt and thiocyanate. I. M. Kolthoff, 529.
- Cobra** venom poisoning case. 693.
- Cocaine**: Microchemical characterisation of strychnine and ——. V. Arreguine and F. Amadeo, 519.
 Micro-detection of ——. 474.
- Cocoa** and cocoa preparations; Quantitative determination of shell in ——. M. Wagenaar, 221.
- Cocoa Butter**: Classification of — and its substitutes by the freezing-point method. A. G. Avent, 477.
 Detection of Borneo tallow in ——. 9.
 Setting point curve of ——. J. Straub and R. N. M. A. Malotaux, 137.
 Use of ultra-violet light for the detection of solvent-extracted ——. W. T. Field, 744.
- Cod Liver Oil** and malt extract. 686.
 Antimony trichloride reaction of ——. J. C. Drummond, 458.
 "Cattle ——" (Legal Notes), 194.
 Composition of the mixed fatty acids present in the glycerides of ——. K. D. Guha, T. P. Hilditch and J. A. Lovern, 456.
 Dilution curve of — with antimony trichloride reagent. E. R. Norris and A. E. Church, 458.
 Permanence of vitamin *A* in — as shown by the antimony trichloride colour test. N. Evers, 287.
 Variations in results obtained by different observers with the antimony trichloride colour test for ——. N. Evers, 287.
 vitamin *D* in —; Variation of. 197.
- Codeine**: Colour reaction for dionine and ——. G. De Haas, 454.
- Coffee**: caffeine in —; Micro-determination of. A. C. Röttinger, 348.
 caffeine in decaffeinated —; Determination of. W. F. Allen, 519.
 deprived of caffeine. 129.
 "French" ——. 631.
 Groups of extractives in ——. Ciupka, 759.
 infusions; Use of active charcoal for adsorption of caffeine, particularly from ——. F. Sartorius and W. Ottmeyer, 140.
 Maltol and its colorimetric determination in malt ——. T. Merl, 760.
 Philippine —; Composition of. A. Valenzuela, 139.
 Rum and ——. (Legal Notes), 327.
- Coinage**: Counterfeit ——. 580.
- Coins**: Counterfeit — in Palestine. 49.
- Coke**: Reactivity of ——. (Fuel Research Paper No. 25), 511.
 X-ray examination of coal and ——. C. N. Kemp, 223.
- Collodium Flexile**: 39.
- Colloid** Symposium Annual. Vol. VII. H. B. Weiser, (Review), 421.
- Colloidal** State; Chemistry of the ——. J. C. Ware, (Review), 471.
- Colloids**: H. R. Kruyt (Review), 604, 777.
- Colophony**: Sensitive reaction for resin acids or ——. F. Michel, 343.
- Colorimeter**: Easily constructed form of micro ——. G. W. Chapman, 443.
- Colorimeters**: Hellige-Dubosq Nephelometers and ——. 232.
- Colour** measurements of tanning extracts. A. de la Bruère, 657.
 standardisation. 132.
 Stimuli; Reduction of Data on Mixture of ——. D. B. Judd, 604.
- Colouring Matter** in "pure" gelatin; Presence of blue mineral ——. A. L. Bacharach and G. N. Grinling, 566.
- Combustion**: Gaseous — at High Pressures. (Review), W. A. Bone, D. M. Newitt, and D. T. A. Townend, 302.
- Conarachin**: Properties of arachin and — and the proportionate occurrence of these proteins in the arachis nut. D. B. Jones and M. J. Horn, 395.
- Condensed Milk**: Abnormal sweetened —. S. Dixon and J. H. Sugden, 749.
 sucrose in sweetened —; Determination of. (Milk Products Sub-Committee Report No. 2), 111.
 Sucrose, lactose and invert sugar determined in sweetened —. Public Health Report No. 57. G. W. Monier-Williams, 573.
- Conductivity** of Solutions and the Modern Dissociation Theory. C. W. Davies (Review), 469.
- Connecticut** Agricultural Experimental Station. Annual Reports of Food Products and Dry Products. 129.
- Copper**: Colorimetric determination of —. A. Schachkeldjan, 655.
 contents of foodstuffs. F. Grendel, 700.
 Delicate tests for —. I. M. Kolthoff, 527.
 Electrometric determination of —. III.
 Application of bi-metallic electrodes. M. E. Pring and J. F. Spencer, 375.
 gold in presence of large amounts of iron, lead and —; Determination of small quantities of. J. Donau, 598.
 in food, beverages, etc.; Determination of small amounts of lead and —. F. W. Richardson, 323.
 in green vegetables; Determination of —. A. Hanak, 583.
 in lead bullion; Rapid determination of bismuth and — by internal electrolysis. E. M. Collin, 312.
 in organic materials; Determination of —. E. Cherbuliez and S. Ansbacher, 345.

- Copper**—*continued*.
 in presence of ferric salts; Determination of —. 380.
 in presence of ferrous salts; Determination of —. 379.
 in presence of iron; Determination of —. 379.
 in presence of iron; Determination of small amounts of —. L. J. Chalk, 187.
 in spelter and zinc ores; Determination of cadmium and — by rapid internal electrolysis. E. M. Collin, 495.
 Micro-determination of — with urobilin. A. Emmerie, 718.
 Precipitation of — by thiosulphate. J. Majdel, 66.
- Cordials**: Unfermented —. 685.
- Corn Syrup**: Effect of temperature on the sulphur dioxide content of — in mixtures of sugar and —. R. H. Morgan, 488.
- Corncockle** in flour and bread; Detection of —. R. Fischer and E. Riedl, 699.
- Corrosion** in canned fruits. E. F. Kohman and N. H. Sanborn, 582.
 of Metals; Atmospheric —. 232.
- Cotton** goods; Fungi causing mildew in —. L. D. Galloway, 523.
- Cow**: Appeal to the — samples of milk. 387.
- Cream**: Artificial — Act. *See* **Artificial Cream Act**.
 Canned —. 505.
 fat in —; Percentage of. G. D. Elsdon and J. R. Stubbs, 124.
 Gelatin in —. O. A. Mendelssohn, 567.
 Labelling of tinned —. 447.
 "Rich dairy" —. 570.
 sandwiches, and the Artificial — Act. (Legal Notes), 689.
 viscogen in —; Detection of. G. T. Pyne, 747.
- Cresols**: Quantitative separation of phenol from —. J. N. Miller and O. M. Urbain, 213.
- Criminology**: Invisible Rays in the Service of —. G. Kögel (Review), 422.
- Crocus**: Quality standard for —. E. H. Wirth, 52.
- Cryoscopic** milk test. 515.
- Cucumbers**: Agricultural Produce (Grading and Marking) (—) Regulations. 45.
- Cupferron** as means of separating and determining mercury. A. Pinkus and M. Katzenstein, 526.
- Cuprous Ammonium Salts**: Absorption of carbon monoxide by —. W. Gump and I. Ernst, 464.
- Currency Notes**: Counterfeit —. 580.
- Cyanide** method for determining nickel. 93.
- Cyanogen Iodide** in iodine; Detection of —. S. Morris, E. B. Callaghan and L. Dunlap, 528.
- Cyanophoric** plant; Methods for determination of nitrogenous constituents of a —: *Prunus laurocerasus*. M. E. Robinson, 146.
- Cymbopogon Oils** from India. 210.
- Cysteine**: Sensitive reaction for —. R. Fleming, 706.
- Cystine**: Colorimetric determination of — by means of the uric acid reagent. C. Rimington, 706.
- Cytisine**: Microchemistry of —. M. Wagenaar, 349 (Incorrectly printed in text as "Cystine.")

