NEVER BEFORE SO₂ SPECIFIC!

PULSED FLUORESCENT GAS ANALYZER

"This new stack source monitor, using TECO-developed, patent applied for, *pulsating* ultra violet energy, singles out and excites just SO₂ molecules. They emit instant, detectable radiation in direct proportion to concentration in the sample gas for continuous monitoring in real time."

George N. Hatsopoulos, President

Direct, clean and specific. That's the way you measure SO₂ content with this new state-of-the-art MODEL 40 Pulsed Fluorescent Analyzer.

In a reaction chamber developed jointly with MIT, SO₂ tell-tale molecules are excited and read electrically. Precision to 1% from 0.5 to 5000 ppm in 5 scales. Linear response through the full range.

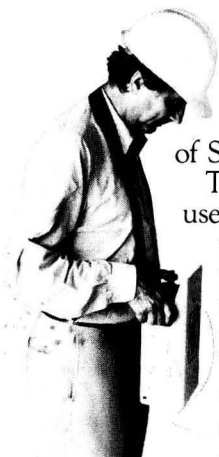

No consumable gas or chemicals required. Fast, 4-second response at any time from single or multiple stack installation. Power: 150 watts; weight: 40 pounds; dimensions: 17" x 9" x 23". Never before has measurement been so specific. Pulse us for details. Environmental Instruments Division, Thermo Electron Corporation, 85 First Avenue, Waltham, Massachusetts 02154. Telephone 617/890-8700. Telex 92-3323.

Circle No. 72 on Readers' Service Card

The go-anywhere portable SO₂ analyzer. Less than 5 lbs. Less than \$500.

CEA Instrument's U2-D's are the world's fastest selling instruments for measurement of SO₂.

They are not only the most useful—they measure SO₂ virtually anywhere—but the easiest to use. Untrained personnel can master them in minutes. They are light-weight, compact and completely self-contained, easy to carry wherever you need

on-the-spot monitoring.

They're rugged (we use integrated solid state circuitry and carbon electrodes instead of delicate platinum). Field proven under all environmental conditions.

They are extremely sensitive for ambient level measurement, detecting as little as 0.02 ppm. The range of the U2-D is 0 to 0.5 ppm, adjustable to 2 ppm. The dual range U2-DS, the big brother of the U2-D, in addition has a second range which allows measurement of SO₂ up to 20 ppm.

Now in development is the DSL probe attachment that extends the range of the U2-DS to 0-2000 ppm for source

measurement, with higher ranges available upon special request.

The U2-D's respond in seconds—give a complete integrated answer in one minute.

These unique capabilities, plus low prices, are making the U2-D's the most widely used SO₂ analyzers in the world by governments, schools and industry.

Before buying more expensive equipment, use the U2-D's to assess exactly what you need and where you need it. It could turn out that a U2-D is the only analyzer you'll need.

For more information, use the coupon.

With one system we can analyze all of these water quality parameters

Ammonia	Silicate	COD	Hardness	Copper
Nitrate+Nitrite	Chromium	Cyanide	Sulfate	Chloride
Nitrite	Iron	Phenol	Alkalinity	Kjeldahl
Phosphates	Sucrose	Fluoride	Sulfide	Nitrogen

So can you, with AutoAnalyzer II

With an AutoAnalyzer II system in your laboratory, you will be able to measure, quickly, accurately, and economically, any or all of these water quality parameters. Many AutoAnalyzer II methods for water quality analysis have been recommended by the Environmental Protection Agency, and many of these analyses may be run at a rate of 60 samples an hour. If your laboratory is involved in measuring a variety of water parameters, switchover of tests may be accomplished in minutes. A digital printer eliminates mathematical calculations of results and manual record keeping.

One system handles your water quality workload.

For more information on
AutoAnalyzer II, please

The best solution to your emission-control problem is also the most economical. Celesco has the answers.

Celesco understands how vitally important it is for you to achieve the most economical solution to your emission control problem. It has been our experience that the most economical solution is the one that solves your problem on a long-term basis and achieves unquestioned legal compliance as quickly as possible.

Celesco is uniquely qualified to provide you with that solution. We are one of the few companies to successfully apply advanced technology to emission control. We have a proven track record. We offer advanced survey techniques, plants systems approach, and

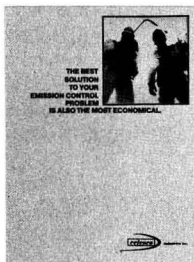

full service capability—including emission surveys, diagnostic analysis, emission control planning and engineering, supervision of equipment installation and start-up, operation monitoring and agency liaison.

Celesco is prepared to solve your problem. Thoroughly. In the most economical way possible.

If you have questions, call us. We have the answers. And write for the **Celesco Environmental Services Brochure.**

Now waste water reclamation by ZIMPRO a reality!

Full Scale Plant Operation Proves Regenerated Powdered Carbon Effective & Economical

Powdered activated carbon has long been recognized as a preferred agent for treating wastewater. The principal deterrent to its use has been the difficulty of regenerating spent powdered carbon for continuous recycle. Now Zimpro has overcome this difficulty and wastewater reclamation with powdered activated carbon has become a reality. Full scale operation of the Rothschild, Wisconsin Sewage Treatment Plant has proved that the system is effective.

The Zimpro Wastewater Reclamation System can take several forms. The system can combine a variety

of different processes and unit operations to arrive at the optimum design for each situation. It combines recent innovations in sewage treatment technology with time honored processes and unit operations.

Regeneration of the powdered spent carbon is accomplished by a practical and economical method. The spent carbon is subjected in slurry form to a partial oxidation in a Zimpro Wet Air Oxidation Unit. In the process, almost complete oxidation of adsorbed and associated organic contaminants occurs while carbon losses are limited to about 5 percent of the carbon. Since regeneration is done in a wet state, dewatering is unnecessary and the risk to air pollution with the dry dusty powder is eliminated.

For information about the Wastewater Reclamation System by Zimpro, write to:

MSA Air Pollution Instrumentation

For air monitoring
and analysis of stacks and
auto exhausts

Total Hydrocarbon Analyzer

The Total Hydrocarbon Analyzer is a continuous, low level (0-4 ppm) monitoring instrument designed to detect and measure trace contaminants in various atmospheres. Compact, sensitive and reliable, the unit is composed of four elements: a sample flow system, the combustible gases system, the burner assembly, and the electrometer and power supplies. Operation is based on the ionization of carbon atoms in a hydrogen flame. Normally, a flame of pure hydrogen contains an almost negligible number of ions. Adding organic compounds results in a large number of ions in the flame.

Application

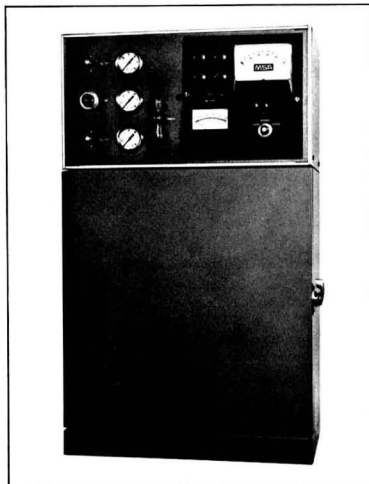

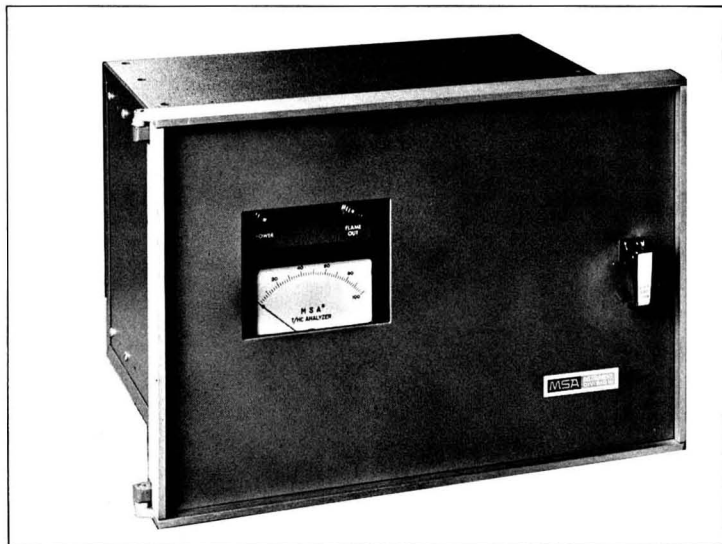

For detecting hydrocarbons as air pollutants, measuring auto exhausts for hydrocarbon emissions, monitoring atmospheres for toxic materials, monitoring gas mains, sewers, tunnels for flammable gases, checking plants for toxic concentrations of solvents and vapors, leak detection in aerosol packaging.

Specifications

Full scale range—0-4 ppm by volume, expressed as methane
Sensitivity—1% of full scale range
Response—90% of final reading in one second or less
Drift—less than 1% of full scale range per 24 hours
Noise level—less than $\pm 1\%$ of full scale range
Reproducibility—meter graduated from 0-100 for reading of linear analysis signal. Single turn potentiometer provided to match analyzer signal to potentiometer-type recorder

Dimensions and Details

Construction—rugged, heavy gage sheet metal cabinet with attractive polyurethane finish
Weight—approximately 35 pounds
Size—12½" high, 19" wide including hinges, 13" deep

Dual Flame HFID Analyzer

The hydrogen flame ionization detector principle has proved excellent for analyzing low concentrations of hydrocarbons in air. A dual flame head is closely coupled with individual electrometers whose outputs are directed to an electronic system to obtain continuous individual signals for the two measurements. Normal calibration for both methane and total hydrocarbons is 0-4 ppm as methane.

Application

The Dual Flame Analyzer is designed to continuously and simultaneously analyze ambient air for methane and hydrocarbons minus methane. The dynamic range is very wide, and linear measurements are easily obtained between 0 and 10,000 ppm. Consequently, the Dual Flame Analyzer finds particular use with county, state and Federal agencies as a method of monitoring ambient atmospheres for air pollution control.

Specifications

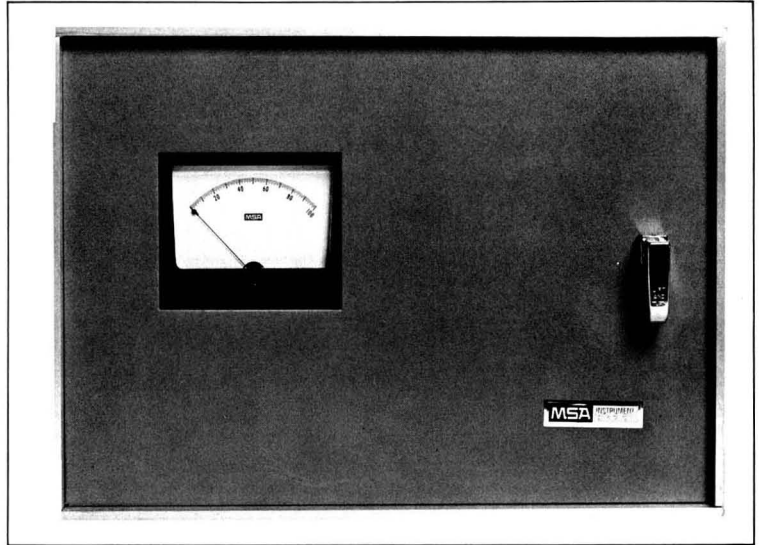

Speed of response—15 seconds for 100% of reading
Noise—Less than 1% of full-scale
Zero drift—Less than 1% of full-scale in 24 hours
Span drift—Less than 1% of full-scale in 24 hours
Temperature range—40-110°F
Voltage required—115 volts ± 15 volts AC, 60 Hertz
Power required—1,000 watts
Warm-up time—2 hours

Dimensions and Details

Size—33" high x 20" wide x 13" deep
Weight—60 pounds

LIRA® Model 202 Infrared Analyzer

The Lira Model 202 Infrared Analyzer is designed to monitor and display the results of gas analysis in potentially harmful industrial and production environments. It was developed specifically to meet the requirements for quick, dependable, automatic analysis of a single chosen component in simple or complex mixtures of gases, vapors or liquids. As such, it finds application in stack monitoring and furnace control, air pollution measurement, combustion control, detection of toxic or explosive concentrations of gases, vapors and liquids, and personnel protection. It is also used to control continuous or batch processes, monitor selected components in a process stream in order to detect slight deviations in the stream before their cumulative effects appear in delayed laboratory tests.

Application

The Model 202 not only monitors and measures toxic gases in plants, it also can be set up to give computer readouts, start up ventilating equipment, shut down process, and give audible and visual signals before danger levels are reached. The unit can be used to monitor ambient air for carbon monoxide levels, and hydrocarbons and CO in auto exhaust emissions. It is ideal for measuring carbon monoxide, carbon dioxide, methane, and/or water in such processes as basic oxygen furnaces, blast furnaces, open hearths and kilns.

Specifications

Speed of response—(a) 90% of final reading in 5 seconds (b) 90% of final reading in 0.4 second
 Noise level—less than 1% of full scale
 Zero drift—less than 1% of full scale in 24 hours
 Repeatability/Accuracy— $\pm 1\%$ of full scale in 24 hours
 Power requirements—500 watts, 115 volts, 60 Hz
 Calibration—use known gas or liquid samples
 Vibration effect—not affected by normal plant vibration
 Temperature effect—accuracy of unit to be maintained over temperature range of 30-120°F. Normally 55°C. Overtemperature protection 65°C
 Output—Millivolt—field adjustable, 0-10, 0-100 mv
 Voltage—0-1, 0-5, 0-10 VDC, 50 ma maximum
 Current—0-1, 0-5, 1-5, 0-20, 4-20, 0-50, 10-50 ma, 10 VDC maximum

Dimensions and Details

Size—19" wide x 13" deep x 12½" high
 Weight—49 pounds
 Construction—Analyzer complete with integral meter, explosion-proof or non-explosion-proof design; recorder is optional
 Windows—Sapphire, quartz, calcium fluoride, barium fluoride, etc.
 Tubing—flexible, solid tubing available
 Remote mounting—recorder can be mounted as much as 2500 feet from analyzer, remote Zero and Span controls can be employed 2500 feet from sensor

Note: This bulletin contains general descriptions of certain Mine Safety Appliances Company products. While uses and performance capabilities are described, under no circumstances should any of the products be used except by qualified, trained personnel, and not until the instructions, labels, or other literature accompanying the specific product, have been carefully read and the precautions therein set forth followed. Only they contain the complete and detailed information concerning these products.

Can technology solve the problems caused by technology?

Not long ago the prime goal was to provide more food, better living conditions, a longer life.

For much of the world technology has successfully met these problems. But some people, looking at the way advances have disrupted the environment, say industrialization is a curse.

Chiyoda, as Asia's largest engineering firm, feels that it is through better technology that man will solve the problems caused by industrial progress. And it is to such better technology that we at Chiyoda are devoting our efforts.

Here are a few of the things we've done and are doing.

Desulfurization of Fuels.

To meet widely varying environmental and other requirements, Chiyoda has built desulfurization plants based on all the best known processes. We've engineered and constructed 15 of the 29 fuel oil desulfurization plants in Japan. Now we're working on the world's largest 50,000 B/D HDS plant for Idemitsu Kosan Co., Ltd. It will reduce the sulfur content of heavy fuel oil to 0.3%. Processing plants of this type help both to minimize air pollution and to alleviate the worldwide shortage of low-sulfur fuels.

Flue Gas Desulfurization.

The first major result of our efforts to develop new environmental control technology was the Chiyoda THOROUGHbred 101 Flue Gas Desulfurization Process, which removes both particulates and sulfur dioxide to help keep the air free of pollutants from power plants, steelworks, refineries, and other industrial complexes. The Chiyoda THOROUGHbred 101 has already been installed in four commercial plants. Six more installations will be completed by July 1974, among them a large capacity 750,000 Nm³/hr. (467,000 scf/m) system for the Hokuriku Electric Power Company.

Removal of Fine Particles.

In addition to conventional dust removal systems, Chiyoda has recently introduced a new indoor fume controller that can be installed directly on the roof without the need for any conveying duct. It offers high efficiency in separating fine particles ranging in size down to 0.5 microns. The unit is economical to install and operate, and easy to maintain.

Water Pollution Control.

Another recent Chiyoda development was a water clarification plant with a flow rate several times faster than conventional systems. The whole plant is integrated into one single compact unit, resulting in a low construction cost. Applications include the pretreatment of boiler feed water, treatment of waste from petrochemical plants, removal of oils in waste water from petroleum refineries, and recovery of raw materials.

We have also recently perfected the Chiyoda THOROUGHbred 242 Continuous Activated Carbon Waste Water Treatment Process, which removes organic substances from waste water. It is expected to play an important role in the water treatment systems of the oil refining, petrochemical, chemical and steel industries.

We don't claim Chiyoda has all the answers. But we do feel our 1,800 engineers and scientists and those at other technology-minded companies around the world provide hope. With community support, we can make technology solve the problems caused by technology.

RESPONSIBLE, GLOBAL ENGINEERING

AIR POLLUTION

An ACS Reprint Collection

Comprising 38 articles from
Volumes 3-6 of *Environmental
Science & Technology*

Collected by D. H. Michael Bowen,
Managing Editor

Thirty-eight articles survey all aspects of air pollution, ranging from the latest federal legislation, to the new methods that are being developed to keep the air free of harmful pollutants.

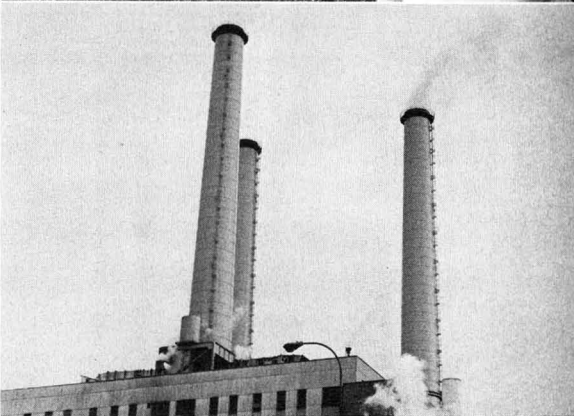

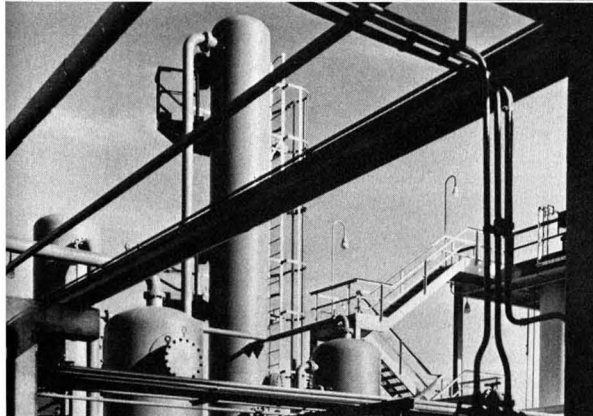

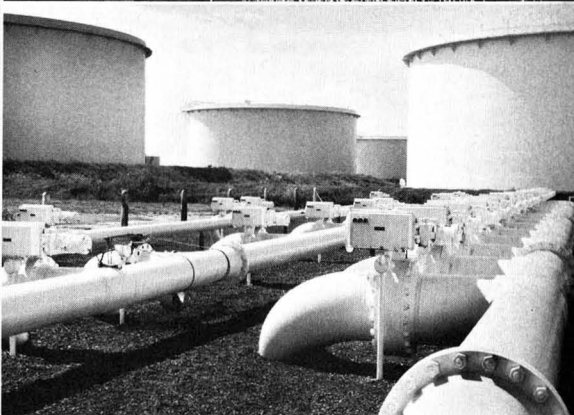

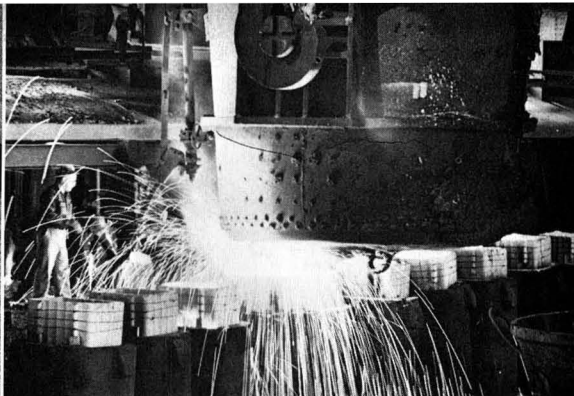

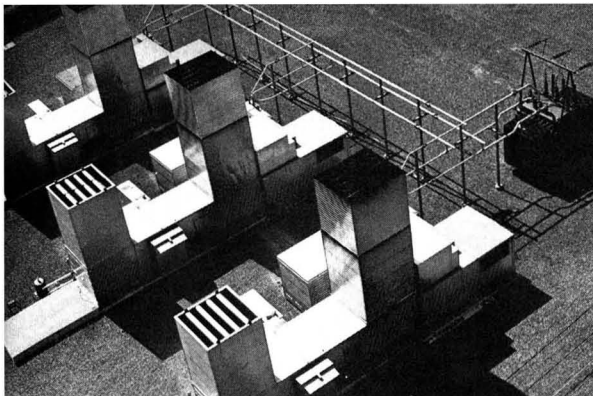

Some of the topics examined include:

- a new blueprint for pollution controls, air quality standards, specific pollutants, air monitoring technology
- scrubber systems, sulfur dioxide removal, new combustion processes, nuclear industry, odor control technology
- electrostatic precipitators, pollution-free power for automobiles, aircraft noise and pollution, photochemical smog

This up-to-date collection of papers is a useful guide for future research, as well as an authoritative source for recent developments in the fight against air pollution.

139 pages with index. (1973) Hardback \$5.95, paper \$3.50; 20% discount on paperback edition for 5 or more copies. Postpaid in U.S. and Canada, plus 40 cents elsewhere.

Order from:
American Chemical Society/Special Issues Sales
1155 Sixteenth St., N.W., Washington, D.C. 20036

Take any of the gas analysis problems above. Intertech can build a complete system to monitor it.

Whether your gas measurement problem involves stationary source, mobile source or ambient air monitoring, Intertech is the supplier with a difference.

Instead of just selling you a lot of hardware, and leaving you to sink or swim, we provide a total project capability. From original design, through construction, installation and start-up. The same goes for many industrial process monitoring situations too. You just tell us what you want the system to analyze.

The result will be a virtually maintenance-free system. One that can also be automatic and unattended if you wish.

We've gained this kind of know-how as exclusive U.S. Licensee and Distributor for Hartmann & Braun, a leading European maker of instrumentation. And our recent acquisition by Ethyl Corporation gives us even broader capabilities.

These associations also let us offer a complete line of highly advanced instruments, components and acces-

sories for any method of analysis—IR, UV, chemiluminescent, coulometric, paramagnetic, etc. So we can be impartial in our recommendations.

Let us show you how a single system can meet tomorrow's standards as well as today's.

Write or call Intertech, Dept. T.C., 19 Roszel Road, Princeton, New Jersey 08540. Phone: (609) 452-8600.

After the EPA, you're ready for NUS.

The Federal Water Pollution Control Act Amendments of 1972 and the Clean Air Act Amendments of 1970 have put almost all industry into the pollution control business. Perhaps you're included. If so, you know that clean water and clean air have become two of your most important products.

NUS Corporation is a specialist in cleaning air and in cleaning and recycling water.

Through our Cyrus Wm. Rice Division, we've been solving environmental problems for industry, utilities and government since 1918. With a professional staff of over 400 engineers, scientists and management experts, NUS Corporation has the personnel and laboratory facilities to do the entire environmental engineering job, or any part of it.

We can provide problem analysis, plant stack and meteorological monitoring, terrestrial and aquatic biological surveys, laboratory analysis, systems design, construction management, compliance reporting and a continuing monitoring program. We can work closely with your engineering staff on any single phase or the overall project.

To find out more about NUS Environmental Services, please write for literature.

To use NUS to help solve your water and air pollution problems, contact our Vice President, Corporate Development.

If you're ready for NUS, we're ready for you.

Circle No. 31 on Readers' Service Card

How to clean up your wastewater without having to buy the hardware.

Hire the Calgon® Adsorption Service.

Notice we said *service*. That's important. It means you don't have to erect equipment, maintain it or even operate it.

We can offer this service because we have modularized our pollution control experience into a compact, easily installed wastewater treatment system.

You have no capital investment in equipment, either. You pay a service fee out of your operating budget. And you get an effluent quality guaranteed by Calgon Corporation.

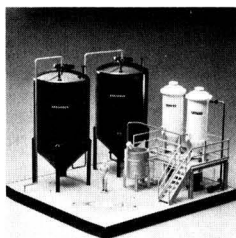

Who can use the new service.

The Calgon Adsorption Service won't solve every wastewater problem. But it is about the most effective way to handle the dissolved organics which cause color, odor and toxicity problems in waste streams.

Our experience with dozens of carbon adsorption systems in industry shows that it can work for you, too—if your problem is dissolved organics.

Try before you sign.

To be sure our service will meet your cost and effluent needs, we start with a series of simple adsorption tests and analyses of your

plant wastewater. This helps us identify the parameters of your problem, and confirms the treatability of your wastes by our process. Based on the test data, we work out a service agreement

with you covering cost, capacity, effluent quality and scheduling.

Next, we select one of our modular Calgon Adsorption Systems and install it on your prepared site. This normally takes about 90 days. We take complete responsibility for startup, operation and continuing maintenance. And we monitor effluent quality.

If your plant's requirements change, we can adjust the unit's capacity easily.

Find out more today.

Our brochure gives you all of the details about the Calgon Adsorption Service.

Write for your copy today to D. G. Hager, Calgon Corporation, Calgon Center, Pittsburgh, Pa. 15230.

Or call toll free on 800-254-1669* and talk directly with a Calgon engineer.

*In Pennsylvania, call collect: (412) 923-2345, ext. 234.

Bendix declares war

Public enemy number one. That's the dirty dozen, today's twelve most common air pollutants.

Bendix has teamed powerful technological skills to help you fight them. Fight them all. How? Through a pollution-monitoring capability that's second to none. We've unleashed the brains behind the world-famous Bendix process analyzers, to help build a wide range of air-pollution-monitoring equipment.

It gives us a total capability. Included in our arsenal is equipment for monitoring total hydrocarbons. NO. NO_x. CO. CO₂. SO₂. SO₃. H₂S. Mercaptans. Phosphorus. O₃. NH₃. The whole dirty bunch of them.

We're even offering an exhaust emissions analyzer. It's sure to prove invaluable to automobile, engine and carburetor manufacturers.

Together, these brains and equipment make us big guns in the air-pollution-monitoring field. Competitively priced guns. And they can zero in on any one of the dirty dozen with incredible sensitivity. (Our ozone monitor, for instance, is sensitive to parts per billion.)

Consider, too. Once you put our pollution-monitoring equipment into action, it's there to stay. We've built it to last and last.

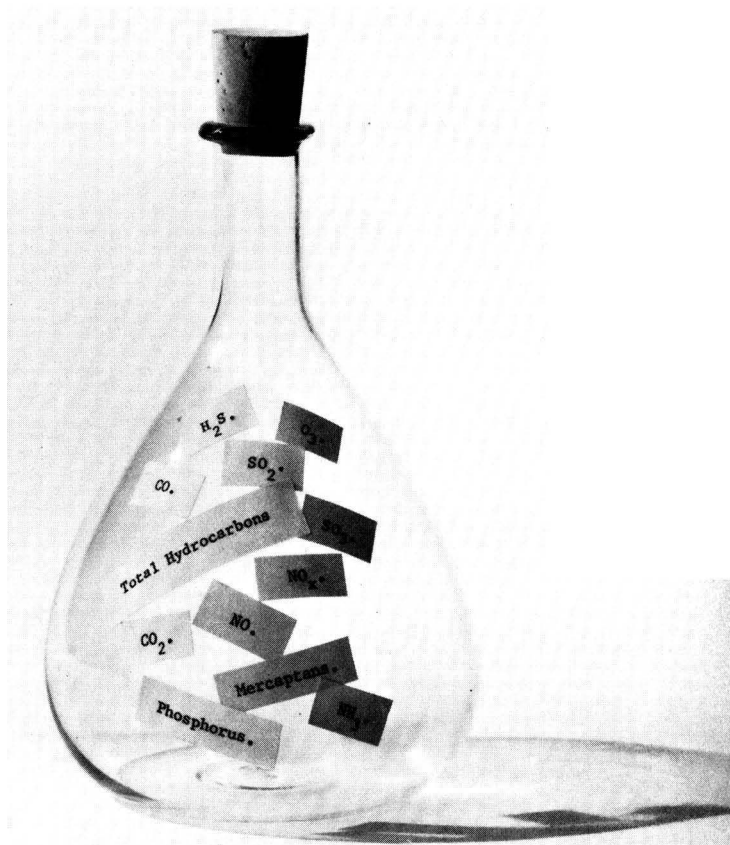

Total capability. Competitive prices. Strong capabilities background. Can't become obsolete. Those are the weapons we're offering to help fight the dirty dozen.

Call us when you're ready to attack. The Bendix Corporation, Process Instruments Division, Ronceverte, W. Va. 24970. (304) 647-4358.

It's a whole lot easier to run water pollutants on a Spectronic® 700 Spectrophotometer

This UV-visible spectrophotometer permits you to meet EPA water quality guidelines and quickly pays for itself by doing process monitoring for quality control as well. It will handle any *spectrophotometric reference method* in Standard Methods, the EPA Manual and ASTM-Part 23—simply and reliably.

The Spectronic 700 will not only perform all key analyses for today's requirements, but it also has the sensitivity to meet new low concentration requirements you'll be facing in the future.

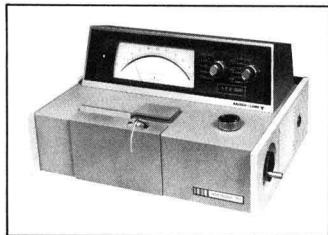

This easiest-to-learn, easiest-to-operate spectrophotometer covers the entire 200-950nm range without accessories or manual changing of detectors or filters. You change from one test to another in seconds. Switch from 203nm—when you're testing for nitrates (UV-nitrate method)—to 880nm to check phosphorus (single reagent ascorbic acid)—or back to 410nm for the brucine sulfate method of doing nitrates.

Use any test procedure you wish because the Spectronic 700 accepts virtually any *sample cell*, and with the semi-automatic flow-thru cell you can run 300 samples an hour.

Choice of readout mode is available at the twist of a dial: transmittance, linear absorbance, and concentration which lets you read unknown values *directly*—without calculations or standard curves—(The sensitivity to measure minute differences is provided by the narrow bandpass and scale expansion).

Should you need help, our Applications Laboratory people are always at your service—before you buy and long after. When you require any assistance in running a test, you'll find them ready and willing.

If you're running water pollutant or effluent determinations, you'll be glad you considered the *easy performer*—the Spectronic 700. Call us collect at 716-385-1000 or write Bausch & Lomb, Analytical Systems Division, Dept. 46-10-43, 820 Linden Avenue, Rochester, New York 14625.

If you're looking for sulphur in the air, our new 270HA can tell you the whole dirty story.

Automatically and without interference.

The New Tracor 270HA Atmospheric Sulphur Analyzer

With an input of just 5cc of ambient air, our new 270HA can give you selective, sensitive and automated sulphur pollution analysis.

The 270HA operates without a skilled technician and with minimum service. Combining the gas chromatographic technique with Tracor's exclusive* Flame Photometric Detector, the 270HA will automatically detect and measure sulphur compounds as low as 2½ parts per billion.

Because it uses a physical measurement, instead of the older wet chemical process, the 270HA is capable of separate, selective identification of sulphur pollutants without interference from similar non-sulphur compounds. NO INTERFERENCE—a major

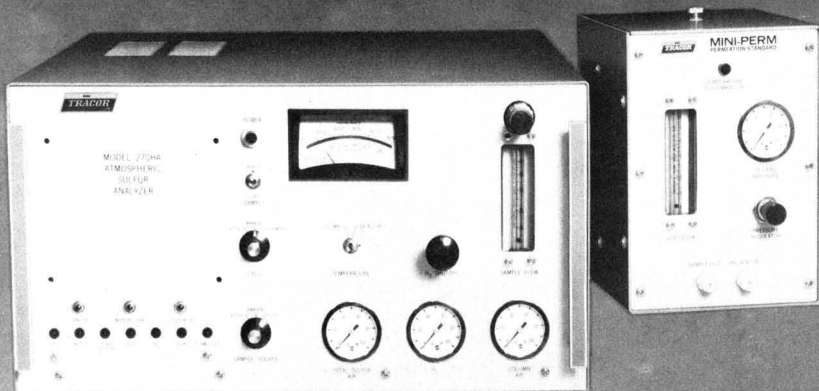

breakthrough by Tracor in low-level pollution analysis. The technique used is listed in the Federal Register.

Tracor engineers also developed an add-on automatic Permeation Tube Calibration System to complement air quality monitors. Our Mini-Perm is completely self-contained and is just another part of the total system available from Tracor, including a complete mobile trailer package.