D

- Dairy** Chemistry; Textbook of —. E. R. Ling (Review), 659.
 cream; "Rich —." 570.
- Date**: Mineral content of the Chinese — (jujube). M. P. Benoy, 200.
- Daylight**: Measurement of —. 450.
- Denigès-Oliver** test for morphine. 502.
- Dermatitis**: Alleged menthol —. (Legal Notes), 753.
 from a hat lining. (Legal Notes), 753.
- Dextrinogenic** activity of honey at various pH values. 667.
- Dhupa** kernels (*Vateria indica*) and oil from India. 761.
- Diabetic** flour. 686.
 flour. (Legal Notes), 41.
 wine. 131.
- Dial**: New reaction of — (diallylmalonylurea). F. Lagarde, 763.
 Post mortem transformation of veronal, gardenal and — into hydrocyanogen compounds. E. Kohn-Abrest, H. Villard, and L. Capus, 291.
- Diallylmalonylurea (Dial)**: New reaction of —. F. Lagarde, 763.
- Diastase**: liquefying power of malt —; Determination of. S. Józsa and H. C. Gore, 214.
- Diastatic** activity of honey. L. H. Lampitt, E. B. Hughes and H. S. Rooke, 666.
 power of malt and malt extract. C. T. Bennett and F. C. L. Bateman, 763.
- Diatomaceous** Earth. R. Calvert (Review), 661.

of Borneo (illipé) tallow; Component —. T. P. Hilditch and J. Priestman, 396.
of cod-liver and certain other fish-liver oils; Composition of the mixed fatty acids present in —. K. D. Guha, T. P. Hilditch and J. A. Lovern, 456.
of some palm oils of low free acidity; Fatty acids and component —. T. P. Hilditch and E. E. Jones, 701.
of stillingia (Chinese vegetable) tallow. T. P. Hilditch and J. Priestman, 761.
- Glycerol** in coloured wines; Micro-colorimetric determination of —. C. de Coquet, 653.
method for determining free lime; Modification of —. G. E. Bessey, 651.
Microchemical tests for —. H. Alber, 295.
- Glycogen** in small amounts of tissue; Determination of. A. E. Osterberg, 145.
Solubility of —. M. Kerly, 400.
- Glyzines**: Commercial — (ammonium glycyrrhizates). A. Bonis, 140.
- Gold** in presence of large amounts of iron, lead and copper; Determination of small quantities of —. J. Donau, 598.
- Golden Syrup**: "Crystal" syrup sold as —. (Legal Notes), 506.
- Government Chemists' Reports**: *See* Bihar and Orissa, Canada, Ceylon, Hong Kong, Madras, New Zealand, Palestine, Straits Settlements, United Provinces of Agra and Oudh. *See also* Government Laboratory.
- Government Laboratory**: Report of the Government Chemist on the work of — for the year ending March 31st, 1930. 689.
- Grape** must and wine treated with insecticides containing lead; Lead content of —. E. Kielhöfer, 151.
wine; Detection of fruit wine in — by the sorbitol process. A. Röhling and J. Richarz, 201. G. Reif, 335.
- Grape Fruit**: Wastage in imported —. 634.
- Grapes**: Wastage in imported —. 634.
wine from dried —; Study of. R. Moredod, 136.
- Grass**: Composition of — as influenced by cutting. 390.
- Gravimetric** analysis with the Kuhlmann micro-balance. (1) Drying of precipitates. (2) Determination of aluminium. A. Pichler, 298.
micro analysis; New method of inorganic —. I. Determination of small quantities of gold in presence of large amounts of iron, lead and copper. J. Donau, 598.
- Great Herring Oil**: Composition of the saturated fatty acids of Japanese —. S. Ueno and H. Ikuta, 409.
- Growth** factor; Evidence of a new —. 197.
- Gruyère** cheese; Percentage of fat in —. P. Sajous, 701.
- Guanidine** bases in blood; Colorimetric determination of —. J. J. Piffner and V. C. Myers, 521.
- Gutzeit** arsenic apparatus; Modified —. A. J. Lindsey, 503.
mercuric chloride papers; Cap for holding —. T. J. Ward, 630.

H

- Hackney**: Appointment of Additional Public Analyst for Metropolitan Borough of —. 277.
- Haemoglobin**: Spectrographic study of carbon monoxide —. A. K. Boor and A. Bachem, 405.
- Hafnium**: separation of titanium from zirconium and —; New method for. A. R. Powell and W. R. Schoeller, 605.
- Halides**: halogen in insoluble inorganic —; Rapid method for determining. R. H. Klein, 192.
New indicators for the titration of —. 614.
- Halogen** compounds; Determination of —. J. J. Thompson and U. O. Oakdale, 652.
in insoluble inorganic halides; Rapid method for determining —. R. H. Klein, 192.
- Halogens** in organic compounds; Determination of —. S. Sabetay and J. Bléger, 713.
in organic compounds; Micro-determination of metals and —. H. H. Willard and J. J. Thomson, 529.
- Hay**: Spontaneous Combustion of —. C. A. Browne, 604.
- Heat**: Calorimeter for specific — determinations. 512.
Photography by means of — by Plotnikov's method. L. Šplait, 224.
resistance curve: A new bacteriological test for pasteurised food. C. Dukes, 14.
- Heroin**: Micro-detection of —. 474.
- Hexa-acetyl Sorbitol**: Conversion of dibenzal-sorbitol into —. H. Jahr, 452.
- Hexabromide** value of linseed oil; Determination of the —. F. Fritz, 461.
- Honey** and gingerbread. C. I. Kruisheer, 200.
bees; Toxicity of pyrethrum vapours to —. J. M. Ginsburg, 596.
Borax —. 389.
Cane sugar in —. 194.
Diastatic activity of —. L. H. Lampitt, E. B. Hughes and H. S. Rooke, 666.
Formol titration applied to —. H. A. Schuette and V. Templin, 282.
Microscopical pollen analysis of —. C. Griebel, 583.
oxymethylfurfural in — and artificial —; Detection and determination of. F. Weiss, 135.
Pollen analysis of —. C. Briebel, 334.
Prepared —. 388.
Stability of amylase of —. 671.
Vitamin content of honeycomb and —. H. B. Kifer and H. E. Munse, 55.
- Honeycomb**: Vitamin content of honey and —. H. B. Kifer and H. E. Munse, 55.
- Hong Kong**: Report of the Government Analyst for — for the year 1929. E. R. Dovey, 754.