The new Tracor 270HA is highly compact (about one-fourth the size of other manufacturers), and it is priced competitively. So before you invest, investigate Tracor. The leader in selective, automated air pollution monitors. *Patent # 3,213,747 & 3,290,118

YOUR HARD POLLUTANTS ARE EASY FOR US.

What Are They?

These are concentrated acids, alkalis, toxic chemical residues, sludges, oily wastes, and other spent materials. They result from petroleum and chemical processing, manufacturing, metalworking, metal finishing, refining and other forms of production. Most of these materials are of such concentration and toxicity that purification requires complex technology, often beyond the scope of an on-site control plant.

What Do We Do?

We remove such problem pollutants by tank truck and treat them at the only plants of their kind: multi-method treatment facilities offering the combined biological, chemical and thermal treatment needed to render these substances harmless. We have analyzed over 3,500 waste streams, and have developed the technology to detoxify them.

What Are The Benefits?

By utilizing our services, you can:

- Meet increasingly stringent antipollution requirements on or before their enactment.
- Avoid capital expenditure for on-site pollution control facilities.
- Handle peak loads or emergency situations, if you operate on-site facilities.
- Change your plant product output without enlarging or modifying pollution control facilities, or building them if they do not now exist.
- Avoid pollution fines. Your pollutants become our responsibility for compliance with all legislation.
- Stabilize, forecast and budget your pollution control costs.
- Pay for pollution control as an operating cost, not a capital expense.

Act Now!

We offer complete services to customers in the East, Southwest and Gulf Coast areas.

Call toll-free for information: (800) 441-9485.

TUBE FITTINGS

In a wide variety of materials from 1/16" thru 2" O.D.

HOSE CONNECTORS

For all applications of soft PVC tubing—variety of materials, sizes and models.

QUICK-CONNECTS

Pressure and vacuum-tight seals without twisting or wrenching—for 1/4" thru 1/2" O.D. tubing.

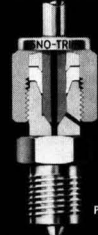

PIPE FITTINGS

Precision connections in all sizes and unusual reductions from 1/16" thru 1".

HIGH PRESSURE FITTINGS

Safe, convenient connections to 60,000 psi—no tube threading needed.

Patented

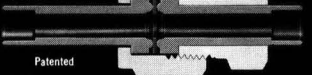

WELD FITTINGS

Precision butt and socket weld connections from 1/8" thru 1".

VACUUM COMPONENTS

Couplings, connectors, flanges and flexible metal tubing—1/16" thru 1-1/2".

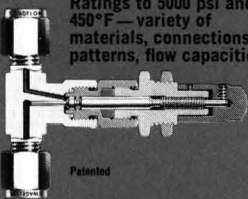

Patented

The symbol of total service for valves & fittings

METERING VALVES

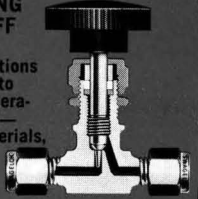

Ratings to 5000 psi and 450°F—variety of materials, connections, patterns, flow capacities.

Patented

REGULATING & SHUT-OFF VALVES

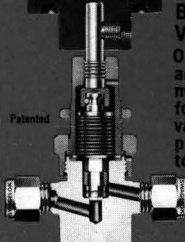

Service conditions from vacuum to 6000 psi, temperatures to 450°F—choice of materials, connections, patterns, flow capacities.

Patented

BELLOWS VALVES

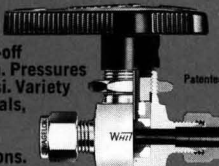

On-off, regulating and fine metering models for service from vacuum to 2500 psi, cryogenics to 1500°F. Hand or remote operation.

Patented

BALL VALVES

Quick on-off operation. Pressures to 5000 psi. Variety of materials, patterns and end connections.

Patented

CHECK & RELIEF VALVES

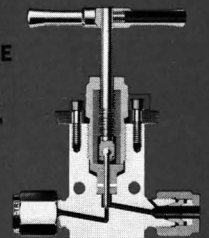

Chatter-free, leak-tight operation to 6000 psi and cryogenic to 900°F—fixed and adjustable opening pressures.

Patent Pending

HIGH PRESSURE VALVES

Safe service to 60,000 psi, choice of patterns, replaceable packings, stem tips and seats.

Patent Pending

IMMEDIATE DELIVERY—FROM LOCAL STOCKS

One distributor in your area offers off-the-shelf delivery of all these fluid system components. He's your Total Service Distributor for precision valves and fittings. His salesmen are trained in depth to provide professional, specialized assistance in selecting the right product for your application. And, in addition to his own complete stocks, he's backed by regional warehousing which assures uninterrupted availability of the products you specify.

IPCI's broad range of experience in all phases of waste water treatment and disposal makes it the single source for everything it takes to meet today's challenging requirements for acceptable effluents.

These capabilities cover not only IPCI's know-how and personnel, but mobile laboratory facilities, pilot plants, engineering departments and construction and operations services, as well . . . capabilities that mean results in the following areas:

- Identity surveys of type and volume of waste streams at present and projected rates.
- Feasibility studies of waste stream treatment versus regulatory requirements and treatment costs; evaluation of alternate disposal methods such as plant reuse or assimilation into other waste streams for combined treatment.
- Engineering studies of in-plant procedural changes to reduce or ease waste stream demands.
- Evaluation of methods to separate or combine waste streams for greater efficiency in subsequent treatment.
- Treatment of waste *sludge* for minimum disposal.
- Development of flow charts for treatment processes.
- Layout, design, and costing of treatment facilities construction and operation.

IPCI experience in each of these categories for a wide range of clients assures you of a system fully within all applicable specifications, and at lowest possible cost.

For complete details on IPCI's approach to your pollution problem, call or write.

Design ideas...with Cyclonair® Blowers

They're the heart of a whole new air age!

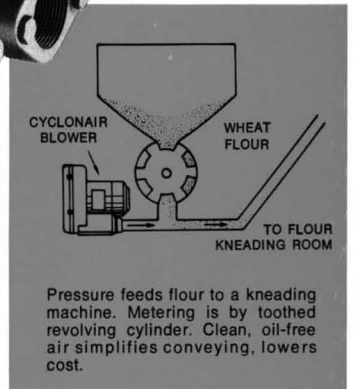

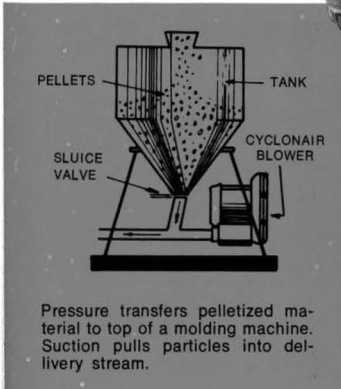

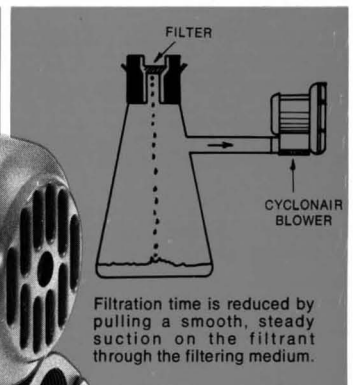

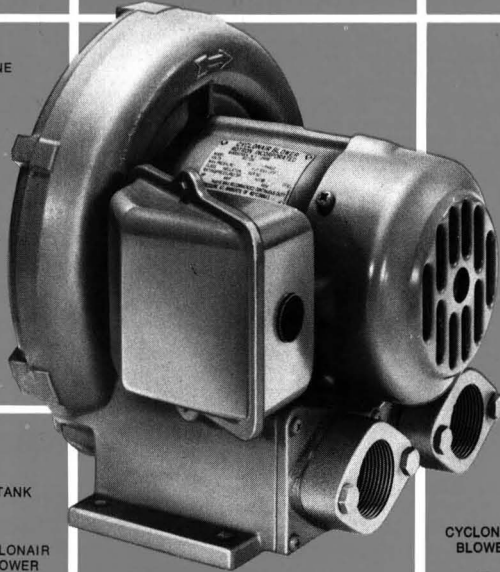

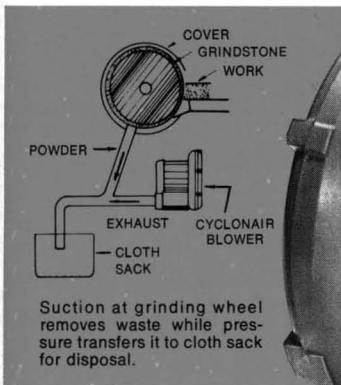

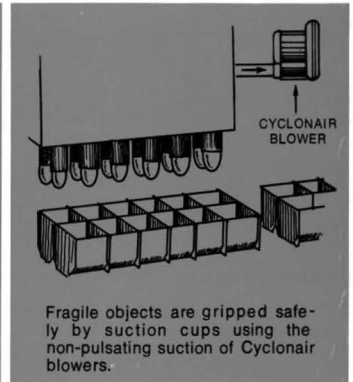

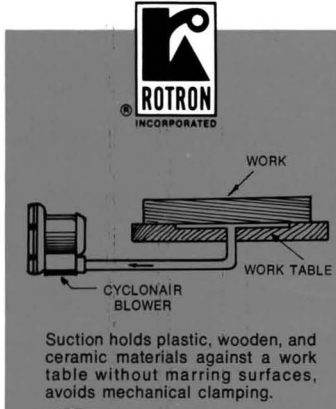

Air—in pressure, flow, or vacuum—is one of the most potentially useful of all forces. And now Cyclonair medium pressure, medium volume blowers let you do things with air that were never before practical. These single stage regenerative blowers deliver clean, non-pulsating air in pressures up to 5 psi, vacuums up to 10" Hg, flows to 500 cfm. They're compact. Quiet.

Versatile. Vibrationless. Dependable. They open up a host of application possibilities in materials handling, pollution control, waste removal, pneumatic conveying, and other areas where conventional air supplies are bulky, noisy, inefficient, or completely unuseable.

See what Cyclonair blowers are doing for others. Discover what they can do for you. Send today for Handbook of Application Ideas and nearest sales office.

Cyclonair . . . the **different, better** blower from the people who know regenerative blowers **best**. UL and CSA models.

EPA evaluated!*

total organic carbon
volatile organic carbon
total carbon

Dohrmann's DC-50 organic analyzer makes *all* of these measurements accurately and rapidly. Based on proven methods, it avoids interferences and undesirable pyrolysis reactions that historically have resulted in significant errors.

DIRECT READOUT. Four-digit presentation shows carbon content directly in mg/liter or ppm.

No recorder needed!

DIRECT MEASUREMENT. A single sample injection gives either Organic Carbon or Total Carbon content **directly, not by difference.**

INDEPENDENT MEASUREMENT. Volatile Organics are determined separately from Total Organics to aid in source identification.

RELIABLE MEASUREMENTS. Determines important, lightweight volatiles such as low molecular weight alcohols and ketones, normally lost by acidification and sparging.

FAST: 5 minutes per determination

ACCURATE: Repeatability of ± 1 mg/liter or $\pm 2\%$

WIDE RANGE: 1 to 2,000 mg/liter (ppm) without dilution

PRICE: \$7,500, including start-up assistance and operator training

DOHRMANN Division, Envirotech Corporation, 1062 Linda Vista Avenue, Mountain View, CA 94040 (415) 968-9710.

* "... Overall the unit performed in a most satisfactory manner. Detection limit was 0.5 to 1.0 mg C/l, working range was 1 to 2,000 mg C/l, with precision and accuracy comparable to approved methodology ... Excellent comparisons were obtained in practically all cases. Thus, the Dohrmann DC-50 appears to be an acceptable alternative for measuring total organic carbon in water and wastes."

"Newsletter, Analytical Quality Control" No. 15, October, 1972, AQCL, NERC, EPA, Cincinnati, Ohio 45268.

Our computer will tell you if you're smoking too much.

By combining accurate measurements of the concentrations of various pollutants in your stack gas with a predictive mathematical computer model, we can determine the effects of your plant's stack emissions on ambient air quality.

Using analyzers, we can accurately measure in stack concentrations of SO_2 , SO_3 , NO_x , CO, hydrocarbons, particulates and other air contaminants.

Then, by combining these measurements with a mathematical computer model developed from dispersion and plume rise equations, we can accurately predict concentration profiles of each pollutant in the air surrounding your plant. These profiles are validated by measurements taken by mobile vans equipped with continuous monitoring instruments and operated by trained technicians.

This unique service requires no capital investment. We supply the instruments, the manpower, and the final report.

To find out more about this valuable service from Du Pont, just fill out and mail the coupon. Call (302) 999-3912. You can also write Du Pont Company, Rm. 23334A, Wilmington, DE 19898.

Sample . . . measure . . . analyze air pollutants • sound/noise levels • water pollutants with RAC precision instruments

SAMPLING/MONITORING EQUIPMENT for ambient air & emissions

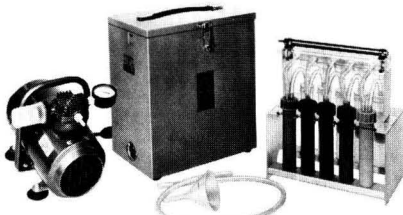

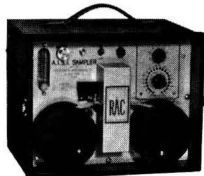

Research Appliance Company designs, manufactures, and supplies precision instruments that detect, measure, analyze, and monitor gases, vapors, and particulates present in ambient air and in the emissions from all types of chemical and combustion processes. This comprehensive line includes fully-automatic systems with remote readout capability; lightweight, portable, manual instruments; and a wide range of accessories. RAC products are manufactured to accepted standards, including those established by the Environmental Protection Agency (EPA) for stationary source sampling apparatus, the American Iron & Steel Institute (AISI), and the American Society for Testing & Materials (ASTM).

For details, write for Catalog 73-101 and Price List.

RAC Model G2
Particulate Sampler

RAC 5-Gas Collecting Sampler

RAC Train Staksampl™ System (EPA Method)
Circle No. 39 on Readers' Service Card

SOUND MEASURING INSTRUMENTS for environmental noise control

RAC supplies a line of versatile precision instruments used to measure/monitor sound and noise levels in all kinds of working environments. These units meet established noise measurement specifications, including those of the Walsh-Healey Act, the Occupational Safety & Health Act (OSHA), U.S. Bureau of Mines, U.S. Department of Labor, American National Standards Institute (ANSI) S1.4-1971, and relevant IEC recommended specifications.

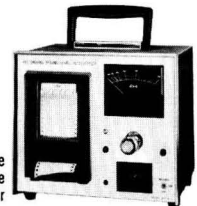

Write for Catalog/Price List 72-303.

Circle No. 40 on Readers' Service Card

WATER POLLUTION TEST KITS

RAC also supplies a comprehensive line of 28 prepackaged water analysis kits designed for laboratory and field use. Furnished complete and ready-to-use, each kit has all necessary equipment, chemicals, detailed instructions, and carrying case.

For list of kits, write for Bulletin 2403.

Measure air and water quality with speed and accuracy

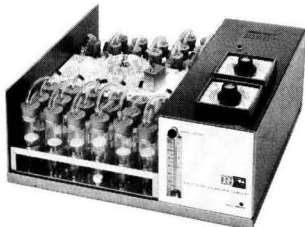

Aeron Automatic Tape Sampler/Recorder

Complies with ASTM D1704. Sample spots are 1 in. dia. on 2 in. centers. Automatically records 0-100% light transmission.

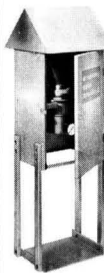

Aeron Tape Spot Evaluator

Companion unit for the Automatic Tape Sampler. Evaluates spots at a rate of 720 spots per hour. Indicates percent of light transmittance directly.

Aeron Sequential Sampler

Complies with ASTM D1605, D1607, D1609. Has 12 stations, each accommodating 3 tubes. Operates unattended—for up to 4 days.

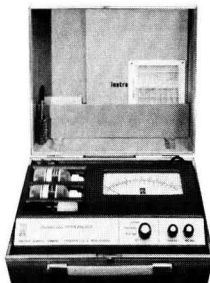

Aeron High Volume Air Sampler—Complies with ASTM D2009 and with USPHS Specifications. High capacity blower—up to 80 c.f.m. free air.

Aeron Sulphur Dioxide and Dust-Fall Monitoring Station—Complies with ASTM D2010 (for SO₂) and ASTM D1739 (for dust-fall). Compact, stable stand assemblies without tools.

Circle No. 1 on Readers' Service card for more information.