- Hops**: preservative power of —; Standardisation of the strength of the organism used in the Chapman biological method for determining. A. Chaston Chapman, 57.
soft resins in —; Colorimetric method for determining. J. M. Guthrie and G. G. Philip, 703.
- Hull**: See **Kingston-upon-Hull**.
- Human** expired air; Traces of combustible gases in —. T. R. Parsons, 585.
organism; Presence of thiocyanates in —. Post mortem transformation of veronal, dial and gardenal into hydrocyanogen compounds. E. Kohn-Abrest, H. Villard and L. Capus, 291.
- Hydnocarpus Wightiana Oil**: Constituents of —. H. I. Cole, 139.
- Hydrastine**: Microchemical reactions of —. M. Wagenaar, 296.
- Hydrazine**: Determination of mercury with — or stannous chloride. H. H. Willard and A. W. Boldyreff, 293.
- Hydrocarbons**: aromatic, unsaturated and naphthene — in light oils and motor spirits; Determination of. A. B. Manning and F. M. E. Shepherd, 757.
Knock ratings of aromatic —. D. A. Howes and A. W. Nash, 213.
- Hydrochloric Acid** in presence of ferric and aluminium chlorides; Determination of free —. K. Kuchler, 597.
- Hydrocyanogen** compounds; Post mortem transformation of veronal, dial and gardenal into —. E. Kohn-Abrest, H. Villard and L. Capus, 291.
- Hydrogen** in gases; Sources of error in determining —. H. R. Ambler, 436.
Semi-micro combustion method for determining carbon and —. W. M. Lauer and F. J. Dobrovolsky, 467.
- Hydrogen Cyanide** in Lima beans. II. Influence of heat on the poisonous properties of the beans. S. K. Hagen, 453.
- Hydrogen Ion Concentration**: Isohydic indicators and pure water for accurate measurement of — and salt errors. S. F. Acree and E. H. Fawcett, 215.
Measurement of —. J. Grant. (Review), 660.
of egg white and egg yolk; Changes with age of the —. J. C. Baird and J. H. Prentice, 20.
Ruler for the interconversion of electromotive force readings and pH values in the electro-metric measurement of —. J. Grant, 658.
- Hydrogen Peroxide**: Determination of small amounts of ozone and of —. N. Allen, 220.
- Hydrogenation** of oleic acid; Chemical structure of *iso*-oleic acid produced during —. S. Ueno and N. Kusei, 409.
- Hydroquinone**: Determination of — with ceric sulphate. N. H. Furman and J. H. Wallace, Jr., 408.
- Hydrosulphites**: Colour reaction between naphthol yellow and —. E. E. Jelley, 34.
- p-Hydroxybenzoic Acid** and its esters in food-stuffs; Detection and determination of —. F. Weiss, 584.
- Hydroxyl** groups; Micro-determination of —. P. M. and G. F. Marrian, 598.
- Hydroxyquinoline** as means of separating and determining titanium. R. Berg and M. Teitelbaum, 596.
- o-Hydroxyquinoline** as a means of determining molybdenum. G. Banalescu, 716.
- Hypervitaminosis** and vitamin balance. IV. An instance of vitamin balance. L. J. Harris and T. Moore, 149.

I

- Ice Cream**: egg in —; Determination of. N. C. Smith, 515.
- Illipé** butter; Illipene and the higher alcohols in commercial —. M. Tsujimoto, 212.
- Illipene** and the higher alcohols in commercial illipé butter. M. Tsujimoto, 212.
- India**: Cymbopogon oils from —. 210.
Dhupa kernels (*Vateria indica*) and oil from —. 761.
- Indian** opium; Porphyroxine test for —. F. Bamford, 445.
- Indicators** for argentometry; New adsorption together with a comparison of their limits of sensitiveness. A. J. Berry and P. J. Durrant, 613.
for determining boric acid. 26.
for the reaction between ceric and ferrous ion. N. H. Furman and J. H. Wallace, Jr., 527.
Isohydic — and pure water for accurate measurement of hydrogen ion concentrations and salt errors. S. F. Acree and E. H. Fawcett, 215.
- Indium**: Analytical chemistry of — (Part I). L. Moser and F. Siegmann, 218.
- Indophenol** reaction in biological oxidations. D. C. Harrison, 146.
- Industry**: Law and —. (Review), G. S. W. Marlow, 303.
- Infants' Food**: Misleading labelling of —. 388.
- Ink** sediments in pen writing; Photomicrography of —. T. J. Ward, 568.
- Inks**: acidity in writing —; Potentiometric determination of. H. A. Bromley and L. W. Causser, 277.
and ultra-violet light. C. A. Mitchell, 746.
- Inorganic** analysis; Abstracts: 65, 153, 215, 293, 344, 409, 464, 526, 596, 647, 715, 768.
Analysis; Applied —. (Review), W. F. Hillebrand and G. E. F. Lundell, 351.
Chemistry; Comprehensive Treatise of Theoretical and —. Vol. X. J. W. Mellor (Review), 604, 773.
Chemistry; Elementary —. J. W. Mellor (Review), 662.
Chemistry; Intermediate —. J. W. Mellor (Review), 417.
gravimetric micro analysis; New method of —. I. Determination of small quantities of gold in presence of large amounts of iron, lead and copper. J. Donau, 598.

Hydrosulphites—*continued.*

- halides; Rapid method for determining halogen in insoluble —. R. H. Klein, 192.
 Materials; Quantitative Analysis of —. N. Hackney, 775.
 Pharmaceutical Chemistry for Students of Pharmacy and Pharmacists; A Text Book of —. C. H. Rogers (Review), 602.
 sulphate in serum; Determination of —. R. S. Hubbard, 764.

Insulin: Studies on crystalline —. IX. The adsorption of — on charcoal, H. Jensen and A. de Lawder, 586.

"Internal Electrolysis": See **Electrolysis.**

Iodimetric determination of chromate in presence of organic matter. F. Feigl, K. Klanfer and L. Weidenfeld, 348.

determination of small amounts of zinc. H. A. Pagel and O. C. Ames, 648.

determination of vanadium in alloy steels and ferrovanadium. W. Werz, 769.

method for determining oxidase activity. J. D. Guthrie, 709.

Iodimetry of meal products. K. Fuchs, W. Ruziczka and E. Kohn, 699.

Iodine colorimetric method for determining starch. L. Paloheimo, 767.

content of sea weeds. 392.
 cyanogen iodide in —; Detection of. S. Morris, E. B. Callaghan and L. Dunlap, 528.

in blood; Micro-colorimetric method for the quantitative determination of —. R. G. Turner, 707.

in "iodised" salt and fish meal. 390.

in organic material rich in iron; Determination of small amounts of —. K. Wulfert, 415.

in organic substances; Micro determination of —. T. Leipert, 413.

in soils and waters; Determination of minute amounts of —. R. L. Andrew, 269.

in thyroid gland, thyroxine and other organic compounds; Determination of —. G. Middleton, 285.

metabolism. C. Newcomb and G. Sankaran, 399.

Micro determination of —. Parts I, II and III. G. Lunde, K. Closs and J. Bøe, 413.

Quantitative determination of organic and inorganic — in presence of each other. G. Lunde, K. Closs and J. Bøe, 413.

Iodine Value of oil; Determination of true —. 361.

of unsaponifiable matter of oils; Determination of —. 6.

Partial — of linseed oil. F. Fritz, 343.

"Iodised" salt and fish meal; Iodine in —. 390.

β -Ionone in a natural product; Presence of —. S. Sabetay, 209.

Ipomoea: Assay of —. L. E. Warren, 639.

Iron: copper in presence of —; Determination of. 379.

copper in presence of —; Determination of small amounts of. L. J. Chalk, 187.

Iron—*continued.*

Determination of traces of — by photochemical and colorimetric methods. B. S. Sharma, 67.

gold in presence of large amounts of lead, copper and —; Determination of small quantities of. J. Donau, 598.

Gravimetric determination of — by means of potassium cyanate. B. J. F. Dorrington and A. M. Ward, 625.

in chrome calf leathers; Determination of —. H. B. Merrill and R. G. Henrich, 647.

in white wines; Rapid determination of —. J. Ribéreau-Gayon, 136.

iodine in organic materials rich in —; Determination of small amounts of. K. Wulfert, 415.

kettles tinned with tin-lead alloys. J. T. Dunn and H. C. L. Bloxam, 34.

Separation of aluminium and — by Chancel's method. P. L. L. Robinson and W. E. Scott, 154.

Separation of indium from —. 219.

thiocyanate method of estimating —; Note on. Influence of different classes of phosphates. G. W. Leeper, 370.

Irradiated ergosterol; Differentiation of ergosterol and —. R. Meesemaeker, 404.

milk; Variation of vitamin *D* in —. 197.

sterols; Oxidation of oils in presence of —. E. Couture, 342.

yeast; Antirachitic value of —. S. K. Kon and M. Mayzner, 400.

Irradiation: Influence of ultra-violet — on the nutritive value of hardened oils. S. Ueno, M. Yamashita and Y. Ota, 404.

of milk for increasing its antirachitic potency. D. Naborro and J. O. Hickman, 206.

Irvingia Butter: G. Collin and T. P. Hilditch, 336.

Isle of Ely: Appointment of Deputy Agricultural Analyst for —. 566.

Isle of Wight: Appointment of Agricultural Analyst for —. 566.

Islington: Appointment of Public Analyst for Metropolitan Borough of —. 383.

Isoamyl Alcohol as means of separating and identifying the alkali and alkaline earth metals. H. Yagoda, 649.

Distinction of — from isobutyl and *n*-butyl alcohols, from the lower alcohols, and from amyl and butyl acetates by means of ammonium cobalthiocyanate. H. Weber, 208.

Isobutyl Alcohol: Distinction of — from isoamyl and *n*-butyl alcohols, from the lower alcohols, and from amyl and butyl acetates by means of ammonium cobalthiocyanate. H. Weber, 208.

Isoergosterol: Reaction of —. (Studies in the sterol group. Part VIII.) I. M. Heilbron and F. S. Spring, 211.

Isohydric indicators and pure water for accurate measurement of hydrogen ion concentrations and salt errors. S. F. Acree and E. H. Fawcett, 215.

- Isomeric amino-naphthol-sulphonic acids**; Use of — for colorimetric determination of phosphate. Béla Vásárhelya, 350.
- Isomerisation** of ergosterol by means of fuller's earth. F. G. McDonald and C. E. Bills, 711.
- Isopropanal**: Tests for ——. H. Leffmann and C. C. Pines, 209.
- Isopropyl Alcohol** in presence of acetone in the urine; Determination of ——. C. A. Cook and A. H. Smith, 144.
- J**
- Jam**: "Home-made" ——. 686.
- Jams**: Analyses of Canadian ——. 392.
Standards for ——. 694.
sugars in —; Simple polarimetric test for. S. J. Lewis, 384.
- Jansen and Donath** procedure for isolating anti-neuritic vitamin. R. R. Williams, R. E. Waterman and S. Gurin, 590.
- Japanese** great herring oil; Composition of the saturated fatty acids of ——. S. Ueno and H. Ikuta, 409.
- Jelly**: Standards for fruit ——. 697.
- Jeru** artichoke flakes; Analysis of ——. 129.
- Jet** dust counter. 450.
- Jharia Mines Board of Health**: Annual Report for the year 1929. B. K. Mandal, 633.
- Jujube** (Chinese date); Mineral content of the ——. M. P. Benoy, 200.
- K**
- Kettles**: Iron — tinned with tin-lead alloys. J. T. Dunn and H. C. L. Bloxam, 34.
- Kingston-upon-Hull**: Annual Report of the Public Analyst and Bacteriologist for — for 1929. A. R. Tankard, 630.
- Knock Ratings** of aromatic hydrocarbons. D. A. Howes and A. W. Nash, 213.
- Kriminalistik**: Unsichtbaren Strahlen im Dienste der ——. G. Kögel (Review), 422.
- Kuhlmann** micro-balance; Gravimetric analysis with the ——. (1) Drying of precipitates. (2) Determination of aluminium. A. Pichler, 298.
- L**
- La Bourboule** well water; Arsenic content of ——. R. Clogne, A. Courtois and Cazala, 456.
- Label**: A misleading ——. D. Henville, 279.
- Labelling** of margarine. 569.
of tinned cream. 447.
- Lactose**: aerobic non-sporulating bacteria producing gas from —; Significance in oysters and water of. C. A. Perry, 58.
in sweetened condensed milk; Determination of sucrose, invert sugar and ——. Public Health Report No. 57. G. W. Monier-Williams, 573.
- Laevulose** in glucides; Simple test for ——. S. Tashiro and E. B. Tietz, 520.
- Lager Beers**: Chemical and physical properties of light ——. E. Remy, 518.
- Lancaster**: Annual report of the County Analyst for — for the year 1929. G. D. Elsdon, 504.
Appointment of Public Analyst for Borough of ——. 383.
- Lanthanum**: Determination of ——. H. J. Backer and K. H. Klaassens, 650.
- Lard**: Arachidonic acid in ——. J. B. Brown and E. M. Deck, 335.
- Latex**: Its Occurrence, Collection, Properties, and Technical Applications. (Review), E. A. Hauser, 601.
- Laurel Oil**: Fatty acids of expressed ——. G. Collin and T. P. Hilditch, 335.
- Law and Industry**. (Review), G. S. W. Marlow, 303.
- Lead**: A reaction of ——. L. Bey and M. Faillebin, 346.
bullion; Rapid determination of bismuth and copper in — by internal electrolysis. E. M. Collin, 312.
content of grape must and wine treated with insecticides containing ——. E. Kielhöfer, 151.
gold in presence of large amounts of iron, copper and —; Determination of small amounts of. J. Donau, 598.
in food, beverages, etc.; Determination of minute amounts of copper and ——. F. W. Richardson, 323.
in lead tetraethyl; Determination of ——. K. Dosios and J. Pierri, 715.
in presence of mineral acid; Determination of ——. 319.
ores; Determination of bismuth in — by internal electrolysis. E. M. Collin, 680.
poisoning from tap water. W. E. Cooke, 208.
Precipitation of small amounts of — as chromate, and their accurate colorimetric determination. B. Jones, 318.
Quantitative separation of bismuth and ——. H. Funk and J. Weinzierl, 715.
Separation of antimony and ——. H. Biltz, 648.
- Lead Acetate**: Use of — in determining the acidity of fruit products. B. G. Hartmann and F. Hillig, 517.
- Lead Arsenate**: Composition of commercial acid — and its relation to arsenical injury. H. S. Swingle, 60.
- Lead Salt** and alcohol method for determination of solid fatty acids in the original sample. W. F. Baughman and G. S. Jamieson, 714.
- Lead Tetrachloride** as a reagent for alkaloids. Microchemical characterisation of cocaine and strychnine. V. Arreguine and F. Amadeo, 519.
- Lead Tetraethyl** in gasoline; Determination of ——. L. J. Catlin and J. E. Starrett, 771.
in motor spirit. Departmental Committee's final report. 332.
lead in —; Determination of. K. Dosios and J. Pierri, 715.