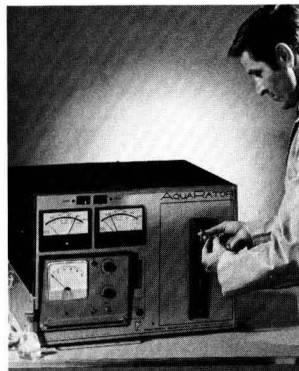

Galvanic Cell Oxygen Analyser

Portable, self-contained instrument for fast, accurate oxygen determinations. Response time is 99% in 1 minute with accuracy to ± 0.1 mg/liter or ± 0.1 ppm from 5-35°C. Or you can monitor continuously with chart recorder, if you prefer.

Works equally well in the lab, plant or field, in waste waters, liquors, inland or sea waters, chemical effluents and process streams. Weighs only 7½ lbs. including probe and chemicals. Operates on a 1.35 volt mercury battery.

Unique probe gives accurate readings at flow rates as low as 1 ft./sec. and is not affected by pressures to 200 foot depths.

Circle No. 2 on Readers' Service card for more information.

The AquaRator®

Chemical Oxygen Demand determinations in two minutes! Gives Repeatable data—to $\pm 3\%$ or better—on water quality in time to take immediate corrective action. Uses inexpensive CO₂ and saves hours of personnel time.

Results are easily correlated with those of the standard COD method prescribed by the APHA, and are much more consistent than BOD tests. Applicable for rapid detection of process upset or product loss. Designed to measure oxygen demand in the range of 10 to 300 mg per liter, higher ranges by simply diluting.

Circle No. 3 on Readers' Service card for more information.

Freas® Model 815 BOD Cabinet

Designed for BOD tests at 20°C as outlined by APHA. Long recognized for dependability and durability, the Freas BOD cabinet now has all these added features. Greater capacity—55% more than before, 17 cu. ft. of usable space. Handles over 300 standard BOD bottles. Greater uniformity—solid state controls give maximum reliability. Safety control for automatic over-temperature protection. Five year warranty covers compressor and temperature controls.

Circle No. 4 on Readers' Service card for more information.

opacity measurement

The optimum in sophisticated instrumentation for on-stack measurement of the opacity and optical density of smoke and dust emissions.

RM4 Optical Transmissometer — the only single-ended, dual-beam transmissometer that provides automatic, on-stack calibration of both zero and span. Reliable and accurate, it's been tested and proven in hundreds of installations.

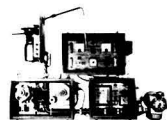

RM7 Smoke Density Meter — a smaller instrument for continuous measurement of stack-emission opacity in commercial and small to medium sized industrial facilities. With manual, on-stack calibration, its split-beam, folded-path, optical measurement technique provides accuracy and reliability.

particulate measurement

The solution to problems of both manual and automatic particulate sampling and analysis of stack emissions.

PM100 Manual Stack Sampler — a precision instrument for source sampling of industrial stack emissions. It was designed and developed by professional stack-sampling consultants and engineers to maximize versatility, efficiency, usability, and accuracy in a portable, lightweight instrument.

PM/ARGOS I Particulate Mass Analyzer — an automatic sampling and measurement system for particulate emissions. It eliminates the need for repeated, costly, time-consuming, manual stack sampling. Its accuracy and reliability have been proven in over 90 stack installations.

ambient air monitoring

Second-derivative spectroscopy applied to the measurement and analysis of ambient air pollutants.

SM3 Air Monitor — a complete air monitoring system which measures a combination of trace gas pollutants typically found in complex mixtures in today's urban ambient air. It sequentially measures the concentrations of SO_2 , NO , NO_2 , and O_3 .

SM5 and SM6 air monitors — single-component monitoring systems that directly measure NO_2 and SO_2 respectively. The instruments are virtually interference-free and offer a high degree of accuracy and reliability in the measurement of the components for which they are designed.

TAKUMA disposes refuse for 30 million citizens every day.

TAKUMA INCINERATOR PLANTS dispose of refuse for 30 million people in 143 Japanese cities every day. The total refuse disposal capacity is 30,250 tons per day. This confirms the advanced engineering of TAKUMA, pioneer and leading manufacturer of refuse incinerator plants in Japan. These figures place TAKUMA at the top of the industry with a 60% share of the total market in Japan.

TAKUMA is constantly advancing the technique in the field of refuse incineration, and engineering know-how and experience are exported to leading companies in England and Australia. Thus, TAKUMA is making vital contributions towards cleaning up of the earth, as well as welfare of the citizens.

**For further information on TAKUMA Incinerators,
write to Environment Division.**

patent pending

The ISCO wastewater sampler will collect up to 28 individual samples from streams, manholes, or other sources. Sample volume, time interval, or flow proportional interval (with the optional ISCO flow meter) are variable over wide ranges to accommodate practically any sampling application. The Model 1391 is portable, can be iced, and operates on rechargeable battery or 110V line. Sealed electronics provide reliable operation in corrosive environments. For complete information send for brochure.

pollution and process monitors

Orion monitors provide continuous, real-time data on any one of over twenty chemical species. Proven electrode methods are automated for accuracy and sensitivity over a wide concentration range. Modular electronics design includes electronic thermostating of sample chamber, automatic system recalibration, high and low alarm limits and a permanent strip-chart record.

How big is your particulate problem?

GCA's Airborne Particulate Monitors give you direct readout of mass concentration.

Based on the principle of beta radiation absorption, these instruments are not significantly affected by variations in chemical composition, size or other particle properties.

Easy to use, GCA's advanced line of particulate mass monitors provides direct digital readout of concentration immediately following sampling period.

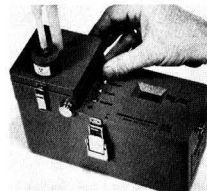

PORTABLE MODELS Safety-approved by the U.S. Bureau of Mines*, Models RDM-101 and RDM-201 are 6½ lb. portable instruments designed for monitoring dusts in working environments. RDM-101's digital readout indicates respirable or total dust concentrations in milligrams/cubic meter. The digital readout of RDM-201 indicates mass of total or respirable dust collected during sampling period.

CONTINUOUS AUTOMATIC MONITOR Model PMM-1 is designed for continuous unattended or manual monitoring of either ambient particulate concentrations or stationary and mobile source effluents. The instrument provides a direct readout of mass concentrations as low as one microgram/cubic meter. Readouts can be either digital display or tape printout.

Send for data sheets and complete performance specifications. Write or call GCA/Technology Division, Burlington Rd., Bedford, Massachusetts 01730. Phone: 617-275-9000.

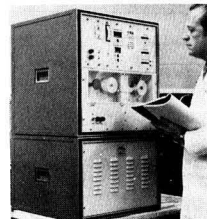

See us at Booth 54, American Industrial Hygiene Conference, Boston, May 20-25.

Pollution Control Starts With Pollution Monitoring

And, effective pollution monitoring isn't viable unless you can be assured of quality data on an immediate, real-time basis. That's what EMR-Telemetry Systems are all about. We're data gathering experts (and have been for 25 years) . . . with systems that are automatic and virtually operation free. . . that can reduce miles of environmental data and report out-of-tolerance situations immediately . . . systems that can automatically analyze as many as 50 parameters at locations that are many miles from your central station.

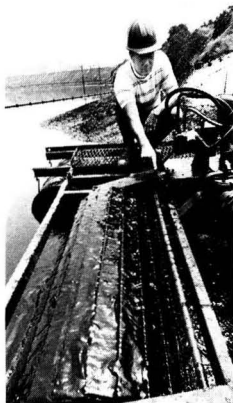

Let us show you how!

EMR Telemetry
Weston Instruments, Inc.

Circle No. 34 on Readers' Service Card

Clean Sweep™ cleans up 2500 gallons of oily waste an hour. (And that's our smaller model.)

Clean Sweep is the first effective, inexpensive oil/water separator. And it gets the job done fast while reducing operating costs to a minimum.

It's helping oil companies separate oil from troubled waters, and it can do the same for you. Without costing you an arm and a leg.

Clean Sweep is inexpensive to buy and operate. Its simple design permits unattended, 24-hour a day operation and keeps maintenance at an extremely low level.

And its efficiency is very high. Clean Sweep usually recovers more than 95% of the oil it comes across in a single pass. The water content averages only about 1½%.

So, if you have oily waste on your hands, here's something you can do about it.

Make it a Clean Sweep.

E.O. Agee, Lockheed Clean Sweep,
Dept. 577, P.O. Box 504, Sunnyvale, Calif. 94088

Please send me more information on how I can clean up with the Lockheed Clean Sweep.

Royal wire bag retainers help you clear the air.

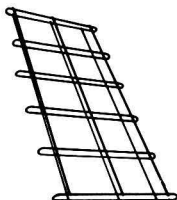

Standard Cages

Popular styles. With 5 or 10 vertical wires and ring spacing of your choice. All sizes.

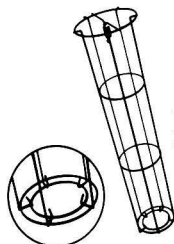

Oval Cages

Designed to enable the manufacturer to get more cloth area into his unit.

Flat Retainers

For envelope-style collectors. 11 gauge basic wire. Standard sizes: 10" x 20" x 1" and 20" x 34" x 1".

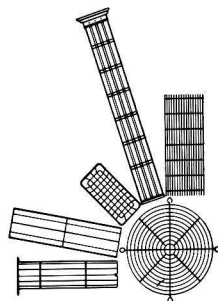

Double Wall Bag Cages

Designed for the new-style bags, formed completely from wire. No sharp edges. Adaptable to your present cages.

For more information on the full line of wire products designed for your collection system, call or write,

AUTOMATIC SAMPLER FOR WATER POLLUTION CONTROL [24 INDIVIDUAL SAMPLES]

Automatically takes a sample (450 ml) each hour for 24 hours and purges the tubing after each sample. Lift is 18 feet, when using 1/4" tubing. Battery or 115 Volt AC.

Provides an industrial or municipal laboratory with a running record of water quality . . . is available in a refrigerated model. Ask for color catalog of 30 different samplers.

Pollution Control Directory

AUTOMATIC SAMPLER FOR WATER POLLUTION CONTROL

If a representative sample is your requirement, you should be using the Collins Products Model 40 Composite Samplers.

What makes the Model 40 different?

- A standpipe assembly accurately measures the amount of sample taken
- There are no metering pumps in sampler
- Flow is maintained in a turbulent state to keep solids suspended
- Sample through sampler continuously purges out system at a rate of about 1/2 GPM when sample pulse switch is in OFF position
- Sample frequency is every 30 seconds for a 2 gallon 24 Hr. composite
- The smallest passage in samplers with ball valves is 3/16", therefore plugging is minimized.

Available in explosion-proof, nonexplosion-proof, and refrigerated models. Set time cycle and flow proportional models. Write or call today.

HACH CHEMICAL COMPANY
P.O. Box 807
Ames, Iowa 50010 U.S.A.

HACH

Products for Wastewater Analysis

Hach Chemical Company offers you all kinds of wastewater analysis information. It's geared to assist municipal and industrial wastewater treatment plants in conducting the many EPA tests which are now required.

Simplified methods, necessary chemicals, apparatus, and glassware are listed.

Write today for your **free** Hach Wastewater Analysis information.

HACH CHEMICAL COMPANY

Pollution Control Directory

Why we use a sticker, not a stencil.

When you work with certified calibration gases, you want to know the exact analysis in the cylinder you're using. No matter whose gas it is, one cylinder's composition can differ from the next by a fraction of a percentage point.

That's why each Air Products cylinder carries a sticker-decal showing the precise figure written in . . . why we don't stencil a row of cylinders all with the same round numbers. Every Air Products cylinder is analyzed individually and carries its individual mark of accuracy.

Not only do we analyze what's in every cylinder but our gas mixtures are the only ones computer-blended. So you can be doubly certain of satisfaction when you order calibration gases from Air Products. Of course, for less demanding uses, we also supply batch-analyzed and unanalyzed mixtures. Contact your nearest Air Products sales office or send in this coupon.

Air Products and Chemicals, Inc.
Specialty Gas Department
P.O. Box 538

Allentown, Pennsylvania 18105

Telephone (215) 395-8257

- Please send additional information on calibration gases.
 Send complete catalog of specialty gases and equipment.

yourself from complex problems in air pollution analysis. Use a continuous, fully automated Freeman Analyzer for STACK gas measurement and AMBIENT air monitoring.

1 2 3 4 5 6

SIMPLICITY—Only one rotary moving part. No vacuum pumps. No flowmeters.

REGENERATIVE CARTRIDGE system for long life. (Patent applied for.)

DUAL PURPOSE—Stack and/or ambient air analysis with one instrument.

SPECIFIC and ACCURATE with **FAST RESPONSE**.

AUTOMATIC CALIBRATION assures consistent accuracy.

HAND-PORTABLE and self contained; therefore, versatile.

FREE-MAN

Pollution Control Directory

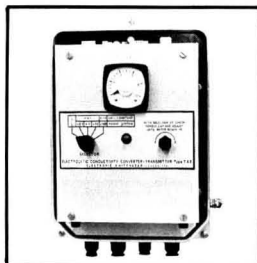

KENT CAMBRIDGE TAKES THE PROBLEMS OUT OF pH, AND CONDUCTIVITY

Kent EIL Series 2830 pH Transmitters

... a rugged waterproof, 'go anywhere' series with lab instrument accuracy. Have integral local indicators and standard 0-14 pH or any 2, 5 or 10 pH expanded scales. Optional features include...

- high/low alarms and control with relays
- 7201 flow electrode system
- ultrasonic cleaning on electrodes

Kent ESL Series TX 2 Conductivity Transmitters

... continuously measure electrolytic conductivity and transmit a linear DC signal. Can be wall or panel mounted. Have range switch/calibration checks, and temperature compensation.

EFC Flowline Cell

... one of several virtually indestructible conductivity measuring cells. Its annular electrodes are flush—permitting an unrestricted flow and minimizing fouling. No re-platinizing necessary—clean with a bottle brush.

*Should you require any application engineering assistance, we would be happy to be of help.

Let Datametrics help you meet the *Occupational Safety and Health Standards* with our Model 800-VTP Air Flow Multimeter that measures . . .

- gas velocities
- ambient temperature
- static pressure
- and
- mass flow

MODEL 800-VTP Air Flow Multimeters

Datametrics portable multimeter provides a simple and direct method for measuring flow parameters:

Velocity: 0 to 6000 FPM
Temperature: 0 to 300° F
Static Pressure: 0 to 10" H₂O
Mass Flow: With in-line sensor measures up to 600 SCFM

A versatile instrument for measuring *complete plant environmental parameters*. Request Technical Bulletin 800-VTP.

Datametrics manufactures a broad line of flow/pressure measuring instruments and systems, and our Application Engineering Staff would be pleased to serve you in the solution of your measurement problems.

Datametrics

acid test

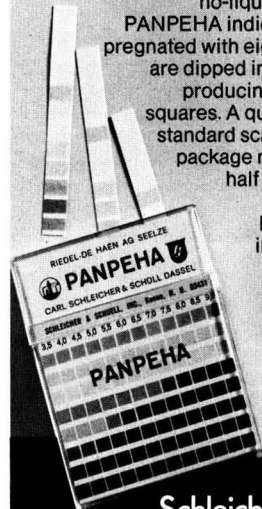

...alkaline, too!

PANPEHA is the fast, clean, accurate, no-liquid way to measure pH.

PANPEHA indicator strips . . . each impregnated with eight colored squares . . . are dipped in the fluid to be tested, producing color changes in the squares. A quick comparison with a standard scale on the clear plastic package measures pH values in half stops from 0 to 10, full stops from 10 to 14.

PANPEHA is available in pocket-size boxes of 200 strips.

MARTEK MEASURES ...

conductivity

salinity

temperature

DO, pH

and depth

to

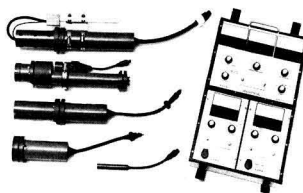

100

meters

With a Mark III Water Quality Monitoring System you can measure five of these parameters simultaneously — you have a choice between conductivity and salinity. The **Martek-designed** and **Martek-manufactured** sensor assembly withstands the rugged requirements of the marine environment.

Other features of this multi-parameter system include $\pm 1.0\%$ full-scale accuracy, common AC/DC power supply, and separate readout and/or recording of all parameters.

If your application involves intermittent or continuous *in situ* monitoring of salt or fresh water, the Mark III is for you. To learn more about this system and the companion module for turbidity measurement, contact us.

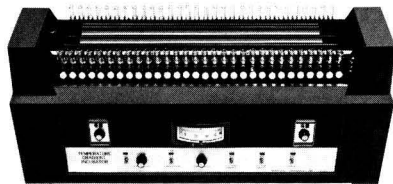

MARTEK INSTRUMENTS, INC.