- Leather Manufacture**; Chemistry of —. 2nd Ed., Vol. II. (Review), J. A. Wilson, 230.
- Leathers**: chromium, iron, and aluminium in chrome calf —; Determination of. H. B. Merrill and R. G. Henrich, 647.
- Leeds**: Appointment of Additional Public Analyst for County Borough of —. 283.
Appointment of Deputy Agricultural Analyst for —. 566.
Report of the City Analyst for — for the year 1929. C. H. Manley, 751.
- Legal Cases**: Chivers & Sons, Ltd. *v.* Eastwood Cement, Ltd.
Dobell, G. C. & Co., Ltd. *v.* Barber and Garratt, 447.
Naumann *v.* Radermacher, 571.
- Legal Notes**: 39, 126, 194, 326, 447, 571, 633, 687, 752.
- Lemon juice**; Preparation and properties of vitamin C concentrates from —. D. P. Grettie and C. G. King, 55.
juices; Formol titration of —. A. Niethammer, 517.
residues; Chemical treatment of —. Determination of pectins. B. Melis, 199.
- Lemon Cheese**: "Home-made" —. 686.
- Lemon Juice**: Antiscorbutic fraction of —. VIII. S. S. Zilva, 289.
- Lemon Oil**: citral in —; Determination of. (Essential Oil Sub-Committee Report No. 6.) 109.
- Lemons**: Comparative value of —. 514.
- Liebermann and Burchard Reaction**: Mechanism of —. Application to the differentiation of animal from vegetable sterols. R. Meesemaeker and H. Griffon, 588.
- Light**: Influence of — on the constituents of bone. 390.
- Lignoceric Acid** in hardened arachis oil mixtures; Determination of the molecular weights of the higher saturated fatty acids and its use in determining —. J. Grossfeld, 138.
- Lima beans**; Hydrogen cyanide in —. II. Influence of heat on the poisonous properties of the beans. S. K. Hagen, 453.
- Lime**: alkalinity in commercial —; Determination of available. C. M. Jovellanos, 220.
glycerol method for determining free —; Modification of. G. E. Bessey, 651.
- Liniment** of turpentine. (Legal Notes), 752.
- Linolenic Acid**: Analysis of oils containing —. I. Composition of chrysalis oil. W. Kimura, 645.
- Linolic Acids** and their oxidation by per-acids. W. G. Smit, 525.
- Linseed Oil**: hexabromide value of —
Determination of the. F. Fritz, 461.
High-molecular fatty acids in soya bean oil and —. J. Grossfeld, 519.
in soya bean oil; Detection of —. J. F. Carrière, 64.
Partial iodine value of —. F. Fritz, 343.
- Liquid Systems**; Photo-Processes in Gaseous and —. (Review), R. O. Griffith and A. McKeown, 72.
- Liquorice** root and extract; Studies in —. IV. New substance in Chinese — root. P. A. Houseman and C. K. Swift, 51.
- Lithium**: Detection and determination of small quantities of —. E. R. Caley, 597.
Determination of —. M. H. Brown and J. H. Reedy, 651.
separation of — from potassium and sodium; New method for. A. Sinka, 598.
- Lithopones**: X-ray examination of —. W. A. Wood, 657.
- Liver**: Neutral fat of beef —. W. R. Bloor and R. H. Snider, 518.
- Liver Oil** vitamin A; Absence of — from carotene. T. Moore, 588.
- Liver Oils**: Relative vitamin A value of the body and — of certain fish. B. Ahmad and J. C. Drummond, 403.
yielding a strong colour reaction with antimony trichloride. S. and S. Schmidt-Nielsen, 286.
- Lobelia**: Chemical characteristics of —. L. Rosenthaler, 142.
- London**: Appointment of Agricultural Analyst for City and Port of —. 277, 566.
- Lubricating** properties of compound oils prepared from neat's foot oil; Influence of stability to cold of the oil on —. P. Cuypers, 211.
- Lumbang Oil**: Analysis of Philippine —. A. O. Cruz and A. P. West, 596.
- Luminal** in urine; Detection of —. W. Koenig and H. Kluge, 524.

M

- Mace** butter; Fatty acids of —. G. Collin and T. P. Hilditch, 335.
Substitution of Bombay — for ground —. 193.
- Madar Juice**: Tests for — (*Calotropis gigantea*) and for snake venom. D. N. Chatterji, 683, 694.
- Madras**: Report of the Acting Chemical Examiner for the year 1929. M. A. Bahadur, 693.
- Magnesite**: Its application in assaying. R. J. B. Kethel, 658.
- Magnesium**: Micro-determination of — with *o*-oxyquinoline, and its separation from calcium. R. Strebinger and W. Reif, 297.
Some colour reactions of —. I. M. Kolthoff, 769.
- Magnesium Citrate**: Solution of —. 131.
- Maize** milling products; Distribution of vitamin A in some —. C. R. Meyer and R. A. Hetler, 149.
starch added as adulterant to egg powder; Separation of —. Comte, 200.
vitamin A in —; Inheritance study of. II. Vitamin A in hybrid red —. S. M. Hauge, 339. III. Vitamin A content in relation to yellow endosperm. S. M. Hauge and J. F. Frost, 339.
- Malaria**: Drugs used in treatment of — detected in the urine. R. Green, 640.

- Malt** and malt extract; Diastatic power of —. C. T. Bennett and F. C. L. Bateman, 763.
 coffee; Colorimetric determination of maltol in —. T. Merl, 760.
 diastase; Determination of the liquefying power of —. S. Józsa and H. C. Gore, 214.
 extract and cod-liver oil. 686.
 extract; Grading and Marking Regulations for —. 328.
 flour; Grading and Marking Regulations for, 328.
- Maltol** and its colorimetric determination in malt coffee. T. Merl, 760.
- Manganese** in animal materials; Determination of —. J. T. Skinner and W. H. Peterson, 640.
 in biological material; Colorimetric determination of —. M. B. Richards, 554.
 in steel; Micro-determination of —. 772.
 separation and determination of —; General method for. J. Majdel, 649.
 Separation of indium from —. 219.
- Manioc Yam** poisoning. 579.
- d-Mannitol**; Microchemical tests for —. H. Alber, 295.
- Mannose**; Alcoholic fermentation of glucose, fructose and — mixtures. H. Sobotka and M. Reiner, 712.
- Margarine**; Egg-yolk —. E. Vollhase, H. J. Steinbeck and E. Danielsen, 137.
 Labelling of —. 569.
- Margosic Acid**; Composition of neem oil. The so-called —. A. C. Roy and S. Dutt, 50.
- Marine** animal oils; Thiocyanogen value of —. Y. Toyama and T. Tsuchiya, 292.
- Marmalade**; carrots in —; Detection of. A. Hanak, 582.
 Standards for —. 697.
- Massanalyse, Die**; I. Theoretischen Grundlagen. I. M. Kolthoff. 2nd Ed. (Review), 660.
- Meal** products; Iodimetry of —. K. Fuchs, W. Ruziczka and E. Kohn, 699.
- Meat**; Factor of quality in freezing of —. 507.
 Loss of bloom in — during transport. 507.
 Potted —. *See* **Potted Meat**.
- Medical** Research; Annual report of the —. Federated Malay States Institute for — for 1928. 580.
- Medical Research Council**: A Standard for the antirachitic vitamin *D*. 692.
- Medicated** spirituous preparations; Sale of —. 393.
- Medicine**: Chemical Methods in Clinical —. G. A. Harrison, 604.
- Medico-Legal** significance of blood groups. F. Schiff, 59.
- Melting Points**: New apparatus for the determination of corrected —. C. Junge, 225.
 Phosphoric acid for determining —. F. D. Snell, 656.
- Menthol** dermatitis; Alleged —. (Legal Notes), 753.
- Merceologia**: Dizionario di — e di Chimica Applicata. 5th Ed. Vols. I and II. (Review), G. V. Villavecchia, 357.
- Mercuric Chloride** papers (Gutzeit apparatus); Cap for holding —. T. J. Ward, 630.
- Mercurous Mercury**: Volumetric determination of — with ceric sulphate. H. H. Willard and P. Young, 295.

extracts; Detection and determination of chestnut wood extract in a mixture of other ——. F. F. Marshall, 64.
Materials of the British Empire. 232.
materials; Two new qualitative tests for vegetable ——. L. Pollak, 646.
- Tannins**: Analysis of the dyeing — by the cinchonine method. Y. Uyeda, 646.
- Tantalum**: analytical chemistry of niobium, — and their mineral associates; Investigations into. XVIII. A new method for separating titanium from zirconium and hafnium. A. R. Powell and W. R. Schoeller, 605.
- Tar** and its Products; Standard Methods for Testing ——. (Review), 228.
- Tarabakani Liver Oil**: New alcohol in ——. M. Tsujimoto, 212.
- Tars**: Spectra of cancer-producing oils and ——. I. Hieger, 460.
- Tartaric Acid** in fruits and fruit products; Determination of ——. B. G. Hartmann and F. Hillig, 397.
- Tartrazine** as indicator for argentometry. 614, 616.
- Tea**: Analyses of ——. 130.
and — sweepings; Damaged. (Ministry of Health Circular No. 1059). 133.
Damaged ——. (Ministry of Health Circular No. 1059). 393.

- Tea**—*continued*.
 "Digestive ——" 38.
 Misleading labelling of ——. 388.
 Purported weight of ——. (Legal Notes), 633.
 sold as free from tannin. 570.
- Tellurous Acid**: Volumetric determination of — with ceric sulphate. H. H. Willard and P. Young, 295.
- Temperature**: Constant — preheater. S. T. Bowden, 531.
 High — investigation. 133.
- Tetra-Iodophenolphthalein Sodium**: Toxicity of ——. 197.
- Thallium** in rat poison; Gravimetric determination of ——. W. Lepper, 217.
 Micro-detection of ——. A. J. Steenhauer, 467.
 New separation methods for ——. L. Moser and W. Reif, 409.
 Volumetric determination of — with ceric sulphate. H. H. Willard and P. Young, 217.
- Thermometric titration**; Determination of the acetyl value by ——. T. Somiya, 461.
- Thiocyanate**: Cobalt thiocyanate reaction for detecting cobalt and ——. I. M. Kolthoff, 529.
 method of estimating iron; Note on ——. Influence of different classes of phosphates. G. W. Leeper, 370.
- Thiocyanates** in the human organism. Post mortem transformation of veronal, dial and gerdanal into hydrocyanogen compounds. E. Kohn-Abrest, H. Villard and L. Capus, 291.
- Thiocyanogen** values of marine animal oils. Y. Toyama and T. Tsuchiya, 292.
- Thiocyanogen Value**: Use of the ——. IV. Analysis of oils containing linolenic acid. I. Composition of chrysalis oil. W. Kimura, 645.
- Thiosulphate**: Precipitation of copper by ——. J. Majdel, 66.
- Thorium**: Separation of gallium from ——. 218.
 Separation of thallium from ——. 410.
- Thyroid Gland**: iodine in ——. Determination of. G. Middleton, 285.
- Thyroxine**: iodine in ——. Determination of. G. Middleton, 285.
- Tin**: Corrosion of ——. 509.
 in foil-wrapped cheeses; Occurrence of anti-mony and ——. C. H. Manley, 191.
 New method for detecting ——. H. Meissner, 465.
- Tin-Lead Alloys**: Iron kettles tinned with ——. J. T. Dunn and H. C. L. Bloxam, 34.
- Tinned peas**; Methylene blue in ——. D. Henville, 629.
- Tins**: Marbling and corrosion of the interior of preserve ——. W. D. Bogatsky, W. A. Biber and L. G. Kischinewskaja, 143.
 Sardine-; Red colour of oil in preserved ——. G. Hinard and M. Bourg, 454.
- Tissue**: glycogen in small amounts of ——. Determination of. A. E. Osterberg, 145.
- Tissues**: biological-; Mountants for ——. W. Marshall, 416.
 Neutral fat of beef liver and other ——. W. R. Bloor and R. H. Snider, 518.
- Titanium**: Gallic acid as reagent for ——. P. N. Das-Gupta, 294.
 in animals; Presence and distribution of ——. G. Bertrand and Voronca-Spirt, 585.
 Separation and determination of — by hydroxyquinoline. R. Berg and M. Teitelbaum, 596.
 separation of — from zirconium and hafnium; New method for. A. R. Powell and W. R. Schoeller, 605.
 Separation of gallium from ——. 218.
 Separation of thallium from ——. 410.
 solution; Potassium titanium oxalate for preparation of standard — in colorimetry. W. M. Thornton, jr. and R. Roseman, 648.
- Titanium Dioxide** in titanium white; Determination of ——. G. Agamennone, 410.
- Titanium White**: titanium dioxide in ——. Determination of. G. Agamennone, 410.
- Titration**: Determination of the acetyl value by thermometric ——. T. Somiya, 461.
 Romijn's formaldehyde ——. 208.
- Titrations**: Choice of end-points in alkaloidal ——. E. B. R. Prideaux and F. T. Winfield, 561.
- Tobacco** preparations; Commercial nicotine-free, nicotine-poor, and nicotine-harmless ——. K. Baumann and J. Kuhlmann, 142.
- Tomatoes**: Agricultural Produce (Grading and Marking) (—) Regulations, 1929. 45.
 Vitamin C in fresh and canned ——. B. Clow and A. L. Marlatt, 459.
- Toxic** effects of methyl chloride gas. B. Buckley Sharp, 291.
- Toxicity** of *Bikukulla formosa* (Western bleeding heart). O. F. Black, W. W. Eggleston and J. W. Kelly, 525.
 of pyrethrins I and II; Relative ——. C. B. Gnadinger and C. S. Corl, 644.
 of pyrethrum vapours to honey bees. J. M. Ginsburg, 596.
 of tetra-iodophenolphthalein, 197.
- Toxicological** analysis; Abstracts. 58, 150, 208, 291, 405, 524, 596, 644.
- "**Trembles**" (milk sickness); Tremetol, the compound that produces ——. J. F. Couch, 150.
- Tremetol**: the compound that produces "Trembles" (milk sickness). J. F. Couch, 150.
- Trichlorethylene** as means of determining water and crude fat in substances rich in fat. A. Heiduschka and G. Neumann, 530.
- Tubercle bacilli**; Examination of milk for ——. D. R. Wood, 544.
- Tung Oil**: Composition and polymerisation of ——. E. R. Bolton and K. A. Williams, 360, 366.
- Tungsten**: Determination of — with phenylhydrazine. G. Dortreppe, 347.
 in high-speed tool steel; Rapid determination of ——. W. Brüggemann, 155.
 Separation of gallium from ——. 218.
 Separation of thallium from ——. 410.