A NEW WAY TO MAKE TEMPERATURE DEPENDENT STUDIES

■ Now, for the first time, it's both practical and simple to do temperature dependent studies.

■ The unique, new Temperature Gradient Incubator lets you do simultaneous incubation of 60 different samples at 30 different temperatures in one self-contained precision unit.

■ Built-in shaker provision.

■ For aerobic and anaerobic measurements.

Pelletizing Briquetting Extrusion

...only we can

Only Ferro-Tech can offer all three methods of agglomeration. Our **total concept turnkey systems** convert dust fines into clean, granular, uniform solids . . . by pelletizing, briquetting or extrusion techniques . . . whichever suits your manufacturing process. We'll analyze, test or conduct pilot studies to provide the most practical, economical solution to your dust handling problem. Our applications cover any fine raw and intermediate material, end product, or collector dust obtained from pollution control systems. You deal with one source for everything. For additional information, contact Bill Engelleitner at 412/344-8700.

The Japanese market for pollution control equipment

A comprehensive introduction to the pollution control market giving a review of the legal situation, details of the activities and the size of the Japan-based market. Major problems, successes and forecasts for the future are fully covered. Information on important fields of technological imports and exports are included.

A list of major Japanese companies in the pollution control equipment field is given. The present market structure is outlined in-depth. Technical tie-ups and joint ventures are given. Basic profiles of top manufacturers are also included.

This survey is essential to executives planning operations in Japan and to those needing information about Japan as part of the international situation.

250pp 98 tables published February 1973 \$400

Responsible for environmental management and pollution control?

Here's how Environmental Science and Technology can help you!

ES&T brings you the *new technology*. These are the techniques to avoid contamination of air, water, and land. And it brings you up-to-the-minute information of the *economics, laws, and feasibility* of many of these new techniques.

Utilizing the American Chemical Society's world-wide contacts, ES&T includes each month:

- Current government pollution legislation and guidelines.
- More efficient engineering techniques.
- Important fundamental research.
- First word of more productive equipment coming on the market.
- Case history studies of how others are overcoming the same problems as yours.

Complete the form and mail it back today. You can start benefiting from ES&T's coverage immediately! INCLUDED with your SUBSCRIPTION IS THE VALUABLE 1973-74 POLLUTION CONTROL DIRECTORY.

Eastman Kodak Co.
Essex Chemical Corp.
W. M. Fotheringham, Inc.
Harleco
Hercules, Inc.
Jones Chemicals, Inc.
Kjell Water Consultants, Inc.
Koppers Co., Inc.
Mallinckrodt Chemical Works
The Nalim Labs.
Pennwalt Corp.
Stauffer Chemical Co.
Union Carbide Corp., Chemical & Plastics Div.
Arthur C. Withrow Co.

ALUM — see aluminum sulfate

ALUMINUM CHLORIDE

J. T. Baker Chemical Co.
E. I. du Pont de Nemours & Co., Inc.
Mallinckrodt Chemical Works
Pearsall Chemical Co.
Stauffer Chemical Co.

ALUMINUM SULFATE

American Cyanamid Co.
J. T. Baker Chemical Co.
Cities Service Co.
The Columbus Water & Chemical Testing Lab.
E. I. du Pont de Nemours & Co., Inc.
Essex Chemical Corp.
Mallinckrodt Chemical Works
Stauffer Chemical Co.

AMMONIA

Air Products & Chemicals, Inc.
American Cyanamid Co.
Diamond Shamrock Corp.
Jones Chemicals, Inc.
Mallinckrodt Chemical Works
Pennwalt Corp.
Union Carbide Corp., Chemical & Plastics Div.
USS Agri-Chemicals Div.

AMMONIA, anhydrous

Air Products & Chemicals, Inc.
American Cyanamid Co.
E. I. du Pont de Nemours & Co., Inc.
Hercules, Inc.
Jones Chemicals, Inc.
Matheson Gas Products
MG Scientific
Occidental Chemical Co.
Pennwalt Corp.

PPG Industries, Inc.
Precision Gas Products, Inc.
Union Carbide Corp., Linde Div.
USS Agri-Chemicals Div.

AMMONIA, aqua

Air Products & Chemicals, Inc.
American Cyanamid Co.
AMSCO
J. T. Baker Chemical Co.
Jones Chemicals, Inc.
Mallinckrodt Chemical Works
MG Scientific
Pennwalt Corp.
USS Agri-Chemicals Div.

AMMONIUM NITRATE

Air Products & Chemicals, Inc.
American Cyanamid Co.
J. T. Baker Chemical Co.
E. I. du Pont de Nemours & Co., Inc.
Hercules, Inc.
Mallinckrodt Chemical Works
USS Agri-Chemicals Div.

AMMONIUM SULFATE

American Cyanamid Co.
J. T. Baker Chemical Co.
E. I. du Pont de Nemours & Co., Inc.
Engelhard Minerals & Chemicals Corp., Engelhard Industries Div.
W. M. Fotheringham, Inc.
Gallard-Schlesinger Chemical Mfg. Corp.
Harleco
Mallinckrodt Chemical Works
Occidental Chemical Co.
Republic Steel Corp.
United States Pipe & Foundry Co.
USS Agri-Chemicals Div.

AUTOMATIC QUALITY CONTROL ANALYZERS

Aquatronics, Inc.
Audn Corp.
Badger Meter, Inc.
Byron Instruments, Inc.
Calspan Corp.
Uella Scientific Corp.
Devco Engineering, Inc.
Drew Chemical Corp.
Ecologic Instrument Corp.
EMR-Telemetry
Enviro Control, Inc.
EnviroMetrics Inc.
Carlo Erba
Freeman Laboratories, Inc.
Geomet, Inc.
Horiba Instruments, Inc.
Institute for Research, Inc.
Ionics, Inc.
Leeds & Northrup Co.
Luft Instruments, Inc.
Monsanto Research Corp.
Moutrey & Associates, Inc.
Norcross Corp.
Particle Data Laboratories, Ltd.
Southwest Research Institute
UniLoc
Voland Corp.
Westinghouse Electric Corp. (N.C.)

BOILER TUBE CLEANING

A. A. A. Flexible Pipe Cleaning Co.
Ace Pipe Cleaning, Inc.
BETZ
Bond Chemicals, Inc.
Clow Corp.
Controls for Environmental Pollution, Inc.
Costello Manufacturing Co.
CWC Industries, Inc.
The Dacar Chemical Products Co.
Dow Chemical U.S.A.
Dresser Industries, Inc.
Drew Chemical Corp.
Engineering Chemical Services, Inc.
Environmental Ecology Emulsion Corp.
Garratt-Callahan Co.
Hydro Research Labs. Div.
Ion Exchange Products, Inc.
Kjell Water Consultants, Inc.
Lester Laboratories, Inc.
Metalene Chemical
National Power Rodding Corp.
Oakite Products, Inc.
O'Brien Industries, Inc.
Petrolite Corp., Tretolite Div.
Paul P. Pruss & Son, Inc.
Robinson Pipe Cleaning Co.
Skasol, Inc.
E. W. Smith Chemical Co.
The Spencer Turbine Co.
Standard Brands Chemical Industries, Inc.
Video Pipe Grouting, Inc.

CALCIUM CHLORIDE

J. T. Baker Chemical Co.
The Columbus Water & Chemical Testing Lab.
Dow Chemical U.S.A.
Gulf Chemical & Metallurgical Co.
Harleco
Mallinckrodt Chemical Works
N. L. Industries, Inc., Magnesium Div.

CALCIUM FLUORIDE

Allied Chemical Corp.
Mallinckrodt Chemical Works

CALCIUM HYDROXIDE

J. T. Baker Chemical Co.
Baroid Div.
Bethlehem Mines Corp.
Burns & Roe, Inc.
Harleco
Mallinckrodt Chemical Works
Martin Marietta Cement
Ohio Lime Co.
Terra Marine Scoop Co., Inc.
Union Carbide Corp., Ferroalloys Div.

CALCIUM HYPOCHLORITE

Kjell Water Consultants, Inc.
PPG Industries, Inc.

CALCIUM HYPOCHLORITE

Allied Chemical Corp.
The Columbus Water & Chemical Testing Lab.
Jones Chemicals, Inc.
Kjell Water Consultants, Inc.
Pennwalt Corp.
PPG Industries, Inc.

CALCIUM OXIDE — see also Section 3: lime processing or handling equipment

American Cyanamid Co.
J. T. Baker Chemical Co.
Bethlehem Mines Corp.
The Columbus Water & Chemical Testing Lab.
Mallinckrodt Chemical Works
Martin Marietta Cement
Ohio Lime Co.
Rohm & Haas Co.
Schore Automations, Inc.
Union Carbide Corp., Ferroalloys Div.

CALCIUM SULFATE

J. T. Baker Chemical Co.
Essex Chemical Corp.
Harleco
Mallinckrodt Chemical Works
Occidental Chemical Co.
Terra Marine Scoop Co., Inc.

CATCH BASIN CLEANING

Ace Pipe Cleaning, Inc.
Environmental Ecology Emulsion Corp.
National Power Rodding Corp.
The Penetryn System, Inc.
Paul P. Pruss & Son, Inc.
Robinson Pipe Cleaning Co.
Video Pipe Grouting, Inc.

CAUSTIC SODA (sodium hydroxide)

Baroid Div.
BASF Wyandotte Corp.
Diamond Shamrock Corp.
Dow Chemical U.S.A.
W. M. Fotheringham, Inc.
Harleco
Ionics, Inc.
Jones Chemicals, Inc.
Mallinckrodt Chemical Works
Pennwalt Corp.
PPG Industries, Inc.

CHLORINE DIOXIDE

The Columbus Water & Chemical Testing Lab.

CHLORINE AND CHLORINE COMPOUNDS

Air Products & Chemicals, Inc.
J. T. Baker Chemical Co.

CHLORINE AND CHLORINE COMPOUNDS

SODIUM ALUMINATE

BASF Wyandotte Corp.
The Columbus Water & Chemical Testing Lab.

Let us design away your waste treatment problems.

Now the leader in fluid processing technology offers complete process design services on a contract basis. Following an initial appraisal to determine the parameters of your application, you decide if the process we propose is worth the investment. The burden of proof is on us. If ion exchange, adsorption, flocculation or liquid extraction is the answer, we can provide an effective solution on paper, together with equipment recommendations and cost estimates sufficient for detailed engineering blueprints. This vital new contract service is available now at a competitive price. To arrange an appraisal, contact your nearest Rohm and Haas district office or call (215) 592-3271.

Circle No. 62 on Readers' Service Card

Anaerobic Biological Treatment Processes

ADVANCES IN CHEMISTRY SERIES No. 105

Nine papers from a symposium sponsored by the Division of Water, Air, and Waste Chemistry, chaired by Frederick G. Pohland.

Process balance is the crucial key to the future of anaerobic decomposition in water pollution control. This volume explores this problem and other questions relating to the present state of the art and future of this field. Topics include methane fermentation; volatile acid formation, toxicity, synergism, antagonism, pH control, heavy metals, light metal cations; dynamic and steady-state models; energetics and kinetics of anaerobic treatment; phase separation by dialysis; and the application of process kinetics in the design of these systems.

196 pages with index Cloth (1971) \$9.00. Postpaid in U.S. and Canada; plus 40 cents elsewhere. Set of L.C. cards with library orders upon request.

Air Pollution Damage to Vegetation

ADVANCES IN CHEMISTRY SERIES No. 122

A symposium sponsored by the Division of Agricultural and Food Chemistry of the American Chemical Society.

John A. Naegele, *Editor*

Air pollution can threaten our future food supply. Ten papers of the utmost timeliness and significance address themselves to this critical problem, and closely examine the consequences of toxic air on the plants we depend on for food, fiber, and aesthetic enjoyment.

This important volume discusses plant abnormalities caused by polluted air (unwarranted pigment change in leaves, malformed growth, or necrosis), along with the hidden injury from long-term, low-level toxic exposure. A comprehensive range of topics cover:

- the chemical basis of the air pollution problem
- damage from ozone, photochemical smog, PAN, and oxides of nitrogen and sulfur
- acute and chronic responses of horticultural and agronomic crops; biochemical effects
- plant toxicology; selecting and breeding plants for increased tolerance
- oxidant-induced change in a conifer forest; impact of population shifts; the future of crop production

137 pages (1973) Cloth, \$9.95; Paper \$5.45. Postpaid in U.S. and Canada, plus 40 cents elsewhere.

6 Books and Authors

Listing of books on the environment which were reviewed in ES&T from July, 1972 through June, 1973, plus an alphabetical list of publishers and addresses.

A

- Air Pollution**, D. H. Michael Bowen, ed., American Chemical Society, 1973, 138 pp., \$3.50, 7, 563 (1973)
- Air Pollution, 2nd ed.**, W. L. Faith, Arthur A. Atkinson, Jr., John Wiley & Sons, Inc., 1972, 393 pp., \$19.50, 7, 465 (1973)
- Air Pollution, Part A: Analysis**, Joe O. Ledbetter, Marcel Dekker, Inc., 1972, 424 pp., \$11.95, 6, 842 (1972)
- Air Pollution and Industry**, R. D. Ross, ed., Van Nostrand Reinhold Co., 1972, 489 pp., \$18.95, 7, 268 (1973)
- Air Pollution and Its Control, 2nd ed.**, Wayne T. Sproull, Exposition Press, Inc., 1972, 132 pp., \$6, 6, 942 (1972)
- Air Pollution and Respiratory Disease**, W. W. Holland, ed., Technomic Publishing Co., Inc., 1972, 165 pp., \$20, 7, 73 (1973)
- Air Pollution Control, Part 2**, Werner Strauss, ed., John Wiley & Sons, Inc., 1972, 300 pp., \$14.95.
- Air Pollution Control: Processes, Equipment, Instrumentation**, Lexington Data, Inc., 1972, \$250, 7, 364 (1973)
- The Air Pollution Control Market**, Frost & Sullivan, Inc., 1972, 150 pp., \$345, 6, 844 (1972)
- Air Quality Instrumentation, Vol. 1**, John W. Scales, ed., Instrument Society of America, 1972, 192 pp., \$11, 6, 655 (1972)
- Air Sampling Instruments, 4th ed.**, American Conference of Governmental Industrial Hygienists, 1972, \$12.50, 6, 1042 (1972)
- Alternatives to the Internal Combustion Engine: Impacts on Environmental Quality**, Robert U. Ayres, Richard P. McKenna, The Johns Hopkins University Press, 1972, 324 pp., \$12, 6, 1042 (1972)
- AMBIO, Col. 1, No. 1**, Eric Dyring, ed., Royal Swedish Academy of Sciences, 1972, 42 pp., \$13, 6, 755 (1972)
- America's Land and Its Uses**, Marion Clawson, Johns Hopkins Press, 1972, 202 pp., \$6.95, 6, 755 (1972)
- American Society for Testing and Materials Proceedings**, Vol. 71, 1971, 428 pp., \$15, 6, 653 (1972)
- Analysis of Industrial Wastewaters**, K. H. Mancy, W. J. Weber, Jr., John Wiley & Sons, Inc., 1972, 149 pp., \$6.95, 7, 268 (1973)
- Analytical Chemistry: Key to Progress on National Problems. NBS Special Publication 351**, W. Wayne Meinke, John K. Taylor, eds., Govt. Printing Office, 1972, 267 pp., \$18, 7, 162 (1973)
- Annual Book of ASTM Standards, Part 23: Water: Atmospheric analysis**, American Soc. for Testing & Materials, 1971, 936 pp., \$31, 6, 654 (1972)
- The Application of Science and Technology to Public Programs**, Irwin Feller, ed., Institute for Research on Human Resources, 1971, 521 pp., 6, 654 (1972)
- Applied Hydraulics in Engineering**, Henry M. Morris, James M. Wiggert, Ronald Press Co., 1972, 629 pp., \$15, 6, 1129 (1972)

- Aquaculture: The Farming and Husbandry of Freshwater and Marine Organisms**, John E. Bardach, John H. Ryder, William O. McLarney, John Wiley & Sons, Inc., 1972, 868 pp., \$37.50, 7, 465, (1973)
- Arts of the Environment**, Gyorgy Kepes, ed., George Braziller, Inc., 1972, 244 pp., \$12.50, 7, 162 (1973)
- Asbestos and Enzymes**, Paul Brodeur, Ballantine Books, 1972, 146 pp., \$1.25, 6, 1042 (1972)
- ASCATOPICS**, Institute for Scientific Information, 1972, \$95, 6, 844 (1972)
- Assessment of Airborne Particles**, Thomas T. Mercer, Paul E. Morrow, Werner Stober, 1972, 540 pp., Charles C. Thomas, Publisher, \$32.75, 6, 653 (1972)
- The Automobile Cycle: An Environmental and Resource Reclamation Problem**, U. S. Govt. Printing Office, 1972, 115 pp., \$1.25, 7, 268 (1973)