- Turmeric**: White pepper coloured with ——. 631.
- Turpentine** in air; Colorimetric determination of ——. P. Andrejew and A. Gavrilow, 63.
Liniment of ——. (Legal Notes), 752.
Specific Gravity and Baumé Gravity Tables for ——. W. P. Smith and F. P. Veitch, 604.
substitute; Labelling of ——. 686.
- Typhoid-Paratyphoid** bacilli in sewage. R. S. Begbie and H. J. Gibson, 593.
- Tyrosine** in urine; Enzymic method for detecting and determining ——. S. S. Lichtman and H. Sobotka, 143.
- U**
- Ultra-Violet** irradiation; Influence of — on the nutritive value of hardened oils. S. Ueno, M. Yamashita and Y. Ota, 404.
light; Fluorescence of olive oil under —. A. L. Glanz, 773.
light for detecting solvent-extracted cocoa butter. W. T. Field, 744.
light; Inks and —. C. A. Mitchell, 746.
light; Oils under —. E. R. Bolton, 746.
radiation of essential oils. C. P. Wimmer and M. H. Kennedy, 468.
radiation; Spectrographic analysis of the various fluorescences of olive oil under —. H. Marcelet and H. Debono, 600.
rays; Analysis of pharmaceutical drugs by means of —. P. Ernst and J. Jentschitsch, 224.
rays in the examination of writing. H. Langenbruch, 468.
rays; Sunlight (—) observations. 632.
rays; Use of — in criminology, 422.
transparency in glasses; Loss of —. S. English, 225.
- United Provinces of Agra & Oudh**: Report of the Chemical Examiner for the year 1929. D. N. Chatterji, 694.
- United States** Department of Agriculture: Food and Drug Administration. Revised and Amended Definitions and Standards for Food Products. Fruit Juice and Wheat Flour. 637.
Department of Commerce. Report of the Bureau of Standards for the year ending June 30, 1929. 131.
- Unsaponifiable** matter of ego oil M. Tsujimoto, 153.
- Uranium**: Colorimetric and gravimetric determination of —. P. M. Das-Gupta, 154.
- Urea** nitrogen in blood determined by direct Nesslerisation. J. M. Looney, 641.
- Uric Acid** reagent for the colorimetric determination of cystine. C. Rimington, 706.
- Urinary** calculi; Analysis of small —. C. Newcomb, 399.
- Urine**: bismuth in —; Identification of small amounts of. H. K. Barrenscheen and M. Frey, 708.
Cinchona alkaloids detected in —. 640.
Drugs used in the treatment of malaria detected in —. R. Green, 640.
- Urine—continued.**
isopropyl alcohol in presence of acetone in the —; Determination of. C. A. Cook and A. H. Smith, 144.
luminal in —; Detection of. W. Koenig and H. Kluge, 524.
Normal pigment of the —. III. New method for its extraction. D. L. Drabkin, 708.
Plasmoquine detected in —. 640.
tyrosine in —; Enzymic method for detecting and determining. S. S. Lichtman and H. Sobotka, 143.
- Urobilin**: Micro-determination of copper with —. A. Emmerie, 718.
- Uronic Acid**: Pentose and — content of orange albedo and an arabinogalacturonic acid derived from orange pectin. J. R. Bowman and R. B. McKinnis, 336.
- V**
- Valency**: The Parachor and —. (Review), S. Sugden, 226.
- Vanadium** in alloy steels and ferrovanadium; Iodimetric determination of —. W. Werz, 769.
in high-speed tool steel; Rapid determination of —. W. Brüggemann, 155.
Separation of gallium from —. 218.
- "Vaseline Oil"** as adulterant of olive oil. 49.
- Vateria Indica**: Dhupa kernels (—) and oil from India. 761.
- Vegetable** refuse; Fatalities due to vitiated air produced by oxidation of —. A. R. Tankard and D. J. T. Bagnall, 673.
seed-fats; Regularities in the glyceride structure of —. G. Collin and T. P. Hilditch, 291.
sterols; Application of the Liebermann and Burchard reaction to the differentiation of animal from —. R. Meesmaecker and H. Griffon, 588.
tanning materials; Two new qualitative tests for —. L. Pollak, 646.
- Vegetables**: copper in green —; Determination of. A. Hanak, 583.
- Venom**: Cobra — poisoning case. 693.
Tests for snake —. D. N. Chatterji, 683, 694.
- Veratrine**: Microchemical reactions of —. 413.
- Veronal**: Post mortem transformation of dial, gardenal and — into hydrocyanogen compounds. E. Kohn-Abrest, H. Villard and L. Capus, 291.
- Vinegar**: Wood — sold as table —. 569.
- Viscera**: copper and lead in —; Determination of minute amounts of. 324.
- Viscogen** in cream; Detection of —. G. T. Pyne, 747.
- Vitamin**: anti-beri-beri- —; Colorimetric method for assay of rice for content of. J. P. Spruyt, 460.
antineuritic-; Jansen and Donath procedure for isolating —. R. R. Williams, R. E. Waterman and S. Gurin, 590.

Vitamin—*continued*.

- Antiscorbutic — in apples. M. F. Bracewell, E. Hoyle and S. S. Zilva, 766.
 balance; Hypervitaminosis and —. IV. An instance of —. L. J. Harris and T. Moore, 149.
 content of honey and honeycomb. H. B. Kifer and H. E. Munse, 55.
 tests; Casein in —. 197.
- Vitamin A:** Absorption spectra in relation to —. R. A. Morton, I. M. Heilbron and F. S. Spring, 401.
 Alleged contamination of carotene by —. N. S. Capper, 459.
 and carotene. N. Bezssonoff, 340.
 and carotene. II. Vitamin *A* activity of red palm oil carotene. III. Absence of vitamin *D* from carotene. IV. Effect of various dietary modifications upon — activity of carotene. T. Moore, 288. V. Absence of the liver oil — from carotene. VI. Conversion of carotene into — *in vivo*. T. Moore, 588.
 antimony trichloride colour reaction for —; Study of the. E. R. Norris and A. E. Church, 204. II. Dilution curve of cod-liver oil with antimony trichloride reagent. E. R. Norris and A. E. Church, 458.
 Carotene and —. Transformation of carotene into — as shown by a study of the absorption spectra of rat-liver oils. N. S. Capper, 710.
 Chemistry of —. (Action of chemical agents.) O. H. Cady and J. M. Luck, 401.
 content of fruits; Effect of drying and of sulphur dioxide upon —. A. F. Morgan and A. Field, 643.
 content of ghee. A. L. Bacharach, 589.
 in cod-liver oil; Permanence of — as shown by the antimony trichloride colour test. N. Evers, 287.
 in maize; Inheritance study of distribution of —. II. — in hybrid red maize. S. M. Hauge, 339. III. — content in relation to yellow endosperm. S. M. Hauge and J. F. Frost, 339.
 in maize milling products; Distribution of —. C. R. Meyer and R. A. Hetler, 149.
 of butter. R. A. Morton and I. M. Heilbron, 710.
 Quantitative differentiation of vitamin *D* and —. II. H. C. Sherman and H. K. Stiebeling, 766.
 Ratfish liver oil as a source of —. E. R. Norris and I. S. Danielson, 206.
 Relation of carotene to —. E. M. Hume and I. Smedley-Maclean, 288.
 relation of carotene to —; Further observations on the. J. C. Drummond, B. Ahmad and R. A. Morton, 643.
 value of the body and liver oils of certain fish. B. Ahmad and J. C. Drummond, 403.
- Vitamin B:** concentration of —; Observations on the. B. C. Guha and J. C. Drummond, 148.
 Extraction of —. 581.
- Vitamin B₂:** Concentration of —. B. T. Narayanan and J. C. Drummond, 403.
Vitamin B₃: Williams-Waterman —. W. H. Eddy, S. Gurin and J. Keresztesy, 591.
Vitamin C: Beef extract as a source of —. R. Hoagland and G. G. Snider, 593.
 concentrates from lemon juice; Preparation and properties of —. D. P. Grettie and C. G. King, 55.
 in Baden wines; Use of Bezssonoff's reagent for detecting —. E. Remy and F. Richter, 282.
 in fresh and canned tomatoes. B. Clow and A. L. Martlatt, 459.
 Nature of —. Study of its electrical transference. R. B. McKinnis and C. G. King, 592.
- Vitamin D:** Absence of — from carotene. T. Moore, 288.
 Formation of — by monochromatic light. A. L. Marshall and A. Knudson, 593.
 in cod-liver oil; Variation of —. 197.
 in irradiated milk; Variation of —. 197.
 problem. I. The photochemical reactions of ergosterol. E. H. Reerink and A. van Wijk, 290.
 Quantitative differentiation of vitamin *A* and —. II. H. C. Sherman and H. K. Stiebeling, 766.
 Standard for the Antirachitic —. (Medical Research Council.) 692.
- Vitaminic** activity of carotene. M. Javillier and L. Émerique, 341.
- Vitamins:** Fat-soluble —. XXVIII. Antirachitic value of cows' milk as modified by exposure of the cow to sunlight and to radiations from a quartz mercury vapour lamp. H. Steenbock and Associates, 457.
 Fat-soluble — of milk. M. E. F. Crawford and others, 590.
 in dried fruits. II. Effect of drying and of sulphur dioxide upon vitamin *A* content of fruits. A. F. Morgan and A. Field, 643.
 in oils. F. S. Gerona, 588.