B

- Biodeterioration of Materials, Vol. 2**, A. Harry Walters, E. H. Hueck-Van Der Plas, eds., John Wiley & Sons, 1972, 514 pp., \$49.50, 6, 1129 (1972)
- Biological Transmutations**, Louis C. Kervran, Michel Abehsera, Swan House Publishing Co., 1972, \$5.95, 6, 755 (1972)
- Biological Waste Treatment**, Raymond P. Canale, ed., John Wiley & Sons, Inc., 1971, 177 pp., \$8.95, 6, 654 (1972)
- Biology of Brackish Water**, Adolf Remane, Carl Schlieper, John Wiley & Sons, Inc., 1972, 372 pp., \$21.75, 6, 842 (1972)
- Biology Today**, Communications Research Machines, Inc., 1972, 1022, \$14.95, 7, 464 (1973)

C

- The Careless Technology: Ecology and International Development**, M. Taghi Farvar, John P. Milton, The Natural History Press, 1972, 1030 pp., \$25, 6, 844 (1972)
- Chemosphere**, Pergamon Press, Inc., 1972, \$35, 6, 843 (1972)
- Chlorine: An Annotated Bibliography**, Ralph G. Smith, The Chlorine Institute, Inc., 1972, 165 pp., \$6.00, 7, 162 (1973)
- Chromatography of Environmental Hazards, Vol. 1: Carcinogens, Mutagens and Teratogens**, Lawrence Fishbein, American Elsevier Publishing Co., Inc., 1972, 499 pp., \$44.50, 6, 1129 (1972)
- Cleaning the Air: The Impact of the Clean Air Act on Technology**, John C. Redmond, John C. Cook, A. A. J. Hoffman, eds., John Wiley & Sons, Inc., 159 pp., 1971, \$8.95, 6, 655 (1972)
- Coastal Zone Management: Multiple Use with Conservation**, J. F. Peel Brahtz, ed., John Wiley & Sons, Inc., 1972, 352 pp., \$19.50, 6, 655 (1972)
- The Coastal Zone of Delaware**, University of Delaware, 1972, 464 pp., \$10, 7, 267 (1973)

- Coastal Zone Pollution Management**, Billy L. Edge, ed., Clemson University, 1972, 282 pp., \$8, 7, 563 (1973)
- Combustion Aerodynamics**, J. M. Beer, N. A. Chigier, John Wiley & Sons, 1972, 264 pp., \$24.50, 6, 1042 (1972)
- The Complete Ecology Fact Book**, Philip Noble, John Deedy, eds., Doubleday & Co., Inc., 1972, 472 pp., \$10, 7, 268 (1973)
- Conflicts in Water Resources Planning**, Earnest F. Gloyna and William S. Butler, eds., University of Texas, 1972, 172 pp., \$15, 6, 843 (1972)
- The Control of Sulphides in Sewerage Systems**, D. K. B. Thistlethwayte, ed., Ann Arbor Science Publishers, Inc., 1972, 173 pp., \$24, 7, 464 (1973)
- Cost Effectiveness in Pollution Control**, Technomic Publishing Co., 1972, 332 pp., \$20, 7, 563 (1973)

D

- Detergency: Theory and Test Methods**, Part I., W. G. Cutler, R. C. Davis, Marcel Dekker, Inc., 1972, 451 pp., \$28.50, 6, 842 (1972)
- Determination of Air Quality**, Gleb Maman-tov, W. D. Shults, eds., Plenum Publishing Corp., 197 pp., 1972, \$13.50, 6, 842 (1972)
- Development and Environment**, Co-Libri, 1972, 228 pp., \$6.50, 6, 942 (1972)
- Directory of Environmental Consultants**, Bill Bate, ed., Directory Press, 1972, 46 pp., \$6, 7, 267 (1973)
- Directory of Environmental Information Sources**, Charles E. Thibeau, ed., Canners Books, 1972, 457 pp., \$25, 7, 564 (1973)
- Directory of Environmental Information Sources, 2nd ed.**, Charles E. Thibeau, ed., National Foundation for Environmental Control, Inc., 1972, \$25, 457 pp., 6, 1042 (1972)
- Directory of Science Resources for Maryland**, Md. Div. of Economic Development, 1972, 232 pp., \$3, 6, 653 (1972)
- Disposal of Refuse and Other Waste**, John Skitt, Halsted Press, 1973, 414 pp., \$21.50, 7, 563 (1973)
- The Domination of Nature**, William Leiss, George Braziller, Inc., 1972, 242 pp., \$6.95, 6, 844 (1972)

E

- The Earth Around Us**, Soil Conservation Society of America, 1973, 242 pp., \$5, 7, 464 (1973)
- Earth Might Be Fair**, Ian G. Barbour, ed., Prentice-Hall, Inc., 1972, 168 pp., \$6.95, 6, 653 (1972)
- The Earth, Our Home in Space**, Soil Conservation Society of America, 1972, 16 pp., \$25, 6, 1130 (1972)
- Eater's Digest: The Consumer's Fact Book of Additives**, Michael F. Jacobson, Doubleday & Co., Inc., 1972, 260 pp., \$5.95, 6, 1129 (1972)

Ecological Aspects of the Nuclear Age: Selected Readings in Radiation Ecology. Vincent Schults, U.S. Dept. of Commerce, 588 pp., \$6, 6, 844 (1972)

Ecology and Economics: Controlling Pollution in the 70's. Marshall I Goldman, Prentice-Hall, Inc., 1972, 234 pp., \$6.95, 6, 653 (1972)

Ecology, Pollution, Environment. Amos Turk, Jonathan Turk, Janet T. Wittes, W. B. Saunders Co., 1972, 217 pp., \$3.95, 7, 269 (1973)

The Economic Impact of Pollution Control. U.S. Dept. of Commerce, 1972, 332 pp., \$2.50, 6, 843 (1972)

Electret Devices for Air Pollution Control. Thomas Kallard, ed., Optosonic Press, 1972, 126 pp., \$9.95, 6, 842 (1972)

Electrochemistry of Cleaner Environments. John O.M. Bockris, ed., Plenum Publishing Co., 1972, 296 pp., \$22.50, 6, 655 (1972)

Electrodeposition, 3 Vols., Skeist Laboratories, Inc., 1972, \$950. per vol., \$2500. collectively, 6, 1130 (1972)

Emissions From Continuous Combustion Systems. Walter Cornelius, William G. Agnew, eds., 1972, Plenum Publishing Corp., 479 pp., \$25, 7, 162 (1973)

Emissions from Internal Combustion Engines and Their Control. D. J. Patterson, N. A. Heinlein, Ann Arbor Science Publishers, Inc., 1972, 355 pp., \$18.75, 7, 269 (1973)

Energy, Economic Growth, and the Environment. Sam H. Schurr, ed., The Johns Hopkins Press, 1972, 232 pp., \$10, 7, 267 (1973)

Engine Emission: Pollutant Formation and Measurement. George S. Springer and Donald J. Patterson, eds., Plenum Publishing Corp., 1973, 371 pp., \$28.50, 7, 563 (1973)

Environment Chemistry. Stanley E. Manahan, Willard Grant Press, Inc., 1972, 393 pp., \$10, 7, 564 (1973)

The Environment Film Review. Environment Information Center, Inc., 1972, 155 pp., \$20, 6, 1129 (1972)

Environmental Affairs. Michael B. Meyer, ed., Environmental Affairs, Inc., \$18, 7, 267 (1973)

The Environmental and Ecological Forum 1970-1971. A. Burt Kline, Jr., ed., U.S. Dept. of Commerce, 1972, 186 pp., \$3, 7, 162 (1973)

Environmental Chemistry: Air and Water Pollution. H. Stephen Stoker, Spencer L. Seager, Scott, Foresman and Co., 1972, 186 pp., \$2.95, 7, 364 (1973)

Environmental Conservation, 3rd ed., Raymond F. Dasmann, John Wiley & Sons, Inc., 1972, 473 pp., \$10.50, 6, 842 (1972)

Environmental Engineering and Sanitation. Joseph A. Salvato, Jr., John Wiley & Sons, Inc., 1972, 919 pp., \$24.95, 7, 267 (1973)

Environmental Engineering Unit Operations and Unit Processes Laboratory Manual. John T. O'Conner, ed., Asso. of Environmental Engineering Professors, 1972, 270 pp., \$10, 7, 162 (1973)

The Environmental Future. Proceedings of the First International Conference on Environmental Future. Nicholas Polunin, ed., Barnes & Noble Books, 1972, 660 pp., \$32.50, 7, 268 (1973)

Environmental Information Sources: A Selected Bibliography. Carole Schildhauer, Special Libraries Association, 1972, 45 pp., \$3.80, 7, 365 (1973)

Environmental Law, Vol. 2, No. 1, Cary V. Abbott, ed., Lewis and Clark College, 1972, 312 pp., \$6., 6, 842 (1972)

Environmental Law, 2nd ed., Arnold W. Reitze, Jr., North American International, 1972, \$19.95, 7, 269 (1973)

Environmental Measurement and Interpretation. Robert E. Platt, John F. Griffiths, Robert E. Krieger Publishing Co., Inc., 1972, 235 pp., \$12.50, 6, 843 (1972)

Environmental Mercury Contamination. Rolf Hartung, Bertram D. Dinman, Ann Arbor Science Publishers, Inc., 1972, 349 pp., \$22.50, 6, 1129 (1972)

The Environmental Mercury Problem. Frank M. D'Itri, Chemical Rubber Press, 1972, 124 pp., \$27.50, 7, 364 (1973)

Environmental Pollution: A Survey Emphasizing Physical and Chemical Principles. Laurent Hodges, Holt, Rinehart, and Winston, Inc., 1973, 370 pp., \$7.95, 7, 564 (1973)

Environmental Quality Analysis. Allen V. Kneese, Blair T. Bower, eds., Johns Hopkins Press, 1972, \$12, 6, 655 (1972)

Environmental Quality and Safety, Vol. 1: Global Aspects of Chemistry, Toxicology and Technology as Applied to the Environment. Frederick Coulston, Friedhelm Korte, eds., Academic Press, Inc., 1972, 267 pp., \$18., 7, 162 (1973)

Environmental Pollution & Control Weekly Government Abstracts. National Technical Information Service, \$22.50 per year, 7, 162 (1973)

Environmental Science Laboratory Manual. Maurice A. Strobbe, C. V. Mosby Co., 1972, \$4.25, 138 pp., 6, 653 (1972)

Erosion and Sediment Control—An Annotated Bibliography. American Society of Agricultural Engineers, 1972, 16 pp., 7, 268 (1973)

Erosion and Sediment Pollution Control. R. P. Beasley, Iowa State University Press, 320 pp., 1972, \$11.95, 6, 755 (1972)

F

The Fate of the Lakes: A Portrait of the Great Lakes. James P. Barry, Baker Book House, 1972, 192 pp., \$14.95, 7, 364 (1973)

Fate of Organic Pesticides in the Aquatic Environment. Robert F. Gould, ed., American Chemical Society, 1972, 280 pp., \$10.50, 6, 1042 (1972)

The Fertilizer Handbook. William C. White, Donald N. Collins, eds., The Fertilizer Institute, 1972, 208 pp., \$4, 6, 1129 (1972)

Fine Dust and Particulate Removal. H. R. Jones, Noyes Data Corp., 1972, 307 pp., \$36., 6, 1130 (1972)

Forest Land Use and the Environment. Richard M. Weddle, ed., University of Montana, 1972, 150 pp., \$3.25, 7, 269 (1973)

Frederick Law Olmsted and the Environmental Tradition. Albert Fein, George Braziller, 1972, 180 pp., \$3.95, 7, 74 (1973)

G

Geology of Soils: Their Evolution, Classification, and Uses. Charles B. Hunt, W. H. Freeman & Co., 1972, 344 pp., \$12.50, 7, 268 (1973)

Green Land—Clean Streams. R. Michael Stevens, Center for the Study of Federalism, 226 pp., \$7.50, 7, 267 (1973)

H

Handbook of Chlorination. George Clifford White, Van Nostrand Reinhold Co., 1972, 744 pp., \$37.50, 6, 1042 (1972)

Handbook of Environmental Management, Vol. 1: Fundamentals. Charles J. Hilado, Technomic Publishing Co., Inc., 1972, 113 pp., \$25., 6, 844 (1972)

Handbook on Incineration: Guide to Theory, Design, Operation, and Maintenance. Frank L. Cross, Jr., Technomic Publishing Co., Inc., 1972, 64 pp., \$12., 6, 1042 (1972)

How Clean Is Our City? A Guide for Measuring the Effectiveness of Solid Waste Collection Activities. Louis H. Blair, Alfred I. Schwartz, The Urban Institute, 1972, \$1.95, 7, 464 (1973)

How Shall We Collect the Garbage? A Study on Economic Organization. Dennis Young, The Urban Institute, 1972, \$1.95, 7, 465 (1973)

Humic Substances in the Environment. M. Schnitzer, S. U. Khan, Marcel Dekker, Inc., 1972, 327 pp., \$19.50, 7, 365 (1973)

I

Indicators of Environmental Quality. William A. Thomas, ed., Plenum Press, 1972, 275 pp., \$15.50, 7, 365 (1973)

Industrial Environmental Health: The Worker and the Community. Lester V. Cralley, ed., Academic Press, Inc., 1972, 544 pp., \$24, 7, 464 (1973)

Industrial Processing with Membranes. Robert E. Lacey, Sidney Loeb, eds., John Wiley & Sons, Inc., 1972, 348 pp., \$17.50, 6, 1130 (1972)

Institutional Arrangements for International Environmental Cooperation. National Academy of Sciences, 1972, 74 pp., \$3.50, 7, 268 (1973)

International Environmental Action: A Global Survey. Thomas W. Wilson, Jr., Dunellen Publishing Co., Inc., 1972, 240 pp., \$12.50, 6, 1129 (1972)

An Introduction to Air Chemistry. Samuel S. Butcher, Robert J. Charlson, Academic Press, Inc., 1972, 241 pp., \$10.95, 7, 365 (1973)

Introduction to Environmental Science. Phillips W. Foster, Learning Systems Co., 1972, 181 pp., \$3.50, 6, 942 (1972)

Ion Exchangers: Properties and Applications. Konrad Dorfner, Ann Arbor Science Publishers, Inc., 1972, 317 pp., \$17.50, 6, 942 (1972)

Ionizing Radiation: Levels and Effects, Vol. 1 & 2. United Nations, 1972, 497 pp., \$12.50, 7, 267 (1973)

J

Journal of Environmental Quality. American Society of Agronomy, \$10, 6, 844 (1972)

L

Lead: Airborne Lead in Perspective. National Academy of Sciences, 1972, 330 pp., \$6.50, 6, 842 (1972)

Lectures in Transportation Noise. Richard H. Lyon, Grozier Publishing, Inc., 1973, 259 pp., \$20., 7, 564 (1973)

Litter—The Ugly Enemy: An Ecology Story. Dorothy E. Shuttlesworth, Doubleday & Co., Inc., 1973, 63 pp., \$4.95, 7, 464 (1973)

M

Man and the Environment. Harry N. M. Wintten, ed., R. R. Bowker Co., 1972, 305 pp., \$12.50, 6, 942 (1972)

Management and Engineering Guide to Economic Pollution Control: A General Approach to Industrial Waste Problems with Case Histories. David Krotchak, Clinton Industries, Inc., 1972, 124 pp., \$10, 7, 364 (1973)

Marine Chemistry, Vol. 1: Analytical Methods, 2nd ed. Dean F. Martin, Marcel Dekker, Inc., 1972, 389 pp., \$9.50, 7, 74 (1973)

Marine Ecology, Vol. 1, Part 3. Otto Kinne, ed., John Wiley & Sons, Inc., 1972, 544 pp., \$34., 7, 268 (1973)

Mercury: A History of Quicksilver. Leonard J. Goldwater, York Press Publishers, 1972, 318 pp., \$15., 6, 1130 (1972)

Mercury in the Environment: An Epidemiological and Toxicological Appraisal. Lars Friberg and Jaroslav Vostal, eds., Chemical Rubber Co. Press, 1972, 215 pp., \$22.50, 7, 563 (1973)

Methods of Air Sampling and Analysis. American Public Health Association, 1972, 480 pp., \$12.50, 6, 842 (1972)

Metallic Contaminants and Human Health. Douglas H. K. Lee, ed., Academic Press, Inc., 1972, 241 pp., \$7., 6, 755 (1972)

Metals as Pollutants in Air and Water. Ocean Engineering Information Series, Vol. 6, Evelyn Sinha, Ocean Engineering Information Service, 1972, 85 pp., \$15., 7, 162 (1973)

Modern Hydrology. Raphael G. Kazmann, Harper & Row Publishers, 1972, 365 pp., \$14.95., 6, 942 (1972)

Multiple Factors in the Causation of Environmentally Induced Disease. Douglas H. K. Lee, Paul Kotin, eds., Academic Press, Inc., 1972, 225 pp., \$7.50, 7, 464 (1973)

Mutagenic Effects of Environmental Contaminants. H. Eldon Sutton, Maureen I. Harris, Eds., Academic Press, Inc., 1972, 195 pp., \$7.50., 6, 755 (1972)

N

Natural Environments: Studies in Theoretical and Applied Analysis. John V. Krutilla, ed., Johns Hopkins University Press, 1973, 352 pp., \$16.50, 7, 564 (1973)

Nature Conservation: A Practical Handbook. W. M. M. Baron, Harper & Row, 1971, 74 pp., \$3., 6, 654 (1972)

Nitrogen Metabolism and the Environment. J. W. Campbell L. Goldstein, eds., Academic Press, 1972, 318 pp., \$13.95, 6, 843 (1972)

Nutrients in Natural Waters. Herbert E. Allen, James R. Kramer, eds., John Wiley & Sons, Inc., 1972, 457 pp., \$12.50, 7, 365 (1973)

O

Oil on Puget Sound: An Interdisciplinary Study in Systems Engineering. Juris Vagners, Paul Mar, University of Washington Press, 1972, 629 pp., \$10, 6, 1042 (1972)

Responsible for environmental management and pollution control?