W

- Warrington:** Appointment of Public Analyst and Agricultural Analyst for County Borough of —. 277.
- Water** added to milk; Freezing point of milk as means of detecting —. G. D. Elsdon and J. R. Stubbs, 423.
 aerobic non-sporulating bacteria producing gas from lactose; Significance of, in —. C. A. Perry, 58.
 Air-free — for sulphur dioxide determinations in foods. D. M. Freeland, 380.
 analysis; Abstracts: 151.
 Drinking —. *See* **Drinking Water**.
 Gasometric determination of — (moisture) by means of calcium hydride. O. Notevarp, 344.

Water—continued.

- in substances rich in fat; Determination of crude fat and — by means of trichloroethylene. A. Heiduschka and G. Neumann, 530.
- Isohydric indicators and pure — for accurate measurement of hydrogen ion concentrations and salt errors. S. F. Acree and E. H. Fawcett, 215.
- Lead poisoning from tap —. W. E. Cooke, 208.
- Moisture and combined — in coal. S. Iki, 215.
- nitrites in —; New reagent for detecting. M. S. Vergnoux, 151.
- Sea —. *See* **Sea Water.**
- softening. The base exchange or zeolite process. 46, 511.
- Water Pollution Research Board:** Report for the year 1928-29, 510.
- Summary of recent literature. 195.
- Water softening. The base exchange or zeolite process. 46.
- Waters:** Bath —. 514.
- iodine in soils and —; Determination of minute amounts of. R. L. Andrew, 269.
- Mineral —. *See* **Mineral Waters.**
- nitrites in sewage effluents and —; Removal and determination of. J. W. H. Johnson, 325.
- Sea —. *See* **Sea Waters.**
- Waxes:** Solubilities of oils and — in organic solvents. J. W. Poole, 212.
- Whale:** Sperm —. *See* **Sperm Whale.**
- Wheat:** bacteriology of flour and —; Preliminary studies in. D. W. Kent-Jones and A. J. Amos, 248.
- corn; Colour reaction of the proteins of the —. E. Rabaté and J. Fleckinger, 334.
- flour. *See* **Flour.**
- glutenin; Nature and identity of —. M. J. Blish and R. M. Sandstedt, 145.
- Whey:** nitrates and nitrites in —; Determination of. E. Ohlsson and H. Fredholm, 134.
- White Metal Scrap and Residues;** Metallurgy of —. (Review), E. R. Thews, 776.
- Williams-Waterman** vitamin B₃. W. H. Eddy, S. Gurin and K. Keresztesy, 591.
- Wine:** Detection of fruit — in grape — by the sorbitol process. A. Röhling and J. Richarz, 201; G. Reif, 335.
- Diabetic —. 131.
- from dried grapes; Study of —. R. Moredod, 136.
- grape must and — treated with insecticides containing lead; Lead content of. E. Kielhöfer, 151.
- Labelling of port —. (Legal Notes), 507.
- potassium ferrocyanide required for fining —; Colorimetric method for determining the amount of. A. Hanak, 583.
- Wines:** Composition of Baden 1928 —, with special reference to the arsenic content and the use of Bezssonoff's reagent for detecting vitamin C. E. Remy and F. Richter, 282.

Wines—continued.

- glycerol in coloured —; Micro-determination of. C. de Coquet, 653.
- iron in white —; Rapid determination of. J. Ribéreau-Gayon, 136.
- red-; Measurement of colour in —. L. Roos, 453.
- Witch Hazel:** Extract of —. 131.
- Wood Oil:** Composition and polymerisation of Chinese —. E. R. Bolton and K. A. Williams, 360, 366.
- Wool fibres;** Photomicrography of —. J. Manley, 469.
- Writing inks;** Potentiometric determination of acidity in —. H. A. Bromley and L. W. Causer, 277.
- materials; Arsenic in —. G. Kappeller, 771.
- Photomicrography of ink sediments in pen —. T. J. Ward, 568.
- Use of ultra-violet rays in the examination of —. H. Langenbruch, 468.

X

- X-Ray** dosage; Measurement of —. 133.
- examination of coal and coke. C. N. Kemp, 223.
- examination of lithopones. W. A. Wood, 657.
- photography for examining bullets. 740.

Y

- Yeast:** Antirachitic value of irradiated —. S. K. Kon and M. Mayzner, 400.
- ergosterol content of —; Factors determining the. I. Species. C. E. Bills, O. N. Massengale and P. S. Prickett, 522.
- preparations; Fermentation by —. A. Harden and M. G. Macfarlane, 455.
- Yeasts:** Molds, — and Actinomycetes. (Review), A. T. Henrici, 774.
- Staining — with methylene blue. 711.
- Study of — by the complement-fixation test. K. Stone, 711.
- Yorkshire:** Appointment of Deputy Agricultural Analyst for East Riding of —. 566.

Z

- Zeolite** process of water softening. 46, 511.
- Zinc** content of animals; Variations in the — with age. Influence of milk diet. G. Bert-rand and Y. Beauzemont, 455.
- Iodimetric determination of small amounts of —. H. A. Pagel and O. C. Ames, 648.
- ointment. 570.
- ores; Determination of cadmium and copper in spelter and — by rapid internal electrolysis. E. M. Collin, 495.
- Separation of — from nickel. 309.
- Separation of indium from —. 219.

- Zinc Dust:** Detection and determination of the carboxyl group by distillation with — in a stream of hydrogen. A. W. van der Haar, 61.
- Zinc Sulphate:** Ferric chloride as indicator in the titration of potassium ferrocyanide with —. P. F. Felkers, 407.
- Zirconium:** potassium in presence of —; Detection of traces of. R. D. Reed and J. R. Withrow, 67.
- Separation of gallium from —. 218.
- Separation of thallium from —. 410.
- separation of titanium from hafnium and —; New method for. A. R. Powell and W. R. Schoeller, 605.