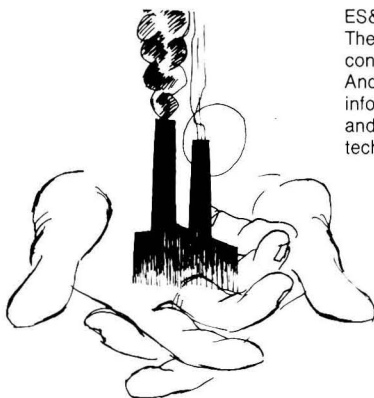

Here's how Environmental Science and Technology can help you!

Utilizing the American Chemical Society's world-wide contacts, ES&T includes each month:

- Current government pollution legislation and guidelines.
- More efficient engineering techniques.
- Important fundamental research.
- First word of more productive equipment coming on the market.
- Case history studies of how others are overcoming the same problems as yours.

ES&T brings you the *new technology*. These are the techniques to avoid contamination of air, water, and land. And it brings you up-to-the-minute information of the *economics, laws, and feasibility* of many of these new techniques.

Complete the form and mail it back today. You can start benefiting from ES&T's coverage immediately! INCLUDED with your SUBSCRIPTION IS THE VALUABLE 1973-74 POLLUTION CONTROL DIRECTORY.

ESS

JOURNAL OF ENVIRONMENTAL ECONOMICS AND MANAGEMENT

editors: ALLEN V. KNEESE and RALPH C. D'ARGE

The *Journal of Environmental Economics and Management* will publish high quality theoretical and empirical papers emerging in this field. While its general orientation will be toward papers in economics, the journal will contain a substantial number of contributions of an interdisciplinary nature as well as research in other fields of interest to resource and environmental economists.

Volume 1, 1974, \$30.00*

(Please add \$1.75 for postage outside U.S.A. and Canada)

* This journal is also available at a personal subscription rate. Please write to the publisher for details.

PYRETHRUM:

The Natural Insecticide

edited by JOHN E. CASIDA

Used for more than a century, pyrethrum, a product of nature and not of a chemical factory, remains unsurpassed by any type of synthetic organic insecticide and even by the best synthetic analogs or pyrethroids. This book deals with all facets of the insecticide, ranging from the culture of pyrethrum plants to the use of pyrethrum extract to control crop pests, from the chemical and biological stability of the pyrethrins to their persistence as residues, and from the action of pyrethrum on the insect nervous system to the toxicity of pyrethrum constituents to mammals.

1974, 336 pp., \$16.00

ENVIRONMENT AND BIRTH DEFECTS

by JAMES G. WILSON

A Volume in the ENVIRONMENTAL SCIENCES Series

This book provides a comprehensive unified view of the whole field of teratology. Of particular interest is perhaps the first comprehensive discussion of the mechanisms of teratogenesis, and a new concept for the use of laboratory animals in evaluating human risks.

1973, 312 pp., \$19.00

ENVIRONMENTAL

QUALITY AND SAFETY

edited by FREDERICK COULSTON and FRIEDHOLM KORTE

Published jointly with Georg Thieme Verlag, Stuttgart

Environmental Quality and Safety is a serial publication devoted to the latest research on the effects of chemicals, drugs, natural products and physical agents on plants, animals, and man. Volume 2 deals with such topics as: the role of man in his adaption to the technical age; waste water problems; disposal and utilization of solid waste; economic importance of chemical crop protection in relation to its ecological impact; economic aspects of pollution abatement in industrial chemicals production; and the environment programs of the Federal Republic of Germany, Israel, Canada, England and Japan.

AGRICULTURAL WASTE MANAGEMENT

Problems, Processes, and Approaches

by RAYMOND C. LOEHR

A Volume in the ENVIRONMENTAL SCIENCES Series

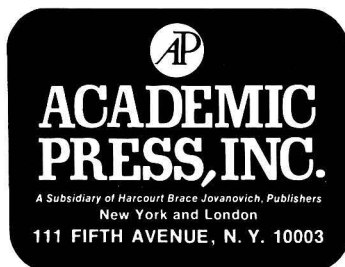

This book presents a summary of the processes and approaches applicable to the solution of agricultural waste management problems. In the context of this book, agricultural wastes are defined as the excesses and residues from the growing and first processing of raw agricultural products, i.e., fruits, vegetables, meat, poultry, fish, and dairy products. The book attempts to place the agricultural waste problem in reasonable perspective, to illustrate engineering and scientific fundamentals that can be applied to the management of these wastes, to illustrate the role of the land in waste management, and to discuss guidelines for the development of feasible waste management systems.

1974, in preparation

RESOURCES AND POPULATION

edited by BERNARD BENJAMIN, PETER R. COX, and JOHN PEEL

Filters The Young Industries, Inc.

UNICLONE
Cyclone Air Correction Div., UOP

UNIFLOW
Tank jacket LFE Metal Products

UNI-LOC
All products Universal Interloc, Inc.

UNIPAC 130
Bell and spigot joint Sealite, Inc.

UNIPAK
Combustion equip. Ace Engineering

UNI-SEAL
Sealing device Filterite Corp.

UNISTAGE
Air compressors Schramm, Inc.

UNITRON
Microscopes Unitron Instrument

UNIVERSAL SELECTRODE
Radiometers The London Co.

V

VAC-U-FLEX
Vacuum cleaner hose Flexible Tubing Div., Automation Industries

VACU-LIFT
Sandberg & Holdeman Co.

VACU VALVE
Valve Aerodyne Development Corp.

VALVE-MINDER
GC controller Carle Instruments

VAPOLERT
Vapor alarm and detector Scott Aviation

VAPOR-FLO
Generator Tenney Engineering, Inc.

VAPORPHASE
Waste heat recovery system Engineering Controls

VAPOTESTER
Detector Scott Aviation

VARI NIP
Twin roll press Ingersoll-Rand

VARI-SYSTEMS
Environmental control system Vari-Systems, Inc.

VARSOL
Mineral spirits Exxon Co., U.S.A.

VEE-BALL
Valves Fisher Controls Co.

VEE JET
Spray nozzles Spraying Systems Co.

VELVAMOG
Fuel conditioner Calgon Corp.

"VEN-KINETIC"
Dust and fume collector Peabody Engineering Corp.

VENTITE
Burners Maxon Corp.

VENTRI-SPHERE
Scrubber Air Correction Div., UOP

VENTURE
Ducts The Wiremold Co.

VENTURI
Meters, nozzles BIF

VERITRAK
Instrumentation Westinghouse Electric Corp., Computers & Instrumentation Div.

VERSA-MOUNT
Instrument case Fisher & Porter Co.

VERSATOR
Deaerator, degasser Cornell Machine Co.

VEZ
Anti-foamers Petrolite Corp.

VIBRASWITCH
Vibration switch Robertshaw Controls Co.

VIBRA TEL
Robertshaw Controls Co.

VIBRATIONDUCER
Vibrators Tremix Co., Inc.

VIBROSET
Screens Smico Corp.

VICTOR
Steam trap Wright-Austin Co.

VINTAGE
Ducts The Wiremold Co.

VISI-FLOAT
Flowmeters Dwyer Instruments, Inc.

VITAVAX
Fungicide Uniroyal, Inc.

VITRO
Borosilicate glass Wheaton Sci.

VITROKIT
Organic chemistry kit Wheaton Scientific

VOLAND
Balance and scale products, thermal analysis systems Voland Corp.

VOLERENE
Dacor Chemical Products Co.

VOL-O-FLO
Meters National Instrument Labs.

VUE-GUARD
Safety goggles Willson Products

VULCANOR
Incinerator McNaulin-Goder Group

VUTRONIK
Indicators, recorders, controllers Honeywell, Inc., Industrial Div.

W

WAFER-SPHERE
Valves Jamesbury Corp.

WARNE
Floating booms Surface Separator Systems, Inc.

WASH-AIRE
Scrubbers and washers United Air Specialists, Inc.

WASTE TAMER
Sewage treatment system Environmental Services, Inc.

WASTSAVER
Evaporation recovery system Wast saver Corp.

WATCON
Water conditioning chemicals and equipment Watcon, Inc.

WAY-PAC
Cells A. H. Emery Co.

WEDGE FILL
Crossflo fill Ecodyne Cooling Products

WEDGEPLUG
Plug valve Stockham Valves & Fittings

WEDGEWATER
Screen panels Hendrick Mfg. Co.

WEIGH BOAT
Weighing container Scientific Products

WEIGHTOMETER
Scale Merrick Scale Mfg. Co.

WELD-O-VENT
Welding fume exhausters, blower units, welding booths The Engwald

WELDOX
Adhesives Hardman, Inc.

WEMCO
Pumps, separators, classifiers Envirotech Corp.

WESTERN
Heat exchangers Ecological Science

WHATMAN
Paper and TL chromatography, filter paper H. Reeve Angel & Co., Inc.

WHECO
Furnaces Ecological Science Corp.

WHEELABRATOR LURGI
Electrostatic precipitators Wheelabrator-Frye, Inc.

WHIRLJET
Spray nozzles Spraying Systems Co.

WHIRLSTREAM
Hydrocyclone Polyclon, Inc.

WHISPER-TRIM
Value trim Fisher Controls Co.

WHITE
Sealant Sealite, Inc.

WHITE CAP
Personal environment systems 3M

WIDE-RANGE
Burners Maxon Corp.

WILLSON
Personal protection equip. Willson Products Div. ESB Inc.

WILLSON-WELD
Welders' goggles Willson Products

WILSON
Sludge conditioner Franklin Miller

WINCO
Engine-generator sets Ecological Science Corp.

WINDMASTER
Fan Acme Eng. & Mfg. Corp.

WIZARD
Controllers and transmitters Fisher Controls Co.

WL
Water level indicator FRL, Inc.

WOLLENSAK
Tape recorders 3M Co.

X-Z

X-CIDE
Bactericides Petrolite Corp.

ZEO REX
Iron removal system The Permutit

ZETA FLOC
Polymer, coagulant aid Narvon Mining & Chemical Co.

ZETA READER
Monitor Komline-Sanderson Eng.

ZIMMITE
Mud removers Zimmite Corp.

ZIMPRO INC.
Zimpro Inc.

ZOTRON
Scrubber/filter Anderson IBEC

8 Company Directory

Alphabetical listing of
manufacturers and suppliers
of the products and services
listed in this directory.

- A.A.A. Flexible Pipe Cleaning Co.**, Box 191, South Houston, Tex. 77587. (713) 946-7927
- A & H Engineering Corp., Environmental & Chemical Testing Div.**, 1501 N. Main, E. Peoria, Ill. 61611.
- Abart Engineering, Ltd.**, 505 Eglinton Ave., W., Toronto, Ontario, Canada (416) 485-0771
- Abbeon Cal, Inc.**, 123 Gray Ave., Santa Barbara, Calif. 93101. (805) 963-7000
- Abcor, Inc.**, 341 Vassar St., Cambridge, Mass. 02139. (617) 491-6640
- Accu-Labs Research, Inc.**, 9170 W. 44th Ave., Wheat Ridge, Colo. 80033. (303) 423-2766
- Accurate Flannel Bag Co.**, 109 W. 26th St., New York, N. Y. 10001. (212) CH2-4880
- Ace Glass, Inc.**, 1430 Northwest Blvd., Vineland, N. J. 08360. (609) 692-3333
- Ace Pipe Cleaning, Inc.**, 4000 Truman Rd., Kansas City, Mo. 64127. (816) 241-2891
- Acme Engineering & Manufacturing Corp.**, 2000 N. York St., Muskogee, Okla. 74401. (918) 682-7791
- Acoustica Associates, Inc.**, 6701 Odessa Ave., Van Nuys, Calif. 91406. (213) 782-0428
- Acrison, Inc.**, 180 Broad St., Carlstadt, N. J. 07072. (201) 939-4800
- Acrometal Products, Inc.**, 616 5th St., N., Minneapolis, Minn. 55401. (612) 338-4433
- Acurex Corp., Aerotherm Div.**, 485 Clyde Ave., Mt. View, Calif. 94040. (415) 964-3200
- Adaks Products, Inc.**, 285 Mt. Read Blvd., Rochester, N. Y. 14611. (716) 436-7550
- R. P. Adams Co., Inc.**, 263 E. Park Dr., Buffalo, N. Y. 14240. (716) 877-2608
- ADI Assoc. Contamination Control**, Forty Foot & Tomlinson Rds., Kulpville, Pa. 19443. (215) 368-2200
- Advanced Acoustical Research Corp.**, 2259 Sawmill River Rd., Elmsford, N. Y. 10523. (914) 592-4790
- Aer Corp.**, 100 Hilltop Rd., Ramsey, N. J. 07446. (201) 327-5700
- The Aeroacoustic Corp.**, P. O. Box 65, Amityville, N. Y. 11701. (516) 226-4433
- Aerochem Research Labs.**, P. O. Box 12, Princeton, N. J. 08540. (609) 921-7070
- Aerodyne Development Corp.**, 24340 Miles Rd., Cleveland, Ohio 44128. (216) 292-2828
- Aeronca, Inc., Environmental Control Group**, 200 Rodney St., Pineville, N. C. 28134. (704) 889-7281
- Aerosols Control Corp.**, 108 Grand Ave., Englewood, N. J. 07631. (201) 569-2266
- Aero Vac Corp.**, S. Bedford St., Burlington, Mass. 01803. (617) 272-0765
- Aerovent, Inc.**, One Aerovent Dr., Piqua, Ohio 45356. (513) 773-4611
- Agel Manufacturing Co.**, 1394 E. Church St., Adrian, Mich. 49221. (313) 263-5781
- Agnew-Higgins, Inc.**, 7091 Belgrave Ave., Garden Grove, Calif. 92641. (714) 893-1301
- Agtronics Mfg. Co.**, 1560 State St., Barstow, Calif. 92311. (714) 256-4755
- Ainsworth, Inc.**, 5151 S. Syracuse St., Englewood, Colo. 80110. (303) 771-6310
- AIR, Inc., (Aerostatics Instrumentation and Research, Inc.)**, 1081 E. 2200 North, Logan, Utah 84321. (801) 752-3323
- Airco Cryoplants Corp., Sub. of Airco Industrial Gases**, 575 Mountain Ave., Murray Hill, N. J. 07974. (201) 464-8100
- Aircon Corp.**, 201 Carrousel Towers, Cincinnati, Ohio 45237. (513) 821-1996
- Air Control Industries, Inc.**, 213 McLemore St., Nashville, Tenn. 37203. (615) 242-3448
- Air Conveying Corp.**, P. O. Box 402, 135 W. Taft Dr., S. Holland, Ill. 60473.
- Air Correction Div. UOP**, Tokeneke Rd., Darien, Conn. 06820. (203) 655-8711
- Air Filter Corp.**, 4554 W. Woolworth Ave., Milwaukee, Wis. 53218. (414) 353-5800
- Air Filters, Inc.**, 29 Crescent St., Brooklyn, N. Y. 11208. (212) 647-5100
- Airkem, Div. of Airwick Industries, Inc.**, 111 Commerce Rd., Carlstadt, N. J. 07072. (201) 933-8200
- Air Maze Div., Rockwell International Corp.**, 25000 Miles Rd., Cleveland, Ohio 44128. (216) 292-6800
- Air Pollution Industries, Inc., (Air Pol)**, 95 Cedar La., Edglewood, N. J. 07631. (201) 871-3855
- Air Products & Chemicals, Inc.**, P. D. Box 538, Allentown, Pa. 18105. (215) 395-4911
- Air Purification Methods, Inc.**, 6340 Industrial Dr., Hopkins, Minn. 55343. (612) 941-1744
- Air Resources, Inc.**, 800 E. Northwest Hwy., Palatine, Ill. 60067. (312) 359-7810
- Air Systems, P. O. Box 428**, Leeds, Ala. 35094. (205) 252-2181
- Air Transmission Systems, Inc.**, 182 Second St., San Francisco, Calif. 94105. (415) 986-1090
- AIRVAC Div., National Homes Construction Corp.**, P. O. Box 508, Rochester, Ind. 46975. (219) 223-3980
- Ajax International Corp.**, P. O. Box 4007, Santa Barbara, Calif. 93103. (805) 966-1796
- Alaska Testlab**, 503 E. 6th Ave., Anchorage, Alaska 99501. (907) 272-3428
- Albany Engineered Systems, Broughton Filters**, Quaker Rd., Glens Falls, N. Y. 12801. (518) 793-8801
- Alconox, Inc.**, 215 Park Ave., S., New York, N. Y. 10003. (212) 473-1300
- Aidan Rubber Co.**, Tioga & Salmon Sts., Philadelphia, Pa. 19134. (215) RE9-6500
- Alken-Murray Corp.**, 111 Fifth Ave., New York, N. Y. 10003. (212) 777-6560
- Allen & Hoshall Consulting Engineers**, 2430 Poplar Ave., Memphis, Tenn. 38112. (901) 327-8222
- Allen Ventilator Div., Solaronics, Inc.**, 704 Woodward, Box 217, Rochester, Mich. 48063. (313) 651-5333
- Allied Chemical Corp., Industrial Chemicals Div.**, P. O. Box 70, Morristown, N. J. 07960. (201) 538-8000
- Allied Chemical Corp., Specialty Chemicals Div.**, Park Ave. & Columbia Ave., Morristown, N. J. 07960. (201) 538-8000
- Allied Colloids Inc.**, One Robinson La., Ridgewood, N. J. 07450.
- Allied Laboratories**, 7009 W. Higgins Ave., Chicago, Ill. 60656. (312) 631-1553
- Allied-Chalmers**, 1205 S. 70th St., Milwaukee, Wis. 53201. (414) 475-2000
- Alnor Instrument Co.**, 420 N. La Salle St., Chicago, Ill. 60610. (312) 467-1331
- Alpha Analytical Laboratories**, 56 Water St., Jersey City, N. J. 07304. (201) 434-6778
- Alpha Labs., Inc.**, P. O. Box 95, Elverson, Pa. 19520. (215) 286-5131
- Alpine American Corp.**, 3 Michigan Dr., Natick, Mass. 01760. (617) 655-1123
- Alsop Engineering Corp.**, 900 Center St., Milldale, Conn. 06467. (203) 628-9661

- Alvord, Burdick & Howson**, 20 N. Wacker Dr., Chicago, Ill. 60606.
- Ambient Systems Inc.**, P. O. Box 234, Hastings-on-Hudson, N. Y. 10706. (914) 693-5812
- American Air Filter Co., Inc.**, 215 Central Ave., Louisville, Ky. 40208. (502) 637-0011
- American Air Filter Co., Inc., Pulsco Div.**, 126 W. Santa Barbara St., Santa Paula, Calif. 93060. (805) 525-6641
- American Cast Iron Pipe Co.**, 2930 16th St., N., P. O. Box 2727, Birmingham, Ala. 35202. (205) 325-7701
- American Chemical & Refining Co., Inc.**, 36 Sheffield St., Waterbury, Conn. 06714. (203) 757-9231
- American Colloid Co.**, 5100 Suffield Ct., Skokie, Ill. 60076. (312) 966-5720
- American Combining Corp.**, 72-36 Birchell Ave., Far Rockaway, N. Y. 11692. (212) NE4-8000
- American Coolair Corp.**, 3604 Mayflower St., Jacksonville, Fla. 32205. (904) 389-3646
- American Cyanamid Co.**, Berdan Ave., Wayne, N. J. 07470. (201) 831-1234
- American Instrument Co.**, 8030 Georgia Ave., Silver Spring, Md. 20910. (301) 589-1727
- American Lava Corp.**, Cherokee Blvd., Chattanooga, Tenn. 37405. (615) 265-3411
- American Meter Co.**, 13500 Philmont Ave., Philadelphia, Pa. 19116. (215) 673-2100
- American Norit Co., Inc.**, 6301 Glidden Way, Jacksonville, Fla. 32208. (904) 765-3584
- American Permac, Inc.**, One Commercial Ave., Garden City, N. Y. 11530. (516) 747-7700
- American Pipe Services, Inc.**, 2231 Edgewood Ave., Minneapolis, Minn. 55426. (612) 545-0271
- American Process Equipment Corp.**, 3309 W. El Segundo Blvd., Hawthorne, Calif. 90250. (213) 675-3307
- American Spectrographic Labs., Inc.**, 557 Minna St., San Francisco, Calif. 94103. (415) 863-0190
- American Standard, Inc., Air Quality Div.**, Detroit, Mich. 48232. (313) 931-4000
- American Standards Testing Bureau, Inc.**, 40 Water St., New York, N. Y. 10004. (212) 943-3156
- American Ultraviolet Co.**, 42 Commerce St., Chatham, N. J. 07928. (201) 635-8355
- Ameron Corrosion Control Div.**, 201 N. Berry St., Brea, Calif. 92621. (714) 529-1951
- Ametek, Inc. (Moline)**, 68 Thomas St., E. Moline, Ill. 61244. (309) 755-4561
- Ametek, Inc. (Pa.)**, Station Square Two, Paoli, Pa. 19301. (215) 647-2121
- Ametek/U. S. Gauge**, 900 Clymer Ave., Sellersville, Pa. 18960. (215) 257-6531
- AMF Cuno Div., AMF, Inc.**, 400 Research Pkwy., Meriden, Conn. 06450. (203) 237-5541
- Amicon Corp.**, 25 Hartwell Ave., Lexington, Mass. 02173. (617) 861-9600
- Amiproducts, Inc.**, 150-4 W. 28th St., New York, N. Y. 10001. (212) 242-1636
- Ammerman Co., Inc.**, 6285 Oasis Ave., Stillwater, Minn. 55082. (612) 439-7900
- Amprobe Instrument**, 630 Merrick Rd., Lynbrook, N. Y. 11563. (516) LY3-5600
- AMSCO**, 3100 S. Meacham Rd., Palatine, Ill. 60067. (312) 894-2000
- AMSCO Industrial Co.**, 2820 W. 23rd St., Erie, Pa. 16512. (814) 838-6511
- Amstro Corp.**, 131 Clinton Rd., Fairfield, N. J. 07006. (201) 228-3881
- Anacon, Inc.**, 30 Main St., Ashland, Mass. 01701. (617) 881-3000
- Analog Technology Corp.**, 3410 E. Foothill Blvd., Pasadena, Calif. 91107. (213) 449-8440
- Analtech, Inc.**, S. Chapel St. Ext., Newark, Del. 19711. (302) 737-6960
- Analytic Systems Associates, P. O. Box 134**, Pullman, Wash. 99163. (509) 568-5812
- Analytical Instrument Development, Inc.**, 250 S. Franklin St., West Chester, Pa. 19380. (215) 692-4575
- Analytical Measurements, Inc.**, 31 Willow St., Chatham, N. J. 07928. (201) 273-7500
- Analytical Research Labs., Inc.**, 160 Taylor St., Monrovia, Calif. 91016.
- Andco Environmental Processes, Inc.**, 51 Anderson Rd., Buffalo, N. Y. 14225. (716) 896-8181
- Andersen 2000, Inc.**, 2000 Sullivan Rd., P. O. Box 20769, Atlanta, Ga. 30320. (404) 768-1300
- Anderson and Angevine, Inc.**, 484 Main St., E. Aurora, N. Y. 14052. (716) 652-0282
- H. E. Anderson Co.**, 2100 Anderson Dr., P. O. Box 1006, Muskogee, Okla. 74401. (918) 687-4426
- Anderson IBEC, Div. of International Basic Economy Corp.**, 19699 Progress Dr., Strongsville, Ohio 44136. (216) 238-5800
- Antek Instruments, Inc.**, 6005 North Freeway, Houston, Tex. 77022. (713) 691-2265
- Antra Media Filter Co.**, P. O. Box 424, Shamokin, Pa. 17872. (717) 648-2481
- Anti-Air Pollution Systems, Inc.**, 4501 Curtis Ave., Baltimore, Md. 21226. (301) 354-0660
- Anti-Pollution Technology, Div. Thermotron Corp.**, 338 W. 12th St., Holland, Mich. 49423. (616) 392-1491
- API Standard Reference Materials**, Carnegie-Mellon University, Schenley Park, Pittsburgh, Pa. 15213. (412) 621-2600
- Apollo Chemical Corp.**, 35 S. Jefferson Rd., Whippany, N. J. 07981. (201) 386-9400
- Applied Biochemists Inc.**, 5300 W. County Line Rd., Mequon, Wis. 53092. (414) 242-5870
- Applied Research Laboratories**, 9545 Wentworth St., Sunland, Calif. 91040. (213) 352-6011
- APSEE, Inc.**, 8128 Mercury Ct., San Diego, Calif. 92111. (714) 225-0279
- A. P. T., Inc.**, P. O. Box 71, Riverside, Calif. 92502. (714) 682-6211
- Aqua-Aerobic Systems, Inc.**, 6306 N. Alpine Rd., Rockford, Ill. 61111. (815) 877-2501
- Aquafine Corp.**, 137 E. Tujunga Ave., Burbank, Calif. 91502. (213) 842-6158
- Aqualogic Inc.**, Amity Rd., Rt. 63, Bethany, Conn. 06525. (203) 393-0190
- Aquamatic, Inc.**, 2412 Grant Ave., Rockford, Ill. 61101. (815) 964-9421
- Aqua Media**, 1210 Elko Dr., Sunnyvale, Calif. 94086. (408) 734-4900
- Aquarium Systems Inc.**, 33208 Lakeland, Eastlake, Ohio 44060. (216) 946-9180
- Aquatair Corp.**, 111 W. First St., Dayton, Ohio 45402. (513) 222-8512
- Aquatech, Inc.**, 10620 Cedar Ave., Cleveland, Ohio 44106. (216) 421-0660
- Aquatech Labs., Inc.**, 8830 Curry St., Houston, Tex. 77016. (713) 691-1538
- Aqua Test Corp.**, 791 Massachusetts Ave., Arlington, Mass. 02174. (617) 272-3298
- Aquatherm, Inc.**, 2233 W. 2nd St., Santa Ana, Calif. 92703. (213) 543-1660
- Aquatic Control, Inc.**, P. O. Box 100, Seymour, Ind. 47274. (812) 643-2011
- Aquatronics, Inc.**, 4th & Cumberland Aves., Philadelphia, Pa. 19133. (215) RE9-0695
- Aquology Systems, Inc.**, P. O. Box 686, Bristol, R. I. 02809.
- ARCO Div., Envirotech Corp.**, 253 N. 4th St., Lebanon, Pa. 17042. (717) 272-2001
- Argo Plastic Products Corp.**, P. O. Box 18141, Cleveland, Ohio 44118. (216) 391-6210
- Armageddon Chemical Co.**, 431 Salem St., Durham, N. C. 27703. (919) 596-5426
- Armco Steel Corp., Mach. & Edt. Div.**, P. O. Box 723, Houston, Tex. 77001. (713) 621-7700
- Armstrong Machine Works**, 816 Maple St., Three Rivers, Mich. 49093. (616) 273-1415
- ARRo Labs., Inc.**, P. O. Box 686, Joliet, Ill. 60434. (815) 727-5436
- Arrow Sintered Products, Div. of Arrow Neumatics**, 7650 Industrial Dr., Forest Park, Ill. 60130. (312) 771-5010
- Arthur Brothers Co., Inc.**, 526 S. Seymour St., P. O. Box 1222, Fond du Lac, Wis. 54935. (414) 922-5331
- A-S-H Pump, Div. of Envirotech Corp.**, P. O. Box 635, Paoli, Pa. 19301. (215) 644-8400
- Astro Industries, Inc.**, 606 N. Olive St., Santa Barbara, Calif. 93101. (805) 963-3461
- Astro Science Corp.**, 9700 Factorial Way, S. El Monte, Calif. 91734. (213) 443-3211
- Atek Industries**, 7063 Vineland Ave., N. Hollywood, Calif. 91605.
- Atkins Technical, Inc.**, 147 Stengel & Archer Rd., Gainesville, Fla. 32601. (904) 372-3518
- Atlantic Ultraviolet Corp.**, 24-10 40th Ave., Long Island City, N. Y. 11101. (212) 54-6106

Caught In The Information Explosion? Then You Need Accounts Of Chemical Research!

ACCOUNTS gives you the information you need in all fields of chemical research. Its reviews are *short, concise and authoritative*. Most of the reviews are written by the investigators primarily responsible for the research described.

We know you'll profit from ACCOUNTS. According to SCIENCE 178, 471 (1972) ACCOUNTS is one of the *most important chemical journals in the world as measured by "impact factor"*.

And it costs just a small amount of money a year!

Get an up-to-date perspective on what's taking place in chemical research. Just complete and return the order form. We'll take care of the rest.

We make the sky blue again.

That isn't a "blue sky" promise. Because UOP's Air Correction Division has equipment that will control or eliminate most of the commonly encountered pollutants, whether they're particulates, aerosols or gases. And no matter how sticky, tarry, odorous or hard-to-oxidize.

With us, air pollution control means a lot more than just installing an air pollution control *device*. Our concept is designed to relieve you of most of the technical burden, and to provide the correction equipment and its installation on the most economical basis.

Solving an air pollution problem is a highly specialized field, but not a new one for us. We've been in it for over 25 years. And, with our total service capabilities, we have successfully solved many types of air pollution problems.

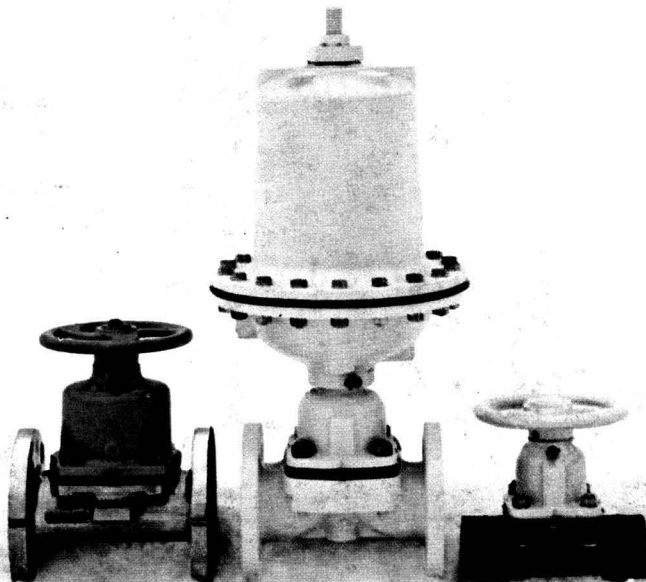

In short, we're your one-source, total responsibility, worry-free way to making your sky blue again.

Air Correction Division, UOP (Universal Oil Products Company),
Box 1107, Darien, Connecticut 06820. 203/655-8711.

Aircorrection
by **UOP**

The Pollution Solutions.

Give us your sludges, your slurries, your suspended solids. Whatever the solution, we have a diaphragm valve that can handle any kind of crud you want to treat.

In fact, we have three basic designs which are particularly effective for large plants engaged in pollution control. Our standard Weir type, the Straightway which provides unimpeded straight-through flow in either direction, and the Dualrange[®] which combines precision throttling with all the advantages of a diaphragm valve. In each valve the works are sealed in the bonnet, which assures you of zero stem leakage and protection from corrosion and contamination. The unique design makes in-line maintenance a snap.

We have all kinds of linings. Glass, Kynar, PVC, Saran, Tefzel, rubber, and special elastomers. Linings that stand up to everything from sulphur dioxide particles to tars, fats, abrasives, and gases.

We match the right combination of body, lining, and diaphragm materials to your service. For liquid and gaseous pollutants, we've got the solution for your solution: an ITT Grinnell Diaphragm Valve. We've also got some literature you ought to take a look at. Write to ITT Grinnell.

ITT Grinnell
260 West Exchange St., Providence, R.I. 02901
